Of course I believe that they will dissolve if my amendment is enforced. I know they will contest it in the courts, and I am well aware that many of our courts are subject to influences which make their decisions doubtful. I do not care to attack the courts, Mr. President, but I believe the courts will enforce this amendment of mine. Of course you will occasionally find a judge who will not; but it is a significant thing that in the testimony taken before the Interstate Commerce Committee of this body last winter this fact was disclosed, and it is a fact which makes the American people afraid of the courts.

COURTS DISQUALIFIED TO TRY CASES AGAINST CORPORATIONS.

When a case was to be tried in New York for the purpose of dissolving the Joint Traffic Association, which was a combination of railroads from Chicago to the seaboard, it was found that out of eight judges in that circuit only one man was qualified to try the case, because all the others held the stocks and bonds of the defendant corporations; all the others were the owners of stocks and bonds of railroads; and they had to go up into Vermont and find some rural fellow, who had not caught on to the modern methods of business, to try the case.

The evidence before the Interstate Commerce Committee of this body goes on to show that Judge Jennings said he had afterwards qualified, because he had disposed of his stock and bonds. Of course it is unpleasant to recite these things, but when they come in as sworn evidence before a committee of this body, it is well to call the attention of the American people to the facts.

I believe, after examining this bill, Mr. President, that very many of the items contained in it are in the control of trusts, and that the loss of revenue, if not one single trust be disbanded, will not be very great. We will continue to collect the revenue from raw sugar. We will not collect any revenue from refined sugar, because none comes in. As to the other items, the duties are so high that nothing comes in; and on the basis of last year's importations, if the trust which embraces boilers and radiators, house furnaces, steam and hot-water heating apparatus, etc., should refuse to dissolve, we should only lose $163,000 of revenue, for that is all that was collected last year. The duties range from 12 to 45 per cent. On chemicals, which embrace nearly everything in the chemical line in the bill, there is a trust, and if the trust should continue, so that these chemicals would be admitted free of duty, we should only lose $2,107,000. The duty on all these articles is from 16 to 80 per cent. On iron and steel the duties are from 17 to 82 per cent, and pretty nearly everything made of iron or steel is in a trust.

If the trust should continue and there should be no foreign competitor coming in to take the market, the loss of revenue would be $894,000.

On copper, lead, and zinc, which is in a trust, the duty is from 45 to 111 per cent, and the amount of duty collected is quite large, being $1,338,880. We consume more lead than we produce in our country, and we shall be obliged, no matter what the duties may be, to import some of it.

On glass the duty is from 48 to 62 per cent, and if the glass trust should continue, we should lose but $2,211,000, for that was the duty collected. The duty on leather is 20 per cent, and of that the duty on imports last year was but $898. On linseed oil the duty is 52 per cent, and on that the duty collected last year was $2,420. On paper the duty is from 28 to 50 per cent, and we collected last year $113,000. On rubber the duty is 34 per cent, and we collected last year $85,306.

On saws and screws the duty is from 25 to 29 per cent, and the duty collected last year was $1,374. On textile manufactures we collected $205,320, and the duties range from 29 to 132 per cent. On car wheels and other wheels the duty is from 40 to 41 per cent, and we collected in duty last year $131,000. On looking-glasses and on paints, varnish, arms, guns, fireworks, gunpowder—all of which are in a trust—collars and cuffs, oilcloths, etc., are all embraced in trusts, and the total loss of revenue if all the trusts I have named should continue would be $8,189,000.

If the trusts were all to continue and insist upon continuing and sharing the American market with the foreigners, if they have to compete with the foreigners, they could not keep up their prices, and the people of this country would get the benefit of reduced prices. We can afford to lose $8,000,000, and then collect the duty on sugar from the Hawaiian Islands.

According to the report of the Senate Committee on Finance, the duty on sugar from the Hawaiian Islands will amount next year to a little over $8,000,000. Two-thirds of the plantations in Hawaii are owned by Englishmen, Germans, Scandinavians, and

native Hawaiians. What reason is there why we should give them a bonus of $8,000,000 a year? If we should collect this revenue and the trusts should not disband, the revenue would not be affected at all. If our action and conduct are governed by reason and good judgment, there will be no trouble about revenue, while we could save the whole amount of the $8,000,000 by paying only what it is worth to carry the mails. For twenty years there has been no reduction in the cost of carrying the mails.

WE DON'T WANT MORE REVENUE BUT LESS EXPENSES.

We pay 8 cents a pound where we ought to pay but 1 cent, and we pay $30,000,000 where we ought to pay less than $20,000,000. What man in this country would, if he were paying $30,000,000 a year for express, pay the same price now as he paid twenty years ago? We pay $30,000,000 for that service, the same price we paid thirty years ago, and yet we refuse to change it. I tell you it seems to me the Republican party will have a good deal to answer for if it passes this bill and collects the revenues proposed by it, and continues to spend our money to fatten the coolie labor and the miserable, wretched native inhabitants of the Hawaiian Islands, and pays $10,000,000 more than it is worth to carry the mails of this country.

The expenses of this country have increased $100,000,000 in ten years. If they had increased according to the increase of population, they would have only increased $50,000,000. Instead of wanting more revenue, we want less expense. We should spend $50,000,000 less. We have a surplus in the Treasury of $125,000,000, and if we should spend $50,000,000 less there would be no deficiency and we should have revenue enough. Yet it is proposed to tax sugar in order to raise $52,000,000 under this bill; it is proposed to tax tea and raise another $10,000,000; and, furthermore, to tax beer and things that go into consumption per capita, and thus take from the people of this country seventy-five or eighty million dollars and give it in remitted duties to Hawaii, to the railroads, and then to build fortifications where they are not needed, and also to build ships to rot on the seas.

If the Republican party wanted to live, it ought to have brought in a bill here to reduce the expenses one-half and gone before the people on that issue, instead of coming here and being obliged to go before the people as the apologists of trusts and the champions of the infamies of the gold standard.

The leading student of the problem among the college professors of political economy, J. W. Jenks, of Cornell University, thus writes in the Political Science Quarterly for September, 1894, in the best magazine discussion that has thus far appeared upon this subject:

> I expect to live to see the day when the political economists * * * must consider that a very large proportion of the productive business of society is on the monopoly basis.

This was written in 1894. He certainly lived to see the day of which he had spoken.

In the report of the Lexow committee on trusts of the New York senate, already referred to, dated March 9, 1897, the proposition is stated thus:

> One after another industrial pursuits are surrendering to similar combinations, and it is safe to predict that, unless this movement subsides, most, if not all, of the industrial pursuits will reach a similar concentration, and will be followed by results similar to those indicated in this report.

In a recent able symposium on trusts in the New York Independent of March 4, 1897, the socialist view of the trust was presented by Daniel De Leon, formerly lecturer at Columbia University, New York City, and now editor of the socialist organ the People. He holds, as do an increasing number of thinking people, that the trust is an evolutionary movement in the line of progress and that it will go on until all lines of machine industry are thus combined. The natural and inevitable end of the development is held by these thinkers to be the public ownership and operation of the trust.

Certainly it would be far more in accord with justice and equity, rather than to allow this condition of things to continue, for the public to take, own, control, and operate all these properties. However, I do not advocate anything of that sort. I believe we can remedy the evil by other means, and that it is our duty to do so.

On the other hand, Otis Kendal Stuart, of Philadelphia, arguing in the same symposium from the standpoint of the individualist, denounces competition as developing waste, business mendacity, and fraud.

He has reached the point where it seems to be moral to absolutely abandon the whole theory of Anglo-Saxon civilization, and it is well that some advocate should arise to justify this condition of things, for we have already nearly approached that point. "The trust," he says, "is not only the next natural stop in business, it is a stop in social evolution; the trust is not only a conservator of energy and of wealth, it is a conservator of morals and religion."

I wonder what kind of morals and religion are taught by a gambling operation such as is carried on, for instance, by the sugar trust. Of course it is time that on high moral grounds somebody should appear to advocate this new doctrine of social existence. The new order of things needs a champion if they are to continue and revolution be avoided.

AMERICAN PEOPLE OBJECT TO THE PATERNALISM OF TRUSTS.

Mr. President, there has never from the day of our independence been a time, until recently, when a genuine American citizen did not resent the imputation of being a poor man, even if he did not have a dollar in his pocket. He is rich in his inheritance of religious and political liberty, rich in his confidence of manhood, and he was rich in opportunities to acquire wealth until deprived of them by legislation in the interest of corporate trusts and monopolies and of the manipulators of the world's standard of values, who aimed to prevent the masses from rising above the condition of poverty in order that their own accumulations might acquire greater value.

The time has not yet come when the American people will permit the plea of poverty to be entered in their behalf by trust magnates as an argument in favor of the continuance of trust methods. The same assertions that are made in behalf of the trusts might be repeated with equal force in favor of the establishment of a monarchy and the creation of orders of nobility, to be composed of the individuals who are so fond of prating about their regard for the welfare of the "poor people."

All that the American people want for themselves is a fair field and no favor. In business, as well as in politics, they believe that they can govern themselves better than any self-constituted dictators can govern them. The history of the American people demonstrates that this belief is well founded. One State after another, in obedience to the will of the people, has declared unlawful all trusts and combinations in restraint of trade.

The Congress of the United States so declared seven years ago by the passage of the act of June, 1890, which was Senate bill No. 1 of the Fifty-first Congress. The Supreme Court only recently affirmed the application of that act to combinations among railroad corporations. It remains for this Congress to enforce the provisions of the antitrust act of 1890 by providing an efficient penalty for its violation through the adoption of the amendment to the tariff act which I have proposed.

The future may develop that even this remedy may not avail, and that other remedies are required to be tried, but it seems to me that this remedy will be most effective and efficient, for I do not believe that the trusts in this country will undertake to continue, and thus deprive themselves of the exclusive control of the American market; but if this remedy does not avail, there have been many suggestions upon this subject, and I will briefly note two or three of them.

It has been suggested, first, that absolute publicity of accounts under Government control and audit must be insisted upon, as is coming to be done in a feeble way by railroads. This is the view of two eminent students of the problem, Prof. Henry C. Adams, of the University of Michigan, statistician of the Interstate Commerce Commission, and by Von Halle, in a work on Trusts, published by Macmillan & Co. in 1895.

It is the interesting suggestion of Professor Jenks, of Cornell University, that stock exchanges should not be allowed to list any of the securities of capitalistic monopolies without publishing most complete and sworn returns of the cost of construction, of capitalization, cost of products, etc., and that no stock shall be issued in excess of the actual investment.

The prohibition of factors' agreements. The New York senate trust committee, in its valuable report (obtainable, probably, from the secretary of state of New York), fully describes, on pages 22–25, inclusive, these agreements.

The control by a national commission of maximum charges, and the prohibition, some way, of discrimination in charges in towns or counties contiguous to each other. That is, it might be possible to prevent a trust from charging more in one place than in another except by the amount of the difference of freight rates. One of the great weapons of the Standard Oil and the meat trusts is to ruin competitors by reducing the rates in a place below what the same company is charging in neighboring places.

METHODS OF ROBBERY PURSUED BY THE STANDARD OIL TRUST.

There comes to my mind in this connection a very interesting illustration. In Colorado there are oil wells. Petroleum exists there in inexhaustible quantities and of excellent quality. An oil refinery was constructed at a cost of $2,000,000. That company was engaged in supplying that country with oil, when one day the Standard Oil Company began business in Pueblo and in other towns in Colorado, and sold oil at 5 cents a gallon until they wrecked and ruined the Colorado refinery and closed its doors.

The day after that was done the Standard Oil Company raised the price of their oil to 25 cents a gallon and continued to sell it at that price until they had made an immense profit and recouped the loss they had previously sustained, and to-day they charge 20 cents a gallon for their oil. In my own town an independent oil company began selling oil, and it was selling it at 8 cents a gallon,

for the trust had put it down to that price, and yet the independent company was able to live and did live and continued for two years of time.

Finally one day they sold out to the trust; and from that day to this we have been paying 16 cents a gallon for oil. It is argued that we can not protect ourselves against these things. Certainly, Mr. President, if we can not, our institutions totter to a fall. What is this but socialism in the most odious form?

PUBLIC OWNERSHIP.

If these remedies fail, we must resort, unless others are found, to the last remedy, that of public ownership.

This may take the form of public ownership of such natural sources of supply as anthracite coal mines and oil wells, or possibly the leasing of their operation to private companies; or it may take the form of public ownership and operation of all industries that have become practical monopolies. This remedy begins to loom up as a distant possibility, but is as yet too remote a contingency to come within the domain of practical politics. But of one thing we can rest assured, socialism is preferable to despotism, and the right of each citizen to enjoy the products of his toil must be maintained if we are to maintain our institutions.

Mr. President, the history of the past teaches this lesson. Shall we follow the course of all other peoples in the past, or shall we begin a new era? When was it that Rome was destroyed? When the original landed proprietors became paupers; when her farms became great estates. In the days of Cincinnatus 12 acres sufficed for each family; farms of 12 acres, owned by freemen, surrounded the walls of Rome, and no hostile legions could reach the city. When Rome fell, the individual proprietor was gone; the usurer had taken the land; the Roman citizen had been sold into slavery, and was toiling as a slave upon the estate a part of which he was once the proud owner.

The legions of Goths and Vandals that marched to the walls of Rome would have been scattered like chaff before the legions of Cæsar recruited from the farms of Italy. So it will be with us if we allow the usurer to further fasten his grasp upon our people. If we continue this organization of capital, by which those who can not combine are deprived of the products of their toil, I say the end is near.

Our last census shows that the earnings of 54 per cent of our people are less than $100 per year per capita. How near we come to European conditions, if $100 per capita by 54 per cent of our people is all they can earn and consume; and yet we stand upon this floor and boast about the high wages of the American toiler. It is well to review the last census, which shows that 250,000 men own forty-four billion dollars of the wealth of the United States and 52 per cent do not own their homes and have no property whatever.

These problems, Mr. President, are pertinent. We can no longer satisfy the American people by quarreling and by fighting a sham battle over schedules in a tariff bill. We have done that for the last several years, with first one party in power and then the other, until to-day the tariff issue has fled from our politics. Last week it was demonstrated more than ever before that you can no longer divide the American people upon a question of schedules in a tariff. Other and mightier questions now do and must in the future divide parties and press for solution.

Mr. WHITE. Mr. President, in view of the remarks made this morning by the Senator from Nebraska [Mr. ALLEN] and the remarks just made by the Senator from South Dakota [Mr. PETTIGREW], I desire to suggest that in the Forty-seventh Congress, second session, there was a report, No. 1013, made from the Committee on Finance by the present distinguished chairman of that committee, together with a short minority report, agreeing with the majority in their conclusions, but giving certain reasons in justification thereof. As that report bears directly upon the Hawaiian treaty, and is not very long, and is practically out of print, I suggest that it be printed as a document for the use of the Senate.

The PRESIDING OFFICER (Mr. CARTER in the chair). In the absence of objection, it will be so ordered.

The question is on the amendment proposed by the Senator from Kentucky [Mr. LINDSAY].

Mr. LINDSAY. On that I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. THURSTON. Let the amendment be stated, Mr. President.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. In paragraph 206, page 63, line 13, after the word "Sugars," it is proposed to strike out the words "not above No. 16 Dutch standard in color;" and also, after the word "proportion," in line 19, to strike out down to and including the word "pound," in line 23, as follows:

And on sugar above No. 16 Dutch standard in color, and on all sugar which has gone through a process of refining, 1 cent and ninety-five one-hundredths of 1 cent per pound.

So as to read:

Sugars, tank bottoms, sirups of cane juice, melada, concentrated melada concrete and concentrated molasses, testing by the polariscope not above 75 degrees, 1 cent per pound, and for every additional degree shown by the polariscopic test, three one-hundredths of 1 cent per pound additional, and fractions of a degree in proportion; molasses testing above 40 degrees and not above 56 degrees, 3 cents per gallon, etc.

The Secretary proceeded to call the roll.

Mr. DANIEL (when his name was called). I am paired with the Senator from North Dakota [Mr. HANSBROUGH]. If he were present, I should vote "yea."

Mr. HARRIS of Kansas (when his name was called). I am paired with the Senator from Wyoming [Mr. CLARK]. If he were present, I should vote "yea."

Mr. MALLORY (when his name was called). I am paired with the Senator from Vermont [Mr. PROCTOR]. If he were present, I should vote "yea."

Mr. MITCHELL (when his name was called). I am paired with the Senator from New Jersey [Mr. SEWELL]. If he were present, I should vote "yea."

Mr. MORGAN (when his name was called). I am paired with the senior Senator from Pennsylvania [Mr. QUAY]. If he were present, I should vote "yea."

Mr. TURNER (when his name was called). I am paired with the Senator from Wyoming [Mr. WARREN]. As I do not see him in the Chamber, I withhold my vote.

The roll call was concluded.

Mr. BATE. I wish to state that my colleague [Mr. HARRIS of Tennessee] is absent temporarily. He is paired with the Senator from Vermont [Mr. MORRILL]. My colleague, if present, would vote "yea."

Mr. JONES of Arkansas. I have a general pair with the Senator from Maine [Mr. HALE]. I transfer that pair to the Senator from Colorado [Mr. TELLER], and vote "yea."

Mr. CULLOM. I have a general pair with the senior Senator from Delaware [Mr. GRAY]. My colleague [Mr. MASON] being absent and, I believe, not paired, I take the liberty of transferring my pair with the Senator from Delaware to my colleague and vote. I vote "nay."

Mr. HARRIS of Kansas. I am requested to announce that the junior Senator from Delaware [Mr. KENNEY] is paired with the junior Senator from Pennsylvania [Mr. PENROSE].

Mr. CLAY (after having voted in the affirmative). I am paired with the junior Senator from Massachusetts [Mr. LODGE]. I see he is not present, and I withdraw my vote.

Mr. CULLOM. The Senator from Florida [Mr. PASCO] states that my colleague [Mr. MASON] is paired with the Senator from Virginia [Mr. MARTIN] and that the Senator from Wyoming [Mr. WARREN] is paired with the Senator from Washington [Mr. TURNER]. If agreeable to the Senator from Washington, the Senator from Delaware and the Senator from Wyoming may stand paired, and we may both vote.

Mr. TURNER. Very well.

Mr. CULLOM. I have cast my vote in the negative.

Mr. TURNER. I vote "yea."

Mr. MANTLE. I have a general pair with the Senator from Virginia [Mr. MARTIN]. That pair has been transferred to the Senator from Illinois [Mr. MASON]. I therefore am at liberty to vote, and I vote "yea."

Mr. HOAR. My colleague [Mr. LODGE] was compelled to leave Washington by ill health. If he were present, he would vote "nay."

The result was announced—yeas 27, nays 29; as follows:

YEAS—27.

Allen,	Cockrell,	Mills,	Tillman,
Bacon,	Faulkner,	Pasco,	Turner,
Bate,	Heitfeld,	Pettigrew,	Turpie,
Berry,	Jones, Ark.	Pettus,	Vest,
Butler,	Lindsay,	Rawlins,	Walthall,
Caffery,	McLaurin,	Roach,	White.
Chilton,	Mantle,	Smith,	

NAYS—29.

Allison,	Fairbanks,	McBride,	Spooner,
Baker,	Foraker,	McEnery,	Stewart,
Burrows,	Frye,	McMillan,	Thurston,
Carter,	Gear,	Perkins,	Wetmore,
Cullom,	Hanna,	Platt, Conn.	Wilson.
Davis,	Hawley,	Platt, N. Y.	
Deboe,	Hoar,	Pritchard,	
Elkins,	Jones, Nev.	Shoup,	

NOT VOTING—33.

Aldrich,	Gray,	Martin,	Quay,
Cannon,	Hale,	Mason,	Sewell,
Chandler,	Hansbrough,	Mitchell,	Teller,
Clark,	Harris, Kans.	Morgan,	Warren,
Clay,	Harris, Tenn.	Morrill,	Wellington,
Daniel,	Kenney,	Murphy,	Wolcott.
Gallinger,	Kyle,	Nelson,	
George,	Lodge,	Penrose,	
Gorman,	Mallory,	Proctor,	

So the amendment was rejected.

Mr. MILLS subsequently said: I wish to withdraw my vote and to announce my pair. I thought the Senator from New Hampshire [Mr. GALLINGER], with whom I am paired, was present, but I have learned that he was not, and I therefore wish to withdraw

my vote. If the Senator from New Hampshire had been here, I should have voted for the amendment.

The VICE-PRESIDENT. Is there objection to the withdrawal of the vote of the Senator from Texas? The Chair hears none.

Mr. BUTLER subsequently said: On the last yea-and-nay vote, the vote upon the amendment of the Senator from Kentucky [Mr. LINDSAY], I voted without observing that the Senator from Maryland [Mr. WELLINGTON], with whom I have a general pair, was not present. The result was announced with my vote standing, and he was absent. My vote did not affect the result, but I ask unanimous consent that I may withdraw it. I wish to take whatever action I can to protect my pair.

The VICE-PRESIDENT. Is there objection to the request of the Senator from North Carolina?

Mr. PETTUS. The request was not heard on this side of the Chamber.

The VICE-PRESIDENT. He voted by mistake. The Chair hears no objection, and leave is given to the Senator from North Carolina to withdraw his vote.

Mr. MILLS. I move to strike out section 206 and insert what I send to the desk in lieu thereof.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. It is proposed to strike out paragraph 206 and to insert in lieu thereof the following:

206. Sugar, tank bottoms, sirups of cane juice or beet juice, melada, concentrated melada, concrete and concentrated molasses, 40 per cent ad valorem.

Mr. JONES of Arkansas. This is the rate of the present law, the Wilson Act, 40 per cent.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Texas.

The amendment was rejected.

Mr. HOAR. I now propose the amendment of which I gave notice the other day, to come in at the end of the paragraph.

The SECRETARY. At the end of paragraph 206 it is proposed to insert the following proviso:

Provided, That the President of the United States shall appoint a commission, to consist of five persons, who shall report to Congress at its next regular session concerning the condition of the industry of producing and refining sugar in the United States; and what policy is best adapted to procuring a sufficient supply of sugar for the people of the United States at the least cost, and to encourage and promote the raising in the United States of a sufficient supply of sugar for domestic consumption; and what amount of duty on imports of sugar is necessary to enable the business of refining sugar in the United States to be conducted at a reasonable and moderate profit; and also what amount of duty upon such imports is expedient, having reference to raising a sufficient revenue to provide for the public expenditure; and to report such facts in regard to the business of producing and refining sugar, and whether the same is so conducted as to enable persons interested therein to exercise an improper control over the market; and such other facts as they may consider important and pertinent to the subject-matter of their inquiry; no more than three members of said commission to belong to the same political party.

Mr. HOAR. Mr. President, I do not wish to detain the Senate by any remarks upon this subject except to make one or two suggestions on the proposition that the sugar schedule ought properly to be the subject of a separate commission, to be dealt with by itself. This amendment does not raise the question of the wisdom or propriety of a general commission on the subject of a protective tariff. In regard to that, though some very worthy men favor it, there are, to say the least, some very great difficulties. If such a policy be ever adopted, it must be adopted after long and very careful consideration. The matter of the duty on sugar has been the bête noire of all persons concerned in the fiscal affairs of this country and England for nearly one hundred and fifty years.

I happened to see a collection of English political pamphlets covering the time of the administration of Lord Chatham, the time of our old French war and coming down to the time of the Revolution and the Napoleonic wars, and there is an immense mass of speeches, tracts, and essays on the sugar question; and you would almost think, on reading a great many of the very ablest of them, that you were reading a speech of the honorable Senator from Missouri [Mr. VEST] or the honorable Senator from Arkansas [Mr. JONES]. There is the same discussion of these perplexing subtleties, the same accusation of there being an improper influence by wealthy persons having special interests. That has been going on all the time there. It has been going on here certainly during the framing of the last half dozen tariff bills, and it will go on to the end of time unless a day comes when we make our own sugar and supply sugar ourselves. Then it will cease.

I suppose everybody remembers the anecdote in the life of Lord Chatham, of the dramatic and theatrical way in which he pronounced the words "sugar, Mr. Speaker," when he was William Pitt and in the House of Commons. I do not believe that any considerable portion of the American people, whatever the newspapers or anybody to be considered in the Senate may say, have any belief that the gentlemen on either side of the Chamber who have been concerned in the framing of tariff bills for the last few years have had any desire except to solve the difficult problem of the duty on sugar in the manner which is for the best interests of the country.

Of course they have had their theories about the protective policy, of the policy of a tariff for revenue, or free trade, and those theories have brought them to different practical conclusions. But the desire to find out what this great product ought to bear as its proportion of the expense of the country, what is a fair and just provision, having reference to the needs and exigencies of our revenues, and to provide and get at that without the slightest respect for persons, the slightest desire to get the favor of this great trust, I believe, has actuated both parties in the Senate.

It would be ridiculous to impute any other motive to the honorable Senator from Arkansas [Mr. JONES] and the honorable Senator from Texas [Mr. MILLS] and the honorable Senator from Missouri [Mr. VEST], who framed what is known as the Wilson Act; and if all three of those Senators were to express themselves on the subject, they would say it is as ridiculous to impute any other motive to the gentlemen who have framed the bill which we are now considering. But the trouble is that those gentlemen are themselves perplexed and doubtful.

If the Senator from Arkansas were to relate the history of the framing of the tariff bill which became the law in 1894, he would tell you of his own doubts, of his own changes of mind, after he supposed he had once come to a conclusion, and of the questions which he had to discuss with political friends of his own, equally honest and equally intelligent with himself or with anybody. The gentlemen who make these tariffs come to the consideration of this, which is one of the most profound and subtle questions in all finance, when a thousand other cares and interests are distracting their attention, with wearied-out and overburdened minds, with a burden of care which has broken down already one of the members of the committee and sent him home sick, which has broken down more than one of the Senators who are not upon the committee at all, but have merely had the duty of looking after the interests of their own constituents in the tariff bill; and so it is impossible to deal with this great subject in the way it deserves.

I believe the President can command the services of gentlemen for this especial purpose who would not lay aside their own large interests to hold any political office or to undertake such a jurisdiction and function with reference to the entire field of tariff legislation. They can command the ablest experts in the country. They can settle a great many of these questions. They can give us in a compact form a clear statement of the condition of things in regard to many of the subjects which have to be discussed, and they can put before us in a way that nobody can deny, nobody can impugn, nobody can charge as being the result of political passion or prejudice, the mode of business and the profits of the persons who are engaged in refining sugar. They can tell us what other countries are doing and what we ought to be doing in the matter of the great agricultural interest of raising beets.

Some Senators or some newspapers say we do nothing for agriculture. Mr. President, if you had in your hand the wand of a magician and could compel anything in the way of wealth or prosperity to spring up at its touch, you could not accomplish for agriculture any benefit like that which you could accomplish if you could cause the farmers of this country to raise the material for supplying this country with its sugar. Certainly next to the blessing which Providence gave us when we found these great and virgin wheat fields, ready for the cultivation of the immigrants, would be the benefit of such a condition as I have described, and that benefit can be accomplished and wrought by wise and judicious and bold legislation. I wish I could see both parties in this country eager and emulous in rivaling each other without political division to accomplish and bring about that great boon to the people of the Northwest.

Mr. President, as I said, we have implicit confidence in our committees. There is not a Senator in this Chamber who would rise in his place and express the slightest doubt of the absolute integrity of purpose and desire of the gentlemen who have framed this bill for the Senate, any more than we would of the gentlemen who framed the bill a few years ago; and although there are some utterances in the press and in speeches suggesting that there may be a doubt about that subject and that the sugar trust may be bribing this, that, or the other person, they are suggestions which are met in the minds of the serious, sober, and honest men of this country of all parties and all sections with the most absolute contempt. But at the same time, as I have said, the committees doubt themselves. If you were to ask the old Democratic committee to come and frame a sugar schedule for us to-day, and they brought one in to-morrow morning, if they were to spend a week over it, they would bring in another or some modification.

Now, let us have this one subject removed from the path of politics, if we can. We have to settle it for the present as well as we can in the pending schedule. But when we have done it, let us commit this to a body of five men, on which the President will put the ablest Democratic financier and statesman and the greatest Populist financier and statesman he can find. Let us have the result in their judgment of the whole subject.

A Senator has suggested to me in private that to have an entire

tariff commission would in the first place delay enormously the work upon this one subject, and in the next place it would involve a thousand considerations and policies which are not applicable to it.

Mr. THURSTON. May I ask the Senator from Massachusetts a question?

Mr. HOAR. Certainly.

Mr. THURSTON. Do I understand that the Senator from Massachusetts is urging an amendment of his own here which has not been reported by the Finance Committee?

Mr. HOAR. I do not understand that this is an amendment which relates to any duty or section. I submitted it to the Finance Committee and have their approbation of it.

Mr. ALLISON. The amendment was submitted to me here and I glanced it over, neither giving it my approbation or otherwise.

Mr. HOAR. Very well.

Mr. ALLISON. I did not see any special objection to it, but I trust the Senator from Massachusetts will at least give the Finance Committee an opportunity to look into it as a committee. I hope for the present he will withdraw it.

Mr. HOAR. Let it be referred.

Mr. ALLISON. The committee have before them several propositions respecting commissions. They have one covering the entire tariff question, and surely it seems to me it would be wise to postpone the consideration of so important a question as this until we can consider the whole subject. I hope the Senator from Massachusetts will withdraw his amendment.

Mr. HOAR. Certainly. I submitted it to the Senator in charge of the bill, and he made the reply which he has said. I supposed the committee were aware that I intended to propose the amendment, and that if they had preferred that I should postpone it they would have said so.

Mr. ALLISON. I was not aware that the Senator intended to propose it. The committee have four or five hundred amendments before them, and it has not been practical for them under the circumstances to examine all of them.

Mr. HOAR. I proposed it Friday. One member of the committee suggested that the schedule was not then disposed of, or the particular paragraph, I think. I withdrew it and said I would propose it later. Probably the Senator from Iowa did not hear what took place. I move that the amendment be referred to the Committee on Finance.

Mr. LINDSAY. Mr. President——

The VICE-PRESIDENT. The question is on agreeing to the motion of the Senator from Massachusetts to refer the amendment to the Committee on Finance.

The motion was agreed to.

Mr. JONES of Arkansas. I wish to make a suggestion in connection with this matter. Some years ago a proposition was made to take the whole tariff question out of politics and refer it to a commission. It was a Republican movement. The commission was appointed, the tariff question was investigated, and the commission recommended a reduction of 20 per cent all along the line. Instead of being acted on after it came in, it was incontinently thrown aside and did no good whatever, and, as a rule, it made the impression on gentlemen who think as I do, who have the same politics that I have, that the whole purpose of the movement was for delay, without accomplishing any good.

Mr. PLATT of Connecticut. Does the Senator from Arkansas refer to the commission which sat in 1883?

Mr. JONES of Arkansas. I do.

Mr. PLATT of Connecticut. That commission was appointed upon a resolution introduced by my predecessor in the Senate, Mr. Eaton. It was not a Republican measure at all.

Mr. MILLS. The commission was created by act of Congress.

Mr. LINDSAY. I desire to ask what action was taken on the motion to refer the amendment?

The VICE-PRESIDENT. The amendment was referred to the Committee on Finance.

Mr. LINDSAY. I rose for the purpose of objecting.

Mr. TILLMAN. Mr. President, I have the greatest respect for the Senator from Massachusetts [Mr. HOAR], and there is no man on either side of the Chamber for whose integrity of purpose and honesty and patriotism I have more respect. The Senator has been here so long and perhaps has been fretted so much by adverse newspaper criticism that he has grown callous and perhaps is not in touch with the masses of the American people. That may account for his utterance a moment ago, that the best people of this country on both sides, without regard to party, treat with contempt the insinuations and accusations which have been brought against the integrity of the Senate in framing the sugar schedule.

Mr. President, if there is one thing of which I am convinced it is that not one in a hundred of the American people is satisfied but that there has been corruption and rottenness in the framing of the sugar schedules in the two tariff bills, the one which is now the law and the one which is under consideration. It is about three weeks, I believe, or nearly three weeks, since I offered a resolution here asking for an investigation of these charges. Men who are permitted to go into the press gallery and who are given the privilege to sit there and hear our debates and send out their reports have over their own signatures charged directly that Senators are speculating in sugar stock, that Senators are in touch with the sugar barons, Searles, Havemeyer, and others, and when we consider the circumstantial evidence, the fact that there is a trust, a monopoly which notoriously and avowedly controls the American market and levies tribute upon the consumers as it pleases, and that the American people are helpless in the grasp of this octopus, which has throttled our freedom here in one sense, through the instrumentality of the Senate, I say, sir, that any Senator who undertakes to say that the American people are treating contemptuously these charges against this high body is entirely mistaken.

The people want an investigation. They want these charges cleared up. They want the men who are under accusation cleared and the reputation of the Senate restored, or else they want the men who have slandered the Senate punished and denied the privilege of coming in here to slander us. If those men have lied on us, then it ought to be shown up. If they can prove the charges which they have made, the Senate should act. I was going to offer an amendment that the commission (which, of course, could be honest and honorable or it could not be, according to the men selected) should take into the scope of its investigation not only the question how sugar is refined and what is a reasonable and proper tariff to protect American labor and capital against foreign competition, but whether the sugar trust has used undue means, improper methods to control legislation, and to get at the root of how it is and why it is that the American Senate can not touch sugar without being contaminated.

Mr. HOAR. Mr. President, I desire simply to say that I remain of my original opinion. We have heard a great deal of talk about the masses of the American people. Some people seem to have an idea that down beyond and below the ken of ordinary men, the men who get their living by honest work, who do their duty as honest citizens, is a great seething mass of humanity, which they speak of as masses, and which is moved and stirred by different motives and different opinions and ideas than those of persons with whom we deal.

I know through and through the character, the purposes, and the opinions of the men who get their living on the farms and in the workshops of Massachusetts. I am sprung from a race of Massachusetts yeomen. My friends and kinsmen and acquaintances and supporters, the men who think with me on questions of politics and social questions and religious questions, are of that class. I know what they are thinking about, if I know anything.

And I know something of the men who have built up those thirty-three great manufacturing cities that shine like resplendent jewels in her diadem. They are simple, sincere, honest, patriotic, liberty-loving, country-loving, God-fearing men. They think no evil; and, so far as they are concerned, appeals to vile prejudices and vile passions, general railing accusations, without specification either of man or of witness or fact, fall upon their ears as upon deaf ears.

Mr. TILLMAN. Will the Senator allow me?

Mr. HOAR. In a moment.

Mr. President, the kind of men who make up the laborers on the farms and in the workshops of the State of Massachusetts are the kind of men who are all over the country. There is not any great difference in the character or quality of American citizenship. Their children and kinsmen have settled the prairies of the West, and have gone to the Pacific and are building up a new empire to look out upon Asia as the empire of one hundred years ago that our fathers built looked out toward Europe. They are building there a larger, a more intelligent, a more powerful, a more glorious, and a wealthier New England. They are to have there the streets of a more cultured Boston, the halls of a more learned Harvard, the workshops of a busier Worcester.

The same thing which New England has done for the West, Virginia and the old States, with their glorious history, have done, are doing, and will do hereafter for the more southern parallels of latitude.

There is not a more glorious history of republican liberty and republican wisdom which ever could be written on this planet than the history of the great Commonwealth of Virginia, which is now so honorably represented in this body. I think I know, not from contact but from study, something of the opinion and the character and the temper of the people of that section of the country also. Whatever may have been their opinions or their errors in regard to some constitutional questions, they are an honest as they are a brave people; and the character of that people is impressed upon the men who represent them in this and the other House. And I hold that these charges upon this great body are not only preposterous, but I think they are infamous.

Now I will listen to the Senator from South Carolina.

Mr. TILLMAN. I desire to state that as to the seething mass of ignorance which the Senator designates as the masses——

Mr. HOAR. That I utterly deny. I said the notion that such a thing existed was a mistake.

Mr. TILLMAN. Well.

Mr. HOAR. I said there was no such thing in this country. That is what I said. My language is not to be perverted.

Mr. TILLMAN. I do not want to pervert your statement. I am merely trying to get at the honest interpretation of your words. You are the last man I would undertake to misrepresent to his face.

As I understood the Senator, he seemed to think that he knows as much about the masses as I do. While I claim no special mission here as a representative of the masses, I do claim to have come here much more recently than the Senator; to be a farmer; to have received thousands of letters from my fellow-farmers all over the North and West and South, hundreds within the last ten days, since this resolution to investigate the sugar fraud or sugar scandal was introduced here; and I know that the American people do not consider the charges infamous unless we will prove them so by bringing the witnesses to the bar of the Senate and making them answer the questions which we now have a right to ask. To hide behind the Senatorial toga and say we are so pure and high and noble that we can not be investigated is a confession of guilt before the people. That is what it is, and they so consider it; and they will consider the Senate disgraced if it lies under the accusation already affirmed by respectable correspondents over their own signatures and dare not investigate.

To go one step further, Mr. President, I said when I introduced the resolution that I had no personal animosity against any man or any set of men. I was absolutely impartial in my discussion of the subject, in calling attention to the fact that in 1894 the accusations lay against the Democratic Finance Committee, while recently they lie against the Republican Finance Committee, and that it did not matter which committee was interested or involved, the same charge—that the sugar trust controls the Senate and could get any differential it wanted—led the American people to believe that bribery was abroad and that men here, either directly or indirectly or as attorneys or something else, were receiving undue compensation and dishonorable money.

I believe it, and I have asked for an investigation. I have had information furnished me which says that they will prove that Senators have speculated in sugar stock. If they do not furnish it, they are liars. Until you give them the opportunity to prove it you are convicted by your own action of being afraid to investigate for fear you will find that you have in your midst bribe takers and corrupt men.

Mr. LINDSAY. In paragraph 206, page 63, line 22, I move to strike out "ninety-five one-hundredths" and to insert in lieu thereof "eight-tenths;" so as to read:

On all sugar which has gone through a process of refining, 1 cent and eight-tenths of 1 cent per pound.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the Senator from Kentucky.

Mr. LINDSAY. Mr. President, if this amendment be adopted, there will be no question about the sugar refiner receiving a differential of 5 cents on each 100 pounds in addition to the 38 cents to be paid him or to be paid by the importer for his benefit on account of the export duties paid by the German Government to those who export refined sugars from that country to the United States.

If you take 96 degrees polariscopic test, it will leave a difference of 17 cents on the hundred pounds between raw sugar and refined sugar, and that is more than the differential under the existing tariff law.

I find that under the tariff law as it now exists the American Sugar Refining Company declares annually upon $37,500,000 of common stock 12 per cent dividend, and upon $37,500,000 of preferred stock 7 per cent dividend, making an average upon its capital stock of $75,000,000 of 9½ per cent profits each year.

Out of seventy-seven stocks representing railroads and industrial corporations reported by Henry Clews there is not a single stock that pays such dividends as are being paid by the sugar refining company. It is a clear case, therefore, that this industry, under existing law, is receiving benefits under our revenue system that it ought not to receive, even if it be admitted that the $75,000,000 of stock represents $75,000,000 of cash actually invested in the enterprise; and no man pretends that it represents more than half that amount of cash. Take the actual money invested in this combination at $37,500,000, and it is paying to-day 19 per cent in the way of dividends—dividends such as are not approximated by any other industry whose stocks are reported this week by Henry Clews & Co.

Now, the Senator from Massachusetts proposes that we shall send out a committee to ascertain certain facts. I submit to the Senate that concerning the existence of those facts there is no dispute. When this committee comes back and reports, it can not report anything else than is conceded on all sides by the sugar trust and those who defend it. It is to inquire, first—

What policy is best adapted to procuring a sufficient supply of sugar for the people of the United States at the least cost, and to encourage and promote the raising in the United States of a sufficient supply of sugar for domestic consumption.

This Senate has settled the last inquiry, that the way to secure a sufficient supply for domestic consumption is to encourage the sugar industry by protection such as has never been given to any other industry. Why inquire, when that question has been considered and settled? Why send out a commission to ascertain and report a fact which has been already considered and decided by the Congress of the United States? Further—

What amount of duty on imports of sugar is necessary to enable the business of refining sugar in the United States to be conducted at a reasonable and moderate profit.

We know what the existing duties are. We know that under those existing duties the sugar-refining industry each year realizes inordinate and extortionate profits upon the business at the expense of the people of the country; and when the Senate comes to act upon the proposition, what shall be done in the face of conceded facts, the Senate increases the protection given to the sugar trust and thereby declares in favor of increasing its profits.

Mr. HOAR. May I ask the Senator from Kentucky a question?

Mr. LINDSAY. Yes, sir.

Mr. HOAR. What amount of duty, in his judgment, is necessary to enable the business of refining sugar to be conducted at a reasonable profit?

Mr. LINDSAY. My judgment is, not a single cent of duty in excess of that which is levied upon the raw product.

Mr. HOAR. What amount of duty, absolutely, without any regard to what may be done with the raw product?

Mr. LINDSAY. You have decided that the revenue necessities of the country determine that $1.75 on each 100 pounds of sugar is necessary.

Mr. HOAR. But the Senator does not accept that decision. I want to know what he thinks is necessary.

Mr. LINDSAY. I say 40 per cent ad valorem, without any differential whatever, will enable the sugar industry to thrive and enable the sugar-refining business to live.

Mr. HOAR. Does not the Senator think 30 per cent ad valorem would do it?

Mr. LINDSAY. I am willing to try it.

Mr. HOAR. Does the Senator think 30 per cent ad valorem would be a sufficient rate?

Mr. LINDSAY. I prefer leaving that question to those engaged in the industry. I know by the experience of the last three years that 40 per cent is abundant.

Mr. HOAR. My honorable friend does not quite answer my question. I do not want to press it unduly, but I ask him if he thinks 30 per cent would do it?

Mr. LINDSAY. I think it would.

Mr. HOAR. Does he think 20 per cent would?

Mr. LINDSAY. But it is not a question of 30 per cent.

Mr. HOAR. Will the Senator be kind enough to tell me if he thinks 20 per cent ad valorem would be enough?

Mr. LINDSAY. That is a method of cross-examination to which I do not think I ought to submit.

Mr. HOAR. I will state what I wanted to get at, if the Senator will pardon me.

Mr. LINDSAY. Yes.

Mr. HOAR. Will he tell us the lowest amount of protection ad valorem that he thinks would do it? I do not want to put half a dozen questions. I want to get——

Mr. JONES of Arkansas. Mr. President——

Mr. HOAR. No, no. I want to know if the Senator will tell us the lowest that he thinks will do it.

Mr. LINDSAY. I will say that 30 per cent will do it and has done it. In my opinion, that would be ample protection.

Mr. HOAR. Now, will the Senator tell me whether 20 per cent will do it?

Mr. LINDSAY. The Senator would then ask me if I thought 15 would.

Mr. HOAR. Certainly.

Mr. LINDSAY. And then if I thought 10 would.

Mr. JONES of Arkansas. If the Senator will permit me——

Mr. HOAR. Allow me one minute. It is very obvious that the Senator from Kentucky himself does not know and has not an opinion as to what is the lowest practicable limit.

Mr. JONES of Arkansas. I only ask the Senator from Massachusetts to look at the proposition fairly. His question submitted to the Senator from Kentucky was what difference there should be between the tariff on the raw and the refined sugars to enable the refiners to live.

Mr. HOAR. No; I did not ask that question.

Mr. JONES of Arkansas. What was the Senator's question?

Mr. HOAR. What amount of duty would enable the business of refining sugar to be conducted in this country at a reasonable and moderate profit? I did not say anything about raw sugar or manufactured sugar.

Mr. JONES of Arkansas. Very well. I understand the Senator from Kentucky answered the same that was levied on the raw. That was a distinct and plain answer, which would apply to any rate that could be imposed. He meant if you put 40 per cent on raw, 40 per cent would be the rate on the refined. If you put 50 per cent on the raw, it would be 50 on the refined, and no more.

Mr. HOAR. Suppose raw was free.

Mr. LINDSAY. Then nothing.

Mr. JONES of Arkansas. Then, in his opinion, the refined should be free. That was the effect of his answer. It was plain.

Mr. HOAR. I did not ask the Senator whether he thought it should be free. I asked him whether the business could be conducted at a reasonable and moderate profit at a particular duty.

Mr. JONES of Arkansas. His answer was that it required no additional tariff above that on raw to make the interest succeed, and that was a clear and distinct business answer.

Mr. LINDSAY. Mr. Havemeyer stated in 1880 that if you would give him free sugar he needed no protection whatever. He said that he would undersell the English in their own markets if you would give him free sugar. In 1890 the Republican party gave the sugar trust free sugar, and in the face of the statement of Mr. Havemeyer that he needed no protection whatever, it gave to the sugar trust 50 cents on each 100 pounds of sugar by way of a subsidy to it. As was said this morning, the bill came over from the House with 40 cents on each 100 pounds, and for some reason, which the Republican side of the Chamber can probably explain, it was raised from 40 to 50 cents on the hundred pounds.

Three years ago the Senator did not think the sugar industry needed any such encouragement or any such protection as it is now proposed to give it. The original report from the Finance Committee in 1893 as to the tax on sugar was as follows:

All sugars, tank bottoms, sirups of cane juice or of beet juice, melada, concentrated melada, concrete and concentrated molasses testing by the polariscope not above 80 degrees shall pay a duty of 1 cent per pound, and for every additional degree or fraction of a degree above 80 degrees and not above 90 degrees shown by the polariscope test, shall pay one one-hundreth of a cent per pound additional, and above 90 degrees and not above 96 degrees, for every additional degree or fraction of a degree shown by the polariscope test, shall pay a duty of two one-hundredths of a cent per pound additional, and upon all sugar testing above 96 degrees by polariscope test, or above No. 16 by the Dutch standard in color, there shall be levied and collected a duty of one-eighth of 1 cent per pound in addition to the duty imposed upon sugars testing above 96 degrees.

Afterwards the committee fell upon the ad valorem principle and reported that portion of the bill which is now a law. The junior Senator from Massachusetts [Mr. LODGE] moved to substitute for that provision the original report of the committee. On the call of the yeas and nays every Senator on the other side of the Chamber voted in favor of it, and my friend from Massachusetts [Mr. HOAR] voted in favor of it.

The pending bill commences with a cent at 75 degrees, and adds three-tenths of a cent for every additional degree. Three years ago the other side of the Chamber was in favor of giving to the sugar industry a tariff at the rate of 1 cent a pound for 80 degrees, and an additional one-hundredth of a cent up to 96 degrees, and then two hundredths of a cent above, and one-eighth of a cent differential. If in 1893 that was all the protection the sugar industry ought to have had, how is it that in 1897 it is indispensable that we shall give to it nearly 50 per cent more protection than was then necessary? At 1.80, or 1 cent and eight-tenths, the differential will be 17 cents, ample to pay the difference of expense in converting raw into refined sugar. Under the present law less than 170,000,000 pounds of refined sugar found its way into the American market, against 3,600,000,000 pounds consumed by the American people. The present tariff is almost a tariff of exclusion, and this bill as it now stands, if enacted into law, will be a tariff of absolute exclusion.

Let us see how the refined sugar from foreign countries gets into this country at all and finds a market. I read from the Journal of Commerce of last Friday the New York market:

Granulated sugar, American, sold by the American Sugar Refinery at 4¼ cents per pound.

And the sugar of every American refinery sold at the same price. But when you come to the foreign sugar, it sold at from 4¼ to 4⅛ cents a pound, three-eighths of a cent less in the market than the American refined sugar sold at. Therefore no foreigner can now bring his sugar here and sell it in competition with the protected sugar of the sugar trust under the existing law unless he underbids the sugar trust, and with the willingness to underbid the trust, last year only 170,000,000 pounds were brought in out of a consumption of 3,600,000,000 pounds.

In the face of all, the Senate, true to its instincts, true to its history, in 1890, instead of reducing or accepting the protection given by the House of Representatives, has increased the protection given by the House of Representatives. One cent and eight hundred and seventy-five thousandths of a cent was just as much as the other House thought ought to be given to the sugar trust on refined sugar. The Senate thinks that 1 cent and ninety-five one-hundredths ought to be given, and it appears from the newspaper accounts of the executive sessions held by our friends on the other side—which are no more secret than the executive sessions which are from time to time held by the Senate—that there are Senators on the other side who believe that the increase from eight hundred and seventy-five thousandths to ninety-five one-hundredths involves a subsidy to the sugar trust of from four to five million dollars a year. Under existing laws, 9½ per cent, or nearly $10,000,000, is paid out to the sugar trust in the way of profits. Under the law as it will be, if the pending bill be adopted, the profits will be from thirteen to fifteen million dollars.

Mr. ALLISON. Mr. President, the Senator from Kentucky [Mr. LINDSAY] now proposes to strike out what has been inserted already in Committee of the Whole and insert eight-tenths or eighty one-hundredths. I shall make a point of order upon that amendment, that we can not strike out what has been inserted and insert something else later on.

Mr. JONES of Arkansas. Will the Senator allow me to interrupt him right there?

Mr. ALLISON. Yes, sir.

Mr. JONES of Arkansas. When this bill was taken up, among the first amendments offered was one involving almost the same point. I then asked the question if technical points were to be made, or if we should have to be careful in offering amendments so as not to forfeit our rights of subsequently offering amendments to amendments which had been adopted. My understanding was that it was stated on the other side of the Chamber that there was to be no technical advantage taken on things of that kind. I respectfully submit, therefore, that a vote ought to be allowed on this amendment if any Senator wants it.

Mr. ALLISON. On the statement of the Senator from Arkansas, I shall not insist on my point.

Mr. JONES of Arkansas. I think that is fair.

Mr. ALLISON. I intend to deal as fairly as I can, but hereafter when we have taken a vote, as we have on this subject, I think we will never end a question unless we abide by the vote upon it.

Mr. President, I want to say a few words in opposition to the amendment proposed by the Senator from Kentucky, and in order that I may speak intelligently, at least to myself, I want to make some comparisons as to this bill as reported by the Senate Committee on Finance and as to the bill as it came to us from the House of Representatives.

The only change which is of value in this discussion which has been proposed by the Senate Committee on Finance is the change that applies to sugars above No. 16 Dutch standard in color and to refined sugars. We also have proposed—which has not yet been voted upon—that sugars testing 87 degrees by the polariscope and less shall pay one-tenth of a cent less per pound than the sugars above 87. Those two amendments are the only amendments which have been proposed by the Finance Committee to this schedule.

What is the House schedule? The House schedule begins with sugars which test 75 degrees by the polariscope, and fixes the duty upon those sugars at 1 cent a pound. It then has an ascending scale for each degree of the polariscope of three one-hundredths of a cent per pound running through the entire scale. Now, I want to ask Senators why it is that three one-hundredths of a cent is applied to each degree of the polariscope? I want to call the attention of my friend from Kentucky to the answer which I will give, and that is, that it is the result of absolute experiment, as shown not by the value of sugar in the various markets of the world, but as shown by the value of the sugar in the great port of New York, where all sugars are equalized in the local market, whatever may have been the price paid for those sugars in Manila, or in Egypt, or in any of the islands of the sea.

Therefore it was that what is known as the merchants' schedule was established. Who are these merchants? They are a committee of the great merchants of New York, not refiners of sugar, but those who deal with sugar in the markets of the world. They came before the Committee on Ways and Means of the House of Representatives and, as shown in their testimony, they disclosed that these various sugars in bond in the city of New York, including the original market price in the place of production, including the cost of transportation from the place of production to the city of New York, including commissions and all local charges in the place of exportation, and every element which enters into the price of these raw sugars, are all equalized, because they come there to one common market, and you must take that scale which is disclosed in the table presented by the Senator from Missouri [Mr. VEST] as respects these various values of sugar.

When the House of Representatives fixed this scale of three one-hundredths of a cent as a proper ascending scale covering the market value of all these sugars in the great city of New York, they found that scale to be so equally and evenly adjusted that the highest variation was only a fraction of two one-hundredths of a cent on the various grades. In other words, it was an equal and exact equilibrium as respects every ounce of sugar imported into the United States from all the countries outside of our boundaries.

That being the scale, what is the effect of that scale? It is that whether I purchase sugars in the Philippine Islands, whether I purchase them in Egypt, or whether I purchase centrifugal sugars in Cuba or San Domingo, when I get those sugars into the common market of consumption, whether that consumption is for refining or for other purposes, there is an exact equivalent of every class of sugar. Therefore, in the nature of things, there can be no practical profit arising from these sugars to the refiner of sugars; and so it is that this ascending scale, running up from 96 degrees of the polariscope, discloses a duty upon sugar of 1.68 cents per pound as against 1 cent per pound upon sugars that test only 75.

Whilst this is true in the market of New York, I agree that it is not mathematically true as to sugars in other respects. I could have shown, had I not been anxious to secure a vote upon the former amendment proposed by the Senator from Kentucky, that the duty on all the sugars that are used by the refiners of sugar in the United States to the extent of 75 per cent, at least, of those sugars under this schedule, without the differential which is here found, would be more than the duty upon the refined sugars. I made this calculation myself for the purpose of satisfying myself of its absolute accuracy; and I found that sugars testing 95 degrees by the polariscope—and it is well known that all the sugars which are refined by the American refiners are sugars that are imported testing 88 degrees or more, only a few coming in under that test—the large body come in from 95 to 96.

Now, take sugar testing 95 degrees, and the duty by this bill, without the differential upon that sugar, would be $1.75 per hundred pounds and forty-four one-thousandths in addition; in other words, the sugars that are refined in the United States under the scale proposed by the Senator from Kentucky a few moments ago would pay more per pound than would the refined sugars. Sugars testing 96 would pay $1.75 and seventeen one-hundredths; sugars testing 97 would pay $1.75 and twenty-nine one hundredths—speaking only in round numbers—those testing 98, $1.75 and thirty one-hundredths, and those testing 99, $1.75 and twenty-two one-hundredths.

Mr. JONES of Arkansas. Would the Senator object to stating how he arrives at those figures?

Mr. ALLISON. Certainly not. I was about to state that I arrived at those figures by taking the number of pounds of raw sugar which are required to produce a given number of pounds of refined sugar—that is to say, given the number of pounds of raw sugar that will produce 100 pounds of refined sugar, I find, taking the 95-degree polariscopic test, that it will take 120.54 pounds of raw sugar to make 100 pounds of refined sugar, according to the absolutely accurate test made by Secretary Carlisle as Secretary of the Treasury, and produced by him, as I have been told, after the most accurate calculations of the best chemists and experts obtainable on the sugar question.

Mr. JONES of Arkansas. Does the Senator mean that to apply to sugar testing 95 degrees?

Mr. ALLISON. I mean that to apply to sugar testing 95 or 96 degrees, or whatever it may be.

Mr. WHITE. I understand the Senator takes the Treasury table heretofore alluded to as No. 102, and from that calculation is made the printed table we have had.

Mr. ALLISON. I do.

Mr. JONES of Arkansas. That table shows that it takes 107 pounds of sugar testing 96, instead of 120 pounds.

Mr. ALLISON. I had the table here a moment ago. I find I was mistaken in the statement.

Mr. WHITE. I think the Senator will find the figures otherwise on that test.

Mr. ALLISON. Has the Senator the table which was produced by the Senator from Missouri?

Mr. WHITE. It was put in the RECORD, and will be found on page 1987.

Mr. ALLISON. I had the paper here a moment ago.

Mr. JONES of Arkansas. Possibly the Senator may have mixed his figures.

Mr. ALLISON. I have not mixed my figures.

Mr. JONES of Arkansas. It is the 88 sugar which takes 128 pounds, and not the 96, which takes but 107.

Mr. ALLISON. Not having the table before me, I am not able to quote the figures with absolute accuracy.

Mr. JONES of Arkansas. I understand the process by which the Senator arrives at his figures.

Mr. ALLISON. I take the 95 sugar, of which it takes 109 pounds and thirty-four one-hundredths, and I find that this bill gives upon that class of raw sugar a higher duty upon 100 pounds than is given by the House bill upon sugars testing 100. I am talking about the bill as it came from the other House. I am undertaking to show, if I can, that as to the amendment proposed by the Senate committee and as to the bill as it came from the House, the difference is only in one single thing, and that is that we allow 1.95 as against 1.875 in the bill as it came from the House, or a difference of 7½ cents a hundred pounds.

Mr. LINDSAY. I submit to the Senator that that increase was the only criticism I made upon the bill as reported by the Senate Committee on Finance.

Mr. ALLISON. But the Senator undertook to show that there was in this bill, by this ascending scale, a benefit to the refiners without reference to what we call the differential.

Mr. LINDSAY. No. I undertook to show that whenever you pass 96 degrees the refiner gets the benefit of your ascending scale. Up to 96 degrees the sugar producer and refiner proceed side by side.

Mr. ALLISON. That is where the Senator is mistaken. I have the absolute calculation here of sugars testing 96, and those sugars necessary to make a pound of refined sugar will be obliged to pay a duty of 1.7517 instead of paying a duty of 1.75, as sugars testing 100 would under this sliding scale. So when the Senator says that there is a protection or differential lying in this scale, running from 75 degrees of the polariscope to 100 degrees, I reply that that protection or differential is not to be seen.

Now I present a table which I have intended for some days to put into the RECORD, and I ask leave to do it now. This table shows the differentials under the bill as it came from the House, under our Senate amendments, and under the present law, and I challenge contradiction when I say that the differential under the existing law is higher and greater than under the schedule that lies before us.

Mr. STEWART. That is, the Senate amendment is less.

Mr. ALLISON. The Senate amendment is less in differential than the existing law. I have here—and I ask that it be inserted in the RECORD—a table showing this, and I challenge a contradiction of the accuracy of this table. Taking the average prices of the refined sugars as shown, not at 2.30, but at 2.47, which is the average value of sugars; taking the German sugars, the first marks, so called, which are the cheapest, and taking the prices of Holland refined and the prices of English refined, and averaging them all, making 2.47, I am tired of the accusation that we have increased here, by 40, 41, 43, 52, and 59 per cent, the protection or the differential to sugar refiners.

The table referred to is as follows:

Degrees.	Price.	Rate.			Differential.		
		Act of 1894.	House.	Proposed Senate.	1894.	House.	Proposed Senate.
	Cents.	*Per ct. Cts.*	*Cts. Per ct.*	*Cts. Per ct.*	*Cents.*	*Cents.*	*Cents.*

*40 per cent and ½ = 111.30.

Mr. WHITE. Will the Senator from Iowa permit me to ask him a question?

Mr. ALLISON. Certainly.

Mr. WHITE. In the presence of the Senator from Iowa, the Senator from Rhode Island [Mr. ALDRICH], who at that time had charge of this bill, and who is now ill, stated that the differential in the bill as it came from the House was greater than the differential in the then Senate bill, and he inserted in his remarks a table which, if correct, demonstrated the truth of that statement.

Now, I desire to know whether anything that has transpired since that time, any elucidation or light, has convinced the Senator from Iowa that his colleague upon the committee, who then had charge of the bill, was in error?

Mr. ALLISON. I am not dealing with the statements of the Senator from Rhode Island, nor am I dealing with the prices as estimated by him. I am taking the prices which appear in these tables, which are the true prices, not those for one month, January, which the Senator from Rhode Island took; not the current prices, but the average prices. That table is based upon the average prices of this class of raw sugar during the four months beginning on the 1st day of January and ending on the 1st day of May.

Mr. JONES of Arkansas. Will the Senator from Iowa be good enough to explain what basis he takes for refined sugar? He quotes the price of raw sugar here, but he does not state in this table what the price of refined sugar is, from which he calculates the difference.

Mr. ALLISON. The prices of raw sugar are found in the first column of the table. The prices of refined sugar are found right under them, $2.47. I have not taken the prices of January, as suggested by the Senator from Rhode Island, but I have taken the actual prices as furnished by the public record, the average prices of raw and refined sugar for the four months ending on the 1st day of May.

Mr. WHITE. The Senator from Iowa is mistaken when he says January was taken. March was taken.

Mr. ALLISON. March was taken by the Senator from Rhode Island for the price of refined sugar. He took the price upon a single day of what is called "first marks refined sugar," which, of course, as Senators know, is rather an inferior kind of refined sugar that comes from Germany, but a kind that is largely imported.

Mr. CAFFERY. Will the Senator kindly tell me what is the differential in the table between raw and refined?

Mr. ALLISON. I have made a scale there running about twenty one-hundredths in the Senate schedule.

I will say another thing with respect to this schedule, because I do not hesitate to state the method whereby this result was reached. The method does not include the countervailing duty put on under this bill and not put on in the Senate; and I have been amazed that, with all the zeal for the reduction of the enormous differential to the refiners, some Senator on the other side of the Chamber has not risen in his place and moved to strike out the three-eighths of a cent. Why is it that the Senator from Kentucky [Mr. LINDSAY], with his zeal and his energy and his activity, does not address himself to the question of striking out the three-eighths differential, as he calls it, which is found in this same paragraph? Why does he stop at the suggestion of 5 cents a hundred pounds, when there lies right under his eyes and on his table a proposition where, by a single amendment which he could propose, he could strike down the refiners' thirty-eight one-hundredths of a cent.

Mr. JONES of Arkansas. Where is that in this paragraph? On what page is it?

Mr. ALLISON. Here it is in this provision; I wish to read it, and I want to know why it is that Senators on the other side of the Chamber strain at a gnat and swallow a camel.

Mr. JONES of Arkansas. Please answer my question.

Mr. LINDSAY. Where is the three-eighths?

Mr. ALLISON. If the Senator has not investigated the bill far enough to know, I will point it out to him.

Mr. JONES of Arkansas. I will say to the Senator that that was stricken out on his own motion, and it is out of the paragraph now.

Mr. ALLISON. I do not understand that it is out of the paragraph.

Mr. JONES of Arkansas. It is, and the RECORD will so show. It was done on the Senator's own motion, and therefore there is no occasion for anybody else to draw any amendment of the sort.

Mr. ALLISON. If that is out on my own motion, and they thought it was out, why is it that they are insisting in every debate and in every table that it is in?

Mr. JONES of Arkansas. Because the Senator has it in another paragraph later on in the bill, which will be reached hereafter. That is the reason.

Mr. ALLISON. I want the Senator from Arkansas to open up the debate on the countervailing duty, that we may show, as we can show now, that this countervailing duty is only an imitation and an emulation of his own committee in 1894, when they provided a tenth of a cent countervailing duty upon refined sugar and the same countervailing duty upon raw sugars.

Mr. JONES of Arkansas. We will be ready for it when we get there.

Mr. ALLISON. I hope the Senator will.

Mr. LINDSAY. I want the Senator from Iowa to do me the justice at least to say that it does not rest upon me to move to strike out three-eighths, or to make any motion in regard to that retaliatory duty until we reach it. When we reach it, we will try to attend to it.

Mr. ALLISON. I did not know it was out. I supposed it was still there. I made my remarks upon that basis. Whilst Senators were discussing this question as a fixed fact, I wanted to call their attention to the mountain that is in their pathway as compared with this molehill.

Mr. TILLMAN. Will the Senator from Iowa allow me to call his attention to the fact that he has just confessed that the duty now proposed is in emulation—I believe that was the very word——

Mr. LINDSAY. Imitation.

Mr. TILLMAN. Imitation and emulation of the villainies practiced by his Democratic colleagues three years ago.

Mr. ALLISON. Fortunately for me, I do not indulge in the epithets of the Senator from South Carolina. I did not call it a villainy.

Mr. TILLMAN. That is my word.

Mr. ALLISON. Nor do I think it is a villainy. I believe that the provision in the act of 1894 was a necessary provision, as I believe also that this is a necessary one.

Mr. LINDSAY. If the Senator will pardon me, I will say that the act of 1894 gives 10 cents, and this measure proposes to give 38 cents, and the sugar refiners are declaring 9½ per cent profit on $75,000,000 worth of stock and are paying the difference between 10 and 38 at the present time.

Mr. ALLISON. When this differential was put upon the bill in 1894, the duty upon raw sugar was less than 10 cents a hundred pounds, and the duty upon refined sugar was 10 cents a hundred pounds. Since that time the German Government, I believe in May last, and I call the attention of the Senator to the fact, increased their bounty upon raw sugar to twenty-eight one-hundredths of a cent or twenty-seven and a fraction one-hundredths, and upon refined sugar to thirty-eight one-hundredths and a fraction. It was only the difference, at most, between the raw and the refined upon which they secured this advantage. But what I am complaining of is that in the tables which have been presented here this 10 cents countervailing duty is not computed, nor is the 27 cents a hundred pounds computed upon the raw sugar, but there is thirty-eight one-hundredths of a cent computed upon refined sugar. Every Senator who has spoken, so far as I know, has taken it absolutely for granted that the protection on refined sugar is thirty-eight one-hundredths of a cent in this bill because of the fact that there is thirty-eight one-hundredths of a cent bounty by the laws of Germany.

Mr. LINDSAY. I will ask the Senator if three-quarters of the crude sugar does not come from countries that pay no export bounty?

Mr. ALLISON. Then my answer to the Senator is, Why was it put in the act of 1894? That act was intended to reach the bounty of sugar-producing countries, and it was put in there because those who were responsible then believed that there must be a countervailing duty in order that the refiners of this country should be placed upon an equality with the refiners of Europe.

Now I will ask my friend another question. Suppose it should turn out that instead of these sugars coming into the United States to be refined they should go to Montreal or Holland, if you please, or to England. What would be the protection to our refiners against sugar refined there from those sugars? It is 1.875 cents or 1.95 cents a pound, as the case may be.

Mr. LINDSAY. I will say that there is no danger of those sugars going to Montreal or anywhere else to be refined, if my amendment be adopted. The complete answer to the question lies not in ascertaining how many pounds of sugar the sugar trust says it has to buy in order to make a pound of refined sugar, but in what does the business of the sugar trust domonstrate. It demonstrates that, notwithstanding the change of conditions in the country, sugar stock has remained above par all the time, and since this bill has been under discussion it has gone up 5, 6, 8, or 10 points, and sold Saturday last at 126.

Mr. ALLISON. The Senator from Kentucky can get me into no argument upon that question. I have not taken the figures of the sugar trust. I have taken the figures of his friend John G. Carlisle, Secretary of the Treasury, and I have made every calculation upon his computations and not upon the computations of the sugar trust.

Mr. LINDSAY. And Mr. Carlisle got the figures from the sugar refiners, because no one else understands the trade well enough to give the figures.

Mr. ALLISON. If the Senator from Kentucky will pardon me, that is simply an absurdity. There are men connected with the Treasury (they may not be quite so familiar with the tests of sugar and the value of sugar as are the men who for long years have been engaged practically in the business) and there are men now in the employ of the custom-house in New York who have been there for twenty or twenty-five years, and they as experts know all about the sugar question.

Mr. CAFFERY. Mr. President——

Mr. ALLISON. I am not to be diverted now, if my friend the Senator from Louisiana will excuse me, by any table which he inserted the other day, prepared by an expert whom I do not know and who certainly has not the responsibility of government.

Mr. CAFFERY. I am not going to mention the table. I wish simply to ask the Senator a question. He, I understand, has presented a schedule of prices different from the prices presented by the Senator from Rhode Island. I should like to ask him why he has discarded the prices given by the Senator from Rhode Island and taken new prices?

Mr. ALLISON. I did not discard the suggestions made by any Senator. I have not discarded the suggestions made by the Senator from Louisiana.

Mr. CAFFERY. I am not talking about the suggestions, but of the fact, of the prices. The Senator from Rhode Island made his calculation upon certain prices of sugar. The Senator from Iowa, I understand, has offered a calculation based upon other prices. Now, I desire to know why he has taken other prices and not maintained those of the Senator from Rhode Island?

Mr. ALLISON. I have done that to get rid of some confusion which early existed in my own mind, and I hope in some way to bring other Senators to the opinion I now entertain. If I have failed to explain that, I have failed in part in my object.

I stated that the schedule of specific rates of duty, with the continuous ascending scale of three one-hundredths of a cent per pound, is a scale not based upon the price of sugar in the Philippine Islands, as the price of the Senator from Rhode Island was, not based upon the price of sugar in Egypt, as the price of the Senator from Rhode Island was, or in any of the islands of the sea, but is the price of sugars in bond in the city of New York, as shown by tables presented by merchants in New York and incorporated by the Senator from Missouri; and upon these tables (and they are tables from which most of the calculations have been made) I have demonstrated, at least to my own satisfaction, that the rate as it is proposed here is a less rate of duty than that in the existing law. In a good many cases I agree that it is only a fraction less, but in every case except one or two it is less.

Mr. CAFFERY. Whatever the prices may be, I wish to ask the Senator from Iowa whether by this ascending scale, from 75 degrees up, the rates are not clearly ascertained. Given the number of pounds of raw sugar it takes to make a pound of refined sugar and given this ascending scale, is not that a true criterion of the duty and not variable prices here and there?

Mr. ALLISON. I do not argue that question now, because the Senate itself has accepted that. It comes here with the experience and observation of the merchants of New York, and we have adopted it and incorporated it here in our schedule, and therefore I do not go beyond that in the suggestions I make.

Mr. President, the question after all is, What is the differential? My answer to that, and if it is not a truthful answer then I am to be corrected, is that it is the duty upon 100 pounds of refined sugar as compared with the duty upon the number of pounds of raw sugar required to produce 100 pounds of refined sugar. Therefore it is that on the ascending scale which I have named, sugars that are refined are practically upon an even keel, taking the sugars from 88 or 89 to 97.

Now, then, we come face to face with the main question, because I take it that after all our zeal for the destruction of a trust or combination, if you please, will not run so far that we will destroy the refining industry in the United States. It has been stated here, and of that I speak only from information and not from knowledge, that 70 per cent of the sugars—some have said here in debate that it is only 66 per cent, or two-thirds—that are refined is in the control of what is known as the American sugar trust. Of course, the remainder is refined here and there, independent of the trust. I do not know how that may be, but I do know that it would be the height of unwisdom for us to transfer to Germany, or to Holland, or to Great Britain, or to our neighbor on the north, as my colleague [Mr. GEAR] suggests to me, the business of refining four thousand million pounds of sugar.

That being true, the question for us to consider here is what is a fair and proper differential in order to give such protection to the business of sugar refining as will keep it in the United States. In 1883 that differential varied from 75 to 125, and yet we have heard on this floor to-day that under that high differential such was the difficulty in refining sugars that there was a practical loss and many refiners went out of business.

Mr. GEAR. Let me remind my colleague that the Senator from Texas [Mr. MILLS], who was chairman of the committee that framed the bill named after him, only proposed to reduce that protection 20 per cent.

Mr. ALLISON. Yes; I am glad to be reminded of that fact. The Senator from Texas will allow me to interpolate another suggestion right here. I believe that more than half the paragraphs in this bill contain less rates of duty than were provided in the bill of 1888, called the Mills bill. But I do not allude to that except to say that this fact illustrates how rapidly prices have gone down, how successful our manufacturers have been, and how large a share of the products of manufactures are now made in this country, enabling us to reduce the rates of duty.

Mr. STEWART. Do I understand the Senator to say that the protection given to the trust in the bill by the Senate amendment is less than under the act of 1894?

Mr. ALLISON. I say that, from these tables, and in doing so I do not take into account the differential that arises from this thirty-eight one-hundredths of a cent any more than I take into account the differential that arises from the one-tenth in the law of 1894 and the one-tenth in the law of 1890.

Mr. WHITE. May I ask the Senator from Iowa if that is not a practical protection to the refiner in both cases, whether a just one or not?

Mr. ALLISON. If it is——

Mr. WHITE. Is it not?

Mr. ALLISON. If it is, then that eleven one-hundredths should be added. If the Senator will turn to the paragraph which I supposed was passed over and not stricken out, he will see that both as respects raw and refined sugar the countervailing duty is neither 27 nor 38, and that in this respect——

Mr. WHITE. It is a sliding scale?

Mr. ALLISON. No, it is not a sliding scale. It says:

> Sugars, tank bottoms, sirups, cane juice or beet juice, melada, concentrated melada, and concrete and concentrated molasses, the product of any country which pays, directly or indirectly, a bounty on the export thereof, whether imported directly and in condition as exported therefrom, or otherwise, shall pay, in addition to the foregoing rates, a duty equal to such bounty, or so much thereof as may be in excess of any tax collected by such country upon such exported article, or upon the beet or cane from which it was produced.

Mr. WHITE. I call that a sliding scale.

Mr. ALLISON. The Senator calls that a sliding scale. In other words, there is an unknown quantity to be ascertained as to this bounty, and in no event can it anywhere near approach thirty-eight one-hundredths of a cent a pound; and yet in all these calculations of differentials we find this scale in our tables, as though it were an exact mathematical condition with respect to the export bounty of Germany.

Mr. ALLEN. I wish to take the attention of the Senator from Iowa away from differentials for just a moment, and to put what I regard as a very vital question, and that is whether, in the judgment of the Senator from Iowa, it is possible to frame a sugar schedule that will not result in some benefit, direct or indirect, to the American sugar trust?

Mr. ALLISON. The Senator from Kentucky [Mr. LINDSAY] has been trying to do that all day. As a matter of course, if raw sugar pays as high a duty as sugar which has been refined, then there is no differential for the trust or for any refiner of sugar, whether in a trust or otherwise. As the measure now stands, all sugars above No. 16 Dutch standard in color pay $1.95 a hundred pounds; they are protected by a duty of $1.95 a hundred pounds, and they will all be protected, if the amendment of the Senator from Kentucky prevails, by a duty of only $1.80 a hundred, or 1.8 cents per pound, whereas they are now protected under this paragraph as it stands by $1.95.

So the Senator from Kentucky, pro tanto, to the extent of his amendment, proposes to withdraw what we believe is wise and essential—and I think the Senator from Nebraska agrees with me in that respect—in order to develop the great industry of beet sugar in the heart of this continent, which, like the trust, makes refined sugar, which turns out the same class of sugar and throws it upon the markets. That, I believe, is the true remedy by which the refining of sugar and the production of sugar in condition to be consumed by the people of this country will be given development in the interior of our country, because until that is done and so long as we are importing from the islands and the continent 3,500,000,000 pounds of sugar, in the very nature of things that refining will be done on the Atlantic Seaboard or on the Pacific. It will be done at the point where the ships that carry the raw sugars can find the first harbor and the first place to unload their cargoes into the refineries.

So, being diverted somewhat from the main question, I come back to it again and say to the Senator from Nebraska and the Senator from Louisiana that the Senator from Kentucky by his amendment proposes to withdraw 15 cents per hundred pounds from the protection that is now given, so far as this bill is concerned, to every pound of sugar produced in Nebraska, and practically every pound of sugar produced in the State of Louisiana or the State of California.

Mr. ALLEN. Will the Senator from Iowa permit me just another question? Saturday last the Senator from Kentucky admitted, and I think the admission was for the Democratic party, as he spoke for the Democratic party, that, in his judgment, it is impossible to frame a schedule imposing taxes upon sugar from which the Sugar Refining Company, in consequence of its being a monopoly, would not receive some benefit. I put the same question to

the Senator from Iowa, who represents his party, for the purpose of making it appear, if possible, and as I believe it to be true, that it is impossible to frame a tariff schedule upon sugar by which you impose any tax on sugar at all from which the trust will not receive some benefit.

Mr. ALLISON. That question is answered by asking another and answering it, if I can. That is, Is it wise for us in the United States to turn over to foreign countries the refining of the 4,000,000,000 pounds of sugar which we consume? If it is not wise for us to do that, then it is wise for us to give such differential, whatever it may be, as will fairly secure a proper benefit to those who do refine sugar. That is my answer to the Senator.

Mr. ALLEN. Will the Senator permit me? I do not want to interrupt him unnecessarily, but I want my position to be understood. I do not wish to legislate any legitimate industry out of existence. I want to see the sugar refiners of this country receive a legitimate and honest compensation for their work. I want them to receive that, however, within the bounds of the law. But the question which I submit is whether the sugar trust, so called, or the American Sugar Refining Company, has not such an absolute control of the sugar market of the United States and the sugar market of the world that it is impossible by a tariff schedule to lay a tax upon sugar in any form that will not result in some benefit to it over and beyond a legitimate profit on the refining?

Mr. ALLISON. It is possible that those who are refining sugar now may have some advantages outside the tariff laws, but it is perfectly certain that nobody here will continue to refine sugar and pay a duty upon raw sugar when sugar can be refined in England or in Germany without paying a duty upon the raw sugar from which it is made.

Mr. ALLEN. Will the Senator permit me?

Mr. ALLISON. The Senator will pardon me until I answer further. Therefore it is plain to me that unless we put a duty of some kind upon refined sugar, as we do upon iron, chicory, and the thousand other things that are embraced within these schedules, the protective idea which we have, whether it be 5 per cent or 2 per cent or 1 per cent, is gone, and we might fold our hands here and give no protection to any industry in the United States, because, except by the barrier that is thrown around the manufacturers in our own country by means of our tariff laws, we can not tell how long it will be until everything we produce here will be produced elsewhere, where cheaper labor, cheaper capital, and, to some extent, more economical conditions in other respects prevail in regard to the production of these articles.

Now, the Senator asks me impliedly by his question whether I believe that any duty is necessary. It is perfectly certain that it costs less to refine sugar in Germany than here. Especially does it cost less to refine sugar in Germany when it is refined by a continuous process of refining from the raw beet itself. We must bear in mind that in this great industrial competition with Germany we are dealing with a people who are expert in all this class of manufactures. They have the most intelligent and most expert chemists in the world, and they have been able to produce up to this time more pounds of sugar to the ton of beets than have any other people on the globe.

Mr. VEST. May I ask the Senator one question? I did not exactly catch his meaning.

Mr. ALLISON. Certainly.

Mr. VEST. I suppose he admits (if not, I should like to hear him deny it) that the whole amount of the export bounty of Germany or of any other country is imposed as an additional tariff tax by this bill upon the imported article when it comes into this country.

Mr. ALLISON. That is, if it comes from Germany.

Mr. VEST. That is in section 3, on page 195.

Mr. ALLISON. If it comes from Germany, that is true.

Mr. VEST. If it comes from any country; I beg the Senator's pardon.

Mr. ALLISON. Certainly not unless the bounty is paid.

Mr. VEST. I say that wherever any country pays an export bounty——

Mr. ALLISON. Undoubtedly.

Mr. VEST. On refined sugar or anything else, and it comes into this country, then the amount of the bounty imposed in the foreign country is added to the tariff cost at the custom-house in the United States.

Mr. ALLISON. It is the net bounty, less the taxes and reductions which I have named.

Mr. VEST. I understand that. Now, I want to ask the Senator one other question, so that we shall come to a fair, square issue.

Mr. ALLISON. Certainly.

Mr. VEST. What does he say is the amount of export bounty, taking out taxes, etc., granted by Germany?

Mr. ALLISON. I have already stated that I do not know. Of course it can not exceed three-eighths of a cent a pound—thirty-eight one-hundredths on refined sugar—nor can it exceed twenty-seven one-hundredths upon raw sugar. But it may be very much less.

Mr. VEST. That explains the difference in the calculation between the Senator from Iowa and ourselves. We count the amount of bounty that Germany pays as a part of the tariff protection to the trust in the United States. It is as much a part of it as is the 1.95.

Mr. ALLISON. How much of it?

Mr. VEST. It is within a fraction of 38.4 upon a hundred pounds.

Mr. ALLISON. Very well.

Mr. VEST. I will ask the Senator from Louisiana [Mr. CAFFERY] to read an official communication from the Treasury Department, showing the amount of bounty paid by Germany and by France.

Mr. ALLISON. That is an immaterial question for my argument. The point I make is that none of that bounty should be charged.

Mr. VEST. It is charged by this law which you put in yourselves.

Mr. ALLISON. The Senator does not gather my point. My point is that if this bounty, whether upon raw sugar or refined sugar, is paid, and the countervailing duty which we have put on here is exacted, it is not a bounty to the trust or to the refiners of sugar beyond the difference, whatever that difference may be, between raw and refined sugar.

Mr. VEST. I grant the proposition that the cost of the raw sugar must be deducted——

Mr. ALLISON. Undoubtedly.

Mr. VEST. From the cost of the refined sugar. But I insist that 38.3 should be added.

Mr. ALLISON. Does the Senator agree that twenty-seven one-hundredths shall be deducted before the thirty-eight one-hundredths is put in?

Mr. VEST. As a matter of course, if that is duty paid by the trust upon raw sugar, it is put in in our computation. If it is not, it ought to be put in.

Mr. ALLISON. In every table that has been submitted by the Senator and his associates they have counted the thirty-eight one-hundredths and they have not deducted the twenty-seven one-hundredths upon raw sugar.

Mr. VEST. I beg the Senator's pardon. If they paid in 27 per cent upon raw sugar, it was put in the cost of the raw sugar to them. Then the full amount was deducted from the cost of the refined sugar with the export bounty added to it.

Mr. ALLISON. Certainly; but if sugar is imported from Holland, refined, or from Great Britain, or from any other country that does not pay a bounty——

Mr. VEST. Then of course the section does not apply.

Mr. ALLISON. It does not apply.

Mr. VEST. Of course not.

Mr. ALLISON. It can not apply in any computation except to the extent of the differential between the bounty upon raw sugar and refined. Therefore I complain that in all these tables you have charged this differential to the refined sugars and have not subtracted from it the twenty-seven one-hundredths that come from the raw sugar.

Mr. VEST. We took the prices furnished by the Senator from Rhode Island.

Mr. WHITE. And without objection.

Mr. VEST. Nothing was said on that side in regard to their being incorrect. I take it that in any court of justice or in any other tribunal where the opposite side accepts the statement of the antagonist logically and fairly and beyond any sort of question, that ought to close that branch of the case.

Mr. ALLISON. A just court would take the whole statement.

Mr. WHITE. Mr. President——

Mr. ALLISON. If the Senator from California will pardon me just a moment, the Senator from Rhode Island stated that in his computation he did not include the bounty provided for in the existing law and the countervailing duty nor the bounty and countervailing duty in this act.

Mr. WHITE. Will the Senator from Iowa inform me whether it is not his judgment that fully 65 per cent of the sugars used by the manufacturers of this country come from places which impose no export bounty at all—cane sugars, in other words?

Mr. ALLISON. That may be. I do not regard that as a matter of moment.

Mr. WHITE. Now, will the Senator permit me to ask another question? If I understand the table which the Senator from Iowa has just presented, it has heretofore never seen the light in the Senate. The table submitted by the Senator from Rhode Island was presented on behalf of the committee, printed with his opening statement made for the committee, and never questioned until to-day. Is it not, therefore, a case not where a pleading has been amended, but where a new cause of action is attempted to be sustained?

Mr. ALLISON. We are not trying a case here—at least I do not suppose I am.

Mr. SPOONER. The question is whether it is right or not.

Mr. ALLISON. I am, as a Senator, dealing with the tariff bill; trying to deal justly and wisely, so far as I can, with every interest embraced within the bill. I am neither trying a lawsuit against the Senator from California nor the Senator from Missouri, nor do I want them to try a lawsuit against me. Whatever becomes of any or all of us, the bill will be judged, when it finally becomes a law, by what there is contained in it as respects the great interests of our country, whether they be the consuming interests or the industrial interests of our country.

Mr. President, I have detained the Senate longer than I desired. I shall be glad to have a vote upon the amendment proposed by the Senator from Kentucky.

Mr. CAFFERY. I send up and ask the Secretary to read a communication fixing the differential.

The Secretary read as follows:

TREASURY DEPARTMENT, OFFICE OF THE SECRETARY,
Washington, D. C., May 21, 1897.

SIR: In reply to your letter of the 17th instant, I have to state that the bounties paid by Germany and France, respectively, on exported sugars are as follows:

GERMANY.

1. On raw sugar at least 90 per cent, and on refined sugar under 98 per cent and at least 90 per cent, 2.50 marks per 100 kilograms. (Very nearly equivalent to 27 cents per 100 pounds.)
2. On candy and sugar in white, hard loaves, blocks, etc., at least 99½ per cent, 3.55 marks per 100 kilograms. (Very nearly equivalent to 38.4 cents per 100 pounds.)
3. On all other sugars at least 98 per cent, 3 marks per 100 kilograms. (Very nearly equivalent to 32.4 cents per 100 pounds.)

FRANCE.

1. On raw sugar in grains or small crystals of the minimum test of 98 per cent, for all beet-root sugars, or of 97 per cent for colonial sugar (as determined before the reduction of the loss by refining), 4 francs per 100 kilograms of refined sugar. (Very nearly equivalent to thirty-five ten-thousandths of 1 cent for each pound and degree of polarization.)
2. On raw sugars of the standard of 65 to 98 per cent for beet-root sugars, or 65 to 97 for French colonial sugar, 3.50 francs per 100 kilograms of refined sugar. (Very nearly thirty-one ten-thousandths of 1 cent per pound and degree of polarization.)
3. Candies, and refined loaf or crush, hard, and dry sugars, polarizing not less than 99.75, 4.50 francs per 100 kilograms. (Very nearly 3.9 cents per pound.)
4. Refined sugars, in grains and crystals, at a minimum standard of 98 per cent, 4 francs per 100 kilograms. (Very nearly 3.5 cents per pound.)
5. Bastards, 4.50 francs per 100 kilograms of refined. (Thirty-nine ten-thousandths of 1 cent per pound and degree of polarization.)

Respectfully, yours,

W. B. HOWELL, *Assistant Secretary.*

Hon. D. CAFFERY, *United States Senate.*

Mr. CAFFERY. Mr. President, the very fact that the Senator from Iowa has seen proper to introduce a schedule based upon different prices from the prices on which the Senator from Rhode Island based his calculations shows the intricacies of this question. I should like to know how it is and why it is that the Senator from Iowa at this late day undertakes to alter the prices upon which the Senator from Rhode Island made his calculations.

There is one thing that arises from these schedules outside of any prices whatever. Given the percentage of duty at a certain degree, given the number of pounds of raw sugar at that degree it takes to make a pound of refined, whatever differential there is between the duty on the raw and the duty on the refined is absolutely certain. You need not go to prices to ascertain it.

Mr. ALLISON. Did I state otherwise?

Mr. CAFFERY. But you have introduced a new factor. You have introduced different prices, by which you attempt to disturb the conclusions of the Senator from Rhode Island. Now, just look at this schedule. No one can contend that there is not a differential here, a very large differential, wholly beside the question of price. At 96 the differential is 24.76 cents. That is a clean quarter of a cent by the calculation based upon the number of pounds of raw sugar it takes to make a pound of refined sugar and applying the respective duties to each.

Out of that position it is impossible for the Senator from Iowa to get, and out of this differential it is impossible for anybody to get. Here is a differential of a quarter of a cent at that degree of saccharine strength which the trust makes its sugar out of. Without any sort of attention to the 38 or any attention to prices, here is a mathematical demonstration of the amount of protection they get upon the class of sugar out of which they make theirs. It runs all the way through. At 100 they have a clean 20 per cent under this differential, and so on down they enjoy greater protection as you descend in the scale of saccharine strength.

Mr. President, it is said that we must not injure the refining industry. Has the Senator from Iowa shown how or where, in what particular, the refining industry of the sugar trust would be injured by placing the sugar trust exactly upon an equality, giving it so far as duty is concerned the price it gets, the protection upon the refined and the price it pays on the raw?

The Senator from Iowa states that it costs more money to refine sugar in the United States than in Germany. Where does he get the facts upon which he predicates that statement? How does he arrive at his figures? We have been juggling with figures a great deal. We had a certain set of figures to predicate a statement on at one period which was thrown aside at another. We have a statement made of the comparative cost of making sugar in Germany and in the United States, but I should like to see some facts on that point before I could accept the statement of the Senator from Iowa as absolute truth. I know he thinks that it is true, but there is not that degree of certainty about the statement, or any other statement in regard to this schedule, which would carry any conviction to the ordinary mind.

How does that statement compare with the statement of Mr. Havemeyer, that give him raw sugar and he could beat the world? How does it square with the fact that the German refiners are a lot of small refiners? They refine in small sugarhouses. They turn out small quantities of sugar, it is true, by a process different from that which the sugar trust uses. But judging from the ordinary result of large plants, large outputs, comparing the enormous amount of sugar that the sugar trust makes with any concern in Germany, the inference to be drawn is that the German refiner makes his sugar at a much higher cost than the American refiner.

And besides, Mr. President, that sugar is not of the value of the sugar of the American Refining Company. It is about three-eighths of a cent lower, as was stated by the Senator from Kentucky [Mr. LINDSAY]. Not only have we here positive, unequivocal testimony that the sugar trust makes its sugar cheaper than anyone else in the world, but that they defy competition.

Mr. GEAR. May I interrupt the Senator from Louisiana?

Mr. CAFFERY. Yes, sir.

Mr. GEAR. The German sugar refiner does not refine his sugar; he washes it.

Mr. CAFFERY. What do you call it refined sugar for?

Mr. GEAR. It is the common name, but as a matter of fact he does not refine it in the sense that American sugar is refined. It is simply washed sugar. If the Senator will take the samples the Senator from Arkansas has and place them before him, he will see the difference at once.

Mr. CAFFERY. I understand the process by which the Germans make sugar. It is called a carbonatation process, which is used for the purpose of refining it.

Mr. GEAR. The Senator from Connecticut has just called my attention to what I forgot to mention. One is the melting process and the other is simply washing through water, and they are worth about one-eighth of a cent below. They are quoted in New York at one-eighth below.

Mr. CAFFERY. Are you certain about their being only one-eighth below?

Mr. GEAR. That is about the difference. They vary.

Mr. CAFFERY. I have heard it very frequently stated by people who knew that there was from a quarter to three-eighths difference.

Mr. GEAR. You can take Willett & Gray's circular and figure it up.

Mr. CAFFERY. But, however that may be, the German sugar is made out of the juice of the beet. That juice is boiled; the water is evaporated. After it is boiled to the point of crystallization it is placed in the centrifugal. It is there subjected to a kind of a chemical process that the Germans call carbonatation. It comes out of the centrifugals, and it is called the ordinary marks German granulated sugar. The sugar trust takes its common sugar, puts water to it, melts it in vast quantities, all handled by machinery. The sugars are boiled but a trifle. They are passed after that process through the bone black. That extracts all the impurities and colors the sugar; and that is the end of the process.

What is the great difference in the cost? I can not see it. The Germans have to handle the beet; they have to boil the juice; they have to evaporate the water out of the juice. It takes a vast amount of boiling to do it. Juice that has 5, 6, or 7 per cent sugar only has to be dried of its water, run through the clarifiers and evaporators, and then through the vacuum pan and from the vacuum pan to the centrifugals. All that the American refiner has to do is to melt what has already been evaporated. He puts a little water in it to keep it from burning, melts it, boils it down again to evaporate that water, which is not a costly process, for there is not much water in it, passes it through the bone black, and there is his sugar.

Do you tell me that a concern which turns out 15,000 barrels of sugar per diem can not make sugar cheaper than a sugarhouse which makes two or three hundred barrels or four or five hundred barrels per diem? The thing is not reasonable. They challenge

and defy competition. They have said so, and it does not stand in anybody's mouth to deny their statement.

Mr. President, this sugar trust does not come with clean hands before the Senate of the United States. It has smothered testimony. Nobody can investigate it. It refused to give the proper information to the census officials. It tyrannizes and oppresses all over the land. Everywhere you feel the baneful effects of the sugar trust. It crushes the producer, it boycotts the purchaser, and it invades the Senate; it places its blighting hand upon legislation, and wherever it goes the sugar trust blasts and shrivels and palls. It ought to be put out of legislation.

I do not say that to do any injury, Mr. President. I would not injure any institution. But when the evidence comes direct from the mouth of the sugar trust that it needs no protection, not a weak, puling, squalling infant, but a great giant industry that controls the markets of the world and imposes whatever price it pleases upon its product, I want to know if that sort of an institution, with its character, with its antecedents, can come before the Senate of the United States and set up a cry for aid.

The Senator from Iowa resented with some indignation the schedules that we adopted, but I listened attentively to hear one single word where he contradicted them. The essential point in these schedules is in the differential between the amount of raw sugar it takes to make a pound of refined sugar and the refined sugar, and here it is without any regard to the price of either, and without any regard to the differential, and it is a quarter of a cent a pound.

Mr. President, this is, in my opinion, an apt illustration of the evils of this whole system. Here is this great giant industry, this sugar trust, which has been the cause of scandal and contumely heaped upon the Senate and the other House, too, and why? Is it doing any more than the ordinary protected industry? Is it not a disreputable scandal that these great institutions should come and ask legislation in their behalf, and when they get too monstrously large, when they get to be a stenca in the nostrils of the people, then scandal is in their wake and attends on their importunate demands? The whole system is rotten; the whole principle is wrong.

Go to the tariff hearings—importunate beggars clamoring for aid in every direction. There is no period when the clamor will ever cease; there is no point where the demand will stop—constant demands, constant importunities to be allowed to make a living at the expense of the people of the United States.

Who pays this sugar trust but the consumer? Who foots up all these enormous gains but the poor man, the rich man, and every consumer of sugar in the United States? So it is all along the line of these protected industries. There was a time when protection was less intense and acute than it is now; there was a time when it was thought the infant could walk after being coddled and assisted with jumping horses and various artificial devices—bicycles and tricycles and all other powers of locomotion used in behalf of this little toddling infant.

I submit that the time has about arrived when the sugar trust is big enough to walk alone. It does not need your aid. It has said so, and you can not deny the truth of that statement. It not only does not want your aid, but it says, "We can beat the world." "Suppose," said the questioner to Mr. Havemeyer, "you had raw sugar free; what then would be your condition?" "We can beat the world," or "We can beat them all," or words to that effect. Now, I submit to the Senators on the other side whether or not this great infant, which bestrides the earth like a colossus, comes within the tender mercies of the humane principle of protection.

The Senator from Massachusetts evidently had some doubts as to the correctness of these schedules or he would not have offered the amendment which he did. He went away back into the early history of sugar schedules, and he quoted the Earl of Chatham, I believe, who himself in his day and generation was very much perplexed as to how to regulate a sugar schedule; and from that time on, the Senator said, this question of sugar has been a question which has troubled the legislator in so far as regulating duties upon it is concerned. It is certainly a troublesome matter now; and the only great trouble about the whole thing is that the sugar trust demands in its behalf, in order that its monopoly may never be disturbed, such an amount of tariff as to keep off perpetually all kinds of competition. That is all it wants. It has only a distant fear now, but it is going to take the protection and keep competition out as a kind of safeguard. Although it said as early as 1880 that it did not want protection, the sugar trust think it is a handy thing to have around the house, and that it can use it when some foolish German comes here with a consignment of sugar and tries to sell it to the American people. The trust wants the privilege of keeping him out and charging the people just what it pleases upon the home product.

There are several points in this schedule which have given me concern. I have never known or understood from the statement of the Senator from Rhode Island how, when there was 88 per cent of sugar in the test that he took, he could only make 81 pounds of sugar out of it. That has bothered me and troubled me, and I want to elucidate that point. I send to the Secretary's desk a letter addressed to me on this subject by Mr. Calvin Tomkins, of this city, chairman of the Reform Club, and ask to have it read.

Mr. BERRY. I suggest, as it is getting late, that the Senator have the letter printed in the RECORD without its being read.

Mr. CAFFERY. Very well. I will ask to have the letter printed in the RECORD.

The VICE-PRESIDENT. If there be no objection, it will be so ordered. The Chair hears none.

The letter referred to is as follows:

WASHINGTON, D. C., *June 14, 1897.*

DEAR SIR: The duties in the amended Senate schedule being entirely specific, it is plainly evident that the amount of "protection" given to the sugar trust is to be determined by the number of pounds of raw sugar required to make 100 pounds of refined. Senator ALDRICH has stated specifically that the first Senate schedule was based upon the allowances for drawbacks made by the Treasury Department, and it is evident from all the calculations made by the advocates of the amended schedule that it also rests upon the same basis. It therefore becomes necessary to examine into the accuracy of the figures upon which these calculations depend. Senator ALDRICH stated in his speech of May 25:

"As a basis for the calculation of the number of pounds of sugar of each polariscopic test required to make 100 pounds of refined sugar, I have taken the statement of the Treasury Department promulgated June 25, 1896, Department Circular No. 102. I assume there will be no question as to its accuracy. The computations have been confirmed by various statements furnished by the appraiser's office in New York.

"For illustration, I will take an analysis of sugar testing 88 degrees, made by the chemist in charge of the sugar laboratory in New York. This sugar contained seventy-four one-hundredths of 1 per cent of ash, 4.13 per cent of invert sugar, and an out-turn of 81.85 per cent of crystallizable sugar. Of this sugar it would take 122.17 pounds to make 100 pounds of refined sugar. The Treasury estimate is 122.41 for this test. It will be noticed that this sugar contained 4.13 per cent of invert sugar. This invert sugar becomes sirup in the process of refining, and is worth from one-half to three-fourths of a cent per pound. The result in this case would probably be a fair estimate of the average result of the value of the residuum of invert sugar contained in all cane sugars testing in the neighborhood of 89 degrees. The value of this sirup would not appreciably affect differentials."

This statement is lacking in several particulars. It leaves unaccounted for 6.15 pounds of crystallizable sugar. If his sample tested 88 degrees, it contained 88 per cent of crystallizable sugar. He says that it yielded 81.85 per cent. Where is the remaining 6.15 per cent? The invert sugar is not a part of this, because invert sugar does not materially affect a polariscope. As a matter of fact, 3.70 of the 6.15 per cent is held in chemical combination with the 0.74 per cent of ash or salts. The most of this 6.15 per cent is in practice either made into crystallizable sugar, or, with the invert sugar, into low-grade sugars and sirups. Here, then, is 6.15 per cent of crystallizable and 4.13 per cent of invert sugar, every bit of which is worked into valuable product, and a great part of which is, in practice, made into refined sugar almost as valuable as granulated. We do not agree with Mr. ALDRICH that these products are unimportant and do "not appreciably affect differentials." Mr. ALDRICH, in fact, ignores 10.28 pounds for every 81.85 pounds of product for which he accounts.

In this one item alone may be concealed a greater amount of protection to sugar refiners than many protection Senators would be willing to grant.

Recurring to the basis of the pending schedule, the absurdity of the figures is evidenced by the regular market quotations for raw and refined sugars. According to the figures upon which the present schedule claims to be based, the Treasury Department drawback allowance, it should take 120.54 pounds of raw sugar testing 89 degrees to make 100 pounds of refined. This sugar, according to the statement of General Appraiser Sharretts, is now worth $1.90 per 100 pounds. If it actually took 120.54 pounds to make 100 pounds of granulated, the cost of the raw material alone from which to make 100 pounds of refined sugar would be $2.29; while, according to the same authority, the actual market price of the refined granulated at this price was $2.30. Manifestly, therefore, the 100 pounds of refined must have been made from considerably less than 120.54 pounds of raw sugar. We were at that time importing large quantities of raw beet sugar from Germany, when we might, according to prices quoted above, just as well have been importing refined sugar at the same price.

This is a reductio ad absurdum of the most glaring kind. It reaches conclusions which are directly opposed to both facts and common sense.

In view of the above presentation of what we believe to be the facts, on behalf of the tariff-reform committee of the Reform Club I would request you to renew your challenge to the supporters of the proposed sugar tariff. We are convinced that there are gross errors in the basis of their calculations, as partially indicated above, and that there is a very great amount of protection concealed therein in addition to that avowedly given.

In view of the magnitude of the public and private interests at stake in this matter, surely there should be no question as to the fundamental facts on which the discussion rests.

Yours, truly,

CALVIN TOMKINS, *Chairman.*

Hon. DONELSON CAFFERY,
United States Senate, Washington, D. C.

EXECUTIVE SESSION.

Mr. VEST. I move that the Senate proceed to the consideration of executive business.

Mr. ALLISON. Has the Senator from Louisiana [Mr. CAFFERY] concluded his remarks?

Mr. VEST. I think so.

Mr. CAFFERY. Yes; I have concluded.

The VICE-PRESIDENT. The question is on the motion of the Senator from Missouri.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After ten minutes spent in executive session the doors were reopened, and (at 5 o'clock and 22 minutes p. m.) the Senate adjourned until to-morrow, Tuesday, June 15, 1897, at 12 o'clock meridian.

CONFIRMATIONS.

Executive nominations confirmed by the Senate June 14, 1897.

CONSUL-GENERAL.

John F. Gowey, of Washington, to be consul-general of the United States at Kanagawa, Japan.

POSTMASTERS.

A. L. Thompson, to be postmaster at Springdale, in the county of Washington and State of Arkansas.

Orrin H. Jones, to be postmaster at Wilmington, in the county of Windham and State of Vermont.

Aaron Brining, to be postmaster at Versailles, in the county of Darke and State of Ohio.

HOUSE OF REPRESENTATIVES.

MONDAY, *June 14, 1897.*

The House met at 12 o'clock m. Prayer by the Chaplain, Rev. HENRY N. COUDEN.

The Journal of the proceedings of Thursday last was read and approved.

SETTLERS IN GREER COUNTY, OKLA.

Mr. LACEY. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (H. R. 3351) for the relief of settlers in Greer County, Okla.

The bill was read.

Mr. BAILEY. I reserve the right to object until we can hear a statement.

Mr. LACEY. Very well. The act of January 18, 1897, gave to these settlers in Greer County, Okla., formerly Greer County, Tex., six months within which to file and prove up their various claims before the register and receiver of the Mangum land office. The retiring President, Mr. Cleveland, did not appoint a register and receiver for that new office. President McKinley has appointed those officials, and they are about ready to take charge of the office, which will be opened about the 1st of July. This, however, will only allow about eighteen days for these claimants, numbering over 3,000, to file and prove up their claims.

Secretary Bliss, on the 19th of May, sent to the House and the Senate a request for the passage of an act extending the time. The bill which I now desire to call up was introduced by the gentleman from Colorado [Mr. BELL], a former member of the Committee on Public Lands. I ask unanimous consent that the bill be disposed of now. It will only give to these settlers the length of time originally proposed by the act of the Fifty-fourth Congress.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. GAINES. Has any committee reported on this?

Mr. HENRY of Texas. I object.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PLATT, one of its clerks, announced that the Senate had passed without amendment joint resolution (H. Res. 64) relating to the payment of salaries in the consular service.

The message also announced that the Senate had agreed to the amendments of the House to Senate concurrent resolution requesting the Secretary of War to furnish such information as he may have with reference to the present condition of the harbor of Cumberland Sound, etc.

ENROLLED JOINT RESOLUTION SIGNED.

The SPEAKER announced his signature to enrolled joint resolution of the following title:

Joint resolution (H. Res. 64) relating to the payment of salaries in the consular service.

ORDER OF BUSINESS.

Mr. McMILLIN. Mr. Speaker, I demand the regular order, so that there may be consideration of bills from committees under clause 6 of Rule XXIV.

Mr. PAYNE. I move that the House do now adjourn.

The question being taken on the motion of Mr. PAYNE, there were—ayes 77, noes 74.

Mr. BAILEY. Tellers!

Mr. SULZER. Yeas and nays!

The yeas and nays were ordered.

The question was taken; and there were—yeas 88, nays 79, answered "present" 15, not voting 171; as follows:

YEAS—88.

Adams,	Barrows,	Broderick,	Codding,

So the motion to adjourn was agreed to.

The following pairs were announced:

Until further notice:

Mr. HEMENWAY with Mr. ROBERTSON of Louisiana.

Mr. LANDIS with Mr. CRAWFORD.

Mr. KULP with Mr. STALLINGS.

Mr. DAVIDSON of Wisconsin with Mr. HOWARD of Georgia.

Mr. STRODE with Mr. HAY.

Mr. QUIGG with Mr. BLAND.

Mr. HULL with Mr. DOCKERY.

Mr. MINOR with Mr. SPARKMAN.

Mr. MCCALL with Mr. JONES of Virginia.

Mr. YOUNG of Pennsylvania with Mr. BENTON.

Mr. BELKNAP with Mr. MAGUIRE.

Mr. FARIS with Mr. ZENOR.

Mr. HENRY of Indiana with Mr. MIERS of Indiana.

Mr. DANFORD with Mr. TERRY.

Mr. POWERS with Mr. GAINES.
Mr. DORR with Mr. MADDOX.
Mr. PARKER of New Jersey with Mr. ELLIOTT.
Mr. HOOKER with Mr. CATCHINGS.
Mr. SPRAGUE with Mr. DE ARMOND.
Mr. SMITH of Illinois with Mr. LITTLE.
Mr. HEATWOLE with Mr. DINSMORE.
Mr. MCCLEARY with Mr. TALBERT.
Mr. MITCHELL with Mr. TAYLOR of Alabama.
Mr. OTJEN with Mr. LESTER.
Mr. HOPKINS with Mr. MCALEER.
Mr. REEVES with Mr. BALL.
Mr. FISCHER with Mr. CUMMINGS.
Mr. BELDEN with Mr. SULZER.
Mr. LOVERING with Mr. WHEELER of Alabama.
Mr. MCEWAN with Mr. VEHSLAGE.
Mr. STRODE with Mr. ALLEN.
Mr. JOY with Mr. MARSHALL.
Mr. DINGLEY with Mr. SWANSON.
Mr. BROSIUS with Mr. ERMENTROUT.
Mr. LACEY with Mr. MCRAE.
Mr. PITNEY with Mr. CARMACK.
Mr. KERR with Mr. ROBB.
Mr. BRUMM with Mr. COX.
Mr. HICKS with Mr. OTEY.
Mr. STEVENS of Minnesota with Mr. JONES of Washington.
Mr. CLARKE of New Hampshire with Mr. KING.
Mr. PERKINS with Mr. COOPER of Texas.
Mr. BARHAM with Mr. FITZGERALD.
Mr. MILLS with Mr. SULLIVAN.
Mr. SAUERHERING with Mr. STRAIT.
Mr. CHICKERING with Mr. BRADLEY.
Mr. WM. ALDEN SMITH with Mr. BRUCKER.
Mr. ACHESON with Mr. WILSON of South Carolina.
For this day:
Mr. MUDD with Mr. STARK.
Mr. HARMER with Mr. JETT.
Mr. ODELL with Mr. FITZPATRICK.
Mr. GROSVENOR with Mr. RIXEY.
Mr. BARNEY with Mr. TODD.
Mr. MARSH with Mr. COONEY.

Mr. RHEA of Kentucky. I am paired with my colleague, Mr. PUGH, although I did not hear the pair announced. I have cast my vote in the negative, but now wish to withdraw it and be recorded "present."

Mr. KING. I am paired with the gentleman from New Hampshire, Mr. CLARKE. I voted "no," but desire to withdraw my vote and be recorded "present."

Mr. WHEELER of Alabama. Mr. Speaker, I find that the gentleman with whom I have been paired is not present. I will therefore withdraw my vote and ask to be recorded as "present."

Mr. BURKE. I ask unanimous consent that my colleague, Mr. SLAYDEN, be granted leave of absence for the week, on account of important business.

The SPEAKER. Without objection, the request will be granted.

There was no objection.

Mr. CATCHINGS. I desire to withdraw my vote, as I am paired with the gentleman from New York, Mr. HOOKER.

Mr. MCCULLOCH. Mr. Speaker, I desire to vote.

The SPEAKER. Was the gentleman present and listening when his name should have been called?

Mr. MCCULLOCH. I can not say whether I was listening or not.

The SPEAKER. Then it is impossible for the Chair to entertain the request.

Mr. MCCULLOCH. I noticed that the Chair did not put the question in that form to other gentlemen.

The SPEAKER. If the Chair did not do so, it was because of inadvertence. He puts the question to the gentleman from Arkansas.

Mr. MCCULLOCH. During the roll call I was writing a part of the time and conversing at other times. I intended to listen, but I missed my chance to answer by just one name. I can not say whether I was listening at the moment my name was called or not.

The SPEAKER. The statement of the gentleman scarcely brings him within the ruling, and his vote can not be received.

Mr. GAINES. I have voted "no" on this question, but I am paired with the gentleman from Vermont, Judge POWERS, and therefore wish to withdraw my vote and be marked "present."

Mr. LACEY. I am paired on all political questions with the gentleman from Arkansas, Mr. MCRAE. This seems to be a political question and therefore I desire to withdraw my vote.

Mr. MCCALL. I am paired with the gentleman from Virginia, Mr. JONES, on all political questions. If I voted, I should vote "aye."

Mr. BRUCKER. I am paired with the gentleman from Michigan, Mr. WM. ALDEN SMITH. I have voted "no," but wish to withdraw my vote and be marked "present."

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:
To Mr. TODD, indefinitely, on account of important business.
To Mr. DAVIS, for one week, on account of important business.

The result of the vote on the motion to adjourn was announced as above recorded; and accordingly (at 12 o'clock and 45 minutes p. m.), the House adjourned, pursuant to its standing order, until Thursday next, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, the following executive communications were taken from the Speaker's table and referred as follows:

A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report of a survey of Erie Harbor, Pennsylvania—to the Committee on Rivers and Harbors, and ordered to be printed.

A letter from the Acting Secretary of War, transmitting a copy of a letter from Maj. C. C. Sniffen, paymaster, United States Army, and recommending that a duplicate check be issued in favor of Charles C. Ely—to the Committee on Claims, and ordered to be printed.

A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report of examination and survey of Bayou Teche from St. Martinsville to Port Barre, La.—to the Committee on Rivers and Harbors, and ordered to be printed.

A letter from the Secretary of the Treasury, making certain recommendations in regard to the admission of Chinese into the United States to attend the Omaha Exposition—to the Committee on Ways and Means, and ordered to be printed.

A letter from the Acting Secretary of War, recommending legislation to provide immediate funds for construction of works for protecting the eastern beach of United States land at Sandy Hook, N. J.—to the Committee on Appropriations, and ordered to be printed.

A letter from the Attorney-General, transmitting a copy of a letter to the chairman of the Senate Committee on Appropriations relating to legislation desired by the Department affecting the pay of certain officers thereof—to the Committee on Appropriations, and ordered to be printed.

A letter from the Attorney-General, transmitting a copy of a letter to the chairman of the Senate Committee on Appropriations relating to the pay of certain officers—to the Committee on Appropriations, and ordered to be printed.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS INTRODUCED.

Under clause 3 of Rule XXII, bills, resolutions, and memorials of the following titles were introduced and severally referred as follows:

By Mr. SHAFROTH: A bill (H. R. 3461) for the erection of a monument to the memory of the women who during the rebellion attended and nursed the sick and dying soldiers of the United States—to the Committee on the Library.

By Mr. MAXWELL: A bill (H. R. 3462) to amend an act to provide for the adjudication and payment of claims arising from Indian depredations, approved March 3, 1891—to the Committee on Claims.

By Mr. WADSWORTH: A resolution (House Res. No. 57) to pay funeral expenses and six months' pay to widow of Edwin Giddings, late conductor of elevator in House of Representatives—to the Committee on Accounts.

By Mr. ERMENTROUT: A memorial of the legislature of the State of Pennsylvania, asking the reappointment and retirement of General Gregg, late United States Army—to the Committee on Military Affairs.

PRIVATE BILLS AND RESOLUTIONS INTRODUCED.

Under clause 1 of Rule XXII, private bills and resolutions of the following titles were introduced and severally referred as follows:

By Mr BELL: A bill (H. R. 3463) for the relief of William L. McClure—to the Committee on War Claims.

By Mr. CLARK of Missouri: A bill (H. R. 3464) granting a pension to John P. Clark—to the Committee on Invalid Pensions.

By Mr. DAVENPORT: A bill (H. R. 3465) granting a pension to Ida Wiederhold—to the Committee on Invalid Pensions.

By Mr. JOY: A bill (H. R. 3466) for the relief of Martha A. Murphy—to the Committee on War Claims.

By Mr. KULP: A bill (H. R. 3467) for the relief of William Ogden, Shamokin, Pa.—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3468) to remove the charge of desertion from the military record of Milton McPherson, of Northumberland, Pa.—to the Committee on Military Affairs.

By Mr. LACEY: A bill (H. R. 3469) granting a pension to George M. Gibson—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3470) granting a pension to George W. Scott, jr.—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3471) restoring the pension of Mahala A. Dahlman, formerly Brumley—to the Committee on Invalid Pensions.

By Mr. MAHON: A bill (H. R. 3472) for the relief of Mary Isabella Krebbs—to the Committee on Invalid Pensions.

By Mr. MEYER of Louisiana: A bill (H. R. 3473) for the relief of certain employees of the United States mint at New Orleans, La.—to the Committee on Claims.

By Mr. SHAFROTH: A bill (H. R. 3474) granting an increase of pension to James S. Wiggin—to the Committee on Invalid Pensions.

By Mr. SETTLE: A bill (H. R. 3475) to relieve John W. Barnes of the charge of desertion—to the Committee on Military Affairs.

By Mr. SIMPKINS of Massachusetts: A bill (H. R. 3476) for the relief of Andrew Morse, jr.—to the Committee on Invalid Pensions.

By Mr. SAMUEL W. SMITH: A bill (H. R. 3477) to correct the military record of Wesley B. Coon—to the Committee on Military Affairs.

Also, a bill (H. R. 3478) to correct the military record of Henry Berry—to the Committee on Military Affairs.

By Mr. SOUTHARD: A bill (H. R. 3479) to pension Orilla Chadwick, widow of John Henry Chadwick—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3480) to pension James Ross Johnson—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3481) to increase the pension of Wilson W. Brown—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3482) to correct the military record of Wayne Mapes—to the Committee on Military Affairs.

By Mr. CHARLES W. STONE (by request): A bill (H. R. 3483) granting a pension to John W. Smoot—to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, the following petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. ADAMS: Resolution passed by the select and common council of the city of Philadelphia, adopted June 10, 1897, urging the immediate passage of the tariff bill—to the Committee on Ways and Means.

By Mr. BELFORD: Petition of citizens of Queens County, N. Y., remonstrating against the proposed increased tax on beer—to the Committee on Ways and Means.

By Mr. BINGHAM: Resolutions of the Grocers and Importers' Exchange of Philadelphia, Pa., recommending the enactment of the Torrey bankruptcy bill—to the Committee on the Judiciary.

Also, resolutions of the select and common council of the city of Philadelphia, Pa., urging the immediate passage of the tariff bill—to the Committee on Ways and Means.

By Mr. BULL: Petition of citizens of Providence, R. I., for a more rigid restriction of immigration—to the Committee on Immigration and Naturalization.

By Mr. DALZELL: Resolutions of Local Union No. 121, Journeymen Tailors' Union of America, in favor of limiting tourists to $100 worth of clothing for exemption from duty—to the Committee on Ways and Means.

Also, resolution of the select and common council of the city of Philadelphia, Pa., in favor of the speedy passage of a tariff bill—to the Committee on Ways and Means.

By Mr. DOVENER: Petitions of E. B. Criss and 57 other citizens of Mount Union; Thomas Leyland and 68 others, of Twilight; J. L. McCoy and 52 others, of Palmer; N. W. Robinson and 18 others, of Burton; T. T. Bonar and 51 others, of Marshall County, in the State of West Virginia, demanding a more rigid restriction of immigration—to the Committee on Immigration and Naturalization.

By Mr. ERMENTROUT: Petition of R. S. Heckman and other citizens of Reading, Pa., asking for the passage of a bill for a more rigid restriction of immigration—to the Committee on Immigration and Naturalization.

Also, protest of the Civil Service Reform Association of Philadelphia, Pa., against the repeal of the civil-service laws—to the Committee on Reform in the Civil Service.

Also, resolution of the Grocers and Importers' Exchange of Philadelphia, Pa., favoring the passage of the Torrey bankruptcy bill—to the Committee on the Judiciary.

Also, protest of the W. H. Keen Company, of Philadelphia, Pa., and other dealers in refined sugar, against increased protection upon refined sugar, and petition for amendment of the sugar schedule so as to admit sugar (yellow refined) not over No. 16 Dutch standard—to the Committee on Ways and Means.

Also, petition of the Wine and Spirit Association of Cleveland, Ohio, asking for the passage of the law recommended by the Secretary of the Treasury relative to tax on distilled spirits, etc.—to the Committee on Ways and Means.

Also, resolution of the Winter Wheat Millers' League, passed at St. Louis convention May 19 and 20, 1897, asking that burlap, burlap bags, and bolting cloth be left on the free list—to the Committee on Ways and Means.

Also, petition of Frederick Mead & Co. and other tea dealers in New York City, in favor of a specific duty on tea—to the Committee on Ways and Means.

Also, memorial of B. J. Hoffacker, of San Francisco, Cal., protesting against the abrogation of the Hawaiian treaty in the matter of beet sugar—to the Committee on Foreign Affairs.

Also, memorial of the American Chamber of Commerce at Paris, addressed to the Congress of the United States, asking for action by the United States in the matter of the coming Paris Exposition, etc.—to the Committee on Foreign Affairs.

By Mr. GROUT: Petition of W. H. Green and 213 other citizens of Montpelier, Vt., in favor of a law to further restrict immigration—to the Committee on Immigration and Naturalization.

Also, resolution adopted by the Winter Wheat Millers' League, requesting that burlaps and burlap bags be left on the free list, as they are at the present time—to the Committee on Ways and Means.

Also, memorials of Mrs. L. D. Dyer, president of the Addison County Woman's Christian Temperance Union, of Salisbury, Vt., and Mrs. Mary B. Cockle, of Starksboro, Vt., president of the Bennington County Woman's Christian Temperance Union, to forbid the transmission of gambling messages by telegraph—to the Committee on Interstate and Foreign Commerce.

Also, petitions of C. S. Hall and 78 other citizens of Randolph, Orange County, Vt., requesting that the free delivery of all mail matter be extended to every post-office in the settled portions of the country, with free collection of letters—to the Committee on the Post-Office and Post-Roads.

Also, memorials of Mrs. L. D. Dyer, of Salisbury, Vt.; Mrs. E. M. Denny, of Montpelier, Vt.; Mrs. Gratia E. Davidson and Miss Carrie E. Lowe, of Newfane, Vt., praying for the passage of Senate bill No. 1187, prohibiting kinetoscope reproductions of prize fights—to the Committee on the Judiciary.

By Mr. HARMER: Petition of Alexander Dugnay, of Frankford, county of Philadelphia, Pa., for a pension—to the Committee on Invalid Pensions.

By Mr. HILBORN: Resolution of the Council of Labor of Los Angeles County, Cal., urging the abrogation of the Hawaiian treaty—to the Committee on Foreign Affairs.

By Mr. JOY: Paper to accompany House bill for the relief of Martha A. Murphy—to the Committee on War Claims.

By Mr. KERR: Petition of W. A. Rose, A. Burros, and other citizens of the Fourteenth Congressional district, State of Ohio, relating to the tariff on wool, praying for more protection in the interest of woolgrowers—to the Committee on Ways and Means.

By Mr. KULP: Petitions of George W. Metz and 53 others, and Charles F. Long and 96 others, citizens of Shamokin, Pa., favoring a more rigid restriction of immigration—to the Committee on Immigration and Naturalization.

By Mr. LACEY: Papers to accompany House bill granting a pension to George M. Gibson—to the Committee on Invalid Pensions.

Also, papers to accompany House bill granting a pension to Mahala A. Dahlman—to the Committee on Invalid Pensions.

Also, papers for the relief of George W. Scott, of Eldon, Iowa—to the Committee on Invalid Pensions.

By Mr. LOUD: Petition of merchants of San Francisco, Cal., relating to the time when the tariff bill should take effect—to the Committee on Ways and Means.

Also, resolution of the Council of Labor of Los Angeles County, Cal., relative to the abrogation of the Hawaiian treaty—to the Committee on Foreign Affairs.

By Mr. MAHON: Papers to accompany House bill for the relief of Mary Isabella Krebbs—to the Committee on Invalid Pensions.

By Mr. OLMSTED: Petitions of J. Blessing and other citizens of Harrisburg and Samuel Reed and others, of Steelton, Dauphin County, Pa., praying for the passage of a law to further restrict immigration—to the Committee on Immigration and Naturalization.

By Mr. OVERSTREET: Petition of James Dotson and 63 other

veterans of the late war, praying for the enactment of a law equalizing bounties—to the Committee on Invalid Pensions.

By Mr. SNOVER: Petition of William Canham and 100 other citizens of St. Clair County, Mich., asking for the appointment of a monetary commission—to the Committee on Banking and Currency.

By Mr. STEPHENS of Texas: Petitions of citizens of Wichita Falls and Abilene, State of Texas, asking for the passage of the bill for the relief of the book agents of the Methodist Episcopal Church South—to the Committee on War Claims.

By Mr. SULZER: Petition of citizens of the United States, containing 6,000,000 names, favoring the granting of belligerent rights to the Cuban patriots—to the Committee on Foreign Affairs.

By Mr. WANGER: Petition of Isaac S. Yeakle and 36 other citizens of Norristown, Pa., for a more rigid restriction of immigration—to the Committee on Immigration and Naturalization.

By Mr. YOUNG of Pennsylvania: Resolution adopted by the select and common council of the city of Philadelphia, Pa., asking for the speedy passage of the tariff bill—to the Committee on Ways and Means.

SENATE.

TUESDAY, *June 15, 1897.*

The Senate met at 12 o'clock m.

Prayer by Rev. L. B. WILSON, D. D., of the city of Washington.

The Journal of yesterday's proceedings was read and approved.

AGREEMENT WITH CHOCTAW AND CHICKASAW INDIANS.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of the Interior, transmitting, in connection with Department letter of the 18th ultimo, a copy of a letter of the 12th instant and accompanying copy of a memorial from certain freedmen of the Choctaw Nation, relative to their rights as members of that tribe, in which they complain that they are not given any interest in the schools and moneys of the Choctaw Nation; which, with the accompanying papers, was referred to the Committee on Indian Affairs, and ordered to be printed.

PETITIONS AND MEMORIALS.

The VICE-PRESIDENT presented memorials of P. H. Woolsey & Co., of Livingston Manor; of N. Duin's Sons, of Peekskill; of Thomas Showoe's Sons, of Newburg; the Hawley Box and Lumber Company, of New York City; the American Lumber Company, of New York City; Douglass L. White & Co., of Albany; the New Rochelle Coal and Lumber Company, of New Rochelle; the Inman Manufacturing Company, of Amsterdam; J. C. Hubbell, of Albany; R. D. Clark, of South Fallsburg; W. M. Crombie & Co., of New York City; the Manhattan Trunk and Box Factory, of New York City; Frederick W. Starr, of Brooklyn; James H. Dykeman, of Brooklyn; the Cross, Ostend & Ireland Lumber Company, of Brooklyn; Lawrence Bros., of Yonkers; Darmat & Pell of New York City; Sylvester Ross, of Brooklyn; Jimenis & Co., of New York City; Crane & Clark, of New York City, and of D. M. Rossequil, of Brooklyn, all in the State of New York, and memorials of the Florence Furniture Company, of Florence; of Holt & Bugby, of Boston, and of S. B. Dibble & Co., of North Adams, all in the State of Massachusetts, remonstrating against the imposition of the proposed duty of $2 per thousand feet on lumber; which were ordered to lie on the table.

Mr. SEWELL presented the petition of Edward Harding and 45 other citizens of New Brunswick, N. J., and the petition of John R. Radcliff and 23 other citizens of Millville, N. J., praying for the early passage of the pending tariff bill; which were ordered to lie on the table.

He also presented petitions of Herman Strauss and 149 other citizens of Jersey City; of Thomas Flannery and 146 other citizens of Bayonne; of John Jacobson and 59 other citizens of West Orange; Emil Baumann and 99 other citizens of Hoboken; Henry Taft and 32 other citizens of Perth Amboy; W. T. Matthews and 49 other citizens of Passaic; William J. Raab and 24 other citizens of Bloomfield; Charles Bender and 11 other citizens of Manhattan Park; D. F. Smith, jr., and 23 other citizens of Hackensack; Neil J. Lynch and 1,431 other citizens of Newark, and of sundry citizens of Jersey City, all in the State of New Jersey, and the memorial of Robert G. Rankin, jr., and 13 other citizens of Philadelphia, Pa., remonstrating against the proposed increase of the tax on beer; which were ordered to lie on the table.

Mr. PLATT of New York presented sundry petitions of citizens of Brooklyn, Antwerp, Hagaman, and Schaghticoke, all in the State of New York, praying for the early enactment of a protective-tariff law; which were ordered to lie on the table.

He also presented sundry memorials of citizens of New York City and Brooklyn, in the State of New York, remonstrating against the proposed increase of the tax on beer; which were ordered to lie on the table.

Mr. FAIRBANKS presented sundry petitions of citizens of Goodland, North Indianapolis, Milford, Shipshewana, Muncie, Cicero, Middletown, and New Albany, all in the State of Indiana, praying for the early enactment of a protective-tariff law which will adequately secure American industrial products against the competition of foreign labor; which were ordered to lie on the table.

Mr. GALLINGER presented a petition of the Woman's Christian Temperance Union of Dover, N. H., praying for the enactment of legislation prohibiting the reproduction of pugilistic encounters by means of the kinetoscope; which was ordered to lie on the table.

He also presented memorials of the Drake & Sanborn Shoe Company, of Pittsfield, N. H.; of N. B. Thayer & Co., and of W. S. Pillsbury, remonstrating against any increase in the present rate of duty on tanned skins for morocco or a duty on raw goatskins; which were ordered to lie on the table.

He also presented a memorial of the Presbytery of the city of Washington, indorsing the recent action of Congress relative to the distribution of money appropriated for charitable purposes in the District of Columbia; which was referred to the Committee on the District of Columbia.

Mr. CAFFERY presented a memorial of the Sugar Planters, Association of Louisiana, remonstrating against the statement made by him that the Wilson tariff act affords enough protection to sugar; which was ordered to lie on the table.

Mr. HOAR presented a memorial of sundry citizens of Massachusetts, remonstrating against any increase in the present rate of duty on tanned skins for morocco or the duty on raw goatskins; which was ordered to lie on the table.

Mr. McMILLAN presented a petition of sundry citizens of Detroit, Mich., praying for the passage, at the earliest possible date, of such protective-tariff legislation as will adequately secure American industrial products against the competition of foreign labor; which was ordered to lie on the table.

He also presented the memorial of O. H. Blackman and 101 other citizens of Michigan, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which was referred to the Committee on Interstate Commerce.

He also presented the memorial of R. M. Power, of Holyoke, Mass., remonstrating against the proposed increase of the duty on leaf tobacco; which was ordered to lie on the table.

Mr. FRYE presented the petition of N. J. Lamb and sundry other citizens of Sangerville, Me., and a petition of 463 citizens of Sanford, Me., praying for the early enactment of a protective-tariff law; which were ordered to lie on the table.

Mr. SPOONER presented the petition of H. W. Meyer and 41 other citizens of Appleton, Wis., praying for the early passage of the pending tariff bill; which was ordered to lie on the table.

Mr. TURPIE presented the memorial of Joseph J. Little, of Attica, Ind., remonstrating against the proposed increase of the duty on granite; which was ordered to lie on the table.

He also presented a petition of sundry citizens of Brazil, Ind., praying for the early enactment of a protective-tariff law; which was ordered to lie on the table.

Mr. CHANDLER presented petitions of Hon. David Harvey Goodell, ex-mayor, and 108 citizens of Antrim; of Hon. John B. Smith, ex-governor, and 64 citizens of Hillsboro, and of Charles T. Page and 24 other citizens of Concord, all in the State of New Hampshire, praying that active cooperation be given toward securing protective tariff legislation at the earliest possible date; which were ordered to lie on the table.

Mr. ELKINS presented sundry petitions of citizens of West Virginia, praying for the enactment of legislation restricting immigration; which were ordered to lie on the table.

Mr. BURROWS presented petitions of H. T. Emerson and 21 other citizens of Menominee; of H. J. Holmes and 38 other citizens of Hart; of Dr. Earl Fairbanks and 61 other citizens of Luther; Don C. Henderson and 172 other citizens of Allegan; Amy Kinney and 142 other citizens of Eastlake, and of Dwight Warren and 23 other citizens of Threeoaks, all in the State of Michigan, and the petition of R. C. Griffin and 42 other citizens of Valleyhead, Ala., praying for the early passage of the pending tariff bill; which were ordered to lie on the table.

Mr. COCKRELL. I present a resolution of Lodge No. 82, Brotherhood of Boiler Makers and Iron Ship Builders of America, in regular session convened at Kansas City, Mo., on the 12th of June, 1897, stating the insecurity of national and State banks under our present laws as a source of large loss to them, and praying Congress for the enactment of a law for the establishment by the General Government, without delay, of Government savings banks in connection with the Post-Office Department. I move that the petition be referred to the Committee on Post-Offices and Post-Roads.

The motion was agreed to.

Mr. COCKRELL presented a petition of sundry citizens of Concordia, Mo., and a petition of sundry citizens of Desoto, Mo., praying for the passage, at the earliest possible date, of such protective-tariff legislation as will adequately secure American industrial products against the competition of foreign labor; which were ordered to lie on the table.

He also presented a petition of the board of directors of the Merchants' Exchange of St. Louis, Mo., praying for the enactment of legislation restoring to the people of this country the carrying trade on the high seas; which was referred to the Committee on Commerce.

Mr. QUAY presented sundry memorials of citizens of Easton, Pa., remonstrating against the proposed increase of the tax on beer; which were ordered to lie on the table.

Mr. KENNEY presented a petition of sundry citizens of St. Georges, Del., praying for the enactment of legislation restricting immigration; which was ordered to lie on the table.

REPORTS OF COMMITTEES.

Mr. GALLINGER. I am directed by the Committee on Pensions, to whom was referred the bill (S. 344) to amend an act entitled "An act granting pensions to the survivors of the Indian wars of 1832 to 1842, inclusive, known as the Black Hawk war, Creek war, Cherokee disturbances, and the Seminole war," approved July 27, 1892, to report it without amendment, and to submit a report thereon. • I call the attention of the Senator from Oregon [Mr. MCBRIDE] to the report.

The VICE-PRESIDENT. The bill will be placed on the Calendar.

Mr. QUAY, from the Committee on Public Buildings and Grounds, to whom was referred the bill (S. 2097) to grant to the city of Wilmington, Del., the use of certain real estate in said city on which is situated the building recently occupied for Federal purposes, reported it without amendment.

BILLS INTRODUCED.

Mr. CAFFERY (by request) introduced a bill (S. 2143) to remove the statutory bar of limitation now standing against the claim of J. Viosca, and conferring full jurisdiction upon the United States Court of Claims to try and adjudicate said claim and render judgment therefor; which was read twice by its title, and referred to the Committee on Claims.

Mr. ELKINS introduced a bill (S. 2144) for the relief of Charles Hurrle; which was read twice by its title, and referred to the Committee on Military Affairs.

Mr. FORAKER introduced a bill (S. 2145) to amend section 4 of the act approved March 2, 1895, being an act amendatory of an act with reference to the postal service; which was read twice by its title, and referred to the Committee on Post-Offices and Post-Roads.

AMENDMENT TO THE TARIFF BILL.

Mr. TILLMAN submitted an amendment intended to be proposed by him to the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States; which was ordered to lie on the table and to be printed.

TRIALS BY COURTS-MARTIAL.

Mr. JONES of Arkansas (by request) submitted the following resolution; which was read, and referred to the Committee on Naval Affairs:

Resolved, That the Secretary of the Navy be directed to inform the Senate on the following points, namely:

1. Whether the following-named persons are or have been held as prisoners by the Secretary of the Navy or under his authority in Massachusetts: Jesse G. Crain, Louis V. Eytinge, C. W. Duyer, Joseph J. Wiles, Michael F. Mooney, James Skelty, Charles Brown, John J. Harrington, and S. A. Weirman; and whether they have, with or without the assent of the naval officers in charge of them, sent a letter to George F. Ormsby, esq., requesting him to act as their attorney, or to appoint such as he might deem necessary, in obtaining their release and redress from the losses suffered by them from their sentences of courts-martial.

2. Whether the judicial records of their trials by courts-martial, in the custody of the United States Navy Department, are open to the inspection of their attorneys in the same manner as other judicial records of other courts constituted under the laws of the United States.

3. Whether the records of these trials show and state that the charges upon which these prisoners were tried and sentenced (if at all) were within the jurisdiction of a court-martial as limited by article 43, section 1624, United States Revised Statutes; and whether they were all tried on "charges other" than those "furnished" them "at the time" they originally began to be "under arrest" or in confinement; and whether, if so, the record shows that it "appeared" to the court-martial that said charges were not prohibited by said article 43 from trial; and if so, how.

4. Whether when said prisoners were first placed in arrest or confinement they were furnished with copies of any charge or charges of any offense alleged to have been committed by them and known to the authority by whom they were thus deprived of liberty; if not, how long such knowledge of the cause of their imprisonment remained so unfurnished to them, and how long they remained prisoners under a bare order or lettre de cachet or without being informed specifically and in writing of the nature and cause of their arrest and imprisonment as required by article 42, section 1624, United States Revised Statutes.

THE TARIFF BILL.

Mr. ALLISON. I move that the Senate proceed to the consideration of House bill 379.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States.

The VICE-PRESIDENT. The pending question is on the amendment proposed by the Senator from Kentucky [Mr. LINDSAY], which will be stated.

The SECRETARY. In line 22, page 63, paragraph 206, it is proposed to strike out "ninety-five one-hundredths" and to insert "eight-tenths;" so as to read:

On all sugar which has gone through a process of refining, 1 cent and eight-tenths of 1 cent per pound.

Mr. CAFFERY. Mr. President, it was stated yesterday by the Senator from Kentucky [Mr. LINDSAY] that the late Secretary of the Treasury, Mr. Carlisle, derived his statement or figures as to the number of pounds of raw sugar it required to make a pound of refined from the sugar trust. I submit that the statement coming from the Senator from Kentucky is entitled to due weight and consideration, and it flows from that statement that the figures upon which the basis of calculation is made as to the number of pounds of raw sugar it requires to make a pound of refined is entirely misleading. Nothing has ever come from the sugar trust yet that, in my opinion, was satisfactory. They have studiously avoided giving any testimony whatever as to the workings of their plant, the cost of their plant, their labor cost, and all other facts necessary to be known in order to ascertain the precise character of their business.

Yesterday the Senator from Iowa [Mr. ALLISON] stated emphatically that the labor cost in refining sugar in the United States is greater than the labor cost in Germany. In 1894 a statement was prepared by Hon. John De Witt Warner, then a member of the lower House, assisted by Mr. Byron W. Holt, press editor of the Reform Club, and Mr. L. Carroll Root, fellow of Cornell University in political economy and finance, in regard to sugar tariffs and the sugar trust. I ask the Secretary to read from page 4 of that report, which was published by order of the Senate, down to page 7.

The Secretary read as follows:

LABOR COST OF SUGAR REFINING.

That the cost of sugar refining in the United States is much less than elsewhere is indicated by a comparison of the labor cost. In 1890 Mr. T. E. Willson investigated as to the "labor cost" of refining sugar in different countries. Before publication his figures were submitted to the representatives of the sugar trust and admitted to be fair and correct. The result he reached was that the labor cost per 100 pounds of refining sugar was then, in Germany 43 cents, in France 38 cents, in England 34 cents, in Cuba 22 cents (slave and semi-slave), and in the United States 14 cents. English statistical papers had noted this and predicted that, because of the comparatively cheap labor cost in the United States, America would sometime control the sugar market in Great Britain.

The low labor cost of sugar refining in the United States is strikingly shown by the 1890 census. The two most important refining centers in this country are Brooklyn and Philadelphia, where by far the largest proportion of the total refining is carried on. On page 6 of Bulletin No. 234 of the Eleventh Census the number of refineries in Brooklyn is given as 8; the total wages paid by them in the year ending May 31, 1890, $330,558; value of product, $16,629,982. From these figures it appears that the labor cost in these refineries amounted to 1.986 per cent of the value of the product. From Bulletin No. 244 the corresponding data as to the 8 refineries in Philadelphia are found to be: Aggregate wages, $753,386; value of product, $46,598,524; from which it appears that the labor cost in these refineries was 1.617 per cent of the value of the product. The total wages paid in the 16 refineries located in these two cities amounted to $1,083,944, the aggregate value of the product being $63,228,506, a labor cost of 1.714 per cent of the value of the product.

Taking the average prices of refined sugars for the years 1889 and 1890, as well as for the year ending June 1, 1890, as given by Willett & Gray's Journal, viz, 7.827 cents, 6.30 cents, and 7.265 cents, respectively, as the value of the product at the refineries (and it must be remembered that these figures are somewhat above the value at the refinery, inasmuch as they include the cost of marketing, commissions, etc.), the labor cost of 1 pound of refined sugar is found to be—

Estimated labor cost per pound in cents.

	1889.	1889–90.	1890.
Brooklyn	0.1855	0.1444	0.125
Philadelphia	.1295	.1175	.1018
Average	.1341	.1245	.108

The actual labor cost being less than the above in the same proportion that the market price of refined sugar, as quoted, is higher than its estimated worth at the refinery.

The lower cost of labor in the United States arises from the extraordinary extent to which, in new refineries—by far the largest in the world—system and machinery are availed of to the utmost extent in reducing cost of refining and handling to a minimum. The comparatively low (though high) cost of labor in Cuba arises not from it being slave labor, but from the fact that, next to those of the United States, the Cuban refineries are the most modern in the world, while, from causes noted below, those of England, France, and Germany are behindhand and will remain so for years to come, and will always be at a disadvantage as compared with those of the United States.

THE TOTAL COST OF REFINING.

The following figures are taken from the advance bulletins of the Eleventh Census:

Cost of refining in 1889–90 according to Eleventh Census.

	Brooklyn.	Philadelphia.
Wages	$330,558	$753,386
Fuel	100,342	436,516
Mill supplies	15,986	6,977
Sundry materials	287,739	260,231
Rent	20,450	76,722
Power and heat	900	
Taxes	21,877	28,279
Insurance	21,397	43,807
Repairs	29,171	37,757
Interest on cash used in business	65,449	48,834
Sundries	68,516	349,493
Total	962,385	2,032,002
Value of product	16,623,134	46,598,524
Cost of refining, per cent of product	5.79	4.361

The average price of granulated sugar from May 31, 1889, to May 31, 1890, was 7.265 cents. On this basis the estimated total cost of refining per 100 pounds would be 42 cents in Brooklyn and 31.7 cents in Philadelphia. But the real cost of refining in 1889-90 was as far below 42 cents and 31.7 cents per 100 pounds at Brooklyn and Philadelphia, respectively, as the quoted price for refined sugar, 7.265 cents per pound, was above its value at the refinery. And it must be remembered that Messrs. Willett & Gray estimated that on account of the improvements already provided for at the close of 1890 the cost of sugar refining would be 6¼ cents per 100 pounds less than 1890—this necessarily in the Brooklyn refineries, since the great new refineries in Philadelphia were not then owned by the trust. It must also be remembered that since that time new refineries have been built and improvements made to old ones at a greater rate than ever before, and that the Philadelphia refineries are now in the trust combine. When these facts are taken into account, the only remaining question is as to how far below 31 cents per 100 pounds is the present cost of all items included in refining (except the absolute waste, which, as above shown, is scarcely 2 per cent of the cost of the raw sugar used).

This is corroborated by late admissions of the sugar trust itself. Mr. Henry O. Havemeyer, its head, in a carefully prepared statement published in the New York Herald of March 25, 1894, referred to the sugar trust as "a concern that melts a million and a half tons of sugar" a year, and also stated as follows:

"The American Sugar Refining Company has distributed during the last two years and eleven months for improvements at the refineries, cost of manufacture, labor, packages, fire insurance, bone black, etc., more than $34,000,000 in round numbers, paying out monthly $1,000,000 in cash."

By comparing these figures and remembering that the net waste in refining high-grade sugar is slight—the difference in weight between raw and refined being partly compensated by valuable by-products, also that it takes 2,240 pounds to make a ton of sugar—it is seen that the total expense of refining, between the raw sugar and the refined product, including labor supplies and incidentals, and even improvements on real estate, fire insurance, etc., and actual loss in refining, can not well be above 37½ cents per 100 pounds, even if Mr. Havemeyer's estimate of $1,000,000 per month total expenditure be correct. A similar result is reached if we take the figures of the refined sugar turned out by the trust during 1893 as a basis for the calculation.

As nearly, therefore, as can be approximated until the trust gives up its secrets, the actual labor cost of refining is to-day probably between 10 and 11 cents per 100 pounds; the total expenses of refining are about 30 cents per 100 pounds, and the total margins between the market prices of 96 degree centrifugals and granulated necessary to cover all depreciation of plant, charges, allowances, and expenses (except net profits in the shape of dividends on invested capital) are probably about 35 to 40 cents per 100 pounds in case of the sugar trust, and from 35 to 45 cents per 100 pounds in the case of the so-called "independent" refiners, whose status is exposed below.

Mr. CAFFERY. Mr. President, it will appear very clearly from this statement, published by authority of this body, that the refining cost in the United States of sugar is very considerably under 30 cents a hundred pounds. In the absence of any proof to the contrary, I will assume, and I think the whole nation has a right to assume, that the refining cost in the United States is less than anywhere else in the world.

There has been nothing whatever to substantiate the statement made by the Senator from Iowa that the labor cost abroad, or the refining cost abroad, is less than in the United States, and the plea for protection upon that ground signally fails. There is no ground for it whatever.

Yesterday the Senator from Iowa introduced some figures as against the correctness of which he challenged contradiction. I take his figures to be correct. It is utterly immaterial where he places the price of granulated sugar. The price of the raw sugar or the dutiable predicate upon which we must calculate, is taken from the schedule itself. According to a clause in the bill, all degrees of sugar below 87 are to suffer a reduction of 10 cents a pound. He commences, then, at 75 degrees, which under the bill carries a cent, and reduces that amount by one-tenth. He starts with the valuation, then, at 90 cents on the hundred pounds. He goes on down with about 6¼ mills to a degree until he reaches 96 test. Ninety-six test is dutiable under the bill at 1.63 cents. The corresponding duty upon refined at that test is 1.95 cents. It is true that the duty here is somewhat against the refined sugar at 1.95. There is a slight reduction to be made, but reducing the twenty one-hundredths of a cent, the clear margin by the amount that the refined loses by the differential between the raws at 96, we still have 19.82 cents.

At 97 we have 19.70 cents protection, of clear protection, without any regard to prices. Prices are merely illusory in this schedule. It is the duties that we must consider. The differential in the duty is 19.70 cents clear at 97. At 98 it is 19.70, and at 99 it is 19.78.

There is a slight falling off of the differential in favor of the trust as you go up in degree. As you go down in degree, according to the method by which the duties are levied, the differential becomes still greater and the protection still larger. So at 75 there is a clear differential of 62 cents per hundred, as against, you may say, an equality at 96, without considering the twenty hundredths. Considering that, there is 19.82. So the difference between 19.82 at 96 test and sixty-two hundredths at 75 test is the degree of protection that is to be received from this schedule as you go down in the polariscopic strength.

I submit to the Senator from Iowa, without any consideration whatever of this differential of thirty-eight hundredths, that that is too much protection under the evidence that we have of the ability of the trust to maintain itself against all competition. When you put on the thirty-eight hundredths, you bring up the protection in favor of this trust to nearly sixty hundredths of a cent per pound—over half a cent.

There is another thing to which I slightly adverted yesterday. The Senator from Rhode Island [Mr. ALDRICH] stated in his opening speech that taking a degree testing 88 per cent of sugar he makes 81 pounds of sugar. Where is the difference, where is the loss, between the 88 per cent of sugar and the 81 pounds actually made? How does it occur? There are some 6.85 pounds or 6.15 pounds that are not accounted for in that calculation.

The sugar trust makes out of this 6.15 pounds soft sugars and molasses. In none of these calculations is this amount of sugar at the various degrees credited to the sugar trust. On the contrary, it is considered as pure loss. This is an element in the consideration of these schedules that ought not to be lost sight of. Besides, it ought to be clearly ascertained, and the sugar trust itself ought to furnish the evidence, whether or not the Treasury statement is correct. It is stated upon high authority in this body, as coming directly from Mr. Carlisle himself, that he derived his statement, as to the number of pounds of raw sugar it took to make a pound of refined sugar, from the sugar trust itself.

I do not desire to occupy the time of the Senate unduly in discussing this matter, but it occurs to me that it is a clear case where the interests of the whole United States, as well as the dignity and self-respect of this body, are concerned, not that any of us desire, so far as I know, to visit vengeance on this institution because of the manner in which it is said it has manipulated legislation thus far, but because in equity and in good conscience we ought not to give this overgrown corporation any further power to oppress the American people and to control the prices of this necessary article of food to the extent that it does.

The PRESIDING OFFICER (Mr. GALLINGER in the chair). The question is on the amendment proposed by the Senator from Kentucky [Mr. LINDSAY].

Mr. LINDSAY. I call for the yeas and nays on the amendment.

The yeas and nays were ordered.

Mr. COCKRELL. Let the amendment be stated.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. In paragraph 200, page 63, line 22, it is proposed to strike out "ninety-five one-hundredths" and to insert in lieu thereof "eight-tenths;" so as to read:

On all sugar which has gone through a process of refining, 1 cent and eight-tenths of 1 cent per pound.

The Secretary proceeded to call the roll.

Mr. GORMAN (when his name was called). I am paired with the Senator from Maine [Mr. FRYE].

Mr. HARRIS of Kansas (when his name was called). I am paired with the junior Senator from Wyoming [Mr. CLARK], and therefore withhold my vote.

Mr. JONES of Arkansas (when his name was called). I am paired with the Senator from Maine [Mr. HALE], but I transfer that pair to the Senator from Colorado [Mr. TELLER], and vote "yea."

Mr. TURNER (when his name was called). I am paired with the Senator from Wyoming [Mr. WARREN]. If he were present, I should vote "yea."

The roll call was concluded.

Mr. DANIEL. I am paired with the Senator from North Dakota [Mr. HANSBROUGH]. If he were here, I should vote "yea."

Mr. GEAR. I am paired with the Senator from New Jersey [Mr. SMITH], but I transfer that pair to the Senator from Massachusetts [Mr. LODGE], and vote "nay."

Mr. CANNON (after having voted in the affirmative). I am paired with the Senator from Rhode Island [Mr. ALDRICH], and therefore withdraw my vote. I voted inadvertently.

Mr. WHITE (after having voted in the affirmative). I arranged yesterday with the Senator from Nevada [Mr. JONES] to pair with him during his temporary absence from the Chamber. However, I will allow my vote to stand, as I am now informed that the Senator from Nevada has been otherwise cared for.

Mr. CLAY. I am paired with the junior Senator from Massachusetts [Mr. LODGE]. Under an arrangement with the Senator from Iowa [Mr. GEAR] the Senator from Massachusetts will stand paired with the Senator from New Jersey [Mr. SMITH], and I vote "yea."

The result was announced—yeas 32, nays 35; as follows:

YEAS—32.

Bacon,	Faulkner,	Mallory,	Pettus,
Bate,	Gray,	Mantle,	Rawlins,
Berry,	Harris, Tenn.	Martin,	Roach,
Butler,	Heitfeld,	Mills,	Tillman,
Caffery,	Jones, Ark.	Mitchell,	Turpie,
Chilton,	Kenney,	Morgan,	Vest,
Clay,	Lindsay,	Pasco,	Walthall,
Cockrell,	McLaurin,	Pettigrew,	White.

NAYS—35.

Allison,	Frye,	Mason,	Quay,
Burrows,	Gallinger,	Morrill,	Sewell,
Carter,	Gear,	Nelson,	Shoup,
Chandler,	Hanna,	Penrose,	Spooner,
Cullom,	Hawley,	Perkins,	Thurston,
Davis,	Hoar,	Platt, Conn.	Wellington,
Deboe,	McBride,	Platt, N. Y.	Wetmore,
Fairbanks,	McEnery,	Pritchard,	Wilson.
Foraker,	McMillan,	Proctor,	

NOT VOTING—22.

Aldrich,	Elkins,	Jones, Nev.	Teller,
Allen,	George,	Kyle,	Turner,
Baker,	Gorman,	Lodge,	Warren,
Cannon,	Hale,	Murphy,	Wolcott.
Clark,	Hansbrough,	Smith,	
Daniel,	Harris, Kans.	Stewart,	

So the amendment was rejected.

Mr. ALLISON. Is there any amendment pending, Mr. President?

The PRESIDING OFFICER. The Chair is informed that on page 64, from line 3 to line 12, the text was passed over. Does the Senator from Iowa desire that to be now considered? The language referred to begins after the word "test," in line 3, on page 64, and goes down to the word "produced," in line 12.

Mr. ALLISON. On yesterday it was stated that my recollection of the situation was not correct and that those lines had been stricken from the bill. If they have been passed over, that is in accordance with my understanding. The Senator from Arkansas [Mr. JONES] stated on yesterday that those lines had been stricken from the bill.

Mr. JONES of Arkansas. That is my understanding.

Mr. ALLISON. Is that the situation or have those lines been passed over?

The PRESIDING OFFICER. The Chair is informed that the RECORD shows that they were passed over.

Mr. ALLISON. I so understood it yesterday, and therefore I again correct myself, having been corrected on yesterday by the Senator from Arkansas.

Mr. JONES of Arkansas. I correct myself by saying that I understood the matter had been stricken out on motion of the Senator from Iowa. Then the motion to strike out is still pending, and when put will be unanimously agreed to.

Mr. CULLOM. Then let the motion be put, and get it out of the way.

Mr. ALLISON. Very well.

The PRESIDING OFFICER. Is the Chair to understand that the Senator from Iowa has made a motion to strike out those words?

Mr. ALLISON. I move to strike out those words, inasmuch as they are embraced in section 3 of the bill.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from Iowa, and the words proposed to be stricken out by him will be stated.

The SECRETARY. On page 64, line 3, after the word "test," it is proposed to strike out:

> Sugars, tank bottoms, sirups, cane juice or beet juice, melada, concentrated melada, and concrete and concentrated molasses, the product of any country which pays, directly or indirectly, a bounty on the export thereof, whether imported directly and in condition as exported therefrom, or otherwise, shall pay, in addition to the foregoing rates, a duty equal to such bounty, or so much thereof as may be in excess of any tax collected by such country upon such exported article, or upon the beet or cane from which it was produced.

Mr. VEST. Mr. President, I do not rise for the purpose of antagonizing this motion. I was under the impression, as was my colleague on the committee from Arkansas [Mr. JONES], that the motion to strike out had been adopted some days ago.

Mr. FRYE. Declare it agreed to, and that will be the end of it.

Mr. VEST. I was under the impression that those words had been stricken out of the bill; but upon one point we are all agreed, and that is that in section 3, on page 175, which is known as the retaliatory section, there is 38.3, or, to speak more accurately, 38.4, imposed as a tariff duty in this country substantially upon refined sugars, granulated sugars that come from Germany, Germany being the great competing country with the United States as to refined sugars.

Mr. President, I stated yesterday, and stated at the time this question first came before the Senate, that it was only fair and right and logical to assume that the prices given by the Senator from Rhode Island [Mr. ALDRICH] as the basis of discussion upon this measure were correct. The Senator from Iowa [Mr. ALLISON] now changes that calculation and increases the prices, and, as a matter of course, all calculations based upon the prices fixed by the Senator from Rhode Island, who then represented the majority of the Finance Committee, go for nothing, and we have a different calculation by reason of the change of price. We see in the newspapers every day, from experts, calculations entirely different in regard to the amount of protection that is given to the trust, and I have no question that in a large majority of cases they are from perfectly honest and disinterested experts; but the difference comes in the calculation and in the result from the estimate of the price. As you change the price upon the sugar that is brought into the country, both refined and raw, necessarily and mathematically you must change the calculation.

To show the vast difference in the calculation, I hold here in my hand, which I prepared last night, the estimates of price made by the Senator from Rhode Island, then the prices made by my friend from Iowa, and then the prices made by the committee of sugar men who visited the Ways and Means Committee of the House of Representatives in behalf of the importers and sellers of sugar, and who claim not to be connected with the trust at all. Take any of those polariscopic tests or grades; take, for instance, 96, which, I agree with the Senator from Iowa, is the principal grade of commerce. The Senator from Rhode Island estimated his prices and based his calculations at 2.6 cents and a fraction upon a pound upon the 96-test grade. My friend from Iowa, now in charge of the bill, puts the estimate at two cents and twelve one-hundredths and a fraction, and the sugar committee from New York put the price at two cents and a quarter a pound, or 2.25. Take either one of those prices and you change the entire calculation; and that is the secret of all these various estimates that we see so often and hear so often in the Senate.

But, Mr. President, there is another radical difference between the Senator from Iowa and ourselves. He leaves out entirely in his calculation the 38.4 export bounty of Germany, which is given, according to the official letter presented by the Senator from Louisiana from the Treasury Department, upon the refined sugars that come from Germany; and yesterday the Senator from Iowa taunted me—I will not use that word—he suggested to me that in all our calculations we had left out upon this side of the Chamber the 27-cent export bounty from Germany upon raw sugar, which, as a matter of course, should be credited to the price. If we charge to them the 38.3 export bounty upon the refined sugar of Germany when it reaches the ports of the United States, I submitted to the Senate—and I made the estimate honestly and fairly, without any disposition to prejudice anyone, in the early part of this discussion, in some remarks I made—what I believed to be the actual protection given to the trust upon the price as fixed by the Senator from Rhode Island. Since last night I have, as fairly and as honestly as I could, made an estimate of the protection given to the trust under the prices submitted by the Senator from Iowa. If they are not fair, it has been unintentional on my part.

I take the figures now of the Senator from Iowa himself. He made the astonishing statement that the protection to the trust under the Wilson law was greater than that under the pending caucus amendment. I think he makes it 85.12 under the Wilson law upon 96-degree polariscopic test. Now, we will take 96 as the test grade. The Senator from Iowa puts the value of the raw sugar at 2.12795. He assumes the refined sugar upon that grade to be 2.47 instead of 2.34, as made by the Senator from Rhode Island. The duty-paid value of the refined sugar, taking the estimate of the Senator from Iowa, is, under the Wilson law, 3.68; under the Dingley bill, 4.74; under the Aldrich bill, 4.87, and under the pending caucus amendment, 4.80. This is mathematical and unquestionable. That is the duty-paid value of refined sugar under these four bills.

The duty-paid value of raw sugar, taking the figures of the Senator from Iowa, is, under the Wilson law, 3.31; under the Dingley bill, 4.33; under the Aldrich bill, 4.45, and under the pending amendment, 4.33, giving as the net result, counting in the 27 cents upon raw sugar which comes from Germany—the omission of which is complained of by the Senator from Iowa—giving protection to the trust under the Wilson law of 37 cents on the hundred pounds, under the Dingley bill of 41 cents on the hundred pounds, under the Aldrich bill of 46 cents on the hundred pounds, and in the pending caucus amendment of 47 cents on the hundred pounds. This is based upon the prices submitted by the Senator from Iowa himself, showing an increase over the Wilson law, under the pending bill, of 10 cents on the hundred pounds, and of 1 cent over the

Aldrich amendment, as it is termed, in the caucus amendment. In all these calculations, I allow the 27 cents not upon the cane sugars, but I make this calculation upon sugars that come from Germany. I take the German bounty of 27 cents on the raw sugar and of 34.4 cents on the refined sugars.

My colleague on the committee suggests to me that a large amount of cane sugar was imported. We imported into the United States in 1896, by the official report, which I have before me, 2,752,012,512 pounds of cane sugar upon which there was no bounty at all. We imported in 1896 a little over 200,000,000 pounds of bounty-fed sugar, as it is termed, from Germany, upon which there was 34.4 cents bounty, while there was 27 cents on the raw sugar coming from Germany.

I repeat, that we imported in that year 2,752,012,512 pounds of cane sugar, upon which no bounty was paid at all. But I am, for the purposes of this argument, and to be entirely fair, taking the bounty-fed sugar from Germany, and I am taking the official bounty as reported from the Treasury Department on the refined and the raw, and I am taking the prices of the Senator from Iowa himself; and, instead of 85.12 protection under the Wilson law, the protection, as I have shown it here, is 37 cents on a hundred pounds; under the Dingley bill 41 cents; under the Aldrich bill 46 cents, and under the pending caucus amendment 47 cents.

Mr. President, I have made these statements, for I do not desire here in this debate to conceal anything, because if the Senator from Iowa had done me the honor to listen to the remarks I heretofore made, and which he will find in the RECORD in the early part of this debate, he would have found that on the duties as they then stood on the 35 per cent ad valorem in the bill I said this:

The tables are not made to show the millions the sugar trust will reap out of this schedule. They are made to show possible margins to the refiners under its duties; and it should be remembered that the calculations are based on a valuation of 2.3 cents per pound, which must be an undervaluation—

As I have always thought—

since the last crop in Germany realized an average price of 2.43 for the year, and no refined sugar of any great quantity has come in yet at that figure, though it may go below in time, for the survival of the cheapest is as inexorably a commercial tendency as that death follows birth. It must not be forgotten that this sharp decline in the price of sugar is in spite of the temporary cutting off of a part of the sugar supply of Cuba, though we received more Cuban sugar in March, 1897—73,029,000 pounds—than in the corresponding month of 1896—73,294,680 pounds.

The refined sugars which came in in 1896 were valued at 2.8 cents per pound; for the first nine months of the present fiscal year, the little refined sugar imported was valued at 2.55, and for the month of March last at 2.42. Any of these—

I am speaking now, of course, when we had the ad valorem of 35 per cent—

would give a somewhat higher margin to the trust than the 2.3 cents on which the tables were computed. If refined sugar was entered as for all of the year 1896 at 2.8 cents, then the margin would be 17.50 cents per 100 pounds higher; and if to this be added what is realized from the softer sugars and molasses, the by-product in refining, admitted in one case to be 26 cents per 100 pounds, then the margin would be 43.50 points higher than in the table.

The House committee assumed, as has long been admitted, that the average of raw sugars imported into the United States was of 92 degrees polariscopic test. This does not mean that any great proportion of the sugars below 16 Dutch standard was of that grade, but that Cuban centrifugals and continental beet sugars were about as great in volume as the lower grade cane sugars of the Southern republics, the islands, and the Indies.

The Senate committee at one fell swoop wiped out the cane sugars of the world. The two and three-fourth billion pounds of cane sugars which came in in 1896 disappeared. German refined could come in at 2.3 cents per pound, and if on this the retaliatory duty of 38.33 cents should be counted as part of the protection, then, too, the 27 cents bounty on the raw sugars of Germany must be counted as part of the duties against all raw sugars. No matter that the German raw sugars do not grade below 90 degrees, or at any rate carry no export bounty below that figure. No matter that our share of the cane sugar of the world, between two and three thousand million pounds, carry no such bounty. Germany is hereafter to furnish our sugar. She will wipe out our refiners as she has done those of England. Our cane fields of the South which the flood has spared shall be neglected; our beet farms in the West shall once more be waste places. But be it remembered when all this is done the Tropics will still raise some cane, and the trust will be found doing business at the old stand.

No account is to be taken of the fact that Europe produced 886,744,320 less pounds of raw beet sugar last year than the year before. No matter that Germany cultivated 60,051 less acres of beets in 1896 than in 1895, or that she produced 499,013,760 less pounds of beet sugar, or that she exported 239,920,400 pounds less. All these facts are ignored in the cry, "Beware the bogie man from Germany."

As has been said, the tables are not a measure of profit to the trust, but only intended to show the margin of duties which would result on the prices as quoted, for which no guaranty is given. If the margin of profit is to be calculated, a different method is necessary, for in that case it must be borne in mind that the refiner pays also for the extra pounds of sugar which he buys to make his hundred pounds of refined. As an instance, take the raw sugar of 92 degrees, the average point, worth, as Senator ALDRICH has said, 1.8272 cents. On this the specific rate is 0.89 cent, and the 35 per cent ad valorem is 0.63952, or, together, 1.52952 cents.

If the sugar cost 1.8272, and the duty is 1.52952, the duty-paid value of each pound of that grade of sugar would be 3.35645. To this add the 27 cents of the German bounty, and we have the total duty-paid cost of the sugar, 3.62645. Now, of this sugar of 92 degrees the Government allows a drawback on 114.94 pounds, estimating it takes that much of this grade to make 100 pounds of hard refined sugar. Multiplying the cost of 1 pound by this drawback allowance of 114.94, and we have for the actual duty-paid cost of enough raw sugar to make 1 pound of refined 4.1682 cents. Now, the price of the refined sugar is 2.3 cents, according to Mr. ALDRICH, and on this the duty is 2.3483, or together the duty-paid price of sugar is 4.6483 cents, and the margin of profit is therefore the difference between these two prices, or 0.4801, to which should be added 0.26 cent admitted in one case as realized out of the soft sugars which result in the process of refining, which together make 0.4701.

I am entirely willing to base this whole discussion upon that basis, but I deny absolutely the correctness of the figures of the Senator from Iowa when he says that under the Wilson Act we impose 85.12 cents upon a hundred pounds as protection, while under the present bill we impose only 46. I contend that under the Wilson Act the protection given is 37 cents on the hundred pounds; that it is 46 cents on the hundred pounds under the Aldrich amendment, and 47 cents a hundred pounds under the pending caucus amendment.

Mr. WHITE. Mr. President, the table presented by the Senator from Iowa can be found upon page 2049 of the RECORD. A competent party has shown me a brief analysis of the calculations thus submitted to the Senate. I will insert the table and read the criticism.

The table referred to is as follows:

Degrees.	Price.	Rate.			Differential.		
		Act of 1894.	House.	Proposed Senate.	1894.	House.	Proposed Senate.
	Cents.	*Per ct. Cts.*	*Cts. Per ct.*	*Cts. Per ct.*	*Cents.*	*Cents.*	*Cents.*
75	88.65	40 = 35.46	100 = 112.80	90 = 101.5	56.29	40.82	62.99
76	94.84	40 = 37.94	103 = 108.60	95 = 98	56.34	38.34	60.32
77	101.04	40 = 40.42	106 = 104.90	96 = 95	53.53	35.97	57.76

99	222.15	40 = 88.86	172 = 77.4	172 = 77.4	20.75	12.28	19.78
100	225.71	40 = 89.48	175 = 78.2	175 = 78.2	21.82	12.50	20.00
Refined	247.00	(*)	187.5 = 75.9	195 = 78.9	.....	.....	.....

* 40 per cent and $\frac{1}{9}$ = 111.30.

This table represents what purports to be the differential duties of the present law, the House bill, and the proposed Senate amendment. Without paying attention to any of the sugars testing less than 89, which are not used in the manufacture of granulated sugar, we find that the value given for an 89 test is 1.7534. This price for an 89-test sugar is absolutely incorrect. The present price, as indicated by the Sugar Journal on the 10th instant, is $2\frac{5}{8}$ cents per pound, cost and freight, but not duty, added. The dutiable value, allowing 20 cents for freight, would be $2 per 100 pounds. The price during the year, according to the Sugar Journal, has fluctuated between 2.09 and 2.20, the average price being about 2.15. Deducting therefrom 20 cents, would leave the price 1.95.

The local appraiser at New York, on the 8th instant, reported that at that date the value of 89 sugar from Jamaica, Barbados, and St. Kitts was 1.88 to 1.92 per 100 pounds, and that from the 1st of June of the present year up to the present time the prices had ranged between 1.81 and 1.97. The sugar importers, who are supposed to be in a position to be well informed touching the value of sugar, reported the value of an 89-degree sugar to be 1.96. Thus there is abundant evidence and proof of the incorrectness of the value given by the Senator from Iowa. The effect of this error will be plainly seen when we consider that the duty imposed by the House bill and the Senate bill will not vary with the increased or decreased value of the raw sugar, whereas under the ad valorem duty in the present law a fictitious low value will show a very large differential between the duty on the raw sugar and the refined.

Taking the value of 89-degree sugar, as established by the sugar dealers themselves, namely, 1.96 per 100 pounds, based upon the computation of the Senator from Iowa, the following result is shown:

Value of 120.54 pounds, necessary to make 100 pounds of granulated	2.3626
Duty under the present law (40 per cent ad valorem)	.9450

Value of 100 pounds of granulated sugar, as averaged by the Senator from Iowa	2.47
Duty on the same at 40 per cent ad valorem	.988
Add one-eighth additional duty	.125
Total duty	1.113
Deduct duty on raw	.945
Differential	.168

As against .2676 estimated in the table of the Senator from Iowa.

HOUSE BILL.

Value of 100 pounds of granulated sugar, as above	2.47
Duty	1.875
Duty on 120.54 pounds of 89-test sugar	.1711
Deducting .1711 from duty on granulated (.1875), leaves as differential	.164

SENATE BILL.

Duty on 100 pounds of granulated sugar	1.95
Deduct duty on 120.54 pounds of raw	1.711
Differential	.239

It will thus be shown that the table furnished by the Senator from Iowa is incorrect and that the difference under the present law, taking the value of granulated at 2.47, which is the average value given by him, is considerably less than under the Senate bill. The same difference exists as to 96 centrifugal and all other grades specified in the table furnished by the Senator from Iowa. This computation is made without regard to the three thousand eight hundred and thirty-three ten-thousandths differential which is imposed under the House and Senate bills as a countervailing duty for the German bounty.

Mr. President, whatever we may think of these figures, there is one fact which no one will deny, and that is to be discovered by inspecting the last column of the computation furnished by the Senator from Iowa. Take 95 and 96 sugars, which are admitted to be the grades of which there is the main importation. What is the status of the present amendment with reference to those grades, according to the tables furnished by the Senator from Iowa? In the case of 95 sugars it is stated that the Wilson Act differential is 20.69. In the present amendment it is given as 20.06; practically the same. On 96 sugars it is given under the Wilson Act at 19.82, and the Senate bill, 19.83.

Now, what is the Wilson Act which is thus being imitated and relied upon by the Senator from Iowa in justifying this measure? It seems that the argument in justification of this schedule, which is supposed to be absolutely conclusive, is that it is no higher than the Wilson Act.

Mr. ALLISON. Will the Senator from California allow me?

Mr. WHITE. Certainly.

Mr. ALLISON. My only endeavor was to answer the arguments made upon the other side that we have gone beyond the Wilson Act in our differential.

Mr. WHITE. I thoroughly understand that proposition, but we come right back to my point. The justification, if justification it can be called, suggested by the argument of the Senator from Iowa, and accepting (which we do not) his computation as correct, is that this bill is no worse than the Wilson Act.

What is the attitude of the other side of the Chamber when confronted by this argument? I quoted expressions from Senators made three years ago when I offered a few remarks two or three days past. I have several brochures of the same character upon my desk, and I will read very briefly from two or three of them, which indicate that while the Republican side of the Senate may now believe that the Wilson Act is the most perfect measure ever formulated as regards sugar, their sentiments were, in 1894, widely at variance with their professed faith now. The Senator from Maine [Mr. HALE] said:

Mr. President, there is one thing that is as certain as the coming of tides and sunrise, and that is that whatever happens to be put finally into the bill and is comprehended in its features when it passes, the American people will not go long without a return to the feature of free sugar for the breakfast tables of the people, thereby saving to those breakfast tables an annual tax of between $60,000,000 and $70,000,000.—*Congressional Record*, page 5764, volume 26, part 6, June 5, 1894.

Again, Mr. President, I must say my feelings are outraged. This breakfast table, around which our Republican brethren rallied in 1894, is turned over to its modern autocrat—the sugar trust.

The Senator from New Hampshire [Mr. CHANDLER], whom I am pleased to see in the Chamber, commented at the same time upon the bill as follows:

Mr. President, the sugar show is about to close—

We are now very near the end of this schedule, Mr. President, it will be observed—

The Populists have got free barbed wire and free lumber. The Democrats have got the Populists, and the sugar trust has got them all. The American people are to be taxed next year, and year by year, $60,000,000 annually upon a necessity of life solely in order that the shameless boast of the sugar trust in the Sugar Trade Journal, that the trust controls Congress, may be carried out. (Page 5774, volume 26, part 6, June 5, 1894.)

And yet we have a table presented by the Senator from Iowa, the result of weeks of skilled incubation, which discloses that upon these two most important items of 95 and 96 test the bill is defensible because it is practically like the Wilson Act.

Then the Senator from Rhode Island [Mr. ALDRICH], who is absent owing to sickness and who presented the opening argument for the Republican side, and upon which they rested, which they stood by and sanctioned by their silence, and from which no one dissented and against which no Republican computation was offered until yesterday, made the following comment:

Mr. President, it is evident that the die is cast—

Evident!—

The spectacle of a great party responsible for legislation, but hopelessly and helplessly under the control of influences outside of this Chamber, must be a humiliating one to the American people.

I confess to some diffidence in continuing this, but as a matter of duty I will proceed:

If the Senators upon the other side of this aisle should vote upon the propositions contained in this schedule according to their conscience and judgment, it would receive the almost universal condemnation of Democratic Senators.

A substitution should be made here.

Not over six Senators upon that side believe in the justice or equity of the propositions now to be approved in the Committee of the Whole. Certain persons not known to the Constitution or the laws, not recognized as any part of the National Government, have demanded that certain provisions shall be written in the statutes of the United States, and the members of a great party cravenly submit to these demands. (Page 5775, volume 26, part 6, June 5, 1894.)

And yet the same organization, the representatives of which stood by, and if they did not applaud the sentiments it was because the decorum of the body prevented it, is to-day not only sanctioning a bill containing larger differentials than the Wilson and House bills, but which likewise imposes a double tax upon the American people.

The same Senator, at page 5775 of the same volume, said:

And I say to you now that when this question is reached in the Senate, we shall try on this side of the Chamber to secure, if possible, a vote for free sugar.

Let me ask Republican Senators whether they are prepared to secure a vote for free sugar at this time?

This struggle will not end—

The Senator continues—

This struggle will not end to-day in the Senate; it certainly will be continued before the American people and their judgment taken. I tell you, Senators, that no act of yours, no provision in this bill, will be so certain to bring upon you and your party the condemnation of the American people as this one; and when I say "your party" I include also the representatives of the Third Party. Those gentlemen have always asserted that they were the friends of the people. They have signalized that friendship to-day by joining their Democratic allies in forcing upon the people of the United States this unjustifiable, indefensible, and infamous [sugar] tax. I said this tax [sugar] was infamous, and if I could employ any stronger word than that in characterizing it, I should be glad to do so.

Is it not sad to reflect, Mr. President, that a great party, within whose ranks these patriotic sentiments were born, should change its tactics and adopt the very policy which it then characterized as infamous?

Mr. TILLMAN. Will the Senator from California allow me for a minute?

Mr. WHITE. Certainly.

Mr. TILLMAN. Yesterday we had some other things characterized as infamous by a distinguished Senator on the Republican side, and later on I was chided indirectly by my good friend the Senator from Iowa [Mr. ALLISON] because I dealt in epithets. I used the words, "the villainy" which the colleagues on the Finance Committee of the present members of that committee had perpetrated upon the American people in 1894. The Senators on the Republican side claim that they were emulating and imitating their colleagues. The Senator from California has saved me the trouble of proving that what you then characterized as infamous you yourselves are to-day perpetrating.

Mr. WHITE. I have referred to the table furnished by the

Senator from Iowa for the purpose of illustration, not because I concede its correctness in any regard, but, assuming it to be correct, I am pointing out to the Senate that its defense depends upon an imitation of the legislation thus vigorously denounced. Now we are told that the sugar people are entitled to some protection. There seems to be a struggle to protect them in some way. Under the head of "Differential," in the table furnished by the Senator from Iowa, take the figures given in reference to the House bill. According to the table, the House on 95 sugars gave a differential of 12.56, and the Senator proposes that we shall now vote a differential of 20.06; and on 96 the House gave 12.33 and the Senate is now to give 19.83, a little more than the Wilson Act and largely more than the House. Hence the argument is that the protection afforded the trust by the House bill was insufficient. If that is not the argument, why this differential? This table demonstrates, as we have said right along, that, without considering the countervailing duty of thirty-eight one-hundredths at all, the Senate proposes to give to the trust as high duty upon the substantial grades as before conferred and largely in excess of the House schedule.

Now, I wish to know how Senators upon the other side will defend themselves against the charge that they are legislating in favor of this gigantic monster, as they were in the habit of terming it three years ago; how are they to defend themselves when it appears by demonstration from their own figures that they have raised the House differential and are giving to this institution much more than the House proposed. So far as I am concerned, I do not look with any aversion at all, I may say, to such advantage which an American industry may legitimately get because of the imposition of necessary revenue duty, but I do not believe that the trust people are in a position to deserve legislative favors. You have all heard much that was said before the Senate investigating committee. I will read briefly therefrom:

Senator ALLEN. Had you or the Sugar Refining Company contributed anything to the campaign fund in New York last year—the Democratic State campaign fund of last year?

Mr. HAVEMEYER. I will have to answer that in the affirmative.

Senator ALLEN. Did you also contribute something to the Republican campaign fund—that is, for the State campaign?

Mr. HAVEMEYER. We always do that. I have not the amount in my mind.

Senator ALLEN. In 1892 did you contribute to either party?

Mr. HAVEMEYER. The local parties?

Senator ALLEN. The national parties.

Mr. HAVEMEYER. No, sir; but always to the local parties. Let that be distinct.

This evidence was given before the last election—

Senator ALLEN. And you contribute to both parties with the expectation that, whichever party succeeds, your interests will be guarded?

Mr. HAVEMEYER. We have a good deal of protection for our contribution.

They evidently obtain large interest even here—

Senator ALLEN. Therefore you feel at liberty to contribute to both parties?

Mr. HAVEMEYER. It depends. In the State of New York, where the Democratic majority is between 40,000 and 50,000—

It used to be—

we throw it their way. In the State of Massachusetts, where the Republican majority is doubtful, they probably have the call.

Senator ALLEN. However, in the State of New York you contribute to the Democratic party, and in the Commonwealth of Massachusetts you contribute to the Republican party?

Mr. HAVEMEYER. It is my impression that wherever there is a dominant party, wherever the majority is very large, that is the party that gets the contribution, because it is the party that controls local matters.

Senator ALLEN. Then the sugar trust is a Democrat in a Democratic State and a Republican in a Republican State?

Mr. HAVEMEYER. As far as local matters are concerned, I think that is about it.

There was no concealed differential about that.

Senator ALLEN. In the State of Maine, you control the refineries at Portland, do you not?

Mr. HAVEMEYER. That is defunct. We would not give anything to the State of Maine.

Senator ALLEN. In the State of Pennsylvania, where do your contributions go?

Mr. HAVEMEYER. I will have to look that up.

Senator ALLEN. In the State of your nativity, or the nativity of your corporation, New Jersey, where do your contributions go?

Mr. HAVEMEYER. I will have to look that up.

Senator ALLEN. I understand that New Jersey is invariably a Democratic State. It would probably go to the Democratic party?

Mr. HAVEMEYER. Under the theory I have suggested, if they were there, it would naturally go to them.

* * * * * * *

Senator ALLEN. And this money that you contribute to these different parties for campaign purposes, local campaign purposes—that money comes out of the corporation of the sugar refining company?

Mr. HAVEMEYER. Yes, sir.

Senator ALLEN. And is a part of the expenses of that company?

Mr. HAVEMEYER. Yes, sir.

Senator ALLEN. Charged up on your books as expenses?

Mr. HAVEMEYER. Yes, sir.

Senator ALLEN. How would it show—as so much money?

Mr. HAVEMEYER. It would show that a payment was made, and that payment would have to be explained by the party who made it.

Senator ALLEN. The manner in which he did explain it actually would not appear upon your books?

Mr. HAVEMEYER. No, sir.

There are numerous comments made upon this matter in the document which I hold in my hand. I continue:

Mr. Havemeyer has lately explained that he, Mr. Searles, and other trustees of the American Sugar Refining Company are conscientiously working for the stockholders, whose interests they hold in sacred trust, and he modestly states:

"To-day over 7,000 persons are interested as stockholders of the company. The average holding of stock is about $10,000. It has cost its holders on the average par. With the exception of the limited amount which is used for speculative purposes, it is held for investment."

How disinterested are Mr. Havemeyer, Mr. Searles, and others can be inferred from this quotation:

Quoting from the Louisiana Planter and Sugar Manufacturer of April 14, 1894:

A Wall street paper claims to have inside information, and gives the following figures as being accurate. It says: "Mr. H. O. Havemeyer, as president of the company, receives $75,000 per annum. As a member of the board of trustees he receives an additional salary of $25,000, making his annual income from the American Sugar Refining Company $100,000. Mr. Theodore A. Havemeyer receives $75,000—$50,000 as vice-president and $25,000 as trustee.

"Mr. J. E. Searles enjoys the same substantial income, $50,000 as secretary and treasurer of the company, and $25,000 as a trustee. The other members of the board, Messrs. F. O. Matthiessen, William Dick, and Joseph B. Thomas, all receive $25,000 a year, making another annual expenditure of $75,000. There is a vacancy in the board of trustees, caused by the death of the late George Magoun, which necessitates another expense of $25,000 per annum. The American Sugar Refining Company therefore annually expends $350,000 in salaries for officers and trustees."

The average holding of stock may be about $10,000; but the following is the testimony under oath lately given in the New York supreme court as to where the majority of it was located, and recent evidence does not indicate that the control has changed hands.

Quoting from the New York World of April 10, 1894:

At Mr. Matthiessen's home, in Irvington, September 3, 4, and 5, 1889, Mr. Matthiessen described the sugar trust. Mr. Havemeyer and he worked together and controlled in equal shares $31,000,000 of the $50,000,000 of capital. (Testimony of Clarence E. Leonard.)

The richness of the statement that the stock had cost its holders on the average par may be appreciated when it is remembered that the controlling interests of Messrs. Havemeyer and Matthiessen were simply their share of $50,000,000 of stock representing property which, by the trust's own organ, in January, 1891, was estimated at $10,293,336.

Mr. President, can it be possible that it is necessary for us to spend our time here devising means to give this institution more protection? If the Senator from Iowa is correct with reference to the House bill, why is it that we are to devote ourselves to increasing trust protection and affording these people an opportunity further to pursue their monopoly? Every political organization has been in the habit of denouncing these trusts. There are many people, there are many able statesmen who believe that the coming question is as to the control of these enormous combines. We know that in all lines of business concentrated capital in the form of trusts is dominating business affairs, narrowing the avenues in which youth may hope to win success, thus making it harder for a man to be independent, self-reliant, and useful, and thus forcing more and more toward servility to centralized power all classes and conditions. The great question of the hour is how to legislate so that we may be able to master these enemies of enterprise and good government.

I confess that it is a tremendous task and one not easy to be solved. But when we find a proposition here designed to directly benefit a power against which we daily declaim, and which we declare should be subverted, it is our duty to hesitate before we vote affirmatively to increase the profits of the combination. We should, if we believe, as we profess, that trusts should be eradicated, oppose any increase of their gains. Otherwise our good faith will be seriously questioned. Fair legislation I favor. I do not believe this is fair legislation, and I do not think upon reflection, when Senators understand it and appreciate, it they will be willing to father it, as I know they can not defend it.

The PRESIDING OFFICER. The question is on agreeing to the motion submitted by the Senator from Iowa to strike out the words which have been read.

The amendment was agreed to.

Mr. ALLISON. I ask that the proviso, beginning with the word "*Provided*," in line 12, page 64, down to and including the word "same," in line 19, may be passed over.

Mr. WHITE. What is the request of the Senator from Iowa?

Mr. ALLISON. I ask that the proviso relating to the Hawaiian matter may be passed over.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Iowa? The Chair hears none, and it will be so ordered.

Mr. ALLISON. If there are no further amendments to this paragraph, I move to insert the amendment of which I gave notice the other day, to be known as paragraph 206½.

The PRESIDING OFFICER. The amendment proposed by the Senator from Iowa will be stated.

The SECRETARY. It is intended to insert as a new paragraph the following:

206½. That the duties on molasses, clayed, jaggery, and other sugars testing not above 87 degrees by the polariscope shall be one-tenth of 1 cent per

pound less than those imposed by the preceding paragraph on corresponding tests of sugar.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from Iowa.

Mr. ALLISON. I think it should be stated there, "on other sugars testing above 87 degrees by the polariscope."

Mr. JONES of Arkansas. What was the last statement of the Senator? I did not understand it. Does he propose to modify the amendment?

Mr. ALLISON. I propose to modify it by inserting instead of "corresponding tests of sugar" the words "on grades of sugar testing above 87 degrees of the polariscope." Let the Secretary read it as I have modified it. The language now is "on corresponding tests of sugar," that is, imposed by the preceding paragraph on sugars testing above 87 degrees of the polariscope.

Mr. JONES of Arkansas. Then, instead of being a reduction, the Senator proposes to increase the rate enormously on these low-grade sugars?

Mr. ALLISON. To increase them?

Mr. JONES of Arkansas. Yes, sir; that amendment will put the tariff on these low-grade sugars exactly the same as on sugars above 87. I take it the Senator will put no such tax as that on sugars.

Mr. ALLISON. Certainly I have no such purpose, I will say to the Senator. It is only a correction of phraseology to which my attention has been called.

Mr. JONES of Arkansas. As I understand the amendment as it stands at present, it is to reduce the——

Mr. ALLISON. I will state to the Senator from Arkansas the purpose of this amendment. I think it is well known that sugar of this character testing 87 degrees and below by the polariscope should pay one-tenth of a cent less than other sugars.

Mr. JONES of Arkansas. That is to say, it shall pay 1 cent for 75 and 2.01 cents for each degree above 75 until it reaches 87, instead of 3.

Mr. ALLISON. Yes; that is——

Mr. JONES of Arkansas. Does the language of the proposed amendment carry out the Senator's intention? It seems to me that the present language will leave the rate at 1 cent on 75, and three one-hundredths on each degree even after it passes 87. So it will be three one-hundredths on sugar between 75 and 87, as well as above that. But with the change the Senator just now intimated it would increase the rates on the low-grade sugar absolutely to the gross tariff on the amount above 87.

Mr. ALLISON. I withdraw my suggestion. Certainly I had no such purpose. What I fear is that the words "on corresponding tests of sugar" will relate to the same test of sugar embraced in the paragraph, and therefore will be meaningless; that is all. I assure the Senator, and of course Senators must understand it, that all I desire in this amendment is what we propose.

Mr. JONES of Arkansas. With the language of the amendment, "That the duties on molasses, clayed, jaggery," etc., I am inclined to think the words "and other sugars" ought to go out before the words "testing not above 87 degrees by the polariscope shall be one-tenth of 1 cent per pound less than those imposed by the preceding paragraph on corresponding tests of sugar;" that is to say, sugars testing below 87 degrees.

Mr. ALLISON. Very well. The amendment was suggested by an observation made at my side by the Senator from Connecticut, but I withdraw the suggestion.

Mr. JONES of Arkansas. I am very much inclined to believe that the words "and other sugars" ought to go out.

Mr. ALLISON. I think that is not the purpose. The purpose is to include all sugars testing below 87 degrees by the polariscope.

Mr. JONES of Arkansas. But is there any sugar excepting molasses and jaggery testing below 75?

Mr. ALLISON. I think there is.

Mr. JONES of Arkansas. There certainly can be no centrifugals.

Mr. ALLISON. None of them test below 89; few of them below 90. I will allow the amendment to stand.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from Iowa.

Mr. ALLISON. I withdraw my modification.

The PRESIDING OFFICER. The modification is withdrawn, and the amendment will stand as at first presented.

Mr. ALLISON. As printed.

The amendment was agreed to.

The next amendment of the Committee on Finance was, in paragraph 207, page 65, line 23, after the word "unmanufactured," to strike out "twenty" and insert "ten;" so as to make the paragraph read:

207. Maple sugar and maple sirup, 4 cents per pound; glucose or grape sugar, 1½ cents per pound; sugar cane in its natural state, or unmanufactured, 10 per cent ad valorem.

The amendment was agreed to.

The next amendment was, in paragraph 208, page 66, line 1, after the word "saccharine," to strike out "$2" and insert "$1;" and in line 2, after the word "and," to strike out "fifteen" and insert "ten;" so as to make the paragraph read:

208. Saccharine, $1 per pound and 10 per cent ad valorem.

The amendment was agreed to.

The next amendment was, on page 66, line 3, paragraph 209, after the word "confectionery," to strike out the comma and the words "and all other articles made wholly or in part of sugar;" in line 5, after the word "less," to strike out "and on sugars after being refined, when tinctured, colored, or in any way adulterated, eight" and insert the word "four;" in line 7, paragraph 209, before the words "per centum," to strike out "twenty" and insert "fifteen;" in line 8, after the word "pound," to strike out "and not more than 35 cents per pound, 12 cents per pound and 20 per cent ad valorem; valued at above 35 cents per pound;" in line 12, before the word "immediate," to strike out the words "of paper or other" and insert "of the;" and in the same line, after the word "immediate," to strike out "wrappers, tickets, labels, cans, cartons, boxes or;" so as to make the paragraph read:

209. Sugar candy and all confectionery valued at 15 cents per pound or less, 4 cents per pound and 15 per cent ad valorem; valued at more than 15 cents per pound, 50 per cent ad valorem. The weight of the immediate coverings, other than the outer packing case or other covering, shall be included in the dutiable weight of the merchandise.

The amendment was agreed to.

Mr. VEST. I should like to inquire of the Senator from Iowa what he estimates that increase of duty upon—candy valued at 15 cents a pound, 4 cents a pound and 15 per cent ad valorem? It is 35 per cent under existing law. I notice that we exported $515,263 worth in 1896, and we imported $22,000 worth.

Mr. ALLISON. As the Senator will see, we recommend a reduction largely from the House bill.

Mr. VEST. But my calculation is that you put it back to 50 per cent from 35. That is the reason why I asked the question.

Mr. ALLISON. Twelve cents per pound and 20 per cent ad valorem. Does the Senator conclude that that is less than 50 per cent? My understanding is that it is more.

Mr. VEST. I ask the Senator what is his estimate of the duty?

Mr. ALLISON. It was intended to place that at 50 per cent ad valorem. It is a less rate of duty than that proposed in the matter stricken out. If there are no further amendments to this schedule, Mr. President——

Mr. PETTIGREW. I offer an amendment to come in at the end of line 15, on page 66.

The PRESIDING OFFICER. The amendment submitted by the Senator from South Dakota will be read.

Mr. ALLISON. Is that the amendment proposing a new section respecting trusts, etc.?

Mr. PETTIGREW. Yes, sir; that is the amendment.

Mr. ALLISON. I hoped the Senator would be willing to allow that amendment to be passed over for the present, inasmuch as it is in the nature of legislation and should go in as a separate and distinct section, especially as it applies, I understand, to every one of the schedules of the bill. There are several legislative provisions, and if the Senator will allow it to be passed over until we reach those legislative provisions I think it would facilitate action on the bill and also place the amendment really in the place where it properly belongs. I of course——

Mr. PETTIGREW. The sugar paragraphs of the bill are intimately related to this amendment, and any discussion of the amendment necessarily involves the discussion of the sugar question. It seems to me if we want to facilitate the passage of the bill we had better dispose of the sugar question now and not bring it up again at the end of the paragraphs of the bill. I shall have no objection after it is disposed of, if it is adopted, to giving unanimous consent that it may be put in at any place in the bill in arranging the order of the sections afterwards, but it seems to me that we had better dispose of the question now. Therefore I desire that it shall be considered at this time. Of course we can not prevent a majority of the Senate, if they choose to do so, from delaying action upon it, but, as far as I am concerned, I prefer to dispose of it at this time.

The PRESIDING OFFICER. The amendment submitted by the Senator from South Dakota will be read.

Mr. VEST. Mr. President, I want to say a word about this matter without detaining the Senate unnecessarily. I never supposed until the present session of Congress that there was any difference between the two great parties of the country as to the propriety of this amendment. I remember very distinctly that in 1890 the leader of the Republican party, now the Secretary of State, Senator Sherman, of Ohio, declared in this Chamber that whenever he was satisfied that a trust existed as to any article protected by the tariff he would immediately favor removing the duty upon that article. That sentiment was repeated with great

approbation upon both sides of the Chamber and in the press of the country of all complexions and political opinion, and until now I did not suppose there was any difference of opinion.

But, Mr. President, I have one overwhelming reason for wanting to vote upon this proposition now, and I gave it or intimated it some days ago. I want to dispose of the sugar schedule. As I have had occasion to say more than once, it is a source of calumny, scandal, and irritation, and there is no peace, to speak properly, in the Senate or in Congress as long as the schedule is pending.

Now, suppose we put off this amendment until the close of the bill. Then when it comes up for discussion the whole sugar schedule will be up again, the whole question will be gone over, and there will be the same irritation and the same scandal. For one, I want to dispose of it and take my share of responsibility as to all parts of it. I shall insist upon a vote now. If our friends upon the other side are not willing to meet it, let them take the responsibility of putting it off.

It seems to me that this is the appropriate time. We have been talking here about trusts and combines for a week. The press of the country is full of all sorts of innuendoes and direct charges even as to the motives of Senators and the influences at work here. That great trust is like an octopus, as they say, and is controlling Congress. I want to see now whether we can not dispose of this matter, and dispose of all the phases of it and get rid of it. As the Senator from South Dakota has properly remarked, as to the place in the bill where this provision is to go, that is very easily adjusted. There can be no friction in regard to it.

It is reported—I do not know, for I am not in the confidence of our friends on the other side politically—that this matter has been the subject of caucus deliberation by the Republicans, and that it has been referred to the majority of the Judiciary Committee of the Senate, the Republican Senators on that committee. Now, we are just as competent to decide on this question as any committee. We understand the bearing of the whole question as much as we will know after a dozen reports from a dozen committees. I know of no legal question that is involved in it, and as to the details of the amendment we are entirely competent and ready, so far as I am concerned, to take it up and dispose of those details. Until we do get rid of it it will hang over the Senate and be the fruitful source of all sorts of irritation and scandal. For one I want to vote on it.

The PRESIDING OFFICER. The amendment submitted by the Senator from South Dakota will be read.

The SECRETARY. After line 15, page 66, it is proposed to insert:

That all articles on the dutiable list mentioned in this act shall be admitted free of duty if said articles or articles of a like character of domestic production are manufactured or their sale controlled or the price affected by a trust or combination to increase the cost of said articles to purchasers by preventing competition or otherwise. Every contract, combination in the form of a trust, or association or corporation whose effect is to restrict the quantity of production or increase the price of any article, or any conspiracy in restraint of trade, shall be deemed a trust within the provisions of this act.

Any citizen of the United States may file a petition, verified by oath or affirmation, in any district court of the United States where the defendant has an office or place of business or may reside, alleging the existence of a trust as herein defined, and that articles or products subject to duty under this act, or articles or products of like character of domestic production, are manufactured, or their sale controlled, or the price affected by said trust; whereupon a summons shall be immediately issued from said court directing the defendant to appear and answer said petition, the case to be governed as to time and manner of service, the pleadings, and all proceedings had therein, as is now provided by law in civil causes instituted in the district courts of the United States.

If any citizen of the United States shall file with any district attorney for said district the petition herein set forth, it shall be the duty of said attorney to institute proceedings forthwith in the district court for said district in the name of the United States for the purpose of determining the issues made by said petition, like proceedings to be had in such case as hereinbefore prescribed.

The summons to the defendant or defendants herein required shall be served upon the president or chief officer, if a corporation, or upon all the members, if an association or partnership, and the Secretary of the Treasury shall also be notified of the existence and nature of the suit.

All cases instituted as herein provided shall be advanced upon the docket of the court so as to have precedence of trial over all civil causes thereon, and an appeal may be taken from the decision of the district court to the circuit court of the United States for the district, under the same rules as are prescribed for like appeals in other civil cases, but the judgment of the circuit court shall be final.

If the decision of the court shall be that the allegations of the petitions are true, an order directing the customs officers of the United States to thereafter permit the importation of such article or articles free of duty shall at once issue: *Provided*, That where a duty is levied upon raw material or any article that is improved by any process after being imported, the duty on the raw material or unrefined or unimproved article shall be collected, and a like amount of duty upon the refined or improved article as provided by this act; but the differential or additional duty shall not be collected if the improved or refined product is found to be the subject of a trust, as hereinbefore set forth: *Provided*, That at any time after judgment the Secretary of the Treasury, upon written grounds, or any party to the proceedings upon petition, verified by oath or affirmation, may move the court to set aside or suspend the enforcement of such judgment. If upon hearing it shall be adjudged that the trust has ceased to exist, it shall be the duty of the Secretary of the Treasury to withdraw or cancel his orders to the customs officers, and such officers shall immediately resume the collection of the duties imposed by this act. The parties to the original proceeding who do not join in the motion shall have reasonable notice thereof, and the motion shall be advanced and have precedence of trial over all civil causes. Appeals may be taken as in the original proceeding to the circuit court, but the judgment of that court upon the motion shall be final.

Mr. PETTIGREW. Mr. President, up to the last national convention the amendment which I have offered was in strict accord with the platform, the principles, and the policies of the Republican party. But the last convention of the Republican party at St. Louis left that plank out of their platform. Previous to that time the Republican party had declared for bimetallism. Bimetallism is dangerous to trusts, because trusts do not thrive on rising prices, but flourish when prices decline. Therefore if the trusts were to be left out, and bimetallism left out, everything was in absolute harmony. The platform accorded apparently with the policies of the convention. If this was accidental, if this provision was left out of the platform by an oversight, if it was not left out because the trusts had gained possession of the convention and did not desire to abuse each other, then of course that will be illustrated by the vote to-day.

In the platform of 1888 the Republican party declared:

We declare our opposition to all combinations of capital, organized in trusts or otherwise, to control arbitrarily the condition of trade among our citizens; and we recommend to Congress and the State legislatures, in their respective jurisdictions, such legislation as will prevent the execution of all schemes to oppress the people by undue charges on their supplies, or by unjust rates for the transportation of their products to market. We approve the legislation by Congress to prevent alike unjust burdens and unfair discriminations between the States.

And that is good Republican doctrine. It was at that time. At the next convention, in 1892, the Republican party declared:

We reaffirm our opposition, declared in the Republican platform of 1888, to all combinations or capital organized in trusts or otherwise to control arbitrarily the condition of trade among our citizens. We heartily indorse the action already taken upon this subject and ask for such further legislation as may be required to remedy any defects in existing laws and to render their enforcement more complete and effective.

To-day we have a chance to carry out the plank in that platform and enact those necessary laws, to enact one of those protective provisions to carry out this platform by declaring that every article controlled by a trust or by a combination to limit production or increase the price shall be subject to the competition of the world, unless the trust will dissolve. The punishment is therefore automatic. The trust can decide whether it will go out of existence or contest the rich American market with the manufacturers of other countries. It is absolutely and strictly in accordance with the fundamental principles of protection as laid down by the Republican party since it came into existence, for the Republican doctrine was that by protection we reduce the price of the article to the consumer; that by protection we build up competition at home; that competition lowers the price and does justice to the consumer. But, Mr. President, when you allow the existence of a trust to control that price and then fix a tariff by which they can raise the price to the limit of the tariff, you have overturned every principle of protection. You can not justify this bill without the amendment.

Mr. HOAR. Mr. President, I do not wish to debate this question now. I expected when I came here and now expect to do, for one, all in my power to check and control the evil at which the amendment is aimed. I do not think it finds a proper place in a tariff bill. I think it belongs to the penal legislation of the country; that it should be considered by the Senators who are charged by the Senate with the consideration of that class of questions, and should be a bill by itself. It seems to me to have no place here. I trust that some additional legislation may be devised and will be devised that may be satisfactory to the country as far as such things can be controlled by legislation.

Further, I am opposed to the amendment for one special reason, besides many others. Its provisions are such that any two or three men (they may be foreigners, they may be exporters, they may do it for the express purposes of accomplishing that result), by making a combination for the purpose of increasing the cost of articles, can at once compel the article they make to be put on the free list, and doing the thing with that motive, however small or temporary or ineffective their purpose, will put the article affected on the free list. So if three wool importers in Boston do this thing, they can ruin every woolgrower in the West, whose prosperity depends on the existence of the tariff. If three men in Chicago make a combination to put up the price of the manufactures of wool, they can ruin 10,000 innocent, honest woolen manufacturers in New England. In other words, you put the great protective policies of this country at the mercy of two or three criminal persons.

Senators may talk about trusts and speculation. Was there ever a trust, was there ever a speculation possible under existing laws like what would be possible under a law which, like this amendment, provides that three men may have a tariff on an article for one six months and not for the next six months, and then renew it another six months, and so on?

So I propose to vote against the amendment.

Mr. FAULKNER. I ask the Senator whether he is correct in his view in reference to the effect of the amendment. When he

considers the amendment on page 3, from line 44 down to line 55, he will find that it very guardedly protects the very proposition that he thinks it opens to every party.

Mr. HOAR. No; I do not think it does at all, as you will see.

Mr. FAULKNER. The proviso beginning in line 47 reads:

Provided, That where a duty is levied upon raw material or any article that is improved by any process after being imported, the duty on the raw material or unrefined or unimproved article shall be collected, and a like amount of duty upon the refined or improved article as provided by this act; but the differential or additional duty shall not be collected if the improved or refined product is found to be the subject of a trust, as hereinbefore set forth.

For example, take the sugar trust. The Senator does not mean to maintain, if the courts held and adjudicated that that was a trust under the provisions of this amendment, that raw sugar would be exempt from duty, but simply the differential between the raw and the refined as given by the bill?

Mr. HOAR. Mr. President, let us see, if we can, what this amendment is. It says:

That all articles on the dutiable list mentioned in this act shall be admitted free of duty if said articles or articles of a like character of domestic production are manufactured—

That is one complete sentence—

or their sale controlled—

That is the second alternative—

or the price affected by a trust or combination to increase the cost of said articles.

That is the third alternative. That would cover every contract whose effect is to restrict the quantity of production or increase the price. A contract between two country firms, of the most insignificant character, diminishing the quantity of production or increasing the price of any article is a trust. The doing of any of the things I have read would make an article free. That ends that.

Mr. FAULKNER. No.

Mr. HOAR. Now comes your remedy:

Any citizen of the United States may file a petition, verified by oath or affirmation, in any district court of the United States where the defendant has an office or place of business or may reside, alleging the existence of a trust as herein defined.

That is, that John Brown and John Smith, of Huckleberry Center, Me., have contrived to raise the price of imported wool or of wheat in that town, or to restrict the product of grain, each of them having an acre of wheat, agreeing that they will not raise any more. That having been done, you file your petition and the summons issues. Then, when that is done, the parties being the petitioner on one side and these two people on the other, the case goes on. Then you have another provision that the district attorney also, for the Government, may file a like petition. When either of these cases, either this between John Brown and John Smith, of Huckleberry Center, or John Jones or the district attorney's petition has got to the court, the court finds, without any discretion, that the allegations of the petition are true.

Then, having found that, an order is issued directing the customs officers of the United States to thereafter permit the importation of wool throughout this country free, or the importation of wheat free, or of cotton, or of lumber free, as the case may be, that little, trivial, petty transaction having taken place; and thereupon there are these provisions about raw materials, etc., which it is not necessary to read.

I say again that there never was put into words like these a scheme suggested or proposed in the wildest imagination which would so encourage gambling, speculation, and trusts, the improper control of the business of many men by the few. It is folly and abomination through and through. Three knaves, Canadians, Englishmen, Germans, Scandinavians, Mesopotamians, Jews, bond or free, as St. Paul says, may come over here and do this thing for the very purpose of overthrowing our tariff laws, and the whole tariff system in this country is to be at their mercy, and the thousands and thousands of honest men doing a small business on the stream where you live, Mr. President [Mr. GALLINGER in the chair], or where I live, the farmers in the great wheat-growing regions of this country, the manufacturers of iron and steel, are to be put at the mercy of this combination by this proposition, which does not, even if that would help it much, give a drop of discretion to anybody to temper its exercise either by mercy or by reason. I tell the Senator from West Virginia I am right in what this thing means and as to what it says, and neither he nor anybody else can get away from it.

Mr. FAULKNER. Mr. President, I am not going into any denunciation of any interest, or use any strong language, such as the Senator from Massachusetts has done in discussing this question. I am looking at it simply from a legal standpoint. I am satisfied the Senator from Massachusetts is wrong. I am satisfied that the provision is clearly drawn to carry out the purpose and intention of its author, and that no order could be issued which could put raw material, such as wool, taking the illustration which the Senator gave, on the free list, although it might be found that the manufactured article, which is woolen cloths, was in a trust.

Mr. HOAR. I did not say that the manufactured article being in a trust would make wool free. I said a trust affecting wool would make wool free.

Mr. FAULKNER. It could not make wool free if it is raw material, nor could it make even the manufactured product free; but the ad valorem duty upon the article, which is the tariff duty upon wool, and not the compensatory duty by reason of raw wool, would also be collected under the provisions of this bill. The only penalty would be the penalty of the compensatory duty. That would be forfeited.

Mr. PLATT of Connecticut. Does not the Senator understand that, by the provisions of this proposed amendment, if there is a trust which in any way controls the raw material, that raw material is to be free also?

Mr. FAULKNER. No, I do not.

Mr. PLATT of Connecticut. I have not the amendment before me, but I wish the Senator would read that provision.

Mr. FAULKNER. The Senator from Massachusetts simply read the opening clause, which refers to the subjects that are intended to be embraced; and then he went on very carefully to describe the right of the citizen or the district attorney to file a petition to bring the subject-matter before the court for its adjudication; but when he came to the judgment of the court, the Senator from Massachusetts ceased to discuss the amendment. Why? Because the judgment of the court fixes exactly the question as to whether or not the transaction would deprive the parties or the Government of the right of taxation on either the raw material or the improved article, except so far as the differential was given in the interest of that particular trust, or of the compensatory duty given, as in the interest of wool.

Here is the provision as to the judgment of the court, and that is the only way by which any article can get upon the free list by virtue of this judgment, and that judgment is controlled by the express provision of the amendment itself:

If the decision of the court shall be that the allegations of the petitions are true, an order directing the customs officers of the United States to thereafter permit the importation of such article or articles free of duty shall at once issue.

If the provision stopped there, there is no question about what would be the effect of it. All articles as to which there was a trust would necessarily be placed upon the free list by virtue of the provisions of this amendment; but the limitation under the proviso is as follows:

Provided, That where a duty is levied upon raw material, or any article that is improved by any process after being imported, the duty on the raw material or unrefined or unimproved article shall be collected, and a like amount of duty upon the refined or improved article as provided by this act; but the differential or additional duty shall not be collected if the improved or refined product is found to be the subject of a trust, as hereinbefore set forth.

It is limited to the improved product.

Mr. HOAR. If the Senator will pardon me, all articles are to be admitted free of duty if such articles are controlled by a trust. That is the way the amendment begins, "All articles." Then it goes on to say:

That where a duty is levied upon raw material, or any article that is improved by any process after being imported, the duty on the raw material or unrefined or unimproved article shall be collected, and a like amount of duty upon the refined or improved article as provided by this act; but the differential or additional duty shall not be collected.

Very clearly to my apprehension that only applies to what the Senator has read; but where this trust affects, not the raw material, but the thing in its advanced stage, in which case the raw material being still dutiable, in spite of the provision that all matters affected by a trust are free, the advanced process is the subject of the trust. Then the provision goes on to say, that this duty being collected on the raw material, you are to collect on the advanced process of the product so much as is the duty on the raw material, but not the differential. That would be an injustice in this thing.

The Senator certainly does not mean to say that this provision was drawn with the view of protecting trusts on raw materials which the operators or the manufacturers in an advanced stage had nothing to do with. He does not mean to say that he proposes to support an amendment which permits trusts in wool, or permits trusts in wheat, or permits trusts in cotton, or anything of that kind, or to make them still lawful and protected, and that he is only aiming at trusts by manufacturers. It would be a monstrous proposition, which my honorable friend never would support. This is very clear in that particular to my apprehension. It says, first, that all articles that are the subject of this trust shall be admitted free of duty without an exception, but that when the raw material continues dutiable, that is not being the subject of a trust, but where there is a trust in the advanced stage you shall collect the duty on the raw material, and that from the men who

raise it, who are not guilty, you shall collect the duty on so much of the thing in its advanced stage as belongs to the raw material; otherwise you would be punishing them, and you shall not collect the differential, which is what this trust is dealing in. That is what the thing says.

Mr. FAULKNER. I see the Senator from Massachusetts, upon a reconsideration of the matter, recognizes the correctness of my position.

Mr. HOAR. The Senator will pardon me. If the Senator is right, then you have got a proposition here, as is suggested to me by the Senator from Connecticut [Mr. PLATT], by the confession of its friends, providing for an importers' trust and only protecting that. It is worse in the construction of my honorable friend the Senator from Connecticut than it is in mine.

Mr. FAULKNER. The honorable Senator is as much in error upon that as he was before; but inasmuch as he has confessed his first error——

Mr. HOAR. I have not confessed any error.

Mr. FAULKNER. The entire discussion of the question——

Mr. HOAR. Will the Senator pardon me?

Mr. FAULKNER. I thought I had the floor. The Senator has not addressed the Chair and he has not asked permission to interrupt me.

Mr. HOAR. Will the Senator from West Virginia yield to me?

Mr. FAULKNER. I will, with pleasure.

Mr. HOAR. I desire to say to my honorable friend that I am amazed at his statement. I have not suggested or thought or intimated that I had been mistaken in any respect. I affirm now, without qualification, that the proposition which I first laid down is true. What I said was that if in substance this amendment does in effect protect trusts by importers, it is worse even than I had thought it.

Mr. FAULKNER. That was in the latter part of the Senator's remarks, suggested to him by the distinguished Senator from Connecticut [Mr. PLATT]; but as I understand from his remarks—and I think he will find I am correct when he reads them in the RECORD—he said that he recognized the fact that it did not enable anyone to combine in reference to raw wool by making a trust and having it declared a trust, and then raw wool was to come in free. That was the argument of the Senator.

Mr. HOAR. I disclaim having said that before. I never said that.

Mr. FAULKNER. Then I did not understand the distinguished Senator.

Mr. HOAR. That is exactly right.

Mr. FAULKNER. Of course I attribute it entirely to my obtuseness and not to the Senator's want of facility in expression.

Mr. HOAR. Will the Senator from West Virginia yield to me further to say a word?

Mr. FAULKNER. With pleasure.

Mr. HOAR. I only wish to say that the Senator is a man of most remarkable intellectual acuteness, but that, in fact, he misunderstands me.

Mr. FAULKNER. I have no doubt, as the Senator so states, that I did misunderstand him; but I think the Senate understood the Senator as I did; at least, the Senators around me certainly did.

It will be found upon an examination of this amendment just as I stated. It puts a punishment upon all combinations or trusts in manufactured articles where there is a duty upon the raw material and where there is a duty also upon the manufactured product, which duty upon the manufactured product is increased by reason of the fact that a duty is put upon the raw material. It is simply provided that, in the judgment of the court, the differential or benefit given to them over and above the amount of the duty upon the raw material shall be taken from them by reason of the formation of the trust as a penalty for that offense. When that is done, the penalty of the law is fully exhausted, and any manufacturers who form a trust in raw material would not be benefited by having wool, as suggested by the Senator, put upon the free list; but all raw material, under all circumstances, under the provision of the amendment providing for the judgment of the court, must be put upon the dutiable list at the rates fixed in this bill.

Further than that, all partially manufactured articles must also be kept upon the dutiable list, as provided in this bill, notwithstanding this; but so far as the finished product is concerned, as to the differential given to it—as in the case of woolen goods, the compensatory duty, and, as I suppose would be the case as to the sugar trust, the difference between the raw and the refined sugar—the trust would have, of course, to surrender that benefit as a penalty under the provisions of the amendment.

Mr. HOAR. May I ask the honorable Senator before he sits down one practical question?

Mr. FAULKNER. Certainly.

Mr. HOAR. Suppose it be the case of Egyptian cotton, which, I suppose, is an article of "like character" with the sea-island cotton for the purposes of this bill; at any rate, we will assume that. What is to be done with that? The amendment says:

That all articles on the dutiable list mentioned in this act shall be admitted free of duty if said articles or articles of a like character of domestic production are manufactured—

Leave that out—

or their sale controlled or the price affected by a trust or combination.

So if the sale of sea-island cotton is controlled or its price is affected by a trust or combination to increase the cost of the article to the consumer, then it is to be admitted free of duty. That is the first proposition.

Mr. FAULKNER. That is according to the Senator's interpretation.

Mr. HOAR. That is my interpretation of the first clause. Then you go on and say that a duty shall be levied; then that the duty on the raw material shall be collected, and the differential duty shall not. It seems to me—and I ask the Senator if I am not right—that where the duty is not to be levied upon an article any longer because it is on the free list, the provision about the differential does not apply; in other words, is it not true that the purpose of the framer of this amendment was to strike at the trust, if the trust only affected the manufactured article, and then not to hurt the producer of the raw material? But if it affected the producer of the raw material, then to protect him. Is not that true, or is not the alternative proposition true, that this is provided to protect importers' trusts of raw material, and only to strike at manufacturers' trusts?

Mr. FAULKNER. I do not think it does apply. I do not think that is the correct view of the provision. I think it has no effect whatever in the cases suggested by the Senator; but really the penalty, which is the provision on the third page of the amendment, and the only penalty that can be imposed by the order of the court, is limited in such a way that it can only apply to the manufactured article. That is my opinion.

The amendment is carefully worded in reference to another question. In some instances in the tariff the manufactured article does not receive a compensatory or differential duty which is as large as the duty on the raw material. This amendment provides that, notwithstanding that provision, the manufactured product, although in the trust, being compelled to pay the full duty on the raw material, the same amount of duty shall be collected upon competing articles of that character, although they are in the trust.

Mr. FRYE. Will the Senator allow me to ask him a question?

Mr. FAULKNER. Certainly.

Mr. FRYE. The woolen manufacturers receive a compensatory duty for the duty on wool. Suppose the woolen manufacturers of Massachusetts should form a trust for the purpose of increasing the price of woolen goods, would not, then, the woolen manufacturers of the country, under this proposed amendment if it should become a part of the law, lose their compensatory duty?

Mr. FAULKNER. Partly so, but as the duty on the raw material is so large, they would get a larger duty by reason of the provision of this amendment than they would get as a duty upon the manufactured product.

Mr. FRYE. But they are still obliged to pay a duty on the wool.

Mr. FAULKNER. To that extent they would get the duty on the competing articles which were imported.

Mr. FRYE. As I understand it, if the woolen manufacturers of Massachusetts should form a combination in the shape of a trust, and the woolen manufacturers of Maine and Indiana should not, the woolen manufacturers of Maine and Indiana would pay the penalty for the wrong done by the woolen manufacturers of Massachusetts?

Mr. FAULKNER. To the extent that the article produced by the trust would be put upon the free list.

Mr. FRYE. If they were affected at all, would it not be in the way I have stated?

Mr. FAULKNER. I think it would be just, because it would return every cent that they had paid for the material that entered into this article which was the product of the trust. That is the provision of this amendment.

Mr. PLATT of Connecticut. I should like to ask the Senator from West Virginia what his construction of this amendment is? Is his construction such that if there be a combination to control the price of imported articles which are raw material and on the dutiable list, those articles will be admitted free of duty, or is it only in the case of manufactured products?

Mr. FAULKNER. In the case of manufactured products, I say, because there is no provision for the judgment of the court except as to manufactured products. That limits all the provisions of the amendment.

Mr. PLATT of Connecticut. Then it seems that the construction which I suggested to the Senator from Massachusetts [Mr. HOAR] is correct. Here is an amendment which proposes to put manufactured articles on the free list if anybody in any way is associated to raise the price of those manufactured articles, but

it does not put articles which are called raw materials on the free list, however many trusts there may be in them. If a trust be formed to control the importation of raw sugar, sugar is not to be put on the free list because of the trust; but it is only when some trust relates to the manufacture or improvement of what is called the raw material. So that the amendment provides for and encourages importers' trusts, and condemns trusts if they exist among our own people to improve upon imported articles.

[Mr. PETTUS addressed the Senate. See Appendix.]

Mr. NELSON. Mr. President, I do not intend at this time to enter upon a general discussion of the subject-matter of trusts, but I shall simply aim in a few brief words to point out what I conceive to be some of the radical defects of the amendment of the Senator from South Dakota. In the little I undertake to say on this occasion I will proceed on the theory that we are all of us actuated by an honest desire and an honest purpose to repress by suitable legislation all unlawful trusts and unlawful combinations, as far as it is possible, and that the real difference is in respect to the means that we severally invoke.

In the early part of this session, when the tariff bill first came into this body, I took the liberty of preparing and introducing an amendment on the subject of trusts. I studied over the question somewhat, and when I had prepared my brief amendment and introduced it I thought at the time that so far as it extended it was a perfect piece of legislation. I was further fortified in this view by the fact that a provision substantially similar appeared in the Canadian tariff bill. But I have now, after deliberating over the matter, come to the conclusion that the amendment which I offered, as I shall point out by and by, is not the proper thing, and would not in practical operation subserve the purpose intended, but would tend to greatly embarrass the Executive and would lead to no substantial advantage.

When I first read the amendment of the Senator from South Dakota, I thought it had undoubted merit. In the first place, as a lawyer, it appealed to my sense of justice from the fact that it proposed to submit the question of trust to the courts. But if we look at the ultimate object in view from a practical standpoint—and that is the test we must apply in all these cases when we come to legislate—we will see the defects of the measure.

The amendment of the Senator from South Dakota contains three controlling provisions. In the first paragraph it defines what constitutes a forbidden trust or combination in the following language:

> That all articles on the dutiable list mentioned in this act shall be admitted free of duty if said articles or articles of a like character of domestic production are manufactured or their sale controlled or the price affected by a trust or combination to increase the cost of said articles to purchasers by preventing competition or otherwise. Every contract, combination in the form of a trust, or association or corporation whose effect is to restrict the quantity of production or increase the price of any article, or any conspiracy in restraint of trade shall be deemed a trust within the provisions of this act.

This is the definition of a trust or unlawful combination. It lays down the fundamental principle or cause of action. The following paragraph prescribes the procedure to be resorted to in ascertaining the existence of the trust:

> Any citizen of the United States may file a petition, verified by oath or affirmation, in any district court of the United States where the defendant has an office or place of business or may reside, alleging the existence of a trust, as herein defined, and that articles or products subject to duty under this act, or articles or products of like character of domestic production, are manufactured, or their sale controlled, or the price affected by said trust; whereupon a summons shall be immediately issued from said court directing the defendant to appear and answer said petition, the case to be governed as to time and manner of service, the pleadings, and all proceedings had therein, as is now provided by law in civil causes instituted in the district courts of the United States.
>
> If any citizen of the United States shall file with any district attorney for said district the petition herein set forth, it shall be the duty of said attorney to institute proceedings forthwith in the district court for said district in the name of the United States for the purpose of determining the issues made by said petition, like proceedings to be had in such case as hereinbefore prescribed.

The issue thus presented is to be tried by the court, and if the court finally decides that a trust does exist, no matter how limited, no matter how few may be in the trust, no matter how limited may be the territorial area which it occupies, then it inevitably follows that the goods in respect to which the trust exists or those of a similar nature are to be put upon the free list, except in the case of raw material. This is the language of the amendment upon this point:

> If the decision of the court shall be that the allegations of the petitions are true, an order directing the customs officers of the United States to thereafter permit the importation of such article or articles free of duty shall at once issue.

What are the consequences of such a judgment? The consequences are that all the goods of the character and kind embraced in the trust found throughout the entire Union are put upon the free list, and, as a consequence, the Government is deprived of the revenue. But this loss of revenue is not all. If in any portion of this country, in any corner—and we have an immense domain, extending from ocean to ocean and from the Great Lakes to the Gulf—there is a trust of any kind or to any extent in the manufacture of, say, woolen goods, or in the manufacture of cotton goods, and any citizen chooses to make complaint that there is such a trust, and that issue is tried and found to be true, under this amendment it inevitably follows that not only is that part of the country in which the trust exists and which is directly affected by the trust placed under free trade, but the entire country, East as well as West, suffers the same penalty. The innocent manufacturer suffers in common with the guilty one.

Take the case of a great industry from which we derive a large amount of revenue. If in respect to that one industry a trust is found in any corner of this broad land, in any one of our forty-odd States, no matter how limited in area or numbers the trust may be, and the court decides there is such a trust, then under this rigid and arbitrary amendment it follows inevitably that all over this Union the product or output of that industry is put upon the free list. So you see that if a trust is found by the court in any corner of this land, two consequences follow, two punishments follow that may be far greater than the evil to be corrected. One is that all over the country parties who are innocent of the trust, parties who have not been in the combination, but who are unfortunate enough to be engaged in that particular industry, are punished and put under the penalties of free trade, and then, in addition, the Government is deprived of its revenue, a matter that may be of serious consequence where millions of revenue are involved.

We can not fool the American people by any such legislation as this. However anxious and desirous we may be to check and restrain trusts—and I believe I am as anxious as anybody—we can not afford to inject any such legislation into a tariff bill or put it on the statute books.

Mr. President, in this connection, I will candidly call attention to my amendment and what I now see are its defects, and will also call attention to a provision in the Canadian tariff bill on the same subject. First I will read the Canadian provision, so Senators can see the difference. The Canadian is as follows:

> That whenever it shall appear to the satisfaction of the governor in council that as respects any article of commerce there exists any trust, combination, association, or agreement of any kind among the manufacturers of such article, or the dealers therein, or any portion of them, to enhance the price of such article, or in any other way to unduly promote the advantage of such manufacturers or dealers at the expense of the consumers, and that such disadvantage to the consumers is facilitated by the customs duty imposed on a like article when imported, then the governor in council shall place such article on the free list, or so reduce the duty on it as to give to the public the benefit of reasonable competition in such article.

Now, this provision is subject to the same criticism, in my mind, but not to an equal extent, as is the amendment of the Senator from South Dakota. It is subject to the criticism that if the governor in council—that means the governor and his cabinet—finds that there is a trust, then it is mandatory on him to apply the law and to put the article on the free list or reduce the duty. It is in this respect as rigid as the amendment of the Senator from South Dakota.

My amendment differs in this respect, that it leaves the exercise of the power discretionary with the President. This is the amendment which I prepared, and which I thought at the time I introduced it was a good one:

> That whenever it shall appear to the satisfaction of the President of the United States, after due investigation, upon the complaint of any person, that a contract, understanding, combination, in the form of a trust or otherwise, or a conspiracy exists among the producers or manufacturers of any product or commodity to restrain, stifle, or monopolize the manufacture, production, or sale, or to enhance the price of such product or commodity, then he shall have the power, in his discretion, to suspend, by Executive order, the collection of all duties levied under this act upon any product or commodity imported which is substantially similar or like in material, quality, texture, or the use to which it may be applied, to the product or commodity in respect to which the contract, understanding, combination, or conspiracy aforesaid may exist, and during such suspension the products or commodities upon which the duties levied are suspended, as aforesaid, shall be admitted free of duty. Whenever the President becomes satisfied that the cause for which the suspension was ordered has ceased to exist, it shall be his duty to revoke the order of suspension, and thereupon duties shall thereafter be levied and collected as though said order had never been made.

Now, the criticism upon this trust amendment, and I think it is a fair and a just one, is of a twofold nature. The first is that it imposes an extraordinary and burdensome duty upon the Executive to investigate these trusts. That is a criticism of my own and of others. But that is not the worst feature of it. The executive department could refer the question of determining the existence of the trust to the Secretary of the Treasury or other subordinates.

But the worst feature, to my mind, and I ask every one of you to put yourselves in the President's place—you know I can not do it—is the onus of exercising the discretion cast upon him. However honest a President may be, however fearless and independent he may be, whatever course he might take would be subject to criticism. One side or the other might charge him with unfairness, and he would be kept under perpetual suspicion. One side or the other would suspect him of unfairness. It would never do

under our system of government to place our President under such stress or to subject him to any such embarrassment or humiliation. This feature of the amendment is, to my mind, a very serious objection; so serious that after considering it I have felt as though it would not be fair for me to press it any further.

But while these are my views about all these amendments, I still feel that we ought to insert in this bill some legislation to restrain and repress trusts. But let us do it, Mr. President, in a manly and straightforward manner. Let us remember that we can not fool the American people, however much we may fool ourselves, by putting in an amendment here that will be self-destructive and suicidal. The Canadian provision, as I have pointed out, is fatal, because it makes it obligatory, if a trust is found, upon the Governor-General and council to place the article on the free list and remit the duty in whole or in part. The amendment of the Senator from South Dakota is defective for at least two reasons. If a trust in any corner of our land, no matter how limited, is found to exist by the court, two fatal consequences will follow. One is a loss of revenue which may cripple the Government, and the other is to punish manufacturers, all over the land, who are as innocent of the trust as the babe on its mother's knee.

Senators, we can not afford to resort to any such legislation. We can not fool any of the American people by taking any such steps as these. I hope that in a manly way we will vote down all these amendments, and then get together and agree upon something that is within the range and scope of practical legislation. By and by, when this question comes up again, I shall take the liberty to ask a few moments time of the Senate to discuss the question in the light of the bounds of Federal and State legislation, so that we may ascertain just what is right and what is proper under State and Federal laws. Without understanding that question, and taking our bearings from those points of the compass, we can never legislate with safety and as becomes the Senate of the United States.

Mr. CAFFERY. It is possible, Mr. President, that there are some matters in this amendment that ought of themselves to be amended, but the general scope of the amendment meets my approbation entirely. Whatever is defective in the amendment can be easily remedied by proper amendment.

It has been the boast of the other side of this Chamber that protection carried to its legitimate consequences would result in home competition, and that home competition would result in lower prices to the consumer. They have always repudiated the statement or the charge that their tariff laws built up monopolies and trusts.

Here is an opportunity which, in my opinion, ought to be eagerly grasped, eagerly availed of, by the other side of the Chamber to remedy the irregular workings, it may be, of their theory of protection. Nobody can deny the fact that there are trusts in every important branch of industry in the United States. One of the largest manufacturing industries not only in the United States but in the world is now up for discussion, and that that industry is controlled by a trust nobody has the hardihood to deny.

The object of the amendment of the Senator from South Dakota is to take down the tariff walls as a punishment against the action of the very theory that the other side advocates with so much vehemence. It occurs to me that there ought to be no hesitancy on the other side by objections to considering the amendment at this moment or at any other moment. If the principle is adopted, if you sanction the idea embodied in the amendment, why not approve it? If there are any defects in the amendment, that might be a matter for amendment, but it is no matter for opposition. You are now opposing the consideration of this amendment, and there is but one point suggested, so far as I have heard, that merits any attention whatever.

The Senator from Massachusetts says that two or three individuals—Jones or Thompson or some others—can get together and form a sort of fictitious combination, and by reason of that combination all the innocent industries not involved in a trust will suffer and the product of their enterprise will be put upon the free list. Does anybody seriously think that any court in the United States would hold that a fictitious combination between two or three individuals would amount to a trust to control prices? It would be thrust out of the courts as if it did not exist.

Mr. HOAR. If the Senator will pardon me, the amendment says if the article or articles of a like character are manufactured.

Mr. CAFFERY. I think if the Senator from Massachusetts will read the whole of the first paragraph of the amendment it will be clear to him that it applies only to those combinations that are formed for the purpose of controlling trade and that do control trade, for it is expressly provided that the effect of the combination must be in restraint of trade or to affect prices. I can see no just criticism of the amendment so far as the case put by the Senator from Massachusetts goes. I can see some justice in the criticism of the Senator from Connecticut [Mr. PLATT], but the amendment of the Senator from South Dakota can be easily perfected in that regard. I refer to the proviso:

Provided, That where a duty is levied upon raw material or any article that is improved by any process after being imported, the duty on the raw material or unrefined or unimproved article shall be collected, and a like amount of duty upon the refined or improved article, as provided by this act; but the differential or additional duty shall not be collected if the improved or refined product is found to be the subject of a trust, as hereinbefore set forth.

Now, suppose a case where there is a trust in the raw material and no trust in the finished product. Under the operation of this amendment the duty upon the raw material that enters into the finished product would be abolished and the manufacturer would have a duty upon his manufactured product, which duty ought to fall in so far as it is a compensatory duty, that is, to compensate the manufacturer for the duty he has to pay upon the raw material. This amendment would leave him with raw material without duty and with a high duty upon the finished product to compensate for the raw material, for in looking down the schedules of the bill it is easy to see that wherever there is a duty upon the raw material the ingenuity of the protectionists has not suffered the manufacturer to languish for want of a duty; but they have compensated him, and are compensating him in all instances, for the amount of duty that he pays upon the raw material, besides giving him an independent duty outside of the compensatory duty. I believe that statement is absolutely true.

I submit to the Senator from South Dakota that the proviso ought to be continued with something to this effect:

Provided further, That wherever there is a trust in the raw material used by any manufacturer and there is a compensating duty on the finished product, the latter shall not be collected in case the trust on the raw material is established by decree of the court herein provided to try the issue of trust.

I think that will meet any possible defect that there can be in the amendment.

The Senator from Massachusetts has, in my opinion (and I am very deferential to his opinion, for he is a very great lawyer), criticised the amendment too much on the order of a verbal criticism. I do not think he has taken into consideration the whole purport of the first clause of the amendment. I will read it:

That all articles on the dutiable list mentioned in this act shall be admitted free of duty if said articles or articles of a like character of domestic production are manufactured or their sale controlled or the price affected by a trust or combination—

To do what?—

to increase the cost of said articles to purchasers by preventing competition, or otherwise.

Is it possible that two or three individuals can get together and control the price of leading articles of industry? Does not everybody know that these trusts embrace an enormous amount of capital, and that any combination to control prices is utterly futile unless the combination embraces within itself nearly all engaged in the manufacture of the particular article or particular product concerning which and about which the trust is formed? Is it contended that two or three men can get together and control the price of a leading article of industry? It can not be done. The language of the amendment will cover the practical case of trusts. The sugar trust, for instance, embraces 98 per cent of all the refiners; it is so stated; and those who are not in the trust are of the trust, under the wing of the trust, under the shelter of the trust, and derive all the advantages of the trust.

Mr. President, no combination can be formed of any character to control trade or affect prices unless it is a powerful combination. These weak combinations are futile; it is idle to consider them; and the objection of the Senator from Massachusetts, in my opinion, is purely verbal. It is a verbal criticism that does not affect the bearings of the amendment at all.

Here is an opportunity to test the workings of the protective theory. The protectionists indignantly deny the charge that under the shelter of these high tariffs monopolies and trusts are built up. They have lived under protection nearly ever since the war. We have trusts and combinations. They have been formed under the shadow and protecting wing of the tariff. The facts do not square with the theory.

If there is any philanthropic protection, here is the place to practically test it. I do not believe that Senators on the other side want trusts. I do not believe that they desire to see the land overshadowed with these powerful combinations, individual competition throttled, trade stagnated and paralyzed by the enormous power of these institutions. Here is a clear, straight, fair opportunity afforded to you to see whether you will in practice comply with your theory.

In my opinion, the junior Senator from Alabama [Mr. PETTUS] has created imaginary dangers to manufacturers. If trusts are formed with any degree of potency, they embrace all or nearly all the industries in the line in which the trusts are formed. If they do form a trust, if, notwithstanding the advantages they derive from the pending bill, they seek further to add to their gains by these unlawful combinations, I ask the Senator from Alabama if

he can support them in that work? That is precisely what will be effected, and what this amendment is designed to prevent.

Mr. LINDSAY. I will ask the Senator from Louisiana, with his permission, whether, if the amendment be adopted, the courts will not, in his opinion, be bound to find that the American sugar refiner comes within the description of trusts?

Mr. CAFFERY. There is no question of it.

Mr. LINDSAY. And to enter a judgment striking down the differential?

Mr. CAFFERY. Yes, sir.

Mr. LINDSAY. Now, how can we consistently adopt such an amendment when we have deliberately determined that this country can not get along, and that the sugar industry can not live, if we drive the sugar trust out of business?

Mr. CAFFERY. You are speaking for the other side.

Mr. LINDSAY. I want to be consistent.

Mr. CAFFERY. I hope the Senator from Kentucky is not leveling that very acute criticism against those of us on this side who do not want to level the walls all along the line. When, in the face of the admitted fact of the existence of a combination among the sugar refiners, the Republican majority who adopt the differential have voted against the amendment of the Senator from Kentucky to put them upon an equality, it is hardly with any consistency that they can support the amendment. But this comes in a broader form. This is a larger dose. Here is the whole matter condensed not only for the sugar trust, but to test your principle to its core.

That is all I want to accomplish. I want to test the correctness of the assertion that protection is inaugurated and carried into a system in order to bring about competition that you say is the be-all and the end-all. If that be your stand, you must assist to strike down that which stifles competition. You can not maintain trusts and maintain your theory. If there is anything objectionable in the amendment that would work badly or irregularly or inequitably, suggest your amendment; but in refusing to consider the amendment the American people will take it as a refusal to destroy trusts and combinations, because this is the golden opportunity, right in the midst of this discussion concerning the most gigantic trust in the United States. This is the opportunity to test the correctness of your assertions heretofore.

Mr. ALLISON. I asked the Senator from South Dakota, when he introduced the amendment, to allow it to be passed over, in order that it might come in at its proper place and be more maturely considered. I am strengthened in this view by the criticisms that have already been made upon the amendment. It deals with a very important subject and deals with it in a way that may be effective, or, instead of working justice, it may work injustice. It goes upon the assumption that the way to cure this evil is by punishing the people who are engaged in trusts by placing all the articles manufactured in the country of a like character upon the free list. It assumes also that the tariff itself is the author of the trust.

I remember very well, as a good many Senators on this floor remember, that we had a long debate on the question of dealing with trusts and the remedies some six or seven years ago. The venerable Senator from Ohio, now Secretary of State, introduced a bill upon that subject. It was referred, I think, to the Committee on Agriculture at first and reported from that committee. That may not have been the committee. My recollection is not very distinct upon that subject. It was reported back and debated here for a week or two. Then it was referred to the Judiciary Committee and was considered for some weeks by that committee, and then reported back here and debated, and finally passed.

I submit to the Senate that a matter which may do injustice, which may be an ineffectual remedy, which may only do partially what is sought to be done, should have more mature consideration than can be given to it in debate here from day to day upon the subject. So I appeal again to the Senator from South Dakota to allow the amendment to be passed over for the time being until we have finished these schedules, and then reintroduce it when Senators on both sides of the Chamber shall have an opportunity to present modifications or amendments to it. If the Senator will do that, I think it will facilitate our work on the tariff bill.

Mr. PETTIGREW. Has the Senator finished?

Mr. ALLISON. I have.

Mr. PETTIGREW. I wish to make my reply at some length.

Mr. President, I will say in answer to the question of the Senator from Iowa that I have no pride with regard to the form of this amendment. All I desire is to accomplish the purpose which is clearly indicated by the amendment. Neither have I any pride in its being my amendment. Let us discuss and point out what defects, if any, there are in the amendment. I think the subject is of sufficient importance for the Senate to consider it until we perfect the amendment. Where it is attacked in good faith, I believe the Senator attacking it should offer an amendment to the amendment which will cure the defect. Of course I understand that when a Senator wishes to find an excuse for going against the amendment he can find it, and he can find it in technical quibbles. Capable and able lawyers can readily raise plenty of those.

It seems to me the weakest objection that has been urged against the amendment came from the Senator from Massachusetts [Mr. HOAR]. That Senator says that men at Four Corners—I do not know where it was—at Buzzards Bay, or Hickory Point, or some place, could get together and organize a trust under this provision, and then the articles covered by the trust would come in free of duty. That is an argument which hardly seems to me worthy of an answer; and yet it was made with great emphasis.

This amendment provides that the courts shall decide whether a trust exists or not; but if three or four people have got together at some Four Corners somewhere in an obscure locality, the court will evidently observe the purpose for which they got together and declare their acts are not equivalent to a trust under the provisions of the amendment.

Further than that, the case goes into court; it is tried; an appeal is taken from the district to the circuit court, and during all this time this obscure combination of country grocers must have maintained a rise in the price of the article and continued a combination that affected production in order to be declared a trust by the court under the provisions of the amendment. Therefore, I say it is hardly worth while to answer such an objection.

The legal questions raised, perhaps, are entitled to more consideration. The purpose is to provide that the American consumer shall have a chance to purchase his article in a competitive market, and if he is deprived of that right by a combination of American producers, then the market shall be open to competition from all the world.

How can there be any objection to that? How can any protest be raised against a proposition of that sort? If that is not good Republican doctrine and in accordance with the principles of the tariff, I am certain I have failed all my life to understand the principles of a tariff. We have asserted in all our arguments to the American people that the tariff produces competition, and competition reduces prices. On every stump we have told the people how an imported article, fuller's earth, for instance, was worth from nineteen to thirty-two dollars a ton, but we discovered it in this country and began its production under a very small duty, when the price fell to $12 a ton in a year and a half. It was the same with nails. It seems to me that if we wish to perpetuate the principles of protection and defend this bill we must carry out that policy which we have so often advocated and give to the American consumer a competitive market. That is all I desire. Can not we perfect an amendment, then, that will accomplish that object?

But, Mr. President, I have my doubts about some Senators wanting to do this. I think it has been developed in this debate and in the votes that have been taken that some Senators do not want to do this. They do not want to give to the people of this country a competitive market.

Everybody knows there is a sugar trust. There is not a man within the sound of my voice who does not know it, and who is not thoroughly satisfied of it. Who, then, that votes for a differential duty for the special benefit of the sugar trust is going to vote for my amendment or any other amendment that would deprive the trust of that duty? I do not see how you can deceive anybody in this matter. Everybody knows this, and everybody knows it absolutely, and knows it unqualifiedly.

Mr. SEWELL. Will the Senator allow me to interrupt him?

Mr. PETTIGREW. Certainly.

Mr. SEWELL. How does the Senator know that there is a sugar trust? The American Sugar Refining Company is a corporation of my State, with a very large capital and doing a large business. It is not in a trust with anybody, as I understand it. They surrendered everything of that kind three or four years ago.

Mr. PETTIGREW. Mr. President, that is a strange question and a remarkable proposition. The American Sugar Refining Company was formerly a combination of twenty-one refineries. They closed the North River refinery. The courts of New York declared that combination to be a trust. Then these same people formed a corporation under the laws of New Jersey.

I notice that almost every rotten corporation in this country is organized under the laws of New Jersey. I do not know whether the laws need fixing or not; but something is the matter. At any rate, all such corporations go there whenever they want to get up a combination to get away with somebody and to be sure that they will not be troubled. They formed a combination there of all these refineries, and then they proceeded to close refineries, raised the price to the limit of the tariff, and took from the people of this country untold millions. Under this amendment any combination or corporation for this purpose, to control production and increase the price, is a trust, and therefore the American Sugar Refining Company is a trust, and the courts can so decide.

What is more, Mr. President, the president of the American Sugar Refining Company testified that they controlled the price

of sugar—I read his testimony yesterday—that they fixed the price for their customers, and that fixed it to everybody else. I also showed yesterday that the American Sugar Refining Company controlled every refinery in this country but four, and then I showed by the testimony of a St. Louis grocer that they controlled those four; for when this St. Louis grocer refused to sign a contract by which he was to bind himself to buy no other than sugar made by the trust at a price fixed by them—when he refused to sign that contract to take their refined sugar on commission—they refused to sell him any sugar at all; and when he applied to the four independent refineries, he could not buy a pound of sugar from them. So that, after all, the combination embraces not only all the refineries in the trust, but all the others.

After we passed the McKinley law, which was particularly favorable to the trust, Mr. Havemeyer was called before the Senatorial investigating committee, and he gave this testimony:

SUGAR TRUST WILL ROB US AS LONG AS THERE IS A DUTY.

Mr. HAVEMEYER. We undertake to control the price of refined sugar in the United States. That must be distinctly understood.

And yet Senators stand up here and want to know how I know there is a sugar trust!

Senator ALLEN. And the price of refined sugar in the United States is higher to the American people in consequence of the existence of the American Sugar Refining Company than it would be if the different companies in your organization were distinct and independent companies?

Mr. HAVEMEYER. For a short time it is.

Yet there is no sugar trust!

Senator ALLEN. And what difference does it make for the consumers in this country in a year in your judgment?

Mr. HAVEMEYER. It has been in three years past three-eighths of a cent more on every pound they ate, as against doing business at a loss.

In other words, the fact that they were in a trust and that they controlled the price, according to his own statement, added three-eighths of a cent to every pound of sugar consumed in this country.

Senator ALLEN. And that would be about how much in round numbers?

Mr. HAVEMEYER. It is a large sum in the aggregate.

Senator ALLEN. How many millions?

Mr. HAVEMEYER. I should say it was close to $25,000,000 in three years.

How do I know there is a trust in sugar? It has been told to everybody, until there is not a boy 6 years old who can read and write who does not know there is a sugar trust.

Senator ALLEN. And you intend to keep your hold upon the American people as long as you can?

Mr. HAVEMEYER. As long as the McKinley bill is there we will exact that profit.

"We will exact that profit." Is there competition? Is there any show for competition? They say they fix the price and that they are going to continue to do it so long as you keep the duty on; and yet the Senator wants to know how I know there is a sugar trust. It would be astonishing if I did not know it.

Now, let us see. There are some remarkable things in connection with this sugar business, and I am going to refer to them. When this bill was reported the Senator from Rhode Island [Mr. ALDRICH] made this statement:

This table shows that the differential between raw and refined sugars by the Senate proposition varies from 9.77 to 15.40 cents per 100 pounds, while the differential in the House bill varies from 12.30 to 17.35 cents per 100 pounds.

That is the difference between raw and refined sugars, and the protection to the trust, as the bill was brought in from the committee, was from 9.77 cents to 15.40 cents on every hundred pounds. Then he goes on to say that the differential in the House bill varies from 12.30 cents to 17.35 cents per hundred pounds; in other words, he presented to us a bill which he said reduced the duty in favor of the trust, and presented it as a sort of argument in favor of the Senate committee proposition.

What has happened? Why, Mr. President, a Republican caucus has been held, and they decided to increase the rate, according to their own admission, 7½ cents on a hundred pounds. Why did they do that? I should like to have somebody answer. If the duty as the bill came here from the committee was less in favor of the trust than the House bill, and that was presented to us by the manager of the bill as a reason why we should support it, how is it that the committee now come in and increase the rate 7½ cents a hundred pounds over the House bill? How do they account for it? Have the trust lost money in the meantime, and have they to be taken care of? Is that the purpose? Are we afraid that the trust will go to pieces, and therefore we must add to their profits?

I want to call attention to another fact. The moment this was done the price of sugar stock went up five points a share in New York.

Mr. GEAR. May I ask the Senator a question?

Mr. PETTIGREW. Yes; I shall be glad to yield to the Senator.

Mr. GEAR. Four years ago, when our Democratic friends were sitting behind closed doors and discussing the arrangement of the tariff, sugar stock went up a little; and if the Senator will refer to the quotations, he will find that it went up 66 points in thirty days as against from 6 to 8 points recently.

Mr. PETTIGREW. I do not remember the amount. I know it advanced.

Mr. GEAR. I can show the Senator the figures.

NEW POLITICAL PARTY REQUIRED.

Mr. PETTIGREW. It is a curious state of affairs; and I have come to the conclusion that the two debates on the tariff bill, the one of three years ago and the one on this bill, justify the existence of a new political party in this country. That is all I have to say to that proposition. It seems that the trust has to be taken care of; but was it necessary to add these 7½ cents on a hundred pounds?

TRUST PROFITS IN APRIL AND MAY $6,000,000.

Mr. President, the trust has been industrious. It imported in the month of April of last year 388,381,830 pounds of sugar, and in the month of April this year 773,527,477 pounds, this bill pending all that time, and the difference was 385,145,647 pounds between what they imported last year and what they imported this year. In the month of May of this year the trust imported 790,324,053 pounds, and in the month of May of last year 544,106,453 pounds. They have therefore imported in the two months that this bill has been pending 631,363,248 pounds more of sugar than they imported in the same two months of last year. Have we not every reason to believe that this importation was for the purpose of getting advantage of this advanced rate of duty? Have we not given them enough? Did not the House bill give them enough? Why should they have this 7½ cents added? Was it done so that the trust would not lose anything? I wonder how great their campaign contribution was last year.

Now, let us see. They imported 631,363,248 pounds more of sugar than they did for the same months last year, and the increased rate of duty in this bill, according to the statement of the Senator from Iowa, is 91 cents on the 100 pounds over the rate in the existing law. Therefore the duty on these six hundred and thirty-one million and odd pounds of sugar which have been imported during the last two months in excess of what was imported last year in similar months would amount to between five and six million dollars; and now, on top of that, it is proposed to add 7½ cents a hundred pounds more. It seems to me the contribution of last year can be doubled and trebled in the campaigns to come.

Mr. President, in regard to this amendment, I have this to say: I am perfectly willing it shall go over until to-morrow, so that we may discuss and perfect it. The American people are against the trust. They are not willing to allow any Senator in this body to vote against this amendment simply because its phraseology does not suit him. Neither are Senators going to crawl out by a quibble that the amendment will not accomplish the object it has in view. It is the duty of any Senator who objects to the amendment to offer an amendment to perfect my amendment, and I shall be glad to accept such an amendment.

I have a table here which shows the duty in favor of the trust under the pending provision, which runs from 20 cents up to 46.25 cents per 100 pounds of sugar. It costs 40 cents a hundred pounds to refine sugar. The duty, then, is under this, according to the degree of the sugar test, from 50 to 115 per cent. I ask to have this table printed in the RECORD as part of my remarks.

The VICE-PRESIDENT. If there be no objection, that will be the order.

The table referred to is as follows:

In the column showing rate on refined sugar the figures show the rate that would be paid on different amounts of such refined sugar from 75 to 100 pounds, as shown in second column, which figures also represent the percentage of sugar contained in different grades of raw sugar:

Rate on refined from 75 to 100 pounds.	Percentage of sugar.	Rate on raw per 100 pounds.	Differential.	Rate on refined from 75 to 100 pounds.	Percentage of sugar.	Rate on raw per 100 pounds.	Differential.
1.95	100	1.75	0.20	1.6985	87	1.36	0.3365
1.9305	99	1.72	.2105	1.6770	86	1.33	.3470
1.9110	98	1.69	.2210	1.6575	85	1.30	.3575
1.8915	97	1.66	.2315	1.6380	84	1.27	.3680
1.8720	96	1.63	.2420	1.6185	83	1.24	.3785
1.8525	95	1.60	.2525	1.5990	82	1.21	.3890
1.8330	94	1.57	.2630	1.5795	81	1.18	.3995
1.8135	93	1.54	.2735	1.5600	80	1.15	.4100
1.7940	92	1.51	.2840	1.5405	79	1.12	.4205
1.7745	91	1.48	.2945	1.5210	78	1.09	.4310
1.7550	90	1.45	.3050	1.5015	77	1.06	.4415
1.7355	89	1.42	.3155	1.4820	76	1.03	.4520
1.7160	88	1.39	.3260	1.4625	75	1.00	.4625

You import 100 pounds of raw sugar testing 75 degrees, and the duty is $1, and this material contains 75 pounds of sugar.

Now, you import 75 pounds of refined sugar, and the the rate of duty is 1.95 cents per pound, so the duty on the 75 pounds is 75×$0.0195=$1.4625, which makes the differential $0.4625.

The differential decreases in the ratio of $0.0105 per 100 pounds for each increased degree of saccharine strength.

Mr. MORGAN. Mr. President, before this matter goes over, I desire to submit some propositions to the Senate in connection with it, which may possibly facilitate a correct study and understanding of this subject. I observe by section 14 of this bill that

only two sections, if I am correct about it, of the act of 1894 are repealed out and out.

Mr. ALLISON. The first and second sections are the only two sections which are proposed to be repealed as the bill has been reported by the Committee on Finance.

Mr. MORGAN. The remainder are all preserved, and all the rights and liabilities which have accrued under the existing law are also preserved and maintained by this bill.

Mr. ALLISON. I want to say to the Senator from Alabama that if there is any possible question about the preservation of those sections, we intend to make it absolutely clear before we finish this bill. I think there is no possible question about that, however.

Mr. MORGAN. From my reading of it I do not think there is any doubt at all that all the law as it stands now on the statute books regulating revenue collections by the tariff of 1894 is retained except two sections of the act. That is an important statement, Mr. President, very important, and the Senate should look at that fact when they come to study this particular amendment, and all other amendments which relate to our efforts to repress or to take away from the sugar trust its peculiar advantages under legislation which has been enacted at this session—I mean that has been voted upon this bill.

I have an objection to the amendment of the Senator from South Dakota [Mr. PETTIGREW] which, though it was not elaborated, was stated very clearly by my colleague [Mr. PETTUS]. That objection relates to the want of power in Congress to act. Congress has but two powers in the control of commerce or in the control of contracts or conduct in connection with commerce. Those powers relate to foreign commerce and to interstate commerce. Congress can not enter the State of Alabama, and upon commerce or transaction of any kind, trusts or what not, that are purely local in their operation, pass any law to affect those matters.

Congress is just as powerless to pass laws in restraint of contract or in the regulation of local markets in the State of Alabama as it would be in Canada. It has no such power at all. The power that Congress can exercise in respect of this subject of repressing trusts must be powers which are connected with or relate to interstate or foreign commerce; and I understand that there is no departure in any of the decisions from this statement, and that that is the correct statement of the law as it is understood by the Supreme Court and by the great body of the jurists of the United States.

The amendment the Senator from South Dakota proposes is not restricted to interstate commerce, nor is it restricted to foreign commerce, but is purely local in its application; and that is the pith and merit of the objection made by the Senator from Massachusetts [Mr. HOAR], when he said that two persons might get together and, whether by combination or by actual guilt, undertake to create a local trust within the borders of a State, and the Congress of the United States could not predicate that a suspension of the revenues of the entire Government over the entire Union should be based upon that local question, which was resolvable and determinable alone by the local State tribunal.

Mr. CAFFERY. Will the Senator from Alabama allow me to ask him a question?

Mr. MORGAN. Yes, sir.

Mr. CAFFERY. If Congress has power to levy duties on imports, has not Congress the same power to remove them?

Mr. MORGAN. I do not think it would require a very old man to answer that.

Mr. CAFFERY. Would that be local? Would that be in the exercise of any local power?

Mr. MORGAN. No; because Congress in imposing the duties over the whole Union imposes them for all, and when it takes them off it is the same thing reversed. I do not think I am quite able to comprehend the merit of a question put at me in that way.

What I meant to state, and all I meant to state, was that Congres, in interfering in contracts or interfering in any way with the freedom of trade, must confine itself to those objects which are within its jurisdiction, to wit, interstate or foreign commerce. I will take the market here in the District of Columbia. Everybody knows—and I think that nobody objects to the fact—that a trust obtains here in this market in regard to almost everything which is sold every day in the form of provisions to the people of the city of Washington. I will suppose this market to be now in a State, because perhaps the District of Columbia might be a little different in regard to the powers of Congress to legislate for this District—but we will take such a market now as there is in Washington, where we understand perfectly well, where everybody understands, that there is an agreement between the holders of the stalls in that market that beef, and mutton, and pork, and chickens, and turkeys, and macaroni, and sugar, and everything else are to be sold not below a certain price. That may be an illegal agreement, and under the common law it is an illegal agreement. It is a monopoly or a forestalling or a regrading of the market. It is one of those offenses defined in the common law for the purpose of putting a moral restraint upon a universal right of free trade in respect to all manner of human transactions.

Free trade amongst men means unrestricted and unlimited trade, and is a common-law right. It is a right that belongs to a man because he belongs to a free country, such as Great Britain, or the United States, which has inherited this great body of common law from Great Britain. But there are qualifications in the common law that a man, though he may enjoy free trade, shall not combine with another man to deprive somebody else of his rights or put up the price of things in the market, or, on the contrary, make a conspiracy to break up somebody for reducing the price in the market. These qualifications belong naturally and as elementary principles to the right of trade between man and man.

Now, when the Congress of the United States, in the exercise of some of its constitutional powers, undertakes to put restraints upon the liberty of trade, the liberty of organization for the purposes of trade, you must find that power somewhere in the Constitution; otherwise Congress can not do it.

The restraints that Congress can put upon trade in this country, as I observed before, are confined to interstate and foreign commerce, because the power is given to Congress to regulate interstate and foreign commerce. That carries the power to restrain it, of course, within due bounds. That is the same sort of power that belongs to the principles of a national and high morality under the common law when it is administered in the old country and as administered in the common-law courts of this country.

Testing this proposed amendment, we find it would be perfectly easy here to prove that trusts exist in the city of Washington in regard to the everyday supplies of the 250,000 or 300,000 people here now. Suppose that was a combination in respect to imported hams or macaroni, or any other thing that comes from abroad—of which there are hundreds, if not thousands, of articles in our markets here—suppose a combination existed in regard to that, and you should carry a couple of these combiners upon a certain article, or more of them, before a court here, and you should say to them, "You have combined now to raise the price in the market of any given article, or of any given commodity, that you are selling at these stalls here to these people; we charge you with it, and we ask the court to say whether or not you entered into that combination."

The facts show, the evidence proves conclusively, that the combination has been made. Then comes the act of Congress. What is the effect of that? You certify the judgment of the court to the Secretary of the Treasury, and instantly he must suspend the duties upon the importation of this article around the whole of the customs-house borders of the Union. You take away the interest and the rights of the whole people of the United States and make them to depend upon the judgment of a local court upon a local interest, and one that Congress has no power to touch or to interfere with at all. That is a fatal infirmity of this amendment.

Mr. HOAR. The Senator from Alabama will pardon me for suggesting to him that it is even a little stronger than that. The provision is that the order shall at once issue, so that the question of duty or want of duty on everything that is on its way from all around the world will be affected at once, and the advantage will go to the importers upon this local judgment of a local court upon a purely local subject.

Mr. MORGAN. Very good. Upon this local judgment of a local court upon a purely local subject of interest to the people, where the combination has only a very limited circle of influence, all these great consequences are made to depend by this amendment. The Secretary of the Treasury receives the certificate and instantly he must take off the duty. It is intended to supply revenue or intended for protection—it makes no difference what—but in the competency of Congress it may mean either and be perfectly good.

But he must take off the duty on that article upon the predicate of the judgment of that one court, affecting, as I have stated, the whole of the United States, the Treasury, and the welfare and interest of the seventy-two or seventy-three million people. He must do that upon the judgment of a single court, and that a local court, in a matter between two or three persons.

Now, suppose that on the same day different suits of this kind are brought against different persons in various parts of the American Union, and here come down these orders showering upon the Secretary of the Treasury, and informing him that the judicial department of this Government has intervened in a political subject, the subject of taxation, and has ordered that it be suspended until the judgment is reversed, or until the evil is stamped out, exterminated. What is to be the situation of the Secretary of the Treasury under that case? Take one of these cases to a higher court and it is reversed, and you take it to another higher court in another State and it is affirmed. Where do you stand there? What is he going to do?

Mr. PETTIGREW. The amendment provides that cases shall be commenced before the United States district court, and appeals shall be taken to the United States circuit court. Those are not very obscure courts, nor are there very many of them. Every

court will know what the other is doing, and if a question is pending in one court it will hardly be taken to another until it is disposed of there. Is not that the practice?

Mr. MORGAN. I have seen it done many times. Judges are as apt to disagree as any other set of men I have ever met. The decision of one district court is not binding on another district court or on the circuit court. It is only the decision of the Supreme Court which is binding.

Suppose you have a half dozen cases, and no more, in different circuit or district courts of the United States. You have the right of appeal in each to the Supreme Court of the United States. A judgment is found. A certificate is issued. A writ of error suspending the operation of the judgment is issued and goes to the Supreme Court of the United States. What is the situation while the appeal is pending? Of course it is one of absolute confusion, inextricable difficulty, and the revenues of the United States would be suspended, upon a bond to take an appeal in the case, or else, contrary to law, the customs officers would go on and collect the duties because an appeal bond had been given and the judgment suspended.

Mr. HOAR. I think this amendment provides that in all cases the judgment of the circuit court shall be final.

Mr. MORGAN. Very good. If that is true, it is unconstitutional, because if it involves a question of constitutional power the judgment of the circuit court can not be final. That is all there is about that.

Mr. FAULKNER. I will ask the Senator from Alabama whether that is not subject to amendment? There are a number of defects in the amendment, I have not any doubt, but the question is whether we can not take up this amendment and consider it and perfect it?

Mr. MORGAN. Of course I am not discussing something that is to be or that is in the imagination of some Senator here. I am discussing what is before the Senate. I am taking the measure as it was proposed here to be voted upon. If there are amendments which can be put to it, I should like to see them. I should like to see some amendment offered to this measure which would confer the power upon Congress to determine a matter of trade, of traffic, and pronounce that it is a trust and liable to punishment, referring to something that occurred within the body of a State and had no relation at all to interstate or foreign commerce. I should like to see an amendment of that sort presented and see whether or not the Senate would approve it. It can not be done, and there is a fatal defect in the amendment. We are reaching for powers that we do not possess. It is a vain effort.

Now, we leave, as I said, and as the Senator admits, upon the statute book the Sherman Act, which relates to interstate commerce, and although that act, by the indulgence of a former Administration of this Government, has lain in desuetude and has not been at all acted upon except at a very late day, yet we find the Supreme Court of the United States has found great merit and constitutional power in it, and I do not know that I have ever been more comforted by anything at all than I have by the decision of the Supreme Court of the United States that Congress does still have power, in respect to matters that relate to interstate and foreign commerce, to punish trusts and combinations whenever they exist, whether amongst railroads or amongst merchants or any other class of people. Unquestionably the Sherman Act, if it is imperfect, and I do not say that it is, is capable of being enforced now, and it stands as a guard, a protector against trusts and combinations relating to interstate commerce.

Section 73 of the act of 1894 will remain upon the statute book if this bill passes in the form in which it is now presented here. I will read that and a few subsequent sections:

SEC. 73. That every combination, conspiracy, trust, agreement, or contract is hereby declared to be contrary to public policy, illegal, and void, when the same is made by or between two or more persons or corporations either of whom is engaged in importing any article from any foreign country into the United States, and when such combination, conspiracy, trust, agreement, or contract is intended to operate in restraint of lawful trade, or free competition in lawful trade or commerce, or to increase the market price in any part of the United States of any article or articles imported or intended to be imported into the United States, or of any manufacture into which such imported article enters or is intended to enter. Every person who is or shall hereafter be engaged in the importation of goods or any commodity from any foreign country in violation of this section of this act, or who shall combine or conspire with another to violate the same, is guilty of a misdemeanor, and, on conviction thereof in any court of the United States, such person shall be fined in a sum not less than $100 and not exceeding $5,000, and shall be further punished by imprisonment, in the discretion of the court, for a term not less than three months nor exceeding twelve months.

SEC. 74. That the several circuit courts of the United States are hereby invested with jurisdiction to prevent and restrain violations of section 73 of this act; and it shall be the duty of the several district attorneys of the United States, in their respective districts, under the direction of the Attorney-General, to institute proceedings in equity to prevent and restrain such violations. Such proceedings may be by way of petitions setting forth the case and praying that such violations shall be enjoined or otherwise prohibited. When the parties complained of shall have been duly notified of such petition, the court shall proceed, as soon as may be, to the hearing and determination of the case; and pending such petition, and before final decree, the court may at any time make such temporary restraining order or prohibition as shall be deemed just in the premises.

SEC. 75. That whenever it shall appear to the court before which any proceeding under the seventy-fourth section of this act may be pending that the ends of justice require that other parties should be brought before the court, the court may cause them to be summoned, whether they reside in the district in which the court is held or not; and subpœnas to that end may be served in any district by the marshal thereof.

SEC. 76. That any property owned under any contract or by any combination, or pursuant to any conspiracy (and being the subject thereof) mentioned in section 73 of this act, and being in the course of transportation from one State to another, or to or from a Territory, or the District of Columbia, shall be forfeited to the United States, and may be seized and condemned by like proceedings as those provided by law for the forfeiture, seizure, and condemnation of property imported into the United States contrary to law.

SEC. 77. That any person who shall be injured in his business or property by any other person or corporation by reason of anything forbidden or declared to be unlawful by this act may sue therefor in any circuit court of the United States in the district in which the defendant resides or is found, without respect to the amount in controversy, and shall recover threefold the damages by him sustained, and the costs of suit, including a reasonable attorney's fee.

Mr. CHANDLER. Will the Senator from Alabama allow me?

Mr. MORGAN. In a moment. I believe that if the honorable Judiciary Committee of this body—who are the equals, I suppose, of any like number of lawyers perhaps in the world—should take that section and undertake to mature and perfect it, they would perhaps find themselves scarcely able to add anything to it to make it efficacious. But take that statute, plain, significant, thorough, and complete as it is, and put it into the hands of an unwilling Executive and an unwilling Attorney-General, who will not execute it, and then of course it falls into innocuous desuetude; and there it has been these years upon the statute book, in the face of the admissions which have been so frequently made here, from the sworn testimony of one of the gentlemen engaged in the business, that the importations of sugar from abroad are under a trust and for the very purpose of capturing the markets, to extract from them all the money that he could get out of them.

Now, here we stand with an unexecuted law and without will—not the power, but without the will—of the Executive to do his duty. Of course in a case of that kind we are simply abandoned by the authorities of our own Government, and we can not make laws that such men ever will execute if they go against the grain. Now I will hear the Senator from New Hampshire.

Mr. CHANDLER. I remember very well when, in 1894, the Senator from Alabama, standing where he now does, moved these exceedingly well-drawn clauses of an antitrust statute. They apply to trusts in all imported merchandise, as the act of 1890 applies to all merchandise transported, in interstate commerce.

Mr. MORGAN. This act also applies to merchandise transported which has been imported.

Mr. CHANDLER. Which has been imported; that is to say, the two statutes——

Mr. MORGAN. Cover the whole ground.

Mr. CHANDLER. Cover the whole ground. What I wish to ask the Senator is, whether the constitutionality of this statute which he proposed, and which was unanimously adopted in 1894, has ever been denied by any legal authority of note?

Mr. MORGAN. Oh, no; there is no denial of it. I do not suppose anybody would venture to deny it.

Mr. CHANDLER. Then the Senator's argument is that so far as statute law is concerned making trusts penal, as to imported merchandise and merchandise transported in commerce within the United States, there is to-day ample statutory authority to punish such offenses.

Mr. MORGAN. That is my opinion, and particularly it is strengthened by the decision of the Supreme Court of the United States of recent date in the railroad cases. But I wish to say, in addition, that if the Congress of the United States desire to go still further and to take from any trust in this country the benefits of its advantages, its profits, etc., and to punish the individuals engaged in such a trust, it is easy enough to do it by denominating the particular trust or the particular article in respect to which the trust exists or is supposed to exist or will exist, and put the penalty right down on the shoulders of those men. There is room for legislation in that direction, but if we keep our statutes and do not repeal them, there is no room for legislation in any other direction that I can see.

Mr. CHANDLER. I will ask the Senator a question before he takes his seat. After these two statutes became a law, there was a question whether the statute of 1890 applied to railroads, and in the recent decision the Supreme Court, in the transmissouri case, held that the act of 1890 does apply to railroads.

Mr. MORGAN. Yes.

Mr. CHANDLER. Now, we have trusts in merchandise and trusts in transportation made high crimes under national law, do we not?

Mr. MORGAN. Yes. The Senator may remember that in the first year of Mr. Olney's occupation of the office of Attorney-General and in his first report he made criticisms upon what is called the Sherman law, and expressed the belief, I think very clearly (my attention was called to it at the time), that the law would not hold water, that it was an effort to do a vain thing, and that it was an unconstitutional attempt. The opinion of that

great lawyer rather brooded upon the legal profession in the United States, I suppose—it did upon my mind, at all events—and hence it was that I felt bound to-day to express my gratification that the Supreme Court had reversed it.

Mr. HOAR. I should like to ask the Senator from Alabama one question before he sits down. He has made a very luminous and powerful statement on this matter. This amendment to the law of 1894, in the seventy-seventh section, provides:

That any person who shall be injured in his business or property by any other person or corporation by reason of anything forbidden or declared to be unlawful by this act may sue therefor in any circuit court of the United States in the district in which the defendant resides or is found, without respect to the amount in controversy, and shall recover threefold the damages by him sustained, and the costs of suit, including a reasonable attorney's fee.

Was it not his purpose and intent in moving that amendment to put into the power of any private citizen whose business was crushed out or hampered by the performances of a trust, without waiting for the Attorney-General or the United States authorities to move, to have his own remedy? Therefore, if the purpose of the mover of this section be carried out, is it not lawful for any private refiner in this country, if what has been said on this floor about the sugar trust is true, to bring his private suit?

Mr. MORGAN. He can bring his private suit for damages to his business and recover threefold damages, and section 77 confers upon the United States court full jurisdiction to render judgment in the premises. Then, again, under section 79 and under section 75, he may bring his private injunction suit and have the party enjoined from proceeding with his trust arrangement; and furthermore, there is no sugar refiner in the United States, who chooses to do it, who can not take the facts as they have been stated in the Senate, admitting them all to be true, and recover against the gentlemen who have availed themselves of combinations and trusts and the like of that to run the business of their competitors out of the market. The field is open and full of opportunities.

Mr. ALLISON. I move to lay the amendment of the Senator from South Dakota on the table.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Iowa to lay on the table the amendment submitted by the Senator from South Dakota.

Mr. JONES of Arkansas. On that I ask for the yeas and nays.

Mr. CHILTON. Will the Senator from Iowa withdraw the motion for a moment?

Mr. ALLISON. I will, for a moment.

The PRESIDING OFFICER. The motion is temporarily withdrawn.

Mr. CHILTON. Mr. President, it seems to me there is some misapprehension in regard to the state of the law on the subject of trusts. The objection is made to the amendment of the Senator from South Dakota that it would seem possible for a simulated trust to be formed in a particular section by a few persons or a great number of individuals for the purpose of setting aside the duties collected at the custom-houses in this country. While the courts would probably not hold any such arrangement to be a trust within the contemplation of this amendment, it seems to me it might be well to guard that point, and so I have prepared an amendment to the amendment which I hope the Senator from South Dakota will accept. It is to amend by inserting, after the word "forth," in line 55, page 3, the following proviso:

Provided, That if upon the hearing it shall appear to the court that the trust complained of is an arrangement contrived to evade or prevent the collection of duties, then the petition herein referred to shall be dismissed.

Mr. HOAR. May I ask the Senator from Texas how the court is going to find that out, if the two parties, the plaintiff and the defendant, have an understanding with each other, in order to secure a judgment?

Mr. CHILTON. How would the court find out anything in any case? Parties who are interested can intervene in the suit.

Mr. HOAR. I do not think the Senator from Texas understands my proposition. Here is a suit brought, setting up the existence of a trust. When that is found in that suit, the court has no discretion whatever. It must absolutely issue its mandate to the Secretary of the Treasury, and he will stop collecting duties. How is the court to discover the fact of itself? The Senator says, "Do it in the way the court discovers anything." But the court discovers other things from the fact that there are parties antagonistic to each other, and the truth is brought out by one side or the other. But what protection is there for the revenue of the United States from duties, if that were all, against two men combining or conspiring to bring a friendly or fictitious suit, and so deceiving the court?

Mr. CHILTON. With all due respect to the distinguished Senator from Massachusetts, it seems to me his objection is purely imaginary.

Mr. PETTIGREW. Allow me to make a suggestion to the Senator from Texas.

Mr. CHILTON. Certainly.

The PRESIDING OFFICER. Does the Senator from Iowa yield?

Mr. ALLISON. I yield temporarily. I wish to test the sense of the Senate on this question.

Mr. PETTIGREW. In answer to the Senator from Massachusetts, I will say that the amendment provides that—

The summons to the defendant or defendants herein required shall be served upon the president or chief officer, if a corporation, or upon all the members, if an association or partnership, and the Secretary of the Treasury shall also be notified of the existence and nature of the suit.

Mr. CHILTON. I was about to call attention to that point. Further, it is just like any proceeding in court. When parties' rights are at stake, they have the right to intervene. An amicus curiæ could be heard by the court. The court itself has the right to look into the good faith of the litigation. The objection is fanciful, and it seems to me with an amendment such as this the customs law would be clearly guarded against any sort of overreaching.

Mr. ALLISON. Is the Senator from Texas through?

Mr. CHILTON. Not quite.

Mr. FAULKNER. I should like the Senator from Texas to yield to me for just a moment.

Mr. CHILTON. Certainly.

Mr. FAULKNER. It seems to me the motion to lay on the table means simply that the Senator in charge of the bill does not propose to allow the amendment to come before the Senate on its merits.

Mr. ALLISON. I do not yield to the Senator from West Virginia.

Mr. FAULKNER. Well, sir, I am not asking the Senator from Iowa to yield. I asked the Senator from Texas to yield——

Mr. ALLISON. The Senator from Texas has not the floor.

Mr. FAULKNER. He yielded to me, and I claim the floor from the Senator from Texas, and not from the Senator from Iowa.

Mr. ALLISON. I appeal to the Presiding Officer to know who has the floor.

The PRESIDING OFFICER. The Senator from Iowa moved to lay the amendment on the table, and temporarily withdrew it to enable the Senator from Texas to make a statement.

Mr. JONES of Arkansas. The Senator from Iowa withdrew the motion.

The PRESIDING OFFICER. Does the Senator from Iowa renew the motion?

Mr. CHILTON. I make the point of order that I am entitled to the floor.

Mr. ALLISON. The Senator from Texas asked the floor for only one moment. I yielded to him courteously, as I desired to do. I wish to say that if the Senator from West Virginia undertakes to impugn the motives which controlled me in making the motion, I shall yield to all of them and make my motion in my own time and in my own way.

Mr. FAULKNER. That is all right. The subject is before the Senate, and I think the Senate ought to perfect the amendment. If this is not the right amendment, let us have an amendment on this subject which we can perfect and vote upon.

Mr. PETTIGREW. I accept the amendment of the Senator from Texas.

Mr. CHILTON. The Senator from South Dakota having accepted the amendment, it will be unnecessary for me further to protract the discussion in regard to it. This protects the litigation which is to be instituted in the court from any sort of undue advantage by any of the parties. It protects the revenues of the Government from any sort of interference by collusive proceedings or by simulated trusts or combinations on the part of any of the people of the United States.

Mr. President, while I have the floor, I wish to state that the two trust laws which have been pointed to do not cover the case. They do not cover all the instances of trusts and combinations in this country. The sections of the Wilson Act which have been read by the Senator from Alabama apply only to the case of importers. They can not be held to apply to any other cases than those of importers. While the Sherman antitrust law, in its general language, includes all manufacturers in this country under trust or combination, the Supreme Court, in the case of Knight *vs.* The Sugar Refining Company of Philadelphia (156 United States Reports), decided that it is not within the competency of Congress to prohibit the manufacture of goods in a particular State by a trust or combination; and the proceedings which had been instituted in the city of Philadelphia against the trust in that city, which is a part of this same American Sugar Refining Company, fell to the ground.

I will tell you what we will have to do, and at the proper time I have an amendment which I shall submit. I do not think it would be fair, in view of the fact that the Senator from Iowa has yielded only for a discussion which is germane to this particular amendment, to go into that matter. At the proper time I shall submit an amendment designed to prohibit the transportation from one State or Territory to another State or Territory of articles which have been manufactured by a trust. Such a law would be

within the constitutional competency of Congress. Such a law, in my judgment, would be upheld by the Supreme Court of the United States, and such a measure, if it were passed, would within three months' time bring to an end all trusts and combinations in this country, because they would not be permitted to transport their goods from one State or Territory into another State or Territory. I have prepared such an amendment, but I will not offer it at this particular time.

Mr. ALLISON. I renew the motion to lay the amendment on the table.

Mr. PASCO. I ask the Senator from Iowa to yield until we can attempt to perfect the amendment.

Mr. ALLISON. I beg the Senator to excuse me. I insist upon my motion.

Mr. PASCO. I will state that that course will save no time, for I can renew the amendment in another form at any time.

Mr. COCKRELL. The Senator from Florida can offer them all. There is plenty of time.

The PRESIDING OFFICER. The motion is not debatable. The question is on agreeing to the motion of the Senator from Iowa to lay on the table the amendment of the Senator from South Dakota.

Mr. JONES of Arkansas and Mr. FAULKNER called for the yeas and nays, and they were ordered.

The Secretary proceeded to call the roll.

Mr. CLAY (when his name was called). I am paired with the junior Senator from Massachusetts [Mr. LODGE]. I transfer that pair to the Senator from New Jersey [Mr. SMITH], and vote "nay."

Mr. DANIEL (when his name was called). I am paired with the Senator from North Dakota [Mr. HANSBROUGH]. If he were present, I should vote "nay."

Mr. GEAR (when his name was called). I am paired with the Senator from New Jersey [Mr. SMITH]. I transfer my pair to the Senator from Massachusetts [Mr. LODGE], and vote "yea."

Mr. HARRIS of Kansas (when his name was called). I am paired with the junior Senator from Wyoming [Mr. CLARK]. If he were present, I should vote "nay."

Mr. JONES of Arkansas (when his name was called). I am paired with the Senator from Maine [Mr. HALE]. I understand from the Senator from South Dakota [Mr. PETTIGREW] that the Senator from Maine [Mr. HALE] is paired with some other Senator, I do not know whom. I vote "nay."

Mr. JONES of Arkansas (when Mr. MANTLE'S name was called). I transfer my pair with the Senator from Maine [Mr. HALE] to the Senator from Montana [Mr. MANTLE], and will let my vote stand. Otherwise I would withdraw my vote.

Mr. PETTIGREW. The Senator from Montana [Mr. MANTLE] has just informed me that if present he would vote "nay" on this question.

Mr. PETTUS (when his name was called). I am not in favor of this amendment as it stands, but I want to have it perfected. Therefore I vote "nay."

Mr. CHANDLER (when Mr. TELLER'S name was called). I am paired with the Senator from Colorado [Mr. TELLER], who, if present, would vote "nay." I should vote "yea."

The roll call was concluded.

Mr. GALLINGER (after having voted in the affirmative). I have a general pair with the senior Senator from Texas [Mr. MILLS]. He has not voted, and I therefore withdraw my vote.

Mr. HARRIS of Kansas. I desire to transfer my pair with the junior Senator from Wyoming [Mr. CLARK] to the Senator from Nebraska [Mr. ALLEN]. I vote "nay."

Mr. BATE. My colleague [Mr. HARRIS of Tennessee] is absent from his seat. He has been here all day, but left the Chamber a short time ago. He is paired with the Senator from Vermont [Mr. MORRILL].

Mr. PETTIGREW. The Senator from Utah [Mr. CANNON] is paired with the Senator from Rhode Island [Mr. ALDRICH]. If the Senator from Utah [Mr. CANNON] were present, he would vote "nay."

The result was announced—yeas 35, nays 32; as follows:

YEAS—35.

Allison,	Gear,	Morgan,	Sewell,
Burrows,	Hanna,	Nelson,	Shoup,
Cullom,	Hawley,	Penrose,	Spooner,
Davis,	Hoar,	Perkins,	Thurston,
Deboe,	Jones, Nev.	Platt, Conn.	Warren,
Elkins,	McBride,	Platt, N. Y.	Wellington,
Fairbanks,	McEnery,	Pritchard,	Wetmore,
Foraker,	McMillan,	Proctor,	Wilson.
Frye,	Mason,	Quay,	

NAYS—32.

Bacon,	Faulkner,	McLaurin,	Rawlins,
Bate,	Gray,	Mallory,	Roach,
Berry,	Harris, Kans.	Martin,	Tillman,
Butler,	Heitfeld,	Mitchell,	Turner,
Caffery,	Jones, Ark.	Murphy,	Turpie,
Chilton,	Kenney,	Pasco,	Vest,
Clay,	Kyle,	Pettigrew,	Walthall,
Cockrell,	Lindsay,	Pettus,	White.

NOT VOTING—22.

Aldrich,	Clark,	Hansbrough,	Smith,
Allen,	Daniel,	Harris, Tenn.	Stewart,
Baker,	Gallinger,	Lodge,	Teller,
Cannon,	George,	Mantle,	Wolcott.
Carter,	Gorman,	Mills,	
Chandler,	Hale,	Morrill,	

So Mr. PETTIGREW'S amendment was laid on the table.

Mr. PETTIGREW. I give notice that to-morrow I shall offer the following amendment:

Provided, That none of the increased rates of duty provided for in this act shall apply to any articles or commodities the sale or manufacture of which is controlled by trusts in this country.

Mr. BERRY and Mr. JONES of Arkansas. Offer it now.

Mr. PETTIGREW. I will offer it now.

Mr. PASCO. If there is another amendment pending, I will not offer now the amendment I rose to offer, but I will ask that it be printed and go over until in the morning. I have no desire to prolong the discussion upon this question, but Senators made objection to the amendment in the shape in which it was offered by the Senator from South Dakota, and I have attempted to avoid some of the objections which were urged against that amendment in the shape in which it was proposed. I ask that this amendment be printed and that it be printed in the RECORD and go over for consideration until to-morrow.

The VICE-PRESIDENT. Unless there is objection, that will be the order.

The amendment submitted by Mr. PASCO is as follows:

Every contract, combination in the form of a trust, or association or corporation whose effect is to restrict the quantity of production or increase the price of any article imported into the United States, or any improved or manufactured article into which such raw material enters, or any conspiracy in restraint of trade with reference to such articles, shall be deemed a trust within the provisions of this act.

Any citizen of the United States may file a petition, verified by oath or affirmation, in any district court of the United States where the defendant has an office or place of business or may reside, alleging the existence of a trust as herein defined, either with reference to the raw material or unimproved or unrefined article, or with reference to a manufactured or improved article into which such raw material or unimproved article enters after being imported, and that articles or products subject to duty under this act, or articles or products of like character of domestic production are manufactured, or their sale controlled, or the price affected by said trust: whereupon a summons shall be immediately issued from said court directing the defendant to appear and answer said petition, the case to be governed as to time and manner of service, the pleadings and all proceedings had therein, as is now provided by law in civil causes instituted in the district courts of the United States.

If any citizen of the United States shall file with any district attorney for said district the petition herein set forth, it shall be the duty of said attorney to institute proceedings forthwith in the district court for said district in the name of the United States for the purpose of determining the issues made by said petition, like proceedings to be had in such case as hereinbefore prescribed.

The summons to the defendant or defendants herein required shall be served upon the president or chief officer, if a corporation, or upon all the members, if an association or partnership, and the Secretary of the Treasury shall also be notified of the existence and nature of the suit.

All cases instituted as herein provided shall be advanced upon the docket of the court so as to have precedence of trial over all civil causes thereon, and an appeal may be taken from the decision of the district court to the circuit court of the United States for the district, under the same rules as are prescribed for like appeals in other civil cases, but the judgment of the circuit court shall be final.

The court shall determine, first, whether such trust exists; second, whether it affects the raw material or unimproved article, the improved or manufactured article into which such raw material or unimproved article enters, or both the raw material and improved article, and the judgment of the court shall be certified to the Secretary of the Treasury. If the court shall find that the trust affects both the raw material and the manufactured or improved article into which such raw material enters, then the Secretary of the Treasury shall make an order directing the customs officers of the United States to thereafter permit the importation of both such raw material and such manufactured article free of duty. If it is found by the court that the trust affects the raw material only, the Secretary shall direct the customs officers to thereafter permit the importation of such raw material free of duty and the manufactured or improved article at a rate of duty diminished at the rate or by the amount theretofore imposed upon the raw material or unimproved article. If the court shall find that the trust affects the manufactured or improved article only, then the order of the Secretary shall direct that the said customs officers thereafter permit the importation of such improved or manufactured article at the same rate of duty that is fixed by law upon the raw material which enters into such improved or manufactured article, and the rate upon the raw material or unimproved article shall continue unchanged: *Provided*, That at any time after judgment, the Secretary of the Treasury, upon written grounds, or any party to the proceedings upon petition, verified by oath or affirmation, may move the court to set aside or suspend the enforcement of such judgment. If, upon hearing, it shall be adjudged that the trust has ceased to exist, it shall be the duty of the Secretary of the Treasury to withdraw or cancel his orders to the customs officers, and such officers shall immediately resume the collection of the duties imposed by this act. The parties to the original proceeding who do not join in the motion shall have reasonable notice thereof, and the motion shall be advanced and have precedence of trial over all civil causes. Appeals may be taken as in the original proceeding to the circuit court, but the judgment of that court upon the motion shall be final.

The VICE-PRESIDENT. Does the Chair understand the Senator from South Dakota to offer his amendment now?

Mr. PETTIGREW. I will simply give notice of it now and offer it in the morning.

Mr. CHILTON. I have prepared an amendment which I desire to offer to come in at the end of this schedule as paragraph 209½. I desire to have it read and printed, and I shall offer it to-morrow.

The VICE-PRESIDENT. The amendment will be read.

The SECRETARY. It is proposed to amend the bill by inserting as a new paragraph at the end of line 15, page 66, the following:

209½. If any manufacturer, dealer, carrier, or other person, knowing that any article or articles of like character to those upon which duties are levied under this act are manufactured or their sale controlled or their price affected by a trust or combination, shall send, consign, or transmit, or cause to be sent, consigned, or transmitted, any such articles from a place in one State or Territory to a place in another State or Territory, such manufacturer, dealer, carrier, or other person shall, upon conviction before any circuit court of the United States, be punished by imprisonment not more than three years.

Mr. ALLISON. The tobacco schedule has been passed over for the present, and I ask that we may go on with the agricultural schedule at the bottom of page 70, line 23, "Dairy products."

Mr. JONES of Arkansas. Does the Senator from Iowa propose to go on further to-night?

Mr. ALLISON. Reasonably. I will not proceed long, but we can go on for a while. I think there will be no trouble in making some progress.

Mr. VEST. We had better adjourn.

Mr. CULLOM. Let the Secretary read a paragraph or two.

Mr. ALLISON. If we can make a little progress, I shall be ready to make a motion to adjourn in a few minutes.

Mr. CHANDLER. Regular order!

The SECRETARY. Page 70, line 23——

Mr. JONES of Arkansas. I hope the Secretary will wait until I can get my papers in shape. I supposed we were going to adjourn at the usual hour.

Mr. ALLISON. The usual hour has not yet arrived. If the Senator from Arkansas has any objection to a few of these paragraphs in the agricultural schedule being passed, of course I will accommodate him.

Mr. JONES of Arkansas. No; I have no objection.

The Secretary read as follows, beginning at line 23, page 70:

Dairy products:

234. Butter, and substitutes therefor, 6 cents per pound.

Mr. JONES of Arkansas. I hope the clerks will wait until we can get the place in the bill.

Mr. ALLISON. It is on page 70.

Mr. JONES of Arkansas. I move to strike out "six" before "cents" in paragraph 234 and insert "four," which is the rate under the present law, the Wilson Act.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. In line 24, page 70, strike out "six" and insert "four" before the word "cents;" so as to make the paragraph read:

234. Butter, and substitutes therefor, 4 cents per pound.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Arkansas.

Mr. VEST. I think the Senator from Iowa ought to lay before the Senate the official reports as to exports and imports. For instance, on oleomargarine, which is a substitute for butter, the exports were $587,369 in 1896 and there were no imports at all; on oleomargarine oil, $8,087,405, and no imports. Of butter we exported $2,937,203, and imported $8,248 worth; of cheese, $3,091,914, and we imported $1,494,601 worth of the foreign cheese which is not manufactured in this country. As to much the larger portion of the articles included in this paragraph we imported nothing. But I suppose we are putting on these duties for the purpose of protecting the American producers and of obtaining revenue. I call for the yeas and nays on agreeing to the amendment of the Senator from Arkansas.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. CLAY (when his name was called). I am paired with the junior Senator from Massachusetts [Mr. LODGE]. I transfer that pair to the Senator from New Jersey [Mr. SMITH], and vote "yea."

Mr. DANIEL (when his name was called). I am paired with the Senator from North Dakota [Mr. HANSBROUGH]. If he were present, I should vote "yea."

Mr. GALLINGER (when his name was called). I am paired with the senior Senator from Texas [Mr. MILLS]. If he were present, I should vote "nay."

Mr. GEAR (when his name was called). I am paired with the Senator from New Jersey [Mr. SMITH]. I transfer that pair to the Senator from Massachusetts [Mr. LODGE], and vote "yea."

Mr. HARRIS of Kansas (when his name was called). I transfer my pair with the Senator from Wyoming [Mr. CLARK] to the Senator from Nebraska [Mr. ALLEN], and vote "yea."

Mr. MCMILLAN (when his name was called). I am paired with the Senator from Kentucky [Mr. LINDSAY], and therefore withhold my vote.

The roll call was concluded.

Mr. THURSTON. Has the Senator from South Carolina [Mr. TILLMAN] voted?

The VICE-PRESIDENT. He has not.

Mr. THURSTON. I have a general pair with the Senator from South Carolina [Mr. TILLMAN]. If he were present, I should vote "nay."

The result was announced—yeas 29, nays 34; as follows:

YEAS—29.

Bacon,	Faulkner,	Martin,	Turner,
Bate,	Gray,	Mitchell,	Turpie,
Berry,	Harris, Kans.	Morgan,	Vest,
Butler,	Heitfeld,	Murphy,	Walthall,
Caffery,	Jones, Ark.	Pasco,	White.
Chilton,	Kenney,	Pettus,	
Clay,	McLaurin,	Rawlins,	
Cockrell,	Mallory,	Roach,	

NAYS—34.

Allison,	Frye,	Mason,	Sewell,
Burrows,	Gear,	Nelson,	Shoup,
Chandler,	Hanna,	Penrose,	Spooner,
Cullom,	Hawley,	Perkins,	Warren,
Davis,	Hoar,	Platt, Conn.	Wellington,
Deboe,	Jones, Nev.	Platt, N. Y.	Wetmore,
Elkins,	Kyle,	Pritchard,	Wilson.
Fairbanks,	McEnery,	Proctor,	
Foraker,	Mantle,	Quay,	

NOT VOTING—28.

Aldrich,	Gallinger,	Lodge,	Stewart,
Allen,	George,	McBride,	Teller,
Baker,	Gorman,	McMillan,	Thurston,
Cannon,	Hale,	Mills,	Tillman,
Carter,	Hansbrough,	Morrill,	Wolcott.
Clark,	Harris, Tenn.	Pettigrew,	
Daniel,	Lindsay.	Smith,	

So the amendment was rejected.

Mr. ALLISON. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened, and (at 5 o'clock and 5 minutes p. m.) the Senate adjourned until to-morrow, Wednesday, June 16, 1897, at 11 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate June 15, 1897.

GOVERNOR OF ALASKA.

John G. Brady, of Sitka, Alaska, to be governor of the District of Alaska, vice James Sheakley, resigned.

COMMISSIONERS FOR ALASKA.

Caldwell W. Tuttle, of Columbia City, Ind., to be a commissioner in and for the District of Alaska, to reside at Sitka, vice Robert C. Rogers, resigned.

John E. Crane, of Chicago, Ill., to be a commissioner in and for the District of Alaska, to fill one of the four additional commissionerships, at points to be designated by the President, created by the act approved June 4, 1897.

PROMOTION IN THE MARINE CORPS.

Second Lieut. George Richards, United States Marine Corps, to be a first lieutenant in said corps from the 2d day of February, 1897 (subject to the examinations required by law), vice Second Lieut. Elisha Theall, failed to qualify, and retired as first lieutenant.

CONFIRMATIONS.

Executive nominations confirmed by the Senate June 15, 1897.

ASSISTANT ATTORNEY-GENERAL.

Henry M. Hoyt, of Pennsylvania, to be Assistant Attorney-General.

PROMOTIONS IN THE ARMY.

Infantry arm.

Second Lieut. Vernon Avondale Caldwell, Twenty-fifth Infantry, to be first lieutenant.

Candidate Sergt. Thomas M. Anderson, jr., Troop G, Fourth Cavalry, to be second lieutenant.

Candidate Corpl. John E. Hunt, Troop H, Eighth Cavalry, to be second lieutenant.

MARSHALS.

William M. Griffith, of Arizona Territory, to be marshal of the United States for the Territory of Arizona.

John M. Barnes, of Georgia, to be marshal of the United States for the southern district of Georgia.

POSTMASTERS.

Percy R. Trubshaw, to be postmaster at Cooperstown, in the county of Griggs and State of North Dakota.

Samuel M. Griffin, to be postmaster at Quitman, in the county of Brooks and State of Georgia.

C. G. Brown, to be postmaster at Eastman, in the county of Dodge and State of Georgia.

Carl Kramer, to be postmaster at Columbus, in the county of Platte and State of Nebraska.

Elizabeth M. Broadwell, to be postmaster at La Cygne, in the county of Linn and State of Kansas.

Marshall Lambert, to be postmaster at Newkirk, in the county of Kay and Territory of Oklahoma.

SENATE.

WEDNESDAY, *June 16, 1897.*

The Senate met at 11 o'clock a. m.

Prayer by Rev. HUGH JOHNSTON, D. D., of the city of Washington.

The Journal of yesterday's proceedings was read and approved.

PETITIONS AND MEMORIALS.

The VICE-PRESIDENT presented a petition of the Woman's Health Protective Association, of Philadelphia, Pa., praying the President of the United States and the Senate to formulate such treaties as will effectually prevent the difficulties arising between the United States and other nations; which was referred to the Committee on Foreign Relations.

Mr. MITCHELL presented a petition of the Chamber of Commerce of Milwaukee, Wis., praying for the passage of the Torrey bankruptcy bill; which was ordered to lie on the table.

He also presented a memorial of the J. Miller Company, of Racine, Wis., remonstrating against the imposition of a duty on tanned skins for morocco or a duty on raw goatskins; which was ordered to lie on the table.

He also presented a memorial of A. D. Fleming & Co., flax spinners and bleachers, of Albany, Wis., remonstrating against the imposition of a duty on imported flax tow; which was ordered to lie on the table.

He also presented a memorial of the Menasha Wooden Ware Company, of Menasha, Wis., remonstrating against a change in the present law governing the use of wooden tobacco pails; which was ordered to lie on the table.

Mr. GALLINGER presented memorials of the Howard Furniture Company, of Nashua; of Foster & Pinkham, of Henniker; of Blake, Allen & Co., of Manchester, and of Crafts & Green, all in the State of New Hampshire, remonstrating against any increase in the present rate of duty on tanned skins for morocco or a duty on raw goatskins; which were ordered to lie on the table.

Mr. DEBOE presented sundry petitions of citizens of Carrollton and Catlettsburg, in the State of Kentucky, praying for the passage, at the earliest possible date, of such protective-tariff legislation as will adequately secure American industrial products against the competition of foreign labor; which were ordered to lie on the table.

He also presented the petition of Rev. F. T. Hefferman, superintendent of the Louisville (Ky.) Church Workers and sundry other citizens of Kentucky, praying for the repeal of the present civil-service law; which was referred to the Committee on Civil Service and Retrenchment.

Mr. PLATT of New York presented a petition of sundry citizens of New York City and a petition of sundry citizens of Sodus Point, N. Y., praying for the early enactment of a protective-tariff law; which were ordered to lie on the table.

He also presented a memorial of sundry citizens of New York City engaged in the lumber business, remonstrating against the proposed duty of $2 per thousand feet on lumber; which was ordered to lie on the table.

He also presented sundry memorials of citizens of New York City and sundry memorials of citizens of Norwich, Conn., remonstrating against the proposed increase of the tax on beer; which were ordered to lie on the table.

Mr. BATE. I present, by request, a petition of sundry citizens of Georgetown, Tenn., praying for the passage, at the earliest possible date, of such protective-tariff legislation as will adequately secure American industrial products against the competition of foreign labor. I move that the petition lie on the table.

The motion was agreed to.

Mr. BUTLER presented a memorial of members of the North Carolina Liquor Dealers, Distillers, and Grape Growers' Association, remonstrating against the proposed increase of the tax on beer; which was ordered to lie on the table.

Mr. PRITCHARD presented a memorial of the North Carolina Liquor Dealers, Distillers, and Grape Growers' Association, remonstrating against the proposed increase of the tax on beer; which was ordered to lie on the table.

He also presented a petition of sundry citizens of Concord, N. C., and a petition of sundry citizens of Greensboro, N. C., praying for the early passage of the pending tariff bill; which were ordered to lie on the table.

Mr. PENROSE presented a petition of the Grocers and Exporters' Exchange of Philadelphia, Pa., praying for the passage of the Torrey bankruptcy bill; which was ordered to lie on the table.

He also presented a petition of the Sixth Ward Republican Club, of Philadelphia, Pa., praying for the repeal of the present civil-service law; which was referred to the Committee on Civil Service and Retrenchment.

He also presented a memorial of sundry citizens of Lancaster, Pa., and a memorial of sundry brewers of Lancaster, Pa., remonstrating against the proposed increase of the tax on beer; which were ordered to lie on the table.

He also presented petitions of 17 citizens of Philadelphia, of 52 citizens of Philadelphia, of 37 citizens of Norristown, 46 citizens of McKean, 26 citizens of Allegheny County, 52 citizens of Pennsylvania, 100 citizens of Philadelphia, 77 citizens of Weissport, and of Steelton Circle, No. 26, of Steelton, all in the State of Pennsylvania, praying for the enactment of legislation restricting immigration; which were ordered to lie on the table.

He also presented petitions of 31 citizens of Minersville, of 47 citizens of Philadelphia, of 43 citizens of Philadelphia, 24 citizens of Steelton, 24 citizens of Wilkesbarre, 34 citizens of Reading, 30 citizens of Philadelphia, 13 citizens of Philadelphia, 36 citizens of Reading, 46 citizens of Philadelphia, of 9 citizens of Philadelphia, and of the select and common councils of Philadelphia, all in the State of Pennsylvania, praying for the early passage of the pending tariff bill; which were ordered to lie on the table.

He also presented a petition of the Merchant Tailors' Exchange of Allegheny, Pa., and a petition of Local Union No. 131, Journeymen Tailors' Union of America, of Pittsburg, Pa., praying for the adoption of clause 666 in the pending tariff bill, limiting the free importation of wearing apparel, etc.; which were ordered to lie on the table.

He also presented a petition of the general assembly of Pennsylvania, praying for the early passage of Senate bill No. 1747, reappointing and retiring Gen. David McMurtrie Gregg, late captain, Sixth United States Cavalry, and brevet major-general of United States Volunteers, with the rank and grade of captain; which was referred to the Committee on Military Affairs.

Mr. MILLS presented a memorial of Brewers' Union No. 112, of San Antonio, Tex., remonstrating against the proposed increase of the tax on beer; which was ordered to lie on the table.

Mr. PROCTOR presented a memorial of the C. A. Hibbard Boot and Shoe Company, remonstrating against any increase in the present rate of duty on tanned skins for morocco, or a duty on raw goatskins; which was ordered to lie on the table.

Mr. TURPIE presented a petition of Emil Wulschner & Son, of New York City, praying that the duty on musical instruments and parts for the same be provided for at the rate of 35 per cent ad valorem; which was ordered to lie on the table.

Mr. HANNA presented memorials of D. H. Gaumer and 19 other citizens, of E. W. Van Wagenen and 19 other citizens, of W. T. Cosgrove and 19 other citizens, of S. A. Weller and 51 other citizens, C. N. Ritter and 19 other citizens, S. McCarthy and 16 other citizens, Leo Guthman and 19 other citizens, Otto A. Bauer and 19 other citizens, William H. Smith and 19 other citizens, the Sexton Furniture Company and 14 citizens, I. W. Clark and 18 other citizens, A. Parsons and 45 other citizens, J. T. Crabbs and 52 other citizens, J. C. Fish and 51 other citizens, J. S. Marquis and 50 other citizens, W. J. Tappan and 51 other citizens, G. S. Brum and 52 other citizens, Allen Thompson and 49 other citizens, Dr. J. A. Francis, jr., and 18 other citizens, W. L. Rowland and 49 other citizens, J. C. Fish and 52 other citizens, Harry L. Peebles and 16 other citizens, A. S. Clark and 19 other citizens, and of J. A. Knapp and 27 other citizens, all in the State of Ohio, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

Mr. FORAKER presented memorials of the Bailey Drug Company and 18 citizens, the Collier-Budd Coal Company and 11 citizens, of James Shiny and 19 other citizens, J. B. Olivers and 49 other citizens, E. W. Hunting and 18 other citizens, Edward G. Howard and 52 other citizens, J. H. Wilson and 19 other citizens, Edward L. Meyers and 14 other citizens, and of William F. Gabell and 17 other citizens, all in the State of Ohio, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

Mr. BURROWS presented memorials of C. C. Snedeker and 52 other citizens, Wright, Kay & Co. and 39 other citizens, David Long and 49 other citizens, Charles A. Strelinger and 45 other citizens, H. C. Hubbin and 19 other citizens, and of Brown Bros. and 51 other citizens, all in the State of Michigan, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

Mr. MASON. Mr. President, I desire to present a large number of memorials which have been sent to me to be presented to the Senate, and I will ask the Secretary to note the name of the first memorialist on each paper and the number of signers. I should say that I have been informed, and from my examination believe it to be true, that these memorials are signed by some 15,000 memorialists. I am also informed that most of them are citizens of the State of Illinois. They protest against the passage of the anti-scalping bill. I should like to have the RECORD show the names, not of all the memorialists, but the first name on each memorial, and the number that follow.

The VICE-PRESIDENT. That order will be made, in the absence of objection.

The memorials are as follows:

Memorials of G. C. Burk and 49 other citizens, of Tower Dawson & Co. and 52 other citizens, of A. J. Shilling and 52 other citizens, of H. Lau and 51 other citizens, of E. D. Read and 50 other citizens, James D. Murphy and 50 other citizens, A. J. Reynolds and 40 other citizens, J. R. Black and 52 other citizens, A. R. Stanley and 52 other citizens, G. E. Ranaous and 19 other citizens, F. Wiehle and 26 other citizens, O. F. Bridges and 19 other citizens, J. F. Neunan and 52 other citizens, J. C. Hagenbuch and 17 other citizens, H. M. Shoub and 19 other citizens, J. H. Johnson and 18 other citizens, D. H. Clarke and 19 other citizens, D. Ogdine and 19 other citizens, H. Barkhausen and 19 other citizens, W. B. Senmark and 50 other citizens, H. Cooting and 52 other citizens, Robert Manning and 51 other citizens, Thomas Drury and 52 other citizens, L. C. Noble and 49 other citizens, M. L. Brown and 52 other citizens, S. Rice and 49 other citizens, J. Conarty and 52 other citizens, E. Wilken and 52 other citizens, D. P. Shaw and 50 other citizens, D. J. Riley and 52 other citizens, J. J. Conerty and 52 other citizens, Harry Filkins and 51 other citizens, J. J. Sullivan and 30 other citizens, H. Bottheim and 52 other citizens, Charles Nebel and 49 other citizens, A. R. Shroeder and 51 other citizens, C. J. Roe and 51 other citizens, T. McArdle and 52 other citizens, W. W. Taylor and 52 other citizens, P. H. Wilson and 52 other citizens, H. Y. Whiteman and 53 other citizens, W. G. Hargis and 52 other citizens, Charles Stornan and 51 other citizens, L. C. Noble and 48 other citizens, W. A. Sager and 41 other citizens, N. O'Brien and 43 other citizens, S. Wilson and 52 other citizens, J. P. Warner and 51 other citizens, F. J. Thompson and 19 other citizens, Filis Perl and 52 other citizens, Arnold Schiess and 52 other citizens, George W. Nye and 52 other citizens, F. J. Purdy and 52 other citizens, William McChesney and 49 other citizens, Th. Williams and 52 other citizens, E. J. McCarty and 52 other citizens, M. Plunkett and 52 other citizens, E. P. Adams and 50 other citizens, A. N. Swigert and 52 other citizens, J. A. Keley and 52 other citizens, F. E. Hatfield and 52 other citizens, B. C. Teal and 52 other citizens, M. Timmions and 20 other citizens, George D. Hall, M. D., and 51 other citizens, E. J. Highland and 49 other citizens, J. Hughes and 52 other citizens, W. O. Robertson and 52 other citizens, A. J. Wilson and 52 other citizens, E. Flin and 52 other citizens, R. Hand and 52 other citizens, J. T. Sullivan and 52 other citizens, C. A. Davies and 52 other citizens, J. G. Eager and 51 other citizens, H. Gundling and 52 other citizens, J. C. Duncan and 52 other citizens, L. B. Care and 52 other citizens, P. Lane and 52 other citizens, A. B. Horne and 51 other citizens, S. F. Erskine and 52 other citizens, T. T. Hughes and 52 other citizens, P. J. Holbrook and 52 other citizens, S. Lange and 52 other citizens, P. H. Wilson and 52 other citizens, J. N. Pincier and 51 other citizens, W. H. Bromiley and 52 other citizens, M. Ginby and 52 other citizens, S. Lee and 52 other citizens, W. J. Fagan and 52 other citizens, C. A. Vim Velzu and 52 other citizens, W. J. Tennison and 51 other citizens, J. C. Brooks and 53 other citizens, Charles Langguth and 51 other citizens, E. Klosterman and 49 other citizens, N. Parson and 51 other citizens, M. Schellender and 52 other citizens, H. Uebel and 48 other citizens, M. Adler and 52 other citizens, William McChesney and 48 other citizens, A. B. Rosenblum and 52 other citizens, William Force and 52 other citizens, J. Weil & Bros. and 51 other citizens, M. P. Hooker and 49 other citizens, W. J. Salmon and 52 other citizens, W. McDevitt and 53 other citizens, William Johnson and 14 other citizens, Henderson & Jampolis and 46 other citizens, Nelson Chesman and 52 other citizens, E. E. Kelly and 51 other citizens, W. W. David and 52 other citizens, George S. Lemon and 49 other citizens, M. Timmons and 19 other citizens, E. E. Duseman and 11 other citizens, E. R. Blake and 15 other citizens, The Fort Wayne Electric Corporation and 51 citizens, T. P. Blanchard and 52 other citizens, J. Chuseman and 51 other citizens, G. A. Washburn and 52 other citizens, W. H. Wright and 52 other citizens, C. A. Van Velger and 52 other citizens, J. A. Grant and 52 other citizens, E. Wertke and 52 other citizens, J. J. Jones and 50 other citizens, W. Mangler and 52 other citizens, F. L. Clark and 52 other citizens, S. Jones and 52 other citizens, H. C. Nau and 52 other citizens, H. A. Williamson and 51 other citizens, J. Schneider and 52 other citizens, Charles Deubler and 51 other citizens, E. Simon and 51 other citizens, M. Goldsmith and 51 other citizens, D. C. Clark and 52 other citizens, William G. Morrison and 52 other citizens, S. Singer and 57 other citizens, N. H. Daly and 52 other citizens, G. S. Glurehauf and 52 other citizens, J. Ascher and 52 other citizens, J. N. Mason and 50 other citizens, B. Amheim and 52 other citizens, L. Cohn and 17 other citizens, A. Arenson and 52 other citizens, D. Camp and 52 other citizens, A. R. Mitchell and 52 other citizens, E. V. Doran and 53 other citizens, C. Langguth and 52 other citizens, L. C. Marks & Co. and 52 other citizens, J. Valentine and 52 other citizens, P. J. Metty and 49 other citizens, W. Cronan and 52 other citizens, M. Connors and 52 other citizens, G. P. Burke and 49 other citizens, Grossman, Michelson & Co. and 52 other citizens, J. C. Wagner and 52 other citizens, E. Goldman & Co. and 51 other citizens, S. J. Hirsch and 52 other citizens, J. G. McGregor and 52 other citizens, P. P. Sly and 52 other citizens, E. Selmond and 52 other citizens, D. Heyman and 52 other citizens, Isaac F. Rubel and 52 other citizens, W. Hudson and 52 other citizens, J. Cheesman and 51 other citizens, A. Kennedy and 52 other citizens, Joe Hart and 50 other citizens, John F. Flynn and 29 other citizens, Frank Keene and 51 other citizens, B. J. Daniels and 52 other citizens, D. E. Morton and 52 other citizens, J. G. Jordan and 52 other citizens, George L. Russell and 50 other citizens, Edw. Cummings and 51 other citizens, W. J. Salmon and 52 other citizens, C. J. Leiber and 52 other citizens, the Munwegen & Weiss Manufacturing Company and 52 citizens, D. Kahn & Co. and 52 other citizens, Charles P. Root and 52 other citizens, Thomas B. O'Hara and 52 other citizens, J. Roberts and 52 other citizens, Adolph Moses and 11 other citizens, Henry Stern and 52 other citizens, H. G. Nye and 51 other citizens, Samuel Cains and 51 other citizens, Will. Miller and 52 other citizens, W. W. Wilder and 52 other citizens, J. A. Duggan and 52 other citizens, G. Mendrick and 52 other citizens, G. W. Hambaugh and 52 other citizens, H. S. Rice and 52 other citizens, G. Nuneneger and 49 other citizens, J. H. Brannan and 31 other citizens, F. A. Rogers and 52 other citizens, R. Nixon and 52 other citizens, Charles H. Ames and 22 other citizens, Pettibone, Mulliken & Co. and 49 other citizens, Emil K. Costerman and 49 other citizens, L. S. Kenlay and 52 other citizens, J. N. Mason and 51 other citizens, E. Baird and 52 other citizens, Carl Muller and 52 other citizens, F. M. Goodman and 52 other citizens, James O'Brien and 51 other citizens, Joseph Friedman and 19 other citizens, H. R. Platt and 52 other citizens, E. H. Brown and 52 other citizens, Capt. Jack Cranford and 52 other citizens, S. Adams and 51 other citizens, M. S. Hartman and 50 other citizens, E. J. Hill and 52 other citizens, W. J. Jackson and 53 other citizens, O. E. Pardee and 51 other citizens, M. Gimbel & Sons and 53 other citizens, J. S. Heath and 52 other citizens, E. Hart and 53 other citizens, A. Brown and 36 other citizens, Robert S. Brinton and 52 other citizens, B. Meyer and 53 other citizens, J. S. Horeland and 51 other citizens, the Cole Lithographing Company and 50 citizens, R. M. Atkinson and 52 other citizens, T. S. Rapp and 52 other citizens, James Thompson Drug Manufacturing Company and 52 citizens, S. J. Strickland and 50 other citizens, S. Tanzer and 17 other citizens, E. A. Luffin and 39 other citizens, J. F. Adams and 52 other citizens, T. Jacobs and 49 other citizens, S. Fishel and 51 other citizens, W. Eisendrath and 51 other citizens, J. E. Lamard and 48 other citizens, J. E. Laman and 49 other citizens, W. M. Umbdenstock and 52 other citizens, W. H. Jones and 52 other citizens, W. Eberhardt and 51 other citizens, C. L. Feladamf and 17 other citizens, M. T. Sterling and 52 other citizens, F. Beck and 45 other citizens, G. C. Joseph and 51 other citizens, H. J. Faulkner and 51 other citizens, A. J. Wilson and 52 other citizens, R. S. Turmia and 53 other citizens, H. Ganz and 51 other citizens, H. Y. Whitemon and 52 other citizens, J. C. Salomon and 51 other citizens, M. P. Hooker and 49 other citizens, A. L. Dean & Co. and 52 other citizens, J. McCormick and 52 other citizens, H. C. McDonald and 52 other citizens, C. S. Garrett and 52 other citizens, and J. W. Patterson and 52 other citizens, all in the State of Illinois.

Mr. CULLOM. The memorials presented by my colleague should be referred to the Committee on Interstate Commerce. I did not hear any statement as to their reference.

Mr. MASON. That is correct.

The VICE-PRESIDENT. The memorials will be so referred.

Mr. HOAR. I present the memorial of George W. Maddock, president of the Boston Upper Leather Tanners' Club, of Boston, Mass., relative to the tariff on hides and leather. I move that the memorial lie on the table, and that it be printed as a document.

The motion was agreed to.

Mr. CHANDLER. I present sundry memorials as to a matter that is immediately pending before one of the committees of this body—sundry memorials of citizens of New Hampshire and other States, remonstrating against the enactment of the antiscalping bill, so called.

The memorialists represent that "the bill would destroy a natural and legal right to dispose of one's own property in the open market." They say "it would enable the strong railroad systems to shut out the weak lines on through business and thus destroy competition," that "it would send a citizen to prison and brand him with infamy for disposing of his own property, while imposing no penalty upon the railroad company for a failure to redeem tickets, as provided," and it also declares that "the business of ticket brokerage is directly in the interest of the traveling public." I ask that the memorials may be separately noted in the RECORD, and referred to the Committee on Interstate Commerce.

The memorials were referred to the Committee on Interstate Commerce, as follows:

Memorials of J. M. Pearion and 19 other citizens, E. C. Eartman and 14 other citizens, G. Sheltry and 9 other citizens, S. Brooks and 18 other citizens, S. Gasper and 17 other citizens, S. C.

Kobler and 50 other citizens, C. P. Kenyon and 18 other citizens, Wright & Lynch and 51 other citizens, H. F. Bancker and 51 other citizens, S. F. Ellis and 50 other citizens, F. A. Milliken and 51 other citizens, Dr. S. Olin Leech and 51 other citizens, George L. Barr and 52 other citizens, H. E. Mitchell and 52 other citizens, Carl Rosenburger and 52 other citizens, and George A. Berry & Co. and 19 other citizens.

Mr. GALLINGER presented the memorial of J. M. Pearson and 58 other citizens of Suncook, N. H., remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which was ordered to lie on the table.

REPORT OF A COMMITTEE.

Mr. FAIRBANKS, from the Committee on Public Buildings and Grounds, to whom was referred the bill (S. 1056) to provide for a public building at Cleveland, Ohio, reported it without amendment, and submitted a report thereon.

BILLS INTRODUCED.

Mr. PENROSE introduced a bill (S. 2146) granting a pension to Susan Kroeson, widow of Thomas Kroeson, late a soldier in the Union Army during the war of the rebellion; which was read twice by its title, and referred to the Committee on Pensions.

He also introduced the following bills; which were severally read twice by their titles, and referred to the Committee on Claims:

A bill (S. 2147) for the relief of Mrs. Celia Ford, late a laundress in Battery F, Second Regiment United States Artillery; and

A bill (S. 2148) for the relief of the legal representatives of Merrick, Merrick & Cope.

Mr. COCKRELL introduced a bill (S. 2149) for the relief of Richard C. Silence; which was read twice by its title, and referred to the Committee on Claims.

ELECTRIC RAILWAY LINE OVER THE POTOMAC.

Mr. PENROSE submitted the following concurrent resolution; which was referred to the Committee on the District of Columbia:

Resolved by the Senate (the House of Representatives concurring), That the electric railway line from the Aqueduct Bridge to Fort Myer and Arlington may, with the permission and under the direction of the Secretary of War, be extended across the Aqueduct Bridge on or near the east sidewalk: *Provided*, That all cost of such extension shall be paid by the railway company and that this permission may be revoked by the Secretary of War at any time.

IMPROVEMENT OF CAPE CHARLES HARBOR.

Mr. SEWELL submitted the following concurrent resolution; which was referred to the Committee on Commerce:

Resolved by the Senate of the United States (the House of Representatives concurring), That the Secretary of War is hereby directed to prepare and submit plans and estimates for the further improvement of the harbor and approaches at Cape Charles City, Va., by the construction of a stone breakwater on the south side of the cut leading to Cape Charles Harbor, similar to the breakwater which has just been completed on the north side; and for sundry dredging near Old Plantation Light, in the cut leading to the harbor, thereby enabling vessels to go in and out of the harbor without danger or difficulty.

FREDALINE GLASTETTER.

Mr. COCKRELL. On the 16th day of March last I introduced a bill (S. 303) granting a pension to Fredaline Glastetter. He has passed beyond the reach of the beneficence of the Government, and I move that the Committee on Pensions be discharged from its further consideration, and that the bill be indefinitely postponed.

The motion was agreed to.

THE TARIFF BILL.

Mr. ALLISON. I move that the Senate proceed to the consideration of House bill 379.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States.

The reading of the bill was resumed at page 70, line 25, as follows:

235. Cheese, and substitutes therefor, 6 cents per pound.
236. Milk, fresh, 2 cents per gallon.

Mr. JONES of Arkansas. I was not aware that the bill had been taken up. I was looking at something else. I should be glad to have a moment's delay.

I should like to have an understanding with the Senator from Iowa. There are a considerable number of amendments here where the rates have been raised, as we think, unreasonably, and we would like to have votes upon propositions to reduce them. At the same time we do not want to delay the Senate by taking a vote on every single paragraph. If there were to be no point of order made as to our going back to make the motion, I was thinking that we would perhaps allow a half dozen paragraphs to go at a time, and then move to strike out in each one of the paragraphs the objectionable rate and to substitute what we propose, and have one vote on the whole. I am aware, if we allow a paragraph to pass, the Senator in charge of the bill can make the point, if he chooses, that the paragraph has gone by and we can not return to it. If that point is to be made, of course we shall have to ask for separate votes as we go along.

Mr. ALLISON. I thoroughly sympathize with the Senator from Arkansas in his desire to make the utmost speed in the consideration of the bill consistent with the care that we ought to take in its examination. Therefore I assure him, upon the suggestion now made by him, that I shall make no point of order.

Mr. VEST. I move to strike out paragraph 236, in order to put fresh milk upon the free list, as it is under the existing law. I call attention to the fact that in 1896 we exported $270,453 worth of milk and imported $19,100 worth. Here is an article of prime necessity, entirely healthy, necessary to the comfort, indeed, to the life of a large portion of our people. I therefore move to strike out the paragraph in order to put fresh milk upon the free list, where it is now.

The VICE-PRESIDENT. The amendment proposed by the Senator from Missouri will be stated.

The SECRETARY. Strike out paragraph 236 in the following words:

Milk, fresh, 2 cents per gallon.

The amendment was rejected.

The next amendment of the Committee on Finance was, in paragraph 237, page 71, line 2, after the word "of," to strike out "all coverings and packing material" and insert "immediate coverings;" so as to make the paragraph read:

237. Milk, preserved or condensed, or sterilized by heating or other processes, including weight of immediate coverings, 2 cents per pound; sugar of milk, 5 cents per pound.

Mr. JONES of Arkansas. I move to strike out "2 cents a pound," in line 5, and insert "20 per cent ad valorem."

The VICE-PRESIDENT. Is there any objection to the amendment proposed by the committee? The Chair hears none, and it is agreed to. The Senator from Arkansas moves an amendment which will be stated.

The SECRETARY. In line 5, page 71, it is proposed to strike out "2 cents per pound" and insert "20 per cent ad valorem."

Mr. JONES of Arkansas. And also strike out "5 cents per pound" and insert "20 per cent ad valorem."

The SECRETARY. Also, in lines 5 and 6, strike out "5 cents per pound" and insert "20 per cent ad valorem;" so as to make the paragraph read:

237. Milk, preserved or condensed, or sterilized by heating or other processes, including weight of immediate coverings, 20 per cent ad valorem; sugar of milk, 20 per cent ad valorem.

Mr. JONES of Arkansas. The manufacture of condensed milk was begun just before the war, and has developed rapidly during and since then. There are now about ten factories in the United States that make about 40,000,000 1-pound cans of condensed milk annually. Five of these belong to the New York Condensed Milk Company and two to the Anglo-Swiss Company. Of these seven, four are in New York and three in Illinois.

When the factory employees and the dairy farmers in the vicinity of these establishments learned that McKinley had given the condensed-milk men all the duty they wished on preserved milk and had removed the duty on sugar, which in this particular case the foreigner refused to pay, they were jubilant. Prices of milk and wages were to be greatly advanced. This was the understanding all along the line. Whatever might be the effect of this new tariff act on other industries, it was certain to help the dairy farmer and the workers in the condensed-milk factories. But behold! When the condensed-milk men met and fixed the prices they would pay for milk for the year 1891, instead of being higher, they were found to be lower than for fifteen or twenty years, averaging only 3 cents per quart for winter and 2½ cents for summer months.

The wage earners in this highly protected industry can shake hands with the farmers, for all have been equally benefited by the tariff. Matters are somewhat different with the factory owners, who are now selling condensed milk somewhat higher than in 1890, and are now, because of cheaper sugar, making at least 1 cent more on each pound can, or $400,000 a year, though they had made their millions under the old duty. Of course, with such a high duty and such enormous profits, it was unbecoming for these men to depend upon the crude and amateurish methods of organization that had before bound them together. They must put their stock in a syndicate and have it sold in the exchanges. Hence, on December 2, 1891, the Associated Press contained the following from Chicago.

A special dispatch from Elgin, Ill., says:

"It is understood that arrangements are completed for the transfer to an English syndicate of the five milk-condensing factories at Carpentersville, Ill., and at Brewster, Wassaic, and Walden, N. Y. They have been owned by the Borden and Milbank families for over twenty-five years. The purchase price is not stated, but as their net revenue last year is said to have been over $750,000, it must be $12,000,000 or $15,000,000. The Borden heirs living here and in California are now in New York on this business."

This trust is now in shape to hold fast all the McKinley Act gave it and to dictate wages and prices on everything bought and sold. Moreover, they can and probably will soon begin to give extra discount to foreigners, who now purchase about $200,000 worth of condensed milk a year from us.

There can be no reason in making this increased tax on this article of prime necessity. The claim that it is done for the purpose of increasing wages of employees is absolutely disproved by the history of this product. The rate that I have proposed by the amendment I have offered is the one under the existing law at this time, under which large quantities of this article are being exported, I understand, and there is practically none being imported.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the Senator from Arkansas.

The amendment was rejected.

The next amendment of the Committee on Finance was, in paragraph 238, page 71, line 8, after the word "Beans," to strike out "fifty" and insert "forty;" so as to make the paragraph read:

238. Beans, 40 cents per bushel of 60 pounds.

Mr. SPOONER. I ask the Senator in charge of the bill to allow this paragraph to be passed over.

Mr. ALLISON. Very well.

The VICE-PRESIDENT. At the request of the Senator from Wisconsin, the paragraph will be passed over temporarily.

The next amendment of the Committee on Finance was, in paragraph 239, page 71, line 13, after the word "all," to strike out "coverings and packing material" and insert "tins, jars, and other immediate coverings;" so as to make the paragraph read:

239. Beans, pease, and mushrooms, prepared or preserved, in tins, jars, bottles, or similar packages, 2½ cents per pound and 15 per cent ad valorem, including the weight of all tins, jars, and other immediate coverings; all vegetables, prepared or preserved, including pickles and sauces of all kinds, not specially provided for in this act, and fish paste or sauce, 40 per cent ad valorem.

The amendment was agreed to.

The Secretary read the next paragraph, as follows:

240. Cabbages, 3 cents each.

Mr. VEST. Under the existing law cabbages are upon the free list. I move to strike out the paragraph with a view to putting them upon the free list.

The VICE-PRESIDENT. The question is on the amendment of the Senator from Missouri, to strike out paragraph 240, "Cabbages, 3 cents each."

The amendment was rejected.

The next paragraph was read, as follows:

241. Cider, 5 cents per gallon.

Mr. VEST. Mr. President, I draw the line on cider. After three weeks of arduous labor, we have succeeded upon this side of the Chamber in making only one reduction in the bill, and that was a quarter of a cent upon anvils. Now we have the cider put on the dutiable list. The official reports show that we exported of cider during 1896, $47,670 worth and imported $1,704 worth.

I appeal to New England to put this article upon the free list. Every one of us, and we have all been boys, must go back to reminiscences of boyhood in order to find an argument, and a very conclusive one, in behalf of free cider. There can be no pretense that this is in the line of protection, because we supply the domestic market and export nearly $50,000 worth of this innocent beverage.

Mr. GRAY. It is not for revenue.

Mr. VEST. It is not for revenue, because we imported only sixteen or seventeen hundred dollars' worth during 1896. If there is a temperance man upon the other side of the Chamber, I appeal to him. My judgment, formed upon observation and very considerable experience, is that the use of light wines, beer, and cider is the right road to temperance. The American people never will be a temperance people until we quit the fierce, maddening, life and soul destroying liquors above proof in alcohol and adopt the continental system.

One good thing, at least, they have in Europe, the use of beer and light wines. I believe it is almost a crime in these modern days to confess that you have been to Europe. I saw a quotation from a distinguished statesman upon my own side in politics the other day where he thanked God he was too much of an American ever to have been to Europe. Well, I have been to Europe. I went there for my health, and I am very sorry I am not there now.

Mr. HOAR. May I inquire of the Senator if it is not the fact that that statesman was himself born in Europe?

Mr. VEST. No; he is a native-born American. He thanked God that he never had been there, and said he was too much of an American ever to go there. I said that I wished I was there now. I would infinitely rather be there, on account of my health and comfort, than to be struggling hopelessly over this tariff bill.

Mr. FRYE. Give it up.

Mr. VEST. We can not always give up these things. Every public man has sometimes to take hold of a live wire, and he can not let go. I saw my friend the chairman of the Commerce Committee, with whom I have labored so many years, wrestling and struggling with a strong disposition to piscatorial exercises, when he felt he was compelled to stay here and wrestle with financial and economic questions.

I have been to Europe, Mr. President. I went there from necessity, and the necessity arose from the fact that you can get no rest in this country. I make no apology for it. With telephones, telegraphs, and the demands upon every man, even in private life, and much more in public life, there is no rest in this rushing, worrying, irritating American life of ours unless we go abroad.

I do not propose to open up the temperance question, but I am defending cider, the liquid of our boyhood, the beverage that "cheers but not inebriates," that sparkles at every New England festival and in every New England home and in the West and South wherever the apple is raised and used. Upon the Continent of Europe you can see from five to fifteen thousand people—men, women, and children—assembled in the gardens every afternoon in family groups, drinking wine and beer and listening to music—not a loud word, not a boisterous expression, the home preserved. If you had that many Americans there, under our system of bibulation, it would not be ten minutes until you would hear the yell of some drunken ruffian and the music of the revolver.

If we want temperance in this country—and I am in perfect sincerity when I say so—we must change our methods of drinking. The desire for some sort of stimulus is natural to mankind. We read in the Bible that as far back as the days of Noah he had not joined the Sons of Temperance. If we would have real, true temperance, obedient to natural appetites, in this country, we must do away with these strong liquors and go back to light wines and the drinks of our childhood—milk, water, and cider.

Mr. PLATT of Connecticut. Will the Senator allow me? I think it would have been better for Noah if he had joined the Sons of Temperance.

Mr. VEST. But he did not join them. That is the point I am making. We are told that the races of men were divided, and the descendants of Ham were put into slavery because Ham, instead of protecting the old man's weakness, ridiculed him, and the result was that his descendants became slaves.

Mr. President, I make this appeal earnestly in favor of cider. I have heard that at one time there was a distinguished member of this body who came in when a financial bill was being discussed by Senator Sherman, of Ohio. In those early days Senator Sherman was advocating an increased tax upon whisky, nothing like what we have now, but it was considered then an enormous increase. This Senator came in, deposited his hat and gloves upon his desk before him, and said, "May I interrupt the Senator from Ohio?" Mr. Sherman yielded the floor, and this Senator said: "Mr. President, I understand that whisky has no friends in this Chamber. I am the friend of whisky, and whisky is my friend. It builds up the strong and destroys the weak." And he retired from the Chamber after that declaration in favor of his favorite beverage.

If whisky could have an advocate, how many advocates ought cider to have, the beverage of sobriety, the beverage of home? What excuse is there for putting it upon the dutiable list, when we export the amount I have named and receive nothing in the shape of revenue? I appeal frankly and earnestly to New England to come to the rescue of cider.

I ask for the yeas and nays on agreeing to my amendment.

The VICE-PRESIDENT. The question is on the amendment of the Senator from Missouri [Mr. VEST] to strike out paragraph 241, "Cider, 5 cents per gallon," on which he demands the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. CANNON (when his name was called). I am paired with the senior Senator from Rhode Island [Mr. ALDRICH]. If he were here, I should vote "yea."

Mr. CLAY (when his name was called). I am paired with the junior Senator from Massachusetts [Mr. LODGE]. I would vote "yea" if he were present.

Mr. JONES of Arkansas (when his name was called). I have a general pair with the Senator from Maine [Mr. HALE], but I transfer that pair to the Senator from Colorado [Mr. TELLER], and they will remain paired. I make this announcement for the day.

Mr. LINDSAY (when his name was called). I have a general pair with the senior Senator from Michigan [Mr. MCMILLAN], who, I understand, is not in the Chamber. I therefore withhold my vote. If he were here, I should vote "yea."

Mr. PRITCHARD (when his name was called). Has the junior Senator from South Carolina [Mr. MCLAURIN] voted?

The VICE-PRESIDENT. He has not voted.

Mr. PRITCHARD. I am paired with the junior Senator from South Carolina. If he were present, I should vote "nay."

Mr. PROCTOR (when his name was called). I am paired with the junior Senator from Florida [Mr. MALLORY].

The roll call was concluded.

Mr. TILLMAN. Has the Senator from Nebraska [Mr. THURSTON] voted?

The VICE-PRESIDENT. He has not voted.

Mr. TILLMAN. I am paired with that Senator, and therefore withhold my vote.

Mr. PASCO. Has the Senator from Washington [Mr. WILSON] voted?

The VICE-PRESIDENT. He has not voted.

Mr. PASCO. I am paired with that Senator, and therefore I withhold my vote. If he were present, I should vote "yea."

Mr. FAULKNER (after having voted in the affirmative). I am paired with my colleague the Senator from West Virginia [Mr. ELKINS]. I do not see him in the Chamber. I should like to know whether he has voted.

The VICE-PRESIDENT. He has not voted.

Mr. FAULKNER. I withdraw my vote.

Mr. GEAR. I am paired with the Senator from New Jersey [Mr. SMITH]. I transfer that pair to the junior Senator from Massachusetts [Mr. LODGE], and vote "nay."

Mr. CLAY. I transfer my pair to the Senator from New Jersey [Mr. SMITH], and vote "yea."

Mr. BUTLER (after having voted in the affirmative). I am paired with the junior Senator from Maryland [Mr. WELLINGTON]. As he is not present, I withdraw my vote.

The result was announced—yeas 21, nays 28; as follows:

YEAS—21.

Bacon,	Harris, Tenn.	Morgan,	Vest,
Bate,	Heitfeld,	Murphy,	Walthall,
Berry,	Jones, Ark.	Pettus,	White.
Clay,	Kenney,	Rawlins,	
Cockrell,	Mills,	Roach,	
Gray,	Mitchell,	Turpie,	

NAYS—28.

Allison,	Fairbanks,	Hoar,	Platt, Conn.
Burrows,	Foraker,	McBride,	Platt, N. Y.
Carter,	Frye,	Mason,	Quay,
Chandler,	Gallinger,	Morrill,	Sewell,
Cullom,	Gear,	Nelson,	Spooner,
Davis,	Hanna,	Penrose,	Stewart,
Deboe,	Hawley,	Perkins,	Wetmore.

NOT VOTING—40.

Aldrich,	Faulkner,	McEnery,	Shoup,
Allen,	George,	McLaurin,	Smith,
Baker,	Gorman,	McMillan,	Teller,
Butler,	Hale,	Mallory,	Thurston,
Caffery,	Hansbrough,	Mantle,	Tillman,
Cannon,	Harris, Kans.	Martin,	Turner,
Chilton,	Jones, Nev.	Pasco,	Warren,
Clark,	Kyle,	Pettigrew,	Wellington,
Daniel,	Lindsay,	Pritchard,	Wilson,
Elkins,	Lodge,	Proctor,	Wolcott.

So the amendment was rejected.

Mr. WHITE subsequently said: I have been advised that I voted in the absence of the Senator from Idaho [Mr. SHOUP], with whom I am paired. I ask unanimous consent to withdraw my vote. I had not observed that the Senator from Idaho was not here.

The VICE-PRESIDENT. The Senator from California asks leave to withdraw his vote on the previous roll call. Is there objection? The Chair hears none.

The next amendment of the Committee on Finance was, in paragraph 242, page 71, line 21, after the word "Eggs," to insert "not specially provided for in this act;" so as to make the paragraph read:

242. Eggs, not specially provided for in this act, 5 cents per dozen.

The amendment was agreed to.

Mr. VEST. I move to strike out "five" and insert "three;" so as to read:

Eggs, not specially provided for in this act, 3 cents per dozen.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the Senator from Missouri.

Mr. VEST. I wish to call the attention of my friends who are anxious to secure revenue to the fact as shown by the official report. In 1893, under the McKinley Act, at 5 cents a dozen, there were brought into this country $392,616 worth of eggs. In 1896, under a reduction to 3 cents per dozen under the Wilson Act, we brought in $88,701 worth. So if it is desired, as I understand is the case, to obtain revenue, I would suggest that the present duty be retained. Therefore I make the motion.

The amendment was rejected.

The next amendment of the Committee on Finance was, in paragraph 243, page 71, line 23, after the words "ad valorem," to strike out the semicolon and the words "albumen, 5 cents per pound;" so as to make the paragraph read:

243. Eggs, yolk of, 25 per cent ad valorem.

Mr. ALLISON. In behalf of the majority of the committee, I move to insert after the words "ad valorem," and in lieu of the part stricken out, the following:

Albumen, egg, or dried blood, 3 cents per pound; dried blood when soluble, 1½ cents per pound.

Mr. VEST. I ask the Senator from Iowa if dried blood is not now on the free list?

Mr. ALLISON. It is on the free list.

Mr. VEST. And it is proposed now to put a duty of 3 cents a pound upon it?

Mr. ALLISON. Three cents a pound on egg albumen and dried blood.

Mr. VEST. I call attention to the fact that the official report shows no imports at all of the yolk of eggs. This duty of 25 per cent ad valorem can not be imposed for the purpose of protecting the American production, as none comes in from abroad at all. In other words, we absolutely control the domestic market. In addition to that, under the amendment the Senator puts 3 cents per pound, I understand, upon albumen and 3 cents per pound upon dried blood.

Mr. ALLISON. Dried-blood albumen.

Mr. VEST. Dried-blood albumen. Now, will the Senator please explain why he wants to take that article off the free list?

Mr. ALLISON. The House provided for a duty of 5 cents per pound. It is largely produced in our own country and imported also. We struck it out, but on a reexamination we provide for a small duty.

Mr. VEST. I could not hear what the Senator from Iowa said. Will he be kind enough to repeat his statement?

Mr. ALLISON. We provide a small duty in lieu of 5 cents a pound provided for by the House. The House provision is 5 cents a pound. We insert 3 cents for egg albumen or dried-blood albumen, and 1½ cents for dried blood when soluble.

Mr. VEST. Does the Senator mean to say that they are the same thing?

Mr. ALLISON. They are not the same thing, but they are like things, used for the same purposes.

Mr. GRAY. What are those purposes, may I ask the Senator?

Mr. VEST. I understand that it is a hospital article.

Mr. ALLISON. They are used largely in purifying cloths, etc.

Mr. VEST. They are also used in medicinal preparations.

Mr. ALLISON. They are used in the manufacture of beer as well.

The VICE-PRESIDENT. The question is on the adoption of the amendment of the Senator from Iowa.

Mr. VEST. Let us have a vote on that amendment.

The VICE-PRESIDENT. On the committee amendment?

Mr. VEST. I do not call for the yeas and nays. I want a viva voce vote.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Iowa, which includes the amendment of the committee.

The amendment was agreed to.

The next amendment of the Committee on Finance was, in paragraph 244, page 72, line 1, after the word "Hay," to strike out "$4 per ton" and insert "$3.50 per ton, gross weight;" so as to make the paragraph read:

244. Hay, $3.50 per ton, gross weight.

Mr. JONES of Arkansas. I move to strike out "$3.50" and insert "$2." I call attention to the fact that the revenue derived from a tax of $4 a ton was about $900,000, and the revenue derived from a tax of $2 a ton was $2,700,000—three times as much revenue on the rate of $2 a ton as there was on the rate of $4 a ton.

The VICE-PRESIDENT. The question is on the amendment of the Senator from Arkansas to the amendment of the committee.

Mr. ALLISON. In behalf of the committee, I withdraw the amendment proposed by the committee, and will allow the vote to be taken on the House provision.

Mr. JONES of Arkansas. I hope the Senator will let me have a vote taken on the proposition I have made.

Mr. ALLISON. Undoubtedly.

Mr. JONES of Arkansas. I ask for the yeas and nays on my amendment. The Senator from Iowa proposes to raise the proposed Senate committee rate of $3.50 a ton to $4 a ton. I ask for a vote by yeas and nays on my amendment reducing the rate to $2.

Mr. QUAY. Will the Secretary have the kindness to state the amendment?

The VICE-PRESIDENT. The question is on the amendment proposed by the Senator from Arkansas [Mr JONES], which will be stated.

The SECRETARY. The committee amendment to paragraph 244 having been withdrawn, it is proposed to strike out "$4" and insert "$2;" so as to read:

244. Hay, $2 per ton.

The Secretary proceeded to call the roll.

Mr. FAULKNER (when his name was called). I am paired with the Senator from West Virginia [Mr. ELKINS]. If he were present, I should vote "yea."

Mr. HARRIS of Kansas (when his name was called). I am paired with the junior Senator from Wyoming [Mr. CLARK]. As he is not present, I withhold my vote.

Mr. LINDSAY (when his name was called). I am paired with the senior Senator from Michigan [Mr. MCMILLAN], and therefore withhold my vote. If he were present, I should vote "yea."

Mr. PASCO (when his name was called). I again announce my pair with the Senator from Washington [Mr. WILSON]. If he were present, I should vote "yea."

Mr. PROCTOR (when his name was called). I am paired with the junior Senator from Florida [Mr. MALLORY].

Mr. TILLMAN (when his name was called). I again announce my pair with the Senator from Nebraska [Mr. THURSTON].

The roll call was concluded.

Mr. GEAR. I am paired with the Senator from New Jersey [Mr. SMITH]. I transfer that pair to the Senator from Massachusetts [Mr. LODGE], and vote "nay."

Mr. WHITE (after having voted in the affirmative). I inquire if the Senator from Idaho [Mr. SHOUP] has voted?

The VICE-PRESIDENT. He has not.

Mr. WHITE. I am paired with that Senator, and therefore withdraw my vote.

Mr. BURROWS. I notice that the senior Senator from Louisiana [Mr. CAFFERY] is not present. I am paired with that Senator, and I request that my vote may be withdrawn. I voted without observing his absence. I ask leave to withdraw my vote on the last roll call.

The VICE-PRESIDENT. If there be no objection, it will be so ordered.

Mr. WHITE. I suggest to the Senator from Michigan that we might exchange pairs and vote. I am paired with the Senator from Idaho [Mr. SHOUP] and the Senator from Michigan is paired with the Senator from Louisiana [Mr. CAFFERY]. If the Senator has no objection, I will transfer my pair to the Senator from Louisiana [Mr. CAFFERY], and that will enable the Senator from Michigan and myself to vote.

Mr. BURROWS. That will be entirely agreeable to me. I vote "nay."

Mr. WHITE. I vote "yea."

The result was announced—yeas 23, nays 29; as follows:

YEAS—23.

Bacon,	Cockrell,	McLaurin,	Roach,
Bate,	Gray,	Mills,	Turpie,
Berry,	Harris, Tenn.	Mitchell,	Vest,
Butler,	Jones, Ark.	Morgan,	Walthall,
Chilton,	Kenney,	Murphy,	White.
Clay,	McEnery,	Pettus,	

NAYS—29.

Allison,	Foraker,	Mason,	Quay,
Burrows,	Gallinger,	Morrill,	Sewell,
Carter,	Gear,	Penrose,	Spooner,
Chandler,	Hansbrough,	Perkins,	Wellington,
Cullom,	Heitfeld,	Pettigrew,	Wetmore.
Davis,	Hoar,	Platt, Conn.	
Deboe,	Kyle,	Platt, N. Y.	
Fairbanks,	McBride,	Pritchard,	

NOT VOTING—37.

Aldrich,	George,	Mallory,	Teller,
Allen,	Gorman,	Mantle,	Thurston,
Baker,	Hale,	Martin,	Tillman,
Caffery,	Hanna,	Nelson,	Turner,
Cannon,	Harris, Kans.	Pasco,	Warren,
Clark,	Hawley,	Proctor,	Wilson,
Daniel,	Jones, Nev.	Rawlins,	Wolcott.
Elkins,	Lindsay,	Shoup,	
Faulkner,	Lodge,	Smith,	
Frye,	McMillan,	Stewart,	

So the amendment was rejected.

The next paragraph was read, as follows:

245. Honey, 20 cents per gallon.

Mr. VEST. I move to strike out "twenty" and insert "ten," which is the rate in the present law.

The SECRETARY. In line 3, page 72, it is proposed to strike out "twenty" and insert "ten;" so as to read:

245. Honey, 10 cents per gallon.

Mr. VEST. I want to call attention to the official report of exports and imports. We exported of honey in 1896, $90,959 worth, and we imported $17,632 worth, showing an excess of exports over imports of more than $70,000 in the year 1896. There can not be any pretense of the necessity for protection to this simple production, and it certainly does not bring us any revenue. I can not see any necessity for imposing this duty upon an article entirely harmless and entirely necessary.

The VICE-PRESIDENT. The question is on the amendment proposed by the Senator from Missouri [Mr. VEST].

The amendment was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 246, page 72, line 4, after the word "Hops," to strike out "fifteen" and insert "twelve;" so as to read:

246. Hops, 12 cents per pound.

Mr. JONES of Arkansas. I move to amend the proposed amendment by striking out "twelve" and inserting "eight."

The VICE-PRESIDENT. The amendment to the amendment will be stated.

The SECRETARY. It is proposed to amend the committee amendment, on page 72, line 4, after the word "Hops," by striking out "twelve" and inserting "eight;" so as to read:

246. Hops, 8 cents per pound.

The VICE-PRESIDENT. The question is on the amendment to the amendment.

Mr. JONES of Arkansas. I have a communication from a number of hop exporters and importers showing the condition of the trade in hops, and, as it seems to me, the absolute uselessness of this increase in the present tariff. The rate proposed by me is that which is now the law. I will read a statement made by these gentlemen showing the condition of this trade:

NO. 35 PEARL STREET, NEW YORK CITY, *March 29, 1897.*

To the Senate Finance Committee of the United States, Washington, D. C.:

The undersigned, hop merchants, exporters and importers, respectfully submit the following statement of facts in relation to the hop trade, to demonstrate that the proposed increase in the duty on hops from 8 cents to 15 cents per pound will be an injury rather than a benefit to the producer, that it will be a hardship to the consumer, and that it will probably prove of no advantage whatever from a revenue point of view, and is therefore against public policy.

First. The present duty of 8 cents per pound affords protection to the extent of fully 100 per cent upon the average cost of producing hops in America. In proof of this it may be stated that on the Pacific Slope, where three-fifths of the total American crop is now produced, hops can be grown, harvested, cured, and baled, ready for market, at a cost of only 6 cents per pound, and can be delivered in New York at 7½ cents. A large proportion of the Oregon crop of 1896 was sold under contract by growers at 6 cents per pound six months before harvest time, and before they had incurred any outlay for the purpose of cultivation. In New York State, which produces the other two-fifths of the American crop, the cost of production is popularly supposed to be 10 cents per pound, but without doubt a large proportion of the crop is now being produced at a much lower cost.

Second. The annual exports of American hops absorb about one-third of our production and have become such a serious menace to the English growers that they are continually beseeching Parliament to protect them against American competition. During the past three years the volume of exports have averaged nearly half the total quantity of hops consumed by American brewers.

Third. The small quantity of European hops which are imported to this country do not really enter into competition with the home product. They are used for special purposes by brewers of high-grade beers, who blend them with American hops in the proportion of about one to ten, mainly to impart to their beer a certain flavor which can not be acquired in any other way, and which will enable them to successfully imitate the flavor of foreign beers. Their special value consists in their peculiar aroma, and it is doubtful if in other respects they possess as much merit as our home product for general brewing purposes.

Fourth. The ratio of imports to exports is, on the average, about 1 to 7 and the extent to which imported hops may be said to displace our native hops is certainly not over 7 per cent of the total consumption of the United States. Even this small displacement is probably fully balanced by the extent to which our exporters are relieved from the competition of Germany in the London market. It is an axiom in the hop trade that London makes our prices, so that the exports of German hops to England are of vastly more importance to the American grower than are the exports of German hops to the United States. In this connection attention should be called to a report made by Louis Stern, United States commercial agent at Bamberg, September 14, 1896, upon the German hop trade, setting forth how seriously the trade in German hops is threatened by American competition in the English market.

And yet we are proposing to protect the American market against competition of this kind, when we are threatening their market abroad and selling a large percentage of our hops.

Fifth. The past four years in the hop trade have been marked by an era of low prices, resulting from constant overproduction. This conclusion is evident from the fact that the consumption of beer has not decreased, showing that the situation was not influenced by the general business depression. The plain truth of the matter is that the majority of the growers in New York State can not successfully compete with those on the Pacific Coast, and it is therefore the refinement of cruelty to bolster them up by creating in their minds a false impression of the probable benefit to them of a practically prohibitive tariff.

Sixth. With regard to the revenue from imported hops, the statistics of the Treasury Department will show that the revenue derived from hops under the operation of the McKinley bill (when the duty was 15 cents per pound) was less than during the same period prior thereto, when the duty was only 8 cents per pound.

Your attention is directed to the following resolution, which was adopted unanimously at a full meeting of hop merchants and growers held in New York on April 2, 1894, and embodied in a petition sent to the United States Senate, to wit:

"*Resolved*, That the hop trade as a unit deplores the action of the Finance Committee of the United States Senate in having recommended a change in the hop schedule of the Wilson bill, recently passed by the House of Representatives, whereby the tariff on hops is to be changed from a specific to an ad valorem duty, and that the said hop trade unanimously petitions the honorable the Senate of the United States to reinstate the Wilson schedule of specific duty.

"*Resolved*, That although the opinion of different members of the trade has been at variance as to the amount of said specific duty, they have, after a conference with the hop growers throughout the State of New York, united in petitioning that the rate established by the House of Representatives, to wit, 8 cents per pound, be adopted by the Senate."

We respectfully submit that the proposal to increase the duty upon hops is undesirable from every point of view, and is calculated to cast discredit

upon the protection idea. We ask your committee to grant us the privilege of a hearing.

Very respectfully,

Hugh F. Fox, 35 Pearl street, New York; Rothbarth & Sons, 35 Pearl street, New York; T. Rosenwald & Co., 15 Water street, New York; E. Wattenberg Co., 104 Broad street, New York; Martin Rothbarth & Co., 26 Whitehall street, New York; E. Uchtmann, 17 and 19 Broadway, New York; Carl Ullmann & Co., 17 and 19 Broadway, New York; Hugo Reisinger, 38 Beaver street, New York; S. S. Steiner, 25 Whitehall street, New York; M. Seidenberger's Sons, 25 Whitehall street, New York; C. & L. Heidenheimer, 13 Stone street, New York; Paul Reinemann, 22 Whitehall street, New York; Charles Zoller, 12 Water street, New York; F. W. Simonds & Son, 18 South William street, New York; Geo. W. Elkins & Co., Philadelphia, Pa.; Dole Bros. Co., Boston, Mass.; Falk, Wormser & Co., Chicago, Ill.; Chas. L. Klewert & Co., Milwaukee, Wis.; Meyer Supply Co., St. Louis, Mo.; L. R. Van Derveer, Buffalo, N. Y.; Elsas & Pritz, Cincinnati, Ohio; A. Lehman & Co., Cincinnati, Ohio; Herman Goepper & Co., Cincinnati, Ohio; A. Magnus's Sons, Chicago, Ill.; Cleveland Brewers' Supply Co., Cleveland, Ohio.

The specific duty of 8 cents a pound put in that bill was understood to be entirely satisfactory to the hop growers at that time. Now, notwithstanding the fact that there is only about 7 per cent of the total consumption of hops imported into the United States, notwithstanding the fact that we ship abroad from a third to a half of all the hops raised in the United States, and notwithstanding the fact that American hops regulate the prices and value of hops in the London markets, it is proposed to go through the form of undertaking to increase the price of American hops by raising this duty. There can not be any pretense that it is to raise revenue, because the importation of hops is infinitesimal, and the duty can have no effect, except probably locally, to interfere with the natural operations of trade.

Mr. VEST. Mr. President, I realize the fact that it is hopeless to obtain any reduction of the items in this tariff bill. I am simply discharging a duty placed upon me by a brother Senator when I send to the desk a communication from the brewers of the city of St. Louis—which has a very large brewing interest—asking that the duty on hops be put back to 8 cents, as under the existing law.

I want to state, Mr. President, that the evidence is incontestable that these foreign hops are absolutely necessary to the American brewer, and that they do not interfere with the hop-growing interest of the United States, because, as my colleague on the committee [Mr. JONES of Arkansas] says, large quantities of American hops are sent abroad and sold in Europe at a profit. There is no rivalry between the foreign hops and the hops grown in the United States, and especially in Oregon.

I send to the desk the communication, and ask that it be read. It is very short.

The VICE-PRESIDENT. In the absence of objection, the Secretary will read as requested.

The Secretary read as follows:

ST. LOUIS, MO., *April 10, 1894.*

Hons. GEORGE G. VEST and FRANCIS M. COCKRELL,
United States Senate, Washington, D. C.:

We, the undersigned, representing substantially the entire brewing interest of the city of St. Louis, Mo., hereby petition you, praying for the reasons set forth by the trade committee of the New York Produce Committee, that the duty on hops be restored to 8 cents per pound specific, as fixed by the Wilson tariff bill now pending.

ST. LOUIS BREWING ASS'N,
ELLIS WAINWRIGHT, *Prest.*
ANHEUSER-BUSCH B. ASS'N,
ADOLPHUS BUSCH, *Prest.*
THE AMERICAN BREWING CO.,
By HENRY KOEHLER, JR., *President.*
HOME BREWING CO.,
Per THEO. HEROLD, *Prest.*
NATIONAL BREWERY CO.,
Per HENRY GRIESEDIECK, JR., *Prest.*
COLUMBIA BREWING CO.,
Per CHAS. F. KOEHLER, *Prest.*
W. J. LEMP BREWING CO.,
W. J. LEMP, *Prest.*

Mr. VEST. Here is a communication, in addition to that sent to me by the St. Louis brewers, accompanied by a letter from Hon. Ashbel P. Fitch, formerly a member of Congress from New York. This represents the wishes and opinions of the entire brewing interest of the city of New York.

The VICE-PRESIDENT. The Secretary will read as requested.

The Secretary read as follows:

From the point of view of the protectionists the proposed increase of the duty on foreign hops must appear exceedingly illogical for these reasons, viz:

First. Because the American hop growers are not in any manner affected by the importation of foreign hops, which does not amount to 10 per cent of the entire quantity of hops consumed in American breweries.

Second. Because the question of "pauper labor," which is the determining factor in all legislation of a protective character, is not involved at all in this case, since the exportation of American hops to the pauper-ridden countries of Europe exceeds by 75 per cent the importation of foreign hops to this country—the actual figures for seven years (1882 to 1888) being, exportation 54,976,722 pounds, importation 33,217,477 pounds. (See Statistical Abstract, Treasury Department, for 1888.)

Third. Because the small quantity of foreign hops consumed in American breweries, being used merely for the purpose of producing certain flavors peculiar to certain plants of foreign growth, can not, and unless the market be manipulated by speculators and dealers will not, affect the price of American hops, but will have the effect either of terminating such importations—which is not likely—or of compelling the brewer to pay a higher price for such hops, through an additional and unnecessary tax. It can be shown that the home production exceeds the home demands; but it has also to show that the surplus of domestic production or consumption finds a ready market in Europe at prices rivaling those paid for the foreign article in England. (The latter is borne out by many American hop growers, among them one Mr. Clark, who appeared before the Committee on Ways and Means.) Here we have, then, an inversion of the fundamental theory of the protectionist, since the American producer, far from needing protection against "pauper labor," has successfully entered the European markets and "downed" the foreign producer. The money which the American brewer paid for foreign hops during the seven years (1882 to 1888) amounted to $7,486,239; the money which the American farmer received for hops sold in pauper-ridden Europe amounted to $14,702,739.

What is said concerning the probable effect or rather noneffect of an increased duty upon home prices applies, of course, only to a normal state of affairs; but it will readily be understood that sharp dealers, and the strongest support of the proposed increase emanates from dealers, may, by a combination of favorable circumstances and their own shrewdness, so manipulate the market as to enhance prices in a manner that will not at all increase the profits of the producer, but simply those of the middlemen.

In the event of a failure of the American hop crops the poor-protected farmer will not be saved by an increased duty, but the brewer would be compelled to seek supply in foreign markets and pay for it an exorbitant tax into the national Treasury, already too plethoric for the common welfare.

The salient point of the opposition to an increased duty may be summed up in a few sentences. The object of protection is to guard the American producer against the competition of the purchasers of the cheap commodities.

In our case the fact is that foreign hops are by far dearer on account of duties, cost of transportation, etc., than the American product, while the American product is being sold with profit to the American producer in European markets at foreign prices.

The VICE-PRESIDENT. The question is on the amendment proposed by the Senator from Arkansas [Mr. JONES] to the amendment reported by the committee.

Mr. VEST. I ask for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. CLAY (when his name was called). I am paired with the Senator from Massachusetts [Mr. LODGE]; but I transfer that pair to the Senator from New Jersey [Mr. SMITH], and vote "yea."

Mr. FAULKNER (when his name was called). I am paired with the Senator from West Virginia [Mr. ELKINS].

Mr. GEAR (when his name was called). I transfer my pair with the Senator from New Jersey [Mr. SMITH] to the junior Senator from Massachusetts [Mr. LODGE], and vote "nay."

Mr. HANNA (when his name was called). I am paired with the junior Senator from Utah [Mr. RAWLINS]. If he were present, I should vote "nay."

Mr. LINDSAY (when his name was called). I announce now for the day my pair with the senior Senator from Michigan [Mr. MCMILLAN]. If he were here, I should vote "yea."

Mr. PASCO (when his name was called). I again announce my pair with the Senator from Washington [Mr. WILSON]. If he were present, I should vote "yea."

Mr. PROCTOR (when his name was called). I am paired with the Senator from Florida [Mr. MALLORY].

Mr. WELLINGTON (when his name was called). I am paired with the Senator from North Carolina [Mr. BUTLER]. In his absence, I withhold my vote. If he were present, I should vote "nay."

Mr. WHITE (when his name was called). I am paired with the Senator from Idaho [Mr. SHOUP].

The roll call was concluded.

Mr. BURROWS. I am paired with the senior Senator from Louisiana [Mr. CAFFERY], but I transfer that pair to the Senator from Nevada [Mr. JONES], and vote "nay."

Mr. PROCTOR. I have announced my pair with the junior Senator from Florida [Mr. MALLORY], but I will transfer that pair to the Senator from Kansas [Mr. BAKER], and vote "nay."

Mr. DANIEL. I beg leave to state that I am paired with the Senator from North Dakota [Mr. HANSBROUGH]. Otherwise I should vote "yea."

The result was announced—yeas 22, nays 28; as follows:

YEAS—22.

Bacon,	Gorman,	Mills,	Tillman,
Bate,	Gray,	Mitchell,	Turpie,
Berry,	Harris, Tenn.	Morgan,	Vest,
Chilton,	Jones, Ark.	Murphy,	Walthall.
Clay,	Kenney,	Rawlins,	
Cockrell,	McLaurin,	Roach,	

NAYS—28.

Allison,	Fairbanks,	Kyle,	Platt, N. Y.
Burrows,	Foraker,	McBride,	Pritchard,
Carter,	Frye,	Morrill,	Proctor,
Chandler,	Gallinger,	Nelson,	Sewell,
Cullom,	Gear,	Penrose,	Spooner,
Davis,	Hawley,	Perkins,	Thurston,
Deboe,	Hoar,	Platt, Conn.	Wetmore.

NOT VOTING—39.

Aldrich,	Cannon,	George,	Heitfeld,
Allen,	Clark,	Hale,	Jones, Nev.
Baker,	Daniel,	Hanna,	Lindsay,
Butler,	Elkins,	Hansbrough,	Lodge,
Caffery,	Faulkner,	Harris, Kans.	McEnery,

McMillan,	Pasco,	Smith,	Wellington,
Mallory,	Pettigrew,	Stewart,	White,
Mantle,	Pettus,	Teller,	Wilson,
Martin,	Quay,	Turner,	Wolcott.
Mason,	Shoup,	Warren,	

So the amendment to the amendment was rejected.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

Mr. ALLISON. I move to add to the paragraph what I send to the desk.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. At the end of paragraph 246 it is proposed to add:

Hop extract and lupulin, 50 per cent ad valorem.

Mr. JONES of Arkansas. I hope the Senator from Iowa will explain something about the significance of the amendment.

Mr. ALLISON. Hop extract is imported; 1 pound of it contains the essence of 12 pounds of hops, and it is sold at a very high price.

Mr. JONES of Arkansas. About what price?

Mr. ALLISON. Hop extract sells for $1 a pound.

Mr. VEST. Is there any estimate in the comparative statement as to hop extract and lupulin?

Mr. ALLISON. I have a memorandum here covering the cost. Hop extract sells for $1 per pound.

Mr. VEST. Is there anything in the comparative statement about it?

Mr. ALLISON. No. Hop lupulin is the hops treated so as to get out all there is in the hops, so that a pound of lupulin is equal to about 4 pounds of hops.

Mr. VEST. What are these articles used for?

Mr. ALLISON. For the same purposes that hops are used for.

Mr. GALLINGER. And for medicinal purposes.

Mr. ALLISON. And for medicinal purposes as well. They are simply the value of the hops extracted and put in a small compass.

Mr. WHITE. The Senator says they are used for medicinal purposes?

Mr. GALLINGER. They are.

Mr. WHITE. Would they not then come under the general medicinal preparation classification?

Mr. ALLISON. I suppose they would. We propose to make the duty 50 per cent ad valorem.

Mr. WHITE. Are they used for anything except medicinal purposes?

Mr. ALLISON. They are used for the same purposes in brewing that hops are and for all purposes for which hops are used. Of course, if hops are made into extracts in this way, they would get a much lower rate than is provided for here, unless we make an ad valorem rate.

Mr. GRAY. What is the revenue to be produced?

Mr. ALLISON. It is not very large.

Mr. GRAY. It is not a revenue measure?

Mr. ALLISON. Certainly; absolutely so. It is with a view of securing the revenue both from hops and the extract of hops that the amendment is proposed.

Mr. GRAY. I understood the Senator first answered that there would be very little revenue.

Mr. ALLISON. Very little revenue compared with the revenue from articles largely imported. Of course hops is not a very large article of importation.

Mr. WHITE. Are there any statistics giving the amount imported into this country either of hop extract or lupulin?

Mr. ALLISON. It is impossible to give the figures, because the articles come now under the basket clause of the tariff act. I think there ought to be no objection to this amendment.

Mr. GRAY. It strikes me that before the amendment is voted on we ought to understand whether this tax will not be a serious burden upon an article which, according to the Senator from New Hampshire [Mr. GALLINGER], is a medicinal preparation; and I can understand that it is used as a tonic for invalids, and especially in hospitals, and that there must be some really very weighty reason why we should burden that class of our people with this additional tax. I think that all such tonics and nutritives should be on the free list, unless there is some good reason to the contrary.

Mr. ALLISON. I do not think this article is used very largely for medicinal purposes.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The reading of the bill was resumed, beginning at paragraph 247, as follows:

247. Onions, 40 cents per bushel.

Mr. VEST. I move to strike out "forty" and insert "thirty;" so as to read, "30 cents per bushel," which is the existing law.

I wish to say a word, but without any hope of changing the result. It is due to the current history of tariff, I think, that it should be stated. We exported of the ordinary American onion $61,000 worth, and we imported largely more than that of Bermuda onions, but the Bermuda onion, as will be seen by the testimony before the Ways and Means Committee, does not at all compete with the onion of the United States. It is an entirely different species of the same genus, and it comes at a time when we produce no onions in this country, even under the hothouse system. The Bermuda onion comes to the United States in January, and from that on until March, and as soon as the American crop comes into the market, the Bermuda onion is not imported here at all and ceases to be a competitor.

Now, the effect of this provision doubling the duty over existing taxation on this vegetable is simply to make those persons who, after a long, hard winter, and especially in the Northern States, desire some vegetable to relieve the natural craving of the stomach and appetite for some vegetable or fruit, pay twice as much as they do now in the shape of taxation. I believe it is an admitted fact by experts in hygiene—naval, military, civilian—that no vegetable is equal to the onion in its beneficent effects on the human system. I heard General Hardee, who, whatever might have been his position in the war, was recognized as the finest hygienic authority in the world, admitted all over Europe to be so, declare once that if you would give him a sufficient supply of onions on shipboard or in the army, he would pledge his life that scurvy would never appear.

When our troops were in front of Atlanta, and, on account of defending in the trenches without moving, were exposed to scurvy and all the diseases incident to the want of exercise and insufficient food, the farmers of Georgia called upon General Hardee, through their representative men, and asked him what they should bring to relieve the army. He said "Onions, onions;" and they were brought there, as many Senators around me know, in great wagonloads, dumped down in the trenches, and the men ate them, oftentimes without salt. The army was healthy, as healthy as any army that could be found, considering the position in which it was placed.

Now, why should we put a double duty on this vegetable, which does not compete with those grown in the United States, which are absolutely necessary at the time of the year when they come in? I leave the matter to the Senate.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Missouri.

The amendment was rejected.

The VICE-PRESIDENT. The committee amendment will be stated.

The SECRETARY. After the word "bushel," in paragraph 247, line 5, page 72, it is proposed to strike out "garlic, 1 cent per pound."

Mr. ALLISON. On behalf of the majority of the committee, I withdraw the committee amendment.

The VICE-PRESIDENT. The committee amendment will be considered as withdrawn.

Mr. ALLISON. Now I move to amend the bill by inserting before the words "one cent" the words "three-fourths of;" so as to read, "garlic, three-fourths of 1 cent per pound."

Mr. JONES of Arkansas. I hope the Senate will stand by the committee in its first recommendation.

Mr. VEST. The amendment puts back, I understand, a duty of three-quarters of a cent a pound on garlic.

Mr. ALLISON. Three-quarters of a cent. I understand we can produce garlic in this country very largely.

Mr. VEST. Why do you put this duty on, then?

Mr. ALLISON. I do not think it will do any harm. It is a small provision.

Mr. VEST. If, as the Senator says, we can produce plenty of garlic in this country, why do you want to put three-fourths of a cent protective duty on it? I am afraid to continue the discussion, however, for fear the Senator from Iowa will put it back to 1 cent a pound, like the old preacher who said, "Blessed are ye who expect nothing, for ye shall not be disappointed."

The VICE-PRESIDENT. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 248, line 9, page 72, after the word "dried," to insert "20 cents per bushel;" so as to make the paragraph read:

248. Pease, green, in bulk or in barrels, sacks, or similar packages, 40 cents per bushel of 60 pounds; pease, dried, 20 cents per bushel; split pease, 50 cents per bushel of 60 pounds; pease in cartons, papers, or other small packages, 1 cent per pound.

Mr. ALLISON. I desire to modify the amendment. In line 8 I move to strike out "forty" and insert "thirty;" in line 9 I move to strike out "twenty" and insert "thirty;" in line 10 I move to strike out "fifty" and insert "forty."

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. It is proposed in line 8 to strike out "forty" and insert "thirty;" in line 9 to strike out "twenty" and insert "thirty;" and in line 10 to strike out "fifty" and insert "forty;" so as to make the paragraph read:

248. Pease, green, in bulk or in barrels, sacks, or similar packages, 30 cents per bushel of 60 pounds; pease, dried, 30 cents per bushel; split pease, 40 cents per bushel of 60 pounds; pease in cartons, papers, or other small packages, 1 cent per pound.

Mr. VEST. I should like to inquire of the Senator from Iowa what is the duty in the existing law upon pease, green, in bulk or in barrels, sacks, or similar packages. I have it marked free. I move to strike out all of paragraph 248 down to and including the word "pounds," in line 8, for the purpose of placing those articles, pease, green, in bulk, etc., on the free list, where they are now.

I call attention to the fact that by the comparative statement of exports and imports we exported, in 1896, $632,000 worth of pease and beans and imported $297,000 worth, being about three times as many exported as imported; and yet we take this article off the free list and propose to put upon it the high duty of 40 cents, I believe reduced now to 30 cents, under the amendment. I move to strike out the lines I have indicated, so as to leave the article where it is now.

The VICE-PRESIDENT. In order to perfect the text first, the amendment of the committee is in order. The question is on agreeing to the amendment of the Committee on Finance as modified.

The amendment as modified was agreed to.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the Senator from Missouri, to strike out what will be read.

The Secretary read as follows:

Pease, green, in bulk or in barrels, sacks, or similar packages, 30 cents per bushel of 60 pounds.

The amendment was rejected.

Mr. ALLISON. I move to insert a new paragraph after line 12, to be called paragraph 248½.

The SECRETARY. It is proposed to insert as a new paragraph the following:

248½. Orchids, palms, dracœnas, crotons, and azaleas, 30 per cent ad valorem. Tulips, hyacinths, narcissi, jonquils, lilies, lilies of the valley, and all other bulbs, bulbous roots, or corms which are cultivated for their flowers, 30 per cent ad valorem. Natural flowers of all kinds, preserved or fresh, suitable for decorative purposes, 30 per cent ad valorem.

Mr. VEST. I promised myself not to consume any time unless compelled to do it. This is a case of compulsion. I am bound to say, with great respect, that the proposed amendment is an outrage. That we should change the existing law and put a duty now upon these flowers in their natural condition, or preserved and brought in here to decorate our homes or to adorn the dead, is an outrage, in my judgment. It is intended for but one purpose, and that is to enable a lot of nurserymen in this country to charge the people of the United States more for their products. You can not obtain from one of these nurseries an ordinary rose for less than 15 or 25 cents, and some of them are as high as a dollar. They have now, I believe, forty-four different varieties of roses, and the price goes up until a man of ordinary means is guilty of criminal extravagance if he buys even one of them. Go down here and try to buy one of the American Beauties or Jack roses.

I saw some the other day, and, attracted by their beauty, I went in and priced them. They were $2.50 a dozen. I contented myself by smelling one and walking out. What next will be taxed? The air we breathe? If our Republican friends could find some sort of new invention to seize the atmosphere, they would not only tax the whole of it in the concrete, but tax the nitrogen and the oxygen.

Mr. GRAY. The raw materials.

Mr. VEST. The raw materials. They have taxed everything, and now the flower that adorns the humble home of the poor man, brightens the sick chamber, or goes upon the coffin of our dead is to be put up by this enormous duty to enable the nurserymen in the United States to rob and plunder, for that is the whole meaning of it in plain English. I hope the Senate will vote the amendment down, but it is a faint hope.

Mr. ALLISON. I do not wish to occupy time. Under the act of 1894, the existing law, the great necessity of life known as orchids, which are found in every poor man's home in great quantities, and lilies of the valley are already taxed 10 per cent. The Senator from Missouri four years ago did not observe the absolute importance of these things to the poor man's home.

Mr. VEST. Let me interrupt the Senator from Iowa. He ought to be fair. Is there anything in the act of 1894 that taxes natural flowers?

Mr. ALLISON. Let me read the act:

Orchids—

Mr. VEST. Oh, yes.

Mr. ALLISON—

lilies of the valley, azaleas, palms, and other plants used for forcing under glass for cut flowers—

Mr. VEST. Yes.

Mr. ALLISON—

or decorative purposes, 10 per cent ad valorem.

Mr. VEST. That is right.

Mr. ALLISON. We have increased it only slightly.

Mr. VEST. You have now extended it to all natural flowers—a violet or a rose.

Mr. ALLISON. Used for the same purpose.

Mr. VEST. It applies to any fresh flowers that coure in. There is no such provision in the act of 1894.

Mr. ALLISON. Let the amendment be read, and we will see how many are incorporated in it that are not found in the act of 1894.

The Secretary again read the amendment.

Mr. ALLISON. We have substantially included the same articles put in the act of 1894——

Mr. VEST. No; I beg pardon.

Mr. ALLISON. Except under the stress of revenue we have increased the ad valorem. I hope the Senator from Missouri will not make any further objection to it.

Mr. VEST. The Senator from Iowa and I ought to deal with each other frankly. We have known each other a long time, and have served here together a long time. Does he mean to say that he has not put into this item anything except what is in the act of 1894?

Mr. ALLISON. We have put in some other things of like character, but only two or three others.

Mr. VEST. You include bulbs of all sorts.

Mr. ALLISON. Those of like character; similar things.

Mr. GRAY. How about daisies.

Mr. ALLISON. We do not include daisies. They are of domestic growth.

Mr. VEST. I have not a copy of the act of 1894 before me.

Mr. WHITE. I have it.

Mr. VEST. Will the Senator read it?

Mr. WHITE. The act of 1894 in this respect reads as follows:

Orchids, lily of the valley, azaleas, palms, and other plants used for forcing under glass for cut flowers or decorative purposes, 10 per cent ad valorem.

Mr. VEST. Is that all?

Mr. WHITE. Yes; that is all.

Mr. VEST. Here is the way the amendment reads:

Orchids, palms, dracœnas, crotons, and azaleas, 30 per cent ad valorem. Tulips, hyacinths, narcissi, jonquils, lilies, lilies of the valley, and all other bulbs, bulbous roots, or corms which are cultivated for their flowers, 30 per cent ad valorem.

Then follows a provision which never was heard of before:

Natural flowers—

Natural flowers—

of all kinds, preserved or fresh, suitable for decorative purposes, 30 per cent ad valorem.

I am not able to give the information which my friend the Senator from Texas [Mr. MILLS] asks, whether the amendment includes dog's fennel and Jamestown weed.

Mr. ALLISON. I will answer the Senator that it does not.

Mr. VEST. It must include Jamestown weed, because that has a flower, and a very beautiful one.

Mr. ALLISON. It would only be included where it is used for decorative purposes in some great city house.

Mr. VEST. I have seen Jamestown weed used for decorative purposes, and it is a very beautiful flower.

I am fully justified, comparing the act of 1894 and the proposed amendment, in stating that this is an entire innovation, and was never before heard of in a tariff measure.

Mr. ALLISON. Only a word more. We found in the existing law these flowers used for purposes of luxury bearing a duty of 10 per cent ad valorem. If people go to the pains of importing flowers expensive in their character for purposes of adornment and luxury, why should they not pay a little revenue? That is all there is about it.

Mr. JONES of Arkansas. I should like to ask the Senator from Iowa a question in this connection. I am perfectly willing to put a tax, and I do not object to putting an increased tax, on high-grade flowers, such as orchids and some of the others with unpronounceable names that follow here, of which I never heard and do not know anything about, but in the second paragraph the majority have added a class of flowers on which I respectfully submit to the Senate it is not right to have this enormous tax imposed. I refer to tulips, hyacinths, narcissi, jonquils, lilies, lilies of the valley, flowers that are found in every home in the United States, and there is not ten square feet of unoccupied territory in the United States scarcely, before any man's cabin, that has not some of these flowers in it. They are everywhere. They are of universal use, and it seems to me there is no reason

why people should not have these flowers which are in common use everywhere.

Is it a crime that the people of the United States desire to have something that is beautiful for their children, something that will make their homes attractive, something that will add a charm to the cabin, and something which the children of the poor raise in this country?

Mr. PLATT of Connecticut. Will the Senator allow me to ask him a question?

Mr. JONES of Arkansas. Certainly.

Mr. PLATT of Connecticut. Does the Senator think that putting a duty on those flowers when they are imported will prevent the poor people in this country from having them in their gardens?

Mr. JONES of Arkansas. The finest class of hyacinths and tulips are imported from abroad. The climate is better in Holland than anywhere else for the production of these bulbs. You can not find any such high-grade bulbs for hyacinths and tulips as you get from abroad. The people of this country are entitled to have in front of their cabins as high-class flowers and as beautiful flowers as grow on the face of God's green earth.

The poor of this country ought to be allowed to have these flowers, which are surpassingly beautiful. We all admired them in our childhood, and we have admired them ever since. There is no sense, there is no justification, there is no apology, it seems to me, in undertaking to levy a tax upon this article of almost universal use all over this country. I protest against it, Mr. President. I hope that the Senate will not agree to this amendment.

I move to amend the amendment as offered by the Senator from Iowa by striking out the words "tulips, hyacinths, narcissi, jonquils, lilies, lilies of the valley, and all other bulbs, bulbous roots, or corms."

Mr. VEST. And "natural flowers."

Mr. JONES of Arkansas. And "natural flowers." I move to strike out that clause.

The PRESIDING OFFICER (Mr. GALLINGER in the chair). The proposed amendment to the amendment will be stated.

The SECRETARY. It is proposed to strike out of the amendment the following words:

Tulips, hyacinths, narcissi, jonquils, lilies, lilies of the valley, and all other bulbs, bulbous roots, or corms which are cultivated for their flowers, 30 per cent ad valorem. Natural flowers of all kinds, preserved or fresh, suitable for decorative purposes, 30 per cent ad valorem.

Mr. JONES of Arkansas. I ask for the yeas and nays on agreeing to my amendment to the amendment.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. CLAY (when his name was called). I transfer my pair with the junior Senator from Massachusetts [Mr. LODGE] to the Senator from New Jersey [Mr. SMITH], and vote "yea."

Mr. FAULKNER (when his name was called). I am paired with the Senator from West Virginia [Mr. ELKINS]. If he were present, I should vote "yea."

Mr. GEAR (when his name was called). I transfer my pair with the senior Senator from New Jersey [Mr. SMITH] to the junior Senator from Massachusetts [Mr. LODGE], and vote "nay."

Mr. WELLINGTON (when his name was called). I announce my pair with the junior Senator from North Carolina [Mr. BUTLER].

The roll call was concluded.

Mr. BURROWS. I am paired with the senior Senator from Louisiana [Mr. CAFFERY]. If there be no objection, I will transfer that pair for the day to the Senator from Nevada [Mr. JONES]. I vote "nay."

Mr. DANIEL. I am paired with the Senator from North Dakota [Mr. HANSBROUGH]. If he were present, I should vote "yea."

The result was announced—yeas 25, nays 33; as follows:

YEAS—25.

Bacon,	Harris, Tenn.	Morgan,	Turpie,
Bate,	Jones, Ark.	Murphy,	Vest,
Berry,	Kenney,	Pasco,	Walthall,
Chilton,	McLaurin,	Pettus,	White.

So the amendment to the amendment was rejected.

The PRESIDING OFFICER. The question recurs on agreeing to the amendment submitted by the Senator from Iowa.

The amendment was agreed to.

The next amendment of the Committee on Finance was, in paragraph 249, page 72, line 17, after the word "less," to insert "and evergreen seedlings;" and in line 25, after the word "stock," to strike out "unless otherwise specified, thirty" and insert "not specially provided for in this act, twenty-five;" so as to make the paragraph read:

249. Stocks, cuttings or seedlings of Myrobolan plum, Mahaleb or Mazzard cherry, 3 years old or less, $1 per thousand plants; stocks, cuttings or seedlings of pear, apple, quince and the St. Julien plum, 3 years old or less, and evergreen seedlings, $1.75 per thousand plants; rose plants, budded, grafted, or grown on their own roots, 3 cents each; stocks, cuttings and seedlings of all fruit and ornamental trees, deciduous and evergreen, shrubs and vines, manetti, multiflora, and brier rose, and all trees, shrubs, plants and vines, commonly known as nursery stock, not specially provided for in this act, 25 per cent ad valorem.

Mr. ALLISON. I desire to call the attention of the Senator from Arkansas and the Senator from Missouri to amendments that I propose in behalf of the majority of the committee in this paragraph, modifying the amendments already reported.

In line 15 I move to strike out "one dollar" and insert "50 cents;" after the word "plants," in the same line, to add "and 15 per cent ad valorem;" and in line 18 to strike out "and 75 cents" and insert, after the word "plants," "and 15 per cent ad valorem."

Mr. VEST. What does 15 per cent amount to in each case? This is a new section, and therefore I have not any data upon which to calculate.

Mr. ALLISON. Yes; it is a new section. There are no data from the old law.

Mr. VEST. There are no data on which to calculate the percentage, and that is the reason why I ask.

Mr. ALLISON. Also, in line 20, I move to strike out "3 cents" and insert "2½ cents." I ask the Secretary to read the paragraph as it would be if amended as I propose.

The SECRETARY. If amended as proposed, paragraph 249 would read:

249. Stocks, cuttings, or seedlings of Myrobolan plum, Mahaleb or Mazzard cherry, 3 years old or less, 50 cents per thousand plants and 15 per cent ad valorem; stocks, cuttings, or seedlings of pear, apple, quince, and the St. Julien plum, 3 years old or less, and evergreen seedlings, $1 per thousand plants and 15 per cent ad valorem; rose plants, budded, grafted, or grown on their own roots, 2½ cents each; stocks, cuttings, and seedlings of all fruit and ornamental trees, deciduous and evergreen, shrubs and vines, manetti, multiflora, and brier rose, and all trees, shrubs, plants, and vines commonly known as nursery stock, not specially provided for in this act, 25 per cent ad valorem.

Mr. VEST. Will the Senator from Iowa be kind enough to tell us what the per cent amounts to, because we have not the unit of value? He strikes out half of the specific and inserts 15 per cent ad valorem. What is 15 per cent ad valorem equivalent to?

Mr. ALLISON. Of course it is impossible, owing to the variety of prices of these articles, to estimate more than an average ad valorem. It is our purpose, as near as may be, to make an average of about 30 per cent ad valorem. Of course it may be, and probably will be, larger upon some of the very cheap importations.

Mr. VEST. Now, I should like to ask the Senator another question. I confess that that reply is not exactly satisfactory. I would like to know whether we have an increase or a decrease by his amendment. I should like to know why stocks of the Mahaleb or Mazzard cherry, three years old or less, are put in with a specific tax upon them. I never heard of that cherry before, and I do not know what it is.

Mr. ALLISON. We are told that it is a very fine variety of cherry; that they are imported by the thousand, and that the duty ought to be a specific value, with a view——

Mr. VEST. To keep it out?

Mr. ALLISON. No; with a view to collect a real duty rather than a nominal duty. So we have provided for a compound duty here instead of a wholly ad valorem or wholly specific duty.

Mr. VEST. I should like to ask my friend frankly, confidentially, for the use of the Senate, whether this rate of duty was not suggested on that specific article by some nurseryman who did not want this Canadian cherry tree to come in here and compete with the cherry trees that he is selling. It never has appeared in any tariff bill before.

Mr. ALLISON. I have no doubt it was suggested by nurserymen and others. We have suggestions coming all the time from people who are familiar with the subjects, and nurserymen are familiar with this subject.

Mr. WHITE. There is one word in this paragraph that is new to me. I am not very well versed in such matters. What is meant by "manetti" in this connection?

Mr. ALLISON. Manetti vine?

Mr. WHITE. After vines, "manetti." Then follows "multiflora."

Mr. ALLISON. I suppose it is an Italian plant. I do not know what it is. I will say to my friend from Missouri I think there

is no trouble about this rate. The probability is that on some of these low-priced seedlings the ad valorem, if properly collected, will be more than 30 per cent, and on many of them it will be less. Therefore we make a compound duty so as to equalize matters between the high-priced and the lower priced article.

Mr. PLATT of Connecticut. I think I can answer the inquiry of the Senator from California.

Mr. ALLISON. I hope the Senator can, because he desires to know.

Mr. PLATT of Connecticut. As I understand, it is the wild-rose stock, imported for the purpose of grafting old ones upon.

Mr. VEST. Mr. President——

Mr. PETTUS. I merely wish to offer an amendment, if the Senator from Missouri will allow me to interrupt him.

Mr. VEST. I yield with pleasure.

Mr. PETTUS. I beg leave to offer an amendment to the sugar schedule, and I ask that it be printed and lie on the table.

Mr. VEST. I should like to hear it read.

Mr. PETTUS. Let it be read.

The PRESIDING OFFICER. The amendment will be read.

The Secretary read as follows:

Amendment proposed by Mr. PETTUS to House bill No. 379.

The importations into the United States from any foreign country of sugar, or of any material of which sugar can be made, by or for any trust, combination, or conspiracy, existing or hereafter formed between two or more persons or corporations, intended to operate in restraint of lawful trade, or to hinder or restrain free competition, or to increase the market price of sugar in any part of the United States, is hereby declared to be unlawful, and such sugar and such material so imported into the United States shall be forfeited to the United States.

And it shall be the duty of the Attorney-General of the United States to cause proceedings to be instituted and prosecuted to enforce such forfeitures, and to enforce all other laws of the United States intended to prevent or suppress unlawful trusts, combinations, or conspiracies for the restraint of trade or free competition.

And the Attorney-General of the United States will report each year to the Congress of the United States concerning such proceedings so instituted and prosecuted.

Mr. HOAR. I desire to ask the Chair to give direction that the amendment be printed immediately, so that it can be returned from the printers for the use of Senators forthwith.

The PRESIDING OFFICER. That order will be made. The Senator from Missouri will proceed.

Mr. VEST. Under the Wilson bill as it came from the House there was as a duty upon "plants, trees, shrubs, and vines of all kinds commonly known as nursery stock, not specially provided for in this act," 20 per cent ad valorem. I think it was upon my motion in 1894 that all nursery stock was stricken out of the dutiable list and put in the free list as paragraph 587.

Unavailing as it will be, of course, I simply want to remark that it seems to me this is a violation of all the rules that should govern a civilized country in regard to the articles that are to be used for the benefit of their people. I have always understood that it was the highest duty of every government to furnish its people with the instrumentalities for improvement in agriculture, manufactures, and commerce. It was one of the crowning glories, in my opinion, of Thomas Jefferson, that while he was minister to France from this country, and viewing the great drama of the French Revolution, the fall of the Bastile, the execution of the King and Queen of France, he never for one instant ceased to export by sailing vessels to the United States all sorts of foreign plants and bulbs in order to improve the agriculture of the people of this country.

One significant episode in his life is that he became greatly interested in the culture of rice, which was then just in its incipiency in the Carolinas. He went over Europe incognito, crossed the Alps into Italy, after going through southern France, and found in one of the provinces or districts of Italy a very superior article of rice. He was not able to secure any of it for export because the laws of Italy prohibited its exportation, and it is said that the author of the Declaration of Independence filled the pockets of his Virginia overcoat—the old-fashioned Virginia coat, with capes to it, which our grandfathers wore—with this rice, and, to use plain language, smuggled it out of the country. The end justified the means, possibly. He carried it to Paris, put it in small packages of five and ten grains, and sent it to Charleston, S. C., and that was the basis of the South Carolina rice, the finest now in the world. I have always, as a Democrat and follower of Mr. Jefferson, boasted of his care for agriculture and his zeal in sending to this country European plants of every description that might help the people of the United States, both in articles of necessity and even of decoration.

Here the whole system is reversed. A lot of nurserymen, to speak plainly, have gone before the controlling influence of the Finance Committee and shut out by enormous taxation superior trees, shrubs, and flowers that come from Canada and from abroad. They have absolutely now, for the first time (and I have been somewhat familiar with tariff bills in the last twelve or eighteen years), singled out specifically competing products like this cherry, and they have had such a duty put upon it as they know will exclude it from competition with them; and the people of this country are to be made to use the cherries and plant the cherry trees that these gentlemen have on hand and in the market. If that is not protection run mad, I do not know what a financial and economic lunatic asylum is. They have absolutely selected a particular cherry tree and put an enormous duty upon it. If that is not class legislation I should like to have some gentleman on the other side tell me what is.

I do not know what this cherry is. I have been under the impression, from observation and experience, that the finest cherries in the world are raised in the United States. I have never tasted any such cherries elsewhere. It is said that they have cherries equal to them in France, but I have never seen them. The cherry of Washington and Oregon is the finest fruit, in my opinion, that was ever put in the mouth of mortal man. After eating them, which you can do in any quantity without any injury to your health, I have always thought if it had been a cherry in the Garden of Eden, instead of an apple, I would have gone very far toward excusing Adam for taking a bite. But it seems these gentlemen have discovered that there is a cherry in Canada which must be kept out of this country, and instead of having these improved fruit trees cultivated in the United States, in the Middle and Northern States particularly, they are to be excluded by an enormous taxation, whereas they are now upon the free list.

Mr. GEAR. May I make a suggestion to the Senator from Missouri?

Mr. VEST. Of course.

Mr. GEAR. The Mahaleb cherry is the stock. I do not recollect the cherry called the Mahaleb, but it is the stock on which cherries are grafted.

Mr. VEST. I do not know, but I am as certain as I am that I am speaking in the Senate of the United States that some nurseryman had a job when he had that put in. It was not done by accident, and it was no rhetorical exhibition. There is money at the bottom of it. They never would have picked out this particular cherry tree and put this enormous duty on it except to answer their own purposes. The Senator from Iowa very frankly tells us that he presumes that it was done by some nurseryman. And it is for the benefit of the people of this entire country!

Mr. President, I speak with some feeling about excluding fruit trees. I come from a State where fruit is the greatest possible luxury. The farmer upon the prairie, after the long, hard winter and the struggle with all the opposing forces of nature, appreciates fruit more than anything else—fruit and fish. I shall never vote to exclude from this country any article that goes to add to the comfort of the home of the Western pioneers who have blazed the pathway of civilization against all the rigors of nature, some of them with the ax in one hand and the rifle in the other.

There is no justification for this sort of legislation. We have now in the Treasury of the United States, I see by to-day's statement, more than $131,000,000 of surplus revenue. I should like to hear from some Senator who believes that the taxing power of the Government should be confined to the actual necessities of the Government economically administered what sort of excuse he finds for voting additional taxes, when the bill as it stands will produce $50,000,000 surplus every year. And yet the majority of the Finance Committee, not content with the bill as it is, are now putting in amendments at every stage increasing taxation, and increasing it upon articles which, I say, upon every principle of civilization and humanity, should be permitted to come to this country free.

The PRESIDING OFFICER. The proposed amendments will be separately stated.

Mr. VEST. I shall move to strike out the whole paragraph, with the view of putting the articles contained therein on the free list, but first let the changes proposed by the committee be acted upon.

The SECRETARY. In paragraph 249, on page 72, line 15, after the word "less," the committee propose to strike out "one dollar" and insert "50 cents;" and after the word "plants," in the same line, to insert "and 15 per cent ad valorem."

The amendment was agreed to.

The next amendment was, in line 17, after the word "less," to insert "and evergreen seedlings."

The amendment was agreed to.

The next amendment was, after the words "one dollar," in line 18, to strike out "and 75 cents."

The amendment was agreed to.

The next amendment was, after the word "plants," in line 19, to insert "and 15 per cent ad valorem."

The amendment was agreed to.

The next amendment was, in line 20, before the word "cents," to strike out "three" and insert "two and one-half."

The amendment was agreed to.

The next amendment was, after the words "nursery stock," in line 25, to strike out "unless otherwise specified, thirty" and insert "not specially provided for in this act, twenty-five."

The amendment was agreed to.

The PRESIDING OFFICER. The committee amendments to the paragraph having been agreed to, the Chair will call the attention of the Senator from Missouri, as he indicated a desire to offer an amendment.

Mr. VEST. I now submit my motion to strike out the whole paragraph as amended, for the purpose of putting all these articles on the free list.

The PRESIDING OFFICER. The question is on the amendment of the Senator from Missouri [Mr. VEST] to strike out paragraph 249 as amended.

The amendment was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, on page 73, line 3, paragraph 250, after the word "potatoes," to strike out "twenty-five" and insert "twenty;" so as to read:

250. Potatoes, 20 cents per bushel of 60 pounds.

Mr. ALLISON. On behalf of the majority of the Finance Committee I withdraw the amendment.

The PRESIDING OFFICER. The amendment proposed by the committee striking out the paragraph will be regarded as disagreed to.

Mr. JONES of Arkansas. I move to strike out "twenty-five" and insert "fifteen." I should not have made that motion if the majority of the committee had stood by its own recommendation; but as we reach each one of these proposed modifications of the high rates as they appear in the Dingley bill the committee seems inclined to give way on all of them and to cause us to abandon the hope that we had that there was to be some reduction in the rates of taxation as proposed by the original Dingley bill. I therefore move to strike out "25 cents" and insert "15 cents," which is the rate in the present law.

The PRESIDING OFFICER. The amendment of the Senator from Arkansas will be stated.

The SECRETARY. In paragraph 250, page 73, line 3, before the word "cents," it is proposed to strike out "twenty-five" and insert "fifteen;" so as to read:

250. Potatoes, 15 cents per bushel of 60 pounds.

Mr. VEST. Mr. President, this is another case like that of onions. The imported potatoes do not come in competition with the potatoes of the United States. The Bermuda potatoes come into this country in the winter market. The importation commences about January and closes in March, or possibly in April, when the new potatoes in the United States come into market, and there is no further importation or competition on the part of the Bermuda potato.

Now we come to the next proposition, as I understand it to be, in the platform of the Republican party as to this bill—the question of revenue. There is no protection. The market reports show and all the testimony conclusively establishes that under the McKinley law, when the duty was 25 cents per bushel, in 1893 we collected on imported potatoes $127,588; under the Wilson Act, after we had reduced the duty from 25 to 15 cents a bushel, in 1896 we collected $371,485; in other words, the amount of revenue increased over three times under the lower rate. Now we are asked to go back to the McKinley rate of 25 cents a bushel. As a matter of course, it will result in a diminution of revenue, and the motion made by my colleague on the committee ought to be sustained.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from Arkansas [Mr. JONES].

The amendment was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 251, page 73, line 8, before the word "cents," to strike out "thirty" and insert "twenty-five;" and in line 14, before the words "per centum," to strike out "forty" and insert "twenty-five;" so as to make the paragraph read:

251. Seeds: Castor beans or seeds, 25 cents per bushel of 50 pounds; flaxseed or linseed and other oil seeds, not specially provided for in this act, 25 cents per bushel of 56 pounds; poppy seed, 15 cents per bushel; but no drawback shall be allowed upon oil cake made from imported seed, nor shall any allowance be made for dirt or other impurities in any seed; seeds of all kinds not specially provided for in this act, 25 per cent ad valorem.

The amendment was agreed to.

Mr. HAWLEY. May I inquire how far the bill has been read?

The PRESIDING OFFICER. The Chair will state that the bill has been read and acted upon to the end of paragraph 251.

Mr. HAWLEY. I was listening and waiting for an opportunity to make a suggestion on that. I did not know that it had been passed.

The PRESIDING OFFICER. The Senator will be recognized for that purpose.

Mr. HAWLEY. My attention has been particularly directed to lines 13, 14, and 15 of paragraph 251, "seeds of all kinds not specially provided for in this act, 25 per cent ad valorem," instead of 40 per cent ad valorem, as the House bill had it. Several Senators are very largely interested in this matter, and one of them, now absent, intended to make the request that this should lie over; but I can not, in justice to myself and with due regard to the desires of many constituents, permit even this opportunity to pass without addressing a few remarks to the subcommittee of the Committee on Finance, entreating their favorable action.

There are among my constituents a large number of men who have been for many years in the seed business. The name upon their packages is worth a dividend to them. Nothing ever went from their gardens that was not what it purported to be. They are distressed very much by the abundant importation of seeds from abroad bearing names not known, or, if known, not respected here, which seeds are dumped upon us, are not pure and true, but are dirty and false, and are a great injury to the legitimate trade. As to the duty, when a man brings in worthless seed, it does not trouble him much to tell a lie about their value when you come to put 25 per cent ad valorem upon them. I want that returned to 40 per cent, as the House put it, to say the least. I concur with several Senators, who wish this to go over for the present for further consideration.

The PRESIDING OFFICER. Without objection, the vote adopting the last amendment, making the change to 25, will be regarded as reconsidered.

Mr. LINDSAY. In connection with what has been said by the Senator from Connecticut [Mr. HAWLEY], I call the attention of the committee to the fact, evidenced by certain papers now here in the hands of the Committee on Agriculture and Forestry, that there is a certain Canadian seed, called the Canadian blue-grass seed, which is imported into this country for use in New England, and nowhere else, and that portion not used in New England is used for the purpose of being mixed with the true American blue-grass seed, it being worth about one-fourth as much, and American blue-grass seed has been put under the ban of suspicion everywhere by reason of the admixture. This seed which is grown in Canada—and we object to everything that comes from Canada—which is used only for the purpose of being mixed with an American product in order to render the American product less valuable, is put by this bill on the free list.

I ask the Senator when he is considering New England that he also consider the fact that seed which is not common to New England goes on the free list, and therefore 25 per cent ought to satisfy him in regard to New England seed.

Mr. HAWLEY. Though not comprehending the Senator's advice, I am obliged to him for his information. To use the language of Dick Swiveller, this whole trade is full of "various games of that sort." Of course seed imported under the circumstances referred to by the Senator ought to be stricken from the free list, and ought to go in with the others and pay at least 40 per cent duty.

Mr. JONES of Arkansas. Before that paragraph is left, I should like to say, in connection with what the Senator from Connecticut [Mr. HAWLEY] has just said, that I believe with him that in the seed business the name is perhaps of more value than in any other business, except perhaps the jewelry business. I believe a good name in the seed business is equal to a dividend as a rule. I do not believe that seeds brought here from abroad and dumped on the market are likely to do harm, coming even in the way suggested, by reason of the fact that ordinarily I believe nine men out of ten, if not ninety-nine out of one hundred, will buy seeds of seed growers whose names are established and have been well known for years.

For instance, Landreth & Sons, of Philadelphia, have been seed growers for more than a century. I confess I was astonished to get a pamphlet from that concern, saying that they had been connected with the seed business from 1784 up to this time, that from 1784 to 1861 there had been no tariff on seeds, and that the tariff on seeds was first 10 per cent, then 20 per cent, then 30 per cent, and now, for the first time in the history of this infant, which is 113 years old, in the hands of this one concern, the House proposes a tax of 40 per cent ad valorem, and the Senator from Connecticut wants that tax imposed. I believe that the character of these men is sufficient to guarantee the sale of their seeds everywhere, and that no unknown and untried seedsmen can sell seed in competition with such firms as that of Landreth & Sons.

Mr. HAWLEY. The infant industry in this case is the fraud. The old industry was honestly conducted. I have the honor of having known Mr. Landreth very well for twenty-five years, and he asks exactly what I ask, that frauds of that kind may be obstructed.

Mr. JONES of Arkansas. But the theory on which protection is asked is to protect infant industries; and where we have an establishment of this sort, of more than a century old, it seems to me that the excuse for this enormous tax is not sufficient.

Mr. HAWLEY. It is the thief that came in last night that is the infant industry, and not the honest man, and against the thief we desire reasonable protection.

The PRESIDING OFFICER. Without objection, the portion

of paragraph 251 indicated by the Senator from Connecticut [Mr. HAWLEY] will be passed over.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 252, page 73, line 16, after the word "ton," to insert "gross weight;" so as to read:

252. Straw, $1.50 per ton gross weight.

The amendment was agreed to.

Paragraph 253 was read, as follows:

253. Teazles, 30 per cent ad valorem.

Mr. JONES of Arkansas. I believe that the rate of the present tariff law is on teazles 15 per cent. The committee proposes to double it. The enormous amount of $441 worth was imported last year, and I suppose the committee propose to get rid of this $441 of revenue by taxing it out of existence. Certainly I suppose there is danger of overflowing the Treasury with the enormous amount of revenue, and so this is to be gotten rid of; otherwise I can not understand the policy of doubling the tax on teazles.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, on page 73, beginning in line 23, to strike out paragraph 255, as follows:

255. Anchovies and sardines packed in oil or otherwise, and other fish packed in oil, in tin boxes measuring not more than 5 inches long, 4 inches wide, and 3½ inches deep, 10 cents per box; in boxes measuring not more than 5 inches long, 4 inches wide, and 1½ inches deep, 5 cents per box; in boxes measuring not more than 4½ inches long, 3½ inches wide, and 1½ inches deep, 2½ cents per box; when imported in any other form, 40 per cent ad valorem; fish in cans or packages made of tin or other material, not specially provided for in this act, 30 per cent ad valorem.

And in lieu thereof to insert:

255. Fish known or labeled as anchovies, sardines, sprats, brislings, sardels, or sardellen, packed in oil or otherwise, in tins, boxes, or cans, shall be dutiable as follows: In boxes or cans containing 7½ cubic inches or less, 1½ cents per box or can; containing more than 7½ and not more than 21 cubic inches, 2½ cents per box or can; containing more than 21 and not more than 33 cubic inches, 5 cents per box or can; containing more than 33 and not more than 70 cubic inches, 10 cents per box or can; if in other packages, 40 per cent ad valorem. All other fish, if in tin packages, or if in packages containing less than one-half barrel, and not specially provided for in this act, 30 per cent ad valorem.

Mr. ALLISON. I wish, on behalf of the majority of the Committee on Finance, to modify the amendment proposed by the committee in respect to this paragraph, and for convenience I have had the paragraph rewritten. I will ask the Senator from Arkansas and other Senators to pay close attention to the change of phraseology. We propose to insert "bottles and jars" with cans and other packages. Fish are imported in bottles and jars as well as in cans, etc.

There is also a modification in the last part of the paragraph, and if Senators will pay attention to the phraseology, they will see the change that is made.

The PRESIDING OFFICER. The paragraph as proposed to be modified will be stated.

The Secretary read the paragraph as proposed to be amended, as follows:

255. Fish known or labeled as anchovies, sardines, sprats, brislings, sardels, or sardellen, packed in oil or otherwise, in bottles, jars, tin boxes, or cans, shall be dutiable as follows: Containing 7½ cubic inches or less, 1½ cents per bottle, jar, box, or can; containing more than 7½ and not more than 21 cubic inches, 2½ cents per bottle, jar, box, or can; containing more than 21 and not more than 33 cubic inches, 5 cents per bottle, jar, box, or can; containing more than 33 and not more than 70 cubic inches, 10 cents per bottle, jar, box, or can; if in other packages, 40 per cent ad valorem. All other fish, except shellfish in tin packages, 30 per cent ad valorem. Fish in packages containing less than one-half barrel and not specially provided for in this act, 30 per cent ad valorem.

Mr. JONES of Arkansas. Let me ask for information, Does the proposed amendment make any modification except that it adds bottles and jars to cans and other packages? Does it change the rate?

Mr. ALLISON. That is all, except that we have modified the last part of the amendment by adding "all other fish, except shellfish, in tin packages, 30 per cent ad valorem."

Mr. JONES of Arkansas. How does that leave shellfish? What is the effect of that change? I do not quite understand it.

Mr. ALLISON. Shellfish will be on the free list.

Mr. JONES of Arkansas. As to the tax of 40 per cent on line 2, page 75, of the pending paragraph, what is that under the present law?

Mr. ALLISON. "If in other packages, 40 per cent ad valorem." I think the rate is about 40 per cent now.

Mr. JONES of Arkansas. My impression was that the other rates are about the same as those in the present law.

Mr. ALLISON. It is 40 per cent in the present law.

Mr. JONES of Arkansas. But the paragraph is constructed differently. It seems to me that the rates are about the same. Am I mistaken in that?

Mr. ALLISON. They are about the same. I do not think there is any increase in that paragraph.

Mr. VEST. I do not know the means of information open to the Senator from Iowa, but I know it is absolutely impossible for a layman, like myself, to know whether this amendment as modified or changed makes an increase or not.

I call attention to the fact that the whole scheme or system of appraising these goods is changed. I mean to say that under the existing law it is done by the linear inch—so many inches long and so many inches wide of the can or box—and here it is changed to cubic inches, and it is done by experts in the fish trade, as a matter of course, for their own purposes. I have endeavored to find out whether it was an increase or a decrease, but I have been unable to ascertain that fact from any of the experts.

In the comparative statement it is said, without the last amendment of the Senator from Iowa, that the duty is about the same; but it is an indefinite piece of information. I do not think, with the greatest respect to Senators on the other side in charge of the bill, that they know accurately whether it is an increase or not. Of course I take it that the change is made by fish dealers and importers, and that they have, as a matter of course, arranged the schedule so as to make it more difficult to import these fish to come in competition with the products which they sell.

Mr. ALLISON. These changes in phraseology were made after examination by expert appraisers, who stated to us that the effect is not to increase the duty.

Mr. VEST. There ought to be an ad valorem duty upon these fish.

Mr. ALLISON. Senators know perfectly well how reliable the experts are. I have no special knowledge as to these subjects, and we must take the reports of experts as our guide. I have never examined closely these fish in their original packages, but I have no doubt that this is an adjustment that is a wise one. I think there are one or two cases where the duty is increased from 20 per cent to 30 per cent, as I read the old statute, the existing law.

Mr. JONES of Arkansas. I am a little apprehensive that the Senator has been misled in this matter. I notice by the comparative statement submitted by the Treasury Department that these rates are given as the same as those in the existing law; and running over the matter hastily, I thought they were; but I desire to call attention to the law as it stands now, namely, fish "packed in oil, or otherwise, in tin boxes measuring not more than 5 inches long, 4 inches wide, and 3½ inches deep, 10 cents per whole box." A box 5 inches long by 4 inches wide and by 3½ inches deep would contain 70 cubic inches.

Mr. ALLISON. Would it?

Mr. JONES of Arkansas. It must necessarily. A box 5 inches long by 4 inches wide and 3½ inches deep would necessarily contain 70 cubic inches. Multiplying 5 by 4 it, would be 20; and multiplying that by 3½ would make 70. Now, the provision standing here says "in boxes or cans containing 7½ cubic inches or less, 1½ cents per box or can." A 70-inch box, then, would contain ten times as much as this, and would be dutiable under the present law at 10 cents, and under this proposed law it would be about 15 cents; which would be an increase of 50 per cent, instead of being the present rate.

My own impression was at first glance that the paragraph was about identical with the old law; but I think, on examination, that it is an increase of about 50 per cent; and that there is a larger increase in another respect. The language of the present paragraph is "containing 7½ cubic inches or less." So that if it contains only half as much, the gross tax is 1½ cents per inch, if that remains in the law.

Take the next clause in the pending paragraph:

Containing more than 7½ and not more than 21 cubic inches, 2½ cents per box or can; containing more than 21 and not more than 33 cubic inches, 5 cents per box or can.

I think the entire paragraph is an increase of something like 50 per cent over the existing law.

The PRESIDING OFFICER. The question is on agreeing to the amendment as modified.

The amendment as modified was agreed to.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 256, page 75, line 8, after the word "act," to strike out "and herring, fresh, one-half of 1 cent per pound" and insert "one-fourth of 1 cent per pound;" so as to make the paragraph read:

256. Fresh-water fish not specially provided for in this act, one-fourth of 1 cent per pound.

The amendment was agreed to.

The next amendment was to strike out paragraph 257, as follows:

257. Herring, pickled, salted, smoked, or dried, and all fish not specially provided for in this act, 1 cent per pound.

And in lieu thereof to insert:

257. Herrings, pickled or salted, one-half of 1 cent per pound; herrings, fresh, one-fourth of 1 cent per pound.

Mr. VEST. Wait a minute, Mr. President. I want to call attention to paragraph 256, in regard to "fresh-water fish not specially provided for in this act, one-fourth of 1 cent per pound."

Mr. GRAY. They ought to be free.

Mr. VEST. Under the existing law these fish come into the United States free. The total amount of fresh fish of all sorts imported in 1896 amounted to $900,000. We have 10,000 miles of seaboard, and we have in the interior of the country splendid rivers and lakes teeming with fish, and yet we are to put this duty

on, and to take this article, an article of absolute necessity as a food, from the free list and impose a duty on it in the name of either protection to American fish or else of revenue.

Here is the list of exports: Of fresh fish we exported $84,814; of dried fish, $448,286; of herring, $96,462; of mackerel, $15,692; of other fish, $104,374; of salmon, $3,348,889; of other fish, again, $167,981; of shellfish we exported $291,707, and of oysters $696,179, being in the aggregate largely above the imports that come into the United States of an article, as I have said, of prime necessity as a food; and yet we put this duty upon it and take the article off the free list either for revenue or for protection, or for both, and I am unable to see that it does either.

Mr. GRAY. Mr. President, I hope that now, even in the face of the ironbound rule of the caucus, the Senator from Iowa and the other Senators in charge of this bill will give a moment's favorable consideration to the proposition to keep these fresh fish where they are now—on the free list. There is no article of food that is more universally necessary and more universal in its use, at least on the Atlantic Seaboard and in the region of the lakes, than the fresh fish that are brought to the daily markets of the large and small cities and towns that are within reach of that industry. In these hard times, when we are told that men are starving, these times when depression and want stalk our streets, it does seem rather hard to interpose any difficulty between the masses of the people and their access to this important and absolutely necessary article of food.

Mr. ALLISON. If the Senator will allow me, if he will look at page 172 of this bill, he will find on the free list:

Fish, fresh, frozen, or packed in ice (except salmon), caught in the Great Lakes or other fresh waters by or for American fishermen or citizens of the United States.

Mr. GRAY. I see the provision is:

Fish, fresh, frozen, or packed in ice (except salmon), caught in the Great Lakes or other fresh waters.

That is better than I supposed.

Mr. VEST. What paragraph is that?

Mr. GRAY. Paragraph 535½. That, however, does not apply to fish caught on our Northern Seaboard, or where a person who happens to live on the border line of Canada comes in with a load of fish.

Mr. ALLISON. It does not apply to the Atlantic Seaboard.

Mr. GRAY. I do not know that there are many cases of the kind, but if a load of fish comes in caught by a Canadian fisherman, why should this difficulty of a tariff exaction be imposed, not upon the fishermen, but upon the people who go to market to spend their scant earnings in something that will sustain life and sustain it in a healthful and wholesome fashion?

Mr. President, the duty, as read by the Senator from Missouri, is not very great, and the reports do not show very large importations, but the duty is not the chief difficulty. The very fact that you arrest a load of fresh fish and compel it to go through the red tape of custom-house officialism destroys in large part its value, and instead of coming fresh to the tables of those who ought to be able to enjoy the bounty of the sea, they have to wait the weighing and the custom-house inspection, and if they get them at all, they get them deprived in large part of what makes them appetizing and useful.

Mr. ALLISON. This is a very light duty.

Mr. GRAY. Why should there be any duty?

Mr. ALLISON. The fish are caught in the sea by fishermen.

Mr. GRAY. Of course they are.

Mr. ALLISON. Our American fishermen are under the impression that they ought to have a little advantage.

Mr. GRAY. They have the advantage of free access to the sea, and why should not the thousands and thousands who depend upon this wholesome food have some consideration? Why should they be taxed for the benefit of fishermen who already exercise a gainful calling?

Mr. ALLISON. The Senator will remember, for it is within his recollection (I am sorry I have not the document before me), that a committee of this body, of which ex-Senator Edmunds was chairman, made an investigation as respects the effect of taking off the duty, and it was found that there was no change in the price of fish to the American consumer. It is quite a report, made, I think, in 1890; I do not remember the number. It disclosed that a small duty does not affect the price of fish at all. It is only a question as to who shall have control of the local markets as respects fish—our fishermen or the Canadian.

Mr. WHITE. I call the attention of the Senator from Iowa to what possibly may be an ambiguity in phraseology. It has been suggested by an expert. It is said, "It has always been a matter of controversy as to what constitutes fresh-water fish. Many fish are migratory, and are caught at different periods both in salt and fresh water." I desire to inquire whether the phraseology of the bill is of a character to remove that difficulty?

Mr. ALLISON. That is a difficulty. I suppose the Potomac is called a fresh-water river, and yet it empties into the sea.

Mr. WHITE. A fresh-water fish may be caught in fresh water, and the same sort of fish may be caught in salt water. Does that change the character of the duty?

Mr. ALLISON. This phraseology has been uniformly used, and I do not think there has been any difficulty.

Mr. JONES of Arkansas. There has been.

Mr. ALLISON. Does the Senator from California propose any modification?

Mr. WHITE. I have no amendment.

Mr. ALLISON. I do not think it is a serious matter.

Mr. WHITE. I thought the Senator's attention might have been directed to it before.

Mr. VEST. I wish to ask the Senator from Iowa a question. I do not exactly understand the phraseology. Paragraph 256, on page 75, reads:

Fresh-water fish not specially provided for in this act.

Paragraph 535½ of the free list is as follows:

Fish, fresh, frozen, or packed in ice (except salmon), caught in the Great Lakes or other fresh waters by or for American fishermen or citizens of the United States.

Those are on the free list. When you speak of fresh-water fish and then fish caught in the lakes, does that mean the same thing? Suppose a salt-water fish should get into the lakes?

Mr. ALLISON. It means the same thing as respects fresh waters or rivers. The lakes are described as the American lakes.

Mr. VEST. This excepts salmon, which are at one time a salt-water fish and at another time a fresh-water fish.

Mr. LINDSAY. Shad?

Mr. VEST. It also includes shad and herring. It is a peculiar quality of the salmon and the shad that they go back to their first habitat, where they spawn. We have a stream in Arkansas, the Washita, where I have seen as fine shad as I ever saw in the Potomac. I have seen shad from that river weigh 5 and 6 pounds, and as palatable as any I ever saw in the city of Washington.

It happened a long time ago that a gentleman who lived in Maryland went for his health to the Hot Springs in Arkansas, and he had a great passion for shad. His health was restored. He was quite a fisherman, and he determined that he would bring the shad out and put them in the Washita River; and they are there to-day in large quantities. They go out to the ocean at a certain time of the year and return in the spring. They are caught in large quantities. My friend the Senator from Arkansas knows that, as I know it personally. There is a salt-water fish, and yet you catch it in fresh water.

I do not see why salmon should be excepted. The official reports show that we exported 3,084,884 pounds of salmon put up in cans. The effect of this amendment in the free list—I am discussing it in connection with the other, although we have not reached it—is simply that if the fish are caught by a Canadian fisherman, they must pay the duty, unless he is paid by an American fish dealer. If he is paid by an American fish dealer, they come in free; and yet we hear pæans and appeals in behalf of American labor. A fish dealer under this provision can go over into the Canadian waters or the waters of the Great Lakes under the jurisdiction of Canada, and employ the professional Canadian fishermen and never pay one dollar to an American fisherman. Yet he can bring in his fish free, because the fish are paid for, and the Canadian fisherman is paid by the day or week or month with the money of the American. It seems to me that is no protection to American labor. It is simply a protection to the speculator in fish in order to put up the price of the fresh fish to the people of the United States.

The reading of the bill was resumed. The next amendment of the Committee on Finance was to strike out paragraph 257 and insert in lieu thereof the following:

257. Herrings, pickled or salted, one-half of 1 cent per pound; herrings, fresh, one-fourth of 1 cent per pound.

The amendment was agreed to.

The next amendment of the Committee on Finance was to strike out paragraph 258 and insert in lieu thereof the following:

258. Fish, pickled, in barrels or half barrels, not specially provided for in this act, and mackerel or salmon, pickled or salted, 1 cent per pound; fish, smoked, dried, salted, pickled, frozen, packed in ice, or otherwise prepared for preservation, and fresh fish, all the foregoing, not specially provided for in this act, and fish skinned or boned, three-fourths of 1 cent per pound.

Mr. ALLISON. I desire to modify the amendment of the committee by inserting the phraseology I send to the desk in lieu of that originally proposed.

The SECRETARY. In lieu of the amendment which was originally reported it is proposed to insert:

Fish, fresh, smoked, dried, salted, pickled, frozen, packed in ice, or otherwise prepared for preservation, not specially provided for in this act, three-fourths of 1 cent per pound; fish, skinned or boned, 1¼ cents per pound, mackerel, halibut, or salmon, pickled or salted, 1 cent per pound.

Mr. JONES of Arkansas. I should like to ask how this compares with the present rate. Are the fish provided for in this paragraph free under the present law?

Mr. ALLISON. I think not. It is a slight increase over the

present rate under the entire paragraph. The only change from the printed paragraph, as the Senator will see, is that we have provided a higher duty on fish skinned and boned. It has always borne a higher rate.

Mr. JONES of Arkansas. I think some of the classes of fish mentioned here are free. I am not positive about it, however, but where 1 cent a pound is provided in the pending amendment, three-fourths of a cent has been the rate heretofore.

Mr. ALLISON. Codfish and mackerel have been slightly raised.

Mr. VEST. Some of these fish were put upon the free list by the Wilson Act. This is therefore a great change, even under the amendment proposed by the Senator from Iowa. I do not understand the effect of the amendment. It is impossible to do it in a running debate of the provisions of the bill. Of course it will be adopted as the committee have proposed it, and I will let it go.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the Committee on Finance as modified.

The amendment as modified was agreed to.

The reading of the bill was resumed. The next amendment of the Committee on Finance was to strike out paragraphs 259 and 260, as follows:

259. In addition to the duties otherwise provided for in this act, there shall be levied, collected, and paid, upon all fish imported from any country or dependency which pays an export bounty on fish, a duty equal to the amount of such bounty.

260. Cans or packages, made of tin or other metal, containing shellfish admitted free of duty, not exceeding 1 quart in contents, shall be subject to a duty of 6 cents per dozen cans or packages; and when exceeding 1 quart, shall be subject to an additional duty of 3 cents per dozen for each additional half quart or fractional part thereof.

The amendment was agreed to.

The next amendment of the Committee on Finance was, in line 18, paragraph 261, after the word "apples," to insert "and pears;" and in line 19, after the word "peaches," to insert "pears;" so as to read:

Apples and pears, green or ripe, 25 cents per bushel; apples, peaches, pears, and other edible fruits, including berries, when dried, desiccated, evaporated or prepared in any manner, not specially provided for in this act, 2 cents per pound.

Mr. ALLISON. The committee wish to propose an amendment to the amendment. In line 18, after the word "apples," I move to insert "peaches, currants, quinces, cherries, plums."

Mr. FRYE. Green?

Mr. ALLISON. Green or ripe.

Mr. VEST. What is the necessity for the amendment, when the Senator has, in lines 19 and 20, the words "and other edible fruits?"

Mr. ALLISON. The fruits here provided for are green or ripe. The others are dried or desiccated.

The VICE-PRESIDENT. Without objection, the amendment as amended will be agreed to.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 261, line 22, after the word "act," to strike out "2 cents" and insert "1 cent;" so as to read: "1 cent per pound."

The amendment was agreed to.

The next amendment of the Committee on Finance was, in paragraph 261, line 23, after the word "pound," to strike out the semicolon and the words "berries, edible, in their natural condition, 1 cent per quart."

Mr. ALLISON. The committee withdraw the amendment.

The VICE-PRESIDENT. The amendment is withdrawn.

Mr. JONES of Arkansas. Are not the same things mentioned twice? I should be glad to have the paragraph read to see how it stands.

Mr. ALLISON. I wish to propose another amendment, and then it can be read. After the word "quart," in line 24, I move to insert "cranberries, 25 per cent ad valorem." Now, I think we have nearly everything in here.

Mr. VEST. The Senator has left out blackberries.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Iowa.

The amendment was agreed to.

Mr. PLATT of Connecticut. Now let the paragraph be read as amended.

The Secretary read as follows:

261. Apples, peaches, currants, quinces, cherries, plums, and pears, green or ripe, 25 cents per bushel. Apples, peaches, pears, and other edible fruits, including berries, when dried, desiccated, evaporated, or prepared in any manner, not specially provided for in this act, 1 cent per pound; berries, edible, in their natural condition, 1 cent per quart; cranberries, 25 per cent ad valorem.

Mr. ALLISON. That is right.

Mr. VEST. In line 18, paragraph 261, I move to strike out "25 cents per bushel" and insert "20 per cent ad valorem."

I wish to call attention to the fact that in 1896 we exported $1,340,507 worth of dried apples and we imported $481 worth. Four hundred and eighty-one dollars against an exportation of $1,340,507! But I suppose we are in great danger of losing the American market. Of green apples we exported, in 1896, $930,289 worth and imported $95,000 worth; and in the face of these statistics we are to increase the duties. I have no doubt that in the next campaign the rural districts will resound with Republican eloquence telling the farmers how they have been protected in their orchards. Four hundred and eighty-one dollars imports of dried apples against $1,340,507 worth; $95,000 worth of green apples imported against exports of $930,289! Yet our Republican friends will tell their dear bucolic supporters that they have died in the last trench in order to protect the orchards of the farmer from the invasion of the foreign apple, the pauper apples of Europe.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Missouri.

The amendment was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was to strike out paragraph 263 and insert in lieu thereof the following:

262. Comfits, sweetmeats, and fruits preserved in sugar, molasses, spirits, or in their own juices, not specially provided for in this act, 35 per cent ad valorem; if containing over 5 per cent of alcohol and not specially provided for in this act, 35 per cent ad valorem and in addition $2.50 per proof gallon on the alcohol contained therein in excess of 5 per cent; jellies of all kinds, 35 per cent ad valorem; pineapples preserved in their own juice, 25 per cent ad valorem.

Mr. VEST. This is a considerable increase over existing law.

Mr. ALLISON. In line 10, before the words "per centum," I move to strike out "five" and insert "ten;" and in line 14, before the words "per centum," I move to strike out "five" and insert "ten;" so as to increase the percentage of alcohol.

Mr. VEST. The Government statistics show this condition of commerce in regard to these commodities: Of preserved fruits we exported, in 1896, $1,376,281 worth; of other fruits, $60,353 worth; of all other fruits, $1,868,353. We imported of fruits in their own juices, $207,931. Still, these duties must be raised in order to protect us against foreign importation.

The VICE-PRESIDENT. The amendment of the Senator from Iowa to the amendment will be stated.

The SECRETARY. In line 10, paragraph 261, page 77, before the words "per centum," it is proposed to strike out "five" and insert "ten;" and in line 14, before the words "per centum," it is proposed to strike out "five" and insert "ten;" so as to read:

Comfits, sweetmeats, and fruits preserved in sugar, molasses, spirits, or in their own juices, not specially provided for in this act, 35 per cent ad valorem; if containing over 10 per cent of alcohol and not specially provided for in this act, 35 per cent ad valorem and in addition $2.50 per proof gallon on the alcohol contained therein in excess of 10 per cent.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 263, line 18, page 77, after the word "prunes" to insert the word "prunelles;" so as to read:

Figs, plums, prunes, prunelles, raisins, and other dried grapes.

Mr. ALLISON. In paragraph 263, line 18, after the word "prunelles," I move to insert "2 cents per pound" and a semicolon; so that it will read:

Figs, plums, prunes, prunelles, 2 cents per pound;

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in the same paragraph, line 19, to strike out "and one-half;" so as to read, "2 cents per pound:"

Figs, plums, prunes, prunelles, 2 cents per pound; raisins and other dried grapes, 2 cents per pound.

Mr. ALLISON. I withdraw the amendment.

The VICE-PRESIDENT. The amendment is withdrawn.

Mr. JONES of Arkansas. I do not know but that we should save time by allowing these amendments to be adopted, and then make the motion I desire to make. I wish to move "1½ cents" where the Senator proposes "2 cents," and "one and one-half" where he proposes "2½ cents." I suppose I may as well make a motion now to strike out the rates in the bill and insert "1½ cents" in each instance.

Mr. ALLISON. Let me perfect the paragraph first, and then the Senator can make his motion.

Mr. JONES of Arkansas. It is immaterial to me which course is pursued.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in line 23, before the word "cents," to strike out "twenty-five" and insert "twenty;" so as to read:

Olives, green or prepared, in bottles, jars, or similar packages, 20 cents per gallon.

Mr. ALLISON. I ask the Senate to disagree to the amendment.

The VICE-PRESIDENT. The question is on agreeing to the amendment reported by the Committee on Finance.

The amendment was disagreed to.

Mr. ALLISON. That perfects the paragraph.

Mr. JONES of Arkansas. It begins to look as if all the committee amendments heretofore reported are to be withdrawn, and it might be done quicker in bulk. I will not insist on that being done, however. I move to strike out 2 cents where it was inserted on motion of the Senator from Iowa and insert "1½ cents."

Mr. MILLS. It ought to be 1 cent.

Mr. JONES of Arkansas. The present rate is 1½ cents.

Mr. MILLS. It ought to be 1 cent.

Mr. JONES of Arkansas. I am satisfied that is true, but I prefer to stand by the present law; and I make the motion in that way, because it is the existing law. I move to strike out "2½ cents," in line 19, and insert "1½ cents;" and in line 21 I move to strike out "2 cents per pound" and insert "20 per cent ad valorem;" and I ask for a vote on all of the amendments together.

The VICE-PRESIDENT. The amendment submitted by the Senator from Arkansas will be stated.

The SECRETARY. It is proposed to amend paragraph 263, on page 77, line 18, by striking out "2 cents per pound" and inserting "1½ cents per pound;" in line 19, by striking out "2½ cents" and inserting "1½ cents," and in line 21, by striking out "2 cents per pound" and inserting "20 per cent ad valorem;" so as to read:

Figs, plums, prunes, prunelles, 1½ cents per pound; raisins and other dried grapes, 1½ cents per pound; dates, one-half of 1 cent per pound; currants, Zante or other, 20 per cent ad valorem.

Mr. MILLS. Mr. President, that has reference to the duty on Zante currants. The duty proposed in the pending bill on these currants from the island of Zante is 125 per cent. The unit of value is 1.6, and the duty is 2 cents per pound. Of course that is more than 100 per cent. I could understand this high rate of duty if it were for the protection of some American product, but these currants are peculiar to a single little island, I believe, in the Gulf of Corinth. They grow nowhere else in the world; they can not grow anywhere else in the world. I have conversed about them with intelligent persons who have been on that island and investigated this business.

Mr. GEAR. What does the Senator state the duty to be?

Mr. MILLS. The duty is 125 per cent here.

Mr. GEAR. Let me state for the benefit of the Senator from Texas that when the present law was framed the currants were worth 1 cent a pound. They had been classed at 10 cents by the Wilson committee, and when the bill came here, through my friend from California and my friend from Arkansas, there was a duty of 1½ cents a pound placed on them, which is 150 per cent. So this is really a reduction.

Mr. MILLS. I am talking about what it ought to be, not about what any of my friends have done heretofore. As I said, there is nothing to protect in the United States by this high duty. Therefore we must have a revenue duty.

Mr. WHITE. Will the Senator from Texas allow me to correct a statement of fact?

Mr. MILLS. Certainly.

Mr. WHITE. I will take pleasure in presenting the Senator with a small box of Zante currants, a sample produced in California, where they are grown in large quantities, and in the cloakroom I have a so-called Zante currant bush which is really a grape bush. I will state that they are as much in competition with the other raisins in California, for they are all a raisin, as any dried grape can be, and furthermore, that the importation from the island of Zante cuts a very small figure in the total importations into the United States. The currant is largely produced in Greece, and the name "currant" is derived, I believe, from the word "Corinth." It is really a grape. There is a bush in the cloakroom which the Senator can inspect.

Mr. MILLS. Anything can be called a Zante currant by name. I am talking about the currant that is grown upon the island of Zante.

Mr. WHITE. This is the exact and identical currant.

Mr. PERKINS. If my friend from Texas will permit me to correct the premises from which he is reasoning, I desire to state that the general appraisers of New York held to the views that my distinguished friend from Texas holds, but the ninth judicial court of the district embracing California and Oregon judicially determined otherwise. With the Senator's permission, I should like to read the findings of the court, but I will not interrupt him; I will wait until after he has made his argument. Then I should like to have the privilege of reading the findings of the court.

Mr. MILLS. Several years ago I studied the question of Zante currants when I was trying to reduce the revenues of the Government, which were excessive; but our friends who were opposed to it would not permit a reduction upon articles that were competing with domestic articles. I proposed even to take this revenue article and put it on the free list, in order simply to reduce the surplus revenues of the Government. I remember conversing with a very eminent gentleman, Hon. Samuel Sullivan Cox, known to all of us, who was the minister to Turkey and who was all over the island of Zante time and again. He told me that the real Zante currant could not be grown in any other soil on the face of the globe than upon that island. While we may grow currants like it, they are not Zante currants. The importation into this country of $1,185,532 worth of these currants shows that the same article can not be produced in this country, call it by whatever name you please.

Mr. VEST. If the Senator will permit me, he overlooks one great elementary principle of protection, and that is, if the people can not get the currants, they have to take the California grape.

Mr. MILLS. Precisely; but there is always a certain number of people who must get the Zante currants and pay 2½ cents or 1½ cents. It was in 1893, when the duty was 2½ cents a pound, that they imported $1,185,532 worth of these very currants, notwithstanding we are told that California is full of them.

I remember the remark of my distinguished friend, Judge Kelley, no longer with us, but many of us here knew him well. When I was proposing to put these currants on the free list, I said, "They can not come in competition, my friend, with anything you want to protect in this country. Let us put them on the free list and reduce the revenue. The Treasury is full to overflowing." Mr. Cleveland was telling us that that was the condition which confronted us—not theories, but an enlarged Treasury. I said, "Now, let me put this on the free list." He said, "My dear sir, the taste is a question of culture, and if you will keep the Zante currant from coming into this country, we will encourage the cultivation of the blackberry and develop the American taste for blackberries." That was one of the reasons given.

Now we are told that there are Zante currants grown in California. It may be, for they do remarkable things in California. It is a great State, and a great fruit State. It is the greatest flower State in the Union. The largest roses I ever saw in my life, I will say to my friend from Missouri, who was speaking about flowers this morning, I have seen in California. The finest fruits of almost all sorts are grown there. But we know there is a peculiar taste to fruits, a peculiarity given by the soil itself.

A few years ago I was going through a remarkable campaign in Texas on the question of prohibition, and I was an antiprohibitionist. An old friend of mine, whom I had known for a long time, came to me and said, "I am astonished, sir, to find you going around over this country and defending the saloons." I said, "Your astonishment is not greater than mine. You have drunk ten times more whisky than ever I saw in my lifetime, and you are a prohibitionist. I want you to explain that to me." He said, "Yes, sir; I am a prohibitionist, but I do not expect prohibition to keep me from drinking whisky. I do not intend it for that. I drink the very best whisky that is made in the United States. I know where it is to be had, sir. I know where there is a peculiar soil that raises a peculiar corn, and where there is a peculiar water; and the peculiarity of the climate, and the peculiarity of the soil, and the peculiarity of the water give a peculiar taste to the whisky." He said, "That is found in Robertson County, Tenn. I bring my whisky from there, sir, and I expect to have it as long as I live." I asked him, "What is it that you want to have prohibition for?" "Not for myself," he said, "but for the Irish and the d——d niggers." [Laughter.]

I give this illustration to show that there is a peculiarity about things. There is a peculiarity that adapts itself to the taste of people in the manufacture of certain kinds of goods and certain kinds of stamps upon goods. I once heard a gentleman who was a manufacturer of stockings (it was when we had up the question of the balbriggan stockings) say that his wife would not wear the American stockings, that her taste was to have the imported stockings, and he got some of his own stockings that he was manufacturing and put the balbriggan brand on them and she was reconciled. She did not know anything about it; it was a pious fraud practiced on her; and she wore the stockings of her own husband's manufacture all the time. It is so about all these different things. There are peculiarities of taste in men and peculiarities of taste in products that commend themselves to people who are seeking for this, that, and the other thing for consumption.

I have not a single, solitary doubt but that in California they have the finest grapes. I know it. I have been there and I have seen them and eaten them. They have the finest fruits. It is one of the greatest States in the Union. As I said, they have flowers there that can not be equaled elsewhere on the face of the globe or in any other place on the globe where I have ever been. But, Mr. President, they have not the Zante currant, and these figures show it. Therefore we ought to put a revenue duty on them instead of putting on this high, exclusive duty of 125 per cent.

Mr. PERKINS. I am very desirous to have my friend from Texas vote for this measure, and while I may not convince him, perhaps, that he should do so because we raise Zante currants in California, as I can demonstrate to him, I am sure I can have his vote if he is consistent, and he always is, upon the revenue question.

In 1890 Zante currants were upon the free list. The Government received nothing from their importation. In 1894, at a cent

and a half a pound duty, we received $29,478.22. Under the proposed duty of 2 cents it is estimated that we will receive $39,304.28. Therefore we should have the Senator's vote upon the ground of revenue, if upon no other.

But as a matter of fact, we do raise the Zante currant in California. We have in California more than 4,000 vineyards, owned by 4,000 different individuals, who employ from fifteen to twenty thousand men, women, and boys in cultivating those vineyards. They have demonstrated the fact that they can raise the Zante currant. We have had a substitute, the Thompson seedless grape, the Sultana, and perhaps 10 per cent of the Muscat of Alexandria are seedless and similar to the Zante currant. There is the Zante currant [exhibiting], and I will defy my friend to distinguish it except that it is better. The Zante currant is raised in Sutter County, Cal., in the central part of our State. It is raised upon a vine the same as the grapevine and not upon a currant bush. The Zante currant grows upon a regular grapevine so far as the ordinary unscientific eye can determine.

But I want to show, and I am going to be brief on this point, because I feel confident that my friend from Texas will vote with us, what was the finding of the court. I will first read from a brief submitted by a committee of the raisin growers of California on the raisin industry of California, and in which is embodied several quotations from the opinion of the court:

The Zante currant is a grape. It grows upon a grapevine, and not on a bush or shrub, as is commonly supposed. It has all the characteristics of the grape, is treated similarly for commerce, and is essentially a grape as much as the Muscat, the Catawba, or any other variety, and is used as a raisin.

This statement has recently—March 26, 1896—been judicially determined to be true by the circuit court of the United States, ninth circuit, northern district of California, in a case appealed from the decision of the Board of General Appraisers on duty at New York.

In Circular No. 77, dated May 27, 1896, issued by the Treasury Department, this opinion is published, and all customs officers are instructed to be guided by it.

Witnesses for importers in this case undertook to contribute to the popular misconception as to the Zante currant by testifying that it is not a grape. But evidence of the highest character from many experts who had seen this so-called currant growing on the island of Zante and on the mainland of Greece and in California and elsewhere showed it to be unmistakably a grape. The court, in its opinion showing the result of the evidence, said:

"The term 'Zante currant' is a well-known commercial expression among importers, dealers, and growers of raisins, and relates to and comprehends a kind of raisin made from a small seedless grape grown not only in the island of Zante, but also, and to a much greater extent, on the mainland of Greece and other neighboring localities. 'Zante currants' is simply its English name. It derives the name 'currants' from the fact that in times past it was shipped from the city of Corinth, Greece. In German it is called 'Korinthen;' in French, 'rasin de Corinthe;' in Spanish, 'pasas de Corinto.' It is a raisin grape, as distinguished from the shrub currant, with which its name may confound it, but from which it is entirely distinct, the former belonging to the grapevine family, or Vitis vinifera, of plants, the latter to the shrub or Ribes. A Zante currant on the vine is a small-sized grape. When picked and dried it is a 'dried grape' or kind of raisin whose popular and commercial designation is 'Zante currants.'"

The court then shows that this definition is in accord with that given to the word "currant" in the Century Dictionary, Webster's International Dictionary (1890), Encyclopedia Britannica (1877), and the Standard Dictionary of the English Language (1895).

One witness, Dr. Gustav Eisen, the author of a valuable book upon the raisin, traced the history of this grape as far back as the year 1333.

E. W. Hilgard, professor of agriculture at the California State University, testified that a Zante currant is "a raisin made from a small grape which grows in the Ionian Islands, and also in the archipelago there; also on the mainland of Asia Minor. They are dried and prepared in various ways and shipped all over the world." Many other distinguished scientists and agronomists were called as witnesses, to the same effect.

Among the exhibits used at the trial was a currant vine taken up by the American consul at Patras, Greece, which was fully identified as a grape belonging to the species Vitis vinifera, and wholly distinct from the English or kitchen-garden currant of the species ribes. Photographs of the vine growing in Greece, on the mainland, and on the island of Zante, and also growing in California, were introduced.

I call the attention of the Senator from Texas to the opinion of the court. The court said:

Without going further into the evidence, it is enough to say that, as a whole, the following four propositions of fact were, to my mind, conclusively established: (1) That the currants comprising the importation in question are Zante currants; (2) that Zante currants are a kind of raisin; (3) that Zante currants are grapes dried; and (4) that Zante currants are not the product exclusively of the island of Zante, but they are produced also on the mainland of Greece, in the archipelago, and other places, and in much larger quantities than on the island.

That was the decision of the court after hearing the evidence of Professor Hilgard, who has the chair of agriculture in our State University, and other eminent scientists. There was a grapevine sent by the American consul from some port in Greece. It was exhibited in the court, and it was there demonstrated to the satisfaction of the court that it was a facsimile of the same grapevine, the same character of raisins or grapes or Zante currants that we were producing there.

But, be that as it may, Mr. President, the imported Zante comes into competition anyhow with the raisins of California. I believe that, in so far as it is possible to do so, we have our home market for our own home production. We have demonstrated the fact that we are capable of raising in California a sufficient quantity of raisins and currants to supply this country, and we are doing it to-day at a less price than they were ever furnished before.

Years ago, when I was engaged in merchandising, I sold the ordinary Malaga raisins at from 20 to 25 cents a pound. To-day they are selling in the markets of the principal cities of this country at from 4 to 6 cents a pound. The price has been brought down by competition among our own people, who had the courage to go out West from Texas, Missouri, and other States and settle upon those arid plains, bring in water from the mountains, irrigate the valleys, and plant their grapevines and produce these raisins and currants.

There is no industry of this country that is deserving of a fostering care and a helping hand more than the raisin industries of the country. I went the other day to one of our stores, and I there bought two packages of Zante currants, imported, at 10 cents a package, and the package weighs 1 ounce less than a pound will. Will the half-cent increase in duty here increase the cost to the consumer? My friend from Texas knows that it will not. It simply will increase the revenue derived by the Government from this source.

I have here the consular reports. I will read one line to show that our friends in Greece are trying to do something to build up this industry there, to foster it with their own people, and then dump their product upon our own country. Mr. George Horton, who is our consul at Athens, writes:

There is much popular agitation in Greece at present, resulting from the low price of currants, the principal crop of this country. A general idea has spread among the people that the Government is able to raise the price of the crop at will, and there is a popular demand that Parliament pass some measure to that end. Large mass meetings are being held in various parts of Greece, and considerable excitement prevails.

That is because the people of California, by their energy and their push and their enterprise, have produced raisins and currants that are taking the market of Greece away from those people and giving it to our people.

Mr. GRAY. May I ask the Senator from California a question?

Mr. PERKINS. Certainly.

Mr. GRAY. I am very much interested in what the Senator has said about the wonderful growth of the industry of raising currants and the manufacture of raisins in California. How long has the industry been in progress in that State?

Mr. PERKINS. In 1880 we first commenced planting grapevines successfully—that is, the muscat of Alexandria, and producing the Malaga raisin.

Mr. GRAY. And the currants?

Mr. PERKINS. The currants later.

Mr. GRAY. I understand that the currant production has been a very prolific one, and certainly, from the specimen we have seen, a very beautiful one, and that you are succeeding now in taking away the market in Greece.

Mr. PERKINS. We hope to do so, with your kind assistance.

Mr. GRAY. Then why do you want an additional protective tariff?

Mr. PERKINS. Because the wages we pay in California to our own people range from $1 to $1.50 a day. Those people have families, and they are teaching their boys and girls the first lessons in American citizenship; they are supporting our public schools, our churches, paying taxes in our own country, and we want to continue to pay the same high wages that we are now paying them.

Mr. GRAY. I understand that there was no tax at all on the Zante currants up to 1894. Is that true?

Mr. PERKINS. That is not correct.

Mr. GRAY. They were on the free list in 1890.

Mr. PERKINS. From 1879 until 1891 there was a duty of a cent a pound. In 1891 they were upon the free list.

Mr. GRAY. Notwithstanding all that, the industry has flourished in a most interesting and gratifying way.

Mr. PERKINS. It has languished.

Mr. GRAY. I do not see why they should make this demand upon the consumers and upon the home market to pay this additional tribute.

Mr. PERKINS. For the same reason, I will say to my friend from Delaware, that has prevailed in Greece. The consul says, and I think it answers the Senator:

The currants are low in price—

That is, in Greece—

mainly because there has been overproduction. If all the farmers in the United States for some one year should plant all their land to one crop the price of that crop would fall. This is practically what has happened in Greece.

And they have had to find a market, and they ship them to this country in foreign ships to compete with our people.

Mr. LINDSAY. I understood the Senator to say a while ago that it was the progress of the currant industry in California that had broken down the price of currants in Greece.

Mr. PERKINS. No; my friend misunderstands me. It is the competition of the low prices that have prevailed in Greece by overproduction, and because they have not been honest in shipping their products into this country. I will take the testimony of our consul. I will read one more paragraph. Our consul, Mr. Horton, says:

In the haste to get large quantities of the profitable article on the market arose another condition that ultimately injured the price of the crop. Inferior currants were packed and sold as first-class, and in many cases sand even was sprinkled in the boxes to add to the weight.

That class of fruit has been brought in here to compete with us. I expect my friend from Kentucky to join with my friend from Texas, as I know my colleague will, and vote for this measure for revenue, if for no other reason.

Mr. WHITE. Mr. President, I simply wish to correct some statements made here which I know were made inadvertently.

The Senator from Texas [Mr. MILLS] spoke of an authority from which he derived his information that the so-called Zante currant is grown only upon the island of Zante. A very little familiar history will show how much in error was the party who gave that information. We placed in our last tariff act a provision for Zante currants, fixing the rate at a cent and a half a pound. It was claimed that the expression used referred only to currants coming from the island of Zante. Although we had used it, no doubt, in the act as we would use the words "Lima beans," "Malaga grapes," or any expression of that sort, still it was otherwise held in a case that was not very carefully considered in the custom-house in New York. Afterwards, when an invoice came to San Francisco from Patras, the matter was decided in the suit referred to by my colleague, which is entitled "In re Wise, collector, 73 Federal Reporter, page 183." The judge, in delivering the opinion, among other things, said:

As a matter of fact, the evidence tended to show that much larger quantities of Zante currants, so called, are grown and exported from the provinces of Greece than from the island of Zante, and that those grown on the mainland are still known commercially in this country as "Zante currants." In other words, "Zante currants" is the commercial name for this variety of grape, when dried into raisins. It would be unreasonable to suppose that Congress, in imposing duties on Zante currants in the general language employed, intended to tax those coming from the island of Zante alone and not those which come in much larger quantities from other localities.

That, of course, disposes of the contention absolutely that they are solely a product of the island of Zante. Again, every scientific work on the subject defines Zante currant as a true raisin. If Senators who have any doubt on the subject will take the trouble to look at the bush which was sent me by Mr. Onstott, of Yuba County, Cal., whose product I have here, they will be unable to distinguish it from any other grapevine they have ever seen. The leaves are precisely alike, and the bunches of fruit, which of course are now very small and green, are formed very much as the Zinfandel grape grows.

The English currant, which we see growing in our yards, is an entirely different product, so much so that wine is made out of the grape produced on the currant bush; but now we in California have produced not only a large raisin, which is generally known as the Malaga raisin of commerce, but a large number of smaller raisins without seeds. Among those are the Zante currant, so called, and other varieties, I believe, of the seedless grape. The Zante grape—for it is truly a grape—is a competitor with all of the other classes of raisins, and if we are to utilize this tariff bill for any purpose whatever with reference to raisins, there should be no exclusion of the Zante currant, which is itself a true raisin and comes from a true grape.

So, in looking over the matter, when the case to which I have referred was in the course of preparation, the counsel upon neither side could find a single authority anywhere to the contrary, and to settle the dispute we took the trouble to send to Greece to get an actual Zante currant bush and produced it in court as an exhibit. It was precisely the same bush that I have here now in the cloak-room. So there was nothing in that point. While the suit was pending, the Zante currants, under the decision of the board of appraisers, were admitted free, and we lost a very large amount of revenue.

Mr. HOAR. May I ask the Senator a question?

Mr. WHITE. Certainly.

Mr. HOAR. I have been unable to follow the Senator's statement fully, and I should like to ask him whether he is in favor of the duty on Zante currants or not?

Mr. WHITE. I have always been in favor of a duty on Zante currants, and a duty on a good many other articles, I will say to the Senator from Massachusetts, produced even under the shadow of his influence. I am not opposed to duties, and I have never said so.

Mr. HOAR. I did not put the question to the Senator from California with the view which he seems to suppose. I put the question very much as General Taylor employed bloodhounds in the Seminole war, not to worry the Indians, but to find out where they were. [Laughter.]

Mr. WHITE. I do not exactly know to whom the Senator refers by the Indian in this case; but his wisdom is frequently so occult that I am not able to reach conclusions regarding it.

All I desire to say, in conclusion, Mr. President, is that the Zante currant of commerce and the raisin should be treated alike, and if we are to have a bill imposing duties at all, the whole class of raisins should be retained.

Mr. GEAR. I used to be a merchant many years ago, and I have sold a great many of the goods called Zante currants. It is purely a commercial phrase, as everybody who has investigated the matter knows. They are a very low, inferior order of grape that have been grown in Corinth and in the island of Zante, which gives the name of "Zante currant" to them. They are imported in large quantities. They are a very inferior article of goods and sold at a very low price. I recollect prior to the McKinley law they were but a cent or a cent and a quarter a pound. We put them on the free list because we found that they were used largely by the plain people of this country (as Mr. Lincoln used to call them) in making pies and puddings.

Mr. GRAY. And very good they are, too.

Mr. GEAR. They do not compete with the Zante grapes of California, which my friend refers to. There is 4 cents a pound difference. When our Democratic friends were framing the Wilson tariff bill they found that they wanted revenue. It was claimed that Zante currants were high priced, and they put a duty on them of a cent and a half a pound, which was about 150 per cent, for they were only worth a cent to a cent and a quarter a pound.

Greece is a pretty poor country, as we all know, and they keep no minister here; they only have a consul-general of the Greek Government, who lives in New York. I can not recall his name.

Mr. WHITE. Mr. Botassi.

Mr. GEAR. Yes; Mr. Botassi. He came to me for a letter of introduction, and at his request I introduced him to the conferees on the part of the House of Representatives when the bill was pending between the two Houses in conference, Judge Montgomery and Judge Turner, who were conferees on the part of the House, and also gave him a letter to my friend Hon. William L. Wilson. Mr. Botassi went down to the Arlington Hotel to consult with Mr. Wilson, who gave him an audience and treated him very courteously.

Mr. Botassi told Mr. Wilson that Greece was a very poor country and that their product did not really come into competition with the California grapes; that they were sold at 1 cent a pound and used by a different class of people; that they were quoted at that price in New York. Mr. Wilson said to Mr. Botassi: "You will get no protection in this bill for your people. Our Democratic friends are demanding an increase on all these things. The Senator from California is preeminent, and these duties will stand." When I saw him after the interview with Mr. Wilson, I said to him, "Mr. Botassi, how did you come out?" He said: "I did not come out at all. I went down to the Arlington and I had a very delightful interview with Mr. Wilson. He knows more about my country than I do, though I was born in Greece. He knows all about her ancient history, her wars, her statuary, her art, and everything else, "but he not know a tam ting" about currants. And that was substantially true. [Laughter.]

The whole theory of the duty of 1½ cents a pound on Zante currants in the Wilson law was based on the assumption that there was competition between the Grecian and the California currant, when any man who is a merchant can understand the difference between these two articles; and yet our committee has seen fit to increase the duty to 2 cents a pound, which I shall vote for, because I believe in protecting the grapes of California; but I shall vote for it upon a different principle from what the Senator from California does.

Mr. MILLS. The Senator from Iowa [Mr. GEAR] has demonstrated that what I stated was correct. He says that these grapes from Zante or from Greece do not come in competition with the American currants, that our currants are worth 4 cents a pound and the imported Zante currants are worth from 1 cent to 1½ cents a pound. That is what I stated, that this duty can not be for protection, and that it is too high for revenue.

Mr. PERKINS. I will state to the Senator that I purchased at a leading grocery in this city two packages of Zante currants, supposed to be a pound avoirdupois, but they weighed but 15 ounces, and I was charged 10 cents a pound for them. We sell our best California currants for less than that.

Mr. MILLS. Still they are quoted at 1.6 cents a pound officially. I am going by the official tables, and not by the prices charged by retailers every day all over the country.

Mr. PERKINS. What I intended to say was that the consumer did not get the benefit of it.

Mr. MILLS. I am talking now about the Zante currants coming in competition with the California currants. I say the Senator from Iowa [Mr. GEAR] has demonstrated that they do not; and if they do not, what is your excessive duty going to do? You can not bring them into this country and naturalize them, to use the expression of the protectionists; it is impossible to do that; and my friend from California on this side of the Chamber [Mr. WHITE] says that in the judicial investigation to which he has referred he brought a plant from Greece into court and demonstrated that it was the same plant they have in California; but he did not pretend to say that he could bring the atmosphere and soil of Greece with it.

My father was a Virginian, born over in eastern Virginia, and lived and died in the belief that there was no real, pure chewing tobacco except "the Jeems River," as he called it; and he chewed "Jeems River" as long as he lived. When I was a boy, he sent to

Cuba and got the seed of the celebrated Cuban tobacco to make into cigars, and I used to make cigars for sale when I was a chap. Every other year he would have to send to Cuba and renew the seed. Why? The seed sent here was from the same plant precisely that they have in Cuba, and it was grown in the United States, but they could not bring the Cuban soil and the Cuban climate, and the tobacco degenerated and became American tobacco by a process of differentiation, or evolution, as I suppose the scientists would call it. In Cuba the soil and climate entered into the tobacco. I remember when it was growing the first year on our land in Kentucky, if you occupied a position a quarter of a mile from the field and the wind was blowing in your direction across the field, you could smell the delightful aroma from it, but the third or fourth year it was gone.

Mr. President, we may make high tariffs and put on all sorts of duties, but we can not change the law of nature. These things are peculiar gifts to man, and the influences of soil and climate, all those things that God in His wisdom has made, we can not change. Our wants go out to them all over the whole face of the earth, and we send the products of our labor in exchange for them.

I want to again call the attention of our friends to the fact that when you are putting these prohibitive duties on things coming to the United States you are putting prohibitive duties against the things that we produce by our labor going away from the United States; you are depressing the prices of things that we have to sell and upon which we have to get a living, and you are raising the prices of the things that we have to buy and upon which we have to live.

I return to the proposition with which I set out. I am willing to vote for a revenue duty, and a good substantial revenue duty, on this article, but I can not see why our friends, who can not produce this article by any amount of fostering in this country, will insist upon high duties simply to exclude the article from coming to this country and exclude our cotton going from the South to pay for it.

Mr. WHITE. Mr. President, if I understand the argument of my friend the Senator from Texas [Mr. MILLS], it is that because there is a greatly inferior fruit raised in Greece that we can not hope to emulate Greece in the raising of that fruit, even if we were to bring the vine and plant it in our own State. Of course we would not attempt any emulation of that kind; but I believe that even an inferior fruit, when it competes with a superior fruit, is more liable to depreciate the general market, so far as that proposition goes, if it is material at all, than a fruit that is of equal quality. I believe that that is the experience of everyone. Of course I have my own theory about the ultimate effect of all this.

I believe that ultimately there will be such a large quantity of this fruit produced that it will be a very difficult problem for those engaged in making this particular product to know what they are going to do with it; but I am taking the theory of this bill and following it through, and I am very certain, taking the whole production as expressed in the words "raisins" and "Zante currants" together, that we are imposing a duty which will yield a large amount of revenue, but which will not go over the average of this bill.

I differ entirely with my friend the Senator from Texas that this article will be excluded. I think he will ascertain by the end of the fiscal year that we will have some revenue out of it, and while it has been said here that this bill will yield $50,000,000 of surplus, I must say for myself that I think the surplus will be exceedingly small, unless we recover some of that prosperity for which we have been looking for many days, and for which we have very recently prayed.

Mr. MILLS. Zante currants by the law of 1890 were free, and we imported $1,185,532 worth of them when they were on the free list. The law of 1894 put a duty of a cent and a half a pound upon them, equivalent to about 93 per cent, and the importation fell down to $32,783.

Mr. WHITE. If the Senator will excuse me, that is a mistake. I said a few minutes ago, perhaps while the Senator was not in the Chamber, that the General Board of Appraisers of New York held that the tariff only applied to currants produced in the island of Zante, and admitted all the others free.

Mr. MILLS. Then these figures are not correct.

Mr. WHITE. Only as to the island of Zante, and not to the general importation of currants.

Mr. MILLS. Of course I can only go by the figures which have been furnished us.

Mr. WHITE. What I have stated is the fact.

The VICE-PRESIDENT. The question is on the three amendments proposed by the Senator from Arkansas [Mr. JONES] to paragraph 263.

The amendments were rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 264, on page 78, line 1, after the word "grapes," to strike out "and peaches, 1 cent per pound" and insert "in barrels or other packages, 20 cents per cubic foot;" so as to make the paragraph read:

264. Grapes in barrels or other packages, 20 cents per cubic foot.

The amendment was agreed to.

The next amendment was, in paragraph 265, on page 78, line 4, after the word "pomelos," to strike out "three-fourths of 1 cent" and insert "1 cent;" so as to read:

265. Oranges, lemons, limes, grape fruit, shaddocks or pomelos, 1 cent per pound.

The amendment was agreed to.

The next amendment was, on page 78, line 5, after the word "pound," to strike out the remainder of the paragraph, as follows:

And in addition thereto, 30 per cent ad valorem upon the boxes, barrels, or other articles containing any of the foregoing: *Provided*, That the thin wood, so called, comprising the sides, tops, and bottoms of orange and lemon boxes of the growth and manufacture of the United States, exported as orange and lemon box shooks, may be reimported in completed form, filled with oranges and lemons, by the payment of duty at one-half the rate imposed on similar boxes of entirely foreign growth and manufacture.

The amendment was agreed to.

Mr. JONES of Arkansas. I move to strike out paragraph 265 as amended and insert the paragraph which I send to the desk, which is the paragraph in the present law relating to those articles.

The VICE-PRESIDENT. The amendment proposed by the Senator from Arkansas will be stated.

The SECRETARY. It is proposed to strike out paragraph 265 as amended and in lieu thereof to insert:

265. Oranges, lemons, and limes, in packages, at the rate of 8 cents per cubic foot of capacity; in bulk, $1.50 per 1,000; and in addition thereto a duty of 30 per cent ad valorem upon the boxes or barrels containing such oranges, lemons, or limes: *Provided*, That the thin wood, so called, comprising the sides, tops, and bottoms of orange and lemon boxes of the growth and manufacture of the United States, exported as orange and lemon box shooks, may be reimported in completed form, filled with oranges and lemons, by the payment of duty at one-half the rate imposed on similar boxes of entirely foreign growth and manufacture.

Mr. JONES of Arkansas. Of course I know it is utterly useless to undertake to get any change in any of these rates, and I shall not enter into any elaborate discussion of this proposition, but I have the reasons so clearly shown why my amendment should be adopted and why the high rate in the bill should not be adopted in a letter sent to me from New York that I shall read the letter, which comes from an importer. He says:

NEW YORK, *March 25, 1897.*

RESPECTED SIR: We desire to call your marked attention to paragraph No. 265 in the new tariff, fixing the proposed duty on imported green fruit—i. e., oranges and lemons—at the rate of three-fourths of a cent per pound, which, we feel confident, is an error due to a misunderstanding of the circumstances surrounding its importation, and one which will work radical injury to the poor of our city and to those who are engaged in bringing this most healthful form of food into the country.

The present duty is specific at 8 cents per cubic foot of capacity of the box, and 30 per cent ad valorem on the boxes, making a total duty of about 23 cents per box, while the proposed change raises the duty, each box weighing from 80 to 100 pounds, to 60 or 80 cents, or equivalent to an increase of, say, from 200 per cent to 300 per cent.

While the consumption of Sicily lemons alone for the year ending November 1 last amounted to 2,962,200 boxes, the total amount produced in this country, from California only, was about 300,000 boxes, Florida being absolutely out of the question, owing to the unfortunate ruin of her groves by frost, and will continue to be for several years to come.

As lemon trees take ten years' growth to come into full bearing, and there is no way to supply the large diminution in imports which will unquestionably occur if this apparently unjust and unnecessary discrimination is made against foreign lemons, it can but work injury to the poor of our cities in favor of an undeveloped industry of the State of California, which is entirely inadequate to the task of supplying the country at large, even were it given a full opportunity to do so.

And this same argument holds good in regard to the cheap Sicily oranges, which, selling to people of scanty means at a cost of 1 penny each, do not seem to call for protection to such an exorbitant degree in favor of the California orange, "the rich man's fruit," as its sobriquet is, since a cost of, say, 5 cents is far beyond their slender means.

We do not hesitate to express our views thus frankly, as we are not only foreign-fruit experts, but also steamship agents for a line which is bringing into the country (at this moment) fully one-half of all the fruit that is imported from Italy, and we know that our views are those of a majority of the people engaged in the fruit business at this the largest fruit center in this country.

In our capacity of steamship agents we also beg leave to tell you that it is a practical impossibility for the correct duty due on fruits imported to be ascertained without causing an unnecessary and cruel loss to the fruit owners and steamship lines.

Green fruit is imported by steamships which carry little or nothing else, in cargoes of an average of 20,000 boxes, which consist of from 300 to 500 different brands and shipments.

To ascertain the weight of the fruit in these boxes it will be necessary to weigh several boxes of each lot by removing their contents, to the destruction of beautifully packed and ornamented inside coverings materially affecting the market value of boxes so destroyed, nor can the large proportion of rotten fruit which oftentimes is found in part of the boxes, be ascertained by the examination of a few of them, and we submit that rotten fruit is no more a proper article for taxation than any other absolutely valueless article.

The above-mentioned method of weighing boxes will further entail an unjust and unwarrantable delay in the management and delivery of our cargoes, which are discharged on docks whose rental amounts to $70 per day, and those cargoes, consisting of perishable merchandise, deteriorate more every day they are detained.

The importation of bananas last year amounted to 12,000,000 bunches, free of duty, and they could easily bear a part of the burden which has been placed upon lemons and oranges, without affecting the retail price in the least degree, and at the small duty of only 10 cents per bunch would yield

the Government an increase in revenue of $1,200,000, and afford a much-needed protection to our constantly increasing crop of apples, which now suffers from their competition.

In view of the above circumstances, we pray you that you will use your great influence to prevent the injury to and (at least) the partial destruction of a business upon which at least 100,000 of our citizens depend for their means of subsistence.

Mr. Henry W. Mitchell goes to Washington this afternoon in connection with the subject-matter of this letter, and will stop at the Metropolitan Hotel. Should you desire any further information on the subject, it will afford him great pleasure to place himself at your disposal.

Yours, very truly,

VILLARI, MITCHELL & CO.

Hon. JAMES K. JONES,
915 M Street NW., Washington, D. C.

This letter shows distinctly and clearly that the present proposed tax on this article will prove a very great detriment to this trade. These oranges and lemons can not be examined by the appraisers under the provisions of this bill without very materially injuring them.

There is practically no competition now between Sicily oranges and California oranges. Take one of each and show them to anybody, and there will be no hesitancy about the value. One will sell for 5 cents, and you may buy the others for a cent apiece in this town. Recently when I wanted to buy oranges, when I was present with a member of my family, 50 cents a dozen was the price asked for California oranges, and a cent apiece was the price of the other oranges. Nobody would hesitate a moment to say that those selling for 50 cents a dozen were infinitely cheaper than those at 12 cents a dozen. There is practically no comparison between the two. If this class of fruit is allowed to come in, it will reach a class of people who would probably buy the lower priced oranges and use that kind of fruit, and there ought not to be an increased rate to prevent the importation of the cheaper and lower grade simply because there is a similar kind of fruit produced in this country.

Mr. PERKINS. Only a word, Mr. President, in answer to my friend from Arkansas. The letter which the Senator has read is a special plea from the agent of a foreign ship, manned by foreigners, built in a foreign country, and representing the product of foreign toil.

Mr. JONES of Arkansas. Does it tell the truth?

Mr. PERKINS. I have no doubt of the truth of what I have stated, for I have a duplicate of the letter which the Senator read, or one similar to that, which was written to me. No doubt the writer of the letter has told the truth, as he understands it, from his standpoint. He is advocating the interests of those he represents. He is the agent of a foreign ship, built in a foreign country, manned by foreigners, and he represents the product of a foreign soil. The owners of that ship do not pay one dollar tax to this country.

I stand here, Mr. President, representing in a small degree the horticulturists of this country, especially those in my own State, and we have demonstrated that we can raise citrus fruits, lemons and oranges, equal to any other country on God's footstool. All we ask—we do not want any protection—is the difference between the price we pay for labor in this country and that paid in foreign countries.

I want to say as to the ad valorem duty fixed in this bill, that I have made a careful calculation of it, and it is a much less figure than that levied by Russia, by Germany, by Denmark, and by Austria-Hungary, and the result is neither one of those countries raises citrus fruits, either lemons, oranges, or any other belonging to that particular citrus family.

The duty proposed is a reasonable duty; it is a fair duty; and when the Senator says that this fruit can not be weighed, and objects that the duty is not specific, I ask what can be more specific than the imposition of duty by weight? Every barrel of sugar that comes into this country from Germany or from any other country, every cask of brandy, has the gross weight, the tare, and the net weight marked upon it.

So far as damaged fruits are concerned, the fact of the damage can be verified by the weighers. In answer to that, I may say that I have a letter from the Secretary of the Treasury stating that there is no trouble whatever in weighing fruit that comes into this country.

It seems to me, Mr. President, that this is a specious argument, a special plea by the agent of a steamship company. Every transportation company of this country is coming down to a weight basis, and their freight is classified upon a weight basis. I am in the steamship business myself, and I know how easy it is to juggle with figures about measurements. You can measure an oblong, a square, a triangle, or a torpedo-shaped box; and it takes quite a mathematician to make a calculation of the contents. The steamship men, from what I know of them, generally favor their side of the house, or the agents do certainly. Therefore, it is fair, right, and proper to have this specific duty by weight.

As to the special plea about the damage to the fruit, my friend knows well—because he is thoroughly conversant with the law—that if there is 10 per cent damage to any of the fruit, they have the right to reject it and to surrender it to the Government, and therefore it pays nothing. If there were 100 boxes of limes, or lemons, or oranges, and it was found that 10 of them had been spoiled on the voyage, the importers simply segregate them and say to the inspector: "We surrender that 10 per cent of this invoice," and that is the end of it.

Mr. McLAURIN. I have a letter here, Mr. President, from a genuine importer of fruit, who is not connected with any steamship company, and which is a strong support of the position taken by the Senator from Arkansas [Mr. JONES]. The letter comes from Charleston, S. C., and I ask that it may be read.

The VICE-PRESIDENT. The Secretary will read as requested.

The Secretary read as follows:

CHARLESTON, S. C., *June 7, 1897.*

DEAR SIR: Your favor of the 4th instant has our attention. Replying to the same, we beg to state we have no data to give on the subject except what we have written you of in our first letter.

The entire matter, condensed in a nutshell, is that a duty of 1 cent per pound will simply be prohibitory.

The following points, we think, can be used by you to good effect. The average price the year round on oranges and lemons from foreign countries will not exceed $1.55 per box. This you can have confirmed by reference to sales made by Messrs. Brown & Seccomb, of New York City, the largest fruit auction house in the United States, and headquarters for the sale of foreign oranges and lemons.

The weight of a box of lemons or oranges is 80 pounds, and the duty of 1 cent per pound means 80 cents per box; to this add the cost of the box, paper, wrapping, and freight, and you will see that it will not bring more than expenses, leaving nothing for the growers. The consequence will be that imports will cease, and the price will be such that only the wealthy can use them; whereas were they free, they would have no effect on the Florida nor the California crop, because they are such inferior goods to either one of the domestic crops.

Again, 50 per cent of the foreign crop has been marketed before the Florida crop begins, that is about November 1; and three-quarters of the crop from Florida has been marketed before the California begins, which is about December 10.

As we have said before, the quality of the foreign fruit is so much inferior to either the Florida or the California fruit that even when Florida had her crop of 5,000,000 boxes they sold for 50 per cent more than any Mediterranean fruit did, and do now, and will always continue to do so.

We again beg leave to assert that it is only the poorer classes who buy the imported fruit, as anyone who can afford it will readily pay double the price for a Florida or California orange that he would for an imported one; and as we have said in our first letter, the duty can not help Florida or California, and must deprive the poor of the fruit and simply prohibit the importation of fruit.

If the proposed duty is passed, the result will prove our prediction, and will be a great imposition on the middle classes.

As regards the grape fruit or shaddock, they should remain as they are now—that is, free. There is none raised here to speak of; the industry is only in its infancy, and it will take years before any size of a crop is raised at all. Florida and California together do not raise one-thousandth part of the consumption. This fruit is mostly used in a case of sickness, and they weigh from about four to five pounds each and sell for from five to six dollars per hundred, and if this duty of 1 cent per pound is imposed upon them, you can see just about what it means.

Regarding difference between duty per pound and duty per thousand, it will require double length of time to weigh a cargo of oranges in bulk (in which way a good many are imported) than to count them. Besides, oranges are sold by the thousand and not by weight, and we think complaints would be caused on this score alone, not to say that extra costs would be put to the Government; and this, added to the fact that only the moderate classes would suffer, should be called to the attention of the Senate.

If this high tariff is passed, it will not only deprive the poor man of his oranges and lemons, but will take away revenue from the Government, furnish less freight for steamships and railroads, less business for importers and brokers.

We can not see why the entire people of this country should be taxed simply to enable a few growers in Florida and California to sell their products for more than market price. Nor can we be persuaded to believe that high protection will improve the quality of the imported orange and enable them to be put on competition with California or Florida oranges, which are of so much superior quality.

If the Senate passes this tariff, we hope they will find comfort in the misery and oppression they will cause the poorer classes by it. Thanking you for your kind attention and wishing you success,

We remain, very respectfully, yours,

HENRY BAYER & SON.

Hon. JOHN L. McLAURIN,
United States Senate, Washington, D. C.

Mr. GRAY. Mr. President, as anxious as I am to see the end of the tariff discussion, and as unwilling as I am to protract it even for a few moments by any contribution of mine, I can not allow this schedule to pass without adding my protest to that of other Senators in regard to the iniquity of the proposed duty. It is a good illustration of the devastating effect that a surrender to the principle of commercial restriction works upon otherwise good and clear minds. Once grant the power to any class to use the sovereign power of the country for their own benefit, and at once all the evil characteristics that attach to power and to despotism will characterize its exercise.

Mr. President, this is a wanton and a cruel tax upon the poor people of this country. My amiable and good friend the Senator from California, who I know has as much of the milk of human kindness as anyone, is yet a good illustration of what I have just spoken of—how forgetful he may become of the wider interests of humanity and of kindness and of benevolence, which generally possess his breast, when he becomes the advocate here of an especially greedy and grasping interest.

Mr. HOAR. May I ask the Senator from Delaware a question?

Mr. GRAY. Not now; as the Senator from Massachusetts says, not until I conclude what I am saying.

Mr. HOAR. I wish to know to which Senator from California the Senator from Delaware refers.

Mr. GRAY. I am speaking to the Senator from California in front of me [Mr. PERKINS].

In reply to the Senator from Arkansas, the Senator said, with a good deal of warmth of feeling I thought, that the Senator from Arkansas was making the plea of an importing agency and of transportation companies as against the interests of the fruit growers of the section of country represented by the Senator from California. If we were merely to balance the selfish interests of those two classes, I do not know whether we might not say that both are deserving. I do not see why the one deserves encouragement and commendation and the other malediction and reproach. It is an honest business, as the Senator from California knows, to engage in the transportation of the bounties of nature across the sea, and to bring them from one country to another in order that they may be enjoyed as widely as possible. But he has spoken of the class of fruit growers for whom he takes the floor, and he has commented with a good deal of severity upon the other class.

I wish to say that in the few words I shall utter I am speaking for a much larger and much more meritorious class, and that is the great body of the consumers of this country, those forgotten people of whom the Senator from Texas [Mr. MILLS] spoke so eloquently the other day. I am speaking for every fever-wasted patient in a hospital. I am speaking for the poor wan boy and girl who, in the paroxysm of fever, need a cooling fruit that can be bought for a penny apiece. I am speaking for those who are excluded from the high-priced productions of the California groves and the Florida groves, and it is on that account that I thought it worth while to delay the Senate, for a few moments at least, while the car of progress in this cruel and, as I have characterized it, wanton proposition rolls along.

Mr. President, this tax, unless the figures I have are entirely erroneous, will amount to an increase of 411 per cent over the Wilson Act, the present tariff law, and an increase of 280 per cent over the McKinley tariff act of 1890. What is the justification for it? The letter to the Senator from South Carolina [Mr. MCLAURIN], just read, states, and states truly, I have no doubt, that the oranges that come from Sicily, inferior in quality to California and Florida oranges, selling for a cent apiece where the others sell for 5 or 6 cents apiece, come at a time when the Florida orange and the California orange are not in the market. They supply a vacuum in the market and do not seriously interfere with the American production. But if they did, what of it? Why, then, should we put ourselves at the mercy of those who have been blessed with the bounty of nature and have been able to cultivate this fruit, no doubt to their own advantage, and pay the high wages that American workmen enjoy? Why should we, in their interest, put this additional tax to go not into the Treasury, but into the pockets of the favored few who have so developed this industry as has been portrayed by the Senator from California?

If those orange groves have flourished, if this industry has been fairly profitable in the past, why do they seek additional profit to be levied not out of the ordinary commercial competition of the world, but from legislation and out of the pockets of the people who can least afford to pay it?

Mr. President, this is all I intend to say. It is all I can say. It pertains to all this schedule. It pertains to the pineapple as well as to the orange, for the pineapple, as we will see further on, is to be made a very expensive luxury, and it will take out of the reach of the poor people of this country a healthful, necessary fruit product, one that adds to the enjoyment and comfort of the people and does a little to relieve the hardship of those who have to toil for their daily bread and for the scant subsistence which in distressed times comes to them. I do not see why we should now approve such a wanton and cruel proposition.

Mr. PERKINS. Mr. President, I can not permit the remarks of my friend the Senator from Delaware [Mr. GRAY], the philanthropic views which he has so feelingly expressed in sympathy for the sick and fever patients, to go without extending to him my right hand of fellowship in sympathy. I think, perhaps, that is one reason why I feel it incumbent upon me to champion the citrus growers of California—the orange and lemon growers. I have in mind an occasion, some three or four years since, when the poor sick people were famishing from thirst, dying with fever heat because there was no lemon, no lime to appease their thirst. Our philanthropic friends who represented the foreign steamship companies imported millions, and advanced the price from $2 and $3 until it reached $8 a box. Some of our California orchardists had a few thousand boxes placed away in their storehouses, and they sent them into the market, and the fever patients were relieved by California coming to their rescue. They did it then and they will do it now, and I am on his side, for the people, in order that they may have cheap fruit and good fruit.

The trouble is that European countries have placed such a high duty upon citrus fruits that only the very best fruit is taken into those countries, while the poor windfalls are sent into this country, carrying with them pestilence and disease frequently, for they are condemned by the quarantine officers and in many instances are thrown overboard.

Now as to the duty. I have made a corresponding table. I will not weary the Senate by going through all of its details, but taking the average price, in 1895 it was 65 per cent ad valorem on 1 cent a pound. In 1896, taking the average of the twelve months, it was 39½ per cent ad valorem. These figures are here in answer to a circular sent from New York, and I am prepared to verify them.

This duty is a small one, I will say to my friend the Senator from South Carolina, who had a letter read here. This is 39 per cent, and the other day I had the pleasure of voting for over 100 per cent on rice. I thought it was right. I want to protect South Carolina and all the other States against the cooly labor that is sending rice into this country, but we want but 35 to 39 per cent.

Mr. WHITE. Mr. President, I trust that the rumor which has lately gained currency with respect to an island where coolies produce rice, that it is to be incorporated as a part of the American Republic, may prove to be somewhat of a canard.

I wish to say one word in reference to the circular read by the Senator from Arkansas [Mr. JONES]. The assertion that fruit would be injured by weighing is to me a novelty. If it is true in the United States, it must be true in France and England, and all the countries of Europe where duties are imposed upon this article, for everywhere they weigh the article. That is a complete answer to that statement.

Another thing. The same authority states that it will be great difficulty in finding the rotten fruit. They pay a duty now upon measuring the boxes. How do they find the rotten fruit by measuring the boxes? Can they not find it just as well if they weigh the boxes?

The packages that come in now are much wider in the middle than at either end. The measurement is usually made by a tapeline. The length of the box is measured, and the end of the box is measured, and in that way they bulge it a good deal on the revenue officials. Pound duty has been found, in other countries, to work well, and we are simply behind the times in trying to levy the duties as we have been doing in the past. As far as concerns this being an extreme duty, it is not. On the present price it will not exceed 45 per cent ad valorem.

I will say that in 1896 California packed 1,340,000 cases of fruit, and produced 84,000,000 pounds of raisins, 148,500,000 pounds of dried fruit, 51,000,000 pounds of prunes, and about 8,000 carloads of oranges. She also produced $350,000 worth of nuts. There are 76,000 acres set out to oranges and 70,000 planted in prunes. Her lemon product in 1897 will aggregate about 1,000 carloads, at 280 boxes to the car, or 280,000 boxes, upon which the freight, at $1.10 per box, equals $380,000. The orange product for 1897 is 7,100 carloads, each car containing 336 boxes, or a total of 2,385,600 boxes, upon which the freight, at 90 cents per box, equals $2,147,040, or an aggregate freight for oranges and lemons alone of about $2,500,000. Riverside alone pays nearly $700,000 in freight. It is within the figures to say that the freight rates annually paid by California upon green and dried fruits, including citrus fruits and prunes and raisins, approximate $6,000,000.

Mr. JONES of Arkansas. Mr. President, I still believe there will be some difficulty of administration, as suggested by the gentleman's letter which I read. The delay in taking the fruit from the ships into the hands of the dealers of course always results in more or less injury to the fruit. The longer the delay is the greater the injury to the fruit. Unpacking and reexamining fruit in boxes must take a very great length of time, and it must be a very considerable annoyance. But I do not propose to discuss that point any further.

I understand perfectly well that this paragraph will remain in the bill, as the balance do. It will stay here exactly by the same force and the same power which has kept so many unjust things in the bill heretofore. But there is one other point I wish to call attention to before we leave this paragraph. I was struck with the providence of the majority of the Finance Committee when our attention was called by the Senator from Iowa to paragraph 535½ in the free list about the importation of fish. I wish to call particular attention to this, and the reason for this being done, and then I want to read a letter from a prominent citizen of the United States about the fruit business. The free paragraph as to fish says:

Fish, fresh, frozen, or packed in ice (except salmon), caught in the Great Lakes or other fresh waters—

Now, this is the part to which I wish you to pay particular attention—

by or for American fishermen or citizens of the United States.

There seems to be a desire there on the part of the committee to take care of the people of the United States even when they hire foreigners to catch pauper fish in outside waters. They are to be allowed to come into the United States free.

I have a letter, a very short one, written by Mr. J. A. Robertson, a gentleman well known to many members of the Senate perhaps, a gentleman of high character and high standing, whose statements will be accepted as true by everybody who knows him. It is written from Monterey, Mexico. The letter is short and explains itself:

First, presenting my apology for annoying you about a personal matter, but feeling that you do not wish to see an injustice done, I beg to explain that I am the owner of a large orange and fruit farm at Montemorelos, in this State. I have been engaged in this enterprise for about seven years, and my trees will come into bearing some this year and generally next year. Under the McKinley bill the duty on oranges was 25 cents per box of 2 cubic feet. Under the Wilson bill the duty was reduced to 20 cents per box—8 cents a cubic foot—and an ad valorem of 4 cents a box. The Dingley bill proposes a tariff of 20 cents a cubic foot, or 40 cents a box. Now, the California people are not yet satisfied and want their Senators to ask for a duty of 1 cent per pound, which would be about 75 cents per box, which does not seem very large for a single box, though it is equivalent to $210 per car.

An orange grove in full bearing in California will produce from 4 to 5 boxes per tree, with 100 trees to an acre, being equivalent to from 400 to 425 boxes per acre, which makes a tariff in their favor of from $275 to $300 per acre annually, which is certainly unnecessary and uncalled for to properly protect their interest, particularly when the Mexican orange crop matures from ten to fourteen weeks earlier than their crop and at a time when there is no fruit of that character on the market.

Certainly it is not the policy of the American people to so favor any particular industry as to inflict a privation upon its citizens, and especially in protecting the fruit growers of California against a fruit that does not really enter into competition with them, but meets a requirement of the people at a time when they can not supply it.

The duty imposed in the McKinley bill was entirely fair and was satisfactory, and it was upon the strength of that duty that I began the extensive culture of oranges in this country which I have.

I submit these facts to you with the hope that they will in some way attract your sympathy and that the attention of the proper committee may be called to the matter in time to give it careful consideration before the bill is passed.

Anticipating your gracious compliance, I convey my thanks as well as those of the numerous other Americans who have engaged in a similar business here.

As I say, this comes from J. A. Robertson, a gentleman known to many of us. He states the case very clearly and so plainly that it does seem to me the committee, which is so careful to look after the interests even of the money of an American citizen when he hires a foreigner to catch foreign fish that it is provided that the fish shall be allowed to come in free, should present a provision by which this American citizen, who has put his money into the culture of oranges in Mexico, when he believed he understood what the law would be, should be protected against this exorbitant increase in a tax that is levied against him so as to keep his oranges out of the country at a time when there are no American oranges, practically, in the market.

The VICE-PRESIDENT. The question is on agreeing to the substitute proposed by the Senator from Arkansas.

The substitute was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, on page 78, after line 15, to strike out paragraph 266 and insert in lieu thereof the following:

266. Orange peel or lemon peel, preserved, candied, or dried, and cocoanut meat or copra, desiccated, shredded, cut, or similarly prepared, 2 cents per pound; citron or citron peel, preserved, candied, or dried, 4 cents per pound.

Mr. ALLISON. In line 22, after the word "two," I move to insert "and one-half;" so as to read "2½ cents."

The PRESIDING OFFICER (Mr. BURROWS in the chair). The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. VEST. I simply wish to call attention to the fact that this is an increase of one-half cent over the McKinley Act and from 30 per cent under existing law.

The reading of the bill was resumed, as follows:

267. Pineapples, in barrels and other packages, 6 cents per cubic foot; in bulk, $6 per thousand.

Mr. QUAY. Mr. President, I do not at present wish to move to amend the paragraph, although I may be compelled to do so later. The rate per cubic foot ought to be 15 cents instead of 6, to do justice to the agricultural interests of the only State in the nation that produces pineapples, and instead of $6 per thousand it should be per pound just one-half the duty to be placed on Zante currants. I suggest to the Senator from Iowa in charge of the bill that the whole of this paragraph go over.

Mr. ALLISON. Very well.

Mr. VEST. Before it goes over, I wish to call attention to the fact that this is a horrible example of an increase over the McKinley Act. We were told that in no instance was it proposed in this bill to go over the McKinley rates. Pineapples under the McKinley Act were free, and 20 per cent was imposed under the Wilson Act, while in this paragraph the committee propose 6 cents a cubic foot and $6 per 1,000.

Mr. QUAY. I desire to call the attention of the Senator from Missouri to the fact that he, as one of the members of the Committee on Finance when the tariff bill of 1894 was being considered, thought proper to take pineapples from the free list and place them upon the dutiable list, in his charity to the State of Florida.

Mr. VEST. Nobody in the Senate knows better why that was done than the Senator from Pennsylvania.

Mr. QUAY. That is also possible.

Mr. VEST. He knows we were not free agents with respect to that bill as to a great many duties. With one majority in the Senate, we could not lose a fraction of a vote, and we were held up on a great many things.

The PRESIDING OFFICER. Without objection, the paragraph will be passed over.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 268, line 4, page 79, before the word "cents," to strike out "five" and insert "three;" so as to read:

Nuts—

268. Almonds, not shelled, 3 cents per pound; clear almonds, shelled, 7 cents per pound.

Mr. ALLISON. I desire to modify the amendment, in line 4, by inserting "4 cents" instead of "3 cents;" and in line 5 by inserting "6 cents" instead of "7 cents;" so as to read:

268. Almonds, not shelled, 4 cents per pound; clear almonds, shelled, 6 cents per pound.

Mr. JONES of Arkansas. The impression has gone out all over the country that the Senate committee, in reporting the Dingley bill, so called, from the committee, intended materially to reduce what seemed to be extravagantly high rates in that measure. I confess I am astonished that whenever we reach in this bill a proposition to carry out one of the committee amendments the committee proposes at once to recede and to accept and stand by the rates that came in the Dingley bill. It seems to me that it would have been better, if the majority of the committee intended to take the Dingley bill as it came from the House, to have reported it to the Senate in that way and to have stood by it, so as to let the Senate and the country understand that they intended to take the high rates of the Dingley bill from the beginning, and not make any pretense of making reductions in these paragraphs, upon which we have been led to believe there were going to be material reductions from the Dingley bill.

Mr. ALLISON. The Senator from Arkansas does not understand the amendment.

Mr. JONES of Arkansas. I thought I did.

Mr. ALLISON. The amendment proposed is 4 cents, where the rate in the House bill is 5 cents.

Mr. JONES of Arkansas. The Senator proposes to strike out "three," as first reported, and to insert "four."

Mr. ALLISON. Yes; but the bill as it came from the House reads "5 cents."

Mr. JONES of Arkansas. I thought perhaps the Senator did not want to do the whole thing in one amendment, but that before we would leave the paragraph the Senator would make the other change.

Mr. ALLISON. The Senator is right about the first proposition.

The PRESIDING OFFICER. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, on page 79, paragraph 269, line 6, after the word "shelled," to strike out "three" and insert "two and one-half;" and in line 8, before the word "cents," to strike out "six" and insert "five;" so as to make the paragraph read:

269. Filberts and walnuts of all kinds, not shelled, 2½ cents per pound; shelled, 5 cents per pound.

The amendment was agreed to.

The next amendment of the Committee on Finance was, in paragraph 270, page 79, line 10, before the words "one cent," to insert "one-half of;" and in line 11, before the words "per pound," to strike out "and one-half cents" and insert "cent;" so as to make the paragraph read:

270. Peanuts or ground beans, unshelled, one-half of 1 cent per pound; shelled, 1 cent per pound.

Mr. VEST. I simply wish to call attention to the fact that of peanuts unshelled we imported, in 1896, $2,359,000 worth, and of peanuts shelled we imported $4.24 worth. I suppose that this increase of duty is for the purpose of protecting the peanut growers from the $4.24 worth imported from abroad.

The amendment was agreed to.

The next amendment of the Committee on Finance was, in paragraph 271, page 79, line 13, after the word "one," to strike out "and one-half cents" and insert "cent;" so as to make the paragraph read:

271. Nuts of all kinds, shelled or unshelled, not specially provided for in this act, 1 cent per pound.

The amendment was agreed to.

The Secretary read as follows:

Meat products:

272. Bacon and hams, 5 cents per pound.

Mr. VEST. I move to strike out "5 cents per pound" and insert "20 per cent ad valorem."

Here is a conspicuous example of protection to the American farmer which must not pass unnoticed. We exported in 1896 to foreign countries from the United States $33,442,847 worth of bacon and $12,669,763 worth of hams. We imported of bacon and hams $44,906 worth, that amount coming in the shape of the Westphalia hams, which are very much prized by epicures and are sold in the first-class hotels and restaurants of New York. Here is an object lesson which, as a matter of course, will go for nothing: $33,442,847 worth of bacon, $12,669,763 worth of hams, making $46,000,000 of bacon and hams, are sent from this country abroad, and we increase the duty in order to protect the American producer of bacon and hams from $44,906 worth, which come in as fancy hams from the Continent of Europe; yet I have no doubt my Republican friends will go to the farmers and say, "*We*, *we* saved you from an influx of bacon and hams. We saved your bacon against the pauper hogs of Europe;" and the Republican party stands and affectionately caresses the bacon and ham makers of the United States.

I ask for a vote on the amendment which I have submitted.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. In paragraph 272, page 79, line 16, strike out "5 cents per pound" and insert "20 per cent ad valorem;" so as to read:

Bacon and hams, 20 per cent ad valorem.

The amendment was rejected.

The next amendment of the Committee on Finance was, in paragraph 273, page 79, line 17, before the word "mutton," to strike out "Beef" and insert "Fresh beef, veal;" so as to make the paragraph read:

273. Fresh beef, veal, mutton, and pork, 2 cents per pound.

The amendment was agreed to.

Mr. JONES of Arkansas. I move to strike out "2 cents per pound" and insert "20 per cent ad valorem."

Mr. VEST. Now I want to complete the object lesson. In 1896 we exported from this country of foreign pork $43,739 worth and imported $1,560 worth. We exported of pickled pork $3,172,461 worth and imported $118,000 worth. We exported of fresh beef $18,974,107 and imported $24,569 worth. We exported in 1896 of canned beef $59,371 worth, and we imported of all these, beef, veal, etc., $9,685 worth. Notwithstanding the enormous exports and the inconsiderable imports, we are now protecting the American beef and pork industry in the way indicated in this bill.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Arkansas.

The amendment was rejected.

The Secretary read the next paragraph, as follows:

274. Meats of all kinds, prepared or preserved, not specially provided for in this act, 25 per cent ad valorem.

Mr. JONES of Arkansas. I move to strike out "twenty-five" and insert "ten;" so as to make the duty 10 per cent ad valorem, which is the present rate.

The amendment was rejected.

The next amendment of the Committee on Finance was to insert the following as a new paragraph:

274. Dead game, and game meats, 2 cents per pound.

The amendment was agreed to.

The Secretary read the next paragraph, as follows:

275. Extract of meat, not specially provided for in this act, 35 cents per pound; fluid extract of meat, 15 cents per pound.

Mr. JONES of Arkansas. I should like to have that paragraph passed over.

Mr. ALLISON. I propose to amend it so as to perfect it. However, I understand the Senator from Arkansas desires to have the paragraph go over, and I shall not object.

The PRESIDING OFFICER. The Senator from Iowa proposes an amendment to the paragraph, which will be stated.

The SECRETARY. Add at the end of paragraph 275, page 79, line 25, the following:

But the dutiable weight of the extract of meat and of the fluid extract of meat shall not include the weight of the package in which the same is imported.

Mr. JONES of Arkansas. That is a very great improvement, but I should like to have the paragraph go over for the present.

Mr. ALLISON. Is there any objection to this amendment?

Mr. JONES of Arkansas. There is no objection to the amendment. I think it is right.

Mr. ALLISON. Then let the amendment be agreed to, and the paragraph be passed over.

The PRESIDING OFFICER. If there be no objection, the amendment will be considered as agreed to, and the paragraph will be passed over.

The Secretary read the next paragraph, as follows:

276. Lard, 2 cents per pound.

Mr. VEST. I move to reduce the rate from 2 cents to 1 cent a pound. I ask the Secretary to read an official report by Worthington C. Ford, Chief of the Bureau of Statistics. Read the heading and down to the subhead "Tallow."

The Secretary read as follows:

EXPORTS OF LARD, ETC., FOR FEBRUARY.

Worthington C. Ford, Chief of the Bureau of Statistics, submits the following statement of the exports of lard, tallow, oleo oil, and oleomargarine from the United States during the month of February, 1897:

LARD.

	Pounds.	Value.
February, 1897	41,941,199	$2,063,040
February, 1896	25,631,103	1,789,697
Eight months ending February, 1897	328,007,983	16,898,314
Eight months ending February, 1896	335,153,134	23,171,715

Mr. VEST. In view of those figures, I should like to have a reply to one question. I expect no satisfactory reply. Why should we double the duty upon this article when we export that enormous amount after supplying the home market? Is it to be pretended that this is any protection to the American producer? Is it to be pretended that any protection is necessary under the circumstances? It shows what a miserable farce this has degenerated into. I suppose the purpose is to furnish a campaign argument to the raisers of hogs in the West and South.

Our friends upon the other side vastly depreciate the intelligence of our people if they think that this will be looked upon in any other light than the master of the grange from Pennsylvania viewed it in his testimony, which I read the other day, before the Ways and Means Committee of the House, when he said it was an insult to the intelligence of the farmers of this country to attempt to make them believe that when they made enormous exports of an article an increase of the tariff duty was in their interest. Here is an unparalleled exportation of this article, and when we are the great exporting country of the world, here the duty is increased 100 per cent, and the farmers are expected to believe that it is done for the purpose of protecting them.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Missouri.

The amendment was rejected.

The next paragraph was read, as follows:

277. Poultry, live, 3 cents per pound; dressed, 5 cents per pound.

The next paragraph was read, as follows:

278. Tallow, 1 cent per pound; wool grease, including that known commercially as degras or brown wool grease, one-half of 1 cent per pound.

Mr. VEST. I ask the Secretary to read the official report of Mr. Ford as to tallow.

Mr. FORAKER. I ask that paragraph 278 be passed over.

The PRESIDING OFFICER. The Senator from Ohio asks that the paragraph be passed over.

Mr. ALLISON. All right.

The PRESIDING OFFICER. The Chair hears no objection, and the paragraph is passed over.

The next amendment of the Committee on Finance was, under the heading "Miscellaneous products," in paragraph 279, page 80, line 8, after the word "Chicory-root," to strike out "raw, dried, or undried, but unground, 1 cent per pound; chicory-root;" and in line 12, after the word "act," to strike out "three" and insert "two;" so as to make the paragraph read:

279. Chicory-root, burnt or roasted, ground or granulated, or in rolls, or otherwise prepared, and not specially provided for in this act, 2 cents per pound.

Mr. ALLISON. I ask that the first amendment of the committee be disagreed to.

The PRESIDING OFFICER. If there is no objection, the first amendment is disagreed to.

Mr. ALLISON. And the second amendment——

Mr. VEST. Let us understand the effect of that.

Mr. ALLISON. In behalf of the committee, I modify the amendment in line 12 by inserting after the word "two" the words "and one-half;" so as to read "2½ cents a pound."

The PRESIDING OFFICER. If there is no objection, the amendment as modified will be agreed to.

Mr. JONES of Arkansas. And thereby you raise the rate higher than under the McKinley Act, or higher than the Dingley bill.

Mr. ALLISON. Not so high as the Dingley bill.

Mr. VEST. Higher than the McKinley Act.

Mr. ALLISON. We are steering under the House provision in this paragraph at least, but it seemed to me that we had reduced the duty a little too low on the prepared article.

Mr. JONES of Arkansas. I should like to ask the Senator if this article, chicory, is used for any other purpose than to adulterate coffee?

Mr. ALLISON. I believe it is a substitute and an adulterant as well. It improves coffee, I am told. I think it can bear a revenue duty.

Mr. JONES of Arkansas. I understand it is a practical fraud, and that the purpose is to enable grocers who choose to do so to

mix a cheaper stuff with coffee and to sell it as coffee rather than to sell the coffee itself.

Mr. ALLISON. Does the Senator want to raise the duty in order to prevent its importation?

Mr. JONES of Arkansas. I confess I am somewhat at a loss to know just how it should be treated.

Mr. ALLISON. I think it should be 2½ cents a pound.

Mr. JONES of Arkansas. I do not see why we should undertake to promote the development of a domestic fraud, and I am not particularly anxious to confer any favors on a foreign fraud. It seems to me that the thing is a fraud from end to end.

Mr. ALLISON. Between the difficulties in the way, I think we can compromise upon 2½ cents a pound on prepared chicory, and whatever the result, our own people——

Mr. JONES of Arkansas. Is that for the purpose of protection?

Mr. ALLISON. For protection and revenue.

Mr. CHANDLER. I desire to state to the Senator from Arkansas, in view of his remark that this is a fraud, that the senior Senator from Nebraska [Mr. ALLEN] would take occasion, if he were present, to controvert that statement at great length.

Mr. ALLISON. I hope he will not do that.

Mr. JONES of Arkansas. If the Senator from New Hampshire is familiar with the opinions of the Senator from Nebraska on the subject, perhaps he will favor the Senate now by stating what those opinions are.

Mr. CHANDLER. I can make the statement shorter than the Senator from Nebraska would do if he were here. He gave me a fine package of chicory, made and prepared as a product of his own State, and said that he thinks it is as much entitled to protection as anything that is contained in the bill. He omitted to say that he should vote for a duty upon anything else besides chicory, but I think, perhaps, he would object if he were here; at any rate, I know he would speak at great length, if he were here, on account of the remark which the Senator from Arkansas has made, that the protection of chicory, a native product of great value in Nebraska, is a fraud.

Mr. JONES of Arkansas. The Senator from New Hampshire seems strangely to misunderstand what I said. I did not say that the protection of chicory is a fraud; I do not think that I said that the use of chicory is a fraud. I said that such was my understanding. I should be glad to have the Senator explain to the Senate now, as he seems to be an expert on the subject, if the sole purpose of the production of chicory is not to adulterate coffee?

Mr. CHANDLER. I am joining now with the Senator from Arkansas in reducing the duty on the products, and therefore it is not pertinent——

Mr. JONES of Arkansas. What is the Senator's theory in wanting the duty reduced? I am seeking light.

Mr. CHANDLER. Therefore it is not pertinent to ask me whether it is a fraud. But I think I will answer the Senator's question briefly. I do not understand chicory to be prepared for purposes of adulteration. I understand that as it is now prepared in Nebraska and sold as a cheap product it is to be used alone and without coffee.

Mr. FORAKER. As a substitute for coffee.

Mr. CHANDLER. As a substitute for coffee. If anybody chooses to mix it with coffee, no one will find any fault, any more than if a Southern gentleman mixes his drinks occasionally.

Mr. JONES of Arkansas. Will the Senator be kind enough to state whether he ever saw a cup of chicory unmixed with coffee or ever heard of anything of that sort practically?

Mr. CHANDLER. Oh, yes; I have heard of it from the Senator from Nebraska.

Mr. JONES of Arkansas. My own impression was that it was used only for the purpose of adulterating coffee, and it was for that reason that I did not think it deserved any particular fostering care at the hands of the Senate.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Iowa [Mr. ALLISON].

Mr. CHANDLER. Mr. President, one word, in order not to place the absent Senator from Nebraska in a wrong position. I understand that he is very anxious to have this duty, but does not want it as a protective duty; he insists upon it as a revenue duty.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Iowa, including the amendment of the committee as modified.

The amendment was agreed to.

The next amendment of the Committee on Finance was to strike out the following paragraph:

280. Chocolate and cocoa, prepared or manufactured, not specially provided for, valued at not above 12 cents per pound, 1½ cents per pound and 10 per cent ad valorem; valued above 12 cents per pound and not above 24 cents per pound, 2½ cents per pound and 15 per cent ad valorem; valued above 24 cents per pound and not above 35 cents per pound, 3 cents per pound and 20 per cent ad valorem; valued above 35 cents per pound, 50 per cent ad valorem; powdered cocoa, unsweetened, 5 cents per pound; and when packed in cans or packages made of tin or other metal, not exceeding 1 pound each in contents, an additional duty of 6 cents per dozen cans or packages; and when exceeding 1 pound, an additional duty of 3 cents per dozen for additional half pound or fraction thereof.

And in lieu thereof to insert:

280. Chocolate and cocoa, prepared or manufactured, not specially provided for in this act, valued at not above 15 cents per pound, 2 cents per pound; valued above 15 and not above 25 cents per pound, 2½ cents per pound and 10 per cent ad valorem; valued above 25 and not above 40 cents per pound, 5 cents per pound and 10 per cent ad valorem; valued above 40 cents per pound, 50 per cent ad valorem. The weight of the immediate coverings, other than the outer packing case or other covering, shall be included in the dutiable weight of the merchandise.

Mr. ALLISON. I desire, on behalf of the committee, to propose a modification of the substitute which is embraced in lines 8 to 21, inclusive. I will say to the Senator from Arkansas that this has been very carefully prepared by the experts at the Treasury Department, and that it does not essentially change the duty.

The PRESIDING OFFICER. The proposed modification will be read.

The Secretary read as follows:

280. Chocolate and cocoa, prepared or manufactured, not specially provided for in this act, valued at not over 15 cents per pound, 2½ cents per pound; valued above 15 and not above 24 cents per pound, 2½ cents per pound and 10 per cent ad valorem; valued above 24 and not above 35 cents per pound, 5 cents per pound and 10 per cent ad valorem; valued above 35 cents per pound, 50 per cent ad valorem. The weight and value of all coverings, other than plain wooden, shall be included in the dutiable weight and value of the foregoing merchandise. Powdered cocoa, unsweetened, 5 cents per pound.

The PRESIDING OFFICER. If there is no objection, the amendment will be agreed to.

Mr. VEST. There is objection, and very decided objection. This is manifestly an increase upon the amendment proposed by the majority of the committee. In the comparative statement, Mr. Ford estimates, by the amendment prior to this last one, an increase over the Wilson Act or the existing law from 11 per cent to 24 per cent, and in the higher grades from 35 per cent to 50 per cent. As I caught the reading of the last proposed amendment, it is unquestionably an increase over those figures, and I should like to know from the Senator——

Mr. ALLISON. It is a slight increase at the valuation of 35 cents rather than 40 cents.

Mr. VEST. I seriously object to this duty, but of course I do not expect what I say will have any effect upon the Senate. Here is an article which is one of food, a necessity to the American people, and unquestionably it is not necessary to protect any American industry. The duty as proposed in the original amendment was excessive. I should like to ask the Senator what new light has caused him to propose this increase now?

Mr. ALLISON. I will state to the Senator that the modifications of this paragraph were made after consultation, I may say, with those who import this article and those who manufacture it here, and it is better to equalize the different grades or brackets in the paragraph that the modifications were suggested. The general scope of the amendment is in accordance with the provision of the House, and in accordance with our original provision, except that we have reduced below the House provision in both our amendments.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from Iowa, modifying the amendment of the committee.

The amendment was agreed to.

The next amendment of the Committee on Finance was, in paragraph 281, page 81, line 22, after the word "cocoa-butterine," to strike out "six" and insert "three and one-half;" so as to make the paragraph read:

281. Cocoa-butter or cocoa-butterine, 3½ cents per pound.

The amendment was agreed to.

The next amendment of the Committee on Finance was, in paragraph 282, page 81, line 24, after the word "and," to strike out "other;" and on page 82, line 2, after the word "act," to strike out "one and one-half" and insert "two;" so as to make the paragraph read:

282. Dandelion-root and acorns prepared, and articles used as coffee, or as substitutes for coffee, not specially provided for in this act, 2 cents per pound.

Mr. ALLISON. I ask leave to modify the amendment by inserting "and one-half" after "two," so as to make these other substitutes for coffee accord with the provision already made respecting chicory.

Mr. JONES of Arkansas. I hope the Senator will explain to the Senate why it is necessary to raise the tax on acorns some 100 per cent higher than was proposed even in the Dingley bill. Is it possible that pauper acorns from abroad are going to exterminate American acorns?

Mr. ALLISON. The Senator understands, I think—I hope he does—that this is a provision relating wholly to substitutes for coffee not specially provided for in this act, and the duty is upon prepared substitutes for coffee. If acorns are thus prepared, I do not see why they should not pay a fair revenue as well as chicory.

Mr. JONES of Arkansas. My understanding is that acorns are used for other purposes besides.

Mr. ALLISON. Not those mentioned in this paragraph. It reads, "Dandelion-root and acorns prepared, and articles used as coffee, or as substitutes for coffee not specially provided for in this act."

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee as modified by the Senator from Iowa.

The amendment was agreed to.

The Secretary read the next paragraph, as follows:

283. Salt in bags, sacks, barrels, or other packages, 12 cents per 100 pounds; in bulk, 8 cents per 100 pounds: *Provided*, That imported salt in bond may be used in curing fish taken by vessels licensed to engage in the fisheries, and in curing fish on the shores of the navigable waters of the United States, under such regulations as the Secretary of the Treasury shall prescribe; and upon proof that the salt has been used for either of the purposes stated in this proviso, the duties on the same shall be remitted: *Provided further*, That exporters of meats, whether packed or smoked, which have been cured in the United States with imported salt, shall, upon satisfactory proof, under such regulations as the Secretary of the Treasury shall prescribe, that such meats have been cured with imported salt, have refunded to them from the Treasury the duties paid on the salt so used in curing such exported meats, in amounts not less than $100.

Mr. VEST. I remarked the other day that whilst there were many features in the tariff act of 1894 to which I seriously objected, but was compelled to accept in order to pass any bill at all, there were four features in that bill which reconciled me to those that were objectionable. Those features were the income tax, free salt, free lumber, and free wool. It was attempted to put a duty on wool. Much as I desired to pass some tariff bill in order that the party to which I belong should not be discredited and accused of inefficiency, I peremptorily declared in committee and in the Senate that if a duty was put upon wool I should vote against the bill. We have already taken lumber off the free list and put a duty upon it. I take it for granted that we shall put this duty on salt, and I have no doubt that we shall put what I consider an outrageous and excessive duty upon wool.

Nothing can better illustrate the protective system than the utter disregard of the interests of the immense masses of the consumers of the country in order to put additional profits into the pockets of certain classes. My illustrious predecessor in this Chamber, Thomas H. Benton, was in the habit of saying here and to his constituents that salt was the great preservative of nature. It is like the air we breathe, like the water that leaps down the mountain side and flows through the valleys without asking leave; yet with $130,000,000 of surplus in the Treasury, I am told that Democrats who have always preached the doctrine of a tariff not one cent above the expenses of the Government economically and honestly administered are prepared now to put a duty on salt against all the legends, traditions, teachings, and appeals of the great leaders of our party in all the past.

Mr. President, I have here a pamphlet showing why salt should remain upon the free list. It comes from the section which we have been notified will support a duty upon salt. I have here a statement signed by hundreds of the leading citizens, merchants and others, in New Orleans; in Monroe, La.; in Shreveport, La.; in Ouachita, La.; in Natchez, Miss.; in Kosciusko, Miss.; in Jackson, Miss.; in Macon, Miss.; in Yazoo City, Miss.; in Vicksburg, Miss.; in Crystal Springs, Miss.; in Greenwood, Miss.; in Monticello, Miss.; in Wesson, Miss.; in Durant, Miss.; in Holly Springs, Miss., and in a number of other places in the South, protesting against putting this duty upon salt.

I want to call attention to the sectionalism of this provision. While the fisherman of New England is entitled to a rebate upon all the foreign salt he uses in curing his fish, without limitation as to the amount, the meat grower of the West and South must produce $100 worth of meat or pack $100 worth of meat before he secures any rebate at all. Why this limitation put upon one section and not upon the other? It shows, Mr. President, that whilst it is pretended that there is no sectionalism in this bill, and the advent of Southern Senators to the cause of protection is hailed with more enthusiasm than when a soul is saved at a camp meeting, the whole thing is a pretense; and we always find the cloven foot of class legislation showing itself when the opportunity presents.

Out of respect to these gentlemen, many of whom I know personally in New Orleans and in Shreveport, where I formerly lived, I ask that the Secretary read that argument coming from citizens of the South.

The PRESIDING OFFICER. The Secretary will read as requested, in the absence of objection.

The Secretary proceeded to read the paper referred to, but before concluding was interrupted by

Mr. VEST. I will ask that the entire paper be printed in the RECORD, without being further read, as a part of my remarks.

The PRESIDING OFFICER. If there be no objection, it will be so ordered.

The paper referred to is as follows:

SALT SHOULD NOT BE TAXED.

NEW ORLEANS, LA., *June 1, 1897.*

To the honorable the Senate and House of Representatives of the United States, Washington, D. C.:

We respectfully beg to submit a short argument on the question as to whether salt should remain on the free list as it now is or go into the tariff as a dutiable item.

There is now pending before your honorable body a measure the title of which is "An act to provide revenue for the Government and to encourage the industries of the United States." In this proposed act, under the head of Schedule G, we find an item reading as follows: "Salt, in sacks or other packages, 12 cents per 100 pounds; in bulk, 8 cents per 100 pounds.

As stated in this act, the first object to be accomplished is to provide revenue. Should salt be placed on the dutiable list at this time, would it prove to be a satisfactory revenue producer? Judging by the recent past, when salt was dutiable, we contend that salt will not produce sufficient revenue to pay for its collection. Let us go back and review the facts. The war tariff enacted in 1862 was repealed in 1872. In making the new tariff of the latter year, instead of placing salt on the free list, it was included as a dutiable item, the rate being fixed (the same as is now proposed) at 12 cents per 100 pounds if in sacks, and 8 cents per 100 pounds if in bulk, which was equivalent to an ad valorem tax of 50 per cent. This was evidently a disappointment to the importers, for soon after the enactment of this tariff there began to appear in the annual reports compiled and published by the Government a perceptible falling off in the imports of salt; and with the exception of three or four years this continued while salt remained subject to a duty.

In confirmation of the above, we submit the following extract from official returns: The total dutiable value of the salt imported in 1874 was $2,102,000; while in 1879, five years later, it was but $1,685,200; in 1884, ten years after, it was only $1,527,500; and in fifteen years (1889) it was only $846,760; in 1893 it was but $622,563; and in 1894 it had shrunk to a total of but $483,283, a shrinkage in values of imported salt of 77½ per cent in twenty years.

The above refers not to the duties collected on salt, to which we will refer later, but is the yearly total value of all the imported salt which paid duty, said value being compiled by the Government.

The dutiable values were low, and there was but little fluctuations during the first fifteen or sixteen years—say to 1889—and were higher during the last four or five years; therefore the above, being a conservative statement, is also, we consider, a correct one.

Had the Government persisted in maintaining the excessively high duty then prevailing (and the identical rate is inserted in the pending bill), is it not evident that inside of five or six years the importations of salt would have ceased entirely? This did not happen. The importations fell off (as did the annual revenue derived from the duty on salt grow less and less) until, in 1893 and 1894, the receipts from this item were so small as to attract the attention of Congress, which then very wisely placed salt on the free list, where it should have been and where it should always remain.

Let us ascertain just what kind of a revenue producer salt proved to be during the last decade it was serving as a dutiable item.

The following, taken from the official statistics of the Government, shows, for the fiscal year ending June 30, the gross annual amount of revenue collected by the Government from the duty on salt from 1884 to 1894, inclusive:

1884	$762,201	1890	$394,215
1885	751,300	1891	408,789
1886	706,324	1892	329,143
1887	676,895	1893	301,972
1888	552,693	1894	220,803
1889	469,435		

It will be noted in the five years from 1884 to 1889 the falling off in revenue to the Government was nearly 40 per cent; in nine years it was over 60 per cent, and in ten years (1894) the Government's revenue had shrunk 70 per cent. It must be remembered that while under a special proviso, inserted in the tariff act, the Eastern fisheries were allowed to withdraw their salt from the bonded warehouses free of duty, the same is not considered in the above, nor has any deduction been made for the refunds under the same proviso allowed to the numerous large packers of meat in the West, who use foreign salt exclusively in preparing their products for exportation. While we do not know the amounts of these refunds, they must be considerable, and they tend to materially reduce the above very small annual revenue, which, as we have stated, are the gross receipts of the Government, it being absolutely necessary that while salt is included in the tariff the Government incurs the same care and expense in keeping records, checking, weighing, etc., in the case of these imports the duty on which is rebated as if they were paying a duty like the balance of the imported salt.

Looking at the pitiful amount of revenue indicated above, collected by the officials of the customs service employed on our thousands of miles of seacoast from Maine to Mexico and from Washington to Lower California, for the twelve months ending June 30, 1894, and again for the years ending June 30, 1892 and 1893, when there was no change anticipated in the tariff nor agitation about the duties on salt, we confidently assert that (after allowing for the rebates to be deducted therefrom) the net amount of these collections were not sufficient to reimburse the Government the cost of collection.

Though making every effort to ascertain the yearly amount of the duty paid back by the Government under the proviso, it was not, we regret, until after writing the above that we succeeded in securing some information prepared by the customs service, which, having a direct bearing on the case, and though incomplete, is, we consider, of sufficient importance to submit with this argument.

The following amounts were paid back to the exporters of meat who had used imported salt in curing same. Only nine of the customs districts are given, amounts paid out being as follows: 1889, $56,438; 1890, $71,049; 1891, $75,145; 1892, $73,856; 1893, $73,972.

This left the receipts of duty on salt for same years as follows: 1889, $412,997; 1890, $223,166; 1891, $323,644; 1892, $255,287; 1893, $228,000.

We have not the amount of the drawback for 1894, but the average for the five previous years is just $70,000, and as the system was the same for that fiscal year as had been maintained since 1872, no doubt the average was maintained that year. Making the allowance, we find the gross revenue on salt, as near as can be ascertained, was the very insignificant sum of $159,803.

These facts clearly show that, if placed on the dutiable list again, salt would not be a satisfactory revenue producer.

The second object to be accomplished, as stated in the pending act, is "to encourage the industries of the United States." We contend that the makers of salt in this country no longer need encouragement; having for so many years dominated the salt trade and dictated prices in the United States, they could without protection successfully cope with the imported article. Through favorable tariff enactments these manufacturers have been protected and encouraged for more than three-quarters of a century (the infant developing meantime into a robust industry), growing stronger and stronger, until in later years, finding no foe from without worthy of attention, they went to competing among themselves, and when a salt works was compelled to close, investigation invariably proved it was forced out of business by its neighbor, and not because of competition with foreign salt.

As evidence of this we submit the following abstract, taken from the statement of the mineral resources of the United States for the calendar year 1892, compiled by the Department of the Interior: "The amount of salt produced in the United States in 1892 was unprecedentedly large, reaching 11,698,890 barrels of 280 pounds, as against 9,937,945 in 1891. Although the yield was the largest yet obtained, the business was not by any means satisfactory to producers. Sharp competition for trade during the past two years (1891 and 1892) has cut the prices to such low figures that profits have almost disappeared and a number of the smaller concerns have been compelled to close their works. No more conclusive evidence of the improvement in the quality of the domestic salt is necessary than a study of the table imports, which show a steady decrease since 1885. The total value of the salt imported into

the United States in 1892 was nearly 50 per cent less than in 1885." The following extracts are also taken from statement of the same Department for the year 1893: "The salt product of the United States in 1893 was 117,882 barrels more than in 1892; prices ruling for 1892 were about as low as they could reach, so low indeed that a number of manufacturers ceased producing, though they were protected and encouraged by the heavy duty on foreign salt, finding the business unprofitable. Notwithstanding the low prices which have prevailed, and which have been due to keen competition among producers of domestic salt, there has been a laudable endeavor on the part of a number of domestic manufacturers to improve the quality of their product, and salt of American production has been so improved by new processes that importation of refined (foreign) salt has almost ceased to be a factor."

The same authority in the statement for year 1894, published in 1895, says: "Imports of foreign salt into the United States have shown an almost constant decrease since 1881, the decrease being particularly noticeable in the imports of refined salt due to the improvements in the manufacture by American producers which has placed the domestic product on a line with if not ahead of salts of foreign make."

We call attention to the last assertion: "The improvement in the manufacture by American producers has placed the domestic product on a line with if not ahead of salts of foreign make."

The statement from which the above extract was taken was written by an expert compiler, one equipped with the necessary knowledge acquired after many years' experience at such work, who was therefore in a position to know whereof he wrote; his conclusions, being indorsed by the chief of division, were also approved by the director of the Bureau, therefore being the conclusion of three of the most expert statisticians and compilers in the employ of the Government.

While the last statement was for the year ending December 31, 1894, it was compiled early in 1895, when foreign salt was not being excluded from the United States by a heavy duty, and the official announcement at such a time that "salt of domestic production was equal in quality if not superior to foreign make" is conclusive evidence that the salt industry had reached such a stage of superabundance of quantity (note amount of annual output) as well as perfection in quality as to no longer need encouragement and protection.

An impost duty was first placed on salt in July, 1789. During the 105 years following, to August 28, 1894, salt was on the free list for twenty-four years and dutiable for eighty-one years. In 1861 the rate was made very high, equal to about 75 per cent ad valorem, followed shortly after, in 1862, by a still higher rate, equaling 100 per cent ad valorem. This continued until 1872, when it was reduced to a rate equal to 50 per cent ad valorem. Here is an industry protected and encouraged for over eighty years, the last thirty-three years being consecutive, during all of which time our people have been heavily taxed on an article of absolute necessity to man and beast—an article used in many of the manufactures and in all food and food products. Carrying such a heavy tax for so many years, it is natural to suppose that great benefit was being derived by a large number of people and that many thousands of laborers found employment in the numerous salt works. What do the records show?

If we take the census of 1880, we will learn there were 276 establishments manufacturing salt in the United States, a capital investment of $8,500,000, with a total of 4,493 employees, who were paid $1,305,020 in wages annually, each laborer averaging $290 per year, or $24.16 per month, which is just 80 cents per day. The census of 1890 shows there were only 200 establishments, with a capital of $13,437,749, a total of 4,455 employees, less than 23 people, including manager, clerks, and laborers, to each salt works, whose annual wages, $1,762,491, an average of $400.11 to each employee per year, or $33.34 per month, or $1.10 per day.

It having been shown that collections from the duty on salt, owing to the prohibitory rate, were so small that the Government could not longer derive benefit therefrom, the question naturally arises, Who would be benefited by a tax levied on 71,000,000 people? Would it be a great army of laborers at liberal pay, or the [less than] 4,500 employees receiving the extravagant compensation in return for their labor of from 80 cents to $1.10 per day? No; the sole beneficiaries would be the few proprietors of the salt works, whose already enormous profits would be thereby increased.

For though salt is just as necessary to the well-being of all as is air or water, our people would be compelled to pay an advanced price on the salt they used, because to the regular profit in the selling price of the domestic article there would be added an amount equal to the duty paid on the imported salt, therefore the cost to the consumer would be increased to that extent.

When salt is again made dutiable, and thus added to the list of articles which it is claimed need encouragement, these beneficiaries will be encouraged to again take up and continue the concentration of capital and the consolidation of works. While the total capital invested in works in 1880 was but eight and one-half million dollars, in 1890 it was thirteen and one-half million dollars, but the number of establishments was decreased from 276 in 1880 to 200 in 1890, and further reduced to less than 160 in 1894, and this while the proprietors of these salt works were being protected and encouraged by the then existing heavy duty on all foreign salt. It was just eight years since, in June, 1889, that an effort at combination was made to form a salt union of all the makers in the United States by the formation of a company with a capital of $15,000,000. This union had option on all the establishments whose output was seven-eighths of all the salt produced in America, and it was principally because the few remaining establishments could not be secured, except at exorbitant prices, that the combination fell through. Who can predict that, salt being again made dutiable, the next attempt at combination will not be successful?

The following tabulated statement shows the total imports of all kinds of foreign salt and the total production of American salt from 1884 to 1894, inclusive, on basis of 2,000 pounds to the ton in both cases:

Year.	Total imported.	Total production of American salt.	Year.	Total imported.	Total production of American salt.
	Tons.	*Tons.*		*Tons.*	*Tons.*
1884	460,297	912,091	1890	246,837	1,228,779
1885	415,000	985,411	1891	239,247	1,308,312
1886	408,983	1,078,991	1892	235,075	1,637,845
1887	350,959	1,120,554	1893	195,983	1,665,609
1888	330,007	1,127,823	1894	172,739	1,815,438
1889	270,271	1,120,779			

We call attention to and request your careful consideration of the above, which was compiled for the period (the eleven years) immediately preceding the removal of the duty on salt. It clearly shows the effect the almost prohibitory duty was having. While the output of the American establishments was steadily increasing each year, the importations were as surely decreasing, being steadily driven from the market and out of competition, until, of the total amount of salt consumed in 1894, there were sold 172,739 tons of (2,000 pounds each) imported salt, which was only 9 per cent of the total consumption of this country for that year, 91 per cent being supplied by the American manufacturers.

While shrinkage in importation of the foreign salt amounted to 62 per cent during the eleven years, the increase in production of the American salt amounted to nearly 100 per cent in the same time.

How was it that during these eleven years the selling price of the American salt fell over 40 per cent, in spite of the protection afforded by a heavy duty? It certainly can not be claimed that this was due to foreign competition. The facts are, and can not be denied, that under the stimulus of a high duty, almost prohibitory, the domestic manufacture has been steadily growing—in fact, has been suffering from overproduction induced by excessive protection.

The proprietors of the American Salt Works late in 1893 and in 1894 predicted dire disaster and ruin to their business and a great falling off in the amount of the production should the duty on salt then prevailing be taken off. The contrary has proven to be the case, for their output for 1895, when salt was free, was 98,313 tons more than in 1894, when salt was dutiable, the total amount of the output of the American Works for 1895 being 1,913,751 tons, and there were 248,404 tons of foreign imported, which was less than 13 per cent of the total amount consumed during this year, when salt was free, and to exclude this insignificant competition Congress is asked to put a heavy duty on salt.

Respectfully submitted.

JACKSON & KILPATRICK,
New Orleans, La.

COPY OF PETITION AGAINST DUTY ON SALT.

[Original petition in the possession of Finance Committee of the United States Senate, Washington.]

The undersigned importers, exporters, ship agents, merchants, and consumers of salt at the port of New Orleans, La., and vicinity, respectfully submit for your careful consideration the following appeal against the placing of salt on the dutiable list.

Steamships coming to this port from Liverpool for cargoes of our products, such as cotton, cotton-seed oil, oil cake, lumber, staves, etc., bring salt. This salt, besides being a desirable cargo, always pays freight, thus contributing toward the cost of bringing steamers here, and to that extent permitting of a material reduction in the rate of freight on all outward cargoes of our American products which go to seek a market abroad.

On the other hand, should the importation of salt be prohibited, owing to the imposition of an excessively high duty, as now proposed, many of these steamers would be compelled to come in purchased ballast, and thus our exports, under such circumstance, would necessarily have to pay a higher freight, one sufficient to compensate steamer for the entire round trip.

Official statistics published by our Government show that of the total amount of salt consumed in the United States during 1895, more than 87 per cent was produced in this country, and though salt was then free of duty, less than 13 per cent was imported.

We submit, if a duty is levied on salt, it will be solely for the purpose of preventing this insignificant competition, and if the importations did not cease entirely, they would be so infinitesimally small the Government would not collect enough revenue from this item in the tariff to compensate for the cost of collecting same.

The rate now proposed (12 cents per 100 pounds on all salt in sacks and 8 cents per 100 pounds on all salt in bulk) would undoubtedly result in practically excluding all importations of salt.

We can not believe the advancement of our American industries is best secured by means of a prohibitory tariff that may result in such retaliatory tariffs by other countries as would discriminate against the products of the farms and factories of the United States.

NEW ORLEANS, *April, 1897.*

New Orleans, La.: Jackson & Kilpatrick, importers; B. H. Flashpoller & Sons, E. Feiblemian, Sons & Co., Jno. M. Parker & Co., Berkson Bros., C. Doyle & Co., H. T. Cottam Company, Limited, J. & B. Schutten, J. & M. Schwabacher Company, Limited, Fly Hobson & Talbert, V. Schwan & Co., and The Ledoux Company, Limited, wholesale grocers; Andrew J. McShane and Kuebel & Raquet, wholesale hides and wool; The Finnegan, Fitzpatrick Company, wholesale dealer hides and wool and exporters; J. H. Menge & Sons, Limited (per B. H. Menge, president), wholesale grocers and ship chandlers, etc.; H. B. Schreiber & Bro. and John T. Gibbons, wholesale grain dealers; H. & S. Blum, produce merchants; Albert Mackie Grocery Company, Limited (per Albert Mackie, president), Preston & Stauffer, and J. G. Spor, wholesale grocers; Smith Bros. Company, Limited (per J. B. Sinnott, president and manager), wholesale grocers and importers; Codifer Exterstein & Co. (per Hy. Exterstein, secretary), wholesale grocers and importers; American Brewing Company (Frank Beck, secretary); Lawrence Fabacher & Bros., restaurant; Clark & Meader, grocers and importers; A. Eldorado, Ark.: E. C. Wilson & Co., merchants.

Mr. VEST. Now I move, if I have not already done so, to strike out paragraph 283, on page 82, for the purpose of putting salt upon the free list; and on that I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. JONES of Arkansas. Mr. President, I shall not detain the Senate by any lengthy argument at this time on this question; but it does seem to me that it is one that is entitled to serious consideration at the hands of the Senate.

The amount of the domestic production of salt in this country is more than a million and a half of tons, and the total importations are only a little over 300,000 tons. Since salt was put on the free list, in 1894, there have been large amounts of capital invested in salt manufacturing. People who have been familiar with the business from their childhood, people who have been engaged in salt manufacturing for years, are investing large sums of money now in New York and in Michigan in building new salt works.

The American production has enormously increased since salt was put on the free list. The American salt makers have the markets of this country absolutely in all the North. The cost of delivering a sack of Liverpool salt in New York is about 82 cents. The New Yorkers can sell the same kind of salt for about 72 cents in New York, as claimed by the trade. The expense of bringing salt from abroad is, of course, considerable, and, taking that into consideration, it gives all the protection that the American salt producers ought to ask. Then, when you take into consideration the fact that the great bulk of the consumption of salt, estimated at 70,000,000 bushels, is in the great interior, the enormous advantage is in favor of the American producers in all the interior points over what they have on the seaboard.

There is but one section of this country where this is not the case. The English salt makers can lay their salt down cheaper in the Southern States than can the Northern salt makers, because the expense of transporting it from the Northern salt works to the Southern States is larger in proportion than the ocean transportation from England to the South. Of the 220,000 tons of salt imported into this country, more than 120,000 are imported into the South.

The effect of the adoption of this paragraph will be simply to increase the cost of the salt consumed by the Southern people. It will not bring salt into the Northern States, because the manufacturers of salt in that section of the country absolutely control the market now.

I have here statements made by salt manufacturers, which show the cost in detail of manufacturing and delivering salt at important commercial centers all through the country, showing that American salt can be made and laid down cheaper than it can be brought from abroad. There is absolutely no room for competition in the Northern market; it is a matter of no concern whatever, and the salt makers themselves would not have asked for the imposition of this tax to affect the salt in the Northern States. It is simply for the purpose of compelling the people who are already having a hard enough time in the Southern States to pay an increased price for salt that this tax was put upon it, as I believe.

Mr. President, the hour is late, and while this is a wonderfully interesting subject, and one which ought to attract the attention of all Senators, I shall not detain the Senate now by going elaborately into this question; but I wish to call the attention of Senators to the importations of salt.

In 1884 there were imported into this country 416,000 tons; in 1885, 370,000 tons; in 1886, 365,000 tons. The importation steadily decreased, year by year, down to 1894, when it came to 154,000 tons. In 1895, after salt had gone on the free list, there was an increase in the importation, and it went from 154,000 tons to 221,000 tons, and in 1896 it reached 246,000 tons. At the same time there was an increase in the domestic production of salt, while salt was free, of 231,000 tons; showing that the increase is enormously more rapid in the development of the domestic production than it is in the importation of foreign salt.

The statement is made in these papers that salt is delivered free on board cars at a dollar and a half a ton. The freight cost, as stated by the merchants, has been in no instance less than 6 shillings, and in almost every instance 6 shillings and 6 pence, making $1.62, the freight across the ocean thus amounting to more than the price of the salt, American made, delivered on board the cars. There is 100 per cent protection in the transportation alone across the ocean, which seems to me in all conscience to be enough.

Every human being, every domestic animal, every man, woman, and child, is compelled to use salt. It is an article of universal use; it goes into every home and is used at every meal. It is used for all domestic purposes.

Why we should now undertake to increase the cost of this article, an absolute necessary of life, when the natural conditions existing give the producers of it a protection of more than 100 per cent is beyond my comprehension, unless we stop to think that it seems to be the policy of the Republican party, wherever and whenever they see the possibility of levying a tax on the many for the benefit of the few, that they will avail themselves of every such opportunity. While it is the case now in this country that foreign salt can not interfere with the American production, except in the Southern States, there seems to be a desire to seize every opportunity to levy a species of blackmail on those who eat their bread in the sweat of their faces all the days of their lives in the Southern States, for the purpose of increasing the price to be paid to certain salt manufacturers of this country, when, after all, Mr. President, the result is no benefit to the salt producer. The transportation companies intervene between the two; and we

know how adept they are in turning whatever advantages the conditions may offer to their own use and profit.

I think that in the whole compass of this bill there is not a single provision which is more absolutely indefensible than this one of the tax on salt.

I should be glad to have the Senate consider some of the numerous arguments, some of the reasons and illustrations, which are as thick as blackberries in their season, why salt should remain on the free list; but I shall not trespass on the time or the patience of the Senate at this late hour to present them. I shall only repeat that I have letters on my desk from American salt manufacturers themselves, men who have put their money in Michigan salt works and in New York salt works, and who are handling salt by the ton, who say they have invested their money in the production of salt under free salt, and they state distinctly and clearly that they want no tax on salt; that they are perfectly satisfied that they can hold their own against anybody anywhere, and that this market can not be influenced by any outside importation; that it cuts no figure whatever.

Mr. President, the majority of the committee think that salt should be given free to packers of fish on the Atlantic Seaboard. What is the reason why packers of fish should have salt free any more than packers of beef? Why should the packers of fish have salt free any more than the men who want to use it for food? There is no reason for it that I can see except that that section of the country and its representatives are vigilant and active in looking after their local interests, and they have been in the habit in all tariff bills as they have been passed of making discriminations against the balance of the country and in favor of certain sections under their own particular care.

I sincerely hope that the patriotism of the Senate will be sufficient to prevent the perpetration of this great wrong by putting so monstrous a proposition as this upon the statute books, when it is clear that it can have but one effect, and that is to tax again an already overtaxed and overburdened people in one locality in this country. I demand the yeas and nays on this proposition.

The PRESIDING OFFICER. The yeas and nays have already been ordered on the motion of the Senator from Missouri [Mr. VEST] to strike out paragraph 283.

The Secretary proceeded to call the roll.

Mr. CANNON (when his name was called). I am paired with the senior Senator from Rhode Island [Mr. ALDRICH].

Mr. CLAY (when his name was called). I transfer my pair with the junior Senator from Massachusetts [Mr. LODGE] to the Senator from New Jersey [Mr. SMITH], and vote "yea."

Mr. GEAR (when his name was called). I am paired with the senior Senator from New Jersey [Mr. SMITH], and I transfer my pair to the junior Senator from Massachusetts [Mr. LODGE], and vote "nay."

Mr. KENNEY (when the name of Mr. HARRIS of Kansas was called). I was requested by the junior Senator from Kansas [Mr. HARRIS] to announce that he is paired with the Senator from Wyoming [Mr. CLARK].

Mr. MCLAURIN (when Mr. TILLMAN'S name was called). I was requested by the senior Senator from South Carolina [Mr. TILLMAN] to announce his pair with the Senator from Nebraska [Mr. THURSTON].

Mr. WELLINGTON (when his name was called). I again announce my pair with the junior Senator from North Carolina [Mr. BUTLER]. If he were present, I should vote "nay."

The roll call was concluded.

Mr. THURSTON. I transfer my pair with the senior Senator from South Carolina [Mr. TILLMAN] to the Senator from Kansas [Mr. BAKER], and will vote. I vote "nay."

Mr. LINDSAY. Except for the absence of my pair, the senior Senator from Michigan [Mr. MCMILLAN], I should vote "yea" on this proposition.

Mr. BURROWS. I transfer my pair with the senior Senator from Louisiana [Mr. CAFFERY] to the Senator from Nevada [Mr. JONES], and will allow my vote to stand.

Mr. WARREN. I desire to announce that my colleague [Mr. CLARK], who is unavoidably absent, is paired with the junior Senator from Kansas [Mr. HARRIS].

Mr. SEWELL (after having voted in the negative). Has the senior Senator from Wisconsin [Mr. MITCHELL] voted?

The VICE-PRESIDENT. He has not voted.

Mr. SEWELL. I withdraw my vote, being paired with that Senator.

The result was announced—yeas 24, nays 31; as follows:

YEAS—24.

Bacon,	Faulkner,	Mallory,	Roach,
Bate,	Gray,	Mills,	Turner,
Berry,	Heitfeld,	Morgan,	Turpie,
Chilton,	Jones, Ark.	Pasco,	Vest.
Clay,	Kenney,	Pettigrew,	Walthall,
Cockrell,	McLaurin,	Pettus,	White.

NAYS—31.

Allison,	Chandler,	Deboe,	Foraker,
Burrows,	Cullom,	Elkins,	Frye,
Carter,	Davis,	Fairbanks,	Gallinger,
Gear,	Mason,	Quay,	Thurston,
Hawley,	Nelson,	Pritchard,	Warren,
Hoar,	Penrose,	Proctor,	Wetmore,
McBride,	Perkins,	Shoup,	Wilson.
McEnery,	Platt, Conn.	Spooner,	

NOT VOTING—34.

Aldrich,	Gorman,	Lodge,	Sewell,
Allen,	Hale,	McMillan,	Smith,
Baker,	Hanna,	Mantle,	Stewart,
Butler,	Hansbrough,	Martin,	Teller,
Caffery,	Harris, Kans.	Mitchell,	Tillman,
Cannon,	Harris, Tenn.	Morrill,	Wellington,
Clark,	Jones, Nev.	Murphy,	Wolcott.
Daniel,	Kyle,	Platt, N. Y.	
George,	Lindsay,	Rawlins,	

So Mr. VEST'S amendment was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, on page 83, paragraph 284, line 2, before the word "cents," to strike out "two" and insert "one and one-half;" so as to make the paragraph read:

284. Starch, including all preparations, from whatever substance produced, fit for use as starch, 1½ cents per pound.

Mr. WHITE. I have received a letter on this subject. I am not personally aware of the technical matters referred to in the communication, but I will read it, so that if it affords any information to the committee it may be acted upon:

MILTON, MASS., *May 12, 1897.*

DEAR SIR: We notice that by section 284 of the tariff bill as reported to the Senate, a duty of 1½ cents per pound is levied on starch, and that by section 285 a like duty is levied upon "dextrine, burnt starch, gum substitute, or British gum."

We wish to call your attention to the illogical nature of these duties as compared with each other.

Starch is the raw material of dextrine and of British gums, and is the only material which in any way affects their weight. In the course of manufacture the raw starch is first treated with chemicals, which do not in the slightest degree add to its weight, and it is then subjected for a considerable length of time to an intense heat, which converts it either into dextrine or British gum, according to the nature of the chemicals applied.

The inevitable result of this process is a shrinkage of from 15 to 22 per cent, so that it takes much more than 1 pound of starch to make 1 pound of dextrine, or British gum. Therefore, while we receive protection to the amount of 1½ cents per pound on our manufactured product, we pay a duty of about 2 cents per pound on the raw material which enters into that pound of manufactured product, making an actual discrimination against the domestic manufacturer of about one-half cent per pound.

This, we submit, is an injustice and hardship to which we should not be subjected. The result of this system of duties is typically illustrated in the potato-dextrine trade. The discrimination against the American manufacturers turns over to the German manufacturers practically the whole of a large business which, with a logical tariff, we believe that the American manufacturers would entirely control.

We feel that the change which we ask is a matter of simple justice, and trust that we may rely upon your assistance in having a duty levied upon dextrine, burnt starch, gum substitute, or British gums one-half cent per pound higher than upon starch; in other words, if the duty on starch remains at 1½ cents per pound, the duty on dextrine and British gums should be 2 cents per pound.

Respectfully, yours,

HORATIO N. GLOVER & SON.

Hon. STEPHEN M. WHITE,
United States Senate, Washington, D. C.

The letter is signed by Horatio N. Glover & Son, manufacturers of dextrine, British gums, gum substitute, Milton, Mass.

I called the attention of the author of this letter to the fact that the same discrimination obtained in previous laws, and he said that was undoubtedly the fact, but nevertheless the statement he made is absolutely accurate. I suggest whether, under this showing, if the statement be correct, and I believe it is from a respectable firm, the duties ought to remain as they are. True, it has been so heretofore, but that would scarcely afford an argument.

Mr. ALLISON. I call the attention of the Senator from California to the fact that under the act of 1890 the duty on starch is 2 cents and on burnt starch 1¼ cents.

Mr. WHITE. That is obviously wrong.

Mr. ALLISON. It would seem to be obviously wrong. Yet there was no special complaint about it, because in the act of 1894 the only correction made was to put the two on an equality. It may be that what this gentleman states is true. It evidently must cost something to burn the starch.

Mr. WHITE. It will be observed that in the statement which I just read the writer mentions one large line of manufacturing which is being conducted wholly abroad now because of a discrimination of that kind. It seems to me that if we can we ought to rectify it. However, I do not make any motion. I merely attract the attention of the Senator to the subject. Perhaps when the bill reaches the Senate an amendment might be drawn.

Mr. ALLISON. Would the Senator suggest a higher duty on dextrine?

Mr. WHITE. I would suggest a lower duty on starch, to equalize it in that way.

Mr. ALLISON. I think the Senator might find difficulty on our side of the Chamber, and probably on his, in attempting to reduce the duty on starch.

Mr. WHITE. If I were pursuing the theory of the Senator from Iowa, I should raise it on the second section.

Mr. FRYE. That is what the Senator from Iowa ought to do.

Mr. WHITE. I will allow it to remain as it is.

Mr. ALLISON. Very well; and we will see about it later.

The VICE-PRESIDENT. The question is on agreeing to the amendment reported by the Committee on Finance.

The amendment was agreed to.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, on page 83, line 3, paragraph 285, before the word "cents," to strike out "two" and insert "one and one-half;" so as to make the paragraph read:

285. Dextrine, burnt starch, gum substitute, or British gum, 1½ cents per pound.

The amendment was agreed to.

The next amendment was, in paragraph 286, line 8, after the word "pound," to strike out—

Sweet marjoram, 3 cents per pound; summer savory, coriander seed, and thyme, one-half of 1 cent per pound.

So as to make the paragraph read:

286. Spices: Mustard, ground or prepared, in bottles or otherwise, 10 cents per pound; capsicum or red pepper, or cayenne pepper, 2½ cents per pound; sage, 1 cent per pound; spices not specially provided for in this act, 3 cents per pound.

The amendment was agreed to.

The next amendment was, on page 83, after line 12, to insert a new paragraph, as follows:

286½. Tea, 10 cents per pound, until January 1, 1900; after that date tea shall be admitted free of duty.

Mr. ALLISON. I ask that the paragraph may be passed over. It will be observed that it is only a temporary duty, intended to bridge over a deficiency that may occur for the first year or two. I hope that during the progress of the bill we may dispense with this duty. I am not quite prepared to suggest it, however, so I ask that the paragraph may be passed over.

Mr. WHITE. I simply wish, for the information of the Senate, to call attention to a few remarks made by the distinguished Senator from Rhode Island [Mr. ALDRICH] during 1894, in reference to this very matter. In criticising the Democratic side he made use of this phraseology:

If it be the purpose of this amendment to raise revenue, if it is a necessity, as I claim it is not—

Referring to sugar—

to raise additional revenue, why not take some other means? There are a thousand methods open to the Congress which are certainly preferable to this one. Why not impose a higher duty upon whisky if revenue is a necessity? Why not increase the tax upon beer? The tax of $1.50 a barrel upon beer would give approximately as much revenue as the proposed duty upon sugar. Who would be hurt by the imposition of a tax like that? Not all the people of the United States, because they are not obliged to buy beer.

I showed in some statements which I made to the Senate a week or ten days ago that the absolute reductions in taxes by this bill as it now stands upon pure luxuries is $38,000,000, or an approximate sum to that which is proposed to be imposed by the bill upon sugar. Think of the monstrous proposition of reducing the duties upon cosmetics, upon artificial feathers and flowers, upon fine laces and embroideries, upon silk clothing, and upon all that class of articles, in order to furnish an excuse for the imposition of a tax upon sugar! What justification can you find in the judgment of the American people for this action?

I refer to an extract in the same connection and bearing directly upon the tea tax.

Again—

He says—

if it is necessary to secure revenue, as I believe it is not, why not add to the tax on tobacco? You can easily get from an additional tax on tobacco all the revenue which it is proposed to derive from the tax on sugar. Why not, if revenue is necessary and you do not care to levy a tax upon anything produced in the United States, impose a duty on tea and coffee? A duty of 10 cents a pound on tea would never reach the consumer of tea through an addition to price, as tea which can be imported to-day at from 10 to 12 cents a pound is sold at retail mainly at from 40 to 50 cents a pound.

You might impose a duty upon tea of 10 cents a pound and it would reduce the profits of the importers or of the distributors of tea in the United States; but when you impose a duty upon sugar, so close is the competition upon sugar that whatever you add to the duty, as shown so clearly by the distinguished Senator from Kansas [Mr. Peffer] yesterday, is certainly and inevitably added to the price to the consumer, wherever he may be located. There is no dispute whatever about this proposition, and there can be none.

Thinking that possibly the proposition might be overlooked by Senators upon the other side, I call attention to the suggestion thus made by the distinguished Senator from Rhode Island, that it was unnecessary to tax sugar, that a tax upon tea and beer would answer the purposes much better.

The VICE-PRESIDENT. If there be no objection, paragraph 286½ will be passed over. The Chair hears none, and it will be so ordered.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 287, line 16, before the word "gallon," to insert the word "proof;" and in line 17, after the word "standard," to insert "proof;" so as to make the paragraph read:

287. Vinegar, 7½ cents per proof gallon. The standard proof for vinegar shall be taken to be that strength which requires 35 grains of bicarbonate of potash to neutralize 1 ounce troy of vinegar.

The amendment was agreed to.

Mr. ALLISON. I will not press the consideration of the bill further to-night.

Mr. MILLS. I wish to ask unanimous consent to go back to the first paragraph of the bill in order to offer an amendment in the morning, which I wish to have printed in the RECORD. I was not present when that part of the bill was acted upon; it was not possible for me to be here; and I have an amendment which I wish to offer, and I should like to have it voted on in the morning. It relates to the first paragraph of the bill. I will send the amendment to the desk in order that it may be read.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. After the word "prescribed," in line 9, page 1, it is proposed to insert:

Provided, That only 75 per cent of the duties imposed by this act shall be collected on imports from countries whose mints are open to the free and unlimited coinage of gold and silver at the rate of 16 grains of fine silver equal in value to 1 grain of fine gold.

Mr. MILLS. I ask unanimous consent that we may go back to that part of the bill in the morning, in order that we may have a vote on the amendment.

Mr. PLATT of Connecticut and others. Oh, no.

Mr. ALLISON. I trust the Senator from Texas will not press that request at this moment. The amendment may lead to some debate. I think very likely it will. There are very many things which have already been passed over, and it is not wise to discuss the amendment the Senator from Texas has offered.

Mr. MILLS. I will ask to have the amendment printed in the RECORD as one which I shall offer to the bill at the proper time.

Mr. ALLISON. To that I have no objection.

The VICE-PRESIDENT. The amendment has been read, and it will therefore appear in the RECORD.

EXECUTIVE SESSION.

Mr. DAVIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After forty minutes spent in executive session the doors were reopened, and (at 5 o'clock and 35 minutes p. m.) the Senate adjourned until to-morrow, Thursday, June 17, 1897, at 11 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate June 16, 1897.

ENVOY EXTRAORDINARY AND MINISTER PLENIPOTENTIARY.

Stewart L. Woodford, of New York, to be envoy extraordinary and minister plenipotentiary of the United States to Spain, vice Hannis Taylor, resigned.

CONSUL.

Julius Goldschmidt, of Wisconsin, to be consul-general of the United States at Berlin, Germany, vice Charles de Kay, resigned.

SURVEYOR OF CUSTOMS.

John R. Puryear, of Kentucky, to be surveyor of customs for the port of Paducah, in the State of Kentucky, to succeed Felix G. Rudolph, resigned.

COLLECTOR OF CUSTOMS.

Levi M. Willcutts, of Minnesota, to be collector of customs for the district of Duluth, in the State of Minnesota, in place of Emil Olund, removed.

AUDITOR FOR NAVY DEPARTMENT.

Frank H. Morris, of Ohio, to be Auditor for the Navy Department, to succeed William H. Pugh, resigned.

ASSISTANT AGENT AT SALMON FISHERIES OF ALASKA.

James C. Boatman, of California, to be assistant agent at the salmon fisheries of Alaska, office created by the sundry civil appropriation act approved June 4, 1897.

AGENT AT SALMON FISHERIES OF ALASKA.

Howard M. Kutchin, of California, to be agent at the salmon fisheries of Alaska, office created by the sundry civil appropriation act approved June 4, 1897.

PROMOTIONS IN THE ARMY.

General officer.

Col. Anson Mills, Third Cavalry, to be brigadier-general, June 16, 1897, vice Mizner, retired from active service.

Quartermaster's Department.

First Lieut. Andrew Gregg Curtin Quay, Third Cavalry, to be assistant quartermaster, with the rank of captain, June 16, 1897, vice Pope, nominated for promotion.

Maj. John Simpson, quartermaster, to be deputy quartermaster-general, with the rank of lieutenant-colonel, June 11, 1897, vice Forsyth, retired from active service.

Capt. James Worden Pope, assistant quartermaster, to be quartermaster, with the rank of major, June 11, 1897, vice Simpson, promoted.

Cavalry arm.

First Lieut. Thomas Jefferson Lewis, Second Cavalry, to be captain, June 13, 1897, vice Kingsbury, Second Cavalry, deceased.

Second Lieut. William Franklin Clark, Seventh Cavalry, to be first lieutenant, June 13, 1897, vice Lewis, Second Cavalry, promoted.

Artillery arm.

Capt. James Chester, Third Artillery, to be major, June 7, 1897, vice Darling, Third Artillery, retired from active service.

First Lieut. John Deane Charles Hoskins, Third Artillery, to be captain, June 7, 1897, vice Chester, Third Artillery, promoted.

Second Lieut. Archibald Campbell, Third Artillery, to be first lieutenant, June 7, 1897, vice Hoskins, Third Artillery, promoted.

CONFIRMATIONS.

Executive nominations confirmed by the Senate June 16, 1897.

REGISTER OF THE LAND OFFICE.

Frank G. Deckabach, of Ocosta, Wash., to be register of the land office at Olympia, Wash.

RECEIVER OF PUBLIC MONEYS.

John O'B. Scobey, of Olympia, Wash., to be receiver of public moneys at Olympia, Wash.

POSTMASTERS.

Cassius C. Pillsbury, to be postmaster at West Superior, in the county of Douglas and State of Wisconsin.

Reuben J. Mott, to be postmaster at Port Allegany, in the county of McKean and State of Pennsylvania.

George H. Swearingen, to be postmaster at Dunbar, in the county of Fayette and State of Pennsylvania.

SENATE.

THURSDAY, *June 17, 1897.*

The Senate met at 11 o'clock a. m.

Prayer by Rev. HUGH JOHNSTON, D. D., of the city of Washington.

Mr. HENRY M. TELLER, a Senator from the State of Colorado, appeared in his seat to-day.

On motion of Mr. DAVIS, and by unanimous consent, the reading of the Journal of yesterday's proceedings was dispensed with.

PETITIONS AND MEMORIALS.

Mr. HOAR presented the petition of Joseph Dobbins and 86 other citizens of Worcester, Mass., employed in the carpet mills of M. J. W. Whithall, praying for the early enactment of a protective-tariff law; which was ordered to lie on the table.

He also presented a memorial of sundry citizens of Massachusetts, remonstrating against the proposed duty of $2 per thousand feet upon lumber; which was ordered to lie on the table.

He also presented a memorial of sundry citizens of Massachusetts, remonstrating against any increase in the present rate of duty on India tanned skins for morocco; which was ordered to lie on the table.

He also presented a petition of the Woman's Auxiliary of the Young Men's Christian Association of Somerville, Mass., praying for the enactment of legislation prohibiting the reproduction of prize fights by means of the kinetoscope; which was ordered to lie on the table.

Mr. DAVIS presented a petition of the Board of Trade of Minneapolis, Minn., and a petition of 103 citizens of Lake Crystal, Minn., praying for the early passage of the pending tariff bill; which were ordered to lie on the table.

He also presented a memorial of 49 citizens of Rochester, Minn., remonstrating against the passage of a clause in the pending tariff bill providing for the use of stamps on bank checks; which was ordered to lie on the table.

Mr. PLATT of New York presented a petition of sundry citizens of Rifton Glen, N. Y., praying for the early enactment of a protective-tariff law; which was ordered to lie on the table.

He also presented sundry memorials of citizens of New York City, remonstrating against the proposed increase of the tax on beer; which were ordered to lie on the table.

Mr. MORRILL presented a petition of sundry citizens of Randolph, Vt., praying for the earliest possible passage of a protective-tariff bill; which was ordered to lie on the table.

Mr. MITCHELL presented a petition of the Millers' National Association of the United States, praying for the adoption of a reciprocity clause in the pending tariff bill; which was ordered to lie on the table.

He also presented a petition of the Rohlfing Sons' Music Company and other importers of musical merchandise of Milwaukee, Wis., praying that the customs duty on musical instruments and parts for the same be provided for at the rate of 35 per cent ad valorem; which was ordered to lie on the table.

He also presented memorials of the Krause Shoe Company, of Milwaukee; of the Racine Shoe Company, of Racine, and of the Atwell Shoe Company, of Milwaukee, all in the State of Wisconsin, remonstrating against an import duty on raw goatskins; which were ordered to lie on the table.

Mr. GALLINGER presented a memorial of the Laconia Lumber Works, of Laconia, N. H., and a memorial of W. P. Gardner & Co., of Concord, N. H., remonstrating against the proposed duty of $2 per thousand feet on lumber; which were ordered to lie on the table.

He also presented a memorial of Woodbury Bros., of New Hampshire, remonstrating against an increase in the present rate of duty on tanned skins for morocco or a duty on raw goatskins; which was ordered to lie on the table.

He also presented a petition of W. D. Brackett & Co., of Boston, Mass., praying for the imposition of a duty on goatskins; which was ordered to lie on the table.

Mr. VEST presented memorials of the Amalgamated Wood Workers, the Building and Trade Council, the Union of United Brewers' Workingmen's Association, and sundry other organizations of St. Louis, Mo., remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

Mr. CAFFERY presented a memorial of E. J. Hart & Co. and 1,094 other citizens of Louisiana, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which was referred to the Committee on Interstate Commerce.

Mr. TURPIE presented the petition of J. O. Perrin and sundry other citizens of Lafayette, Ind., praying for the enactment of legislation authorizing the President of the United States to appoint a commission as proposed by the Indianapolis (Ind.) monetary convention; which was referred to the Committee on Finance.

He also presented a petition of sundry citizens of Terre Haute, Ind., praying for the early enactment of a protective-tariff law; which was ordered to lie on the table.

Mr. MORGAN presented sundry memorials of citizens of Birmingham, Ala., remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

Mr. KYLE presented sundry petitions of citizens of Custer and Goodwin, in the State of South Dakota, and a petition of sundry citizens of Brooklyn, N. Y., praying for the early enactment of a protective-tariff law; which were ordered to lie on the table.

Mr. PRITCHARD presented a petition of sundry citizens of Raleigh, N. C., praying for the early passage of the pending tariff bill; which was ordered to lie on the table.

He also presented the petition of Thomas J. Keith, of Charlotte, N. C., praying that he be remunerated for services as night watchman at the post-office at that city; which was referred to the Committee on Claims.

Mr. PROCTOR presented the memorial of C. J. Hibbard, of Newport, Vt., remonstrating against an increase in the present rate of duty on tanned skins for morocco, or a duty on raw goatskins; which was ordered to lie on the table.

REPORTS OF COMMITTEES.

Mr. THURSTON, from the Select Committee on International Expositions, to whom was referred the joint resolution (S. R. 32) accepting the invitation of the French Republic to take part in an international exposition to be held in Paris in 1900 A. D., reported it with an amendment, and submitted a report thereon.

Mr. MARTIN, from the Committee on Claims, to whom was referred the bill (S. 1133) to pay the Richmond Locomotive and Machine Works its claim for damages and losses incurred in the construction of the armored battle ship *Texas*, reported it without amendment, and submitted a report thereon.

Mr. CHILTON, from the Committee on Interstate Commerce, to whom was referred the bill (S. 2041) to amend section 4386 of the Revised Statutes of the United States, striking out "twenty-eight consecutive hours" and "twenty-eight hours" and inserting "forty consecutive hours" and "forty hours," reported it without amendment.

LANDS IN GREER COUNTY, OKLA.

Mr. CARTER. Upon the 19th of May the Secretary of the Interior addressed a communication to Congress requesting that the time within which certain homestead settlers in Greer County, Okla., should have the preference right to file on lands be extended for the period of six months. The extension was sought because the land office could not be opened before the 1st day of July, whereas under the existing law the preference right would expire on the 18th day of that month. The intervening time, that is, the space of time between the opening of the land office and the expiration of the preference right under the law, is not adequate to enable all of the settlers to make their filings. The Committee on Public Lands unanimously report a bill granting the extension as requested, and I ask unanimous consent for its present consideration.

Mr. ALLISON. I shall not object unless it leads to debate. If it does, of course I must insist on the regular order.

Mr. COCKRELL. It will not lead to debate.

The bill (S. 2150) to amend an act entitled "An act to provide for the entry of lands in Greer County, Okla., to give preference rights to settlers, and for other purposes," approved January 18, 1897, was read the first time by its title, and the second time at length, as follows:

Be it enacted, etc., That the time for the exercise of the preference right of entry granted to bona fide occupants of land within the territory established as Greer County, Okla., by section 1 of an act entitled "An act to provide for the entry of lands in Greer County, Okla., to give preference rights to settlers, and for other purposes," approved January 18, 1897, be, and the same is hereby, extended to January 1, 1898.

The VICE-PRESIDENT. The Senator from Montana asks unanimous consent for the immediate consideration of the bill.

There being no objection, the bill was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILLS INTRODUCED.

Mr. DAVIS introduced the following bills; which were severally read twice by their titles, and referred to the Committee on Pensions:

A bill (S. 2151) granting a pension to Mrs. Jeannette E. Sweet; and

A bill (S. 2152) granting an increase of pension to Don A. Daniels.

Mr. QUAY (by request) introduced a bill (S. 2153) for the relief of certain volunteer officers and soldiers of the civil war, and for other purposes; which was read twice by its title, and referred to the Committee on Military Affairs.

Mr. PETTIGREW introduced a bill (S. 2154) for the relief of John H. McLaughlin; which was read twice by its title, and referred to the Committee on Claims.

Mr. PRITCHARD introduced a bill (S. 2155) for the relief of Thomas J. Keith; which was read twice by its title, and referred to the Committee on Claims.

Mr. McBRIDE introduced a bill (S. 2156) for the relief of Wilbur F. Cogswell; which was read twice by its title, and referred to the Committee on Naval Affairs.

Mr. COCKRELL introduced a bill (S. 2157) granting a pension to Fielding L. Rutherford; which was read twice by its title, and, with the accompanying petition, referred to the Committee on Pensions.

Mr. McENERY introduced a bill (S. 2158) for the relief of the estate of Isadore Daigle, deceased, late of West Baton Rouge Parish, La.; which was read twice by its title, and referred to the Committee on Claims.

Mr. GORMAN introduced a bill (S. 2159) for the relief of Pay Inspector John H. Stevenson; which was read twice by its title, and referred to the Committee on Naval Affairs.

DRAWBACK ALLOWANCES.

Mr. CAFFERY submitted the following resolution; which was considered by unanimous consent, and agreed to:

Resolved by the Senate of the United States, That the Secretary of the Treasury be directed to furnish the Senate, as early as practicable, copies of all evidence or statements on which the drawback allowance contained in Circular No. 102, Division of Customs, were based, with the names and occupations of the persons making the statements or furnishing the evidence, and also be directed to inform the Senate whether the drawback allowances for the different degrees of saccharine strength of sugar were derived from proof furnished, or were reached by a theoretical calculation, and all information and facts in possession of the Department on which the drawback allowances in said circular were made.

THE TARIFF BILL.

Mr. ALLISON. I move that the Senate proceed to the consideration of House bill 379.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States.

The VICE-PRESIDENT. The reading of the bill will be proceeded with.

The Secretary read as follows:

Schedule H, page 83—Spirits, wines, and other beverages.

Mr. ALLISON. Before the Secretary proceeds to read, I ask unanimous consent to turn back to page 23, line 1. After the word "unfilled" I wish to insert the words "not otherwise specially provided for." It relates to glass bottles, vials, jars, etc., filled or unfilled, and applies to all of them, whereas in the schedule we are about to consider there are special exceptions made. The words "not otherwise specially provided for" should be inserted in the glass schedule; otherwise it will be inconsistent with what we are about to do or probably will do.

Mr. JONES of Arkansas. Most likely.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. On page 23, line 1, paragraph 94, after the word "unfilled," insert "not otherwise specially provided for;" so as to make the paragraph read:

94. Plain green or colored, molded or pressed, and flat, lime, or lead glass bottles, vials, jars, and covered or uncovered demijohns and carboys, any of the foregoing, filled or unfilled, not otherwise specially provided for, and whether their contents be dutiable or free, except such as contain merchandise subject to an ad valorem rate of duty, or to a rate of duty based in whole or in part upon the value thereof, shall pay duty as follows: If holding more than 1 pint, seven-eighths of 1 cent per pound; if holding not more than 1 pint and not less than one-fourth of a pint, 1½ cents per pound; if holding less than one-fourth of a pint, 45 cents per gross: *Provided*, That none of the above articles shall pay a less rate of duty than 40 per cent ad valorem.

The amendment was agreed to.

Mr. WHITE. I wish to make a suggestion to the Senator from Iowa. Yesterday when paragraph 281, "Cocoa-butter or cocoa-butterine," was passed upon by the Senate I desired unanimous consent that it might be reconsidered and passed over temporarily. I have received some communications with reference to the subject of cocoanut oil and desire to investigate a decision made by the circuit court of New York regarding the subject. I will not ask for any lengthy detention.

Mr. ALLISON. As to paragraph 281 I suppose it is the Senator's purpose to consider the propriety of adding cocoanut oil?

Mr. WHITE. Yes, sir.

Mr. ALLISON. Why not allow the paragraph to stand? I shall have no objection to returning to it and adding cocoanut oil, if it is found that that ought to be done.

Mr. WHITE. Very well.

Mr. ALLISON. Cocoanut oil is now on the free list, and I am not sure but that the Senator is right.

Mr. WHITE. I shall examine the decision to which I referred.

Mr. ALLISON. We can return to it at any time.

The VICE-PRESIDENT. The reading of the bill will be proceeded with.

Mr. ALLISON. Before the Secretary proceeds, I desire to turn back to paragraph 149, page 47, line 17. I propose to insert the word "not" after the word "at;" so as to read:

Scissors and shears, and blades for the same, finished or unfinished, valued at not more than 50 cents per dozen, 15 cents per dozen and 15 per cent ad valorem.

The VICE-PRESIDENT. Without objection, that amendment will be made.

Mr. JONES of Arkansas. That makes a very material difference.

Mr. ALLISON. It does. It is a mere clerical error as it now stands. It should read, "valued at not more than 50 cents per dozen." The next bracket is, "valued at more than 50 cents per dozen." The object is to reach those at not more and those at more than 50 cents. The Senator will see that it is a mere clerical error.

Mr. JONES of Arkansas. Yes, sir; I see.

The VICE-PRESIDENT. Without objection, the amendment is agreed to.

Mr. JONES of Arkansas. Yesterday at my request the Senator from Iowa consented to pass over paragraph 275, relating to extract of meat. He offered an amendment to the paragraph which met most of the objections I had. I am willing now to take the paragraph up. I wish to say, however, to the Senator that I think the tariff of 35 cents a pound is greater than it ought to be. The amendment offered by the Senator will take off about two-thirds of the proposed tariff, but it will still leave the tariff at 35 cents a pound, which is about, as I make it out, from 10 to 12 cents a pound more than it is under the present law.

The importation of Liebig's extract under the present law has been limited to a considerable extent. It does not enter into competition with American products which are somewhat of the same character. Liebig's extract is manufactured in South America by a very expensive process, I understand, for the purpose of preparing it so that it will keep for any length of time and in any latitude. The American product is not so handled; it is not intended to be preserved in such a way; it is not so costly; it is not so expensive to manufacture. Liebig's extract is prescribed by physicians for invalids, and where it is needed it is an absolute necessity.

Under the circumstances, it seems to me that the Senator from Iowa ought to agree to a tax of 20 per cent ad valorem, which is the present rate, instead of 35 cents, as proposed. I shall ask for a vote on the proposition unless the Senator accepts it. I am willing to take up the paragraph and dispose of it.

Mr. ALLISON. I am sorry that I can not accommodate my friend. I am willing to take up the paragraph and vote on it now.

Mr. JONES of Arkansas. Let us have a vote. I move to strike out "35 cents per pound" and insert "20 per cent ad valorem," in line 24, page 79, paragraph 275.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. In line 24, page 79, paragraph 275, strike out "35 cents per pound" and insert in lieu thereof "20 per cent ad valorem;" so as to read:

275. Extract of meat, not specially provided for in this act, 20 per cent ad valorem.

Mr. ALLISON. The Senator proposes to strike out the fluid extract also?

Mr. JONES of Arkansas. I move to strike out the words "fluid extract of meat, 15 cents per pound," so that both classes shall pay 20 per cent.

The SECRETARY. And also strike out the remainder of the printed paragraph after the word "pound," in the following words:

Fluid extract of meat, 15 cents per pound.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the Senator from Arkansas.

The amendment was rejected.

The reading of the bill was resumed at page 83, line 21, "Schedule H.—Spirits, wines, and other beverages."

The next amendment of the Committee on Finance was, in paragraph 288, page 84, line 1, under the heading "Spirits," after the word "and," to strike out "fifty" and insert "twenty-five;" so as to make the paragraph read:

SCHEDULE H.—SPIRITS, WINES, AND OTHER BEVERAGES.

Spirits:

288. Brandy and other spirits manufactured or distilled from grain or other materials, and not specially provided for in this act, $2.25 cents per proof gallon.

The amendment was agreed to.

The next amendment was, in paragraph 289, page 84, line 13, after the words "*And provided further*, That," to strike out "any brandy or other spirituous or distilled liquors imported in any sized cask, bottle, jug, or other package, of or from any country, dependency, or province under whose laws similar sized casks, bottles, jugs, or other packages of distilled spirits, wine, or other beverage put up or filled in the United States are denied entrance into such country, dependency, or province, shall be forfeited to the United States; and;" so as to make the paragraph read:

289. Each and every gauge or wine gallon of measurement shall be counted as at least 1 proof gallon; and the standard for determining the proof of brandy and other spirits or liquors of any kind imported shall be the same as that which is defined in the laws relating to internal revenue: *Provided*, That it shall be lawful for the Secretary of the Treasury, in his discretion, to authorize the ascertainment of the proof of wines, cordials, or other liquors, by distillation or otherwise, in cases where it is impracticable to ascertain such proof by the means prescribed by existing law or regulations: *And provided further*, That any brandy or other spirituous or distilled liquor imported in a cask of less capacity than 10 gallons from any country shall be forfeited to the United States.

Mr. ALLISON. I ask that the amendment striking out the first part of the additional proviso be disagreed to.

The amendment was rejected.

The reading of the bill was continued. The next amendment was, in paragraph 291, page 85, line 1, after the word "Cordials," to strike out "liquors" and insert "liqueurs;" and in line 4, after the word "and," to strike out "fifty" and insert "twenty-five;" so as to make the paragraph read:

291. Cordials, liqueurs, arrack, absinthe, kirschwasser, ratafia, and other spirituous beverages or bitters of all kinds, containing spirits, and not specially provided for in this act, $2.25 per proof gallon.

The amendment was agreed to.

The reading of the bill was continued. The next amendment was, in paragraph 294, page 86, line 2, after the word "gallon," to insert "but no separate or additional duty shall be levied on the bottles;" so as to make the paragraph read:

294. Champagne and all other sparkling wines, in bottles containing each not more than 1 quart and more than 1 pint, $8 per dozen; containing not more than 1 pint each and more than one-half pint, $4 per dozen; containing one half pint each or less, $2 per dozen; in bottles or other vessels containing more than 1 quart each, in addition to $8 per dozen bottles, on the quantity in excess of 1 quart, at the rate of $2.50 per gallon; but no separate or additional duty shall be levied on the bottles.

The amendment was agreed to.

The next amendment of the Committee on Finance was to strike out the following paragraph:

295. Still wines, including ginger wine or ginger cordial and vermuth, in casks, 60 cents per gallon; in bottles or jugs, per case of 1 dozen bottles or jugs, containing each not more than 1 quart and more than 1 pint, or 24 bottles or jugs containing each not more than 1 pint, $2 per case; and any excess beyond these quantities found in such bottles or jugs shall be subject to a duty of 7 cents per pint or fractional part thereof, but no separate or additional duty shall be assessed on the bottles or jugs: *Provided*, That any wines, ginger cordial, or vermuth imported containing more than 24 per cent of alcohol shall be forfeited to the United States: *And provided further*, That there shall be no constructive or other allowance for breakage, leakage, or damage on wines, liquors, cordials, or distilled spirits. Wines, cordials, brandy, and other spirituous liquors imported in bottles or jugs shall be packed in packages containing not less than 1 dozen bottles or jugs in each package; and all such bottles or jugs shall pay an additional duty of 3 cents for each bottle or jug unless specially provided for in this act.

And in lieu thereof to insert:

295. Still wines, including ginger wine or ginger cordial and vermuth, in casks or packages other than bottles or jugs, if containing 14 per cent or less of absolute alcohol, 30 cents per gallon; if containing more than 14 per cent of absolute alcohol, 50 cents per gallon. In bottles or jugs, per case of 1 dozen bottles or jugs, containing each not more than 1 quart and more than 1 pint, or 24 bottles or jugs containing each not more than 1 pint, $1.60 per case; and any excess beyond these quantities found in such bottles or jugs shall be subject to a duty of 5 cents per pint or fractional part thereof, but no separate or additional duty shall be assessed on the bottles or jugs: *Provided*, That any wines, ginger cordial, or vermuth imported containing more than 24 per cent of alcohol shall be classed as spirits and pay duty accordingly: *And provided further*, That there shall be no constructive or other allowance for breakage, leakage, or damage on wines, liquors, cordials, or distilled spirits. Wines, cordials, brandy, and other spirituous liquors, including bitters of all kinds, and bay rum or bay water, imported in bottles or jugs, shall be packed in packages containing not less than 1 dozen bottles or jugs in each package, or duty shall be paid as if such package contained at least 1 dozen bottles or jugs; and all such bottles or jugs shall, unless otherwise specially provided for in this act, pay an additional duty of 3 cents for each bottle or jug. The percentage of alcohol in wines and fruit juices shall be determined in such manner as the Secretary of the Treasury shall by regulation prescribe.

Mr. ALLISON. Before this amendment is voted on, I desire to modify it by striking out, on page 87, in lines 22 to 24, the words "and all such bottles or jugs shall, unless otherwise specially provided for in this act, pay an additional duty of 3 cents for each bottle or jug" and inserting "and in addition thereto duty shall be collected on the bottles or jugs at the rates which should be chargeable thereon if imported empty."

The VICE-PRESIDENT. The question is on agreeing to the amendment of the committee, including the amendment of the Senator from Iowa.

Mr. WHITE. In connection with this schedule, as relates to wine, I desire to have a letter read which was forwarded to me by Hon. Morris M. Estee, who is known to many Senators here personally and whom we all know to be one of the leading Republicans of the West. It is in reference to the particular item in the schedule now under consideration.

The VICE-PRESIDENT. The Secretary will read the letter.

Mr. WHITE. I desire the attention of the Senator from Iowa to the statements contained in the letter.

The Secretary read as follows:

SAN FRANCISCO, *May 24, 1897.*

MY DEAR SENATOR: The tariff schedule adopted by the United States Senate, so far as it relates to American wines, is unjust, and the grape growers of California are practically a unit in opposition to it. By request of some of the leading producers of our State, I venture to write you on this topic.

You are aware that personally I have ceased to be interested in grape culture in California, but, in common with all of our people, I am deeply interested in whatever secures the prosperity of the producers of our State and country.

1. There is but a very small portion of the earth's surface where the finer qualities of the European grape can be raised. These grapes never will prosper in the Tropics, nor, indeed, in the temperate zones, except in especially favorable localities. California is the only part of the American Union where the European vine has thus far been largely cultivated. The culture of the grape is an infant industry, so far as our country is concerned, and if the principle of protection means anything, it means that infant or undeveloped industries shall be protected against unfair foreign competition. That is what we ask, and all we expect. The inquiry then arises, What should be done to accomplish this purpose? It goes without saying that all foreign wines brought to the United States are a luxury which none but the wealthy can enjoy, and this is so whether high import duties are imposed on them or not, as the American consumer of the middle classes uses American wines only; and hence the question of protection to American wines resolves itself into a contest between the rich American consumer and the foreign producer on the one hand and the industrious American producer and the poor American consumer on the other.

2. It is claimed that under the Senate amendments of the Dingley tariff bill this American industry will be destroyed. Ought this to be done? The amount invested in vineyards in California now exceeds $50,000,000. This is divided between the raisin, the wine, and the brandy industries. During the last four years there has been a great depression in the grape culture, caused largely by the so-called Wilson tariff bill, which placed the duty on dry wines at 20 cents per gallon. This was raised in the Dingley bill to 60 cents; but the Senate Finance Committee has cut it down to the old figure of 30 cents, and not only that, but it has changed the duty on imported wines in glass to $1 a case of a dozen bottles.

This is an actual discrimination in favor of the foreign product, because the one-dollar duty does not meet the difference in the price of wages in France and America. To illustrate, in the wine districts of France the average wages paid to labor is from 1½ to 3 francs a day, the laborer boarding himself, except his lunch. In California the price of labor for the same work is from 75 cents to $1 a day and board. It will thus be seen that if it were a mere matter of the value of labor in cultivating the vine, America could not on even terms compete with France in the making of wine. In this connection, it ought also to be observed that the interest on money in California is from 7 to 10 per cent per annum; in France, Germany, and Italy it is from 3 to 4 per cent per annum. And it should also be noted that Germany charges an import duty on wines brought into that country in glass of $1.95 a case; Italy, $1.44 a case, and France, on all wines above 10.9 of alcoholic strength, the same proportionate duty she imposes on spirits.

The Senate amendments to the Dingley bill are not only wrong to the producers, but are unjust to the whole people. For instance, the duty on wines of an absolute alcoholic strength of from 14 to 24 degrees is 50 cents a gallon, while the duty on spirits whose absolute alcoholic strength is 50 is $2.25 a gallon. Thus the duty on twenty-four fiftieths of a gallon of spirits, when blended with wine, is only 50 cents; but when it comes into the country in the form of pure spirits the duty would be over a dollar, thus discriminating in favor of foreign wines. And, again, this would encourage adulteration, because the ordinary strength of California wines is about 11½ degrees of alcohol, while under this bill the importer could bring in wine braced up to 24 in spirits, and by the use of water and other substances dilute it until it was down to the usual strength of 11½ degrees of spirits, and thus make more than 2 gallons of wine out of 1.

And, again, it is a notorious fact that the French officials have recently reported to the French Government that a considerable portion of the wines of France are adulterated. Whatever may be said of California wines by people who underrate our own productions, yet no one ever doubted but what they were pure.

3. As a revenue proposition the Senate amendments to the Dingley bill in relation to wines would prove a failure. As before stated, it is well understood that imported wines of the better grades are drank only by wealthy people, and it is also a fact that the chief test of the value of these wines with the American user is the cost of such wines, rather than their quality and purity, and thus 50 cents a gallon duty on dry wines (that is, those under 12 per cent of alcoholic strength) will not perceptibly affect the amount of the importation of wine. Such a duty would, however, protect our own producers, and would throw into the market in competition with imported wines an absolutely pure article, and which is improving in quality every year, and

thus, while a 50-cent duty would increase American revenue, it would at the same time sustain an American industry.

It must be noted also in this connection that the duties on wines and liquors are high in all countries where any duty at all is imposed. As a rule, this duty is imposed for the single purpose of producing revenue. The contention that a lower rate of duty on imported wines would stimulate the importation, and thus increase the revenue, has by the experiences of the past proven to be an error. For instance, the importation of wines in the United States in 1893 was 3,354,078 gallons. The duty on these wines at 50 cents per gallon amounted to $1,727,039.14, while the amount of wine imported in 1896, when the duty was 30 and 50 cents a gallon, was 2,768,485 gallons, and the duty collected amounted to $1,420,251.99. So you can readily see that, if these Senate amendments to the Dingley bill were prompted for the purpose of increasing the revenue, they will prove a failure.

The fact is, France never has been a good market for American productions. We therefore owe no commercial obligations to France that we have not thrice paid; but even if we did, is it either fair or wise for our brethren in the more populous portions of our country to pass laws which will protect the industries in which they are engaged, but at the same time forget their kindred in the remoter portions of this Republic? They should remember that while their wool and iron and coal and their products of the farm are protected, our fruits and wines should be equally protected; and thus by developing all the resources of every part of the country they will increase the average wealth of the people, maintain prices for labor, give to capital remunerative investments, and make our country self-supporting by producing nearly everything that our people consume.

Yours, sincerely,

MORRIS M. ESTEE.

Hon. STEPHEN M. WHITE,
United States Senator, Washington, D. C.

Mr. WHITE. The communication just read presents one view of this matter which, it seems to me, ought to be determinative so far as the other side of the Chamber is concerned. But my view of the whole subject embraced in this chapter is that there is no reason, upon any theory advocated by anyone here, justifying the reduction of tariff upon the alcoholic beverages referred to in Schedule H. It is a proposition entirely different from what is ordinarily discussed in a tariff debate. This schedule has reference to champagnes, brandies, wines, and so on, and those articles ought to be taxed considerably. Of course I would not put on a prohibitive tax, but I would put a tax on the luxury theory.

I was not able to see when the bill was under consideration two years ago, and I do not now see, any reason to justify the lowering of the tax upon these specific articles. I do not refer particularly to wine, but to other articles. If I had my way about it, I would keep up the rate of taxation upon brandies and similar liquors to the standard prescribed by the McKinley Act, simply for the reason I have stated. I think that these articles can stand a high tariff. Those who wish them will procure them in any event, and hence there will be no loss, but on the contrary an increase of revenue by following that principle.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the committee, to strike out and insert a new paragraph, including the amendment moved by the Senator from Iowa.

Mr. WHITE. I offer no amendment in connection with the paragraph.

Mr. VEST. It seems to me that this tax now is up to the revenue point. It is folly to go any higher, unless, as the Senator from California says, a thing is to be done which I deprecate, to prohibit absolutely these foreign wines from coming into the country. As a matter of course, these are articles of luxury, and a high duty is expected to be imposed upon them, but I submit that the doctrine of forcing every man who can not drink California wines and proposes to drink the still wines that are imported from the Rhine and from France and Italy, and prohibiting him from indulging in that taste, is all wrong and oppressive. These wines ought to pay a fair revenue and no more.

I hold in my hand—I do not pretend to be an expert in the matter—a communication from the wine importers of the city of New York, some of them very reputable men, to my knowledge. I see the names of two here who removed from the State of Missouri to New York, whom I know to be reputable men. I will ask, without having it read, that the communication be placed in the RECORD. The substance of it is that the imposition of this duty would absolutely exclude these wines from this country and force everybody who wants to drink wine at all, which I think is an admirable thing to do if they must drink, instead of drinking whisky, to take California wine.

I must be permitted to say that my experience about tariff is that that is at the bottom of all this taxation. They come here in the name of revenue, but the real object is to force the American people to take their products. The meaning of this increased taxation is, if you must drink wine, then you must drink our wine, and if a man can not drink the California wine, as a great many people can not, you must not drink wine at all. I do not belong to the class who believe that it is an unadulterated evil to drink wine. I believe in the old Bible doctrine, "Use a little wine for thy stomach's sake." If I want a particular sort of wine, and believe it is pure and healthful, I have a right under the Constitution of the United States to exercise that privilege myself.

This new doctrine which has come in vogue of late years, to use the tariff to force me either to leave my stomach empty or to take into it the products of certain people in this country, is all wrong, undemocratic, unrepublican, and opposed, in my opinion, to the genius of our institutions.

I suppose it is perfectly useless to move to reduce this duty, but I will ask that the communication I have presented may go into the RECORD to show that this is not an ex parte question by any means.

The communication referred to is as follows:

NEW YORK, *March 31, 1897.*

Hon. GEORGE G. VEST, *Washington, D. C.:*

We, the undersigned, dealers in American and foreign wines in this city, respectfully beg to submit to your consideration the following reasons why the proposed duty of 60 cents per gallon on foreign still wines imported in casks to this country should not be enacted, and the present rate of 30 cents maintained, especially for a particular class of foreign still wines.

First. The proposed duty of 60 cents per gallon would be a prohibitive rate on most of the foreign wines imported to this country in casks, because in the case of the cheapest wines it would increase their cost by about 200 per cent, and this exorbitant increase would stop their importation, thus causing a loss instead of a gain in the revenue of the Government. The original cost of California wines averages about 18 cents per gallon, while in the case of foreign wines fit for exportation it is seldom less than 35 cents delivered in the countries of production. This is already a natural protection of about 100 per cent on California wines; but the proposed duty of 60 cents per gallon on foreign wines would raise this protection to the enormous ratio of more than 330 per cent, to the detriment of the consumers, who are, for the most part, people of limited means, and would have to pay a double or triple price for an article that has not a higher value.

Second. The proposed duty of 60 cents per gallon is higher even than the rate demanded by some California growers. We say "some growers," because not all of them think that there is any need of further protection.

In fact, from an article on the tariff on wines that appeared in the Pacific Wine and Spirit Review, of San Francisco, under date of February 6, 1897, and where the increase of duty on foreign wines is strongly opposed, we gather the following statement:

"The present duty of 30 cents per gallon affords sufficient protection."

And further, in the same article, Mr. Charles Wetmore, a prominent Californian wine maker, says:

"The present tariff—30 cents on dry natural wines and 50 cents on fortified, such as ports and sherries—averages the same as the old 40-cent rate, but is more scientific, as it aims to tax imported wines according to alcoholic strength at about the same rate as the internal-revenue tax on spirits. It is, in fact, a rate of 150 to 200 per cent on the cost price of wines to the wholesale merchants.

"Even now, with better prices for wines, merchants can and do deliver their goods in New York for less than the duty, having the full cost price and expenses on foreign wines as the margin of protection. From the protective standpoint, our wines have now a larger measure of protection than any other product that I can think of. Higher duties would be unjust and oppressive. * * *

"A prohibitive tariff is tyrannical and fosters shoddy of all kinds by removing from competition superior articles which serve to stimulate producers to improve in quality. The fine wines of foreign countries are not in competition with our products; they command prices and customers of their own, and their presence is the only incentive left to encourage higher grades in our own vineyards."

Third. Such a prohibitive rate of duty as the proposed 60 cents per gallon would encourage the adulteration of wines and the manufacture of artificial wines, which must be prevented by all means in the interest of agriculture, of honest trade, and of public health. With an increase in prices for pure wine in this country, the business of manufacturing artificial wine would prosper, and this could not be effectually stopped under existing laws. With a prohibitive duty on foreign wines, the "brick vineyards" in this country, where sugar and spirits are cheap, would be sure to develop. Artificial or spurious wines are the real competitors of the wine industry of this country and not foreign wines, which do not come into competition with the home product, being of an entirely different character. It is natural that the manufacturers of spurious wines will favor higher duties on foreign wines. If the price of genuine wine is pushed much above what they can turn it out for, they will flood the markets of the country with artificial wines. Who will be the losers? The wine growers of this country first, then the wine consumers—who would lose both their money and their health—and last, but not least, the Government in the expected revenue from imported wines.

Fourth. By hindering or wiping out the importation of foreign wines in casks, as would result from the application of the 60-cent duty, considerable damage would be done to the prosperous American export trade with Europe in staves for wine barrels. Most of the wines imported from southern Europe are packed in oak casks of American origin, and this trade would be seriously affected the day that the importation of wines from Europe into this country should be reduced to a minimum on account of the prohibitive duty.

Fifth. On the following point, we desire to draw especially your attention:

Not all foreign wines imported into the United States are intended for direct consumption, but a discrimination must be made for a special class of wines imported from southern Italy, southern France, and Spain, and called, from the use to which they are designated, blending wines. These wines are a raw material and are imported into the United States for the purpose of improving, by blending, a certain class of American wines. They are a natural production of the grapes of certain parts of the above countries, and are so rich in alcohol, body, and coloring matter, and so low in acid, that they could not be used for direct consumption, but are suitable only for the mixing with others.

The American wines requiring to be blended with these wines are still wines obtained in the States east of the Rockies, where, on account of the unfavorable climatic conditions and of the existence of the phylloxera, the cultivation of the European grape is not possible and only the indigenous American grape can be raised, which, for wine-making purposes, is not so suitable as the European variety, with the result that many of the wines obtained in this section are but too frequently poor, acid, thin, and possessing a disagreeable foxy flavor. On account of this, they do not obtain good prices in their original condition, as the greater number of wine consumers of this country are people of foreign origin, who require wines of a similar character to those to which they were accustomed in their respective countries. In order to raise the quality of the American wines in question to the required standard it is necessary to resort to the use of blending wines, which, on account of their rich composition, can remedy in a natural way the deficiencies of the wines obtained from the American grapes, giving as a result wines of proper composition, palatable, that will keep well and improve with age and sell more easily and at a better price than they would in their original condition. That they are not a luxury, but a raw material intended for

blending purposes, is proved, first, by their composition, and second, by their original cost, which is on the average of about 28 cents per gallon.

In some parts of Germany, Switzerland, and Austria, where certain thin, acid wines, for themselves of little value, are produced, on account of the fact that the grape does not always attain perfect maturity, and where, therefore, conditions exist similar to those of the Eastern States of this country, the practice of blending these naturally poor wines with those of southern Italy, for instance, is a well-established fact, and the Italian blending wines are largely exported to the countries above mentioned for the purpose indicated. Germany, in order to improve the quality of some of her wines by this natural means, has arranged in her commercial treaty with Italy a differential duty on blending wines, which can be imported into Germany subject to only half the duty (10 marks per hectoliter) that wines for direct consumption have to pay (20 marks per hectoliter).

A similar provision, we think, would benefit the wine merchants and intelligent growers of this country east of the Rockies, who would thus be enabled to improve the wines of American grapes and find for them a readier and more profitable market. It must be observed that one-half of the production of wines in the United States, which averages yearly 18,000,000 gallons, is grown in the Eastern States, and the interests pertaining to this production deserve an equal amount of consideration with those of the Pacific Coast. In the United States of America no wines are grown having the character of blending wines, and such wines, therefore, would not come into competition with any class of American wines; on the contrary, as has been said, a large portion of them would be benefited by their use.

Hoping that you will give a favorable consideration to the arguments brought forward in this memorial and maintain unaltered the present tariff on foreign still wines, we remain,

Most respectfully,

Cella Brothers, L. Gandolfi & Co., Achille Starace, Louis Peirano, F. Romeo & Co., Renauld & Niederstadt, H. A. Batjer & Co., Zucca & Co., C. Maspero, Du Vivier & Co., John Solari & Co., Musica & Wynen, E. La Montague & Sons, Henry E. Gourd, D. Fratelli Ciani, W. H. Westervelt & Co., Giuseppe Brignoli, A. Bagaglia, importers, New York; V. Savarese & Bros., G. Cinque & Son, Ajello & Cañero, Schiaffino's Sons & Co., L. Balbi & Co., importers, Brooklyn; G. Rossati, wine expert of the Italian department of agriculture, in mission to the United States.

P. S.—For further information, please apply to G. Rossati, 24 State street, New York.

Mr. WHITE. I call the attention of my friend the Senator from Missouri to the proposition shown by the statistics that, under the act prevailing anterior to the Wilson Act, we obtained more revenue from this article than we did under the Wilson Act, and it is so with reference to all of the provisions involved in this particular schedule of the bill. As the Senator says, it is true that these articles are luxuries and are expected to be taxed as such. We must not pass the revenue point; but it is obvious that as a tariff for revenue the present law is not a success in this regard.

I do not care to prolong the debate. I shall vote against the amendment proposed by the committee, as I believe the House provision is better than the provision now proposed.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the committee to strike out and insert, including the amendment proposed by the Senator from Iowa to the amendment.

The amendment was agreed to.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 298, on page 88, line 11, after the word "fruit," to strike out "juice" and insert "juices;" so as to read:

Cherry juice and prune juice, or prune wine, and other fruit juices not specially provided for in this act.

The amendment was agreed to.

The next amendment was, in the same paragraph, after the word "act," at the end of line 11, to strike out "containing no alcohol or not more than 18 per cent of alcohol."

Mr. ALLISON. I ask the Senate to disagree to the amendment striking out those words.

The VICE-PRESIDENT. The question is on agreeing to the amendment reported by the committee, to strike out the words which have been read.

The amendment was rejected.

The next amendment was, in the same paragraph, line 14, after the word "alcohol," to strike out "$2.50 per proof gallon; fruits preserved in spirits when containing over 5 per cent of alcohol, $2.50 per proof gallon for the alcohol contained therein" and insert "60 cents per gallon, and in addition thereto $2.07 per proof gallon on the alcohol contained therein;" so as to make the paragraph read:

298. Cherry juice and prune juice, or prune wine, and other fruit juices not specially provided for in this act, containing no alcohol or not more than 18 per cent of alcohol, 60 cents per gallon; if containing more than 18 per cent of alcohol, 60 cents per gallon, and in addition thereto $2.07 per proof gallon on the alcohol contained therein.

The amendment was agreed to.

The reading of the bill was resumed, and paragraph 299 was read, as follows:

299. Ginger ale, ginger beer, lemonade, soda water, and other similar waters in plain green or colored, molded or pressed, glass bottles, containing each not more than three-fourths of a pint, 18 cents per dozen; containing more than three-fourths of a pint each and not more than 1½ pints, 28 cents per dozen; but no separate or additional duty shall be assessed on the bottles; if imported otherwise than in plain green or colored, molded or pressed, glass bottles, or in such bottles containing more than 1½ pints each, 50 cents per gallon, and in addition thereto, duty shall be collected on the bottles, or other coverings, at the rates which would be chargeable thereon if imported empty.

Mr. ALLISON. I wish to offer an amendment to that paragraph, in line 21, to strike out the word "waters," after the word "similar," and insert the words "beverages containing no alcohol;" so as to read:

Ginger ale, ginger beer, lemonade, soda water, and other similar beverages containing no alcohol, etc.

The amendment was agreed to.

Mr. JONES of Arkansas. I move, in line 23 of that paragraph, after the word "pint," to strike out "eighteen" and insert "fourteen;" so as to make the rate 14 cents per dozen for bottles containing not more than three-fourths of a pint.

The equivalent tax under the present law is about 14 cents. These things are all water; none of them contain any alcohol. I see no difference between them and the class of mineral waters practically which are provided for in section 300. These mineral waters are admitted at a tax of 14 cents per dozen bottles. I do not understand why there should be a higher rate upon ginger ale, ginger beer, lemonade, and soda water than is placed on mineral waters in paragraph 300.

The rate on these articles under the McKinley law was 13 cents a dozen, and the equivalent ad valorem 20 per cent, and under the Wilson law, now in existence, it is 14 cents. I think there certainly can be no objection on the part of the committee to making the rate of duty on these the same as the rate of duty on the mineral waters provided for in paragraph 300. It is a higher rate than that of the McKinley law by 1 cent, and I can see no reason why this class of articles should be taxed higher than mineral waters, which are similar in their character and used for similar purposes. If there is any reason for this difference I should be glad to have the Senator from Iowa state it.

Mr. ALLISON. The majority of the committee considered this subject very carefully, and think this is a very reasonable duty on ginger ale and like beverages.

Mr. JONES of Arkansas. It should be the same as the rate on mineral waters.

The VICE-PRESIDENT. The question is on the amendment proposed by the Senator from Arkansas [Mr. JONES], which will be stated.

The SECRETARY. In paragraph 299, page 88, line 23, before the word "cents," it is proposed to strike out "eighteen" and insert "fourteen;" so as to read, "14 cents per dozen."

Mr. JONES of Arkansas. I ask for the yeas and nays on that amendment.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. CLAY (when his name was called). I announce my pair with the junior Senator from Massachusetts [Mr. LODGE]. If he were present, I should vote "yea."

Mr. JONES of Arkansas (when his name was called). I am paired with the Senator from Maine [Mr. HALE]. If he were present, I should vote "yea."

Mr. LINDSAY (when his name was called). I transfer my pair with the senior Senator from Michigan [Mr. MCMILLAN] to the senior Senator from New York [Mr. MURPHY], and vote "yea."

Mr. MITCHELL (when his name was called). I am paired with the Senator from New Jersey [Mr. SEWELL]. If he were present, I should vote "yea."

Mr. MORRILL (when his name was called). I am paired with the senior Senator from Tennessee [Mr. HARRIS]. Not knowing how he would vote if present, I withhold my vote.

The roll call was concluded.

Mr. GEAR. I am paired with the junior Senator from New Jersey [Mr. SMITH], but I transfer that pair to the junior Senator from Massachusetts [Mr. LODGE], and vote "nay."

Mr. TILLMAN. I announce my pair with the Senator from Nebraska [Mr. THURSTON]. I see he is not in the Chamber, and so I withhold my vote.

Mr. KENNEY. I announce my pair with the junior Senator from Pennsylvania [Mr. PENROSE]. If he were present, I should vote "yea."

Mr. CLAY. The Senator from Iowa [Mr. GEAR] having transferred his pair with the Senator from New Jersey [Mr. SMITH] to the junior Senator from Massachusetts [Mr. LODGE], with whom I am paired, I am at liberty to vote. I vote "yea."

Mr. HARRIS of Kansas. I am paired with the junior Senator from Wyoming [Mr. CLARK]. He not being present, I withhold my vote.

Mr. MORRILL. I transfer my pair with the Senator from Tennessee [Mr. HARRIS] to the Senator from Wyoming [Mr. WARREN], and vote "nay."

Mr. BURROWS (after having voted in the negative). I am paired with the senior Senator from Louisiana [Mr. CAFFERY], but I transfer that pair to the Senator from Nevada [Mr. JONES] until further notice, and will let my vote in the negative stand.

The result was announced—yeas 23, nays 33; as follows:

YEAS—23.

Bacon,	Cockrell,	Martin,	Roach,
Bate,	Gray,	Mills,	Turpie,
Berry,	Heitfeld,	Morgan,	Vest,
Butler,	Lindsay,	Pasco,	Walthall,
Chilton,	McLaurin,	Pettus,	White.
Clay,	Mallory,	Rawlins,	

NAYS—33.

Allison,	Fairbanks,	Mantle,	Spooner,
Baker,	Foraker,	Mason,	Stewart,
Burrows,	Frye,	Morrill,	Teller,
Carter,	Gallinger,	Perkins,	Wellington,
Chandler,	Gear,	Platt, Conn.	Wetmore,
Cullom,	Hanna,	Platt, N. Y.	Wilson.
Davis,	Hawley,	Pritchard,	
Deboe,	Hoar,	Proctor,	
Elkins,	Kyle,	Quay,	

NOT VOTING—33.

Aldrich,	Hale,	McEnery,	Smith,
Allen,	Hansbrough,	McMillan,	Thurston,
Caffery,	Harris, Kans.	Mitchell,	Tillman,
Cannon,	Harris, Tenn.	Murphy,	Turner,
Clarke,	Jones, Ark.	Nelson,	Warren,
Daniel,	Jones, Nev.	Penrose,	Wolcott.
Faulkner,	Kenney,	Pettigrew,	
George,	Lodge,	Sewell,	
Gorman,	McBride,	Shoup,	

So the amendment was rejected.

Mr. COCKRELL subsequently said: This morning on the yea-and-nay vote that was taken I was paired with the Senator from Oregon [Mr. McBRIDE], and voted without noticing that he was not in the Chamber. I desire to announce my pair with him at that time. He was unavoidably called from the Chamber. I ask unanimous consent that I may have leave to withdraw my vote. It does not change the result at all or break a quorum.

The PRESIDING OFFICER (Mr. GALLINGER in the chair). Without objection, leave will be granted.

Mr. VEST. Mr. President, before this schedule is disposed of, I want to call attention, without going into any extended discussion, to the increase over the McKinley rates by this paragraph. For instance, in line 23 the increase is from 13 to 18 cents; in line 25 the increase is from 26 to 28 cents; and in lines 1, 2, and 3, on page 89, a duty is put upon bottles, which was not placed upon bottles by the McKinley Act or the Wilson law. That is all I desire to say on that question.

The reading of the bill was resumed, and paragraph 300 was read.

Mr. VEST. I move to strike out that paragraph for the purpose of putting these natural mineral waters on the free list, where they now are.

We have taxed everything else, and now we propose to tax these products of nature, which are absolutely necessary to a great many invalids in this country. There are thousands of people in the United States who are not able to live without these mineral waters, and the experience of years has demonstrated to them that fact. The Carlsbad water and other waters which are brought to this country, and the salts which are produced from them, are absolutely necessary to invalids.

I do not care to elaborate the subject, but here is a petition from the leading physicians in the principal cities of the Union—New York, Boston, Chicago, St. Louis, Baltimore, and all the other cities of the country. It is very short, and I will ask that the body of the petition be read.

There are also statements from the principal medical journals in the United States, protesting against the duty upon these articles, stating that they are absolutely necessary to the health of the people of this country.

The PRESIDING OFFICER. The paper referred to by the Senator from Missouri will be read, in the absence of objection.

Mr. ALLISON. Does the Senator desire to have that paper read?

Mr. VEST. It is very short, and contains only a few sentences.

Mr. ALLISON. Very well.

The Secretary read as follows:

PETITIONS OF THE MEDICAL PROFESSION OF THE UNITED STATES.

To the honorable the Senate and House of Representatives of the United States of America in Congress assembled:

We, members of the medical profession in various sections of this country, respectfully present this our petition.

The tariff bill now under consideration in the House of Representatives would inflict duties upon natural mineral waters, which would greatly lessen, if not entirely prevent, their importation.

Under the existing and all other tariffs since 1872 the dietetic effervescent waters, and all other natural mineral waters, have been, for reasons of public utility and because of their great value to public health as hygienic beverages and as medicines, expressly admitted free, except in respect to a duty on the bottles in which they are imported.

The carbonic-acid gas that the natural dietetic waters contain, and which necessarily renders them more or less effervescent, is an important element in their constitution; it has the effect of preserving their valuable natural ingredients in solution, and without such free carbonic-acid gas they would inevitably suffer change and deterioration, which would alter their constitution and destroy their properties and good effects; they would undergo decomposition and become undrinkable and useless.

The heavy and prohibitive tax which it is now proposed to levy on such mineral waters would work a serious injury by depriving the public and the medical profession of the benefits now derived from these necessary and important resources of hygiene and medicine, and we respectfully submit that, on the grounds of health and public utility, the provisions relating to foreign natural mineral waters, and to the bottles wherein they are imported, which were in force prior to October, 1890, be reenacted in any tariff which is sanctioned by your honorable Houses.

We respectfully and earnestly pray that our petition may be considered at an early date.

Mr. WHITE. If the amendments proposed by the committee to this paragraph have been adopted, I wish to offer a substitute for it.

The PRESIDING OFFICER. The Chair will suggest to the Senator from California that the amendments proposed by the committee to the paragraph have not been acted upon. They will first be acted upon.

The next amendment of the Committee on Finance was, in paragraph 300, page 89, line 10, after the word "pint," to strike out "thirty" and insert "fourteen;" in line 12, after the word "quart," to strike out "forty" and insert "twenty-four;" in line 16, after the word "quart," to strike out "thirty" and insert "twenty;" and in line 18, after the word "charged," to insert "thereon;" so as to make the paragraph read:

300. All mineral waters and all imitations of natural mineral waters, and all artificial mineral waters not specially provided for in this act, in green or colored glass bottles, containing not more than 1 pint, 14 cents per dozen bottles. If containing more than 1 pint and not more than 1 quart, 24 cents per dozen bottles. But no separate duty shall be assessed upon the bottles. If imported otherwise than in plain green or colored glass bottles, or if imported in such bottles containing more than 1 quart, 20 cents per gallon, and in addition thereto duty shall be collected upon the bottles or other covering at the same rates that would be charged thereon if imported empty or separately.

The amendment was agreed to.

Mr. ALLISON. On behalf of the majority of the Committee on Finance, I propose to add to the paragraph the proviso which I send to the desk.

The PRESIDING OFFICER. The amendment proposed by the Senator from Iowa will be stated.

The SECRETARY. At the end of the paragraph it is proposed to insert:

Provided, That all filled bottles imported under this and the preceding paragraph after February 1, 1898, shall have a designation of the contents thereof blown in said bottles.

The amendment was agreed to.

Mr. VEST. Mr. President, I simply wish to add as to this provision that I hold in my hand a paper which shows that in one instance the ad valorem duty on bottles is equal to 118 per cent; under another provision of this schedule the ad valorem duty on the bottles is equal to 90 per cent; under another provision the ad valorem duty is equal to 218 per cent, and under another it is equal to 127 per cent.

It is very manifest that the intention is, as I said in regard to wines, to exclude these articles from abroad, no matter how necessary they may be to the life or health of any American citizen, and we are met with the argument that they can get just as good mineral waters in this country, and they must take them.

Mr. President, if there is anything that constitutes a peculiar feature of disease, it is that the subtile connection between mind and body must be considered by the skillful physician. If the patient becomes possessed of the idea that a certain sort of mineral water is necessary to his health, then nothing else will have the effect upon him of that particular water. Our friends upon the other side can not come in, in the name of American production and in the name of protection to American products, and say to the patient, "You must reverse your opinion on this question and swallow our waters; and if you do not do it, then die. It is better for you to die than that the great protective system should be sacrificed in a single feature." [Laughter.] That is the meaning of this enormous duty of 218 per cent upon bottles. It is proposed to exclude them from the country absolutely, and then to compel any man whose physician advises him to drink mineral waters, or who thinks he needs a certain foreign mineral water, to take the American water or else go out of existence and escape by death from this universal and permeating spirit of protection. [Laughter.]

I ask leave to have inserted in the RECORD the paper which I send to the desk.

The PRESIDING OFFICER. In the absence of objection, it will be so ordered.

The paper referred to is as follows:

NATURAL MINERAL WATERS.

Natural mineral waters, for remedial and table purposes, have always been imported free of duty as beneficial for and essential to the preservation of health.

All attempts to impose a duty upon them, or upon the bottles in which they were imported, were at first fruitless, Congress insisting that they should be imported duty free. In 1883 Congress again agreed to the principle that natural mineral water should be free from duty, but it imposed upon its bottles a duty of 2½ cents per case 50 large bottles and 25 cents per case 100 small bottles, equal to 30 per cent ad valorem on the bottles.

By the act of 1890 (McKinley tariff) this duty upon the bottles was increased to 75 cents per case 50 large bottles and $1.50 per case 100 small bottles, being

1 cent per pound on large bottles and 1¼ cents per pound on small bottles, equal to 118 per cent ad valorem on the bottles.

By the act of 1894 (Wilson tariff) this duty upon the bottles was decreased to 58 cents per case 50 large bottles and $1.12 per case 100 small bottles, being three-fourths of a cent per pound on large bottles and 1¼ cents per pound on small bottles, equal to 90 per cent ad valorem on the bottles.

It is now proposed in the liquor schedule of the new tariff bill to ignore all the often-repeated decisions of Congress by which natural mineral waters were retained on the free list, and to tax "all mineral waters," whether natural or artificial, at the rate of 40 cents per dozen large bottles and 30 cents per dozen small bottles, equal to $1.67 per case 50 large bottles, or three times the present duty on the bottles; $2.50 per case 100 small bottles, or about two and a quarter times the present duty on the bottles; equal to 218 per cent ad valorem on the bottles, and (should this attempt to tax the water be defeated) to increase the duty on its bottles in the glass schedule to 1½ cents per pound on the large bottles and 1¼ cents per pound on the small bottles, equal to 94 cents per case of 50 large bottles and $1.50 per case of 100 small bottles, or more than four times as much as the duty imposed in 1883, equal to 127 per cent ad valorem on the bottles.

It is certainly most remarkable that, while it is thus proposed to tax those celebrated European mineral waters which practical physicians in all countries have long regarded and esteemed as amongst the most valuable and indispensable of their dietetic and therapeutic resources, a much lower duty has been fixed in the same schedule (H) for ginger ale, ginger beer, lemonade, and soda water.

It will be shown herein that the arguments in support of the proposed enormous increase of duty are incorrect, and that no legitimate reason exists for its imposition.

The increased duty can not produce increased revenue, because its imposition would practically prohibit importation.

It can only, therefore, be justified as a protective duty, destined to prevent all competition with a domestic industry.

Natural mineral table water, such as apollinaris water, is sold to the wholesale dealer at $7 per case of 50 large bottles—bottles, straw mats, and case included—and costs the consumer, including the dealer's profit, about $7.50 per case of 50 large bottles.

The domestic table waters of the United States sell at from $4 to $4.50 per case of 50 large bottles, minus an allowance of $2 for the 50 bottles when returned empty, which bottles, as returned, the bottler refills over and over again.

Consequently, the consumer in the United States pays for 50 bottles of the domestic water, including dealer's profit, say, $3 net, against $7.50 for 50 bottles of apollinaris.

How, then, can it be said that apollinaris, with its necessarily high selling price, competes as regards cost with the domestic waters?

Nor is there a single instance of a domestic water reducing its price on account of apollinaris; but, on the contrary, the competition among the bottlers of domestic water is so keen that, to keep it within bounds, they have in some places agreed among themselves not to sell below $4 per case.

How can they need more protection, or how can further protection do them any good, if, having it in their power to raise their price to the price of apollinaris and other imported table waters, they do not avail themselves thereof?

The truth is that, as apollinaris, etc., do not compete with the home waters in price, such extra duty is not needed or asked for as a protective duty at all, but as a penalty to be imposed upon would-be consumers of apollinaris water—designed, in fact, to exclude this article of necessity from the country altogether.

Bottles.—If natural mineral waters should escape the high duty of $1.67 to $2.50 per case in the liquor schedule, it would still have to face the proposal of a duty of about $1 to $1.50 on its bottles in the glass schedule, which treats filled bottles as if they were new bottles.

Bottles in which natural mineral table waters are imported can not compete when empty with new bottles manufactured in the United States. Whatever such bottles may have cost originally, whatever the duty paid upon them when imported, the small proportion which are sold when empty are always sold to the junk man, and, owing to their unmarketable condition, for a very low price. The majority of such bottles do not come into the market at all, while the bottles in which the medicinal mineral waters are imported are of a shape which renders them quite useless when empty.

The bottle manufacturers are unreasonable, therefore, in asking that filled bottles should be treated in the tariff exactly as if they were new bottles imported for sale. Congress has repeatedly considered and dismissed this claim upon unanswerable arguments, as will be found in the CONGRESSIONAL RECORD, volume 60, pages 1272, 1340; volume 60, page 2063, etc., February, 1883.

It was stated to the Committee of Ways and Means at Washington, on the 8th of January, 1897, by Mr. Edgar A. Agord, of Streator, Ill., of the Green Glass Workers' Association, that the average cost in America of making bottles amounts to $3.55 per average gross, quarts and pints.

The duty proposed on all mineral waters is equal to $4.20 per average gross, quarts and pints, while the duty proposed upon bottles, large and small, is equal to $2.60 per average gross, quarts and pints.

It is evident that even the latter figure is far too large merely as a protective duty on an article which costs $3.55, and which is already protected by the cost of production in Europe, the cost of transport, and the fact above mentioned that the vast proportion of filled imported bottles do not come into competition for employment when empty.

The present duty upon imported bottles is equal to $1.04 per average gross, quarts and pints, and it is sufficiently shown above to be adequate for protection and revenue alike, amounting to nearly 50 per cent of what is stated by Mr. Agord to be the average cost of production in the United States.

The new tariff bill proposes that, for the first time, "all mineral waters," no matter what their remedial qualities may be, are alike to be subject to a tax which will be tantamount to a prohibition upon importation.

Thus remedies held in universal esteem by the medical profession throughout the whole world, and of established and undoubted value and importance as therapeutic agents, such as the waters of Carlsbad, Marienbad, Ems, Vichy, Vals, Contrexéville, Friedrichshall, Kissingen, Homburg, and the Hungarian aperient waters—these, as well as other medicinal waters of world-wide adoption and repute, are to be more highly taxed than ginger beer and soda waters, and the members of the medical profession and their patients are thus to be deprived of some of the most precious and indispensable of their resources in the treatment of acute and chronic ailments.

Thousands and thousands of patients—and their numbers are ever on the increase—annually visit Europe to drink these waters at the springs, and it is essential to the enduring success of such courses of treatment that on their return home these patients should be able to continue the use of the waters as imported from Europe.

To deprive them of such a means of restoration to health seems wholly indefensible, or to impose on them the necessity of prolonging their stay in Europe, which must be the inevitable result if Congress excludes these healing waters from the country.

Mr. WHITE. I offer, as a substitute for the section as amended, what I send to the desk.

The PRESIDING OFFICER. The amendment proposed by the Senator from California will be stated.

The SECRETARY. It is proposed to strike out paragraph 300 as amended, and in lieu thereof to insert:

All imitations of natural mineral waters, and all artificial mineral waters, 20 per cent ad valorem.

The PRESIDING OFFICER. The question is upon the amendment in the nature of a substitute submitted by the Senator from California [Mr. WHITE].

The amendment was rejected.

The reading of the bill was resumed at "Schedule I.—Cotton manufactures." The next amendment of the Committee on Finance was, in paragraph 301, page 90, line 13, before the words "on all," to insert "in addition thereto;" in line 14, after the word "twenty," to insert "and up to No. 80;" and in line 15, after the word "pound," to insert "on No. 80 and above, 50 per cent ad valorem;" so as to make the paragraph read:

301. Cotton thread and carded yarn, warps or warp yarn, in singles, whether on beams or in bundles, skeins or cops, or in any other form, except spool thread of cotton hereinafter provided for, not colored, bleached, dyed, or advanced beyond the condition of singles by grouping or twisting two or more single yarns together, 3 cents per pound on all numbers up to and including No. 15, one-fifth of a cent per number per pound on all numbers exceeding No. 15 and up to and including No. 30, and one-fourth of a cent per number per pound on all numbers exceeding No. 30; colored, bleached, dyed, combed or advanced beyond the condition of singles by grouping or twisting two or more single yarns together, whether on beams, or in bundles, skeins or cops, or in any other form, except spool thread of cotton hereinafter provided for, 6 cents per pound on all numbers up to and including No. 20, and in addition thereto on all numbers exceeding No. 20 and up to No. 80, three-tenths of a cent per number per pound; on No. 80 and above, 50 per cent ad valorem; cotton card laps, roping, sliver or roving, 45 per cent ad valorem.

The amendment was agreed to.

Mr. JONES of Arkansas. I offer a proviso as an amendment to come in at the end of the paragraph, which I ask the Secretary to read.

The PRESIDING OFFICER. The amendment proposed by the Senator from Arkansas will be stated.

The SECRETARY. At the end of paragraph 301 it is proposed to insert:

Provided, however, That in no case shall the duty levied exceed 8 cents per pound on yarns valued at not exceeding 25 cents per pound, nor exceed 15 cents per pound on yarns valued at over 25 cents per pound and not exceeding 40 cents per pound; *And provided further*, That on all yarns valued at more than 40 cents per pound there shall be levied, collected, and paid a duty of 45 per cent ad valorem.

Mr. JONES of Arkansas. The purpose of this proposed amendment is obvious, of course, to all the members of the Senate. I suppose the pending paragraph, following the present rates in the McKinley law, leaving out the limitations which this proviso makes, was framed in compliance with a request such as the one I now propose to read to the Senate. This is from the treasurer of the Kerr Thread Company, of Fall River, Mass. He says:

FALL RIVER, MASS., *April 24, 1897.*

DEAR SIR: We take the liberty of drawing your special attention to Schedule I, paragraph 301, of the tariff bill—cotton yarns.

This schedule, as it passed the House of Representatives in its amended form, is one which the fine cotton yarn industry of this country has long fought for, being necessary not to prohibit the importation of foreign yarns, but to give the American manufacturer an opportunity to make the same in competition with the foreigner. Our mills, the same as quite a number of others, have been built and equipped with the most modern and finest machinery, so that the industry as represented in this country is not one which requires "bolstering up" in any sense of the word in order to compete successfully. The item of labor cost, as is well known, is the one greatest difficulty we have to contend with, and in fine yarns the proportion of labor in the cost of production amounts to a very large per cent. The wages we have to pay in Fall River, as compared to Lancashire, England, are not 25 per cent or 50 per cent, as many people imagine is the case, but they will average fully 100 per cent, in many instances being over this amount.

The bill as it has passed the House is entirely specific in its form, and for this reason is satisfactory to our interests, as with such a bill we are able to figure pretty closely the amount of protection we receive, whereas with an ad valorem measure the difference between the strictly honest importer and the other who is not quite so particular works very much to the detriment of the home producer.

The present so-called Wilson bill, while at first glance it may appear to be a specific bill, has been found in its working to be entirely ad valorem. The riders at the end of this bill are for all practical purposes the bill itself, and the riders being on an ad valorem basis, the spinners of cotton yarns have suffered more than is generally known under its working.

Yours, truly,

R. C. KERR, *Treasurer.*

Senator JONES,
Finance Committee of the Senate,
Washington, D. C.

Mr. President, the purpose I had in reading that letter was to call attention to the reason why these rates are wanted. The rates are the same, as I say, in the first part of the clause as those in the McKinley law, but the reason why the proviso which I have just sent to the Secretary's desk and had read was left out I will now undertake to show.

While on the low grade of yarns the tariff will be the same, on the high grades, in the singles, exceeding No. 30, the equivalent ad valorem will be from 43 to 94 per cent, and on colored singles from No. 20 to 80 the equivalent ad valorem will be from 47 to 103 per cent. The letter I have just read explains that the labor cost between the yarns at Fall River and Lancashire was not 25 per cent or 50 per cent, but that it was 100 per cent and over.

I had a table prepared in 1894, when we had this subject under

consideration. I remember to have had stated the cost of labor in Massachusetts, at Fall River, by Jacob Schoenhof, a patient, honest, and careful investigator, for the spinning of a pound of yarn. When the figures given as the cost for spinning these different yarns were published, they were denounced by the manufacturers all over the country. The Manufacturers' Club at Boston particularly denounced the figures, and published a statement that they would expose the absurdity and the fallacy of the scale published by Mr. Schoenhof. I hold in my hand a letter from Mr. Robert Howard, the secretary of the Fall River Cotton Mule Spinners' Association, in which he says:

FALL RIVER COTTON MULE SPINNERS' ASSOCIATION,
Fall River, Mass., June 11, 1897.

DEAR SIR: Yours received and contents carefully noted. The number of spindles in the King Philip mules are 1,472, or 636* in mule. I have gone over the list you sent me—which is inclosed—and find it figured out correctly. The same prices are still in force, and I inclose two copies of them. The same prices are paid in the city of New Bedford, but in New Bedford the mules contain more spindles, which is an advantage to the spinner.

With best wishes, I am, very truly, yours,

ROBERT HOWARD,
Secretary Fall River Spinners' Association.

Mr. J. SCHOENHOF.

A scale of prices is submitted by Mr. Schoenhof as being the labor cost of spinning these yarns at Fall River, and in an opposite column, which I will present and allow to go into the RECORD, is Mr. Schoenhof's published statement, at the same time, of the cost of yarns in Bolton, England, where he went to the books of the mills and took the expenses from the books, from their current business, they giving him every facility to understand the facts.

On No. 36 yarn, the cost in Fall River was 1.17, in Bolton 1.10. On No. 40, in Fall River 1.368, in Bolton 1.294. On No. 48 it was 1.8 in Fall River against 1.614 in Bolton, and so on down to 96. On 96 it was 4.538 in Fall River and 4.47 in Bolton.

When you reach the high numbers—when you get to 100 and from 100 up—the labor cost, taken from the best mills in Fall River and from mills at Bolton, changes its condition, and the labor cost is not 25 per cent more in favor of the English mills, nor 50 per cent, nor 100 per cent, but is actually cheaper in Fall River than in England. On No. 100, 4.85 is given as the cost at Fall River and 4.86 in Bolton. On No. 108, it is 5.346 in Fall River and 5.45 in England. On No. 116, it is 5.647 in Fall River and 6.066 in Bolton. On 120, it is 6.098 in Fall River and 6.38 in Bolton, cheaper than it is in England.

The following are the rates paid to mule spinners at Fall River, Mass., and Bolton, England, per pound of weft yarn. Prices are computed on the same basis of number of spindles to the mule. The price list for Fall River is from the King Philip Mills, and is based on prices to be paid per 100 hanks. They are reduced to the pound rate in order to conform to the English prices, which are given per 100 pounds. The English prices are those from the "Official price list for Bolton and district," in force at the same time at which the prices for the King Philip Mills were handed to the Senate Finance Committee in 1894:

Mule spinners' prices paid at Fall River, Mass., and Bolton, England, per pound of weft yarn.

Yarn number.	Fall River.	Bolton.	Yarn number.	Fall River.	Bolton.
	Cents.	*Cents.*		*Cents.*	*Cents.*
36	1.17	1.10	84	3.805	3.739
40	1.368	1.294	92	4.351	4.287

52	1.944	1.83	100	4.85	4.83
60	2.37	2.256	108	5.346	5.45
64	2.56	2.466	116	5.647	6.066
72	2.986	2.996	120	6.098	6.38
80	3.50	3.476			

* Mr. Howard undoubtedly means 736.

The labor cost is less in the higher numbers in Fall River than it is in Bolton, while, on the other hand, in the low numbers the rates are infinitesimally more favorable on the other side than on this. There is nothing approaching 25 per cent nor 50 per cent nor 10 per cent as the difference in labor cost in these yarns. Yet we have the assurance from the spinners in the letter which I have just now had read that the reason why they insist on these high tariffs is to enable them to compete with 100 per cent difference in labor cost.

Mr. President, I confess that it seems to me the time has come when we ought to stop this talk about our being unable to compete with those upon the other side. This country is no longer a manufacturing infant. It is time that we should stop this claim about our new industries and infant industries on small beginnings, just starting, and that therefore it is necessary to have some sort of protection to enable them to hold their own in competition with people abroad.

I wish to call attention to some tables which were prepared by Mr. Schoenhof, showing the growth of the industries in the United States and in Great Britain. I shall not detain the Senate long, but I will call attention to a few striking facts to which it seems to me we can not afford to shut our eyes. The total of the highest manufactured articles, chiefly machinery, implements, and apparatus, exported in 1886 from this country abroad was $22,618,000. In 1891 we exported $40,618,000. In 1896 we exported $63,516,000 of this class of goods, making an increase in the first five years of $18,000,000 and in the second five years an increase in our exports of this class of manufactured goods of $22,000,000, and this excluded the lower classes of manufactured goods.

Mr. President, I hold in my hand a table which shows the increase in the United States in the production of coal and pig iron as compared with the production of coal and pig iron in Great Britain and as compared with the production of coal and pig iron in Germany. We have been hearing for the last ten years that Germany was coming rapidly to the front in the manufacture of all sorts of goods and that she was driving other nations out of the markets of the world by reason of the fact that her enormously cheap labor enabled her to produce these articles for less expense than we could, we paying the highest wages to labor of any nation on the globe, Germany paying exceedingly low rates, while Great Britain comes next to us in the rates paid.

In 1886 this country produced 96,000,000 tons of coal. In the same year Great Britain produced 157,000,000. I will not detain the Senate by reading the gradual increase in the production of coal in both countries, but in 1887 we produced 110,000,000 tons and in 1888 126,000,000 tons; in 1889, 126,000,000 tons; in 1890, 140,000,000 tons; in 1891, 150,000,000 tons; in 1892, 160,000,000 tons; in 1893, 162,000,000 tons; in 1894, 152,000,000 tons, and in 1895, 172,426,366 tons of coal, while Great Britain, with a steady gradual increase from 1886 to 1895, produced 189 661,362 tons, only exceeding our production of coal by ten or twelve million tons.

In the production of pig iron we had, in 1886, 5,000,000 tons. I will not give the odd figures. This has been increased to 6,000,000 and 7,000,000 and 8,000,000 tons, until 1895, when we produced 9,446,308 tons. Great Britain, with a steady increase until 1895, produced 7,703,459 tons, or nearly 2,000,000 tons of pig iron less than the United States.

We now equal England in the production of coal. We surpass England in the production of pig iron, and Germany hardly counts in the race. The German production of coal was only 73,000,000 tons in 1886, against 98,000,000 tons in 1884, while pig iron was 3,000,000 in 1886, against 5,000,000 in 1884. But I will content myself by placing these figures in the RECORD, and I will not detain the Senate by giving them in full.

Number of tons of coal and of pig iron produced in the United States, the United Kingdom, and Germany in the ten years from 1886 to 1895, inclusive.

[2,240 pounds for the United States and United Kingdom, and metric tons of 2,200 pounds for Germany.]

*1885 to 1895. †1885 to 1894.

Mr. MORGAN. Will the Senator from Arkansas allow me to make a statement on this subject?

Mr. JONES of Arkansas. With pleasure.

Mr. MORGAN. The Board of Trade at Birmingham, Ala., has presented some figures. I can not quote them with absolute accuracy, but I will give what will be very close in the neighborhood of a correct statement. Within the last ten months there has been exported from Alabama to European markets and sold at a profit 1,200,000 tons of pig iron, and a large quantity has also been exported to and sold in Japan and China.

Mr. JONES of Arkansas. I am obliged to the Senator from Alabama for the statement, and it accords with the statement I made when we had the metal schedule up, when I read extracts from trade papers here and there, showing that not only were we sending pig iron to Great Britain and selling it there, but that we were sending steel billets and a number of other productions of steel and selling them at the very doors of the English steel mills at a profit where they were not able to compete with us. This only proves that all the talk about our being an infant in industrial productions is idle and is unworthy the Senate of the United States.

But I desire to call attention to another statement, and one which seems to me to be vastly significant. It is as to the quantity of raw cotton used in the United States, in the United Kingdom, and in Germany. In 1886 we used 1,128,000,000 pounds; Great Britain used 1,517,000,000; Germany used 354,000,000 pounds. I will not detain the Senate by giving these figures, but I will publish them in full in the RECORD.

There was a steady, gradual increase in the United States. Great Britain has varied but little. Sometimes the consumption has been larger, sometimes smaller; but in 1895, as against 1886, there was consumed in Great Britain 1,553,000,000 pounds of cotton, while in the United States there was consumed 1,567,000,000 pounds of cotton. More cotton was consumed in the United States than in Great Britain. We are the largest cotton user in the world. We have not only for a century produced the cotton to clothe the nations of the world, furnishing the cotton for mills all over the world, but our own cotton industry has been increasing in the last ten or fifteen years, and under what are called the low rates of the Wilson Act the increase has gone on until we are absolutely spinning more cotton to-day than any nation on the face of the earth. Great Britain has taken her place as the second as a consumer of cottons, and Germany, this fearful country from which we are to receive such detriment, consumed 587,000,000 pounds, while we consume more than three times that much. Yet so formidable are the German productions as compared with the American manufactures that we must plead the baby act and must impose high and outrageous duties at the customs-houses to prevent those people, who are consuming less than a third of the cotton we are, from taking our markets away from us in our own country.

Quantity of cotton consumed in the United States, the United Kingdom, and Germany in each of the ten years from 1886 to 1895.

Year.	United States.	Per cent of increase.	United Kingdom.	Per cent of increase.	Germany.	Per cent of increase.
1886	1,128,063,588		1,517,186,720		354,127,400	
1887	991,129,273	—12	1,498,822,304	—12	434,931,200	22.8
1888	1,180,345,185	11.8	1,456,915,936	— 2.8	393,888,000	8.5
1889	1,062,903,210	— 9	1,659,859,936	14	493,904,400	25.3
1890	1,163,924,275	9.5	1,578,853,360	— 5	498,605,800	.9
1891	1,429,148,210	23	1,812,877,248	14.8	522,141,400	4.6
1892	1,599,887,165	11.8	1,542,332,400	—14.4	481,914,400	7.7
1893	1,183,550,452	—26	1,192,158,576	22.7	498,401,200	3.4
1894	1,112,775,186	— 6	1,548,221,808	30	559,528,200	12.3
1895	1,567,991,708	40	1,553,758,080	.3	587,594,200	4.9
Increase for decade	439,928,120	39	36,571,360	2.4	233,466,800	65.9

I have another table in this connection, which, while it does not pertain particularly to this schedule, is interesting in considering the question of our ability to consume manufactured goods. It is a comparison of the consumption of wool in the United States, in Great Britain, and in Germany. The table which I hold in my hand and which I will place in the RECORD shows the production of wool from 1886 to 1895 and the imports of wool from 1886 to 1895. It gives the total amount of wool produced and imported and used in this country as compared with the wool used in Great Britain and Germany. We used, in 1886, 424,404,000 pounds of wool. Great Britain used 435,989,000 pounds. In 1895 we used 538,989,000 pounds of wool, while Great Britain used 527,420,000 pounds. We are the largest producer of pig iron in the world, the largest user of raw cotton in the world, and the largest user of raw wool in the world, and yet we are constantly talking about our infant industries and the absolute necessity of all these things being protected.

Number of pounds of wool produced and retained for home consumption, and number of pounds of wool imported and retained for home consumption by the United States, the United Kingdom, and Germany in each of the ten years from 1886 to 1895, inclusive.

Year.	United States.			United Kingdom.			Germany.		
	Wool produced and retained for consumption.	Net imports and retained for consumption.	Total retained for consumption.	Wool produced and retained.	Wool imports retained for consumption.	Total retained for consumption.	Wool produced and retained for consumption.	Net imports.	Total retained for consumption.
1886	301,353,000	123,084,000	424,404,000	151,505,000	284,464,000	435,989,000	102,000,000	246,312,000	348,312,000

1895	305,408,000	206,033,000	500,159,000						
1896*	290,000,000	248,989,000	538,989,000	156,977,000	370,443,000	527,420,000	80,000,000	397,647,000	477,647,000

*Calendar year.

There are many other items of interest in these tables in this connection which I will present to the Senate at a later time in the debate. I want to bring this out in the discussion of the cotton-yarn question for the reason that it seems to me the rates we placed on cotton yarns under the Wilson Act were absolutely too high; that there was really no defense for this rate on cotton yarns. But even admitting that this rate shall stand, taking it as it is, as I am willing it shall be, I do insist that it is nothing but fair and right that the limitations which prevented those rates from going to outrageous heights on the Wilson Act shall also be incorporated in this provision as we have it in the pending bill, and that we shall adopt a proviso which shall prevent the tariff on some grades of these cotton yarns from going to 100 per cent, and that it ought to be properly limited.

I shall ask for the yeas and nays on the pending motion.

Mr. MILLS. Mr. President, the old question about the cheap labor of Europe interfering with our manufactures, as often as it has been stricken down, still appears in the ring. We meet it day by day. Some years ago a gentleman was sent by the cotton manufacturers of Great Britain to examine the condition of the cotton business in the United States. He was an expert, having grown up in the business. He came and examined the books at Providence, R. I., Fall River, and three or four other of the principal cotton seats in the United States, brought his books with him from Great Britain, and compared fairly the cost of a pound of print cloth, making some 6 or 7 yards—the labor cost, the material cost, and every other item of cost.

The result was that at every place in the United States, without exception, the labor cost was less than it was in Great Britain, and in Great Britain it is less than anywhere in Europe; and yet when the sum total of the cost of the production of a pound of goods was reached, Great Britain produced it at a fraction less in the pound than it was produced in the United States, and that cost us the markets of the world, into which she sends from three to four hundred million dollars of manufactured cottons every year. It is not the labor cost. It is the cost of the material.

After having listened to the statements made and the figures given by my friend the Senator from Arkansas, it seems to me if we would look to the interests of the people of the United States we would try to strip ourselves of the incumbrances which we have placed upon our labor and our industries in this country, and instead of shipping two-thirds of the great cotton crop of the

United States—two-thirds of that of the whole world—away to other people to manufacture, we would manufacture almost every pound of it at home. Instead of giving employment to 218,000 operatives to manufacture it, as we did in 1890, to manufacture, in round numbers, one-third of that product, we would give employment to 700,000 people in the United States to manufacture almost the whole of it and take the markets of the world.

Why should we not manufacture the cotton? Certainly cotton is cheaper in the United States than it is in any point in Europe. We produce it cheaper because we have the most productive labor in the world. It is conclusive evidence that we produce it cheaper that we send it from home into foreign markets for consumption. Every product goes from the point at which it is at the lowest price to the point where it is at the highest price for the profit. No man will contend that we do not produce it cheaper and sell it cheaper than anywhere else, and it can not be that we are kept out of the markets of the world because cotton is higher here than it is in Europe. We all know that it costs from a half cent in the pound or more to transport it to Europe, to England, and Germany, and France, and Belgium, and the other countries that manufacture it. We have in the 2,000,000,000 pounds that we ship to foreign countries at least $15,000,000 advantage in the price of the material itself over our competitors in Europe. Then why shall we not manufacture that cotton and give employment to our own people, who are idle all over the country? We have the cheapest labor in the world, as my friend has demonstrated, and has been over and over again demonstrated by comparison of the figures.

Mr. President, I have some figures here which I have taken from statisticians, taking our own census report for ours. In 1890 in the United States we turned out cotton goods to the value of $267,981,724. We paid for wages $66,024,538. The annual wage rate was $302. The annual value of the product which each man turned out to his employer was $1,224, and there were 218,876 hands employed. The labor cost of $100 worth of this cotton product, including salaries of officials, was $25.93. Excluding the salaried officers, members of partnerships and corporations making the goods, and applying the labor cost alone to wage earners who made them, the labor cost of $100 worth of these cotton goods was $24.63.

In England, in 1887, the year for which I have the returns, there was turned out $486,720,000 worth of cotton goods, at a labor cost of $141,120,000. The annual wages paid to each operative was $267.

The value of the output of each laborer was $840. The labor cost per $100 worth of product was $28. The labor cost of $100 worth of goods in our country was $25.93 and in Great Britain $28. Our man turned out for his employer $1,224 worth of product, and the English operative turned out $835 and $840 at different times.

Yet, Mr. President, we are confronted with the statement that our labor cost is higher, and that the higher cost of labor enters into a part of the total cost of the product, and that that keeps us out of the market. What is it that keeps us out of the market? We have the cheapest labor. We have the cheapest material. Why is it we do not take the market? It is simply because we have loaded with taxation all the elements of production in these cotton goods.

I was at one of the cotton manufactories in New England some years ago when the proprietor showed me from his book that he had purchased $300,000 worth of dyes, and you will see by the chemical schedule that they are taxed from 50 to 100 per cent. Everything about it is taxed. The bands that turn the wheels are taxed, the machinery itself is taxed, the oil that lubricates the machinery is taxed, the dyes that go into the goods are taxed; but when you go to England, and Germany, and France, and Belgium, and look at the American's competitor, who is driving him out of the markets of the world, you find that his Government has stripped him to the waist and has taken away all these elements in order that he may enter the markets, while we are loading up our manufacturer not for the benefit of the laboring man in this country, but in order to build up magnificent trusts to dominate the legislation of this country, as they are doing.

Now, if we were to take and put the whole chemical schedule on the free list, put the cotton yarns on the free list—they are part of the materials that ought to be untaxed—and give our manufacturers the right to bring everything into this country that will give employment to our people and make the finished product, we could go out into the markets of the world and drive all competitors before us. As my friend says, we are no infants. We are outmanufacturing any people. We have the capital, we have the machinery, we have the genius, and we have the material. We are raising a vast amount of the materials that give employment to the manufacturers of Europe, and we are shipping them to Europe, paying additional cost upon them, and then so loading ourselves with cost of production that when the finished product goes in the market it drives us out of the markets of the world, and our people stand idle in the highways, asking and wishing and praying for the return of prosperity, when we are prohibiting them from exercising the God-given right to work for meat and bread for their support.

Mr. President, the cotton yarns ought to be put on the free list; but if we do not intend to put them on the free list, let us at least reduce the cost of them and increase the exportation and consumption of our cotton goods and give more employment to our people.

Mr. VEST. Mr. President, I hope our friends on the other side will at least respect the utterances and weigh the testimony of the most distinguished leader their party has had in the last fifty years. I refer to the Hon. James G. Blaine, at one time a member of this body, the Republican candidate for the Presidency, and Secretary of State under the Administration of Garfield. On June 25, 1881, Mr. Blaine made an official report as Secretary of State in regard to the cost of labor in the manufacture of cotton goods in this country and in England, and I will ask the Secretary to read it.

The PRESIDING OFFICER. Without objection, the Secretary will read as indicated.

The Secretary read as follows:

[Extract from report of James G. Blaine, Secretary of State, on the "Cotton goods trade of the world," dated Department of State, Washington, June 25, 1881, pages 98 and 99.]

Owing to the different arrangements of the English and American tables of wages, it is difficult to give comparative analyses thereof which would show at a glance the difference in the wages of the operatives of both countries.

The wages of spinners and weavers in Lancashire and Massachusetts, according to the foregoing statements, were as follows, per week: Spinners, English, $7.20 to $8.40 (master spinners running as high as $12); American, $7.07 to $10.30. Weavers, English, $3.84 to $8.64, subject, at the date on which these rates were given, to a reduction of 10 per cent; American, $4.82 to $8.73.

The average wages of employees in the Massachusetts mills is as follows, according to the official returns: Men, $8.30; women, $5.62; male children, $3.11; female children, $3.08. According to Consul Shaw's report, the average wages of the men employed in Lancashire mills on the 1st of January, 1880, was about $8 per week, subject to a reduction of 10 per cent; women, from $3.40 to $4.30, subject to a reduction of 10 per cent.

The hours of labor in the Lancashire mills are fifty-six, in the Massachusetts sixty per week. The hours of labor in the mills in the other New England States, where the wages are generally less than in Massachusetts, are usually sixty-six to sixty-nine per week. Undoubtedly the inequalities in the wages of English and American operatives are more than equalized by the greater efficiency of the latter and their longer hours of labor. If this should prove to be a fact in practice, as it seems to be proven from official statistics, it would be a very important element in the establishment of our ability to compete with England for our share of the cotton-goods trade of the world.

In the two prime factors which may be said to form the basis of the cotton-manufacturing industry, namely, raw material and labor, we hold the advantage over England in the first, and stand upon an equality with her in the second.

Having the raw material at our doors, it follows that we should be able to convert it into manufactures, all things being equal, with more economy and facility than can be done by England, which imports our cotton and then manufactures it in her mills; the expense of handling, transportation, and commission must be an important item in this regard, as compared with our turning in the fiber from the cotton fields to our mills and shipping it in the advanced form of manufactured goods. Add to this the secondary fact that it costs us no more to handle and manufacture the same than it costs in England, and we stand on an undoubted equality, thus far, in the race of competition.

* * * * * * *

JAMES G. BLAINE.

Mr. VEST. That letter covers every point in this discussion, and it comes from one of the most eminent apostles of a protective tariff who has ever lived in the United States. Mr. Blaine states there that the American labor is the cheapest, the most effective, and that there is no reason why we should not compete with England for the cotton trade of the world.

But I call to the stand now another witness. In 1894, when the Wilson bill, so called, was under discussion, Mr. Borden, the largest manufacturer at Fall River, Mass., appeared in the public prints in an interview published in the Philadelphia Press; and I take it that no one on the Republican side will question the absolute devotion of that journal to the cause of protection, in season and out of season. I ask the Secretary to read what Mr. Borden stated in regard to the ability of the cotton manufacturers of the United States to compete with those of England anywhere.

The PRESIDING OFFICER. The Secretary will read as requested.

The Secretary read as follows:

Many of these [cotton] manufacturers are now able to maintain themselves against competitive manufacturers anywhere in the world. Mr. M. C. D. Borden, who is now regarded as perhaps the ablest man now engaged in the business of print-cloth manufacture, and who has recently erected two enormous mills in Fall River, said to me:

"So far as our business is concerned, it does not make much difference what Congress may do with respect to any tariff bill. American print-cloth manufacturers are now able to beat the world. During the panic of last summer I paid $500,000 for indigo alone, and if we do not command the markets of the world it is probably because we do not make the kind of goods which people in foreign lands want. A few years ago we sent several hundred thousand cases of print goods to Manchester, the very heart of English print-goods manufacturing, and the manufacturers there could not touch our prices. The market for these goods was, however, limited, because they were of a different kind of make from that which English consumers had been accustomed to buy. However, we could have made these goods popular in England, and should have done so had it not been for the fact that the American market

offered a higher price than we could get over there, so that we brought the greater proportion of these cases back and marketed them in the United States at a reasonable profit."

Mr. VEST. That is the testimony of the largest manufacturer at Fall River in 1894 stating that the American manufacturers need no protection. It seems to me if we now increase these duties, as I had occasion to say in the early part of this discussion, it is from mere force of habit and without any reason at all and without any cause in the way of protecting any interest in the United States.

There is an increase in the pending amendment over the Dingley bill, of course a large increase over the Wilson Act, and in many cases above the McKinley Act. I undertake to say now that before we close this matter of taxation under the cotton schedule the 20 per cent tax upon cotton which we have imposed here will be made the excuse for additional increases. I am as certain of that as of anything in the future.

There will be another increase, because the cotton manufacturers of New England will say, "You put 20 per cent upon long-staple Egyptian cotton that is necessary in the manufacture of certain sorts of cotton cloth and we must be compensated." That is the word, "compensated." The whole tariff system seems to be based upon the idea that when one tax is put on another tax must follow, and they call it equalization and compensation. There is never any compensation to the consumers of the country who are compelled to buy cotton cloths or else go naked.

Mr. McLAURIN. Mr. President, athough not strictly in order under this amendment, as the debate has assumed a wide range on the subject of cotton, I desire to call the attention of the Senator in charge of this bill to paragraph 342 to inquire and express the hope that he will be able to explain why a duty is imposed on jute bagging for covering cotton, while in another paragraph binding twine is placed on the free list?

If such discrimination can be defended, I am certain that it would be listened to with very great attention. If such a policy can be justified by any rule of national legislation, its advocates should hasten to make the disclosure.

To my mind it assumes the form of studied and pernicious sectionalism, of a deliberate and premeditated attempt to punish the cotton planter of the South and favor the grain grower of the North and West. In my opinion it admits of no other construction.

Mr. PETTUS. Will the Senator from South Carolina allow me to suggest that cotton ties are in exactly the same attitude?

Mr. McLAURIN. I am coming to that.

Mr. PETTUS. And more than that, if they come in on cotton I suppose they are now taxed 20 per cent, but before 20 per cent was added they came in free on cotton imported, but we have to pay for them if we use them at home.

Mr. McLAURIN. Yes, sir; I will come to cotton ties in a moment.

SECTIONALISM EXPOSED.

In fact, a careful examination discloses the earmarks of sectional advantage running all through the provisions of the bill, which should be a source of profound regret to everyone interested in the general welfare of our common country.

The South seeks no advantage and only asks for equal rights under all national legislation.

Sound public policy, if nothing else, should secure to us these rights, since continued injuries to the South in the near future must react on the balance of the country. When I consider the evident unfairness of this measure, I must confess to a feeling of alarm that the spirit of oppression yet prevails and that the South must continue to conserve the greed and avarice of the North.

This measure will doubtless pass and become a law. There is little hope of changing few, if any, of its oppressive features. Yet I desire to go on record as protesting against its sectionalism and demanding justice and equality for the industries of the South.

Going further into the details of the bill, I find free binding twine for the Northern farmer and taxed cotton ties and jute bagging for the Southern planter; protected wheat and corn for the North and, until recently, free cotton for the South. The Senate committee attempted to protect the Northern railroad-tie industry and leave the Southern tie industry to fight for itself. As the bill came from the House, there were free hides for New England and taxed boots and shoes for the balance of the country.

I find Northern linseed oil protected 20 cents per gallon and Southern cotton-seed oil but 4 cents per gallon. Maple sugar, for Vermont and the North, is protected 4 cents per pound, while the tar of Georgia and the Carolinas is put on the free list. The turpentine of the South is put on the free list, while the maple sirup of the North is protected by a duty of 4 cents per pound. Northern hay is protected $3 per ton, while Southern oil cake is placed on the free list. Cotton waste is found on the free list, while New England shoddy is protected 20 cents per pound.

I might continue this list of discriminations to a greater length. I might take up the list of manufactured products and show that certain grades manufactured in the South are not protected in proportion to other grades in similar lines manufactured at the North.

I might analyze the iron, coal, and other great industries and show how the Eastern monopolists have arranged their intricate schedules to plunder the South. I might point to the outcome of the recent contest over the railroad ties, rice, and cotton schedules as further evidence of the sectional animus of this bill.

If all the tricks and schemes of the New England manufacturers and Eastern importers could be fully exposed, the people would be amazed at their extent and the cunning manipulations which fixed them in this bill. But I have already pointed out enough to sustain my contention that this bill is framed upon sectional lines and is unjust and injurious to the South. Even in its provisions of reciprocity with Hawaii the South bears the burden, while the North, as usual, reaps the benefit. I venture the assertion that 90 per cent of the free imports from those islands come in direct competition with Southern industries, while 90 per cent of the exports to those islands are Northern products.

THE BILL MIGHT HAVE BEEN DEFEATED.

While I disclaim most positively any attempt to stir up sectional strife or sectional animosities, I feel a sense of deep concern over the sectional features of this measure. Without intending to criticise anyone, or in any manner assume superior knowledge, I give it as a matter of personal opinion if those who are opposing this bill had taken time to thoroughly analyze its sectional provisions and had fought it out on that issue as persistently and intelligently as they now are doing on other lines, the bill might have been defeated or a full measure of justice and fair play secured.

I believe there are those on the other side of this Chamber who would recognize these unfair conditions and vote with us to correct the wrong.

Mr. President, in a speech upon this bill while under consideration at the other end of the Capitol, I took occasion to disclose the result of sectionalism in previous tariff legislation, and the disclosures made at that time have so far remained uncontradicted. I gave the facts and statistics concerning the different sections of the country with reference to the decrease in wealth, the accumulation of wealth, and the distribution of capital and wealth. In each and every instance the result favored the manufacturing and money-loaning States. I will quote the conclusions given at that time:

Mr. Speaker, I have shown by comparison of losses between the sections, by a comparison of gains between the sections, and by the distribution of loanable funds among the sections, that the manufacturing and money centers of the East in each hold a decided advantage. I have shown also that these advantages are increasing every year, and now submit the question whether this state of affairs is to continue or not? Shall the manufacturers and money loaners of the East continue to exact tribute from the balance of our people? Shall these two interests stand on the highway of national progress, and, like the buccaneers of old, demand tribute from all who pass their way?

The cry for relief from the insatiate greed of these two absorbers of wealth is coming up from our people louder and more earnest every day. Something must be done, in my judgment, and that at once, to stay the rapacity of the one and lighten the burdens of the other. At this point it is proper to ask what has brought about this vast difference in conditions. While many no doubt will refuse to accept my interpretation, yet I firmly believe that unequal taxation and the increased purchasing power of money lies at the root of this great evil. Unequal taxation brought unfair exchange between the sections, and the increased purchasing power of the dollar took what remained after the transaction.

Many of our ablest statesmen believe that the manipulation of our finances is alone responsible for present conditions. I am ready to concede that our financial system is wholly bad, and has been a potent factor in bringing about the distress we see on every hand. But, Mr. Speaker, there must have been unfair exchanges among the people before money secured its present powerful position. So long as exchanges are fair and equal between the sections, just so long will the people of the various sections secure their proper share of the money in circulation.

When the sections which produce raw material receive proportionate remuneration with sections which manufacture, the producers of raw material will prosper reciprocally with those who manufacture. In other words, when there is a reciprocity in remuneration or profits for all labor in all sections there exists an equality of results, which eliminates the advantage of one class of laborers over another. Under such condition, no matter whether the volume of money be great or small, everyone who labors will receive his proportionate share, and the money of such a country will remain divided among its people, and can not be secured and hoarded by a few while the many go without. The very moment, however, that one section obtains an advantage unequal exchanges begin, and unequal division of money follows.

Money is the lifeblood of business, flowing through the arteries and veins of commercial exchange. When these exchanges are fair and just, the entire economic system thrills and vibrates with this life-giving element. But when exchanges become unfair, when some of the veins and arteries are clogged, and this life-giving element does not or can not return, the entire system becomes deranged, and the lifeblood is found congested in some parts and wanting in others. The result is disaster and death. An unfair protective tariff gave the Eastern manufacturing States an advantage. This advantage in taxation made unfair and unequal exchanges throughout the country. Through its application the manufacturer obtained a larger remuneration for his labor than those who produced the raw material used in the factory or the food products consumed by the operatives.

Under such conditions the manufacturing centers gradually but surely received an unequal share of the general fund of circulating medium, and became the money as well as the manufacturing centers of the nation. With every exchange between the East and the balance of the country an unfair division of profits or remuneration took place, and an unequal portion of the general stock of money went to New England. It was through this method of unfair exchange, made possible by unequal taxation, that the East obtained more than its proportion of the money of the country, and now bids defiance to the balance of the nation.

THE SOUTH PLUNDERED OF ITS RIGHTS.

Mr. President, the more I examined the subject the more thoroughly I became impressed with the belief that the people of the

South were being plundered, and that, as a rule, we were giving more attention to the propaganda of a political theory than the material interests of our constituents. Acting upon this belief, I demanded of the Committee of Ways and Means an equalization of the benefits of this measure between the North and the South.

I asserted that if the policy of the measure proved beneficial, the South was selfish enough to want her proportion; if, on the contrary, the bill should be detrimental, the South was patriotic enough to stand its share of disaster; that in any event and at all times we of the South demanded that all national legislation should distribute its burdens and benefits equally among all the sections and all the people. The novelty of such a position was so great and the spectacle so rare for a Southern Representative to make such demands that I have been called a protectionist.

NOT A PROTECTIONIST.

Mr. President, I am not a protectionist; have never given a vote in support of that principle or uttered a word in defense of that doctrine. I look upon the doctrine of protection as indefensible and a potent factor in building up and maintaining trusts and monopolies. Certain newspapers in the North, instead of answering my arguments against protection, have been pleased to call me a protectionist because I demanded equality before the law. I stand squarely upon the tariff plank of the Chicago platform and base my actions entirely upon its teachings. My votes upon the lumber, cotton, and rice schedules are in strict accord with the doctrines of Democracy. They were given in defense of the people whom I represent, and to compel the Republican party to place the South on an equal footing with the balance of the country.

So far I have been guided by a sincere desire to serve the best interests of my own State and the South. And I want to say most emphatically that no matter who may criticise, or what criticism may be made, I shall continue to labor for the welfare of South Carolina to the very limits of my ability.

I believe that if the representatives of each State would labor more earnestly for the material interests of their people the laws on our statute books would be less sectional and far more just and equitable.

HISTORY OF THE DOCTRINE OF FREE RAW MATERIAL.

Mr. President, I would gladly yield the floor at this point, could I do so and retain my self-respect or in the least degree merit the continued confidence of those whom I represent. But, sir, with others, I have been charged, in this Chamber and elsewhere, with being recreant to established principles of Democracy and that such action threatened discord in the Democratic party. Much as I love peace and deprecate all party dissensions, I can not permit such imputations to remain unchallenged. I have sought carefully and earnestly to inform myself upon this subject, with a sincere desire to be right and act intelligently.

From all the facts that I have been able to gather, I feel justified in making the assertion that what is now known as the doctrine of free raw material has never been an established principle of Democracy. To prove my contention, I will appeal to the past record of the Democratic party itself.

I repeat, that the idea of placing raw material on the free list, while the finished product is protected by a duty, is not and never has been a principle of Democracy.

The Walker tariff, which was practically in force from 1846 to 1861, did not provide for a single article of free raw material except cotton. I will admit that the rate of duty on certain products was very low, but I contend that the principle of free raw material was not recognized in that bill.

I have examined quite carefully the history of legislation since the war, especially the speeches and letters of the Hon. S. J. Tilden, and I find no mention of this "established principle" of Democracy until March 30, 1882. On that day Hon. A. S. Hewitt, then a member from New York, introduced the following resolution, upon which he made an extended speech:

Resolved, That the bill creating a tariff commission be recommitted, with instructions to the Committee on Ways and Means to report within thirty days, or an earlier date if it be practicable, a bill based upon the following instructions:

First. That all raw materials, meaning thereby all materials which have not been subjected to any process of manufacture, and all waste products, meaning thereby all waste materials which are only fit to be manufactured, and all chemicals which are not produced in this country, and alcohol for use in manufactures, shall be placed upon the free list.

Second. That so far as possible specific duties shall be substituted for ad valorem, and that in determining such specific duties the average dutiable value of imports during the last three years shall be taken as the standard of value, upon which no higher rate of duty shall be imposed than shall be necessary to compensate for the difference in the cost of labor at home and abroad expended in the production of such products, after making due allowance for the expenses of transportation, and that the rate of duty shall not in any case, except on luxuries, exceed 50 per cent of such average dutiable value.

The bill under consideration at that time provided for a tariff commission. I have examined the debates on this measure as carefully as my limited time would admit, but failed to discover that this resolution attracted much attention, or was cordially indorsed by Democratic speakers. Mr. Hewitt was charged by the Republicans with selfish motives, which the facts in the case appeared to confirm.

FRAUDULENT DEMANDS OF NEW ENGLAND.

I will quote from a speech of Mr. Townsend, of Ohio, upon this point:

And right here, Mr. Chairman, let me emphasize what I have said by referring to the resolutions which appear at the opening of the speech of the gentleman from New York, which declare for free raw material. This would include iron ore; and in the course of his remarks he favors the free importation of scrap iron. He would strike a blow at our native ores, which constitute so large a part of our mineral productions, and drive out of employment our puddlers by the free introduction of scrap iron. The manufacturers on the seaboard want free foreign ore, because they need it to mix with the ores of New Jersey; and if once they could bring it in as ballast cheaper than they could get our Lake Superior ores, the benefit, if any, would be to the manufacturers on the seaboard, and would not result in a reduction in the price of iron or steel. It would give an advantage to those manufacturers, at the expense of their associates engaged in the same trade further removed from the seaboard.

When, in addition to the above, it is known that Mr. Hewitt was a large manufacturer of iron, the charge of selfishness appears not altogether without foundation. I examined the daily press of New York and found these resolutions mentioned as "Hewitt's plan" and "Hewitt's idea." This led me to suspect that the doctrine of free raw material originated with Mr. Hewitt, and that his motives were somewhat selfish.

These resolutions were up before the New York Chamber of Commerce on April 8, 1882, and were adopted by the narrow majority of 33 to 29.

A meeting held at Chickering Hall, New York, April 15, passed resolutions favoring Mr. Hewitt's propositions. The Democratic county committee of New York soon after indorsed the resolutions, all of which went to prove that at that time the doctrine of free raw material had not become an established Democratic principle.

It is not probable that all this trouble would have been incurred to bring out and indorse an old and well-established Democratic principle.

On May 6, 1882, at the close of debate on the bill, Mr. Hewitt introduced the following amendment as specific instructions for the tariff commission:

1. Repeal of the duties on raw materials.
2. The proportionate reduction of the duties on articles manufactured from raw materials thus placed on the free list.
3. No duties to exceed 50 per cent except those on luxuries.
4. No internal-revenue duty to be imposed on alcohol used in manufactures.
5. Where practicable duties to be made specific by converting ad valorem into specific duties on the basis of average market values.

This amendment was rejected on a division by a vote of 42 to 88.

It is evident from this vote that Mr. Hewitt's doctrine was somewhat of a stranger among Democratic principles.

HON. RANDOLPH TUCKER, HON. W. R. MORRISON, AND HON. R. Q. MILLS STRANGERS TO THE DOCTRINE IN 1882.

Hon. Randolph Tucker, of Virginia, immediately followed with another amendment in which he proposed a schedule of duties ranging from 45 per cent ad valorem on woolens to $14 per ton on railroad iron. The only free raw materials suggested by Mr. Tucker were medicinal barks, prepared or otherwise. This amendment was rejected by a vote of 37 to 79.

It is quite evident that so eminent a Democrat as Mr. Tucker had not learned of this doctrine being an important tenet of his party. Hon. W. R. Morrison then presented an amendment for a similar purpose, which provided:

Said commission shall report no revision of the tariff providing for duties in excess of the several duties and rates of duty imposed by the act of Congress approved March 2, 1861, and known as the Morrill tariff, on any of the following articles not subject to tax under the internal-revenue laws, namely:

Manufactures of cotton, iron and steel, wood, hemp, jute, flax and manila, glass and glassware.

On all articles embraced in the schedule of sundries; also on all metals not otherwise provided for, and all manufactures of metals.

On all spices.

On all wool, hair of the alpaca goat and other animals, and all manufactures thereof.

On beef, pork, hams, bacon, cheese, wheat, butter, lard, barley, corn, and fish.

Mr. Morrison is a Democrat of Democrats, but this resolution discloses the fact that even he had not then learned the lesson of free raw material. He had the temerity to demand, in defiance of this alleged principle, a tariff on wool, wheat, corn, barley, and other raw materials.

Then followed a motion by Hon. R. Q. MILLS of Texas (now a distinguished member of this body), to recommit the bill with the instructions which I shall read. Mr. MILLS stated that his instructions were those which were prepared by Hon. R. J. Walker in the tariff of 1846:

Resolved, That the bill creating a tariff commission be recommitted to the Committee on Ways and Means, with instructions to report within thirty days a bill framed in compliance with the following instructions:

1. That no more money should be collected than is necessary for the wants of the Government economically administered.
2. That no duty be imposed on any article above the lowest rate that will yield the largest amount of revenue.
3. That below such rates—

I call particular attention to this—

That below such rates discrimination may be made, descending in the scale of duties, or for imperative reasons the article may be placed on the list of those free from all duties.

4. The maximum revenue duty should be imposed on luxuries.

5. That all specific duties should be abolished and ad valorem duties substituted in their place, care being taken to guard against fraudulent invoices and undervaluation, and to assess the duty upon the actual market value.

6. That the duty should be so imposed as to operate as equally as possible throughout the Union, discriminating neither for nor against any class or section.

This amendment was rejected by a vote of 152 to 75.

A TARIFF FOR REVENUE AGAINST THE DOCTRINE OF FREE RAW MATERIAL.

Mr. President, this resolution of Mr. MILLS demanded the reenactment of the Walker tariff of 1846, in which the idea of the doctrine of free raw material can not be found. This resolution received the solid support of the Democratic members, if I remember correctly, and was no doubt considered orthodox Democracy at that date.

May we not fairly draw the conclusion that up to this date the doctrine of free raw material had not become an "established principle" of the Democratic party? Having located, as I believed, a date when the doctrine of free raw material was not an established Democratic principle, I continued my investigation to find when it was.

In the Democratic platform of 1884 I find the first mention of free raw material in the following indirect manner. Speaking of the Republican party, "It has subjected them to an increasing flood of manufactured goods and a hopeless competition with manufacturing nations, not one of which taxes raw materials." In the same platform I find the following significant statement, referred to the other day by the Senator from Missouri [Mr. VEST], which I shall not take the time to read, as the Senate is familiar with it, but will print in my remarks:

Knowing full well, however, that legislation affecting the operations of the people should be cautious and conservative in method, not in advance of public opinion, but responsive to its demands, the Democratic party is pledged to revise the tariff in a spirit of fairness to all interests. But, in making reduction in taxes, it is not proposed to injure any domestic industries, but rather to promote their healthy growth. From the foundation of this Government taxes collected at the custom-house have been the chief source of Federal revenue. Such they must continue to be. Moreover, many industries have come to rely upon legislation for successful continuance, so that any change of law must be at every step regardful of the labor and capital thus involved. The process of the reform must be subject in the execution to this plain dictate of justice—all taxation shall be limited to the requirements of economical government.

The necessary reduction and taxation can and must be effected without depriving American labor of the ability to compete successfully with foreign labor and without imposing lower rates of duty than will be ample to cover any increased cost of production which may exist in consequence of the higher rate of wages prevailing in this country. Sufficient revenue to pay all the expenses of the Federal Government, economically administered, including pensions, interest, and principal of the public debt, can be got under our present system of taxation from the custom-house taxes on fewer imported articles, bearing heaviest on articles of luxury and bearing lightest on articles of necessity. We therefore denounce the abuses of the existing tariff; and, subject to the preceding limitations, we demand that Federal taxation shall be exclusively for public purposes, and shall not exceed the needs of the Government, economically administered.

It would require a very vivid imagination, in my opinion, to torture this statement into a demand for free raw material; yet the distinguished Senator from Missouri [Mr. VEST] declared quite recently that such was its meaning.

The platform of 1888, which the distinguished Senator so emphatically stated declared for the doctrine of free raw material, reads as follows:

The Democratic party of the United States, in national convention assembled, renews the pledge of its fidelity to the Democratic faith, and reaffirms the platform adopted by its representatives in the convention of 1884, and indorses the views expressed by President Cleveland in his last annual message to Congress as the correct interpretation of that platform upon the question of tariff reduction; and also indorses the efforts of our Democratic representatives in Congress to secure a reduction of excessive taxation.

It would appear from the reading of this paragraph and the declaration of the distinguished Senator from Missouri that the interpretation placed on the Democratic platform of 1884 by President Cleveland, together with the schedules of the Mills bill, furnish the real authority for declaring the doctrine of free raw material a cardinal principle of Democracy.

DON'T WANT CLEVELAND'S INTERPRETATION.

Mr. President, I do not remember President Cleveland's interpretation; neither do I care to know, since the time has come, thank God, when his declaration of what Democratic principles are or should be do not pass current.

As for the distinguished author of the Mills bill being authority upon so important a matter, I assume there is at least room for honest differences. Not that I would reflect on his Democracy or eminent ability, but the resolutions of 1892, when compared with the schedules of his bill of 1888, disclose a want of continuity that is not always a distinguishing feature for safe guidance.

In 1892 the distinguished Senator is found advocating the doctrine of the Walker tariff, in which there is not a single trace of the principle of free raw material, while in 1888, less than six years later, he is declared the bulwark of that principle.

I find free raw material mentioned in the platform of 1892, as follows:

We indorse the efforts made by the Democrats of the present Congress to modify its most oppressive features in the direction of free raw materials and cheaper manufactured goods that enter into general consumption.

In the platform of 1896 the idea of free raw material was eliminated altogether.

Mr. President, have I not shown conclusively that the doctrine of free raw material has never been an established principle of Democracy? Have I not shown that a single allusion made to it in the platform of 1884, a covert attempt to indorse it in 1888, a qualified indorsement in 1892, and an absolute abandonment in 1896 is the real history of this dogma?

This doctrine, Mr. President, came and went with Grover Cleveland, and I believe that the people are willing for him to keep it, or sink it in Buzzards Bay, as he may elect.

GOVERNOR CULBERSON OF TEXAS AGAINST FREE RAW MATERIAL.

Mr. President, since I took a position against the so-called doctrine of free raw material, I have received hundreds of letters from the South commending my course. I will refrain from printing any of them, but instead read an extract from a letter written by the present governor of Texas, Hon. C. A. Culberson, for the purpose of disclosing the fact that a very wide difference of opinion exists on the question of free raw material between the governor of Texas and the distinguished Senator from Texas, Mr. MILLS. The letter is dated Austin, Tex., July 9, 1895, and is addressed to Hon. John Brookhout, Dallas. I will print the letter and comments by Mr. E. W. Cave as an appendix to my remarks, and content myself at present with reading a short extract:

The great question of tariff reform should be resolutely pressed. The taxes levied by this system should be limited to the actual needs of government economically administered, and within these limitations the interests of Texas and her inexhaustible raw material should be cared for. No good can result to the people of Texas by continuing high duties on manufactured articles and putting our raw material from which they are made on the free list, and thus invite destructive competition with foreign countries, which only benefits Eastern manufacturers. Until Texas engages more largely in manufactures than at present, such a policy can but be hurtful to us and in the interest of sections already enriched by protection. If in the present condition of the Treasury it should be deemed unwise or inexpedient to attempt a further general revision in the near future, inequalities should be adjusted by special laws.

The conclusions which I have reached in regard to the doctrine of free raw material are the result of careful investigation. I disclaim all thoughts of bringing discord into the Democratic party, and I sincerely hope this doctrine will follow Grover Cleveland into quiet obscurity and thus fade into "innocuous desuetude."

CONTEST OF SCHEDULES.

Mr. President, I realize quite fully the difficulties which surround this measure. I saw them at the beginning of its construction, and have seen them multiply and intensify every day since. Long before the bill left the Ways and Means Committee it had degenerated into a contest over schedules, and has remained in that position until the present time. This bill represents no fixed or particular economic theory, but, to the contrary, is a mixture of them all, with the keen New England manufacturers, the sugar-trust kings, and other kindred spirits manipulating the compound.

By attempting to liquidate political obligations in conjunction with a billion-dollar Congress, the Republican party has fallen upon hard lines, and in its extremity has given the country a tariff bill which, to say the least, is fearfully if not wonderfully made.

If the next one hundred years of national existence witnesses as rapid an increase in per capita expenses and political obligations as the past century, it is extremely problematical as to what sort of taxation will then obtain. Secretary John Sherman, then Congressman from Ohio, in a speech dated May 27, 1858, gave the per capita expenses of the Government at different dates.

For information I will quote them:

1789 to 1791	$0.42	1840	$1.41
1800	.90	1850	1.60
1810	.73	1857	1.93
1820	1.36	1858	2.98
1830	1.03		

We are now living under a billion-dollar Congress, which means an expenditure of $500,000,000 annually, or $7.19 per capita for our 70,000,000 of people.

In commercial transactions large aggregates of business are conducted on less expenditure per unit than smaller ventures. Yet it would seem, so far as national business is concerned, that retailing is much cheaper per unit than wholesaling. When our national expenses increase from 42 cents per capita to $7.19 per capita, I submit something is radically wrong and calls for immediate and careful attention.

MY REMEDY.

Mr. President, it will be a very difficult undertaking to bring prosperity under any system of taxation, more especially under present conditions. Something besides tribute bearing must intervene before the people will enjoy the blessings of plenty and good times. In my opinion, the first move in this direction should be to open the mint to the free coinage of silver. Follow this by a reduction of expenses to the lowest point consistent with good government.

Abolish the internal-revenue system and put in its stead a just and proper income tax, together with an inheritance tax similar to the one proposed by the distinguished Senator from Indiana [Mr. TURPIE].

Then I would secure the balance needed for Government expenses by a good, old-fashioned Democratic tariff for revenue, so adjusted as to place its burdens upon all the people of all the sections and give its incidental benefits to labor, where it ever belongs. This, in brief, is my remedy for present hard times, and I trust the near future will see it applied.

In 1837 we had one of the most destructive panics of the century.
In 1857 we had another disastrous panic.
In 1873 we had a panic that brought wreck and ruin to nearly all business interests.
In 1893 we had a panic of which no one need be reminded.
The panic of 1837 occurred under the Clay tariff, averaging about 26 per cent.
The panic of 1857 occurred under the Walker tariff, averaging 25 per cent.
The panic of 1873 came under the Morrill tariff, which averaged 48 per cent; and the panic of 1893 occurred under the McKinley tariff, which averaged 58 per cent.
Here we find that two disastrous panics came under the lowest tariffs since 1816, and also that two terrible panics came under the highest tariffs we ever had.
This proves that panics come under low tariffs and high tariffs.

But no man living or dead ever heard of or witnessed a panic when the people had plenty of money.

APPENDIX.

FREE RAW MATERIAL VS. A TARIFF FOR REVENUE—EQUITABLE DUTIES ON ALL IMPORTS—TEXAS AND HER INEXHAUSTIBLE RAW MATERIAL SHOULD BE CARED FOR.

[Open letter from E. W. Cave, Houston, Tex., to Governor C. A. Culberson.]

HOUSTON, TEX., *November 1, 1895.*

SIR: I take the privilege, as a citizen of Texas and a Democrat, to congratulate you, the Democratic party, and the country on the following statesmanlike views on the subject of "tariff reform," expressed in your letter to Hon. John Bookhout, Dallas, Tex., dated Austin, July 9, 1895:

"The great question of tariff reform should be resolutely pressed. The taxes levied by this system should be limited to the actual needs of government economically administered, and within these limitations the interests of Texas and her inexhaustible raw material should be cared for. No good can result to the people of Texas by continuing high duties on manufactured articles and putting our raw material from which they are made on the free list, and thus invite destructive competition with foreign countries, which only benefits Eastern manufacturers. Until Texas engages more largely in manufactures than at present such a policy can but be hurtful to us and in the interest of sections already enriched by protection. If in the present condition of the Treasury it should be deemed unwise or inexpedient to attempt a further general revision in the near future, inequalities should be adjusted by special laws."

Although entirely out of politics, I feel an interest in the success of my party and in the welfare of my country. I hope it may not be deemed presumptuous in me to supplement your views with some data and suggestions bearing on the subject.

In 1871, previous to coffee being placed on the free list, the total imports, exclusive of specie, were $520,223,000. The "free list" was $36,587,000. The customs revenue was $200,270,000. The average duty on dutiable imports was 43.95 per cent, and if levied on all imports, the average duty would have been 38.94 per cent.

In the fiscal year ending June 30, 1895, the total imports were $731,957,000. The "free list" was $363,228,000 and the dutiable list was $368,729,000. The customs revenue was but $152,749,000. The average rate of duty on dutiable imports was 41.42 per cent. If levied on entire imports, the average duty would have been but 20.86 per cent.

Leading items of the free list of 1871.

Chemicals, drugs, dyes, dyewoods	$5,881,000	Rags for paper	$3,749,000
Fur skins, undressed	1,028,000	Rubber, gutta-percha, etc.	2,507,000
Horse hair	1,379,000	Wood and timber	1,016,000
Raw silk, cocoons	5,739,000	Total free imports	36,587,000

Leading items of free raw material in 1895.

Art works	$3,655,000	Matting	$1,638,000
Chemicals, drugs, and dyes	30,325,000	Oils	3,179,000
Cocoa, crude	3,195,000	Rags	3,780,000
Coffee	95,085,000	Seeds	1,336,000
Cork	1,049,000	Raw silk, cocoons	22,625,000
Cotton, raw	4,714,000	Spices	2,367,000
Feathers, undyed	1,722,000	Sugar and molasses	29,599,000
Fertilizers	1,092,000	Tea	13,170,000
Fish	1,106,000	Grasses, etc	12,099,000
Fruits, nuts	5,467,000	Grasses, etc., manufactured	6,491,000
Furs, undressed	3,330,000	Wood	13,597,000
Grease	1,227,000	Wool	23,896,000
Hair, unmanufactured	1,165,000		
Chip, etc	2,755,000		
Hides, skins	25,962,000	Total free list	363,228,000
Rubber, etc	18,477,000		

Manufactured articles into which the free raw materials of this list enter are protected by duties ranging from 10 to 50 per cent. Many of the manufactures are protected by a specific duty.

For the fiscal year of 1890 the total imports were $789,310,000, of which $523,641,000 were dutiable and $265,668,000 free of duty. The receipts from customs were $229,668,000. The receipts for 1889 were $223,832,000.

Under the extreme policy of protection, as defined by the McKinley bill of 1890, the results were:

Year.	Imports dutiable.	Imports free.	Customs revenue.
1891*	$478,674,000	$306,241,000	$219,522,000
1892	369,402,000	457,999,000	177,452,000
1893	421,856,000	444,544,000	203,355,000
1894	275,199,000	379,796,000	132,296,000

*Sugar dutiable, 1891, $62,792,000.

The effort doubtless was to protect the manufacturer fully, both by high tariff duties and "free raw material." The result was an average increase of free imports for the four years of $146,477,000. The dutiable imports decreased, at the end of the four years, $248,442,000. The American manufacturers, with free raw material, had command of the market. The customs revenues decreased $97,850,000.

The total loss of revenues in the four years, as compared with 1890, was $186,539,000. The Government was left without the means of sustenance.

The tariff-reform policy of the Fifty-third Congress eventuated in a reduction of the ad valorem rates of duty imposed by the McKinley bill, substituting in some cases specific duties and the perpetuation and extension of the policy of "free raw material" except as to sugar, which was made dutiable at 40 per cent ad valorem. The effort was to further extend it to embrace free iron ore and coal. The result for the fiscal year ending June, 1895, is:

Increase in dutiable imports	$93,530,000
Decrease in free imports	6,567,000
Increase in total imports	76,963,000
Increase in customs revenues	20,930,000

The imports of sugar free in 1894 were $124,635,000. The total imports for 1895 were $76,460,000, of which $29,599,000 was free. The wise placing of sugar on the dutiable list gave the Government about $18,400,000 of revenue. The deficit in the Government's receipts and expenditures was $42,825,000 for the year.

It seems apparent that under the present system it is not practicable to produce such an amount of customs revenues as is necessary for the support of the Government. Exorbitant protective tariffs like the McKinley bill reduce imports, and thus reduce revenues.

Reasonable reduction in tariff rates will not increase imports in such ratio as to afford greatly increased revenues. Receipts from customs must continue to be, as they always have been, the chief source of revenues. Internal revenues, like those from customs, are likely to be depleted by more onerous taxation, and collection defeated by an effort to extend that system to the annoyance and cost of the people. The decrease in the last fiscal year is $3,543,000. The decrease in the three months of 1895 ending September is $20,300,930. The necessity for a return to the Democratic policy of a "tariff for revenue" seems equally apparent.

Upon what Democratic ground can "free raw material" for manufactures be maintained? Unless it can be claimed that Government should be operated and the people taxed for the benefit of manufactures, "free raw material" can only be defended on the same grounds as the doctrine of protection. The argument that our manufacturers should have free raw material in order to build up our manufactures, enable them to compete with foreign manufacturers, give employment to our labor, and ultimately cheapen the cost of goods to our people is all that Mr. McKinley or Mr. REED would urge in behalf of a high protective tariff.

"Free raw material" is the additional discriminating protection given the American manufacturer as against the foreign manufacturer and importer who pays a duty not only upon the cost of manufacturing but also upon the material of which the articles are composed.

It is a mooted question who pays the tax on imported goods—the consumer or the foreign manufacturer. There is no doubt as to who pays the tax on "free raw material" imported. The people pay it, to recoup the Government in the lost revenue donated to the manufacturer. Commerce must be maintained and defended. Navies, ministers, consuls, Government must be supported. Why should not all commerce contribute to this? Why should $30,000,000 of chemicals, drugs, and dyes imported be exempted from duty, and chemical glassware be taxed 40 per cent; medical preparations be taxed 25 per cent, and dyed cotton cloth, valued at 6¼ cents per yard or less, be taxed 1½ to 1¾ cents a square yard? It is true we have cheap quinine, but the imports of quinia and extracts of cinchona bark only amount to $342,000.

Why should $95,000,000 of coffee be imported free? It is a luxury and a comfort, but so also is the Government. Do the people realize any benefit from its loss of revenues? Coffee was dutiable at 3 cents a pound in 1873, when it was placed on the free list. The wholesale price in New York in 1869 and 1870 for Rio coffee was 11 and 13 cents per pound. From 1844 to 1848 New York quotations were 5 and 8 cents per pound. The price was forced up between 1873 and 1878 to as high as 28 cents, when it declined, reaching the lowest point, 7¼ cents in 1882. The price was 8½ and 10 cents in 1885. It has been advancing since, under the control of foreign rings, and is now quoted in New York at 16 cents per pound. The consumption in 1871 was 7.91 pounds per capita, in 1885 was 9.00 pounds per capita, in 1881 was 6.81 pounds per capita, in 1892 was 9.63 pounds per capita, and in 1893 declined to 8.25 pounds per capita. The total imports for 1895 were 652,000,000 pounds. The Government sacrificed $19,560,000 of customs revenue without any benefit to the people of this country.

Ninety seven million two hundred and forty-nine thousand pounds of tea were imported free last year, at an average invoice value of 13.55 cents per pound. Consumption per capita, 1871, was 1.14 pounds. Consumption per capita, 1890, was 1.32 pounds. Tea was dutiable in 1871 at 17.7 cents a pound. If a duty of 5 cents a pound had been collected on last year's imports of tea, the Government would have been able to decrease the deficit $4,890,000. Can it be supposed any tea consumer would be able to find where the duty came in when settling with his grocer at the retail price?

Why should the Government not have collected a duty on the 100,000 bales Egyptian and other cotton imported free last year, and especially when its importation at 9¾ cents average per pound is destructive to the culture of sea-island, good middling uplands, and other long staple cotton in the South? These cottons are fostered by foreign capital, and practically produced by semislave labor. The imports have grown from 6,650 bales in 1879, at invoice value of 16¾ cents, to the above figures. The Northern and Eastern manufacturer, who thus ignores the Southern planter, is protected in the class of goods for which they are used and in mixture with other good middling cottons by duties ranging from 30 to 50 per cent. Every product of Northern and Eastern agriculture, from a green apple to preserved watermelon rind, from a bush bean to a bushel of wheat, from a dozen of eggs to a dressed gobbler, is protected by a tariff duty. Why should our Southern staple be discriminated against, and especially when the Government needs the revenue? These imports are increasing. In the eight months of 1895 there were imported 73,000 bales, an increase over previous eight months of 21,200 bales. These cottons will now take the benefit of our short crop.

Take the item of hides and skins, of which $26,000,000 worth were imported last fiscal year free of duty. Hides and skins paid an average duty in 1871 of 10 per cent. What benefit is derived by the masses of the people from this discrimination against the cattle and sheep raisers of Texas for the benefit of the cattle and sheep raisers of Europe, South America, and Australia, and for the enrichment of a great leather trust capitalized at $128,000,000? While our cattle and slaughtered meats, as well as our salted meats, are excluded or prejudiced under the pretense of the public health, we are adding value to the cattle, sheep, and hogs of Europe by admitting their skins and hides duty free. The quotations for dry salted hides in the Houston market for April, 1893, 1894, and 1895 have been 5 and 5½ cents; October 30, 6 and 7 cents.

The price of leather has been dictated by the trust, and prices have been advanced largely until in the last few months discord has broken combinations and competitive influences have advanced prices of our hides. This may end in a week, and prices be governed by the same dictation. It seems folly for the Government to longer sacrifice its revenues under the illusive idea that shoes and harness can be thus cheapened. Even if the leather trust is circumvented, the leather manufacturer is protected by from 10 to 20 per

cent, and the manufacturer of boots and shoes by from 20 to 40 per cent. Meanwhile the free import increases, reaching 200,000,000 pounds in the eight months of the year ending August, an increase of 160 per cent.

Free wool! This extraordinary concession to the woolen manufacturing interests of the country must rest upon the same argument as that of "free raw material" generally. True, wool enters largely into the uses of the people, but at the same time it amounts to a discrimination against the producers of this country in favor of the wool producers of foreign countries. The question of direct benefit to the people of this country will probably be found, as in the case of other "free raw material," so finely drawn as not to be demonstrable. What the foreign wool grower or manufacturer does not take to himself will be difficult to find in a wool shirt or a blanket. Besides, wool is the competitor of cotton in American manufactures.

In proportion as it is cheapened or fills the market, cotton inevitably must be displaced. Every additional thread of wool substituted for cotton in a mixture lessens the demand for that much cotton. The man who sleeps under a blanket does not sleep under a quilt. Cheap wool means cheaper cotton. Our people might as well understand this now, as the vast product of the world's sheep is tending to our markets. In 1871 the imports of wool into the United States were 68,000,000 pounds. Of this 50,174,000 pounds entered into consumption. Of this the wool of class 3, valued at 12 cents per pound or less, and dutiable 3 cents per pound, was 19,858,000 pounds, at average invoice value of 10½ cents per pound. Upland cotton was then worth in New York, lowest price, 15 cents per pound, and it did not get below 11 cents until 1877.

The imports of wool in the last fiscal year were 206,134,906 pounds, at an average value of 12.4 cents per pound. The increased imports over 1894 were 151,000,000 pounds. Of this 105,500,000 pounds had an average invoice value of but 9 cents per pound. For the eight months of 1895 the imports are 179,521,000 pounds, an increase of 135,000,000 pounds, of which there is 65,000,000 pounds of class 3 wools free, with an average invoice value of 9.47 cents per pound, and 100,449,000 pounds of clothing wools free, with an average invoice value of 15.6 cents per pound. Our consumption per capita:

Year.	Wool.	Cotton.
	Pounds.	*Pounds.*
1871	5.43	10
1880	7.11	16.16
1893	7.03	17.28

It will be seen that while cotton consumption increased 60 per cent, 1870-1880, it has been practically held in check since. The interests of the woolgrowers and cotton planters of Texas are alike jeopardized by free wool and free cotton.

The world's capacity to supply wool is only practically measured by a profitable demand. The production in 1891, exclusive of the United States, was 2,149,673,000 pounds. The increase from 1870 to 1880 was 1,030,673,000 pounds. The increase from 1880 to 1891 was 650,673,000 pounds.

Our imports last year were 156,770,000 pounds greater than in 1870.

Over $13,500,000 timber, lumber, and shingles imported duty free last year, depriving the Government of the revenue and bringing the lumber of Canada farther down the country, into competition with the lumber of Texas and the Southern lumber districts. What a stretch of the liberality of the Government and evidence of the elasticity of the tariff system it is to sacrifice the revenues that ought to be collected on $18,477,000 of crude india-rubber, gutta-percha, etc., while rubber manufacturers are protected by a 30 per cent duty! Why should we risk the importation of the rags of the world free of duty for the benefit of paper manufacturers, who are protected by duties on paper from 10 to 35 per cent? Where does the benefit to the masses come from the import last year?

Twenty-two million six hundred and twenty-six thousand dollars of raw silk, cocoons silk, and silk waste. The manufacturer of silk goods with his protection of from 20 to 50 per cent can see where the benefit to him comes in, or probably to his especial employees; but what do the farmers of Texas, who have to pay 30 per cent duty on an imported trace chain, get out of this free raw silk? Thirty-one million two hundred and five thousand dollars of manufactured silk and silk goods were imported last fiscal year, notwithstanding the advantage given the American silk manufacturer by "free raw material." Silk and silk manufactures certainly are within the most extreme line of taxation, and those who wear them can certainly afford to contribute to the support of the Government, no matter in what shape imported.

The great railway transportation interests of the country are deprived of the benefits of foreign competition in the American market for steel and iron rails. Perhaps if a revenue had been assured by a reasonable tariff on raw silk, Congress would have felt encouraged and justified in levying a less duty than $7.84 per ton on these rails, and we may have had some imports, as the present duty on rails is prohibitory. The whole imports last year amounted to but 784 tons; in 1894 to 2,178 tons. Considering the fact that there are about 228,000 miles of railways in the United States, besides street railways, with an enormous demand for new rails for renewals and extensions, the showing seems remarkable. The London price of steel rails for the year has been £3 12s. 6d.

Has it been demonstrated during the paternal efforts of the Government to legislate prices for the benefit of the people by discriminating "tariffs" and "free lists" that the desired result can be thus secured? Good and bad seasons, increased foreign and domestic production, trade depression, war apprehension, panics, money value, combinations, and trusts are factors that often negative these efforts. This country has grown too large for dependence on the paternal care of Government as a regulator of prices of commodities. The time has come when the Government may safely engage principally in the business of providing for its own maintenance. That it may be relieved of apprehensions on this score, is pretty clearly indicated by the results of making sugar dutiable. Although sugar pays a duty of 40 per cent under Senate bill of 1894, the following is the result:

Sugar quotations, Houston (Tex.) market.

Date.	Granulated.	Cubas.	Powdered.	Fancy yellow.
March, 1893	5	5½	.....	4½
October, 1893	5½	6½	6½	5½
March, 1894	4½ to 4½	5½	5½ to 5½	4½
October, 1894	5½ to 5½	5½ to 5½	5½ to 5½	4½ to 4½
March, 1895	4½ to 4½	5 to 5½	5 to 5½	3½ to 3½
October, 1895	5½	5½	5½	4½ to 4½

Iron cotton ties were graciously placed on the free list in 1894. There were none imported in 1894; last fiscal year the imports showed an extraordinary increase amounting to $120. Bagging, gunny cloth, and similar material for covering cotton was also placed on the free list. Not a yard was imported in 1894: the imports of the last fiscal year were only $30,490. Binding twine, of which there had been no imports in 1894, was placed on the free list; the imports last fiscal year only reached $16,422. Burlaps, however, tailed on to cotton ties, cotton bagging, and binding twine, and $4,506,000 dutiable imports of 1894, were converted last fiscal year into $4,902,000 free imports, for the benefit of the great mill interests of the country, who buy bags; flax and hemp were already free, in competition with our farmers' production, and in competition with the use of cotton for bags and sacks. Now we have the manufactured bags free, uniting cheap manufacturing labor with European and Asiatic cheap agricultural labor against the producers of American hemp, flax, and cotton.

Rice has been on the dutiable list since 1867. The duty on clean rice ranged from $2.37 to $2.59 per hundred pounds until 1879; New York quotations, 5½ to 8¼ cents, lowest, to 7 to 12⅝ cents, highest, per pound, affected part of the time by gold fluctuations. The duty in 1879 was 2.02 cents per pound; price, 5½ to 7¼ cents per pound. The duty in 1883 was 2½ cents per pound; price, 4 to 7¼ cents per pound. The price fell in 1885 and 1886 to 5.38 cents per pound. The duty in 1890 was 2 cents per pound. The Bureau of Statistics quotes New York prices on "good" rice, 1893, July to December, 2½ to 4½ cents; 1894, January to December, 4½ to 5 cents.

The duty on rice was reduced, under the Senate bill of 1894, to 1¼ cents per pound. The Bureau of Statistics quotes New York price, August, 1894, to August, 1895, at 4½ to 5 cents per pound. The price in August and September, 1894, was 5 cents per pound. The price in June, 1895, was 4¾ to 4¾, and in July, 4½ to 5 cents.

In view, therefore, of the advanced condition of our manufactures, the uncertainty as to whether the people are benefited in low prices on articles imported free consumed by them direct, the depressed condition of our agricultural, pastoral, and timber interests, affected by foreign competition, the inequitable discrimination in favor of certain manufacturers and consumers, and the necessity of the Government to have sufficient revenues for its support, has not the time come for a new departure?

Let us have "tariff reform" on the basis of a "tariff for revenue," with its rates of duty equitably distributed on true economic principles, and on the line of a conservative public policy. It is perhaps too early to even contemplate any large retrenchment of expenditures. The people have got used to an expensive and extravagant Government, and, strange to say, seem to like it. Billion-dollar Congresses are probably not altogether a thing of the past. In the fourteen years previous to 1894 the customs contributed an average annually of about $206,000,000 to the Government receipts. The culmination of the restrictive duties and expanded free list of the McKinley bill brought the customs revenues down in 1894 to $132,294,000.

To sustain our present system the customs must furnish about $300,000,000 annually. It is now impossible to secure this upon a dutiable list of $400,000,000. It can be secured by fair duties on all imports, and our manufacturers and agricultural interests receive all the protection that a just consideration for the interests of all the people permits them to have. Our largest year of imports of merchandise has amounted to $866,800,000; under our present policy they had declined to $655,000,000. Indications point to $800,000,000 for this fiscal year. The customs revenue in the eight months ending August show an increase of $29,728,000. The condition will not admit of further experiment on the line of internal taxes to recoup the losses on customs revenue.

In the discussion in the House of Representatives of the United States, which resulted in the founding of a tariff system, Mr. Madison said, August 9, 1879:

"I presume that, however much we may be disposed to promote domestic manufactures, we ought to pay some regard to the present policy of obtaining revenue. * * *

"In my opinion, it would be proper also for gentlemen to consider the means of encouraging the great staple of America. I mean agriculture, which I think may be justly styled the staple of the United States, from spontaneous productions which nature furnishes, and the manifest advantage it has over every other object of embodiment in this country. * * * But it will be necessary to confine our attention at this time peculiarly to the object of revenue."

After the war with England had demonstrated the necessity for additional encouragement of our manufactures, Mr. Calhoun, in his speech, April 4, 1816, enunciated these broad principles:

"Neither agriculture, manufactures, nor commerce, taken separately, is the cause of wealth; it flows from the three combined, and can not exist without each. The wealth of any single nation, it is true, may not immediately depend upon the three, but such wealth always presupposes their existence. * * *

"It is admitted by the most strenuous advocates on the other side that no country ought to be dependent on another for its means of defense; that at least our musket and bayonet, our cannon and ball, ought to be domestic manufacture. But what, he asked, is more necessary to the defense of a nation than its currency and finance?"

After a hundred and six years of tariff experience, and the culmination of the grandest expectations of the statesmen who gave a fostering care to our manufacturing interests, have we not again reached a point when, in the language of Mr. Madison, "it will be necessary to confine our attention peculiarly to the object of revenue," and when we must recognize, in the graphic language of Mr. Calhoun, that "neither agriculture, manufactures, nor commerce, taken separately, is the cause of wealth," and also that discrimination against either is not conducive to national prosperity?

Very respectfully,

E. W. CAVE.

Governor CHARLES A. CULBERSON,
Austin, Tex.

The PRESIDING OFFICER. The yeas and nays have been ordered on the amendment submitted by the Senator from Arkansas [Mr. JONES], and the Secretary will call the roll.

Mr. BACON. I ask that the amendment may be first stated.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. At the end of line 17 of paragraph 301, on page 90, it is proposed to insert:

Provided, however, That in no case shall the duty levied exceed 8 cents per pound on yarns valued at not exceeding 25 cents per pound, nor exceed 15 cents per pound on yarns valued at over 25 cents per pound and not exceeding 40 cents per pound: *And provided further*, That on all yarns valued at more than 40 cents per pound there shall be levied, collected, and paid a duty of 45 per cent ad valorem.

Mr. BACON. I should like to inquire of the Senator from Arkansas if that is the provision of the present law?

Mr. JONES of Arkansas. It is the closing portion of the paragraph in relation to cotton thread and carded yarn, etc., of the

present law. The proposed schedule is identical with the present law down to the end of the pending paragraph, leaving out the part of the present law which I have moved to insert. This is a limitation which cuts off the higher numbers and preserves the existing rates, as I have stated.

Mr. BACON. Then, if this amendment should be adopted, the paragraph would be the same as that in the present law?

Mr. JONES of Arkansas. Exactly.

The PRESIDING OFFICER. The question is on the amendment submitted by the Senator from Arkansas [Mr. JONES], on which the yeas and nays have been ordered.

The Secretary proceeded to call the roll.

Mr. CLAY (when his name was called). I transfer my pair with the junior Senator from Massachusetts [Mr. LODGE] to the Senator from New Jersey [Mr. SMITH], and vote "yea."

Mr. GEAR (when his name was called). My pair with the Senator from New Jersey [Mr. SMITH] has been transferred to the junior Senator from Massachusetts [Mr. LODGE]. I am therefore at liberty to vote, and vote "nay."

Mr. GRAY (when his name was called). I am paired for the present with the junior Senator from Illinois [Mr. MASON]. If he were present, I should vote "yea."

Mr. MALLORY (when his name was called). I am paired with the Senator from Vermont [Mr. PROCTOR]. If he were present, I should vote "yea."

Mr. MITCHELL (when his name was called). I am paired with the Senator from New Jersey [Mr. SEWELL].

Mr. MORRILL (when his name was called). I transfer my pair with the senior Senator from Tennessee [Mr. HARRIS] to the Senator from Wyoming [Mr. WARREN], and vote "nay."

Mr. TURNER (when his name was called). I am paired with the Senator from Wyoming [Mr. WARREN]. If he were present, I should vote "yea."

The PRESIDING OFFICER. The Chair will suggest to the Senator from Washington that the senior Senator from Vermont [Mr. MORRILL] has transferred his pair to the Senator from Wyoming [Mr. WARREN], which will leave the Senator at liberty to vote.

Mr. TURNER. Then I vote "yea."

The roll call having been concluded, the result was announced—yeas 20, nays 30; as follows:

YEAS—20.

Bacon,	Clay,	Morgan,	Tillman,
Bate,	Jones, Ark.	Pasco,	Turner,
Berry,	McLaurin,	Pettus,	Vest.
Butler,	Martin,	Rawlins,	Walthall,
Chilton,	Mills,	Roach,	White.

NAYS—30.

Allison,	Frye,	Mantle,	Stewart,
Burrows,	Gallinger,	Morrill,	Teller,
Carter,	Gear,	Perkins,	Thurston,
Chandler,	Hanna,	Platt, Conn.	Wellington,
Deboe,	Hawley,	Pritchard,	Wetmore,
Elkins,	Hoar,	Quay,	Wilson.
Fairbanks,	McBride,	Shoup,	
Foraker,	McEnery,	Spooner,	

NOT VOTING—30.

Aldrich,	Faulkner,	Kenney,	Penrose,
Allen,	George,	Kyle,	Pettigrew,
Baker,	Gorman,	Lindsay,	Platt, N. Y.
Caffery,	Gray,	Lodge,	Proctor,
Cannon,	Hale,	McMillan,	Sewell,
Clark,	Hansbrough,	Mallory,	Smith,
Cockrell,	Harris, Kans.	Mason,	Turpie,
Cullom,	Harris, Tenn.	Mitchell,	Warren,
Daniel,	Heitfeld,	Murphy,	Wolcott.
Davis,	Jones, Nev.	Nelson,	

So the amendment was rejected.

Mr. ALLISON subsequently said: I inadvertently voted on the last amendment, being paired with the Senator from Missouri [Mr. COCKRELL]. I ask unanimous consent that my vote may be withdrawn.

The PRESIDING OFFICER. The request will be complied with.

Mr. ALLISON. Inadvertently the amendment of the committee in line 13 of paragraph 301 was agreed to. That amendment should be disagreed to, and I ask unanimous consent to recur to it for that purpose.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. In paragraph 301, page 90, line 13, after the words "twenty and," the Committee on Finance reported to insert "in addition thereto."

The PRESIDING OFFICER. Without objection, the vote whereby the amendment was agreed to will be considered as reconsidered, and the amendment disagreed to.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 302, page 90, line 18, before the word "thread," to strike out "Cotton" and insert "Spool;" in the same line, after the word "thread," to insert "of cotton, including crochet, darning, and embroidery cottons;" in line 22, after the word "yards," to strike out "of thread;" in line 23, after the words "one hundred," to strike out "yards;" in line 24, after the word "than," to strike out "wound;" in line 25, before the word "cent," to strike out "a" and insert "one;" in line 1, on page 91, after the word "yards," to strike out "of thread;" and in the same line, after the word "thereof," at the end of the paragraph, to insert:

Provided, That in no case shall the duty be assessed upon a less number of yards than is marked on the spools or reels.

So as to make the paragraph read:

302. Spool thread of cotton, including crochet, darning, and embroidery cottons on spools or reels, containing on each spool or reel not exceeding 100 yards of thread, 6 cents per dozen; exceeding 100 yards on each spool or reel, for every additional hundred yards or fractional part thereof in excess of 100, 6 cents per dozen spools or reels; if otherwise than on spools or reels, one-half of 1 cent for each 100 yards or fractional part thereof: *Provided*, That in no case shall the duty be assessed upon a less number of yards than is marked on the spools or reels.

The amendment was agreed to.

Mr. VEST. I have no objection to the proviso which has just been adopted, but I move, in line 21, before the word "cents," to strike out the word "six" and insert "five and one-half;" and I make the same motion in line 23, before the word "cents," to strike out "six" and insert "five and one-half."

We have heard a great deal about the poor sewing girl in the tariff debates, and here is an increase over the existing law, and a very considerable one when the amount of this article consumed in the United States is considered. I ask that the motion may be put upon both amendments at once.

The PRESIDING OFFICER. The amendments proposed by the Senator from Missouri [Mr. VEST] will be stated.

The SECRETARY. In paragraph 302, page 90, line 21, before the word "cents," it is proposed to strike out "six" and insert "five and one-half;" and in line 23, before the word "cents," to strike out "six" and insert "five and one-half;" so as to read:

302. Spool thread of cotton, including crochet, darning, and embroidery cottons on spools or reels, containing on each spool or reel not exceeding 100 yards of thread, 5½ cents per dozen; exceeding 100 yards on each spool or reel, for every additional hundred yards or fractional part thereof in excess of 100, 5½ cents per dozen spools or reels.

The amendment was rejected.

The reading of the bill was resumed at paragraph 303, as follows:

303. Cotton cloth not bleached, dyed, colored, stained, painted, or printed, and not exceeding 50 threads to the square inch, counting the warp and filling, 1 cent per square yard; if bleached, 1¼ cents per square yard; if dyed, colored, stained, painted, or printed, 2 cents per square yard.

Mr. VEST. Before we leave that paragraph, I want to read the official statement to show how far advanced the cotton manufactures of the United States are as to the articles named in this paragraph. We exported, in 1896, $3,419,158 worth of colored cotton cloths, and in the same year we exported $9,579,199 worth of uncolored cotton cloths, and of all other cotton cloths we exported $3,170,940, making in the aggregate over $15,000,000 worth of these cotton cloths exported from the United States and competing successfully with the manufactures of other countries.

Mr. JONES of Arkansas. In the line of what my colleague on the committee [Mr. VEST] has just suggested, I think this is perhaps as appropriate place as any to present some tables showing the relative cost of production of cotton cloths at Burnley and Lancashire, in England, and in Lowell, Mass., taking cloths at 64 by 64 warp and weft and 28 inches wide.

The yarn in the American cloth is made of No. 28 warp and 36 weft, averaging 32. The English yarn is four numbers finer, but in reality it is from eight to ten numbers finer.

This statement shows the English yarn is 37½ inches, and it is taken from the accounts of one of the best and latest mills erected at Rochdale, Lancashire, working under the most advantageous conditions of machinery and management. It is a cooperative mill, where the directing and superintending are run on the most economical principles.

This statement, as I have said, is taken from the official statement of the mill. The cost of carding 1 pound of yarn is eight hundred and fifty-five one-thousandths of a cent; spinning and incidental thereto, 1.137. The rates I have thus far given are the Massachusetts rates. The Lancashire direct wages are 1.684, and other wages and salaries twenty-four one-thousandths, making the total paid in wages in Massachusetts 1.992 cents, and in Lancashire 1.708 cents, in the matter of spinning of yarns necessary to make a pound of cloth.

The American cloth weighs 7 yards to the pound; the English cloth, by the use of 10 numbers finer yarn, weighs about 9 yards to the pound. The cost is therefore computed on an equal basis of 7 yards in the account given by Mr. Schoenhof for comparison. The weaving rate is, per cut of 50 yards, in Lowell, at the rate of

20 cents, and in Lancashire at the rate of 12½d., or 25½ cents for the same length; 20 cents in Massachusetts and 25½ cents in England. The actual cost, computed from the mill books at Burnley and from the Lowell account, foots up as follows:

This is a quotation from a part of the report of Mr. Schoenhof. The labor cost on the basis of 7 yards is as follows:

	Burnley.	Lowell.
Weavers' wages	3.57	2.8
Dressing the warp	.479	.469
Beaming, twisting, and winding	.753	.428
Lowell extra board	.....	.039
	*4.802	†3.736

*0.686 cent per yard. †0.534 cent per yard.

The cost of weaving per yard is one hundred and fifty-two one-thousandths of a cent less in Lowell than in England. The difference in the final outcome is to the advantage of England by the saving of two-ninths of a pound of yarn, the selling price of which in the mill's accounts given by Mr. Schoenhof was 8d., or 16 cents per pound. Two-ninths of that is 3.55 cents, and per yard is equal to five-tenths of a cent, far outbalancing the difference in labor expense, and explains the impossibility of the heavier American cloths competing with the lighter and finer cloth of England in the markets of the world, where the finer cloth at the lower price finds preference.

The difference in weavers' wages per yard in cotton weaving has incontestably been established, and is due to the larger number of looms run per hand by American mills.

The higher paid American labor, the more intelligent American labor, the men of the higher type and higher class, more independent, do more work for the amount of money paid. Although they insist upon receiving and do receive more money by the day for the work they do, they do more work for the money they get than do their confrères on the other side of the water. They turn out more work for the cent, more work for the dollar, than do the wage earners in either England or Germany.

While we boast of the high wages paid to labor in this country, when there is a careful analysis of facts made, it will be found that the labor cost of an article manufactured in this country as a rule is cheaper than that in the country where lower wages are paid. It shows the wisdom of the high rate of wages in this country. It shows the wisdom of American institutions. It shows the wisdom of developing the manhood and independence and individuality of our citizens. It shows that the higher the type of man the lower the cost of the goods which he produces for the balance of mankind. It is a strong argument, not only in favor of the ability of our mills to maintain themselves against mills abroad, but one strongly in favor of the civilization and intelligence of the people of this country.

In 1894 the Senate Finance Committee obtained from Fall River, through Robert Howard, secretary to the Fall River Mule Spinners' Association, a statement of the rates of wages paid then for print cloth. To a question put to him in writing, he states: "In reply * * * I will inform you that the price for weaving 64 by 64 regular print cloth (28 inches wide) in Fall River is 16 cents per cut of 45 yards." This is equal to 36 cents per 100 yards.

A similar inquiry sent to English manufacturers through the instrumentality of a member of Parliament, and an extensive manufacturer himself—John Albert Bright—gives the following answer:

Below we give a few examples. We rise or fall one-half penny per pick and one-half penny for each 4 inches in width per piece of 24 yards. For instance:
28-inch, 16 by 16 (American, 64 by 64), 5½d., 44 cents per 100 yards.
32-inch, 16 by 16 (American, 64 by 64), 5½d., 48 cents per 100 yards.
28 inch, 18 by 18 (American, 72 by 72), 6½d., 56 cents per 100 yards.
32-inch, 18 by 18 (American, 72 by 72), 7½d., 60 cents per 100 yards.
36-inch, 18 by 18 (American, 72 by 72), 7½d., 64 cents per 100 yards.

But the striking point in this is that Mr. Howard, the secretary of the Mule Spinners' Association of Fall River, states that the amount paid in Fall River for spinning a cut of 45 yards is 16 cents, while it would seem from this statement coming from England that it is more than twice as much on the other side in this one item of spinning.

According to this statement, prices have been reduced on both sides of the Atlantic, but the difference in favor of the United States is still proportionately about the same as given in the Consular Reports for 1887 by Mr. Schoenhof, to wit, 8 cents lower in the 100 yards, and in percentage nearly 20 per cent lower in America than in England.

For comparison I will attach a statement taken from Hon. Carroll D. Wright's Report on Textiles, giving the cost of labor in manufacturing print cloth, along with the cost statement as stated by Mr. Schoenhof in his book.

Cost of labor.

	Hon. Carroll D. Wright's figures on print-cloth making, page 63 (average 7 yards to the pound).							Consul Schoenhof's report for Lowell mill.

*Contained in "all other."

I think it will interest Senators to see the cost of printing this cloth, as shown by Carroll D. Wright in his official report, and then comparing it with the statement made by Mr. Schoenhof some years ago, which was denounced as being so absurdly low as to be untrue. Mr. Wright, in making his report on several mills, gives the total cost of the general labor cost.

Mr. Schoenhof had stated the cost at one of the best mills in Fall River at 5.7 cents. Mr. Wright gives it at 6.7 in one mill, 6.7 in another, 6.4 in another, 7.1 in another, 6.8 in another, 6.2 at another, 6.1 at another, showing a variation of 1 cent and a half from the statement made by Mr. Schoenhof at that time which was denounced as being so absurdly low that it could not possibly be true. But Mr. Wright, who certainly has no sympathy with the ideas that some of us have on these economic questions, in his official report fully sustains all these statements.

I thought it proper to state these facts in connection with the cotton schedule. I believe it is unreasonably high, and I want the facts to be presented to the Senate.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 307, page 96, line 8, before the word "cents," to insert "and one-half;" in the same line, after the word "yard," to strike out the comma and insert a semicolon; in line 9, before the word "cents," to strike out "fourteen" and insert "fifteen;" in the same line, after the word "yard," to strike out the comma and insert a semicolon; and in line 11, before the word "cents," to strike out "sixteen" and insert "seventeen and one-half;" so as to make the proviso read:

Provided, That on all such cotton cloths not bleached, dyed, colored, stained, painted, or printed, valued at over 12½ cents per square yard; bleached, valued at over 15 cents per square yard; and dyed, colored, stained, painted, or printed, valued at over 17½ cents per square yard, there shall be levied, etc.

Mr. JONES of Arkansas. I should like to ask the Senator from Iowa a question. My impression is that while the other preceding four or five paragraphs have taken the rates of the Wilson Act exactly, and the rates as they stand at present, this paragraph proposes materially to increase the rates all along. I should like to ask the Senator if the proposed amendments add additional increases above those already put in the Dingley bill on the present rate?

Mr. ALLISON. I do not understand that they do.

Mr. JONES of Arkansas. For instance, on page 96, where the bill as it came from the House provided for a tax of 12 cents, the Senate committee propose an addition of one-half cent. Twelve cents, I understand, is higher than it is in the Wilson Act, or it is the same rate, I am not sure which. Then where "fourteen" appears in line 9 the Senate committee propose to strike out "fourteen" and insert "fifteen."

Mr. ALLISON. There may be a small increase in that respect.

Mr. JONES of Arkansas. The Senate committee propose a small increase, from 16 to 17½ cents in that line, making it 17½, where the Dingley bill proposed 16 cents.

Mr. ALLISON. It says "valued at over 17½ cents per square

yard." I think that is a reduction. Unless 40 per cent is higher than the specific rate of duty, it is a reduction.

Mr. JONES of Arkansas. That is true. I had not noticed the context, but I noticed the amendment to strike out "sixteen" and insert "seventeen."

I should like to ask the Senator from Iowa an additional question. Does paragraph 308 embrace goods which were dutiable under the Wilson Act, which embraces the class of goods which are now included in paragraph 307? In other words, are there two divisions of goods taxed under paragraph 256 of the Wilson Act? Paragraph 256 of the Wilson Act begins:

Cotton cloth, not bleached, dyed, colored, stained, painted or printed, exceeding 200 threads to the square inch, counting the warp and filling, etc.

Mr. ALLISON. Paragraph 308 is a new paragraph, not contained in the Wilson Act, and is intended to reach fine cottons. It is to be hoped that we can make these in our own country from Egyptian or other fine cotton.

Mr. JONES of Arkansas. It embraces goods which are now included under paragraph 256 of the Wilson Act?

Mr. ALLISON. It does.

Mr. JONES of Arkansas. That is what I understood.

Mr. GRAY. The Senate has put a tax on Egyptian cotton.

Mr. JONES of Arkansas. While I shall make no motion now as to paragraph 307, when paragraph 308 shall have been read through I shall move to strike out paragraphs 307 and 308 and substitute paragraph 256 of the Wilson Act.

Mr. ALLISON. That is all right.

Mr. VEST. The changes made amount to this: In the Wilson Act this was the last section, and it read, "exceeding 200 threads to the square inch." Now it is proposed to enlarge the limit from 200 to 300 threads to the square inch and increase the duty one-half cent a yard. That is exactly what it does. Then they make a new section—paragraph 308—which takes in from 300 threads to the inch up, and still adds to the duty.

Mr. ALLISON. That is right.

Mr. VEST. That is the effect of it.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 308, page 97, line 4, after the word "pound," to strike out "eight" and insert "six and one-half;" in line 5, after the word "yard," to insert "exceeding 3 square yards to the pound, 8 cents per square yard;" and in line 12, after the words "ad valorem," to strike out "*Provided further*, That on cloth composed of cotton or other vegetable fiber, containing an admixture of silk, and not otherwise provided for in this act, there shall be levied, collected, and paid a duty of 8 cents per square yard and 30 per cent ad valorem;" so as to make the paragraph read:

308. Cotton cloth not bleached, dyed, colored, stained, painted, or printed, exceeding 300 threads to the square inch, counting the warp and filling, and not exceeding 2 square yards to the pound, 4 cents per square yard; exceeding 2 and not exceeding 3 square yards to the pound, 4½ cents per square yard; exceeding 3 and not exceeding 4 square yards to the pound, 5 cents per square yard; exceeding 4 square yards to the pound, 5½ cents per square yard; if bleached and not exceeding 2 square yards to the pound, 5 cents per square yard; exceeding 2 and not exceeding 3 square yards to the pound, 5½ cents per square yard; exceeding 3 and not exceeding 4 square yards to the pound, 6 cents per square yard; exceeding 4 square yards to the pound, 6½ cents per square yard; if dyed, colored, stained, painted, or printed, and not exceeding 3 square yards to the pound, 6½ cents per square yard; exceeding 3 square yards to the pound, 8 cents per square yard: *Provided*, That all such cotton cloths not bleached, dyed, colored, stained, painted, or printed, valued at over 14 cents per square yard; bleached, valued at over 16 cents per square yard; and dyed, colored, stained, painted, or printed, valued at over 20 cents per square yard, there shall be levied, collected, and paid a duty of 40 per cent ad valorem.

The amendment was agreed to.

The PRESIDING OFFICER. The Chair calls the attention of the Senator from Iowa to line 7, and suggests that the word "on" should be inserted after the word "that."

Mr. ALLISON. That is right.

The PRESIDING OFFICER. The amendment will be made.

Mr. JONES of Arkansas. I move to strike out paragraphs 307 and 308 and substitute what I send to the desk to be read, being paragraph 256 of the present law, which contains a lower rate all along than the one proposed. I regret that the committee did not see fit to follow the Wilson Act in its rate on all these cotton goods.

The PRESIDING OFFICER. The substitute proposed by the Senator from Arkansas will be stated.

The SECRETARY. It is proposed to strike out paragraphs 307 and 308 and insert in lieu thereof the following:

Cotton cloth not bleached, dyed, colored, stained, painted, or printed, exceeding 200 threads to the square inch, counting the warp and filling (1), and not exceeding 2½ square yards to the pound, 3 cents per square yard; exceeding 2½ and not exceeding 3½ square yards to the pound, 3½ cents per square yard; exceeding 3½ and not exceeding 5 square yards to the pound, 4 cents per square yard; exceeding 5 square yards to the pound, 4½ cents per square yard; if bleached (2), and not exceeding 2½ square yards to the pound, 4 cents per square yard; exceeding 2½ and not exceeding 3½ square yards to the pound, 4½ cents per square yard; exceeding 3½ and not exceeding 5 square yards to the pound, 5 cents per square yard; exceeding 5 square yards to the pound, 5½ cents per square yard; if dyed, colored, painted, or printed (3), and not exceeding 3½ square yards to the pound, 5½ cents per square yard; exceeding 3½ square yards to the pound, 6½ cents per square yard: *Provided*, That on all such cotton cloths not bleached, dyed, colored, stained, painted, or printed (4), valued at over 12 cents per square yard; bleached (5), valued at over 14 cents per square yard; and dyed, colored, stained, painted, or printed (6), valued at over 16 cents per square yard, there shall be levied, collected, and paid a duty of 35 per cent ad valorem.

The PRESIDING OFFICER. The question is on agreeing to the substitute proposed by the Senator from Arkansas.

Mr. JONES of Arkansas. On that I ask for the yeas and nays.

Mr. BUTLER. Mr. President, the section now under consideration places import duties on the various kinds of cotton cloth, ranging from 3½ cents to 7 cents per yard. The Senator from Arkansas [Mr. JONES] moves to strike out this section and insert in lieu of it the corresponding section in the present law—the Wilson bill.

Comparing the section of the Wilson Act with the pending section of the present bill, I find that there is a difference of only one-half cent per yard on each different classification. For instance, where the present bill proposes an import duty of 3½ cents the Wilson Act has 3 cents. Where the present bill proposes 7 cents a yard the Wilson Act has 6½ cents per yard. I am expected to vote for one of these two schedules, one 7 cents a yard and the other 6½ cents a yard, and one is called a revenue duty and the other a protective duty. I must confess that I am unable to see any difference in principle between them. If to give the manufacturer the benefit of an import duty of 7 cents a yard is protection and robbery, then I submit that to give the manufacturer an import duty of 6½ cents on each yard of cotton cloth is also protection and robbery.

I say that in principle the duty in the Wilson Act of 6½ cents a yard on cotton cloth is just as much of a discrimination and an injustice to the farmer who raises cotton and must sell it in a free-trade market, and who is forced to buy his cotton back in the shape of this cloth, as is 7 cents duty. There is no difference in principle. One taxes him 6½ cents for the benefit of the manufacturer, and the other taxes him 7 cents a yard for the benefit of the manufacturer. Both old parties protect the manufacturer; neither protects the farmer. Both force the farmer to compete with the cheapest pauper labor in the world. Both force the farmer to sell his cotton in a free-trade market. Both force him to pay tribute to the manufacturer. The expense of shipping cotton to Liverpool, the expense of manufacturing it, what is paid to labor, the expense of shipping it back, with all the insurance charges added, and the profit must be paid by the farmer when he buys his cotton back in the shape of cloth.

The difference in transportation to Liverpool and back is considerable protection for the home manufacturer, and the farmer would be forced to pay all those charges before he could buy his cotton back in the form of cloth from his home manufacturer. So if there were no duty on cotton cloth the farmer would still have to pay a protective duty or bounty to the home manufacturer equal, at least, to the cost of transportation to Liverpool and return.

Mr. President, our Democratic friends can not consistently ask us to vote for 6½ cents per yard protection on cotton cloth, and then vote against giving any protection to the cotton farmer. If our Democratic friends want us to give a protection of 6½ cents to the cotton manufacturer, then they ought at the same time to vote with us to give protection to the farmer who raises the cotton. The Wilson Act in this respect is a discrimination against the farmer. The Republican bill is simply a greater discrimination—a half a cent a yard more—that is all. The difference is a bagatelle compared to the discrimination which both parties make in favor of the manufacturer and against the farmer.

I agree with my friend the Senator from South Carolina [Mr. MCLAURIN] in denouncing the free-trade heresy with which his party was afflicted for a short and sad period, while the manufacturer is protected amply; but if he will pardon me, I wish to differ with him about this bill being purposely a sectional measure. It is true in effect it is sectional, but it was framed for another purpose. I do not think it was framed with a sectional feeling or purpose, though framed by the Republican party. It is more of a class bill than a sectional bill. It is framed to benefit one class at the expense of all other classes. It discriminates in favor of the sugar trust and against the New England user of sugar as well as against the Southern user of sugar. It discriminates against the man in New England who buys this cotton cloth as much as the man in the South or West. It is a discrimination against the producer of agricultural products and all consumers of manufactured products. When any tariff bill discriminates against the farmer and the producer of wealth it discriminates against the labor employed in the factories.

This bill will not protect labor, whether in the South or the North. It will not protect even the labor employed in the factories. The bill is a tax on the laborer and the farmer for the benefit of the few, whether they are located in New England, in the South, or

in the West. If the Carnegie steel concern were in South Carolina or North Carolina, the protection they get in this bill would be just the same, provided their location did not lessen their influence with this body. If the sugar refineries were in South Carolina or North Carolina, the protection to them and the discrimination against others would be just as great, if their location did not lessen their influence with this body.

The great trouble with this measure is that it is a class bill. Unfortunately, the South is discriminated against more heavily than another section, but that is incidental. The object is not sectional, but to put money into the pockets of the trusts and a small class at the expense of all other citizens. There is no regard in this bill for the farmer or laborer in New England any more than in the South, and I am sorry to admit that our Democratic friends in their bill proceeded on the same principle. The difference between the Wilson bill and this bill is in schedules, not in principle. I was grateful to our Democratic friends when they lessened the amount of the discrimination, but they do not live up to their doctrine when they protect the manufacturer and refuse to protect the farmer. Our Republican friends, on the other hand, pretend to protect all American labor and American industries, but they leave out those who create the raw materials, those who work in the factories, and those who create the great export products of the country. The other day both of the old parties lined up against the farmer when the export bounty was before the Senate.

The Senator from Texas [Mr. MILLS], in a very able speech a few days since, made a powerful and eloquent plea for the "forgotten man." He said that everybody was ready to help the farmer with chin music. Indeed, it seems to be so. But I want to ask him and his side, when they appeal to us to vote for a 6½ cent duty per yard on cotton cloth to protect the manufacturer and then vote to leave the farmer to struggle under free trade, to compete with the pauper labor of the world, if they are not robbing him by the same method that our Republican friends do? The other day, when the amendment to pay the farmer an export bounty on wheat and cotton so as to put him on equal footing with the manufacturer was before the Senate, every Democratic Senator but three voted against it. To-day you are ready to vote a protection of 6½ cents a yard on cotton cloth for the manufacturer, but when you were asked to give the farmer an export bounty as long as the manufacturer has an import duty, you say no, it is against your principle. It is not against your principles to protect the manufacturer, but when it comes to treating the farmer the same way, you serve him with chin music yourselves.

The present Democratic law is full of protection for the manufacturer, but there is nothing in it for the farmer; the pending Republican bill is full of protection for the manufacturer, but there is nothing in it for the farmer.

Mr. President, I submit that as long as the manufacturer is protected with an import duty, the farmer should be protected with an export bounty. Yet, when the Senator from Utah [Mr. CANNON] offered an amendment to protect the farmer with an export bounty, every Republican voted against it, and every Democrat except three voted against it. Who voted for it? Who voted to treat the farmer as the manufacturer is treated? Every Populist, every Silver Republican, and three Democrats—all the other Senators served the farmer with nothing but chin music.

The PRESIDING OFFICER. The question is on agreeing to the substitute submitted by the Senator from Arkansas [Mr. JONES], upon which the yeas and nays are demanded.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. HARRIS of Kansas (when his name was called). I am paired with the Senator from Wyoming [Mr. CLARK], and withhold my vote.

Mr. JONES of Arkansas (when his name was called). I am paired with the Senator from Maine [Mr. HALE]. If he were present, I should vote "yea."

Mr. KENNEY (when his name was called). I again announce my pair with the junior Senator from Pennsylvania [Mr. PENROSE], and withhold my vote.

Mr. MALLORY (when his name was called). I am paired with the junior Senator from Vermont [Mr. PROCTOR], and therefore refrain from voting.

Mr. MITCHELL (when his name was called). I am paired with the Senator from New Jersey [Mr. SEWELL].

Mr. MORRILL (when his name was called). I am paired with the Senator from Tennessee [Mr. HARRIS].

Mr. TILLMAN (when his name was called). I again announce my pair with the Senator from Nebraska [Mr. THURSTON]. If he were present, I should vote "yea."

Mr. WALTHALL (when his name was called). I am paired with the Senator from Wisconsin [Mr. SPOONER]. I would vote "yea" if he were present.

Mr. WARREN (when his name was called). I am paired with the junior Senator from Washington [Mr. TURNER]. I do not see him in the Chamber, and therefore withhold my vote.

The roll call was concluded.

Mr. GEAR. I am paired with the Senator from New Jersey [Mr. SMITH]. I transfer that pair to the junior Senator from Massachusetts [Mr. LODGE], and vote "nay."

Mr. BERRY. I am paired with the Senator from Montana [Mr. CARTER]. If he were present, I should vote "yea."

Mr. CLAY. The junior Senator from Massachusetts [Mr. LODGE] stands paired with the Senator from New Jersey [Mr. SMITH].

Mr. COCKRELL (after having voted in the affirmative). Has the Senator from Oregon [Mr. MCBRIDE] voted?

The PRESIDING OFFICER. The Chair is informed that the Senator from Oregon has not voted.

Mr. COCKRELL. Has any pair been announced with that Senator?

The PRESIDING OFFICER. The Chair is informed that no pair has been announced.

Mr. COCKRELL. It is probable that he may consider that our pair was extended. I am not certain. I thought he was in the Chamber at one time. I will withdraw my vote and announce that I am paired with him. If he were present, I should vote "yea," and he would doubtless vote "nay."

Mr. PETTUS (after having voted in the affirmative). I desire to inquire if the senior Senator from Massachusetts [Mr. HOAR] has voted?

The PRESIDING OFFICER. The Chair is informed that the senior Senator from Massachusetts has not voted.

Mr. PETTUS. I withdraw my vote, being paired with that Senator.

The Secretary recapitulated the vote.

Mr. COCKRELL. I will vote "yea." It will not change the result.

Mr. MORRILL. I will transfer my pair with the Senator from Tennessee [Mr. HARRIS] to the Senator from Wisconsin [Mr. SPOONER], which will enable the Senator from Mississippi [Mr. WALTHALL] and myself to vote. I vote "nay."

Mr. WALTHALL. I vote "yea."

The result was announced—yeas 18, nays 27; as follows:

YEAS—18.

Bacon,	Cockrell,	Mitchell,	Vest,
Bate,	Gorman,	Morgan,	Walthall,
Butler,	Gray,	Pasco,	White.
Chilton,	McLaurin,	Rawlins,	
Clay,	Mills,	Turpie,	

NAYS—27.

Allison,	Foraker,	Mason,	Shoup,
Burrows,	Gallinger,	Morrill,	Stewart,
Chandler,	Gear,	Perkins,	Teller,
Cullom,	Hanna,	Platt, Conn.	Wellington,
Deboe,	Hawley,	Pritchard,	Wetmore,
Elkins,	McEnery,	Quay,	Wilson.
Fairbanks,	Mantle,	Sewell,	

NOT VOTING—44.

Aldrich,	Frye,	Kyle,	Pettus,
Allen,	George,	Lindsay,	Platt, N. Y.
Baker,	Hale,	Lodge,	Proctor,
Berry,	Hansbrough,	McBride,	Roach,
Caffery,	Harris, Kans.	McMillan,	Smith,
Cannon,	Harris, Tenn.	Mallory,	Spooner,
Carter,	Heitfeld,	Martin,	Thurston,
Clark,	Hoar,	Murphy,	Tillman,
Daniel,	Jones, Ark.	Nelson,	Turner,
Davis,	Jones, Nev.	Penrose,	Warren,
Faulkner,	Kenney,	Pettigrew,	Wolcott.

So the amendment was rejected.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had passed the bill (S. 2050) to amend an act entitled "An act to provide for the entry of lands in Greer County, Okla., to give preference rights to settlers, and for other purposes," approved January 18, 1897.

THE TARIFF BILL.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States.

The next amendment of the Committee on Finance was, on page 97, after line 17, to insert the following as a new paragraph:

308a. The term cotton cloth, or cloth, wherever used in the paragraphs of this schedule, unless otherwise specially provided for, shall be held to include all woven fabrics of cotton in the piece or otherwise, whether figured, fancy, or plain, the warp and filling threads of which can be counted by unraveling or other practicable means.

The amendment was agreed to.

The next amendment was, on page 97, after line 23, to insert the following as a new paragraph:

308b. Cloth, composed of cotton or other vegetable fiber and silk, whether known as silk-striped sleeve linings, silk stripes, or otherwise, 8 cents per

square yard and 30 per cent ad valorem: *Provided*, That no such cloth shall pay a less rate of duty than 50 per cent ad valorem. Cotton cloth, filled or coated, 3 cents per square yard and 20 per cent ad valorem.

The amendment was agreed to.

The next amendment was, in paragraph 309, page 98, line 7, after the word "whether," to strike out "wholly or partly;" in line 8, after the word "finished," to insert "or unfinished;" in line 9, after the word "duty," to insert "on the cloth contained therein;" so as to make the paragraph read:

309. Handkerchiefs or mufflers composed of cotton, whether in the piece or otherwise and whether finished or unfinished, if not hemmed, or hemmed only, shall pay the same rate of duty on the cloth contained therein as is imposed on cotton cloth of the same description, weight, and count of threads to the square inch; but such handkerchiefs or mufflers shall not pay a less rate of duty than 45 per cent ad valorem. If such handkerchiefs or mufflers are hemstitched, or imitation hemstitched, or revered, or have drawn threads, they shall pay a duty of 10 per cent ad valorem in addition to the duty hereinbefore prescribed, and in no case less than 55 per cent ad valorem; if such handkerchiefs or mufflers are embroidered in any manner, whether with an initial letter, monogram, or otherwise, by hand or macbinery, or are tamboured, appliqued, or trimmed wholly or in part with lace or with tucking or insertion, they shall not pay a less rate of duty than 60 per cent ad valorem.

The amendment was agreed to.

Mr. JONES of Arkansas. I move to strike out paragraph 309 and insert paragraph 358 of the Wilson Act, which I believe covers the same articles.

The PRESIDING OFFICER. The amendment proposed by the Senator from Arkansas will be stated.

The SECRETARY. It is proposed to strike out paragraph 309 of the bill and to insert in lieu thereof the following:

Clothing ready made, and articles of wearing apparel of every description, handkerchiefs, and neckties or neck wear, composed of cotton or other vegetable fiber, or of which cotton or other vegetable fiber is the component material of chief value, made up or manufactured wholly or in part by the tailor, seamstress, or manufacturer, all of the foregoing not specially provided for in this act, 40 per cent ad valorem.

The PRESIDING OFFICER. The question is on agreeing to the amendment submitted by the Senator from Arkansas.

The amendment was rejected.

The next amendment of the Committee on Finance was, in paragraph 310, page 99, line 5, after the word "same," to strike out "description" and insert "condition;" so as to make the paragraph read:

310. Cotton cloth in which other than the ordinary warp and filling threads have been introduced in the process of weaving to form a figure, whether known as lappets or otherwise, and whether unbleached, bleached, dyed, colored, stained, painted, or printed, shall pay, in addition to the duty herein provided for other cotton cloth of the same condition, weight, and count of threads to the square inch, 1 cent per square yard if valued at not more than 7 cents per square yard, and 2 cents per square yard if valued at more than 7 cents per square yard.

Mr. JONES of Arkansas. I move to strike out this paragraph.

The PRESIDING OFFICER. Will the Senator permit the committee amendment first to be acted upon?

Mr. JONES of Arkansas. Certainly.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

Mr. JONES of Arkansas. I move to strike out paragraph 310. I hope the Senator from Iowa will explain to the Senate if it is not covered by paragraph 308, which has already been adopted, and better covered than in the present form. The amendment submitted by the committee, it seems to me, covers the ground intended to be covered by this paragraph, and does it much better and in a less ambiguous way.

For instance, take the word "condition," in line 5, on page 99. "Cotton cloth in which other than the ordinary warp and filling threads have been introduced in the process of weaving to form a figure, whether known as lappets or otherwise, and whether unbleached, bleached, dyed, colored, stained, painted, or printed, shall pay, in addition to the duty herein provided for cotton cloth of the same description." The word "description" has been stricken out and the word "condition" put in. It seems to me that the word "condition" must necessarily produce confusion. Now, take the paragraph numbered 308b:

308b. Cloth, composed of cotton or other vegetable fiber and silk, whether known as silk-striped sleeve linings, silk stripes, or otherwise, 8 cents per square yard and 30 per cent ad valorem: *Provided*, That no such cloth shall pay a less rate of duty than 50 per cent ad valorem.

And paragraph 308a is as follows:

308a. The term cotton cloth, or cloth, wherever used in the paragraphs of this schedule, unless otherwise specially provided for, shall be held to include all woven fabrics of cotton in the piece or otherwise, whether figured, fancy, or plain, the warp and filling threads of which can be counted by unraveling or other practicable means.

It seems to me that paragraph 310 is included, and very much better included, in paragraph 308 than it is in this form; that the form in which the House put it ought to be struck out and the amendment of the Senate committee ought to remain.

I have the suggestion from a custom-house officer that in paragraph 308 the language is comprehensive, and that the language in paragraph 310 is confusing and will lead to litigation. The words "the same condition, weight, and count of threads" would include only such cloths as are figured in weaving, and these are certainly included in the words of paragraph 308a, which says that the term "cotton cloth, or cloth" shall be held to include all woven fabrics, "whether figured, fancy, or plain."

It seems to me that, under the circumstances, the Senator will agree to have paragraph 310 go out of the bill. At any rate, I move to strike it out. It was put in by the House before paragraph 308 went into the bill, and it is certainly, it seems to me, much less artistically drawn than paragraph 308 and covers exactly the same goods.

Mr. ALLISON. I think the intention in paragraph 310 is to cover a special character of weaving, where figures are introduced, and an additional duty is placed upon that character of goods. Paragraph 308, it is true, is a general definition and description of cloth, whether figured or plain, but here is a provision requiring an additional duty as a figure is introduced in the process of weaving. I think this is intended to cover more than is covered in paragraph 308. That is my understanding. I hope the Senator will allow it to remain in until we can make a more thorough examination of the difference between these two provisions.

Mr. JONES of Arkansas. If the Senator will note for a moment the structure of these two paragraphs, it seems to me there can be no doubt in his mind. Paragraph 308a says:

The term cotton cloth, or cloth, wherever used in the paragraphs of this schedule, unless otherwise specially provided for, shall be held to include all woven fabrics of cotton in the piece or otherwise, whether figured, fancy, or plain, the warp and filling threads of which can be counted by unraveling or other practicable means.

Then paragraph 308b is as follows:

Cloth, composed of cotton or other vegetable fiber, and silk, whether known as silk-striped sleeve linings, silk stripes, or otherwise, 8 cents per square yard and 30 per cent ad valorem: *Provided*, That no such cloth shall pay a less rate of duty than 50 per cent ad valorem.

Now, this old paragraph 310 that remains in the bill certainly includes the same goods and proposes a rate of "1 cent per square yard if valued at not more than 7 cents per square yard, and 2 cents per square yard if valued at more than 7 cents per square yard."

Mr. ALLISON. If the Senator will allow me, paragraph 308a states: "The term cotton cloth, or cloth, wherever used in the paragraphs of this schedule, unless otherwise specially provided for." In paragraph 310 there is a particular kind of cotton cloth that is otherwise specially provided for. Therefore they are not inconsistent, but they are harmonious, because the particular kind of cloth provided for in paragraph 310 is where a figure is woven into the cloth, and therefore it is excepted by the terms of paragraph 308 from that definition.

Mr. JONES of Arkansas. Does the Senator say that where a figure is woven into the cloth it is not included in paragraph 308?

Mr. ALLISON. Undoubtedly many figures are.

Mr. JONES of Arkansas. But where a figure is woven into the cloth, is it not included in the language of paragraph 308?

Mr. ALLISON. It may be or it may not be.

Mr. JONES of Arkansas. How could it possibly not be included?

Mr. ALLISON. But here is a figure specially provided for, and therefore it is not included in paragraph 308.

Mr. JONES of Arkansas. The language of paragraph 308a is, "all woven fabrics of cotton in the piece or otherwise, whether figured, fancy, or plain." That certainly means woven figures.

Mr. ALLISON. That is a general provision.

Mr. JONES of Arkansas. Certainly.

Mr. ALLISON. Here is a provision in paragraph 310 that says, "cotton cloth, in which other than ordinary warp and filling threads." That means, I take it, some special warp, some filling threads, in order to secure a special figure.

Mr. JONES of Arkansas. That would result in a figured piece of goods, and paragraph 308 provides for the figured goods. But if the Senator is not willing to take my view of it, I should like to have him explain what the word "condition," which he has had put in in place of "description," means. What does it stand for? The language of paragraph 310 is:

Cotton cloth in which other than the ordinary warp and filling threads have been introduced in the process of weaving to form a figure, whether known as lappets or otherwise, and whether unbleached, bleached, dyed, colored, stained, painted, or printed, shall pay, in addition to the duty herein provided for other cotton cloth of the same condition.

Mr. ALLISON. I should think the word "condition" there means "character," while the word "description," as used there, would mean the same cloth.

Mr. JONES of Arkansas. It seems to me to mean exactly what is embraced in paragraph 308.

Mr. ALLISON. If the Senator can show me that these two paragraphs cover identically the same thing in every respect, I will consent to strike out paragraph 310.

Mr. JONES of Arkansas. I move to strike it out now.

Mr. ALLISON. Very well. I hope that will not be done.

Mr. CHILTON. I should like to ask the Senator from Iowa about the clause at the end of paragraph 308, which reads:

Cotton cloth, filled or coated, 3 cents per square yard and 20 per cent ad valorem.

So far as I can see, that is a new provision in tariff bills. I do not think it is in either the Wilson or the McKinley law; and I should be glad to have the Senator's opinion in regard to the effect of it. Does it increase the duty?

Mr. ALLISON. This clause has never appeared in any tariff bill before that I know of. It is intended to cover a particular kind of cotton cloth that we find in our houses—what we call curtains. They are fixed at 3 cents a square yard and 20 per cent ad valorem.

Mr. CHILTON. You do not think, then, it increases the duty beyond what it would be if not enumerated?

Mr. ALLISON. I would not like to say that. I think it does increase the rate of duty somewhat. It is intended, as I say, to cover a class of cotton cloths filled with oil or coated in some way.

Mr. CHILTON. I understand.

Mr. ALLISON. When so filled or coated the article pays specific duty of 3 cents a square yard and 20 per cent ad valorem.

Mr. CHILTON. I want to know whether the Senator thinks that would increase the duty beyond what it would be if it was not enumerated?

Mr. ALLISON. I think it will slightly increase the duty. If not enumerated, it would go into the basket clause and pay 45 per cent ad valorem.

Mr. CHILTON. Yes.

Mr. ALLISON. If these articles were fine cloth, the duty would probably be greater; if of coarse cloth, it would probably be less. I am not familiar enough with the details of the business to know whether it would be an increase or a diminution. It is intended to protect that class of cotton cloth which has oil in it, or which is coated. It is a new provision.

Mr. CHILTON. I did not care to make a motion to strike it out unless I was sure it made an increase of duty; and, not being sure, I shall not make the motion.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from Arkansas [Mr. JONES] to strike out paragraph 310.

The amendment was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, on page 99, paragraph 311, line 16, before the word "provided," to strike out "the articles" and insert "any outside garment;" and in line 17, after the word "material," to strike out "(not including gloves);" so as to make the paragraph read:

311. Clothing, ready-made, and articles of wearing apparel of every description, including neckties or neckwear composed of cotton or other vegetable fiber, or of which cotton or other vegetable fiber is the component material of chief value, made up or manufactured, wholly or in part, by the tailor, seamstress, or manufacturer, and not otherwise provided for in this act, 50 per cent ad valorem: *Provided*, That any outside garment provided for in this paragraph having india rubber as a component material shall pay a duty of 15 cents per pound and 50 per cent ad valorem.

The amendment was agreed to.

Mr. VEST. I should like to inquire of the Senator from Iowa why that change is made in line 17, striking out the words "not including gloves." What does the Senator propose to do with gloves?

Mr. ALLISON. As I understand this paragraph, before our amendment was adopted it was intended to cover all articles having india rubber as a component material. We have by our amendment in line 16 confined this duty to a particular class of garments. Garments which are known as waterproof garments are only included here, and therefore it is not necessary to have the words "not including gloves," because this proviso is limited to outside garments, which we thought was a proper limitation for this, I might say, considerable duty, not excessive perhaps, but it would be excessive on anything else except very fine outside garments known as waterproof garments. I think the Senator will see the propriety of the amendment.

Mr. VEST. I ask the Senator what effect the striking out of the words "not including gloves" has? Does that put them in the basket clause, or where does it leave them?

Mr. ALLISON. They will undoubtedly go wherever gloves go, either in the basket clause, if india rubber is a component material, or in some other basket clause covering articles not specified. The Senator will see that by the amendment we propose we exclude gloves.

Mr. VEST. What I am trying to arrive at is whether this is an increase upon gloves or not. I notice in the basket clause to this schedule the rate is increased, if I am not mistaken.

Mr. ALLISON. Gloves are not included. I think that is perfectly clear.

Mr. VEST. Do they go under the basket clause?

Mr. ALLISON. If the words "not including gloves" were retained, then the clause would read, "any outside garment provided for in this paragraph having india rubber as a component material (not including gloves);" which certainly are not intended as an outside garment within the meaning of this proviso as we have made it.

Mr. VEST. I do not know whether you would call gloves a garment or not, but they are worn outside.

Mr. ALLISON. Certainly we do not wear gloves inside.

Mr. VEST. In line 15, before the words "per cent," I move to strike out "fifty" and insert "forty."

The PRESIDING OFFICER. The amendment proposed by the Senator from Missouri [Mr. VEST] will be stated.

The SECRETARY. In paragraph 311, page 99, line 15, before the words "per cent," it is proposed to strike out "fifty" and insert "forty;" so as to read:

And not otherwise provided for in this act, 40 per cent ad valorem.

The amendment was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 312, page 99, line 21, after the word "fabrics," to strike out the comma and insert "cut or uncut; any of the foregoing;" so as to read:

312. Plushes, velvets, velveteens, corduroys, and all pile fabrics cut or uncut; any of the foregoing composed of cotton or other vegetable fiber, not bleached, dyed, colored, stained, painted, or printed, etc.

The PRESIDING OFFICER. The Chair will inquire of the Senator from Iowa as to whether he thinks the comma should be stricken out after the word "fabrics," in line 21?

Mr. ALLISON. I think the comma should be stricken out.

The PRESIDING OFFICER. Then it will be so determined, in the absence of objection; and the question will be upon the adoption of the remainder of the amendment.

The amendment was agreed to.

The next amendment of the Committee on Finance was, in the same paragraph, line 23, after the word "printed," to strike out "ten" and insert "nine;" in line 24, before the words "per centum," to strike out "twenty" and insert "twenty-five;" in the same line, after the words "ad valorem," to strike out "on all such goods if bleached, 12 cents per square yard and 20 per cent ad valorem;" in line 1, on page 100, before the word "dyed," to insert "bleached;" in line 2, before the word "cents," to strike out "fourteen" and insert "twelve;" in the same line, after the words "yard and," to strike out "twenty" and insert "twenty-five;" in line 3, after the word "*Provided*," to strike out "That corduroys, composed of cotton or other vegetable fiber, weighing over 6 ounces per square yard, and valued at not more than 40 cents per square yard, shall pay a duty of 20 cents per square yard and 30 per cent ad valorem, and if weighing over 6 ounces per square yard and valued at over 40 cents per square yard, shall pay a duty of 25 cents per square yard and 40 per cent ad valorem: *Provided further*;" in line 11, after the word "manufactures," to insert "or articles in any form including such as are;" in line 13, after the word "made," to insert "or cut;" and at the end of the paragraph, in line 16, after the words "ad valorem," to insert "*Provided further*, That none of the articles or fabrics provided for in this paragraph shall pay a less rate of duty than 47½ per cent ad valorem;" so as to make the paragraph read:

312. Plushes, velvets, velveteens, corduroys, and all pile fabrics, cut or uncut; any of the foregoing composed of cotton or other vegetable fiber, not bleached, dyed, colored, stained, painted, or printed, 9 cents per square yard and 25 per cent ad valorem; if bleached, dyed, colored, stained, painted, or printed, 12 cents per square yard and 25 per cent ad valorem: *Provided*, That manufactures or articles in any form, including such as are commonly known as bias dress facings or skirt bindings, made or cut from plushes, velvets, velveteens, corduroys, or other pile fabrics composed of cotton or other vegetable fiber, shall be subject to the foregoing rates of duty and in addition thereto 10 per cent ad valorem: *Provided further*, That none of the articles or fabrics provided for in this paragraph shall pay a less rate of duty than 47½ per cent ad valorem.

The amendment was agreed to.

Mr. VEST. I call attention to the fact that on common plushes, velvets, velveteens, etc., not bleached, by the provision of this paragraph the duty is increased from 40 per cent under the existing law to 74.47 per cent, and on the next classification upon velvets and plushes that are bleached the duty is increased from 47½ per cent under the existing law to 69.39 per cent.

I move to strike out, in line 23, after the word "printed," the words "9 cents per square yard and 25 per cent ad valorem" and insert "40 per cent ad valorem;" and upon that I call for the yeas and nays. This is an excessive duty.

The PRESIDING OFFICER. The amendment proposed by the Senator from Missouri will be stated.

The SECRETARY. In paragraph 312, page 99, line 23, after the word "printed," it is proposed to strike out "9 cents per square yard and 25 per cent ad valorem" and insert "40 per cent ad valorem."

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from Missouri [Mr. VEST], on which the yeas and nays are demanded.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. GEAR (when his name was called). I am paired with the Senator from New Jersey [Mr. SMITH], but I transfer that pair to the Senator from Massachusetts [Mr. LODGE], and vote "nay."

Mr. KENNEY (when his name was called). I again announce my pair with the junior Senator from Pennsylvania [Mr. PENROSE]. Were he here, I should vote "yea."

Mr. WELLINGTON (when his name was called). I am paired with the Senator from North Carolina [Mr. BUTLER], and therefore withhold my vote.

The roll call was concluded.

Mr. DAVIS (after having voted in the negative). I am paired with the Senator from Indiana [Mr. TURPIE], who I am advised has not voted. I therefore withdraw my vote.

Mr. JONES of Arkansas (after having voted in the affirmative). I am paired with the Senator from Maine [Mr. HALE], and therefore withdraw my vote.

Mr. WARREN. I inquire if the junior Senator from Washington [Mr. TURNER] has voted?

The PRESIDING OFFICER. The Chair is informed that the Senator from Washington has not voted.

Mr. WARREN. I am paired with that Senator, and therefore withhold my vote.

The result was announced—yeas 20, nays 27; as follows:

YEAS—20.

Bacon,	Gorman,	Mitchell,	Rawlins,
Bate,	Gray,	Morgan,	Roach,
Berry,	McLaurin,	Murphy,	Tillman,
Chilton,	Mallory,	Pasco,	Walthall,
Cockrell,	Mills,	Pettus,	White.

NAYS—27.

Allison,	Gallinger,	Perkins,	Shoup,
Burrows,	Gear,	Platt, Conn.	Spooner,
Chandler,	Hanna,	Platt, N. Y.	Stewart,
Deboe,	Hawley,	Pritchard,	Thurston,
Fairbanks,	Hoar,	Proctor,	Wetmore,
Foraker,	McBride,	Quay,	Wilson.
Frye,	McEnery,	Sewell,	

NOT VOTING—42.

Aldrich,	Davis,	Kenney,	Pettigrew,
Allen,	Elkins,	Kyle,	Smith,
Baker,	Faulkner,	Lindsay,	Teller,
Butler,	George,	Lodge,	Turner,
Caffery,	Hale,	McMillan,	Turpie,
Cannon,	Hansbrough,	Mantle,	Vest,
Carter,	Harris, Kans.	Martin,	Warren,
Clark,	Harris, Tenn.	Mason,	Wellington,
Clay,	Heitfeld,	Morrill,	Wolcott.
Cullom,	Jones, Ark.	Nelson,	
Daniel,	Jones, Nev.	Penrose,	

So the amendment of Mr. VEST was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 313, page 100, line 20, before the words "table covers," to strike out "Chenille curtains" and insert "Curtains;" in the same line, after the word "all," to strike out "goods" and insert "articles;" and in line 22, after the word "value," to strike out "fifty-five" and insert "fifty;" so as to make the paragraph read:

313. Curtains, table covers, and all articles manufactured of cotton chenille or of which cotton chenille is the component material of chief value, 50 per cent ad valorem.

The amendment was agreed to.

Mr. JONES of Arkansas. I move to strike out paragraph 313 as amended and insert as a substitute the paragraph I send to the desk.

The PRESIDING OFFICER. The amendment proposed by the Senator from Arkansas will be stated.

The SECRETARY. It is proposed to strike out paragraph 313 as amended and in lieu thereof to insert:

Chenille curtains, table covers, and all goods manufactured of cotton chenille, or of which cotton chenille forms the component material of chief value, 40 per cent ad valorem; sleeve linings or other cloths, composed of cotton and silk, whether known as silk stripe sleeve lining, silk stripes, or otherwise, 45 per cent ad valorem.

Mr. JONES of Arkansas. The present rate on this article of 40 per cent is practically prohibitory. There was a revenue of but $2,700 derived from it last year under the present law. To increase this tax 25 per cent, as this bill now proposes to do, it seems to me, would absolutely exclude all importations under this paragraph. For that reason I hope the rate in the present law will be maintained, and I move that the amendment suggested by me be adopted.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from Arkansas [Mr. JONES].

The amendment was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 315, page 101, line 9, after the word "dollar," to strike out "and 50 cents;" in line 10, after the word "pairs," to strike out "and in addition thereto 15 per cent ad valorem;" in line 12, after the word "dollar," to strike out "and fifty cents;" in line 13, before the words "per dozen," to strike out "three dollars" and insert "one dollar and fifty cents;" in the same line, after the word "pairs," to strike out "seventy-five" and insert "sixty;" in line 14, after the word "pairs," to strike out "and in addition thereto 20 per cent ad valorem;" in line 15, after the word "than," to strike out "three dollars" and insert "one dollar and fifty cents;" in line 17, before the word "dollars," to strike out "five" and insert "two;" in the same line, after the word "pairs," to strike out "one dollar" and insert "70 cents;" in line 18, after the word "pairs," to strike out "and in addition thereto 25 per cent ad valorem; valued at more than $5 per dozen pairs, $1 per dozen pairs, and in addition thereto 40 per cent ad valorem" and insert, "valued at more than $2 per dozen pairs and not more than $3 per dozen pairs, $1.20 per dozen pairs; valued at more than $3 per dozen pairs and not more than $5 per dozen pairs, $2 per dozen pairs; and in addition thereto, upon all the foregoing, 15 per cent ad valorem; valued at more than $5 per dozen pairs, 55 per cent ad valorem;" so as to make the paragraph read:

315. Stockings, hose and half hose, selvedged, fashioned, narrowed, or shaped wholly or in part by knitting machines or frames, or knit by hand, including such as are commercially known as seamless stockings, hose and half hose, and clocked stockings, hose or half hose, all of the above composed of cotton or other vegetable fiber, finished or unfinished, valued at not more than $1 per dozen pairs, 50 cents per dozen pairs; valued at more than $1 per dozen pairs and not more than $1.50 per dozen pairs, 60 cents per dozen pairs; valued at more than $1.50 per dozen pairs and not more than $2 per dozen pairs, 70 cents per dozen pairs; valued at more than $2 per dozen pairs and not more than $3 per dozen pairs, $1.20 per dozen pairs; valued at more than $3 per dozen pairs and not more than $5 per dozen pairs, $2 per dozen pairs; and in addition thereto, upon all the foregoing, 15 per cent ad valorem; valued at more than $5 per dozen pairs, 55 per cent ad valorem.

The amendment was agreed to.

Mr. VEST. I call attention to the effect of these amendments. The Wilson Act provision upon all these articles is 50 per cent ad valorem. On the first grade, valued at not more than $1 per dozen, it is 65 to 100 per cent. On the grade from $1 to $1.50 it is 55 to 75 per cent. From $1.50 to $2 the rate is 55 to 65 per cent. On the next grade, $2 to $3, the rate is from 55 to 75 per cent. On the next, from $3 to $5, the rate is from 55 to 80 per cent, and upon the five-dollar grade, which is the highest here, it is 55 per cent.

It will be noticed that the heaviest increases are upon the cheapest articles, and that the lowest rate of duty is upon the highest valued goods, those at $5 per dozen.

I move, wherever these rates occur in the paragraph, as to each one of these classifications, they be stricken out, and that there be added at the end of the paragraphs the words "on all the foregoing, 50 per cent ad valorem."

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from Missouri.

The amendment was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 316, page 102, line 7, after the word "frames," to insert "or knit by hand, finished or unfinished;" in line 10, after the word "dozen," to strike out "twenty-five" and insert "sixty;" in line 11, before the words "per centum," to strike out "thirty-five" and insert "fifteen;" in line 14, before the word "cents," to strike out "seventy-five" and insert "one dollar and ten;" in line 15, before the words "per centum," to strike out "thirty-five" and insert "fifteen;" in line 17, before the words "per dozen," to insert "and fifty cents;" in line 18, before the words "per centum," to strike out "forty" and insert "twenty-five;" in line 20, before the word "cents," to strike out "twenty-five" and insert "seventy-five;" in line 21, before the words "per centum," to strike out "forty" and insert "thirty-five;" in line 24, before the word "cents," to strike out "one dollar and seventy-five" and insert "and not more than $15 per dozen, two dollars and twenty-five;" and on page 103, line 1, before the words "per centum," to strike out "forty" and insert "thirty-five;" and in the same line, after the words "ad valorem," to insert "; valued above $15 per dozen, 50 per cent ad valorem;" so as to make the paragraph read:

316. Shirts and drawers, pants, vests, union suits, combination suits, tights, sweaters, corset covers, and all underwear of every description made wholly or in part on knitting machines or frames, or knit by hand, finished or unfinished, not including stockings, hose and half-hose, composed of cotton or other vegetable fiber, valued at not more than $1.50 per dozen, 60 cents per dozen and 15 per cent ad valorem; valued at more than $1.50 per dozen and not more than $3 per dozen, $1.10 per dozen, and in addition thereto 15 per cent ad valorem; valued at more than $3 per dozen and not more than $5 per dozen, $1.50 per dozen, and in addition thereto 25 per cent ad valorem; valued at more than $5 per dozen and not more than $7 per dozen, $1.75 per dozen, and in addition thereto 35 per cent ad valorem; valued at more than $7 per dozen and not more than $15 per dozen, $4.25 per dozen, and in addition thereto 35 per cent ad valorem; valued above $15 per dozen, 50 per cent ad valorem.

The amendment was agreed to.

Mr. VEST. I wish to call attention briefly to the effect of this amendment. Under the McKinley law upon shirts valued at not more than $1.50 a dozen, the duty imposed was 35 per cent ad valorem. On the same classification under the Wilson Act it is 50 per cent ad valorem. Under the rate proposed it is from 55 to 75 per cent ad valorem.

On the next classification, valued at more than $1.50 and not more than $3, the rate is from 52 to 88 per cent. Valued at more

than $3 and not more than $5, the McKinley rate was 60 to 73 per cent. Under the bill it is from 55 to 75 per cent. Valued at more than $5 per dozen and less than $7 per dozen, the Dingley rate was 55 to 65 per cent, and under this bill it is from 60 to 70 per cent. Valued at $7 to $15, the Dingley rate was 53 to 65 per cent, and under the pending bill it is 50 to 66 per cent.

I call attention to the fact that upon the highest grades, valued at over $15 a dozen, the rate is only 50 per cent. So we have again the significant fact that upon the highest priced articles there is the lowest duty, and that upon the cheaper goods the increase is the greatest.

Mr. JONES of Arkansas. I move to strike out paragraph 315 and paragraph 316 and insert in lieu thereof the paragraph which I send to the desk, being paragraph 262 of the present law, which embraces all of the same articles, I understand.

The PRESIDING OFFICER. The amendment proposed by the Senator from Arkansas will be stated.

The SECRETARY. It is proposed to strike out paragraphs 315 and 316 and insert in lieu thereof the following:

Stockings, hose and half-hose, selvedged, fashioned, narrowed, or shaped wholly or in part by knitting machines or frames, or knit by hand, including such as are commercially known as seamless or clocked stockings, hose or half-hose, and knitted shirts or drawers, all of the above composed of cotton or other vegetable fiber, finished or unfinished, 50 per cent ad valorem.

Mr. JONES of Arkansas. From the best examination I have been able to give this matter, it seems to me the facts as stated by the Senator from Missouri are absolutely correct. We have a tariff of 50 per cent now on these articles, and the proposed tariff will increase the rate from 66 per cent to 100 per cent. There are some items on which it will be 100 per cent. The rates are not lower than 66 on the lower grades, and on none, so far as my investigation goes, is it more than 100 per cent.

I can see no justification for this increase, and I think the present rate ought to be retained. I have a letter from a New York importer, which I will ask the Secretary to read, as giving the reasons why this should be done. I have on my desk samples of these goods. It is useless to exhibit them to the Senate. They will make no impression on anybody. But it seems to me, when you examine the character of goods produced in this country and sold here, and see the rates at which it is proposed to tax the goods, and compare them with the goods that come from abroad, there can be no justification for asking that this article of universal use shall be taxed at a higher rate than 50 per cent. I ask the Secretary to read the letter which I send to the desk.

The Secretary read as follows:

NEW YORK, *May 25, 1897.*

DEAR SIR: Yours of the 24th instant at hand. Replying to same, we beg to state that full-fashioned hosiery, to compete with goods of which we have sent you samples, are made in this country by the Brown Bros. & Aberle Company, of Philadelphia, Pa., the Wayne Knitting Mills, of Fort Wayne, Ind., the Philadelphia Silk Mills, of Philadelphia, Pa., and others whom we do not happen to know. We have sent you to-day samples of goods made by the two former concerns, the prices stated on the tickets being the net quotations at which the goods have been sold to the wholesale houses of this country. These concerns have been running for quite some time, and with the present protection of 50 per cent, you can see by comparison of the goods that they are able to compete quite successfully.

In reply to your inquiry, what prospect there is that American manufacturers will be able to produce fashioned goods to any appreciable extent, we would say that with the constant changing of our tariff laws there is no prospect that the goods will be manufactured in this country to any great extent; inasmuch as the machinery producing such goods is very expensive; it makes it too discouraging, with our constant tariff agitation, for anyone to make such large investments necessary in the manufacture of these goods. Otherwise we know of no other reason why, with a protection of 50 per cent, goods should not be produced here to a larger extent.

It requires, according to a representative of a mill which produces fashioned goods in this country, a capital of $150,000 to produce $200,000 worth of hosiery. There are about $5,000,000 worth of hosiery imported; add 50 per cent duty, will be $7,500,000. The profit being small, there will not be many enterprising merchants who would invest large capital in such expensive machinery. The McKinley tariff was higher yet on some things, and no one ventured to import the necessary machinery, but under the Wilson tariff large progress has been made, particularly in seamless goods.

There are other factors which may be mentioned as retarding the manufacture of full regular hosiery in this country. There is a vast district around Chemnits in which hardly anything else is made but hosiery. The wages depends upon the demand of the goods. The workman will accept in dull times the smallest kind of pay. Should the American public (the better classes) insist in wearing full-fashioned hose, it will have to pay instead of 15 cents, 19 cents; instead of 19 cents, 25 cents a pair. Of course the duty on goods retailed above 25 cents a pair is lighter, because the American manufacturer does not produce these; neither does he propose to make them. He merely wants to compel the public to buy his production in larger quantities. The hosiery industry has never suffered in this country.

The average price of imported hosiery is about mark 4.40. You will perceive that the higher class of hosiery is comparatively small. The duty on higher grades is therefore deceiving. If the grades which are aimed at will drop out of the importation, how can the receipts be increased? If they are not kept out, the public will pay the duty and the profit on the duty to the importers. We do not think that the importer will be the loser in any case, because if he imports less the difference will be made up in the larger duties which neither the rich nor the poor man pays, because the poor man does not buy imported goods and the rich man is only taxed 50 to 55 cents. But the middle class, who principally buy the foreign goods—and we think will continue to buy them in future—will have to pay 75 to 90 per cent and still more. We mention again that the most honest gentleman in New York and Washington will try and buy the stocking for $1 and not for $1.05, because there is 10 cents more duty on the hose which costs 1 cent over a dollar. We predict there will be very few goods imported near the three different dividing lines. There is very little undervaluation going on under the present tariff, but under the proposed everybody will be compelled to be dishonest.

There are other and weighty reasons which we could mention, but we think we have already encroached upon your time too liberally. Permit us to make one more remark. Why should a sock of the same material as a lady's hose, which (the sock) costs one-third less, pay the same rate of duty as the lady's hose—that is 50, 60, or 75 cents per dozen and 15 per cent?

A good deal can be said on wool hosiery, which is heavily taxed and only imported in small quantities.

We shall be glad to furnish you with any evidence which you may desire in our line, and remain,

Yours, very truly, SCHIFF & BODENHEIMER.

Mr. JONES of Arkansas. I have in my hand samples of the goods on which there is a tax of 100 per cent. I certainly can not believe that the Senate will be ready to double the tax now paid on them.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from Arkansas.

Mr. JONES of Arkansas. On that I ask for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. CLAY (when his name was called). I transfer my pair with the junior Senator from Massachusetts [Mr. LODGE] to the Senator from New Jersey [Mr. SMITH], and vote "yea."

Mr. DAVIS (when his name was called). I am paired with the Senator from Indiana [Mr. TURPIE].

Mr. GEAR (when his name was called). I am paired with the Senator from New Jersey [Mr. SMITH]. I transfer my pair to the junior Senator from Massachusetts [Mr. LODGE], and vote. I vote "nay."

Mr. KENNEY (when his name was called). I again announce my pair with the junior Senator from Pennsylvania [Mr. PENROSE], and withhold my vote. Were he here, I should vote "yea."

Mr. TURNER (when his name was called). I am paired with the Senator from Wyoming [Mr. WARREN]. If he were present, I should vote "yea."

Mr. WELLINGTON (when his name was called). I again announce my pair with the junior Senator from North Carolina [Mr. BUTLER]. If he were present, I should vote "nay."

The roll call was concluded.

Mr. GRAY (after having voted in the affirmative). I desire to inquire if the junior Senator from Illinois [Mr. MASON] has voted?

The PRESIDING OFFICER. The Chair is informed that he has not voted.

Mr. GRAY. I voted inadvertently, and as I am paired temporarily with the junior Senator from Illinois, I withdraw my vote.

Mr. JONES of Arkansas (after having voted in the affirmative). I am paired with the Senator from Maine [Mr. HALE], and therefore withdraw my vote.

The result was announced—yeas 23, nays 31; as follows:

YEAS—23.

Bacon,	Heitfeld,	Morgan,	Tillman,
Bate,	McLaurin,	Murphy,	Turpie,
Berry,	Mallory,	Pasco,	Vest,
Chilton,	Martin,	Pettus,	Walthall,
Clay,	Mills,	Rawlins,	White.
Cockrell,	Mitchell,	Roach,	

NAYS—31.

Allison,	Foraker,	McEnery,	Shoup,
Baker,	Frye,	Perkins,	Spooner,
Burrows,	Gallinger,	Platt, Conn.	Stewart,
Carter,	Gear,	Platt, N. Y.	Teller,
Chandler,	Hanna,	Pritchard,	Thurston,
Cullom,	Hawley,	Proctor,	Wetmore,
Deboe.	Hoar,	Quay,	Wilson.
Fairbanks,	McBride,	Sewell,	

NOT VOTING—35.

Aldrich,	Faulkner,	Jones, Nev.	Nelson,
Allen,	George,	Kenney,	Penrose,
Butler,	Gorman,	Kyle,	Pettigrew,
Caffery,	Gray,	Lindsay,	Smith,
Cannon,	Hale,	Lodge,	Turner,
Clark,	Hansbrough,	McMillan,	Warren,
Daniel,	Harris, Kans.	Mantle,	Wellington,
Davis,	Harris, Tenn.	Mason,	Wolcott.
Elkins,	Jones, Ark.	Morrill,	

So the amendment was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 317, page 103, line 16, before the word "cents," to strike out "twenty" and insert "twenty-five;" so as to make the paragraph read:

317. Bandings, beltings, bindings, bone casings, braids, cords, garters, gorings, lining for bicycle tires, ribbons, suspenders and braces, tapes, tubing, and webs or webbing, any of the foregoing articles made of cotton or other vegetable fiber, whether composed in part of indiarubber or otherwise, and not embroidered by hand or machinery, 45 per cent ad valorem; spindle banding, woven, braided or twisted lamp, stove, or candle wicking made of cotton or other vegetable fiber, 10 cents per pound and 15 per cent ad valorem; loom harness or healds made of cotton or other vegetable fiber, or of which cotton or other vegetable fiber is the component material of chief value, 50 cents per pound and 25 per cent ad valorem; boot, shoe, and corset lacings made of cotton or other vegetable fiber, 25 cents per pound and 15 per cent ad valorem; labels, for garments or other articles, composed of cotton or other vegetable fiber, 75 cents per pound and 35 per cent ad valorem.

The amendment was agreed to.

Mr. ALLISON. In paragraph 317 I move the amendment which I send to the desk.

The SECRETARY. In paragraph 317, page 103, line 5, it is proposed to strike out the words "suspenders and braces;" and in line 9, after the words "ad valorem," to insert the words "suspenders and braces, made as aforesaid, 40 per cent ad valorem;" so as to read:

Bandings, beltings, bindings, bone casings, braids, cords, garters, gorings, lining for bicycle tires, ribbons, tapes, tubing, and webs or webbing, any of the foregoing articles made of cotton or other vegetable fiber, whether composed in part of india rubber or otherwise, and not embroidered by hand or machinery, 45 per cent ad valorem; suspenders and braces, made as aforesaid, 40 per cent ad valorem.

The amendment was agreed to.

Mr. ALLISON. In line 19 I move to strike out "seventy-five" and insert "fifty;" and in the same line I move to strike out "five."

The SECRETARY. In paragraph 317, line 19, it is proposed to strike out "seventy-five" and insert "fifty," and to strike out "thirty-five" and insert "thirty;" so as to read:

Labels, for garments or other articles, composed of cotton or other vegetable fiber, 50 cents per pound and 30 per cent ad valorem.

The amendment was agreed to.

Mr. ALLISON. In accordance with the notice given some time ago, I move to strike out the word "braids" in line 3 and the word "gorings" in line 4.

The SECRETARY. In paragraph 317, line 3, page 103, it is proposed to strike out the word "braids;" and in line 4 to strike out the word "gorings;" so as to read:

Bandings, beltings, bindings, bone casings, cords, garters, lining for bicycle tires, ribbons, tapes, tubing, and webs or webbing, any of the foregoing articles made of cotton or other vegetable fiber, etc.

The amendment was agreed to.

Mr. VEST. Now I move to strike out the whole paragraph and insert paragraph 263 of the existing law.

The PRESIDING OFFICER. The amendment proposed by the Senator from Missouri will be stated.

The SECRETARY. It is proposed to strike out paragraph 317 and insert in lieu thereof the following:

Cords, braids, boot, shoe, and corset lacings, tapes, gimps, galloons, webbing, goring, suspenders and braces, woven, braided, or twisted lamp or candle wicking, lining for bicycle tires, spindle binding, any of the above made of cotton or other vegetable fiber, and whether composed in part of India rubber or otherwise, 45 per cent ad valorem.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Missouri.

The amendment was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 318, page 103, line 21, after the word "cotton," to insert "table;" so as to make the paragraph read:

318. Cotton table damask, 40 per cent ad valorem; cotton duck, 35 per cent ad valorem.

The amendment was agreed to.

Mr. VEST. In line 21 I move to strike out "forty" and insert "thirty-five;" so as to read "35 per cent ad valorem," which is the existing law.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Missouri.

The amendment was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 319, page 103, line 24, before the words "per cent," to strike out "forty" and insert "forty-five;" so as to make the paragraph read:

319. All manufactures of cotton not specially provided for in this act, 45 per cent ad valorem.

Mr. JONES of Arkansas. I move to amend the committee amendment by striking out "forty-five" and inserting "thirty-five," which is the present law.

The VICE-PRESIDENT. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was rejected.

The VICE-PRESIDENT. The question recurs on agreeing to the committee amendment.

The amendment was agreed to.

Mr. ALLISON. I move to insert as an additional paragraph what I send to the desk.

The SECRETARY. It is proposed to insert as a new paragraph the following:

319½. On all cotton yarns finer than No. 10 single, and on all manufactures of cotton made in whole or in part from yarns finer than No. 10 single, there shall be levied and collected 10 per cent ad valorem in addition to the appropriate rates of duty provided therefor in paragraphs 301 to 319, inclusive, or any other paragraph of this act providing for such manufactures.

Mr. ALLISON. Some days ago an additional duty was placed upon all raw cotton, but applying especially to Egyptian cotton. The committee is satisfied that a number of brackets in the various paragraphs in the cotton schedule will require some modification, but with the limited time allowed and the information available it is impossible for the committee to recommend the modifications. My own judgment, which is not very valuable, I agree, is that the modifications will be applied to very few of the paragraphs or brackets; but it is manifest that if this duty is to remain, as I suppose it is, it will be necessary in a degree at least to revise those paragraphs. It will be necessary to go over them with care.

This amendment is proposed in order that at a later period when the bill is in the Senate we may have the paragraphs modified, if it is possible to do so, or if not, that the conference can make such modifications as may be necessary because of the duty upon cotton.

Therefore, I hope there will be no objection to the insertion of this paragraph, so that it may be in order later on to deal with such portions of the several paragraphs as may require additional treatment. Of course, this is a tentative matter and will be considered with the utmost care hereafter.

Mr. GRAY. If I understand the Senator from Iowa, this is what may be called a compensatory duty—a duty to compensate for the amendment which has been adopted levying a duty of 20 per cent on certain grades of raw cotton.

Mr. ALLISON. It may be termed a compensatory duty.

Mr. GRAY. It is not a revenue tax?

Mr. ALLISON. It will be a revenue tax if the articles are imported.

Mr. GRAY. If it produces any revenue.

Mr. ALLISON. To that extent it will be a revenue tax.

Mr. GRAY. I did not hear any reason of a revenue nature alleged by the Senator from Iowa, and I was trying to ascertain the moving cause of this additional tax. Of course I think these things are important and that we ought to know the reasons.

Mr. ALLISON. They are important.

Mr. GRAY. I think a burden always ought to have a good reason to justify it. If I understand the Senator from Iowa, this is purely a compensatory tax to offset the 20 per cent duty on raw cotton that has been adopted.

Mr. ALLISON. The Senator does not quite comprehend me.

Mr. GRAY. That is what I want to do. I wish to comprehend the Senator.

Mr. ALLISON. I do not mean to say wholly. Of course, if articles are fabricated from cotton that pays this tax, as a good many of them are, it will be necessary and proper to levy an additional duty upon such articles so fabricated, and if they are imported it will be a revenue tax or a revenue measure, as the entire bill is a revenue measure. I do not need to repeat every time I speak that this is intended as a measure to raise revenue upon imports and to protect at the same time the industries of our country.

We have endeavored to distribute in these paragraphs the duties upon imports to raise revenue in such a way as to protect our own industries. Now, if it turns out that Egyptian cotton is used in the manufacture of any of the articles in the cotton schedule, and only used, and it is more valuable than our domestic cotton for this purpose, would it be an unwise thing to fairly protect the people who are engaged in this manufacture, or is it wiser, by placing this duty upon Egyptian cotton, to so arrange the remainder of the schedule as that they could not manufacture these articles in our country? Now, that is the whole of it.

Mr. GRAY. The Senator from Iowa will not misunderstand me. I did not design at this time to enter into the question of the wisdom or unwisdom of the tax. I wanted clearly to understand the nature of it, because this is a complex matter. I understand that the motive and justification for this measure are mainly to increase the revenues, to supplement or supply the deficit that unfortunately from certain causes has taken place in our revenue in the last few years. Certainly that is a justification for a consideration of our tax laws. If there is a deficit, we must make it up. We have the taxing power, and we must exercise it for that purpose.

I wanted to understand what the motive of this tax was, because all through the bill I find different motives. There are certain taxes the Senator has frankly said were not revenue taxes; they were protection taxes. I understood the Senator from Rhode Island to say that the result of the whole bill would not be such as to supply that deficiency which has been the moving cause of our being called in extra session, but that by the bill as it came from the House there would still be a deficit, and there were certain direct taxes imposed that were meant to supply the revenue that the main bill wholly failed to supply.

Mr. VEST. I should like to ask the Senator from Iowa a question, which I hope he will answer frankly. Would he have offered this amendment if the 20 per cent tax had not been put on raw cotton?

Mr. ALLISON. I certainly would not have offered it.

Mr. VEST. That is the whole of it.

Mr. President, I would have been very much surprised, as I stated this morning, if this compensatory tax had not been offered by our friends upon the other side. That is one of the invariable characteristics of the tariff system. One tax breeds another. It is a great interdependent, intercommunicating trust. One duty rests upon another, one interest helps another, and the result is to

increase the price of all manufactures to the consumer. It is entirely consistent, after putting a 20 per cent tax upon raw cotton, now to bring in this amendment. I am not at all surprised.

Mr. GRAY. I should like to ask the Senator from Missouri a question. He is very experienced in these matters and knows all about ad valorems and compensatory taxes. Has he ever discovered where any compensation to the consumer comes in?

Mr. VEST. Oh, Mr. President, that is in the clouds or somewhere else; we can not get at it. We always increase the duties, so as to increase the cost to the consumer. When it comes to compensating him, he is merely compensated in general philanthropic declarations as to how much they think of him, without doing anything for him.

I wish our friends had listened to the official report of Mr. Blaine in June, 1881, when he was Secretary of State, which I read here this morning to deaf ears, in which he congratulated the people of this country upon the fact that they had raw cotton, and said that that of itself enabled them, together with cheaper labor in the cotton mills than they had in Europe, to compete with our English cousins in all the markets of the world in manufactured cotton goods.

But I want to call attention to a single feature that has developed in the course of this ex parte discussion. When the Senator from Rhode Island made his initiatory speech and outlined the general effect of the bill that was reported by the majority of the Finance Committee, we were told that there was very little increase as to the cotton schedule; that there had been some changes made in the bill, but he dismissed the cotton schedule with the remark that very little change had been made in that schedule. We find now increases above the McKinley Act. We find that, not satisfied with the existing law, there have been enormous increases over the Wilson Act.

Mr. President, it is astonishing with how much complacency my friend from Iowa moves an increase, abandoning the decreases which he made in his report of the pending bill and going to the larger duties in the Dingley bill. It was made a great matter of congratulation that they had reduced the duties in the Dingley bill. The Senator from Rhode Island with great unction dwelt upon that fact. But so soon as the Republican caucus had consolidated and crystallized, so soon as there was a general agreement on the other side of the Chamber reconciling conflicting interests to support whatever the majority of the Finance Committee agreed upon, together with this associated tribunal of additional Senators, an auxiliary corps who advised them in regard to the expediency of certain increases—so soon as that was brought about my friend from Iowa marches up with a smile upon his face and drops all his decreases and goes back to the increases of the Dingley bill and above them. It shows what confidence comes from assured success. It shows what gallantry can be displayed when there are overwhelming numbers to back whatever may be determined upon by the caucus.

I call attention to the fact that every Senator who has taken any interest in this bill has seen that nine out of every ten of the decreases made and foreshadowed and boasted of in the speech of the Senator from Rhode Island have been abandoned. They have not only gone back to the Dingley rates, but they have gone beyond them and above the rates in the McKinley Act. With all our protests, not to say arguments, we have been met with the serene, amiable smile of the Senator from Iowa and a steady vote for the increase, no matter what it may be.

Sir, it is not at all a matter of wonder that this compensatory duty is to be placed in the bill. It was absolutely necessary and logical, and I am glad that the Senator from Iowa—I expected nothing else—was candid enough to avow the real object.

Mr. ALLISON. Mr. President, I wish to occupy but a moment.

Mr. VEST. If the Senator from Iowa will permit me, the Senator from California [Mr. WHITE] suggests that the statement of the Senator from Rhode Island [Mr. ALDRICH] should be read. I ask my friend from California to read what the Senator from Rhode Island said.

Mr. WHITE read as follows:

> In the cotton schedule the rates, which are practically those of 1894, have not been changed from the House schedules, except in the paragraphs relating to hosiery, underwear, and corduroys, and velveteens. On these the rates are somewhat lower than the House provisions.

Mr. ALLISON. As respects the particular schedule we have passed over, there are a number of rates that have been reduced below the House bill, and some of them have been reduced below the existing law. So under influences, whatever they may be, the committee have abandoned some of the amendments reducing duties, and they have reduced other duties less than originally recommended to the Senate. These influences, whatever they are, only show, however, that history repeats itself.

I remember very well four years ago when the Senator from Missouri, in overhauling the Wilson bill, reduced the duties of that proposed law by amendments, I think nearly 200 in number. They were brought in by the then managers, or on behalf of the majority of the Committee on Finance, by the Senator from Arkansas [Mr. JONES]. They were printed and examined by Senators.

Immediately, or as soon thereafter as the Senators could gather themselves together, there was an adjournment of the Senate from Thursday until Monday. There was a convention of Democratic Senators (I do not know whether they called it a caucus, or what) that met—not in this Chamber, but in this Capitol—and expended four or five days in dissecting and dividing the bill called the Wilson bill, and as the result of that conference, or whatever it was called, there came into this Chamber new and revised schedules, which, instead of reducing the duties of the Wilson bill, increased those duties all along the line. There was a committee of safety, or whatever I might choose to call it, inside and outside of the majority of the Finance Committee at that time which ruled the amendments upon that bill in a way that was absolutely comfortable to the other side of the Chamber, because whenever any amendment was proposed by them to that bill, whether it was compensatory or otherwise, it was straightway voted into the bill. When the iron schedule was reached, the duty on iron ore was placed at 40 cents a ton. There was a compensatory duty of $4 a ton put upon pig iron, and when pig iron had a duty of $4 a ton there was a compensatory duty upon final forms of iron leading up to No. 35 wire gauge.

So, Mr. President, when we speak of the inner movements, whatever they may be, of this side of the Chamber, whether we are coerced by caucus or otherwise, or whether these amendments are presented here because of more mature deliberation of the committee, it is only the repetition of history, and I hope my friend from Missouri will not be disturbed because now and then I have moved, in as good nature as I could, amendments under the direction of the committee that were not originally proposed by the Senate Finance Committee when it reported the bill.

The duty upon Egyptian cotton was placed on the bill in the Senate by a very large vote and upon very solid and substantial arguments, coming largely from the other side of the Chamber. Of course that duty being placed upon the raw material of a manufacture, it does seem to be necessary to treat it as in the case of pig iron or iron ore or flax. Take the flax duty. We put so much on untowed flax, so much on dressed flax, and so much on manufactures of flax. All these things are in a sense compensatory, if we are to continue the manufacture of these articles in our country. What would be the use of a duty upon Egyptian cotton if no American manufacturer could manufacture Egyptian cotton in competition with the outside world?

Mr. President, I think there is nothing remarkable about this amendment. It is an amendment, as I said before, tentative in its character. I think it will turn out that it will only apply in the end to a very few of these paragraphs and a very few brackets in the paragraphs. I think it will also turn out that the real duty to be imposed will be less than 10 per cent ad valorem. But it is necessary that some amendment be made here in order that these paragraphs may continue to be within the control of the Senate. That is all there is about it.

Mr. TILLMAN. Mr. President, as one of the "auxiliary corps" of five Democrats who voted with the Republicans for the 20 per cent duty on cotton, I feel constrained to submit just a few remarks at this time.

It is very surprising to me to see the attitude of these experienced and grave seigniors here in discussing this question—how they pitch the ball back and forth; and the excuses which are now given by our Republican friends are nearly always, "You did it when you had the power, and therefore we do it now that we have got it." In other words, when the present majority of the Committee on Finance is attacked by the minority for the enormities being perpetrated in the tariff schedules, they invariably answer with some allusion to what was done when the Wilson bill was under discussion and when the Republicans were in the minority.

Well, while that may be satisfactory to Senators, I do not think it is going to be satisfactory to the people of the country. For my part, I avow here and now that I want you to load this tariff bill as heavily as you dare, and I am ready to help you load it, because I do not believe it is going to have any effect other than to disgust the people of this country and make them turn you out of power as soon as they get an opportunity.

The tariff is not the issue before the country. It can not be made the issue, or at least of a lasting character. If this compensatory duty will satisfy you gentlemen who are clamoring for protection, and who deny, not in direct terms, but in general phrase, that you are making a sectional tariff, I say to you, go on and levy it; the people of the entire country who will consume the articles made from Egyptian cotton are to pay it. So far as the short-staple cotton is concerned, as I have already said, all of us who voted for the duty of 20 per cent upon raw cotton know that it does not affect it one iota and can give no protection, because we export five-eighths of the crop.

But the manufacturer must always be compensated. He must

always have the advantage. The producer of raw material can receive nothing. You desire now, by this additional compensatory duty, to recoup the manufacturer for the tax which has been placed on his raw material, and you make the consumers throughout the country pay it all. Well and good. I say again, as one of the five, if my friends here can get any consolation out of the twitting which they have given us for not following their lead, so to speak; for acting independently and trying to take care of the local interests of our States in this general game of grab and stealing, well and good. The time will come when the tariff will sink you Republicans, because you can not give prosperity under any scheme of duties that you may enact. Therefore I congratulate you upon the liberality with which you are treating your manufacturers and ignoring the interests of the producers of raw material.

Mr. JONES of Arkansas. Mr. President, there is no question that whenever a tariff duty is imposed on a raw material which enters into a manufacture there must be a compensation allowed to the manufacturer for the increased prices he must pay for his raw material. There can be no question about it. It is plain, simple, common sense. What I object to are the wrongs done under the guise of what is fair and straight. It is not in itself fair.

In the woolen schedule of the bill there is a proposition that for every pound of manufactured goods there shall be charged a tariff equal to the tariff on 3 pounds of unwashed wool and in addition thereto 50 per cent ad valorem. This is put in under the supposition, under the pretense, that 3 pounds of unwashed wool enter into the manufacture of 1 pound of woolen goods. The facts will show, as will appear when the proper times comes, that there is not one solitary kind of wool on the face of the green earth of which it takes 3 pounds of the unwashed wool to make a pound of scoured wool.

A pound and a half in some cases will make it, and from that ranging up to less than 3 pounds. In addition to that, it is well known that enormous importations of wool have already been made this year, enough to supply the woolen mills with all the raw material they will use for twelve months to come, upon which they have paid no tariff. Yet we propose to embody in this bill a compensation amounting to three times the proposed tax on unwashed wool upon which not one cent of tax has been paid by the manufacturers, and still they would be allowed to increase the price of every single pound of woolen goods they produce, on the theory that they have been compelled to pay three times the value of the tax on 3 pounds of unwashed wool for every pound of manufactured goods.

It is this sort of fraud, Mr. President, that I utterly abominate. This pretense that there is compensation here in the wool schedule for rates of taxation which have been paid when they never have been paid is what I dislike. It is exactly the same in the case of this cotton schedule. The Senator from Iowa [Mr. ALLISON] said each time he mentioned it that this tax of 20 per cent on Egyptian cotton was the thing to be considered—a tax for which he and every other man on the other side of the Senate Chamber has voted. The proposition now is to leave these schedules open, so that an increase may be put in these rates in case this tax remains permanently in the bill.

The Senator from South Carolina [Mr. MCLAURIN] stated a while ago what we all know, that there will not be an increase of one iota in the value of cotton by reason of this tax. Yet here is a proposition presented to us now that if we leave this tax standing, if it goes through the conference committee and remains in the bill, there must be a compensating tax paid upon it just as there is in the bill now in the wool schedule for tariffs never paid. It is that sort of thing that I object to, and that is the unfairness of the thing, which, it seems to me, ought to excite the indignation of all members of the Senate.

The VICE-PRESIDENT. The question is on the adoption of the amendment proposed by the committee.

Mr. JONES of Arkansas. Let us have the yeas and nays on that.

The yeas and nays were ordered.

Mr. COCKRELL. Let the amendment be stated.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. It is proposed to insert as a new paragraph at the bottom of page 103 the following:

319½. On all cotton yarns finer than No. 10 single, and on all manufactures of cotton made in whole or in part from cotton yarns finer than No. 10 single, there shall be levied and collected 10 per cent ad valorem in addition to the appropriate rates of duty provided therefor in paragraphs 301 to 319, inclusive, or in any other paragraph of this act providing for such manufactures.

The VICE-PRESIDENT. The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. GEAR (when his name was called). I transfer my pair with the Senator from New Jersey [Mr. SMITH] to the Senator from Massachusetts [Mr. LODGE], and vote "yea."

Mr. HANSBROUGH (when his name was called). I am paired with the senior Senator from Virginia [Mr. DANIEL], and therefore withhold my vote.

Mr. VEST (when his name was called). I have a general pair with the Senator from Minnesota [Mr. NELSON].

I wish to state that I may, through inadvertence, have voted this afternoon when the Senator from Minnesota was absent. If so, I apologize for it now. I should vote "nay" on this proposition if he were here.

The roll call was concluded.

Mr. JONES of Arkansas (after having voted in the negative). I am paired with the Senator from Maine [Mr. HALE], and withdraw my vote.

Mr. GRAY (after having voted in the negative). I inquire if the junior Senator from Illinois [Mr. MASON] has voted?

The VICE-PRESIDENT. He has not voted.

Mr. GRAY. I have a temporary pair with that Senator, and therefore withdraw my vote.

Mr. CLAY. I transfer my pair with the Senator from Massachusetts [Mr. LODGE] to the Senator from New Jersey [Mr. SMITH], and vote "nay."

Mr. BATE. I desire to state that my colleague [Mr. HARRIS] is unavoidably detained from the Chamber. He is paired with the Senator from Vermont [Mr. MORRILL].

Mr. CLAY. I have been requested to announce that the junior Senator from Delaware [Mr. KENNEY] is paired with the junior Senator from Pennsylvania [Mr. PENROSE].

The result was announced—yeas 31, nays 26; as follows:

YEAS—31.

Allison,	Foraker,	Mantle,	Shoup,
Burrows,	Frye,	Perkins,	Spooner,
Carter,	Gallinger,	Platt, Conn.	Stewart,
Chandler,	Gear,	Platt, N. Y.	Thurston,
Cullom,	Hanna,	Pritchard,	Wellington,
Davis,	Hawley,	Proctor,	Wetmore,
Deboe,	Hoar,	Quay,	Wilson.
Fairbanks,	McBride,	Sewell,	

NAYS—26.

Bacon,	Gorman,	Mitchell,	Teller,
Bate,	Heitfeld,	Morgan,	Tillman,
Berry,	McEnery,	Murphy,	Turpie,
Butler,	McLaurin,	Pasco,	Walthall,
Chilton,	Mallory,	Pettus,	White.
Clay,	Martin,	Rawlins,	
Cockrell,	Mills,	Roach,	

NOT VOTING—32.

Aldrich,	Faulkner,	Jones, Nev.	Nelson,
Allen,	George,	Kenney,	Penrose,
Baker,	Gray,	Kyle,	Pettigrew,
Caffery,	Hale,	Lindsay,	Smith,
Cannon,	Hansbrough,	Lodge,	Turner,
Clark,	Harris, Kans.	McMillan,	Vest,
Daniel,	Harris, Tenn.	Mason,	Warren,
Elkins,	Jones, Ark.	Morrill,	Wolcott.

So the amendment was agreed to.

The Secretary proceeded to read "Schedule J.—Flax, hemp, and jute, and manufactures of."

Mr. PETTIGREW. I ask that paragraphs 320 to 325, inclusive, of that schedule, be passed over temporarily until to-morrow morning. There are some Senators absent who, I think, desire to be present when those paragraphs are considered.

Mr. ALLISON. I have no objection to passing them over until to-morrow morning, but I think we ought to consider them in connection with the remainder of the schedule.

Mr. JONES of Arkansas. We on this side of the Chamber should be glad to know what arrangement is being made on the other side.

Mr. ALLISON. The Senator from South Dakota [Mr. PETTIGREW] has asked that paragraphs 320 to 325, inclusive, be passed over until to-morrow morning, and I stated that I had no objection, but I thought they ought to be considered in connection with the remainder of this schedule.

Mr. WHITE. I hope the Senator will allow that schedule to go over until to-morrow. I have some references and data which I wish to present to the Senate, and as we are passing over these paragraphs it appears to me we might as well let them all go over. My data are not here. I did not expect that we should reach the schedule to-day. We are making quite rapid progress, more so really than could have been anticipated, I presume, by anybody.

Mr. ALLISON. If it is the wish of other Senators on the opposite side, as well as of the Senator from California, that the schedule be not considered to-night, I will allow the whole schedule to be passed over.

EXECUTIVE SESSION.

Mr. MORGAN. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After twelve minutes spent in executive session the doors were reopened, and (at 4 o'clock and 30 minutes p. m.) the Senate adjourned until to-morrow, Friday, June 18, 1897, at 11 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate June 17, 1897.

COLLECTOR OF INTERNAL REVENUE.

Jacob E. Houtz, of Nebraska, to be collector of internal revenue for the district of Nebraska, to succeed James E. North, resigned.

INDIAN INSPECTOR.

Charles F. Nesler, of Newark, N. J., to be an Indian inspector, vice Province McCormick, resigned.

INDIAN AGENT.

Henry J. Cleveland, of Arizola, Ariz., to be agent for the Indians of the Pima Agency in Arizona, vice J. Roe Young, resigned.

COMMISSIONERS.

Clinton A. Snowden, of Tacoma, Wash., to be commissioner for lands of the Puyallup Indian Reservation in Washington, under the provisions of the Indian appropriation act approved June 7, 1897.

John U. Smith, of Portland, Oreg., to be a commissioner in and for the District of Alaska, to fill one of the four additional commissionerships, at points to be designated by the President, created by the act approved June 4, 1897.

William J. Jones, of Port Townsend, Wash., to be a commissioner in and for the District of Alaska, to fill one of the four additional commissionerships, at points to be designated by the President, created by the act approved June 4, 1897.

Clarence L. Chaffee, of Omaha, Nebr., to be a member of the Missouri River Commission, provided for by the act of Congress approved July 5, 1884, entitled "An act making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes," vice Richard S. Berlin.

PROMOTIONS IN THE NAVY.

Lieut. (Junior Grade) John F. Luby, to be a lieutenant in the Navy, from the 16th day of May, 1897, vice Lieut. William H. Turner, promoted.

Ensign George W. Logan, to be a lieutenant (junior grade) in the Navy, from the 16th day of May, 1897, vice Lieut. (Junior Grade) John F. Luby, promoted.

Lieut. Commander Eugene de Forrest Heald, to be a commander in the Navy, from the 4th day of June, 1897, vice Commander George E. Wingate, retired.

Lieut. George P. Colvocoresses, to be a lieutenant-commander in the Navy, from the 4th day of June, 1897, vice Lieut. Commander Eugene de Forrest Heald, promoted.

Lieut. (Junior Grade) Lewis J. Clark, to be a lieutenant in the Navy, from the 4th day of June, 1897, vice Lieut. George P. Colvocoresses, promoted.

APPOINTMENT IN THE NAVY.

Raymond Spear, a citizen of Pennsylvania, to be an assistant surgeon in the Navy, to fill a vacancy existing in that grade.

CONFIRMATIONS.

Executive nominations confirmed by the Senate June 17, 1897.

ENVOY EXTRAORDINARY AND MINISTER PLENIPOTENTIARY.

William F. Powell, of New Jersey, to be envoy extraordinary and minister plenipotentiary of the United States to Haiti.

PROMOTION IN THE MARINE CORPS.

Second Lieut. George Richards, United States Marine Corps, to be a first lieutenant.

REGISTER OF THE LAND OFFICE.

Stephen J. Weekes, of Nebraska, to be register of the land office at O'Neill, Nebr.

POSTMASTERS.

Verlin M. Scott, to be postmaster at Saltville, in the county of Smyth and State of Virginia.

Luzerne P. Harper, to be postmaster at Suffolk, in the county of Nansemond and State of Virginia.

May Mosby Campbell, to be postmaster at Warrenton, in the county of Fauquier and State of Virginia.

William C. Smith, to be postmaster at Bowie, in the county of Montague and State of Texas.

E. B. Atterbury, to be postmaster at Comanche, in the county of Comanche and State of Texas.

HOUSE OF REPRESENTATIVES.

THURSDAY, *June 17, 1897.*

The House met at 12 o'clock m. Prayer by the Chaplain, Rev. HENRY N. COUDEN.

THE JOURNAL.

The Journal of the proceedings of Monday last was read.

The SPEAKER. Without objection, the Journal as read will be approved.

Mr. SIMPSON of Kansas. I object.

Mr. SULZER. I move to correct the Journal.

Mr. PAYNE. I move that the Journal as read be approved; and as the gentleman from Kansas [Mr. SIMPSON] has not stated any particular objection to the Journal, and as I have no doubt that it is correct as read, I move the previous question on my motion.

The SPEAKER. The gentleman from New York [Mr. SULZER]——

Mr. SIMPSON of Kansas. I simply object to the approval of the Journal by unanimous consent. I demand a vote. There is no quorum present, and I want a quorum present to vote on this question.

Mr. SULZER. I move to correct the Journal.

The SPEAKER. The gentleman from New York [Mr. SULZER] desires to correct the Journal. The gentleman from New York [Mr. PAYNE] moves that the Journal be approved, and on that motion asks for the previous question.

Mr. SULZER. Mr. Speaker, on last Monday I presented to this House——

The SPEAKER. Debate is not in order.

Mr. SULZER. I move to correct the Journal.

The SPEAKER. The gentleman from New York [Mr. PAYNE] moves that the Journal be approved, and asks for the previous question.

Mr. SULZER. Is it not in order to move to correct the Journal?

Mr. BAILEY. I submit that the motion to correct the Journal has precedence over the motion to approve.

The SPEAKER. Not at all.

Mr. BAILEY. The motion to correct the Journal is a question of higher privilege than the motion to approve the Journal, because of course the House must be offered an opportunity to have the Journal corrected before it is called upon to approve it.

The SPEAKER. But the House must also be offered an opportunity to approve the Journal, if it so wishes.

Mr. BAILEY. Undoubtedly. After the Journal is corrected, the question would come up on its approval. Otherwise this hardship would arise——

The SPEAKER. But the matter is entirely under the control of the House. If it chooses to vote down the previous question, then the Journal will be open to amendment.

Mr. BAILEY. But the House ought not to be compelled to vote upon the approval of the Journal until it has been informed of the particular in which the Journal is claimed to be incorrect.

The SPEAKER. The rule is the other way.

Mr. SULZER. I rise to a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. SULZER. Is it not good parliamentary law that the Journal must be corrected before it is approved; and does not a motion to correct the Journal take precedence of a motion to approve it?

The SPEAKER. It does not.

Mr. BAILEY. Mr. Speaker, without any intention to be merely factious about this matter, I feel so certain that the ruling of the Chair is incorrect that I shall be compelled to appeal from it. Upon that appeal I desire simply to say this, that both the motion to correct and the motion to approve——

The SPEAKER. This question is not debatable. The previous question has been called.

Mr. BAILEY. On the question of approval.

The SPEAKER. Yes, sir.

Mr. BAILEY. The Chair holds, as I understand, that the motion to correct can not be submitted while the motion to approve is pending.

The SPEAKER. It is simple parliamentary law, and has always been the rule of the House, that a motion to approve the Journal takes precedence of a motion to amend, when first moved.

Mr. BAILEY. And I have a right to appeal from the decision of the Chair.

The SPEAKER. And the House has an entire right to pass upon the question.

Mr. BAILEY. But I have a right to appeal from the decision of the Chair.

The SPEAKER. But that appeal, pending the previous question, must be determined without debate.

Mr. BAILEY. That is true, Mr. Speaker; I concede that point.

The SPEAKER. Certainly. Now, the gentleman from Texas makes the point of order that the motion to amend the Journal has precedence over a motion to approve it——

Mr. BAILEY. "To correct the Journal" was the gentleman's proposition.

The SPEAKER. "To amend the Journal" is the correct technical expression. The gentleman from Texas makes the point that the motion to amend has precedence over the motion to approve. The Chair decides that the point of order is not well taken: and from that ruling the gentleman from Texas appeals. The question is, Shall the decision of the Chair stand as the judgment of the House?

Mr. PAYNE. Mr. Speaker, would it be in order to move to lay the appeal on the table?

The SPEAKER. It would.

Mr. BAILEY. Then it must have been in order to have debated the appeal.

The SPEAKER. Certainly not, because the motion to lay on the table is not debatable under any circumstances.

Mr. BAILEY. I would appeal from that decision but for the fact that only one appeal can be pending at the same time.

The SPEAKER. That seems to be one good reason. [Laughter.]

The question being taken on the motion of Mr. PAYNE to lay the appeal on the table, there were—ayes 83, noes 77.

Mr. BAILEY. I call for tellers.

Mr. PAYNE. I ask for the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 96, nays 80, answered "present" 16, not voting 161; as follows:

YEAS—96.

Alexander,	Dingley,	Joy,	Royse,

So the appeal from the decision of the Chair was laid on the table.

Before the result of the vote was announced,

Mr. HICKS. Mr. Speaker, I am paired with the gentleman from Virginia, Mr. OTEY. I wish to withdraw my vote and answer "present."

Mr. KING. I have voted "no," but find I am paired with the gentleman from New Hampshire, Mr. CLARKE. I therefore desire to withdraw my vote and be marked "present."

Mr. BROSIUS. As I am paired, I wish to withdraw my vote and answer "present."

Mr. RHEA of Kentucky. As I am paired with my colleague from Kentucky, Mr. PUGH, I wish to withdraw my vote in the negative and be marked "present."

Mr. BELKNAP. I have voted "aye," but find that I am paired with the gentleman from California, Mr. MAGUIRE. I wish, therefore, to withdraw my vote and be recorded as "present."

Mr. GAINES. As I am paired with the gentleman from Vermont, Mr. POWERS, I wish to withdraw my vote, which I have cast in the negative, and be marked "present."

Mr. WHEELER of Alabama. Mr. Speaker, I rise to a parliamentary inquiry. At what time can a member be recorded as present? Can it be done at any time after the roll is called if he is paired?

The SPEAKER. The Chair is inclined to think not, following the spirit of the rule which requires a member to vote when his name is called. But if a member has been put down by the Clerk as "present," he has afterwards the right to withdraw that response and to vote. The case is different, however, where he has failed to respond. That is the present impression of the Chair, subject to any revision which may seem hereafter to be necessary.

Mr. WHEELER of Alabama. I think the Chair is right; I simply wanted the statement of the Chair on that point.

The following pairs were announced:

Until further notice:

Mr. MCCLEARY with Mr. TALBERT.

Mr. MITCHELL with Mr. TAYLOR of Alabama.

Mr. OTJEN with Mr. LESTER.

Mr. HOPKINS with Mr. MCALEER.

Mr. REEVES with Mr. BALL.

Mr. HENRY of Indiana with Mr. MIERS of Indiana.

Mr. DANFORD with Mr. TERRY.

Mr. POWERS with Mr. GAINES.

Mr. DORR with Mr. MADDOX.

Mr. HOOKER with Mr. CATCHINGS.

Mr. DE ARMOND with Mr. GILLETT of Massachusetts.

Mr. GROUT with Mr. BERRY.

Mr. HEMENWAY with Mr. ROBERTSON of Louisiana.

Mr. FISCHER with Mr. STALLINGS.

Mr. LANDIS with Mr. CRAWFORD.

Mr. DAVIDSON of Wisconsin with Mr. HOWARD of Georgia.

Mr. BELDEN with Mr. CARMACK.

Mr. QUIGG with Mr. BLAND.

Mr. HULL with Mr. DOCKERY.

Mr. MINOR with Mr. SPARKMAN.

Mr. MCCALL with Mr. JONES of Virginia.

Mr. YOUNG of Pennsylvania with Mr. BENTON.

Mr. BELKNAP with Mr. MAGUIRE.

Mr. FARIS with Mr. ZENOR.

Mr. SOUTHARD with Mr. NORTON.

Mr. BARROWS with Mr. JETT.

Mr. HAWLEY with Mr. SWANSON.

Mr. MCEWAN with Mr. VEHSLAGE.

Mr. SPRAGUE with Mr. LENTZ.

Mr. ALEXANDER with Mr. STARK.

Mr. ACHESON with Mr. WILSON of South Carolina.

Mr. CHICKERING with Mr. BRADLEY.

Mr. SAUERHERING with Mr. STRAIT.

Mr. LOVERING with Mr. WHEELER of Alabama.

Mr. BRUMM with Mr. COX.

Mr. MILLS with Mr. SULLIVAN.
Mr. BARHAM with Mr. FITZGERALD.
Mr. PERKINS with Mr. COOPER of Texas.
Mr. CLARKE of New Hampshire with Mr. KING.
Mr. STEVENS of Minnesota with Mr. JONES of Washington.
Mr. HICKS with Mr. OTEY.
Mr. HEATWOLE with Mr. DINSMORE.
Mr. BROSIUS with Mr. ERMENTROUT.
Mr. KERR with Mr. ROBB.
Mr. LACEY with Mr. MCRAE.
Mr. WALKER of Massachusetts with Mr. VANDIVER.
Mr. WALKER of Virginia with Mr. SMITH of Kentucky.
Mr. WHITE of Illinois with Mr. BRENNER of Ohio.
Mr. STEWART of Wisconsin with Mr. LITTLE.
Mr. SMITH of Illinois with Mr. ALLEN.
For this day:
Mr. ODELL with Mr. FITZPATRICK.
Mr. GROSVENOR with Mr. RIXEY.
Mr. BARNEY with Mr. TODD.
Mr. MARSH with Mr. COONEY.

The result of the vote was then announced as above stated.

The question being taken on ordering the previous question, Mr. SULZER demanded a division.

The House divided; and there were—ayes 84, noes 53.

Mr. SULZER. Yeas and nays, Mr. Speaker.

The yeas and nays were refused, 7 members, not a sufficient number, rising in support of the demand therefor.

Mr. SULZER. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. SULZER. If the previous question is ordered, are we not entitled to twenty minutes on each side to debate the main question?

The SPEAKER. The Chair thinks there was no debate.

Mr. DALZELL. Yes; there was debate.

Mr. PAYNE. I debated the question myself.

The SPEAKER. The Chair understands there was debate. In that case further debate would not be in order, under the rule, after the previous question is ordered.

Mr. MCMILLIN. Mr. Speaker, I think on an examination of the RECORD, it will be found that the question was not debated in the sense that would preclude the debate contemplated by the rule. There was a controversy among a number of gentlemen on parliamentary questions, but the main question was not discussed on its merits.

The SPEAKER. On this question the ayes have it, and the previous question is ordered. The question is on the motion that the Journal be approved.

Mr. SULZER. Mr. Speaker——

The question was taken; and on a division (demanded by Mr. BAILEY) there were—ayes 83, noes 71.

Mr. BAILEY. Tellers, Mr. Speaker.

Mr. DALZELL. We may as well have the yeas and nays, Mr. Speaker.

The yeas and nays were ordered.

The question was taken; and there were—yeas 95, nays 76, answered "present" 18, not voting 164; as follows:

YEAS—95.

So the Journal was approved.

The Clerk announced the following additional pairs:

Until further notice:

Mr. MCINTIRE with Mr. MAGUIRE.

Mr. PUGH with Mr. RHEA of Kentucky.

Mr. COCHRAN of Missouri. Mr. Speaker, I desire to know if I am recorded.

The SPEAKER. The gentleman from Missouri is not recorded.

Mr. COCHRAN of Missouri. My attention was diverted to something else and I did not hear my name called. I desire to vote "no."

The SPEAKER. Was the gentleman listening at the time when his name should have been called, and did he fail to hear it?

Mr. COCHRAN of Missouri. Yes; I was in the Hall, trying to listen. I suppose that my attention was attracted by something else.

The SPEAKER. The Chair wants the gentleman from Missouri to understand the matter. The only ground on which a vote has been permitted by the House under the rule, after the completion of the call, is where there is reason to suppose that the name of the member may not have been called.

Mr. COCHRAN of Missouri. Well, I did not hear my name called. I was in the Chamber and did not hear it. I was here for the purpose of voting, and for no other purpose. So I suppose that the noise or something must have diverted my attention from it.

The SPEAKER. The gentleman understands the matter now. The Clerk will call his name and he will vote or not, as he deems proper.

The Clerk called the name of Mr. COCHRAN of Missouri, and he voted in the negative.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PLATT, one of its clerks, announced that the Senate had passed the bill (S. 2150) to amend an act entitled "An act to provide for the entry of lands in Greer County, Okla., to give preference rights to settlers, and for other purposes," approved January 18, 1897; in which the concurrence of the House was requested.

GREER COUNTY, OKLA.

Mr. LACEY. Mr. Speaker, I desire to call up the bill (S. 2150) received from the Senate this morning and ask consent for its immediate consideration.

The SPEAKER. The gentleman from Iowa asks unanimous consent for the present consideration of the bill which the Clerk will read.

The Clerk read as follows:

A bill (S. 2150) to amend an act entitled "An act to provide for the entry of lands in Greer County, Okla., to give preference rights to settlers, and for other purposes," approved January 18, 1897.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the time for the exercise of the preference right of entry granted to bona fide occupants of land within the territory established as Greer County, Okla., by section 1 of an act entitled "An act to provide for the entry of lands in Greer County, Okla., to give preference rights to settlers, and for other purposes," approved January 18, 1897, be, and the same is hereby, extended to January 1, 1898.

Mr. SULZER. Mr. Speaker——

The SPEAKER. The gentleman from Iowa asks unanimous consent for the present consideration of the bill which has been reported by the Clerk.

Mr. SULZER. Before I object, I desire to submit a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. SULZER. Mr. Speaker, on Monday last I had the honor to present to this House a monster petition, with hundreds of thousands of names——

Mr. DINGLEY. The gentleman seems to be debating the matter.

Mr. SULZER (continuing). Of citizens of the United States favoring the granting of belligerent rights to the Cuban patriots.

The SPEAKER. Will the gentleman state his parliamentary inquiry?

Mr. SULZER. My parliamentary inquiry is, What has become of that monster petition? [Laughter.]

The SPEAKER. That is a physical question rather than a parliamentary inquiry. [Laughter.]

Mr. LACEY. I trust that the suffering settlers in Oklahoma will not be prejudiced by a discussion of the Cuban question.

Mr. LIVINGSTON. Reserving the right to object, I desire to ask the gentleman what is the necessity for this extension of time?

Mr. LACEY. I made a full statement of this matter on last Monday, but objection was made, inadvertently, I think, by one gentleman on the other side, who afterwards attempted to withdraw the objection, but the attempt was not made until the House was dividing on a motion to adjourn. The situation, I will briefly state, is this——

Mr. LIVINGSTON. Never mind.

Mr. LACEY. Perhaps some other member of the House would like to hear an explanation of the matter. I will very briefly outline the occasion for this action——

Mr. GAINES. Will you allow any debate on your question?

Mr. LACEY (continuing). And that is this: A bill was passed in the last Congress allowing settlers in Greer County who had obtained their claims through the State of Texas six months in which to prove up their rights to the land in that county. There are 3,200 of these families in this condition. The register and receiver for that land office were not appointed until within the last few weeks, and the office can not be opened until the 1st day of July. The result will be that the 3,200 proofs that must be filed by these heads of families can not be made in the eighteen days intervening before the expiration of the six months allowed by the last Congress for the completion of those claims; and Congress is asked to give six months additional, a sufficient time to do that; and I hope no one will interpose an objection. The Senate has passed the bill, and we ought to pass it promptly.

Mr. LANHAM. This is a Senate bill, and is of the same purport as the bill offered by the gentleman the other day.

Mr. LACEY. It has the same object as that bill.

Mr. LANHAM. And the object of this is simply to give bona fide, actual settlers of Greer County additional time in which to prove up their homestead rights.

Mr. LACEY. It is to give them the same time that they would have had if the register and receiver had been appointed last January, as Congress intended they should be; but as they have not been appointed until this time, it is necessary to make an extension of the time, otherwise it is utterly impossible for the settlers to comply with the act of the 18th of January last.

Mr. LANHAM. This is a meritorious bill, and I trust no one will object.

Mr. LACEY. I think it is a meritorious bill.

Mr. McMILLIN. I will ask the gentleman has this bill been referred to any committee of the House?

Mr. LACEY. I think I have heard that question submitted by the gentleman on a previous occasion.

Mr. McMILLIN. And you are liable to hear it again.

Mr. LACEY. This has not been referred to a committee, as we do not have committees.

Mr. McMILLIN. I think the gentleman voted against having committees to which this might have been referred.

Mr. LACEY. That brings up another question that I have very decided views upon, in which I presume I would not agree with my friend.

Mr. LANHAM. I hope the bill will be allowed to pass.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. SULZER. I should like to ask the gentleman a question.

Mr. LACEY. Certainly.

Mr. SULZER. Will the gentleman permit this bill to be debated ten minutes on a side?

Mr. LACEY. Unquestionably, if it is desired.

Mr. McMILLIN. If the gentleman does not demand the previous question, it is subject to debate, and a gentleman being recognized can hold the floor for an hour.

Mr. SULZER. Will the gentleman withhold the demand for the previous question on this bill and permit it to be debated?

Mr. LACEY. I do not desire to make any bargain with my friend from New York.

The SPEAKER. Is there objection?

Mr. McMILLIN. I think the gentleman might at least allow a reasonable debate on any question at this time.

Mr. LACEY. "The gentleman" has nothing to do with the allowing of debate. That is a matter for the House to determine.

Mr. GAINES. The gentleman says he has nothing to do with allowing debate. If this is a meritorious bill, why do you cut off debate? It seems to me there ought to be full enough debate to ascertain the purposes and effect of the bill.

Mr. SULZER. The gentleman says that he does not want to make a bargain with me, yet he asks me to make no objection, and still wants to pass the bill without debate.

Mr. LACEY. I will say to the gentleman that this is a question involving 3,200 settlers in Oklahoma who have homes and desire to save them.

Mr. GAINES. Is it not perfectly proper that we should have an opportunity to discuss a proposition for the benefit of many people who have no homes?

Mr. LACEY. Let us dispose of these homes.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. SULZER. Mr. Speaker, I do not want to object——

The SPEAKER. The Chair hears no objection. [Laughter.]

Mr. LACEY. Mr. Speaker, the gentleman from New York [Mr. SULZER] feels, I understand, a profound interest in the settlers of Oklahoma, and I yield him five minutes.

A MEMBER. Give him ten.

Mr. SULZER. Mr. Speaker, in the few moments given to me by the gentleman from Iowa [Mr. LACEY] I desire to speak for Cuban liberty. On Monday last I had the honor to present to this House——

Mr. WILLIAM A. STONE. Will the gentleman allow me a question?

Mr. SULZER. I have only five minutes. The gentleman can have all the time he wants after I conclude.

The SPEAKER. The gentleman from New York [Mr. SULZER] is entitled to the floor upon the pending bill.

Mr. SULZER. Mr. Speaker, to continue, on Monday last I had the honor to present to this House a monster petition signed by hundreds of thousands of citizens of the United States——

Mr. WILLIAM A. STONE. It is on just that point I wanted to ask the gentleman a question.

Mr. SULZER (continuing). Requesting this House to pass Senator MORGAN'S resolution granting belligerent rights to the Cuban patriots. That resolution came over to this House several weeks ago. It passed the Senate by an overwhelming vote. I am informed it has never been referred to the Committee on Foreign Affairs, because the Committee on Foreign Affairs has never been appointed.

We are wasting time here day in and day out while hundreds and hundreds of American citizens are languishing in Cuban jails for no offense whatever. Our trade with Cuba ruined, our flag fired upon, our citizens robbed, insulted, and assassinated, or driven like wild beasts from their homes and farms in the interior of Cuba to the Spanish fortified towns on the coast to starve, to sicken, and to die! The history of the last two years' struggle in Cuba is the saddest in all the annals of the world. It is high time this great Government should protect its citizens and their property in Cuba. It is high time we should intervene in the name of humanity, civilization, and Christianity, and put a stop to this brutal, bloody, devastating carnage.

These citizens of the United States in Cuba look to this country for their rights and protection. Apparently they look in vain. The flag of their country, which should protect them, is spit upon by the brutal Spaniards. These cruel and bloodthirsty Spaniards trample our flag in the dust, ignore treaty rights, and bid defiance to this great Republic.

It is time for us to act. If we do not, we will stand disgraced in the opinion of our own liberty-loving citizens and before the Christian powers of the world. If we do not put a stop to the

fiendish barbarities and refined cruelties of these Spanish brigands, our boasted republicanism will become a byword and our flag of freedom a reproach and a farce. How long shall we submit? How much longer shall we permit poor Cuba to be a human shamble?

I desired to-day to correct the Journal of the House in regard to the petition I presented. Parliamentary tactics precluded that. We do not know what has become of that great petition in favor of "Cuba Libre." The House Journal simply says: "To the Committee on Foreign Affairs." That can not be a fact, for the reason that the Committee on Foreign Affairs has not been appointed. It should have been appointed long ago. The joint resolution of that venerable Senator and friend of humanity, Mr. MORGAN, granting belligerent rights to the Cubans, should be speedily submitted to a vote of this House. Some one is responsible for its suppression. Somebody is responsible for its delay. Who is the man?

The Cuban cause is the cause of liberty. By the grace of God it will and must triumph.

The American people to-day are in favor of granting to the Cuban patriots belligerent rights. If that question could be submitted to the people of this country, they would decide in favor of it by an overwhelming majority. The American people would like to know why the resolution of Senator MORGAN lies on the Speaker's desk. They would like to know why no action has been taken by this House on that joint resolution of belligerency. If there is "hell on earth," as John Sherman said when he was in the Senate, it is in Cuba. Does he believe that to-day? If so, then why does he not act? We send relief to India; we sympathize with the Greeks; but we allow our citizens to be butchered, murdered, and assassinated in Cuba without a protest.

The policy of that great assassin, Weyler, the greatest thief, the greatest coward, the greatest brute, the greatest liar, the greatest murderer, the greatest enemy to humanity the world has ever known, is devastating the fairest island in the world within gunshot of our own shores, and exterminating as brave a people battling for freedom and for independence as ever fought for self-government on the face of the earth. If that resolution of belligerency could be submitted to this House, I have every reason to know that it would pass by an overwhelming vote. The American people want Cuba to be free. They will see to it sooner or later that Cuba is free. I do not know who retards the joint resolution. I do not know who is responsible for the delay in procuring action upon it; but I do know that the day of reckoning is not far distant, and the American people, who sympathize with those brave and struggling Cuban patriots, will hold some one responsible. And woe to that man!

I saw in a newspaper yesterday that the President of the United States was in sympathy with the Cuban patriots; that he wanted them to succeed and achieve their independence, as our forefathers achieved their independence. I hope that is true. I am in favor of his policy to annex the Hawaiian Islands; but before the Hawaiian Islands are annexed I hope the President will take some action to make Cuba free and independent. He could not do a more popular thing. I read from an editorial in last evening's Washington Times this statement:

On Monday last a petition from 600,000 American citizens asking recognition of Cuban belligerency was presented——

The SPEAKER. The gentleman's time has expired.

Mr. SULZER. I ask unanimous consent to occupy five minutes more.

Objection was made.

Mr. LACEY. I yield one minute to the gentleman from Pennsylvania [Mr. WILLIAM A. STONE].

Mr. SULZER. I ask unanimous consent to incorporate in my remarks this little editorial in the Washington Times of last night about the suppression of the House of Representatives——

The SPEAKER. The gentleman from Pennsylvania [Mr. WILLIAM A. STONE] is entitled to the floor.

Mr. WILLIAM A. STONE. Mr. Speaker, I believe no member of this House has more sympathy with the struggling Cubans than I have——

The SPEAKER. The Chair hopes the gentleman will confine himself to the subject under discussion, which is a bill in reference to lands in Greer County, Okla.

Mr. WILLIAM A. STONE. I shall endeavor to do so.

The SPEAKER. The Chair hopes the gentleman will.

Mr. WILLIAM A. STONE. But in endeavoring to do that, I wish to correct a statement made by the gentleman who last occupied the floor. He stated here that the petition to which he alluded contained hundreds of thousands of signatures. The clerks have, out of curiosity, counted the names, and there are just 14,560 names upon it.

Mr. SULZER. I challenge that statement.

The SPEAKER. The gentleman is not in order. The time of the gentleman from Pennsylvania has expired.

Mr. LACEY addressed the Chair.

The SPEAKER. The gentleman from Iowa.

Mr. SULZER attempted to address the Chair.

The SPEAKER. The gentleman will please be in order.

Mr. LACEY. Mr. Speaker, in making figures of speech, of course a great deal of latitude is allowed; and I trust the gentleman from Pennsylvania will not too severely criticise the gentleman from New York [Mr. SULZER] when he estimates that 15,000——

The SPEAKER. The Chair hopes the gentleman from Iowa will be in order.

Mr. LACEY. Now, Mr. Speaker, I believe that this House fully understands the nature of the bill before it. There seems to be practically nobody opposed to the bill, and therefore I move the previous question.

Mr. McMILLIN. I wish to ask the gentleman in charge of this bill whether there was a report made on this question in the last Congress?

Mr. LACEY. Oh, yes.

Mr. McMILLIN. Will the gentleman please have that report read? The House ought to know something about this question before acting upon it.

Mr. LACEY. I have stated the substance of the report——

Mr. McMILLIN. If we can not secure the appointment of committees, we should at least have matters discussed intelligently when brought here.

Mr. LACEY. I have stated the substance of the report, which was made in connection with what has been known as the Greer County legislation. There were several bills introduced on the subject. If the gentleman has followed this land legislation, as I think perhaps he has——

Mr. McMILLIN. I did.

Mr. LACEY. He will remember that the whole matter was very fully discussed in the House, and what was known as the Cockrell bill, I think, was the one which we finally passed—a bill prepared by Mr. Cockrell, of Texas, who formerly represented the district embracing these Greer County lands when they were supposed to belong to the State of Texas. A good deal of time was spent on the bill; the questions involved in it were thoroughly reported upon and discussed. There is nothing proposed now in this Senate bill embodying an amendment to the existing law, except simply to grant such an extension of time as will allow to these settlers the period provided for in the original bill.

Mr. McMILLIN. There was some confusion in the House when the bill was read and I was unable to understand the period of extension. How much additional time is granted?

Mr. LACEY. Six months.

Mr. McMILLIN. Six months was the time originally granted?

Mr. LACEY. This bill will give a little less than six months. The former bill gave until the 18th of July; but the land office will not be open until about the 1st of July, so that these settlers under existing law would have only eighteen days instead of the six months originally intended.

Mr. McMILLIN. At what period of the last session was the bill passed?

Mr. LACEY. Early in the session.

Mr. LIVINGSTON. In January.

Mr. LACEY. On the 18th of January the bill became a law. There was ample time if the appointments of the land officers had been promptly made. But, as will be remembered, President Cleveland was to retire from office on the 4th of March under somewhat disadvantageous circumstances, and it was a little difficult, I believe, for him to select out of the patriots on the other side the men to fill these offices.

Mr. McMILLIN. There ought to be no difficulty over a matter of that kind.

Mr. LACEY. In point of fact, President Cleveland did not before retiring make any selection for any of these places.

Mr. CUMMINGS. It was no fault of these people who settled upon these lands that their claims were not filed, was it?

Mr. LACEY. Oh, no; not at all.

Mr. CUMMINGS. It was the fault of the Government?

Mr. LACEY. Well, I do not know that anybody was specially to blame. At any rate, we are confronted with these facts——

Mr. CUMMINGS. The President of the United States must have been to blame, because he did not appoint the officers who could have recorded these claims.

Mr. LACEY. Well, he was very busy. He was getting ready to retire.

Mr. CUMMINGS. Why should these people suffer by his laches?

Mr. LACEY. They should not; and we are trying by this bill to give them relief. I move the previous question.

The bill was ordered to a third reading, read the third time, and passed.

On motion of Mr. LACEY, a motion to reconsider the last vote was laid on the table.

FOREIGN EXHIBITORS AT OMAHA EXPOSITION.

Mr. MERCER. I desire unanimous consent for the consideration of Senate resolution No. 50. This is a joint resolution which passed the Senate some days ago—simply a pro forma resolution with reference to the admission of Chinese and other laborers in connection with the foreign exhibits at the Omaha Exposition.

The Clerk proceeded to read the joint resolution (S. R. 50) authorizing foreign exhibitors at the Transmississippi and International Exposition, to be held in the city of Omaha, in the State of Nebraska, during the year 1898, to bring to the United States foreign laborers from their countries, respectively, for the purpose of preparing for and making exhibits.

Mr. DINGLEY (before the reading of the joint resolution was concluded). Mr. Speaker, I interrupt the reading to call the attention of the gentleman from Nebraska [Mr. MERCER] to the fact that within three or four days a communication has been received from the Secretary of the Treasury (my attention was not called to this matter until a moment ago) with reference to these admissions of Chinese, saying that there have been great abuses growing out of such permissions, and that in future legislation it would be desirable to have certain amendments adopted to the law. Now, as long as the Committee on Ways and Means has jurisdiction of this question, I suggest that the resolution go to that committee, so that the question may be examined. The committee can report at any time upon the resolution. In this way we can be assured that any door for abuses will be closed.

Mr. MERCER. I would say to the gentleman from Maine [Mr. DINGLEY] that I understood that before this resolution passed the Senate it was so amended, on motion of the Senator from Massachusetts [Mr. HOAR], as to cover this point.

Mr. DINGLEY. If that has been done, I have no objection.

Mr. MERCER. I think it has been done.

Mr. DINGLEY. I call attention to the fact that the Secretary of the Treasury has written a communication referring to these abuses.

Mr. BAILEY. I will suggest that there is a committee to which this resolution can properly be referred—that it would properly go to the Committee on Ways and Means; and if there is any danger of an abuse growing out of any suspension of our alien contract-labor laws, I shall insist on the resolution going to that committee.

Mr. MERCER. Mr. Speaker, rather than permit an abuse of that kind, I will accede to the request of the gentleman from Maine [Mr. DINGLEY].

Mr. DINGLEY. I think that would be better. There will be no difficulty about it. It can be reported back promptly.

The SPEAKER. The resolution will be referred to the Committee on Ways and Means.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:

To Mr. STROWD of North Carolina, for two weeks, on account of important business.

To Mr. BARROWS, indefinitely, on account of representing the United States Government on the Prison Commission.

To Mr. CRUMPACKER, for ten days, on account of important business.

To Mr. MEEKISON, for ten days, on account of important business.

Mr. DINGLEY. I move that the House do now adjourn.

The question being taken, on a division (demanded by Mr. BAILEY) there were—ayes 75, noes 65.

Accordingly (at 1 o'clock and 35 minutes p. m.), the House, under the order heretofore adopted, adjourned until Monday next at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, the following executive communications were taken from the Speaker's table and referred as follows:

A letter from the Acting Secretary of the Interior, transmitting a copy of a communication, with memorial of certain freedmen of the Choctaw Nation, relating to their rights as members of that tribe—to the Committee on Indian Affairs, and ordered to be printed.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS INTRODUCED.

Under clause 3 of Rule XXII, bills, resolutions, and memorials of the following titles were introduced and severally referred as follows:

By Mr. BELL: A bill (H. R. 3484) to amend section 2323 of the Revised Statutes of the United States, relative to tunnel rights—to the Committee on Mines and Mining.

By Mr. SHAFROTH: A bill (H. R. 3485) to grant the arid lands of the United States to the respective States in which they are situate—to the Committee on the Public Lands.

By Mr. STOKES: A joint resolution (H. Res. 65) proposing an amendment to the Constitution, authorizing a tax upon incomes—to the Committee on Ways and Means.

By Mr. EVANS: A joint resolution (H. Res. 66) authorizing the President to alter, modify, amend, or revoke the classifications and rules regulating the classified civil service—to the Committee on Reform in the Civil Service.

By Mr. LEWIS of Washington: A resolution (House Res. No. 58) seeking information from the honorable Speaker of the House of Representatives as to the status of the organization of the House and the appointment of regular committees for legislative work, as provided by law—to the Committee on Rules.

By Mr. JONES of Washington: A memorial of the legislature of the State Washington, urging the establishment of a national soldiers' home upon the site of Fort Sherman—to the Committee on Military Affairs.

Also, a memorial of the legislature of the State of Washington, relative to forest reservations in the State of Washington—to the Committee on the Public Lands.

Also, a memorial of the legislature of the State of Washington, relative to William A. Newell—to the Committee on Interstate and Foreign Commerce.

Also, a memorial of the legislature of the State of Washington, asking an appropriation for harbor and light-house at the mouth of the Quillayute River—to the Committee on Interstate and Foreign Commerce.

Also, a memorial of the legislature of the State of Washington, in relation to the survivors of the Indian war of 1855 and 1856 in the Territory of Washington—to the Committee on War Claims.

By Mr. STEWART of Wisconsin: A memorial of the legislature of Wisconsin, for the passage of an act to strengthen the public credit—to the Committee on Ways and Means.

By Mr. MCALEER: A memorial of the legislature of Pennsylvania, for the reappointment and retirement of Capt. McMurtrie Gregg—to the Committee on Military Affairs.

PRIVATE BILLS AND RESOLUTIONS INTRODUCED.

Under clause 1 of Rule XXII, private bills and resolutions of the following titles were introduced and severally referred as follows:

By Mr. BERRY: A bill (H. R. 3486) to allow the distillery of the New England Distilling Company and the rectifying house of Mullins & Crigler, both situated in Covington, Ky., to be operated within 600 feet of each other—to the Committee on Ways and Means.

By Mr. CLARDY: A bill (H. R. 3487) for increase of pension of John W. Majors—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3488) for increase of pension of A. B. Van Cleve—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3489) to pension Georgia Moseley, widow of John W. Moseley—to the Committee on Invalid Pensions.

By Mr. COUSINS: A bill (H. R. 3490) to remove the charge of desertion from the military record of Wilson Certain—to the Committee on Military Affairs.

By Mr. FISCHER: A bill (H. R. 3491) to pay John Pope Hodnett for services rendered as counsel to the Government in the investigation into affairs of the District of Columbia, acting as such counsel by order of a resolution of the House of Representatives; also for acting as counsel for the workingmen of the District of Columbia for fifteen years last past—to the Committee on Claims.

By Mr. SULLOWAY: A bill (H. R. 3492) to increase the pension of Susan D. Yates—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3493) granting a pension to Ellen M. Gray—to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, the following petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. BARTLETT: Petitions of the Daunenberg Company and E. B. Harris & Co., of Macon, Ga., protesting against a tariff on goatskins—to the Committee on Ways and Means.

By Mr. BROSIUS: Resolutions of select and common councils of the city of Philadelphia, Pa., asking for the passage of the tariff bill—to the Committee on Ways and Means.

Also, resolutions of the Civil Service Reform Association of Brooklyn, N. Y., protesting against the proposal to exempt laborers and workmen of all classes from classification under civil-service law—to the Committee on Reform in the Civil Service.

By Mr. COUSINS: Paper to accompany House bill to correct the military record of Wilson Certain, late of Company A, Thirty-first Regiment Iowa Volunteers—to the Committee on Military Affairs.

By Mr. CRUMPACKER: Petition of J. Oppenheimer and 39 other citizens of Lafayette, Ind., favoring the appointment of a monetary commission—to the Committee on Banking and Currency.

By Mr. DORR: Petition of W. K. McDowell and other citizens of Rockcave, W. Va., praying for the restriction of immigration—to the Committee on Immigration and Naturalization.

By Mr. GARDNER: Petitions of citizens of Beverly, Riverside, Barnegat, Mount Holly, Glendola, and Toms River, State of New Jersey, favoring a more rigid restriction of immigration—to the Committee on Immigration and Naturalization.

By Mr. HUNTER: Petition of John Redman and other citizens of the State of Illinois, for the purchase by the Government of a formula in the possession of H. C. Fahlbush for the prevention of hog cholera—to the Committee on Agriculture.

By Mr. McALEER: Petition of the Grocers and Importers' Exchange of Philadelphia, Pa., favoring the passage of the Torrey bankruptcy bill—to the Committee on the Judiciary.

Also, petition of B. J. Hoffacker, of San Francisco, Cal., protesting against the abrogation of the Hawaiian treaty—to the Committee on Foreign Affairs.

Also, resolution of the Civil Service Executive Committee, of Philadelphia, Pa., protesting against the repeal of the civil-service law—to the Committee on Reform in the Civil Service.

Also, petition of the Edwin H. Fitler Company, of Philadelphia, favoring the passage of the Dingley tariff bill—to the Committee on Ways and Means.

Also, protest of manufacturers and dealers in refined sugars in Philadelphia, against an increase in the tax—to the Committee on Ways and Means.

Also, petition of G. A. Bisler and other business firms in various cities, asking for protection on paper boxes, etc.—to the Committee on Ways and Means.

Also, petition of importers of harness and saddlery, protesting against the passage of the Dingley bill—to the Committee on Ways and Means.

Also, petition of French, Cave & Co., of Philadelphia, Pa., protesting against changing paragraphs 2 and 67 in the Dingley tariff bill—to the Committee on Ways and Means.

Also, protest of C. Schmidt & Son, of Philadelphia, against increasing the revenue tax on beer—to the Committee on Ways and Means.

Also, resolutions of the Boston Merchants' Association, protesting against the high duties in the Dingley bill—to the Committee on Ways and Means.

Also, remonstrance of C. F. Lennig, of Philadelphia, against a tariff on plumbago—to the Committee on Ways and Means.

Also, petition of wholesale liquor dealers of Cleveland, Ohio, recommending the reduction of the tax on whisky—to the Committee on Ways and Means.

Also, petition of the Alameda Sugar Company, of San Francisco, Cal., protesting against favoritism to Hawaiian interests applying specially to the sugar schedule—to the Committee on Ways and Means.

Also, resolutions adopted by the Winter Wheat Millers' League, requesting that burlap and burlap bags and bolting cloth be placed on the free list—to the Committee on Ways and Means.

Also, petition of Kreeger & Connolly and other paper-box manufacturers of Philadelphia, asking for protection upon paper boxes—to the Committee on Ways and Means.

Also, petition of M. Carey Thomas, president of Bryn Mawr College, requesting that existing law stand so far as relates to books, maps, charts, etc.—to the Committee on Ways and Means.

Also, petition of L. W. Miller, secretary of the Art Club of Philadelphia, protesting against a tariff on works of art—to the Committee on Ways and Means.

Also, petition of Monroe Bros. & Co., of Philadelphia, protesting against a tariff on hides—to the Committee on Ways and Means.

Also, remonstrance of Arthur Spencer & Co., of Philadelphia, against increasing the tax on tea—to the Committee on Ways and Means.

Also, petition of wholesale tea dealers in the United States, favoring a specific duty on tea—to the Committee on Ways and Means.

Also, petition of the Grocers and Importers' Exchange of Philadelphia, protesting against the repeal of the drawback on tin plate—to the Committee on Ways and Means.

Also, petition of the Commercial Exchange of Philadelphia, protesting against that portion of the Dingley bill failing to give a rebate on tin plate unless manufactured in bonded factories—to the Committee on Ways and Means.

Also, resolution of the Pennsylvania Museum and School of Industrial Art, protesting against the high ad valorem duty on art—to the Committee on Ways and Means.

By Mr. McEWAN: Petition of F. E. Potter, Joseph Hampton, A. S. Brownell, and others; also petition of George H. Kupfrain, Edwin Randall, Edward Keenan, and others; also petition of W. H. Harland, jr., Robert F. Place, jr., J. R. Ewing, and others, citizens of Jersey City, N. J., in favor of the restriction of immigration—to the Committee on Immigration and Naturalization.

By Mr. ROBINSON of Indiana: Petition of Wayne Knitting Mills, of Fort Wayne, Ind., favoring the passage of a bankruptcy bill—to the Committee on the Judiciary.

SENATE.

FRIDAY, *June 18, 1897.*

The Senate met at 11 o'clock a. m.

Prayer by Rev. HUGH JOHNSTON, D. D., of the city of Washington.

On motion of Mr. QUAY, and by unanimous consent, the reading of the Journal of yesterday's proceedings was dispensed with.

DEFICIENCY APPROPRIATIONS.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of the Treasury, transmitting, for inclusion in the general deficiency appropriation bill, an estimate of deficiency to pay the amount found due by the accounting officers of the Treasury Department to the Western Union Telegraph Company for freight telegrams, etc., for the fiscal year 1896, $1,414.48; which was referred to the Committee on Appropriations, and ordered to be printed.

Mr. HALE presented a communication from the Secretary of the Treasury, transmitting a letter from the Commissioner of Internal Revenue in relation to the necessity for an emergency appropriation of $50,000 for salaries of collectors and deputy collectors of internal revenue and necessary expenses to complete the service of the current fiscal year; which, with the accompanying papers, was ordered to be printed as a document, and referred to the Committee on Appropriations.

PETITIONS AND MEMORIALS.

Mr. TELLER presented a petition of the legislature of Colorado, praying for an increase of the duty on lead in ores; which was ordered to lie on the table, and to be printed in the RECORD, as follows:

[Senate joint memorial No. 11. By Senator Wheeler.]

The senators and representatives of the State of Colorado, now in session as the Eleventh general assembly, do most respectfully memorialize our Senators and Representatives in the Senate and Congress of the United States to support the action of the lead producers of this country, and endeavor to have incorporated into the present Dingley tariff bill, now before the United States Congress, the recommendations of such producers as to the duty of 1¼ cents per pound instead of 1 cent per pound, as now proposed, to be placed on lead in foreign ores shipped from points foreign to the United States, we appreciating and knowing it will greatly benefit the people of the State of Colorado and the United States at large to have a higher duty placed on lead in ores, thereby keeping out foreign lead ores, except when smelted in bond, and enhancing the value of lead to our home mines and miners. At the same time it would permit the successful operation of numerous lead properties in the State of Colorado and the United States that can not be mined profitably at the present time on account of the low price of lead.

Resolved, That a copy of this resolution be sent to each of our United States Senators and Representatives.

JARED L. BRUSH,
President of the Senate.
EDWIN W. HURLBUT,
Speaker of the House.

Approved April 7, 1897, 4.30 p. m.

ALVA ADAMS,
Governor of the State.

Mr. TELLER presented a petition of the legislature of Colorado, praying that an appropriation be made for the erection of a United States Government building at Glenwood Springs, in that State; which was referred to the Committee on Public Buildings and Grounds, and ordered to be printed in the RECORD, as follows:

[Senate joint memorial No. 12. By Senator Taylor.]

To the honorable Senate and House of Representatives of the United States in Congress assembled:

Your memorialist, the Eleventh general assembly of the State of Colorado, hereby petitions your honorable body to pass the bill introduced by Hon. JOHN C. BELL, our Representative in Congress, providing for the erection of a United States Government building at the town of Glenwood Springs, Garfield County, Colo.

JARED L. BRUSH,
President of the Senate.
EDWIN W. HURLBUT,
Speaker of the House.

Approved April 10, 1897.

ALVA ADAMS,
Governor of the State.

Mr. TELLER presented a petition of the legislature of Colorado, praying that the mining department of the Geological Survey be strengthened, and also that provision be made for the more timely publication of the preliminary and final reports of that Department; which was referred to the Select Committee on the Geological Survey, and ordered to be printed in the RECORD, as follows:

[Joint memorial No. 2. By Senator Campbell.]

To the honorable Senate and House of Representatives of the United States of America in Congress assembled:

Your memorialists, the general assembly of the State of Colorado, now in session, petition your honorable body to make generous provision for the

branch of the United States Geological Survey which is engaged directly in examining the metalliferous districts of the States and Territories, to the end that needed surveys may be commenced or completed and the results published at the end of each season in pamphlet form, as much of the value of the information thus received depends upon its speedy publication.

It is not expected that the specialists of the survey will take the place now occupied by the prospector or the mining engineer. They should, however, understand the work of either or both of these classes of men and should furnish an accurate basis upon which that work may be founded. Let the survey stand between them and nature, demonstrating as well as may be in the absence of development where the prospector may and where he may not prospect to advantage for this or that valuable mineral.

In the absence of a Government department of mining, your memorialists believe that Congress should strengthen the mining department of the Geological Survey and provide for the more timely publication of its preliminary and final reports.

And your memorialists will ever pray.

FRANCIS CARNEY,
President pro tempore of the Senate.
EDWIN W. HURLBUT,
Speaker of the House.
ALVA ADAMS,
Governor of the State.

Mr. TELLER presented the petition of James H. Baker, president, and other members of the faculty of the University of Colorado, praying that all books, works of art, and philosophical apparatus imported into this country for the use of colleges and universities be admitted free of duty; which was ordered to lie on the table.

He also presented a petition of Branch No. 204, National Association of Letter Carriers, of Colorado Springs, Colo., praying that an appropriation be made for the payment of the judgments rendered by the Court of Claims in favor of letter carriers; which was referred to the Committee on Appropriations.

He also presented a petition of the Colorado State Cattle Growers' Association, praying for the imposition of a duty on hides; which was ordered to lie on the table.

He also presented sundry petitions of citizens of Cripple Creek, Crested Butte, Colorado Springs, and Elkton, all in the State of Colorado, praying for the enactment of legislation for a more rigid restriction of immigration; which were ordered to lie on the table.

He also presented sundry memorials of citizens of Denver, Colorado Springs, Greeley, Erie, Cripple Creek, Boulder, Lafayette, Harris, Telluride; of Sixteen to One Union, No. 63, Western Federation of Miners, of Telluride; of the Victor Trades Assembly, American Federation of Labor, of Victor; and of the International Union of Journeymen Horseshoers, of Denver, all in the State of Colorado, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

He also presented a memorial of the Colorado State Medical Society, remonstrating against the passage of Senate bill No. 1063, for the further prevention of cruelty to animals in the District of Columbia; which was ordered to lie on the table.

He also presented a petition of sundry citizens of New Mexico, praying for the abrogation of the Hawaiian reciprocity treaty; which was ordered to lie on the table.

Mr. MITCHELL presented a memorial of F. Clements & Co. and sundry other cigar manufacturers of West Superior, Wis., remonstrating against an increase of the duty on Sumatra tobacco; which was ordered to lie on the table.

He also presented a petition of the Department of Wisconsin, Grand Army of the Republic, praying for the establishment of a national military park to commemorate the siege of Vicksburg; which was referred to the Committee on Military Affairs.

He also presented a petition of the Department of Wisconsin, Grand Army of the Republic, praying for the introduction of military instruction in the public schools of the country; which was referred to the Committee on Military Affairs.

Mr. TURPIE presented memorials of E. T. Hartman and 47 other citizens; of Charles E. Stockmeyer and 51 other citizens; of H. R. Wood and 48 other citizens, and of Albert Sahm and 52 other citizens, all in the State of Indiana, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

He also presented the petition of E. L. Snyder, president of the National Wholesale Liquor Dealers' Association of America, praying that the bonded period on whiskies be reduced to three years; which was ordered to lie on the table.

Mr. McLAURIN presented a petition of the National Grange, Patrons of Husbandry, and of the National Equitable Protection Association, praying for the enactment of legislation to promote and protect the industrial interests of the country; which was ordered to lie on the table.

Mr. PETTUS presented sundry memorials of citizens of Birmingham, Ala., remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

Mr. CULLOM presented a memorial of sundry citizens of Illinois, remonstrating against the imposition of a tax on tea, and also against the proposed increase of the tax on beer; which was ordered to lie on the table.

He also presented sundry petitions of citizens of Eureka, Ottawa, Bement, Leemont, Bushnell, Springfield, and Chicago, all in the State of Illinois, praying for the early enactment of a protective-tariff law; which were ordered to lie on the table.

Mr. PROCTOR presented a memorial of the Bethel Shoe Company, of Bethel, Vt., remonstrating against an increase of the duty on tanned skins for morocco or a duty on raw goatskins; which was ordered to lie on the table.

Mr. HOAR presented a petition of 45 citizens of Bondsville, Mass., and a petition of sundry citizens of Massachusetts, praying for the early enactment of a protective-tariff law; which were ordered to lie on the table.

He also presented a memorial of sundry citizens of Massachusetts, remonstrating against any increase in the present rate of duty on tanned skins for morocco or a duty on raw goatskins; which was ordered to lie on the table.

He also presented a memorial of Hazen B. Goodrich & Co. and 104 other shoe manufacturers of Haverhill, Mass., remonstrating against any increase in the present rate of duty on India tanned skins for morocco; which was ordered to lie on the table.

He also presented a memorial of the Civil-Service Reform Association of Brooklyn, N. Y., remonstrating against the proposed amendment in the deficiency appropriation bill exempting laborers in the employ of the Government from the civil-service rules; which was referred to the Committee on Civil Service and Retrenchment.

Mr. PENROSE presented petitions of 146 citizens of Philadelphia, Pa., praying for the early passage of the pending tariff bill; which were ordered to lie on the table.

Mr. GALLINGER presented sundry petitions of citizens of Bank Village, N. H., praying for the early enactment of a protective-tariff law; which were ordered to lie on the table.

Mr. WELLINGTON presented a petition of sundry citizens of Maryland, praying for the enactment of protective-tariff legislation at the earliest possible date such as will adequately secure American industrial products against the competition of foreign labor; which was ordered to lie on the table.

He also presented sundry petitions of citizens of Prince George County, Ellerslie, Hereford, Savage, Ocean Mines, Myersville, Catonsville, Bloomington, and Baltimore, all in the State of Maryland, praying for the enactment of legislation for a more rigid restriction of immigration; which were ordered to lie on the table.

PUBLIC BUILDING AT CLEVELAND, OHIO.

Mr. HANNA. I ask that the bill (S. 1056) to provide for a public building at Cleveland, Ohio, be taken up for immediate action.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It directs the Secretary of the Treasury to purchase, acquire by condemnation, or otherwise, the block of land located in the city of Cleveland which is bounded by Rockwell street on the north, by Wood street on the east, by Superior street on the south, and on the west by the land now owned by the United States, upon which the post-office building is located, to be used in connection with the land already occupied by the post-office or Government building, as a site for a new public building, for the use and accommodation of the United States post-office, custom-house, internal-revenue office, United States circuit and district courts, signal service, pension office, and other Government offices, in the city of Cleveland, Ohio, the cost of the site and building, including fireproof vaults, heating and ventilating apparatus, elevators, and approaches, complete, not to exceed $2,500,000.

Mr. PETTUS. Are there two sections to the bill? Is there a purchasing section?

The VICE-PRESIDENT. There is only one section, divided into several paragraphs.

Mr. PETTUS. I propose as an amendment to insert the following proviso:

Provided, That the Secretary of the Treasury can purchase said property at a reasonable price.

I do not remember ever to have seen a bill of this sort specifying the property——

Mr. HANNA. I accept the amendment.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Alabama, to insert after the words "to purchase, acquire by condemnation," etc., a proviso, which will be read.

Mr. PETTUS. It is accepted by the Senator from Ohio.

The VICE-PRESIDENT. The amendment is accepted; and, without objection, it is agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

PUBLIC BUILDING AT M'KEESPORT, PA.

Mr. QUAY. I make the same request of the Senate as to the bill (S. 1272) to provide for the erection of a public building at McKeesport, Pa. It seems that the gentlemen in charge of the tariff bill are not yet ready to proceed with it.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It directs the Secretary of the Treasury to acquire, by purchase, condemnation, or otherwise, a site, and cause to be erected thereon a suitable building, including fireproof vaults, heating and ventilating apparatus, elevators, and approaches, for the use and accommodation of the United States post-office and other Government offices at McKeesport, State of Pennsylvania, the cost of the site and building, including vaults, heating and ventilating apparatus, elevators, and approaches, complete, not to exceed $200,000.

Mr. PLATT of Connecticut. I simply wish to ask whether the regular order of morning business has been concluded?

The VICE-PRESIDENT. It has not.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILLS INTRODUCED.

Mr. HANNA introduced the following bills; which were severally read twice by their titles, and referred to the Committee on Pensions:

A bill (S. 2160) to increase the pension of John Walker;

A bill (S. 2161) to increase the pension of George F. Davenport (with an accompanying paper); and

A bill (S. 2162) to increase the pension of George B. Ague (with an accompanying paper).

Mr. HANNA introduced the following bills; which were severally read twice by their titles, and referred to the Committee on Military Affairs:

A bill (S. 2163) for the relief of Nicholas Welter (with an accompanying paper);

A bill (S. 2164) for the relief of Isaac Holdbrook (with an accompanying paper);

A bill (S. 2165) for the relief of Andrew Robinson (with an accompanying paper);

A bill (S. 2166) for the relief of Henry Fishering (with an accompanying paper); and

A bill (S. 2167) for the relief of Levi G. Fessenden (with an accompanying paper).

Mr. HANNA introduced the following bills; which were severally read twice by their titles, and referred to the Committee on Claims:

A bill (S. 2168) granting payment to John Shearer for the burial and funeral expenses in the interment of John G. Kyle, lieutenant, First Regiment United States Cavalry; and

A bill (S. 2169) to refer to the Court of Claims the claim of John S. Armstrong for compensation for loss of wheat in 1862 (with an accompanying paper).

Mr. TELLER introduced the following bills; which were severally read twice by their titles, and referred to the Committee on Post-Offices and Post-Roads:

A bill (S. 2170) for the relief of Harry A. E. Pickard; and

A bill (S. 2171) for the relief of M. D. Crow.

Mr. TELLER introduced the following bills; which were severally read twice by their titles, and referred to the Committee on Finance:

A bill (S. 2172) to provide for the coin redemption of national-bank notes; and

A bill (S. 2173) to provide for the reserves of national banks.

Mr. TELLER introduced the following bills; which were severally read twice by their titles, and referred to the Committee on Claims:

A bill (S. 2174) for the relief of the legal representatives of Alexander C. Crawford;

A bill (S. 2175) for the relief of David A. McKnight;

A bill (S. 2176) for the relief of Irving W. Stanton;

A bill (S. 2177) for the relief of Mrs. Julia A. Humphries;

A bill (S. 2178) for the relief of Thomas Williams, an employee of the Senate folding room, for injuries received while in the discharge of his duties in the year 1892;

A bill (S. 2179) for the relief of Mrs. Ellen Sexton; and

A bill (S. 2180) for the relief of the legal representatives of Mrs. A. Shirley.

Mr. TELLER introduced the following bills; which were severally read twice by their titles, and referred to the Committee on Military Affairs:

A bill (S. 2181) to remove the charge of desertion against Charles L. Thompson, late lieutenant, Seventh Kansas Cavalry;

A bill (S. 2182) to correct the military record of Charles A. Wahl;

A bill (S. 2183) for the relief of Capt. George W. Brown;

A bill (S. 2184) to reimburse the State of Colorado for moneys expended in the suppression of Ute Indian depredations during the year 1887;

A bill (S. 2185) removing the charge of desertion from the name of Frank A. Land, of Nathrop, Colo.;

A bill (S. 2186) for the relief of Wilbur F. McCue;

A bill (S. 2187) removing the charge of desertion in the case of John Holderby;

A bill (S. 2188) granting an honorable discharge to James Brown;

A bill (S. 2189) granting an honorable discharge to George S. Raymond;

A bill (S. 2190) for the relief of the estate of Emmet Crawford, deceased, late captain of the Third Regiment United States Cavalry;

A bill (S. 2191) to establish a council of ordnance;

A bill (S. 2192) granting an honorable discharge to John Kinchlow; and

A bill (S. 2193) for the relief of the First Colorado Mounted Militia.

Mr. TELLER introduced the following bills; which were severally read twice by their titles, and referred to the Committee on Indian Affairs:

A bill (S. 2194) to abolish the office of Commissioner of Indian Affairs and the office of Assistant Commissioner of Indian Affairs, and to create in lieu thereof a board of Indian commissioners;

A bill (S. 2195) for the relief of John A. Sibbald;

A bill (S. 2196) to provide for the allotment of lands to Inidans without changing their tribal relations, and to authorize the leasing of Indian lands in certain cases;

A bill (S. 2197) to pay the administrator of the estate of Bluford West, deceased, for the Bluford West Saline, in Cherokee Nation;

A bill (S. 2198) for the relief of Sarah R. Dresser;

A bill (S. 2199) for the relief of William S. Peabody; and

A bill (S. 2200) for the relief of David A. McKnight.

Mr. QUAY introduced a bill (S. 2201) to appropriate the sum of $75,000 to purchase a site and erect a public building at Shamokin, Pa.; which was read twice by its title, and referred to the Committee on Public Buildings and Grounds.

Mr. PENROSE introduced a bill (S. 2202) making an appropriation toward the construction of a dry dock at the navy-yard, League Island, Pa.; which was read twice by its title, and referred to the Committee on Naval Affairs.

ANNEXATION OF THE REPUBLIC OF HAWAII.

Mr. DAVIS. I move that 5,000 additional copies of the message from the President of the United States, transmitting a treaty for the annexation of the Republic of Hawaii to the United States, signed at Washington by the plenipotentiaries of the parties June 16, 1897, be printed, with the accompanying papers.

The motion was agreed to.

THE TARIFF BILL.

Mr. ALLISON. I move that the Senate proceed to the consideration of House bill 379.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States.

The Secretary resumed the reading of the bill at line 1, page 104, and read as follows:

SCHEDULE J.—FLAX, HEMP, AND JUTE, AND MANUFACTURES OF.

320. Flax straw, $5 per ton.

Mr. VEST. I move to strike out paragraph 320, in order to place flax straw upon the free list, where it is now. It is free under the existing law. On this amendment I intend to call for the yeas and nays. I ask the Secretary to read a communication which I think is absolutely correct. Although it is signed "Citizen," and I have cut it out of a New York paper, it states in succinct form what is the result of this flax schedule in the proposed law.

The VICE-PRESIDENT. The Secretary will read as requested.

The Secretary read as follows:

THE FLAX SCHEDULE.

To the Editor of the Evening Post:

SIR: Mr. T. H. Sharretts, president of the Board of General Appraisers at New York, in speaking of the Senate tariff bill in last night's Evening Post, was very wide of the mark when he said: "The cotton schedule shows very little change from the Wilson law, and the same may be said of the metal, flax, and sundries schedules." The present tariff (Wilson) on all manufactures of flax is 35 per cent ad valorem, and even under the McKinley law no higher tariff was ever collected, excepting on a few of the lower qualities—goods counting less than 100 threads to the square inch—on which the rate was 50 per cent. The tariff proposed by the Senate Finance Committee on manufactures of flax counting not more than 180 and not less than 121 threads to the square inch—the class of goods used by the great masses of the people—ranges from 55 to 90 per cent ad valorem, goods counting 121 threads paying as high as 90 per cent, while goods counting 180 threads pay 55 per cent.

It is the same old story, told time and time again by the Republican party. All they want of the poor and those in moderate circumstances is their votes to put them in office where they can squander the enormous taxes

levied on those classes, and which they think ought to be paid without a murmur.

The present tariff (35 per cent) is, in all conscience, high enough, but we might struggle on for a time under a 50 per cent rate, though I believe it would not bring in as much revenue as the present tariff. The flax schedule as passed by the House of Representatives, crude and impracticable as it is, would be infinitely preferable to that presented to the Senate by the Finance Committee, which is simply outrageous, and clearly shows that the framers (at least as far as the flax schedule is concerned) know little or nothing about tariff making.

CITIZEN.

NEW YORK, *May 7.*

Mr. VEST. I did not observe the latter remark in the communication, and I do not indorse it; but the statement in regard to the duties I do indorse, and I can prove it mathematically. If this bill is framed for revenue, I call attention to the official report as to the article of flax straw. Under the McKinley Act, with the duty then imposed of 60 per cent—$5 a ton—there was collected, in 1893, $765 on an importation of 153.10 tons. In 1896 there was an importation of 33 tons, although we put this article upon the free list, showing that by removing the duty the importation fell off 120 tons.

Mr. President, this whole flax schedule seems to be based upon the idea recently advanced that we can raise flax and prepare it for manufacture in this country. I deny it. I deny it upon the testimony of men engaged in the manufacture of linen and all the goods of which flax is the raw material. It has been unquestioned heretofore that we could not produce the textile for linen goods in the United States because we did not have the climate nor did we have the fiber with which to do it. It is a peculiar process, and Ireland is the only country, with the exception of a small portion of the Continent of Europe, where the cultivation of flax for linen and the manufacture of linen has been successful.

The idea is now advanced, as I see from the testimony before the Ways and Means Committee, that Minnesota can produce this flax; that the discovery has been made recently, in the last two or three years, that the climate of Minnesota suits it, which is entirely different from that of Holland or Ireland. It requires, I understand, a damp climate. They have in Ireland a peculiar process of retting this flax. It is taken after being cut and put in large ponds or tanks, and it has to be turned over and rearranged twice a day for weeks until the retting process is complete. It is then subjected to another process, until finally the fiber is suited for manufacture. We obtain the celebrated Irish linen and the Dutch linen from Holland by means of these processes and under climatic conditions that do not exist in this country.

All the manufacturers state emphatically and distinctly that they have tested the Minnesota flax and that it is not suitable for their purposes. And yet this flax schedule is constructed from the beginning upon the assumption that there is an interest in this country to be protected by these enormous duties. We have flax straw taken from the free list and taxed $5 a ton. We have flax not hackled or dressed, which is upon the free list now, which was at 1 cent in the McKinley Act, put at three-fourths of a cent per pound in this bill. They have taken flax hackled, known as dressed line, which was $67.20 per ton under the McKinley Act, and 1¼ cents per pound under the law of 1894, and put it at 2½ cents per pound, or about $50 a ton.

The only result of these enormous taxes is to increase the value of linens to the purchaser in the United States. I assert here that unless these manufacturers, some of whom stand as high as any other merchants in New York, are practiced and conscious prevaricators, not to use the word liars, the Minnesota flax can not be used in competition with flax or the products of flax that come to us from abroad.

I call for the yeas and nays upon this amendment as a test proposition.

Mr. WHITE. It seems to me that the paragraph presents rather an unimportant issue except by way of illustration. The Senator from Missouri stated the extent of the importation. I notice in looking over the statistics that, taking the last ten years, we can not find in any one year more than $800 worth of importations. If it be true that in some part of the country this article can be produced, certainly there is nothing in the history of our importations to indicate that there will be any injurious competition from abroad, because it appears that the article does not come in at all in any quantity, and unless the paragraph is inserted for the purpose of exercise, or by way of training, I can not imagine any object in view.

The VICE-PRESIDENT. Upon agreeing to the amendment of the Senator from Missouri to strike out paragraph 320, "Flax straw, $5 per ton," the Senator from Missouri calls for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. CLAY (when his name was called). I announce my pair with the junior Senator from Massachusetts [Mr. LODGE]. Were he present, I should vote "yea."

Mr. HANNA (when his name was called). I am paired with the Senator from Utah [Mr. RAWLINS].

Mr. MORRILL (when his name was called). I am paired with the senior Senator from Tennessee [Mr. HARRIS], and therefore withhold my vote.

Mr. PASCO (when his name was called). I am paired with the Senator from Washington [Mr. WILSON]. If he were present, I should vote "yea."

Mr. PROCTOR (when his name was called). I am paired with the Senator from Florida [Mr. MALLORY].

Mr. TURNER (when his name was called). I announce a general pair with the Senator from Wyoming [Mr. WARREN], and withhold my vote.

Mr. WALTHALL (when his name was called). I am paired with the Senator from Wisconsin [Mr. SPOONER]. Otherwise I should vote "yea."

The roll call was concluded.

Mr. GEAR. I am paired with the Senator from New Jersey [Mr. SMITH]. I transfer that pair to the junior Senator from Massachusetts [Mr. LODGE], and vote "nay."

Mr. CLAY. I transfer my pair with the junior Senator from Massachusetts [Mr. LODGE] to the senior Senator from New Jersey [Mr. SMITH], and vote "yea."

Mr. THURSTON. Has the senior Senator from South Carolina [Mr. TILLMAN] voted?

The VICE-PRESIDENT. He has not.

Mr. THURSTON. I have a general pair with that Senator. If he were present, I should vote "nay."

Mr. HARRIS of Kansas. I am paired with the junior Senator from Wyoming [Mr. CLARK]. If he were present, I should vote "yea."

The result was announced—yeas 18, nays 28; as follows:

YEAS—18.

Bacon,	Cockrell,	Mills,	Turpie,
Bate,	Gray,	Mitchell,	Vest,
Berry,	Jones, Ark.	Morgan,	White.
Butler,	Kenney,	Murphy,	
Clay,	McLaurin,	Pettus,	

NAYS—28.

Allison,	Deboe,	Hoar,	Platt, N. Y.
Baker,	Fairbanks,	McEnery,	Pritchard,
Burrows,	Frye,	Nelson,	Quay,
Carter,	Gallinger,	Penrose,	Sewell,
Chandler,	Gear,	Perkins,	Shoup,
Cullom,	Hale,	Pettigrew,	Wellington,
Davis,	Hawley,	Platt, Conn.	Wetmore.

NOT VOTING—43.

Aldrich,	Gorman,	McMillan,	Spooner,
Allen,	Hanna,	Mallory,	Stewart,
Caffery,	Hansbrough,	Mantle,	Teller,
Cannon,	Harris, Kans.	Martin,	Thurston,
Chilton,	Harris, Tenn.	Mason,	Tillman,
Clark,	Heitfeld,	Morrill,	Turner,
Daniel,	Jones, Nev.	Pasco,	Walthall,
Elkins,	Kyle,	Proctor,	Warren,
Faulkner,	Lindsay,	Rawlins,	Wilson,
Foraker,	Lodge,	Roach,	Wolcott.
George,	McBride,	Smith,	

So the amendment was rejected.

Mr. TURPIE. Mr. President, I give notice on behalf of the minority of the Committee on Finance, that I shall move that the amendment offered the other day in relation to an inheritance rate will be offered as a substitute amendment for section 4, on page 196, containing the provision for an increase of the tax on beer. The pending bill, constructed wholly upon duties and excises, rests altogether upon consumption. The opportunity will be given and a tentative effort will be made to take some part of the revenue burden from consumption and transfer it to accumulation. It will lighten the task of those who are already subject to the exactions of duties and excises, and it will make a rate easily payable against those who are more highly favored by wealth and property.

The next amendment of the Committee on Finance was, in paragraph 321, page 104, line 4, after the word "dressed," to insert "three-fourths of;" so as to make the paragraph read:

321. Flax, not hackled or dressed, three-fourths of 1 cent per pound.

Mr. ALLISON. I hope the amendment will be disagreed to. On further consideration, the committee recommend the House rate.

The amendment was rejected.

Mr. WHITE. I move to strike out paragraph 321, and give notice that when the free list is reached I shall move to put the article therein described on the free list.

The VICE-PRESIDENT. The Senator from California moves to strike out paragraph 321.

The amendment was rejected.

The next amendment of the Committee on Finance was, in paragraph 322, page 104, line 6, after the words "dressed line," to strike out "three" and insert "two and one-half;" so as to make the paragraph read:

322. Flax, hackled, known as "dressed line," 2½ cents per pound.

Mr. ALLISON. I am instructed to ask the Senate to disagree to the amendment.

Mr. JONES of Arkansas. The Senator from Iowa, it seems to me, can save time by just giving notice that all the committee amendments are abandoned. It appears that we are to have no opportunity to vote on the amendment of the committee for the reduction of a single proposition that came from the House of Representatives. "Two and one-half" was proposed by the Senate committee. I will agree with the majority that we shall give up that "two and one-half," but I propose to put the rate at 1½ cents instead of 3. I ask for the yeas and nays upon my amendment.

The yeas and nays were ordered.

Mr. VEST. Before the vote is taken, I propose to put upon record the testimony of a person of credibility in this matter in regard to the production of flax in Minnesota, for the protection of which all these increases are made. I do not quote now from any importer, but from Mr. S. S. Kepler, manager of the Eau Claire Linen Company, of Wisconsin. It may be an importing company, but I also understand it manufactures coarse towels, crash, etc. I will ask the Secretary to read.

The VICE-PRESIDENT. The Secretary will read as indicated.

The Secretary read as follows:

OUR LINEN INDUSTRY—LINEN MANUFACTURERS FEAR EFFECTS OF TARIFF ON TOW.

Mr. S. S. Kepler, manager of the Eau Claire Linen Company, interviewed on tariff issues last evening, said:

"As a strong effort is being made to induce the Senate to raise the duty on tow of flax from one-half cent per pound, as fixed by the Finance Committee, to the House rate of 1 cent, we feel obliged to protest against such change, as it would seriously imperil this industry, as we do not consider the duty proposed on manufactured goods compensatory. We prefer the present tariff, providing the ad valorem duty on imported goods is changed to specific and tow left on the free list. A duty of 1 cent per pound on tow would increase its cost to us about 15 per cent.

"That this or even a much higher duty will encourage the raising of flax in the Northwest we do not believe. For twenty-five years or more the farmers of Minnesota and Dakota have been growing flax for the seed, and they have found it one of the most profitable crops. They will continue to do this for years to come regardless of the tariff on tow, for the reason that in all these years they have produced no tow that manufacturers of linen cloth could use. We have been making common crash toweling for ten years, and during this time we have seen no samples of domestic tow that we could use.

"If a single ton of merchantable tow, suitable for making linen cloth of any kind, has been produced in Minnesota or Dakota, it remains to be shown. Any claims to that effect need stronger evidence than has been produced.

"If this is true, and we believe it is, with what justice can it be asked that an oppressive duty should be laid on an article not now produced in the Northwest?

"As manufacturers can not use the domestic product, they will have to continue to import the foreign or shut down their mills, unless Congress imposes higher duties on linen fabrics than is now proposed. To do that would increase the cost of crash toweling to a price that would be felt by the consumer. This grade of toweling is used largely by the common people, who can not afford the fine, high-priced goods imported from Europe and sold largely to the rich. The common crashes made by the Eau Claire Linen Company, the Stevens Mills in Massachusetts, and one or two other concerns in this country are in daily use in every farmhouse, workingman's home, settler's cabin, mining and lumbering camp in the land. To largely increase its cost by a high duty on the raw material of which it is made would not seem to be legislating for the interests of the people.

"It is claimed by some that the culture of flax needs no encouragement in the way of duty on imports. The product of Minnesota and Dakota tow mills appears to be sold almost exclusively for upholstering purposes at about 1 cent per pound. If they could or would make tow that could be spun and woven into coarse linen goods, their tow would sell for 6 to 7 cents per pound. If this difference of 5 to 6 cents per pound is not sufficient inducement to make a good article of tow, how would a duty of 1 cent per pound help them? We have no reason to suppose that it would in the least increase the production of good tow. We fear that the only effect of taking flax tow from the free list and placing a duty upon it would be to cripple the linen mills in this country already established and prevent the building of new ones. How such a result would encourage flax culture is not clear."

Mr. VEST. Mr. President——

Mr. DAVIS. Will the Senator allow me?

Mr. VEST. If the Senator will wait a minute, I will yield the floor to him, and he can then answer all I have to say upon the subject.

Mr. President, that is a statement from Wisconsin—the Eau Claire Linen Factory. Some six weeks ago my attention was called to a publication in the Economist, which paper the publishers are kind enough to send me occasionally, to the effect that there had been a large shipment—I think I use the exact words—of Minnesota flax to Europe, to Belfast, I believe, and that there was to be a revolution in the linen trade of the United States by reason of this discovery of Minnesota flax.

I send to the desk a communication in regard to this very interesting fact from Richard H. Ewart, of the firm of William Ewart & Son, Limited, of New York, dated May 11, 1897, and ask the Secretary to read it.

The VICE-PRESIDENT. The Secretary will read as requested, in the absence of objection.

The Secretary read as follows:

WILLIAM EWART & SON, LIMITED,
New York, May 11, 1897.

To the Editor of the Dry Goods Economist.

DEAR SIR: We read in your valued paper of the 1st instant that a large shipment of Minnesota flax was sent to Belfast last month, which naturally gave the impression that it was used there for the manufacture of linen, and was therefore suitable for that purpose. As we are large users of flax, and obtain it from all the best markets, and have never been able to avail ourselves of American-grown flax, we inquired of our people in Belfast regarding this shipment, and asked them to report to us. We are informed that the amount received was only 1 ton, and the quality "very inferior." We would also like to mention, in confirmation of this, that since the 1st of May a representative of the Minnesota Flax Company has called upon us here with a view to business, and he admitted that only 2 tons of flax had so far been shipped to Belfast—1 ton to Messrs. Barbour and 1 ton to Messrs. John Preston & Co., flax dealers in Belfast.

These facts do not lead us to expect much relief from the Minnesota flax-growing district, and we are inclined to believe that as yet there is practically no flax grown in that district suitable for the manufacture of linen goods, as was the case when in August last, in answer to a bona fide inquiry, the Minnesota Flax Company stated that there was not any flax grown in that neighborhood which could be used in manufacturing linen.

As the question of flax raising and the manufacturing of linen has been very much before the public lately, these facts may be of interest to your readers.

Yours, faithfully, RICHARD H. EWART, *Director.*

Mr. VEST. Mr. President, I have no acquaintance with the members of that firm; but upon inquiring of a New York merchant who happened to be in my committee room yesterday, I was informed that their character is as high as that of any merchant in the city of New York or anywhere else, and I should insist on reading something further on that question were it not for the fact that I might be accused of taking up unnecessarily the time of the Senate, when we are told that now prosperity is at the door ready to rush frantically in as soon as this bill is passed, as it was officially and ecclesiastically announced [laughter] by our Chaplain, a very worthy and excellent expounder of Holy Scriptures, an emissary from Providence, who thanked God that the signs of returning prosperity were already before us. Great was his faith. It could remove mountains. To find any signs of prosperity would require some miraculous interposition, for the ordinary American citizen, who is not accredited directly from the Almighty, has seen nothing of the kind.

Now, Mr. President, I simply want to put in evidence a communication which I have received from a merchant in the city of New York, giving the effect of the table which he incloses. He says:

The following table shows how paragraph 327, Schedule J, changes the percentage of duty payable on the three recognized qualities of linen thread.

I shall put this in the RECORD in evidence of my statement that there is an enormous increase in this schedule upon flax and upon linen thread. As a matter of course, as we were told yesterday by the Senator from Iowa [Mr. ALLISON], whenever you put a duty on the raw material you are bound to put it on the finished product. The writer of the communication goes on to show that on the first quality, "F," the Senate Finance Committee's rate is 67½ per cent, instead of 35 per cent, as now; on quality "A" the Senate Finance Committee's rate is 54 per cent, instead of 35 per cent; and on the best quality it is 45 per cent, instead of 35 per cent, as now. So there is an increase, upon an average, of more than 20 per cent upon this single article manufactured out of flax.

I ask that the whole communication may be printed in the RECORD as a part of my remarks.

The VICE-PRESIDENT. That order will made, in the absence of objection.

The communication referred to is as follows:

NEW YORK, *May 24, 1897.*

DEAR SIR: We beg to show below how the proposed duty would affect linen thread, and to ask your aid in its modification.

We understand that domestic makers of linen thread have recently informed their trade that if Senate Finance Committee's bill is put in effect they will make little or no change in their present prices, which shows that the present rate of 35 per cent ad valorem is sufficient for protection, while, so far as revenue is concerned (which, we understood, was the chief goal), it would be much less under the proposed prohibitive rate than under a moderate tax; besides it is well known in the trade that many of our citizens engaged in various manufactures in which linen thread is used as a raw material prefer imported, because of its strength and finish, which probably, owing to climatic causes, the domestic-made thread has not attained.

We make this statement as large contributors for many years to the Government revenue on this single item alone, and believe an article which enters so largely as a raw material is entitled to equal consideration with Troy shirt makers' linen, which gets a special rate of 35 per cent ad valorem.

The following table shows how paragraph 327, Schedule J, changes the percentage of duty payable on the three recognized qualities of linen thread:

Quality.	Proposed rate.*	Present rate.
	Per cent.	*Per cent.*
F	67½	35
A	54	35
Best	45	35

*Senate Finance Committee's rate.

The bulk of importations being "F" and "A" qualities, the increase is consequently the more severe and, we believe, unjust and unnecessary, and we respectfully ask for its modification.

Yours, very truly,

JOHN R. HALL & CO.

The Hon. GEORGE G. VEST,
United States Senator, Washington, D. C.

Mr. DAVIS. Mr. President, in view of the importance of this question of a duty on flax, and the very large and increasing production of that article established in the Northwest, I can not permit the statements made in the correspondence to which we have listened to pass unchallenged.

The duty proposed to be imposed is upon the direct line and for the purpose, and we believe will be efficacious, to protect a most important agricultural staple raised over a vast area fit for its production, as the corresponding area in another part of the country is for the raising of the already established staple of hemp.

It is not my purpose to take up any time in debate here or to obstruct the speedy progress of this bill to its final passage, for which the country is so anxiously desirous; but I wish to say that in Michigan, Wisconsin, Minnesota, and the two Dakotas flax is produced in great abundance as a regular crop. It has been mostly produced for the seed up to a recent time by letting it grow for the maturing of the seed. Until recently it has not been cultivated for the fiber, but of late in Michigan and Minnesota especially attention has been turned to the production of the flax for its fiber.

The Messrs. Livingston, of Yale, Mich., have established six mills in that State. They produced a thousand tons of it last year, which was used in this country. In Minnesota there are two mills that produced 250 tons last year. It is produced by a most intelligent process. The flax manufacture is conducted—everything except the planting and cultivating—the intermediate processes are done largely by machinery and by most intelligent operations.

Mr. President, in regard to the statement that Minnesota can not produce and does not produce flax fiber fit for weaving and making linen, I hold in my hand a specimen of Minnesota flax [exhibiting], prepared entirely at Northfield, in that State. Three thousand pounds of this were sent, by way of experiment and demonstration to Belfast, Ireland, early this year in this shape. I have seen a letter from a Belfast gentleman, who undertook to weave it and did weave it, stating that for length of fiber and tensile strength it exceeded their own. There is some difference owing to their superior inherited skill in the manipulation, and perhaps in the color, something easily to be overcome.

Here is a towel made at Belfast from that same flax [exhibiting], apparently of good substance, and the inexpert eye would not probably be able to discern the source from which the flax came out of which this towel was made.

I hold in my hand the samples woven in Belfast from this same consignment of flax which I have mentioned, of various degrees of fineness of linen down to the coarse articles, such as are sometimes made into garments. The samples are many, and they can be seen by Senators, from the exceedingly coarse article up through all the degrees to the finer article of as white linen as one ever saw.

So, Mr. President, the gentlemen who write so confidently in regard to the incapacity or inability of Minnesota or the Northwest to produce this article are simply mistaken. The demonstration has taken place, and profert is here made of its results.

In the Northwest, in North Dakota, in South Dakota, and in Minnesota, raising flax, as they do, over a vast area, for the production of linseed oil, you can see every year thousands of tons of this straw burned in the stacks. Riding through that country you will see the stacks of flax straw being burned as you will see stacks of wheat straw being burned, to get them out of the way. It is designed by this industry, so hopefully established in Michigan and Minnesota and the Dakotas, to bring forward Minnesota and the Northwestern flax as a textile fabric to be woven in this country and furnished to the mills of this country to build up an industry.

Surely, Mr. President, agriculture should have some protection here; its claims should be treated with great generosity. No interest throughout the country is more depressed. From no vocation in life do cries of distress and demands for relief come up more unceasingly. Here we bring to you from the Northwest a production or an adaption of a production to weaving and making all linen fabrics of the most promising character, and, indeed, a demonstrated success, and we claim with entire confidence that with the duty proposed by the committee—which we do not think is large enough, but which we accept—it can be established.

Mr. VEST. May I ask the Senator a question?

Mr. DAVIS. Certainly.

Mr. VEST. How many of these linen factories are there now in Minnesota and the Dakotas?

Mr. DAVIS. There are two in Minnesota; there are six in Michigan; as to South Dakota I am not prepared to say, and there is one, I think, in Iowa.

Mr. VEST. Are they using the Minnesota flax?

Mr. DAVIS. Indeed they are.

Mr. VEST. To make linen?

Mr. DAVIS. I do not say that linen cloth is woven in the United States. It is made in Belfast.

Mr. VEST. Oh, yes.

Mr. DAVIS. It is said that it is impossible to make linen out of Minnesota flax, because heretofore it has been made for the seed and not for the fiber.

Mr. VEST. You do not call that the finer grade of linen, do you?

Mr. DAVIS. Come and look at it.

Mr. GRAY. May I ask the Senator from Minnesota how long these mills have been in operation?

Mr. DAVIS. In Minnesota about three years.

Mr. GRAY. How long in Michigan?

Mr. DAVIS. I do not know.

Mr. GRAY. May I ask the Senator from Michigan how long the mills which produce linen have been in operation in that State?

Mr. BURROWS. I am unable to state, but I think from six to eight years. I can have the data here in a few minutes.

Mr. GRAY. There is no one in this Chamber to whom this information in regard to what seems to be a successful conversion of Minnesota flax into linen is more grateful than it is to me. I hail with sincere pleasure the statement made by my distinguished friend from Minnesota [Mr. DAVIS] in regard to the success he seems to think it is of the experiment of sending flax to Belfast and there having it turned into the apparently fine linen fabrics which he has displayed.

But, Mr. President, the pleasure that this gives me does not result in the same motive for action that seems to possess the minds of gentlemen on the other side of the Chamber. While it gives me pleasure to see an industry able to stand without becoming a mendicant upon the public, it does not give me pleasure to hear it heralded as the foundation, as the justification for laying a new tax imposition upon the shoulders of the American people. If that is to be the result of the discovery of this process by which Minnesota flax can be converted into these beautiful fabrics, then it is a misfortune, not a boon, that comes to this country; it is a calamity, not a source of gratulation.

Mr. President, these mills have been established for three, four, five, and six years, and they have been operating under a system of taxation under which flax comes into this country free; and now, forsooth, having struggled to their feet upon these more equal conditions, it is contended here that it is just and right to tax the whole American people in regard to this very important fabric, so necessary to the health and comfort of the people, second only in importance to the fabrics of wool that are necessary to the health and clothing of the people.

I protest that it is not just, that it is not fair, that it is most unwise to attempt to levy an imposition like this upon an article so absolutely necessary to the well-being of the great masses of the people.

Why should we have, as I have said before, interposed between the people and the obtaining of the best fabrics of that kind that can be obtained in the world this high tariff rate? Why should it be made more difficult for the people—for the poor people, if you please—of this country to get for themselves the best that the world's market affords, in order that these industries, which seem to have struggled to their feet without a subsidy from the Government, should have a bounty that is to be taken out of the pockets of the masses of the people and from the labor of the country?

All that has been said in regard to this industry was most pleasant to hear, because it has obtained its present position under free and normal conditions; and there is no reason, according to the statements of the honorable Senators themselves, for the imposition, even on their theory, of a protective tax in order to encourage this industry.

Mr. MORRILL. Mr. President, the Senator from Delaware [Mr. GRAY] takes precisely the same position on this question that Mr. Gladstone or any other free trader in Great Britain would take. They desire to have our farmers retain the business of producing the raw material, but the moment that is produced, they want to have us send it to Belfast or to some other place in Great Britain or Ireland and have it manufactured.

I think, Mr. President, that this industry is a very great one; its power of development is certainly large; and, so far as I am concerned, I am quite ready and willing to promote its use here as something more than a raw material. I want the raw material to be manufactured here.

Mr. GRAY. Mr. President, I did not have—because I was not at my desk when I was last upon my feet—what I now have in my hands to show what this tax amounts to and what are the dimensions of this burden which is to be imposed upon the taxpayers of this country. Here is an article called table damask, of

the cheaper kind [exhibiting], which goes into universal consumption and is bought by people of all situations in life—bought by the very poor—and which is necessary to the comfort and the decency of life—table damask. The tax upon it was high enough under the McKinley law; it is 35 per cent ad valorem under the Wilson tariff, and under the proposed tariff there will be what is called an ad valorem tax of 109½ per cent, more than doubling the cost of this article to those who have to consume it.

Now, in the name of those who want to maintain a decent mode of living, to maintain decent and comfortable homes, to get those things that are absolutely necessary to make homes decent and comfortable, I protest against this burden being placed upon the bowed back of American labor, the tax being more than three times as much, as the Senator from Arkansas [Mr. JONES] suggests, than the McKinley tax; yet we have been told the McKinley tax was to be in a certain way a standard for the adjustment of the tariff in this bill.

Mr. PLATT of Connecticut. May I be permitted to ask the Senator what he said was the equivalent ad valorem percentage on the article of table damask?

Mr. GRAY. One hundred and nine and one-third per cent.

Mr. BACON. I should like to ask Senators familiar with the question what will be the amount of ad valorem duty at the rate proposed by the committee?

Mr. ALLISON. On these articles that we are now dealing with?

Mr. BACON. On this particular one under consideration, paragraph 322, as I understand.

Mr. ALLISON. On the particular items embraced in paragraphs 321, 322, and 323 the ad valorem will range from 7 to 11 per cent.

Mr. GRAY. On all three?

Mr. ALLISON. On all of the first paragraphs of the schedule now under consideration.

Mr. GRAY. That is the raw flax. I was speaking of the manufactured article.

Mr. ALLISON. Any Senator who will look at the tables will see that the duty is very low on the articles embraced in these paragraphs when reduced to an ad valorem.

Mr. GRAY. That is where the compensation comes in on the manufactured article.

Mr. PETTIGREW. Mr. President, I do not care to speak to this schedule for the purpose of sustaining the rate placed upon these articles by the committee, because they are too low. The rate ought to be on flax, not hackled or dressed, 2 cents per pound. That would be about 28 per cent ad valorem. On flax, hackled, known as "dressed line," it should be 4 cents a pound, which, upon that, would be about 28 per cent ad valorem; and on retted tow the rate should be 2 cents a pound, if we propose to encourage and build up this industry in this country.

We can produce in the United States all the raw material, if you choose to call this raw material, necessary to furnish the linen goods for the people of the United States. We do produce to-day the flax fiber in quantity sufficient to supply the American market with all its spinning material for making linen goods, but we burn it up, because our people have not been trained in the way to cultivate and save this fiber. Within the last few years we have begun to learn to handle the flax straw that is grown for the seed, so that we can produce the fiber as well as the seed. To continue to enlarge that industry, we simply ask that a duty shall be placed upon these articles which shall make up for the difference between the cost of labor in this country and abroad, and between the cost always attending the establishment of new processes.

In the old country flax is raised upon a little patch of ground, owned or rented by the tiller thereof and his family, who pull the flax. It is taken into the house after it has been retted in the streams or by the dews, and scutched, perhaps, over the back of a chair with a wooden knife. The woody fiber is then beaten out, for the flax fiber is around the stem of the flax itself; then it is hackled; in other words, it is drawn through a hackle and the short fiber taken out. That product is called "dressed line." So that there is a great deal of labor connected with the production of flax. In Minnesota and Michigan it is produced largely by machinery.

The farmers who own their own farms sow a little thicker than they would sow for the seed; they till the ground with a little more care, and when the time for the harvesting comes the flax is either cut by a machine which runs close to the ground or pulled by a machine, for they have already invented, for the first time in the history of the world, a machine that can successfully pull flax. Then it is retted either in the dew or in the rivers. Minnesota has been peculiarly successful, and has produced a most excellent quality of this material.

But before I go into that question I shall verify the statement that we produce enough flax straw in this country to supply it with linen if we only save it. All we want is a duty to encourage our people to save this material instead of burning it up.

I have here a table giving a list of the States which produce flax. I will give the larger items, and publish the whole table in my remarks. This table is taken from the census of 1890.

Idaho produced 83,409 bushels of flaxseed, and I presume did not save one single pound of fiber. Illinois produced 35,013 bushels of flaxseed and saved and made some use of 1,943 tons of straw, and produced 57,776 pounds of fiber for spinning and other purposes. Indiana produced 17,566 bushels of flaxseed and 4,350 pounds of fiber. Iowa produced 2,282,359 bushels of flaxseed, 34,510 tons of straw, and 6,281 pounds of fiber. Kansas produced 994,127 bushels of flaxseed, 41,237 tons of straw, and 36,093 pounds of fiber. Minnesota produced 2,721,987 bushels of seed, 31,163 tons of straw, and 8,609 pounds of fiber in 1890. Last year Minnesota increased her production of spinning fiber to 253 tons. Nebraska produced 1,401,104 bushels of seed, 35,074 tons of straw, and 1,025 pounds of fiber. North Dakota produced 164,319 bushels of seed, 1,909 tons of straw, and 568 pounds of fiber. South Dakota produced 1,801,114 bushels of seed, 36,993 tons of straw, and 3,278 pounds of fiber. In all there were produced 10,251,000 bushels of flaxseed, 207,000 tons of flax straw, and 251,479 pounds of flax fiber in 1890. The production of fiber since that time has been increasing. The fiber produced in 1890, according to the census, was mostly tow and used for upholstering and for some very coarse spinning; but since that time the mills of Michigan and Minnesota and one mill in Iowa have begun the production of spinning tow; and that it can be successfully produced is proved by the samples.

The table referred to is as follows:

Production of flax seed, straw, and fiber, census of 1890.

	Seed.	Straw.	Fiber.	Value of products.
	Bushels.	*Tons.*	*Pounds.*	
Arkansas	12	2	26	$14
California	4,130	26	.....	4,910
Colorado	1,994	46	.....	4,910
Idaho	83,409	725	.....	81,521
Illinois	35,013	1,943	57,776	40,766
Indiana	17,566	516	4,350	19,129
Iowa	2,282,359	34,510	6,281	2,323,974
Kansas	994,127	41,237	36,093	1,008,242
Kentucky	1,321	296	12,295	1,928

Wisconsin	68,227	1,816	4,591	79,958
Total	10,251,000	207,000	251,479	10,437,200

Mr. PETTIGREW. I have here some Minnesota flax of great length and of excellent quality, of the crop of 1896. It is unhackled flax; that is, it has been scutched, the woody fiber taken out of it. It is of wonderful strength, great fineness, and will make the finest linen goods in the world. It is the flax out of which the goods exhibited by the Senator from Minnesota [Mr. DAVIS] were made.

This [exhibiting] is of the same quality. It was produced in the same locality, and is unhackled flax of great strength and great length. It was retted in the water from one of the rivers of Minnesota. It has been found this stream in Minnesota is almost equal for retted flax to the river Lesse, in Europe, where the finest flax is produced.

From this same fiber, here [exhibiting] is a sample of hackled flax. The tow has been taken out of it. In other words, the short fibers have been taken out and it is ready for spinning. This [exhibiting] is the flax which was sent to Ireland. Now, let us see what was said about it. I care nothing about some importer's letter which has been read here saying that a little flax was sent there of poor quality. Here is the answer. I read from a letter received from Belfast, Ireland:

March 26 there arrived at Belfast by steamship from Baltimore a consignment of flax in bales, consigned to local firms. This flax has been forwarded from the State of Minnesota, adjacent to Manitoba, and is the first importation of American flax to this city. Since its arrival, it has created not a little interest among local spinners. Experts, in passing an opinion as to its strength and quality, pronounce it to be almost equal to any grown in Ireland. In length it surpasses Irish flax.

Certainly it does, for it is the longest fiber I ever saw, and I have examined very many samples from almost every country in the world which produces this material.

This is attributed to the strong virgin soil of Minnesota, but notwithstanding the strength of the soil, the fiber shows that peculiarly fine texture that renders it so suitable for the spinning of high-class yarns, almost equal to that of French or Belgian.

Mr. President, I desire that these duties shall be raised. I think there is justice in the claim. For instance, flax, unhackled, at 1 cent per pound and retted flax tow at 1 cent per pound. Unhackled flax is worth from 9 to 10 cents per pound. That makes the duty equal to 11 per cent. The samples which I have exhibited under this bill pay a duty of 1 cent per pound. That makes the duty equal to 11 per cent. It is too little when you take into consideration the committee have raised the rates on all linen goods from 35 and 50 per cent to 52 and 109 per cent. I suppose that is the compensatory duty for putting a mere nothing on the raw material. So the bill all the way through seems to leave the producers of the raw material out of the count.

I was much amused yesterday when we put the compensatory duty on cotton goods, because the Senate had put a duty on cotton in order to break up the solid South. Let us see what they did yesterday, after all. Let us see where our Southern cotton Democrats came out in that transaction. We export millions upon millions of bales of raw cotton to points all over the world. Forty-five million pounds of cotton comes in from Egypt. Our Southern friends thought they would shut out the Egyptian cotton. They thought it was a very nice scheme. The Eastern Republican thought it would be a fine scheme to break up the solid South. So they went in together and put a duty on raw cotton. They were going to shut out the Egyptian product and, by making the Egyptian cotton higher in price, create a market for the somewhat inferior cotton grown in the South. So they put a compensatory duty upon goods made from the Egyptian cotton.

Therefore the Egyptian cotton will continue to come in, because the manufacturer gets the money back out of the consumer as the staple of the Egyptian cotton is a little better than the cotton produced in the South, which might fill its place if the Egyptian cotton were higher and they had no compensatory duty. So the Egyptian cotton will continue to come in, and all the Southern cotton Democrats have got out of the transaction is the assistance they have rendered the Eastern Republicans in breaking up the solid South.

So here, again, a little duty is put upon flax straw for the Western farmer—or flax fiber—and immediately the duty is doubled upon the manufactured goods made in the East. The fact of the matter is that this controversy has been drifting toward free raw materials and a high duty on manufactured goods. So they give us 11 per cent on these grades of flax. Unhackled flax, dewretted, is worth 7 cents per pound. One cent per pound is equal to 14½ per cent ad valorem. Retted flax tow is also worth now about 7 cents per pound. This makes the duty equal to 14½ per cent ad valorem. If these rates were changed as I propose, that is, on flax not hackled or dressed, 2 cents per pound, the rate of duty would be 28.6 per cent ad valorem. If unhackled flax, dewretted, were increased as I propose, it would make the duty 28½ per cent ad valorem, and if 4 cents a pound were placed upon hackled flax, known as dressed line, suitable for spinning the high grades of goods, the duty would be about 25 per cent ad valorem.

Now, I insist that under these circumstances, owing to the fact that the compensatory duties have been increased so enormously, these rates should be increased very much over what the committee have reported. I am well aware that it is almost useless to argue this question. I am well aware, of course, that what the committee do will be ratified, but if I should say nothing about this matter my silence would appear to be consent to this schedule, so unfair and so unjust to the people of the West; for we have increased the duties on the manufactured goods, especially the low grades. On low-grade damask tablecloth, for instance, we have increased the rate to 109 per cent ad valorem, from about 35 per cent heretofore, while we have only placed a duty on the material out of which it is made of 11 per cent. We have added, then, on damask tablecloths of the low grades 70 per cent ad valorem, and we have placed on the raw material, for which that is a compensatory duty, a duty of only 11 per cent ad valorem. I have letters here from spinners in this country in regard to the character of this Minnesota flax, but I will not take the time to put them in the RECORD.

I wish to state further, however, that we can produce the fiber used by the people of this country. All over the South there is a fiber which will answer for cotton bagging just as well as jute. Years ago cotton bagging was made in this country out of flax largely. Of course that industry perished because of the competition of the jute butt, which was the refuse of the jute fiber of India, produced by labor that received about 10 cents a day.

I wish to reiterate the fact that we burn up in the Western States, in Minnesota, Iowa, Nebraska, South Dakota, over 100,000 tons of flax straw per year; yes, more than 200,000 tons of flax straw per year; more than 1,000,000 tons of flax straw per year, and all of this flax straw can be made into linen with a little more care in the cultivation of the crop—with a little thicker sowing, a little more attention to the soil, and with pulling before the seed becomes absolutely ripe and dead.

Mr. BACON. Mr. President, the Senator from South Dakota [Mr. PETTIGREW] very much misunderstands the purpose and the scope of the action of the Senate in placing a 20 per cent duty upon raw cotton. It has no relation to the political status of the South. I was not in the Senate yesterday when the amendment was offered by the distinguished Senator from Iowa [Mr. ALLISON], putting what is known as a compensatory duty upon certain cotton manufactures. I came in pending the discussion, without knowing what had been said, and I did not feel free at that time to participate in it. I did not, in fact, know what had been said until I had the opportunity of reading it this morning in the RECORD. I do not know that I should have said anything now but for the remarks of the Senator from South Dakota, and, while I will not immediately direct my remarks in reply to him, possibly what I may have to say before I finish may be an answer to his suggestions.

Mr. President, I think the action of the committee, representing the majority, in the imposition of this which is called a compensatory duty was not warranted by the facts. The ground upon which I base that statement is this: The duty already given to cotton manufactures is sufficient fully to include any expense which may be caused by the imposition of the duty upon raw cotton. I have had something to say on the propriety of the imposition of a tariff duty upon raw material, and I do not wish to repeat what I then said except to emphasize that I do not believe in the imposition of any higher duty than is recognized as a fair revenue duty.

Mr. ALLISON. Will the Senator from Georgia allow me?

Mr. BACON. Certainly.

Mr. ALLISON. I stated yesterday—I have not had time to examine the RECORD, but I have no doubt it is correctly reported there—that the amendment is tentative in its character and was only offered for the purpose of drawing, in conference or in the Senate hereafter, such provisions as will equalize the duties, if any equalization shall become necessary.

My own judgment is that the amount put in yesterday as an ad valorem is far beyond any necessity as respects the articles embraced in the various paragraphs, but it is purely tentative. It is not intended to become a part of the bill, but only to remain there for the purpose of future and more careful examination.

Mr. BACON. I am very glad to hear the statement by the distinguished Senator from Iowa, because I feel that a very great injustice is done by putting that item in the bill.

But as the subject has been discussed, I desire to call attention to some few features connected with the question of compensatory duties. I do not think, I repeat, that there should be any, for the reason that the cotton schedule already gives to the cotton manufactures a rate of duty amply sufficient to cover everything which relates to these products from the beginning of their existence as raw material until their completion as finished articles.

As evidence of that, I call attention to a statement of the Senator from Missouri [Mr. VEST] yesterday, which was not controverted, and which I presume can be fully substantiated. Replying to the suggestion of the Senator from Iowa [Mr. ALLISON], the Senator from Missouri said:

When the Senator from Rhode Island made his initiatory speech and outlined the general effect of the bill that was reported by the majority of the Finance Committee, we were told that there was very little increase as to the cotton schedule; that there had been some changes made in the bill, but he dismissed the cotton schedule with the remark that very little change had been made in that schedule. We find now increases above the McKinley Act. We find that, not satisfied with the existing law, there have been enormous increases over the Wilson Act.

That statement is significant in view of what I believe is the accepted fact, that the cotton schedule in the Wilson Act was drawn by parties interested in the manufacture of cotton. In fact, I have been informed that a distinguished Senator, now a member of this body, was practically the author of the cotton schedule of the Wilson Act. I have had it stated to me within the past twenty-four hours by distinguished Republican Senators that there has been no dissatisfaction among the cotton manufacturers with the cotton schedule in the Wilson Act. If so, there certainly could be no higher evidence of the fact that the cotton schedule in the Wilson Act was ample for the desires and demands of those who as protectionists claimed that that industry should be protected.

Mr. HOAR. Will the Senator from Georgia pardon me? I do not think the cotton manufacturers of New England go quite so far as that. I believe they thought the schedule, so far as the distribution of protection was concerned, the scaling, was a great improvement on all previous laws, but, if I remember aright, there was a proviso at the end of the schedule limiting the amount of

the duty, which, in some cases especially, they thought worked great hardship.

Mr. BACON. I do not controvert that, but I do state the fact, which has been repeatedly stated——

Mr. ALLISON. I do not wish to interrupt the Senator from Georgia, but he seems to be basing his remarks upon an observation made by the Senator from Missouri yesterday that there have been enormous increases in the cotton schedule.

Mr. BACON. I did not emphasize the word "enormous" with quite the degree of power that the Senator from Iowa does.

Mr. ALLISON. The Senator from Missouri of course did not go into details. If he had, he would have shown that the increases are upon very fine cotton fabrics and not upon the fabrics that are generally made in this country; that they were added to the schedule for the purpose of enabling our people to make those very fine cotton fabrics, and that they apply to a very small proportion, I understand, of the manufactures of cotton.

Mr. BACON. The statement of the Senator from Iowa is exactly in the line of the suggestion which I was about to make.

Mr. ALLISON. I beg pardon.

Mr. BACON. The strength of it I think he will recognize. I was endeavoring to present the proposition that the present schedule as provided for in the pending bill is ample to cover any possible increase to the manufacturers by reason of the increase of the raw material. That is the proposition.

Mr. President, the only increase is upon raw material which goes exclusively and solely into the finer goods. They are made in New England. They are the goods which are covered by the great increases in this particular bill. That is the proposition which I submit—the injustice of providing a compensatory duty because of the fact that there has been a 20 per cent duty put upon raw cotton, when all the raw cotton which can possibly be affected by the duty is material which goes exclusively into the manufacture of the fine goods upon which the rates have already been raised to this enormous extent.

So far as the coarser grades of goods are concerned, it is true, as stated by the Senator from Iowa, that they are not affected by the bill; that the bill does not raise the duties on them. They have begun to be manufactured in the South and have ceased to be the object of the care and solicitude of some gentlemen, as they formerly were. But the finer goods, the lisle thread, the laces, manufactured out of this particular grade of cotton, are the ones upon which there has been this enormous increase of tariff duty, and I say the enormous increase of tariff duty is ample to cover the increase upon raw cotton when it relates to raw cotton which alone enters into the manufacture of these particular goods.

I say that of itself would be sufficient, but I think I may be justified in calling the attention of the Senate to the fact of the extreme solicitude and sensitiveness of Senators on the other side of the aisle when anything relates to the particular interests of a particular class of producers in this country. Within the very limited time after the incorporation in this bill of the provision for the levying of a duty of 20 per cent upon raw cotton, here are those interests putting themselves in communication with this committee, and as a result, without notice to any of us, and I must confess in great surprise to myself, although the Senator from Missouri had confidently anticipated it, we have this proposed increase of duty.

I recognize the statement of the Senator from Iowa, at which I expressed gratification, that it may not be so, but I take advantage of this opportunity to say something on it in the hope that it may conduce to the result which the honorable Senator anticipates. But, as I was saying, while it is true that they are so sensitive, they have not manifested that sensitiveness as to the interests of other portions of our country and of other classes and of other industries. I have twice before upon this floor called the attention of the Senate to a most flagrant and marked discrimination made by the Republican members of the Senate in the framing of the pending bill between the interests of the farmers of the North and the interests of the farmers of the South. Twice upon this floor I have asked them to state to the country upon what they base the right to make that discrimination, and neither time have we had a response.

Mr. ALLISON. I wish the Senator would name the special articles where we have discriminated in favor of the North and West as against the South.

Mr. BACON. I was about to do so. I have done it twice before in the hearing of the honorable Senator. I have asked for an explanation. There may be an explanation. If there is, I am ready to accord to them the propriety of their action.

The farmers of the North and West need sacks in which to carry their grain to market. They need binding twine with which to prepare it before they can send it. Both of these articles are upon the free list. I think it is proper that they should be there, in view of the fact that we have the kind of tariff bill that we do, although I should very much prefer a tariff bill that did not recognize much of a free list. At the same time that the grain producers of the North and West are accorded free bags and free binding twine the cotton producers of the South are required to pay a high tax upon bagging and ties.

Mr. WHITE. I may be mistaken in this respect, but it is my opinion, from reading the bill, that grain bags are not on the free list.

Mr. ALLISON. Certainly not; none of them are.

Mr. WHITE. I was preparing some observations in criticism of that provision.

Mr. ALLISON. If the Senator from Georgia will allow me, I will say that while he is preparing to criticise us for having these articles upon the free list, the honorable Senator from California is making great preparations to show they ought to be there.

Mr. BACON. How about binding twine?

Mr. ALLISON. That is a very different thing. I will assure the Senator that so far as the committee is concerned, before we finish the bill as respects the things he is criticising now, they will be treated in the same way that we treat the Southern products.

Mr. BACON. I am more than glad to hear it.

Mr. BERRY. Let me ask the Senator from Iowa a question?

Mr. ALLISON. Certainly.

Mr. BERRY. Does the Senator intend to bring about the equality by putting cotton bagging on the free list along with binding twine, or by putting a tax on binding twine?

Mr. ALLISON. The Senator from Arkansas will take note that the committee, so far as it can, is deliberating upon all these subjects, and it will endeavor to keep an equilibrium with respect to these articles, and in one way or the other the matter will probably be accomplished.

Mr. BERRY. I have learned that the committee is deliberating. I have learned that much, and that is about as much as I knew before I asked the question. Now; will the Senator from Georgia permit me for one moment?

Mr. BACON. Certainly.

Mr. BERRY. Binding twine, used to bind the grain of the Northwest, is on the free list. Cotton bagging, which is used to cover the cotton of the South, is on the taxed list. Now, if the Senator from Iowa will put cotton bagging on the free list along with binding twine, I will feel that this discussion has not been entirely in vain.

Mr. WHITE. How about cotton ties?

Mr. BERRY. I was speaking particularly of this schedule at the present time. Cotton ties, as a matter of course, ought also to be upon the free list.

Mr. BACON. I must say, in justification of myself, that my statement in reference to grain sacks being on the free list was based upon a statement made by the Senator from Texas [Mr. MILLS] in the Senate, and Senators were asked upon that particular occasion to state why it was done, and no response was made. I did not examine the bill. I supposed, of course, that the statement made by the Senator from Texas was correct.

Mr. ALLISON. I did not hear the Senator from Texas, if he made that statement.

Mr. BACON. I can show it to the Senator from Iowa in the RECORD. Not only so, but the Senator from Missouri called attention to it, and as nothing was said in response by distinguished Senators, I took it upon myself to ask the question why it was, and to ask them to give an explanation. It was upon that that I based my statement. I am more than delighted to hear the statement of the Senator from Iowa, because practical results are what we are after. We desire that the cotton farmers of the South, who, as I said before, feel the dead weight of all this imposition of tariff, shall have the benefit, as far as practicable, of free material in the preparation for the market of a crop which itself in the main can have no benefit either direct or indirect from the imposition of a tariff.

I am extremely gratified to hear the assurance of the distinguished Senator from Iowa that it is the purpose of the committee and of the Senators upon the other side of the Chamber to see that this important industry has fair and equal and impartial treatment.

Mr. President, I desire to say one other word in this connection with reference to the matter of compensatory duty. I trust it may turn out that in this particular instance there may be no compensatory duty. But Senators upon this side of the Chamber who differed with those who acted with myself in favoring a tariff duty of 20 per cent ad valorem upon cotton seem to regard the fact that the distinguished Senator from Iowa, representing his party, had proposed a compensatory duty as one entirely vindicating their original position that 20 per cent ad valorem duty on raw cotton was an improper duty because, as stated by them, it would be taken as an excuse for the imposition of that compensatory duty.

The particular point that I want to call the attention of the Senate to is that even if my contention were erroneous and the compensatory duty in this particular case is a proper duty, it would

not change the proposition that a revenue tariff upon cotton is a proper tariff.

In considering that question one important fact must be borne in mind. While this tariff is one which is proposed to be levied upon the importation of all kinds of cotton, it in fact relates to a very small proportion of the cotton crop, and can have no effect upon the general crop. There are about 100,000 bales of long-fiber cotton made in the United States. They are all made in the States of South Carolina, Georgia, and Florida. There are at the same time about 100,000 bales of similar cotton imported into this country. So, instead of its being a tariff duty levied upon an article where there is a product of nine or ten million bales of cotton, it is a tariff levied upon a product of which there are in this country only about 100,000 bales. And it is a tariff levied upon a product where there is an import of about the same amount as that which is made in this country.

Mr. President, I say that, tested by every rule which has ever been recognized by the Democratic party by which should be determined whether an article is a proper and legitimate subject for a tariff for revenue, an article which is produced in this country to the extent of about 100,000 bales, and in which there is an import of about an equal amount, is such an article, and can be defended anywhere and everywhere as a proper and legitimate subject of revenue tariff.

What is the contention of those who say that if a compensatory duty is levied it shows that the original duty upon the raw material should not be levied? The argument is that it is practically taking it out of one pocket and putting it into the other; that the Republicans consent to this suggestion on the part of those of us who come from the section where this particular cotton is raised, and at the same time turn around and tax it the same amount.

Well, Mr. President, that is not a correct statement of the case. The object of free raw material, as stated by those who contend for it, is to put a cheap material at the command of the manufacturer, so that he can manufacture more cheaply for the consumption of the people.

The distinguished Senator from Missouri [Mr. VEST] and the distinguished Senator from Texas [Mr. CHILTON] said that the effect of this duty on raw material could not be to raise the price of cotton. The Senator from Texas has said it, and the Senator from Missouri echoed it and affirmed it and approved it. If so, Mr. President, it can be no ground for the placing of a compensatory duty. But the truth is it is not so. The truth is that the placing of a duty on this cotton will raise the price in the hands of the producer.

The objection is made by those who oppose this 20 per cent duty on cotton on the ground that it raises the price to the manufacturer, and that therefore the manufacturer must raise the price to the consumer.

If the argument is carried out, what does it mean? It means that the cotton must be cheapened to the manufacturer in order that he may cheapen his finished product to the consumer.

Now, Mr. President, who are the consumers? The consumers are those who use fine goods among 70,000,000 people. It is true these consumers will not be the common people at all. They are the people who wear laces, and lisle-thread clothes, and lisle-thread socks, and lisle-thread underwear. The proposition is that in order that these people may have cheap underwear and cheap articles of luxury of this kind the price must be made cheap at the expense of those who produce the raw material.

Let me give an illustration. It is estimated that under this duty the cost of the cotton, the raw material which is to be consumed by the makers of these fine goods, the duties upon which have been so enormously raised, as we have heard, will be increased to these manufacturers to the extent, say, of $1,300,000. Therefore it is argued that the cost to the consumers will be increased, necessarily, $1,300,000. If a compensatory duty is put upon manufactured goods, of course that increased cost will be distributed among all of the consumers, among the 70,000,000 people who use this grade of goods. If the prices are not to be increased to that extent, then the prices are to be cheapened at the cost of somebody.

Now, who is that somebody to be? Who is to lose $1,300,000? Is it to be distributed among all these consumers by the compensatory duty, or is it to rest exclusively upon and be borne by the producers of this cotton? Are the few men who produce this long staple to be made to lose $1,300,000, or shall the enormous number of consumers of this class of goods pay it through the methods of a compensatory duty?

Mr. President, how many men do you suppose there are engaged in the production of this cotton? I said that the production was limited to the States of South Carolina, Georgia, and Florida; but those engaged in those States in the production of this particular cotton are comparatively very few. I doubt if there are 15,000 people engaged in the cultivation of this particular class of cotton. Yet the proposition which will deny the right to impose this duty because, forsooth, there might be a compensatory duty is that the 15,000 people must bear this loss of $1,300,000 rather than that the entire community of 70,000,000 should have that amount distributed among them, each paying his proportionate part of it.

So I say, Mr. President, taking whichever horn of the dilemma you will, if there is no propriety in the compensatory duty, then of course there is no increased cost to the people in the imposition of the 20 per cent duty; and if there is propriety in the imposition of the compensatory duty, it is much better that the $1,300,000 should be borne by the entire people than that the loss should fall upon 15,000 people or less in the three States of South Carolina, Georgia, and Florida.

Mr. President, I do not desire to continue this discussion, but it does seem to me that Senators who oppose this proposition have been extremely inconsistent.

Mr. PLATT of Connecticut. May I ask the Senator from Georgia a question?

Mr. BACON. Certainly.

Mr. PLATT of Connecticut. The Senator makes a calculation that the duty will be increased $1,300,000?

Mr. BACON. I judge that on the amount imported last year.

Mr. PLATT of Connecticut. Will not that be paid really by the persons engaged in manufacturing Egyptian cotton into fabrics?

Mr. BACON. I think that very probably they will raise the price of their goods. It will be paid ultimately by the consumer. I believe that all things are ultimately paid by the consumers.

Mr. PLATT of Connecticut. But they will be obliged to pay that much more for their material.

Mr. BACON. I think so. I think the people who raise that class of cotton in this country will get the direct benefit of it. A great many things which have been said here and which have been said elsewhere about this as a duty laid upon the general cotton crop have no possible relation whatever to the subject. It is just as distinct as if it were not named cotton. It is just the simple question of a product of 100,000 bales in this country, two-thirds of which, I will say in passing, is raised in my own State. Generally speaking, 100,000 bales are raised in this country and 100,000 bales are imported, and it might as well be jute or anything else so far as the principle is concerned. And I say, Mr. President, that you may look through this bill, you may look through the Wilson bill, and there are without number instances of revenue duties laid upon agricultural products for which the argument in favor of them is not half so strong nor a tenth so strong as in this particular case.

Senators, I repeat, have been inconsistent in this matter. My distinguished friends on my right announce, with the utmost positiveness, without qualification, that they have no regard to anything except the question as to whether or not a particular levy of a duty will raise a revenue; and yet the Senator from Missouri and the Senator from Arkansas both yesterday affirmed, as a positive principle which could not be ignored, that the levy of a duty upon a raw material necessitated a compensatory duty upon the finished product.

Now, if so, why? Does the levy of a duty upon the raw material make the compensatory duty necessary in order that there may be a revenue upon the finished product? Can it be defended upon any ground except the single position that the revenue having been laid upon the raw material, it is necessary that there should be a compensatory duty in order to protect the manufacturer of the finished product?

I say there is no possible reconciling the position of the Senators who claim that they have an eye single to revenue and who at the same time announce in the most emphatic language that wherever there is a revenue duty laid upon the raw material there must be a compensatory duty upon the finished product.

Mr. VEST. I know the Senator from Georgia does not intend to misrepresent me. If he will look at the RECORD, he will observe that I did not say that.

Mr. BACON. I beg the Senator's pardon.

Mr. VEST. I was arguing against the compensatory duty, and I said that our Republican friends always put on a compensatory duty. It is not right to do it, and I am opposed to both duties.

Mr. BACON. I am delighted to hear the Senator say that; but I am going to read his language to show that I did not purposely misquote him.

Mr. VEST. I did not revise what I said.

Mr. BACON. I am delighted for this reason: If there is no reasonable ground for a compensatory duty, if no compensatory duty is right, then the fact that somebody else is going to do wrong in imposing a compensatory duty is no argument why we should fail to do right in imposing a revenue duty on raw material.

Mr. VEST. If the Senator will excuse me, I will state what I meant to say. I have not revised any remarks I have made in the debate. I do not know what the CONGRESSIONAL RECORD shows, but I know what I intended to say. I was arguing against the

compensatory duty of 10 per cent, and I said that I was not at all surprised that it had been put there, because I had never known a case in my experience in tariff bills where there was a duty put upon raw material that it was not followed by the Republican party by a compensatory duty paid to the manufacturer. But I never was in favor of a duty on raw material to commence with.

Mr. BACON. I understand that.

Mr. JONES of Arkansas. Will the Senator allow me?

Mr. BACON. Yes; I am going to read what both Senators said.

Mr. JONES of Arkansas. I have no objection to your reading what I said, but——

Mr. BACON. I beg pardon; go on.

Mr. JONES of Arkansas. What I have said, and what the Senator from Missouri has said, all the time, was that we did not believe in duties on raw materials, but whenever you load the cost of raw material to the manufacturers you handicap them, unless you make some compensation to them for the tribute that the Government levies upon their raw material. It is our opposition to a tax on raw materials that made us say that this thing ought not to be done, and I say whenever you put a tax on the raw material you are compelled to put on a compensating tax if you would allow the manufacturer to live at all. It is to show the utter absurdity of taxing raw materials that I mentioned the thing at all.

Mr. BACON. Do you mean to say that they ought to have a compensatory duty?

Mr. JONES of Arkansas. They are bound to have it if you want them to live.

Mr. BACON. Do you think they ought to have it?

Mr. JONES of Arkansas. I do not think they ought to be robbed any more than anybody else. I do not think we ought to levy a tax, in the first place, on raw materials. I do not think that the robbery there, because it is levied, would justify another robbery.

Mr. BACON. I want to ask the Senator whether or not he thinks as a matter of right they should have a compensatory duty?

Mr. JONES of Arkansas. I do not believe any tax ought to be levied for the benefit of private individuals, but it ought to be levied for revenue, and it ought not to be so levied for revenue on articles as to create an injustice. A man ought not by taxation to rob somebody else for his benefit. The whole thing is wrong.

Mr. BACON. The Senator declines to answer my question. I have asked him two or three times. I will not press it.

Mr. JONES of Arkansas. I have answered distinctly in plain English, so that anybody can understand what my position is.

Mr. BACON. I have asked the question——

Mr. JONES of Arkansas. Ask the question again and I will answer yes or no.

Mr. BACON. I wanted to see whether the Senator from Arkansas agreed with the Senator from Missouri. I asked the Senator whether he thought it was a matter of right, in case there was a duty upon the raw material, that the manufacturer of the finished product who used that raw material should have a compensatory duty.

Mr. JONES of Arkansas. I answered that when I said I did not believe that any taxes ought to be levied except for revenue. Was not that a plain answer to the Senator's question?

Mr. BACON. No.

Mr. JONES of Arkansas. Then I will answer no.

Mr. BACON. You do not believe there should be a compensatory duty?

Mr. JONES of Arkansas. I do not believe that any tax ought to be levied anywhere on the face of God's green earth except for revenue, and that alone.

Mr. BACON. Very well. Now I have the answer of both Senators plain and explicit. I did not have it before.

Mr. JONES of Arkansas. I think you did if you had read the language.

Mr. BACON. The position of the distinguished Senators is this: The fact that there is a duty levied on raw material does not as a matter of right and justice make it proper that there should be any compensatory duty. That necessarily leads to this proposition, that the argument which they use against a duty on raw material because of a compensatory duty on the finished product falls to the ground. If a tariff for revenue upon the raw material is a proper thing, then we ought not to be deterred from it by the fear that somebody else will do an improper thing. That is the answer to the position of the distinguished Senators.

Mr. President, as we are on that point, I desire to call attention particularly to one thing. I went over it just now, but I think I will emphasize it, in view of what the Senators have just said. They say they do not believe in free raw material. Why? Because they want manufactures——

Mr. JONES of Arkansas. I did not say I did not believe in free raw material. I said I did not believe in a tax on raw material.

Mr. BACON. Very well; that is what I intended to say. The Senators say they believe in free raw material. That is the same thing as saying that they do not believe in a tax on it. The distinguished Senators say they believe in free raw material because they desire that the manufacturer should get that raw material at as cheap a price as possible, in order that he may manufacture cheaply and sell cheaply.

Mr. President, there are two ways in which the manufacturer can make a profitable business. One is by decreasing the cost of the material that he manufactures; the other is by increasing the price at which he sells. In other words, it is the difference between the cost of manufacture and the price of sale which makes his profit; and it does not make a particle of difference to him, so far as that profit is concerned, whether it is secured by increasing the price at which he sells or by decreasing the cost of the material which he manufactures. That is a plain proposition.

Now, what is the proposition of the distinguished Senator on my right? Protection, as we ordinarily understand it in this country, is designed for the purpose of raising the price at which a man can sell his finished product. I think protection which has that for its object is wrong, and I am opposed to it. The Senator says he is opposed to it also. But I do say that those Senators who favor free raw material are in favor of a system of protection that is more odious to me than the system which raises the price of the finished article. Why? Whenever you raise the price of a finished article without decreasing the cost of the raw material, the increased cost is distributed among all the 70,000,000 consumers of this country. On the other hand, whenever you increase the profits of the manufacturer by lowering the price of the material that he uses, he makes the same profit; but that loss in the cost to him of the raw material falls exclusively upon the man who produces the raw material, and is not distributed among the 70,000,000 people who consume it. Is there any answer to that, Mr. President?

Mr. VEST. Yes.

Mr. BACON. I say again, at the risk of repetition, because I now have the attention of Senators, that I illustrate this by the case of the duty upon long-fiber cotton, because that is what it means. I use that as an illustration of the proposition. The manufacturers of fine goods who use the long-staple cotton are not those who purvey to the tastes and necessities of the common people of this country. They are those who make articles which are consumed by the rich all over the country.

The proposition of the distinguished Senators is that the 15,000 or less people in South Carolina, Georgia, and Florida who make this long-staple cotton should furnish to the manufacturers their cotton at $1,300,000 less than it would cost them if an ordinary revenue duty were put upon it, and if that is done the manufacturers can sell to the consumers, who, I say, are the rich class of people, this product at $1,300,000 less than they could sell it if a duty were imposed. Therefore they say that in order that the men who consume these fine goods, these laces, this fine underwear, may have their goods cheaper, the people who produce this long-staple cotton, and who are barely living from hand to mouth, shall be compelled to furnish to the manufacturers their goods at $1,300,000 less, and that instead of the people who consume these fine goods paying the $1,300,000, this cotton shall be furnished at the practical loss to this small class of people of the $1,300,000.

Mr. President, what is there in this particular article which makes it so odious to the distinguished Senators? I was not in the Senate when the Wilson bill was passed, but I recollect that I read with a great deal of interest the fight made by the distinguished Senator from Alabama [Mr. MORGAN] who sits in front of me against the putting of iron ore upon the free list. Who then claimed that the Senator from Alabama was acting outside of the tenets of the Democratic party? And when the compensatory duty of $4 upon pig iron and some other rate upon manufactured iron were put upon it, who said that the distinguished Senator from Alabama had abandoned the tenets of the Democratic party? If anyone said so, point to the RECORD. Senators before me were here then.

Mr. President, I need not go back to three years ago for the purpose of illustration. I can take the RECORD of the last two weeks and point to instance after instance where distinguished Senators on my right rose in their places as the representatives of the party and advocated amendments by which ad valorem duties were put upon agricultural products. The distinguished Senator from Missouri says that he did that in the interest of the lowering of duty, that if he had, as he said in response to the Senator from Tennessee [Mr. BATE], his wish in the matter, he would put them on the free list.

What prohibited the Senator from suggesting the free list? What was there to induce him to ask for 20 per cent ad valorem upon various agricultural products and 35 per cent upon one? He did not expect that any amendment which he offered on the subject would be incorporated in the bill as a law. He was not offering the amendments with the slightest expectation of having them adopted. He was offering them as the representative of his

party and as the exposition of his own view in the matter, to show what his party would do if they were in power and had the framing of this bill, and to show what the Senator from Missouri would do if he had the control of it. Why should he propose 20 per cent upon these various agricultural products instead of moving to put them on the free list?

Mr. VEST. The Senator from Georgia certainly does not mean to misrepresent what I said.

Mr. BACON. Most assuredly not. I would not do so for the world.

Mr. VEST. I stated emphatically to the Senator from Tennessee [Mr. BATE], when he asked me why I did not move to put a certain agricultural article on the free list, that I was entirely willing and anxious to do so.

Mr. BACON. I understand that, and I so stated.

Mr. VEST. The reason, and I have stated it here again and again, was that when an increase upon any article was proposed, we offered the Wilson rate, the existing law, not because we did not want to put the article on the free list.

Mr. BACON. I understand that.

Mr. JONES of Arkansas. We preferred the Wilson rates to the rates proposed here.

Mr. VEST. We preferred the Wilson Act to this proposed law, because the duties are lower, although, as I said to the Senator from Tennessee, we should prefer to place them on the free list. I should like to ask the Senator from Georgia a question.

Mr. BACON. Let me answer that first. I certainly do not desire to misrepresent the Senator, and I think I stated substantially what he has said. I said that the Senator did offer these amendments and that he stated in response to the suggestion of the Senator from Tennessee that he would prefer to have them on the free list. But I went on to say that there was no reason why the Senator, if he had such preference, should have made suggestions of various rates of ad valorem duties, because the Senator was not offering the amendments with the expectation of having them incorporated in the bill. He was simply making a record for his party. He was simply showing what his party would do if they had control of the bill. He was simply showing that they would do now what they did three years ago, when they did put these agricultural products upon the revenue list.

Mr. VEST. If the Senator will permit me, I want to make a frank statement. This is very delectable to the Republican party. They listen with great avidity. Their hearts are cheered, and I can see their eyes gleaming with delight. I have refrained from developing the dissensions in the Democratic party on this side if I could help it. I did not move to put those articles on the free list because I knew the Senator from Georgia and four other Senators on this side would immediately declare that we were attacking the agricultural interests, and because agricultural papers in this country, conspicuously the American, published in Philadelphia, had declared that these were protective duties in the interest of the farmer.

In 1890, when the Republican party proposed these duties upon corn and wheat and oats and rye, when we furnished the home market and then sent nine-tenths of the product abroad, I said that it was a fraud and a farce. In 1894, certain Democrats, when we were compelled to have every vote on this side of the Chamber, insisted upon putting duties, modified as they are in the Wilson Act, upon these articles, and the Senator from Arkansas and myself were compelled to accede to it. I said then, as the RECORD shows, that I did not believe it would help the farmer.

Mr. BACON. Did the Senator take that position in reference to iron ore that the Senator from Alabama insisted should be put upon the dutiable list?

Mr. VEST. I was in favor of free iron ore. I differed with the Senator from Alabama. I was in favor of free lead, and my State produces more of galena ore than any other State in the Union. I am ready to vote for it now. I have gone into the lead regions of Missouri and told them I was for free lead, and if they wanted a man here who would vote to put a tax on it, to send somebody else. That is my position, and I intend to stand by it.

Now, I want to ask the Senator this question, since he has brought up this lavatory here for dirty linen in the Democratic party—these dissensions that exist: Do you believe that the tariff is a tax?

Mr. BACON. I do. But I do not like to be put upon the witness stand in this way.

Mr. VEST. I beg the Senator's pardon. I will put the question, then, through the President of the Senate, with an apology in advance.

Mr. BACON. I will state to the Senator that I do not object, of course, to a reasonable interruption and to any direct question, but as to being put upon the stand for a series of categorical questions upon the tariff, I hardly think it is in accordance with the usual custom.

Mr. VEST. I do not propose to cross-examine the Senator.

Mr. BACON. You started that way.

Mr. VEST. But I do want to ask him this question. He says the tariff is a tax.

Mr. BACON. Yes.

Mr. VEST. Does the Senator not believe, as a Democrat, that the taxation of the Government ought to be limited to the amount necessary to carry it on economically administered?

Mr. BACON. I do.

Mr. VEST. Then how does the Senator propose to put this tax on cotton, or any other article, when he knows there is over $130,000,000 surplus money in the Treasury of the United States now, and that if there should be a deficit of $10,000,000—and it can not possibly be over $35,000,000 for the next year—we can pay it out of the surplus money in the Treasury and still have a surplus besides that?

Mr. VEST. A Senator near me suggests that that is borrowed money. But we do not have to borrow it. We have already borrowed it and got it on hand, as this morning's Treasury statement shows. Then why the necessity of helping the Republican party to put on taxes?

Mr. BACON. If I had my way, Mr. President, there would be no tariff bill passed at this session.

A Senator on my right says in an undertone that as the Republicans are doing it I want my share. I absolutely and utterly repudiate any such suggestion.

Mr. VEST rose.

Mr. BACON. If the Senator will pardon me, I will endeavor to tell him that I have no possible recognition of the propriety of any such position. I put it absolutely behind me. I have no sympathy with the cry that, if the Treasury is being looted, my section must have its part of it. I absolutely abhor the idea. I do say this, however, that whatever revenue bill is passed ought to be equal in its operations to all.

Mr. TILLMAN. And the Democratic platform demands it.

Mr. BACON. Yes; the Democratic platform demands it. I have read that plank of its platform in this Chamber, and I will read it again if anybody desires it.

I say whatever revenue bill is passed ought to be equal in its operations. I say there ought not to be a revenue bill which makes a producer of the raw material buy in a protected market and makes him sell in a free market.

Mr. VEST. If my friend will permit me, has he not just stated that he would not pass any tariff bill and that there was not any need for revenue?

Mr. BACON. Very well, and I am not going to assist in the passage of this bill. Most undoubtedly I will not. Has the Senator ever had any doubt upon that subject?

Mr. VEST. No; I hope not.

Mr. BACON. I am not going to assist in the passage of this bill; but when this measure is before the Senate it is just the same as any other measure that is pending in this body where amendments are being offered. Many Senators who are opposed to a measure offer amendments to it, because, if it has got to pass, they want it to be in such shape that it will be the least harmful; and that is what I mean to do here. I am endeavoring to see to it that the people in my section who produce raw material, and who have to pay the protective prices put upon all they consume which this bill proposes to put upon them, shall have their products put on the revenue list and not on the protected list.

The Senator speaks about my bringing up the dissensions of the Democratic party. I appeal to the Senate, who did it? The Senator said he offered these various amendments as to the duty upon agricultural products because he knew that I and four others on this side would do so and so, whereas the truth is, five amendments imposing ad valorem duties on agricultural products had been offered by the Senator before my amendment was offered, so that the Senator could not have been influenced by what I did.

Mr. President, since that time I have sat in my seat while the Senator has time and again by open and covert allusion referred to me and those with whom I have acted, and I have been silent. I have been silent even when I had a disposition to speak; but when on yesterday the Senator pressed this question about this compensatory duty, and when there was an evident exultation manifested that these Republican Senators had done what Democrats had said they would do, that they had done that which they had urged as a reason why a tariff of 20 per cent upon raw cotton should not be adopted—I say when that was done (and many things were said in the brief discussion yesterday afternoon after I came into the Senate, evidently in allusion to Senators with whom I had acted), I felt it was proper that I should speak. I did not design to make an attack upon the Senator, because I have no such idea; he is not an antagonist to be lightly taken hold of, and there is no man I know of that I would more carefully avoid an unnecessary contest with; but I can not sit here day after day and have allusions made by the Senator to myself and to my associates and still be dumb.

Mr. President, when I offered an amendment for a duty of 20 per cent upon cotton, I offered it in a very unobtrusive, quiet manner. But what led to the debate? Was it not the attack of the Senator from Missouri? I have not desired it. But I do say that it has been my duty, and I still recognize it as my duty, so far as I am able in the making of this tariff bill, to have it rest as equally as possible. I shall be glad to see it defeated altogether; but if it has got to be passed, I want it framed so that it will rest with as little burden as possible upon my people, and that whatever benefits may result from it, they may have their due share, not in the way a Senator suggested to me, not in the way of taking that which nobody ought to take. I will not vote for any protective duty which can be offered if its effect will be prohibitive upon any article which is raised in my State. I will say that to the Senator, although perhaps I have not the public spirit which he claims for himself.

Mr. TILLMAN. I should like to call the attention of these Democratic brethren of ours who are attacking our loyalty to the Chicago platform and to Democratic principles to the duties levied by themselves in the Wilson law:

Buckwheat, corn or maize, corn meal, oats, rye, rye flour, wheat, and wheat flour, 20 per cent ad valorem.

Now, they declare here, as we all know, that these articles are articles of export and that any pretense of protection is a humbug and a fraud; and yet they themselves are only disputing with their Republican brethren over there as to the amount of fraud—whether the duty shall be 20 per cent ad valorem or 25 cents a bushel on wheat, and so on through. Now, let us have a clean record on this business. I stand here myself and announce that if we are to have this stealing from the people by protected interests, I want my share for South Carolina, and I am not ashamed to say it. [Laughter.]

Mr. BACON. Mr. President, I do not agree with my distinguished friend from South Carolina in that particular.

Mr. TILLMAN. But the people of Georgia will agree with me.

Mr. BACON. I do not represent them if they do. I do not think, however, that that is the opinion of the people. I do not think the people desire that there should be an improper tariff upon any article. I do not think the people desire that there should be an advantage given at the public expense to any particular class or section, and I do not think they wish to participate in anything of the kind. I certainly do not. My position is this: I am not in favor of a protective duty on anything, but I am in favor of a revenue duty on almost everything except on some very few articles, like salt. That is my creed.

Mr. President, if I had the drawing of a tariff bill, it would not be 6 inches long. I would simply put all those articles under a certain duty, let it cut where it would. That is the only revenue law you can have which will be stable. I would put a 20 or 25 per cent tax upon articles coming into this country. There are some articles, however, which ought to be free now which we could then afford to pay a duty on under such a tariff by reason of the advantages we would have in the general lowering of rates.

Mr. President, until you have something of that kind you will never have a stable tariff law. As long as you have a tariff law changing with every change of Administration you will have parties interested in this article or that article coming to Congress and each contending that it shall have the advantage over others; you will have an unstable tariff law, and you will never have a stable tariff law upon which the business of this country can rest in safety until you lay down the law that you are going to have a certain rate, and that whenever that rate is not sufficient to yield sufficient revenue for the support of the Government it must be so changed as to yield that revenue, whether that change be in raising it or in lowering it, so that all may come in together upon a common level.

I had no expectation when I rose to do more than suggest the reason why this compensatory duty should not be put on the manufactures of cotton, and further to suggest the argument I have made upon the subject of duties on free raw material. I certainly had no expectation of antagonizing the Senator from Missouri. There is no man I have a higher respect and regard for than he, and if I have, in the heat of the debate, said anything which is unkind to him, I most cheerfully and gladly retract it. I had no such intention.

I recognize him as the foremost—I will not make any invidious comparisons—I will say that I recognize him as one of the foremost men not only on this side of the Chamber, but in the Senate, and that is putting him among the foremost men of the highest deliberative body of all the world. But I said I had no idea of antagonizing him, of doing what he says has been done for the delectation of Republicans. I simply desired to put the case right. We are not here for the purpose of asking protection for any article. We are not here for the purpose of participating in any grab game. We are simply desirous that there shall be equality of burdens and equality of benefits.

Mr. President, I have only one single additional word to say. The Senator from Texas [Mr. MILLS] spoke of "the forgotten man," and that has been reechoed here. Certainly "the forgotten man" is the man to be remembered; but who is he? According to the contention of the Senator from Texas—I am delighted to see that the Senator has come back to the Chamber, because I want to give him a criticism to think about—according to the Senator's contention, "the forgotten man" is the consumer; but in that he is very much mistaken. All consumers are not "forgotten men." All "forgotten men" are consumers. But there are a great many consumers who are not "forgotten men." All these protected classes are consumers; all these men who are to realize this great wealth out of the provisions of this and former tariff bills are consumers, but they are not "the forgotten men."

Who are "the forgotten men," Mr. President? "The forgotten men" are the producers of raw material, who at the same time are consumers; "the forgotten men" are those who have to sell what they make cheap and to buy what they consume very dear, and there is nothing which contributes to the swelling of this crowd of "forgotten men" like the extension of the free list among those who are the producers of raw material out of which those men not forgotten make their great wealth in the finished product.

Mr. BERRY. Mr. President, I had hoped that the lesson given by the Republicans yesterday evening, when they imposed an additional duty of 10 per cent on cotton goods to compensate for the 20 per cent duty on raw cotton, would prove a warning to my countrymen of the South not to engage in this game of grab and steal, as the Senator from South Carolina [Mr. TILLMAN] calls it. In the first place, Mr. President, even if it were honest to do that, I tell our friends from the South now that they can not compete with Iowa and New England in that kind of a game. The people of New England have been playing this game for a great many years, and if the Senators who come here from the South think or hope or expect that they can play even with these experts, I tell them they will find themselves mistaken.

I did think it showed some ingratitude on the part of our Republican friends when the Senator from Iowa [Mr. ALLISON] introduced his amendment. Only a few days ago, when five Southern Senators showed their great liberality by voting for a tax upon the white-pine lumber grown in Michigan and Wisconsin and Minnesota, the Republicans on the other side of the Chamber were delighted, and they hastened over here to congratulate and thank our friend from Georgia [Mr. BACON] who has just spoken; and yet yesterday, coolly, deliberately, after that, the Senator from Iowa introduced an amendment here to impose 10 per cent additional tax on manufactured cotton goods as compensatory for that which had been imposed upon raw cotton of 20 per cent.

Mr. President, I say to the Senator from South Carolina that even if it were right, even if it were just, to join in this grab game, wherever he would get one dollar for the South under a tariff bill, our friends from New England and the Northern part of this Republic would get at least two dollars more out of his constituents and mine for every dollar that they pretend to give in the way of tariff protection.

Mr. TILLMAN. Will the Senator allow me to ask him a question?

Mr. BERRY. Certainly.

Mr. TILLMAN. How much did the South get under the Wilson law?

Mr. BERRY. Well, Mr. President, we did not get much. The Senator from South Carolina was not here then. But the whole country knows the conditions which then surrounded us; the whole country knows that for twenty years the Democratic party had promised when it came into power that it would pass a tariff bill. The country knows that when it came here with only 1 majority, there were men inside the Democratic ranks who, having the same idea which has been advocated here recently, forced taxes on articles contrary to the Democratic faith, and compelled the great majority of Democrats to take that measure or no bill at all.

Mr. TILLMAN. And yet you did not get sufficient revenue from it.

Mr. BERRY. No; but if we had had a Supreme Court which would decide as it had always decided in the past, we should have had sufficient revenue. As a distinguished gentleman said upon a noted occasion, we could not figure upon the fact that a justice of the Supreme Court would change his mind.

Mr. President, I want to say—and I say it in all kindness to the Senator from Georgia who has just spoken, and I want to tell him and the Senator from South Carolina—that since the time the Constitution was formed, since the day that Jefferson laid broad and deep the foundations of liberty and of equality as the Democratic faith, it has been the pride and the glory of the South that the Southern people and the Southern representatives have held honor and principle and equality and justice high above every money consideration. It has been their pride that their Senators stood by principle, and said there should be equality of each citizen before the law; that it was unfair and unjust by legislation to take

money from the pocket of one American citizen and put it into the pocket of another; and yet to-day we are told that this was all wrong; that by standing by principle the South has grown poor and New England has grown rich.

A few men from the South say it was all a mistake; that the highest object and purpose in this life—that is the argument, if not the words—are to get money; get it honestly if you can; get it under the guise of a revenue tariff if possible; but at all events get money—that that is the contention now. Mr. President, I do not subscribe to that idea, and I do not believe that the people of the South subscribe to any such idea. I do not believe that that people which endured hardships such as no others have, who have held truth and honor above money for so many years, will step forth to-day and say, "This is a grab, a steal, a robbery, but we want our part of it." If it is a steal and a robbery, I for one stand here to say that I want no part and parcel in it. If it is wrong, it is wrong. If we are right when we say that it is a robbery to put a tax upon cotton ties and cotton bagging, then it can not be a virtue to put a tax upon lumber or upon raw cotton. These are the ideas that I have in regard to this bill, and I do not agree either with the Senator from Georgia or the Senator from South Carolina.

The Senator from Georgia, while protesting again and again that he was not a protectionist, that he did not believe in levying taxes for purposes of protection, yet used the same argument here when he argued that there were only 15,000 citizens engaged in raising this particular kind of cotton, and he said, "Would it not be better that they should receive this benefit to be contributed by the consumers all over this land?" The few men engaged in the manufacture of cotton bagging and those manufacturing cotton ties say and argue that inasmuch as this tax is distributed among so many people, and it is but very little to them, "Is it not better that we should have this?" The same argument which is used in regard to free cotton applies with equal force to cotton-bagging and cotton ties.

I am not here to enter into any contest. As the Senator from Missouri [Mr. VEST] said, no man has regretted more than I have the divisions which have arisen on this side of the Chamber on this tariff bill. I had hoped and believed that whatever else we might differ about, there could have been no Democratic Senator from the South who would have been in favor of voting a tax for the sake of protection.

I had intended when I rose to speak in regard to cotton bagging, and while I have the floor I will now say what I have to say. The Senator from Iowa states that the committee is deliberating about the matter, but he declined to inform me whether or not they contemplated equalizing conditions by putting cotton bagging and cotton ties on the free list along with binding twine, or whether they intended to put binding twine upon the tax list. The Senator from Georgia says that all he wants is that the tax shall be equalized. I want to say to the Senator from Iowa that that will not satisfy the people of my State.

Mr. BACON. Will the Senator pardon me?

Mr. BERRY. Certainly.

Mr. BACON. If any such expression as that escaped me, it was inconsistent with what I have said here more than once. I thought cotton bagging and cotton ties ought to be free, and I think so to-day. They ought to be free because the general crop of cotton is one which can not in any manner be benefited by the tariff. All of the articles which the cotton planters produce are raised in price by reason of the tariff, and therefore the things which may be necessary in the harvesting or the marketing of their crops ought to be free.

Mr. BERRY. I am glad to hear the Senator say so. I certainly understood the Senator to say that all he wanted was to equalize things, and I understood him to say in the last remarks he made that if he had the making of a tariff bill he would put a tax upon everything except salt. That is my recollection of what he said.

Mr. BACON. So far as the latter statement is concerned, that is true; but I qualified that by stating that if the great mass of articles should be put upon a revenue basis we could afford to have upon the tariff list things which otherwise ought to be free. I know the Senator does not desire to misrepresent me in any way.

Mr. BERRY. Certainly not.

Mr. BACON. And there have been several occasions on which I have expressed the opinion and the wish that cotton bagging and cotton ties should be free, and have given that as a reason for it, although I am ordinarily opposed to a free list.

Mr. BERRY. Of all the mean things in this very mean bill, I think the worst is this tax upon cotton bagging. I think there is less excuse for putting a tax upon cotton bagging than any other article in this bill from beginning to end. It is an absolute necessity for every cotton raiser in the South. It is an article which every man who raises a single bale of cotton is compelled to purchase. It is an article without which he can not place his cotton upon the market. It is an article differing from almost all others, as the tax comes out of the producer and not out of the consumer, because it is not consumed except in transporting the cotton to market whether in the United States or in the foreign market.

It is a direct and specific tax upon each man who raises a bale of cotton to the amount of the tax; and by what reason and how the committee have arrived at the decision that it is just and fair to put binding twine, which is used in Iowa, Minnesota, and the other Northwestern States, upon the free list and this article of cotton bagging, which the farmers of the South are compelled to have, upon the tax list, I can not conceive.

But, Mr. President, I want it understood that if the Senator from Iowa chooses to equalize this by putting binding twine upon the tax list, then I do not agree with him, and will not vote with him. If you wish to impose this tax upon the Southern planter, you have the power to do it; but it is unjust, it is unfair, it is an outrage upon decency in every possible way; and although it is done by Senators from the Northwest, even then, Mr. President, I will not cast a vote to place binding twine upon the dutiable list. No wrong that you can impose upon the people of the South will induce me to do a wrong to the farmers of the Northwest.

I believe that binding twine, as well as cotton bagging, should be absolutely free, and I trust that when the committee have duly deliberated they will conclude that these articles, binding twine, cotton ties, and cotton bagging, which are of absolute necessity to the farmers of the country, the farmers whom the Senator from Minnesota [Mr. DAVIS] this morning told us he was anxious to protect—I say I trust it may be equalized by placing all of them on the free list and none on the dutiable list.

As I said a while ago, I have no desire to enter into controversy with any Senator upon this side of the Chamber, but I repeat that I do not believe the people of the South, although injustice may have been done them, although they receive great injustice in this bill—I do not believe that any great number of them desire to stand before the country saying that "It is all wrong, it is all unjust, it is dishonest, as the Democratic convention said in 1892, but we want our part of it." I will not vote for it. I refused the other day to vote to tax lumber, when the lumber interest of my State is the largest perhaps of any State in the South, except one, it may be, and I do not know which is the larger of the two. I said then that I did not believe in a tax for the purpose of protection. I will not vote for it to protect an article in my State and say that it is a robbery to protect an article produced in another State, because I believe such a position is unjustifiable and inexcusable, and one that no man upon this floor should ever occupy.

Mr. HAWLEY. And yet, Mr. President, the Senator has twice voted for protection in Presidential elections. With the sincere desire to promote harmony here, I present a platform upon which I presume the whole Senate can agree. The Democratic party has twice agreed to it, and I am sure it will quite well satisfy the Republicans. I read from the Democratic platform of 1884, upon which Mr. Cleveland ran for President and was elected, and the next platform, upon which he also ran:

> Knowing full well, however, that legislation affecting the operations of the people should be cautious and conservative in method, not in advance of public opinion, but responsive to its demands, the Democratic party is pledged to revise the tariff in a spirit of fairness to all interests. But in making reduction in taxes it is not proposed to injure any domestic industries, but rather to promote—
>
> To promote—
>
> their healthy growth. From the foundation of this Government taxes collected at the custom-house have been the chief source of Federal revenue. Such they must continue to be. Moreover, many industries have come to rely upon legislation for successful continuance, so that any change of law must be at every step regardful of the labor and capital thus involved. The process of the reform must be subject in the execution to this plain dictate of justice—all taxation shall be limited to the requirements of economical government. The necessary reduction and taxation can and must be effected without depriving American labor of the ability to compete successfully with foreign labor and without imposing lower rates of duty than will be ample to cover any increased cost of production which may exist in consequence of the higher rate of wages prevailing in this country.

Now for the platform of 1888; candidates, Grover Cleveland and Allen G. Thurman:

> Our established domestic industries and enterprises should not and need not be endangered by the reduction and correction of the burdens of taxation. On the contrary, a fair and careful revision of our tax laws, with due allowance for the difference between the wages of American and foreign labor, must promote and encourage every branch of such industries and enterprises by giving them assurance of an extended market and steady and continuous operations.

Under that platform the country was prosperous.

Mr. BERRY. If the Senator from Connecticut will be kind enough to read the Democratic platform of 1892 on the tariff question, I will say to him that it is the one which expresses my views entirely.

Mr. HAWLEY. I thought it was the pride of the Democracy that it has not changed since the time of Thomas Jefferson, and he was a good protectionist and an antislavery man.

Mr. BERRY. There is where I differ with the Senator from Connecticut. With regard to the antislavery question, I do not take issue with him. I deny that Thomas Jefferson ever was a protectionist in any way whatever. If there was any man in this country who was not a protectionist, it was Thomas Jefferson.

I wish to say to the Senator that I remember the platforms of 1884 and 1888; but further, the platform of 1892, upon which Mr. Cleveland was elected the last time, proposes and embodies entirely my views on the question. There it is said that every dollar that is taken except for purposes of revenue is unconstitutional and a robbery. I believed it then, and I believe it yet.

Mr. CHANDLER. Will the Senator from Arkansas who has just taken his seat allow me to ask him a question?

Mr. BERRY. Certainly.

Mr. CHANDLER. It is not about ancient platforms, but one that was laid down here yesterday by the Senator from Arkansas [Mr. JONES]:

> Mr. President, there is no question that whenever a tariff duty is imposed on a raw material which enters into a manufacture there must be a compensation allowed to the manufacturer for the increased prices he must pay for his raw material. There can be no question about it. It is plain, simple, common sense.

Mr. President, I present that as a platform for this immediate exigency upon which we on this side of the Chamber can certainly agree. Does the Senator from Arkansas agree to that platform?

Mr. BERRY. I would not presume to answer for my colleague in his presence, because he can certainly do it far better than I can.

Mr. CHANDLER. I ask the Senator himself.

Mr. BERRY. I will say to the Senator from New Hampshire that as he has construed it and read it, I believe in it in no way and in no sense. I do not believe that you can impose a tax for the purpose of increasing the price of any article in any way for protective purposes without being guilty of a great wrong to the people of the United States, and I care not whether it comes upon raw material, a compensatory duty, or in any other way. If the object and purpose behind it is to increase the price of that article, then I say, in the language of the Democratic platform of 1892, it is none the less a robbery, to quote the language of Mr. Justice Miller, of the United States Supreme Court, because it is done under the forms of law.

Mr. CHANDLER. The junior Senator from Arkansas says "no." Now, will the Senator from Georgia [Mr. BACON] kindly allow me to ask him the same question? Does he agree to the doctrine as laid down by the senior Senator from Arkansas yesterday?

Mr. BERRY. I yield to the Senator from Georgia.

Mr. CHANDLER. And if he says yes or no, or after he defines his position, then I shall take the liberty, if I may do so without giving offense, to ask the Senator from South Carolina [Mr. TILLMAN] whether he agrees to it, because I think, without regard to these old, musty, inconsistent platforms which the Senator from Connecticut [Mr. HAWLEY] has read, we may possibly be able to agree upon a principle that will settle the precise issue which the Senator from Georgia raised this morning. Will the Senator from Georgia tell us whether he agrees to what the senior Senator from Arkansas said yesterday?

Mr. BACON. I wish to congratulate the Senator from New Hampshire upon the successful manner in which he plays the rôle of schoolmaster. I will gratify him by saying that I do not believe in it. I believe in uniform duties on everything.

Mr. CHANDLER. Two Senators have dissented, and, if I can be kindly tolerated, I will ask the Senator from South Carolina the same question. I should like his answer.

Mr. TILLMAN. The Senator from New Hampshire had better sit down. He might get tired before I get through.

Mr. CHANDLER. With pleasure.

Mr. TILLMAN. Mr. President, this washing of Democratic dirty linen is nothing new to me. I have been doing it for some years now, and I have been trying to get the Senate to do some of it, but thus far the committee has not reported, and we do not know whether or not we will get the opportunity.

I do not propose to be misrepresented here in the attitude which I have assumed in the broad light of day as an American Senator, responsible only to the people of South Carolina and enlightened public opinion throughout the country. If it comes to the question of protection for protection's sake, I am not a protectionist, unless it be to this extent: I announced the general doctrine the other day that it is for the best interests of the American people, taken as a whole, judged from the standpoint of statesmanship, to produce what we consume.

If there be any industry in this country which, by reason of foreign competition, can not live and give diversified labor or more employment to our people, and which by a small tariff can be protected to the extent that it can get on its feet, I say it would be wisdom to give it. The only trouble is that when you have started your infant by giving him first milk and then bread and raising him up to be a man, you continue to protect him until he begins to feel the effect of competition, and then he forms a combination or trust and marches abroad in the open light of day a robber, to take from every household in this land tribute levied through the forms of law by Congress under the system of protection. There is where I draw the line. I say you ought not to allow a single trust or combination to come in here and get a duty on anything, because you levy unjust tribute on the American people whenever you do it.

Let us go back for a moment to look at the Democratic party's record. After thirty years or more of exile from government—that is, any controlling power in the Government; for while we at times had possession of the Senate and of the House, the Republicans had the President and the veto power, and there never was a time until 1892 that the people gave us full control of all branches of the Government—we came here on a platform that year demanding a tariff for revenue only.

I led the South Carolina delegation in casting its solid vote in the Chicago convention in 1892 to kick out the spurious bastard that had been brought there by Mr. Cleveland's representative as the declaration of the party on the question of tariff. We cast 18 solid votes from South Carolina in favor of that platform, and I believed in it. I believe in it now. We elected the House, we elected the Senate, we elected the President. They came here charged with carrying out the party pledges. What did they give us? A tariff for revenue only? Oh, no! The Wilson Act, the framers of which, sitting in this Chamber, will not deny that it is a protective tariff from end to end.

Mr. VEST. I deny it. I deny that any tariff is protective from end to end that has in it free salt, free lumber, and free wool, and also the income tax.

Mr. TILLMAN. The income tax is not a tariff.

Mr. VEST. I know that; but I am speaking of the act as a whole.

Mr. TILLMAN. The exception does but prove the rule, and the schedules, taking them throughout, are protective.

Mr. VEST. No.

Mr. TILLMAN. It is said that you passed that tariff under duress, constrained to do so by traitors in the party, who held you by the throat and forced you to accept what you had proclaimed as a fraud and a robbery. You were recreant to Democratic principles and betrayed the party, and the people kicked you out, as you deserved to be kicked out. The Democratic majority in the House of 140 was reversed in the next election, giving the Republicans an equally large majority.

Let us consider for a moment the question of expediency under which the tariff was passed as the best that could be had under the circumstances—the Senate holding the House down and forcing it to accept the sugar differential and everything else; the bill voted for by the Democratic caucus, and forced through the Senate was forced through the House with the knowledge that if the House rejected it the tariff bill would fail. Suppose it had failed. Suppose the Democratic Senators here had stood by the Democratic platform of 1892 and said, "If we can not carry out that platform, we will have nothing," and had put the responsibility where it belonged. Where would our Republican friends be to day? Could they have bamboozled and deceived the people of America last November into the belief that the Wilson free-trade tariff has brought disaster upon this country?

Departure from rectitude and solemn pledges is never permissible. I do not claim that it is. You yourselves set the example when you gave the country a bastard Democratic tariff under Democratic auspices. You voted for it because you could not get anything better, just as I am voting to-day to get what little I can from the Republican party for my own section. I know I can not prevent the passage of the measure, no matter how I vote. Every man here and anywhere else knows I have not trafficked with you Republicans. I have not bargained with you, I have not begged you, I have not interceded for any industry or interest in South Carolina. I simply voted as I have because I felt if we were to have this infamy it was best for South Carolina to get what little it could, and the people of South Carolina will hold me responsible or not as they see proper, and I am ready to rise or fall by their decision.

The Democratic party when it came into power in 1893 did not carry out its pledges. The same platform which you have exploited here to-day as the essence of Democracy demanded the free coinage of silver upon certain conditions, leaving it to Congress to fix the ratio. The President, by his patronage, bought enough Representatives at the other end of the Capitol to get through a measure for the repeal of the Sherman Act, and when it came here he bought enough Senators to get it through. The party betrayed, disgusted, and almost disbanded. But for the fact that there has been a new leadership, a turning down and turning out of old fossils and traitors, we would to-day be hopeless, instead of being

buoyant with hope, determined and aggressive, and progressive, the last the most hopeful sign of all.

We are face to face with conditions and not theories. We must realize that we have to fight the Republicans with fire, on the doctrine that you must fight the devil with fire. I propose, if an amendment is offered here putting binding twine on the dutiable list, to vote for it, because I want your wheat farmers to be on an equality with ours who grow cotton, and that is as near the poorhouse as we know how to get.

I want you to press home on them the love you have for the agriculturist, and not to feed him on this soft corn of 25 cents a bushel tariff on wheat and everything else, which you know does not give him any protection, while you refuse him a bounty. You do not give him any absolute or actual help at all, but you simply offer him specious generalities and pretenses, humbuggery and falsehood. I want to get him to understand that Republican professions, like Democratic professions in the past, are only lip deep when they come to deal with the agricultural interests.

I hope to go into the West some day and meet some of you gentlemen among your own constituents and tell them how you stood here and had an opportunity to offer some little modicum, a small percentage in return of what you had taken, which would have been in absolute accord with your professions of protection—trying to protect everything American, and with the doctrine of America for Americans carried out in good faith I will tell them how you stood here and voted "no," just as the gentlemen on this side, proclaiming the doctrine of equality, equal rights to all and special privileges to none, voted "no," too, and refused to give back to their people that which they claim will be stolen from them by forms of law.

If anybody wants to know where I stand, I think he understands it now. I am not ashamed of the position. I claim to be as good a Democrat as ever walked in shoe leather, as I understand the principles of Democracy; that is, equality, equality, equality; equality of opportunity, equality of burden. That is the fundamental doctrine of Democracy. If we of the South can not get equality under a Republican tariff and under Republican administration, then I want just as much of it as possible, and I will not thank you whether you give it to me or not, and I will not submit to criticism from Democrats who differ with me without striking back.

Mr. HAWLEY. Mr. President, I think I must justify myself in saying that Thomas Jefferson adhered to the protective doctrine, and I mildly protest against the Senator from New Hampshire when he referred to some late Democratic platforms as musty. It is the pride and boast of that party that it never gets musty; that it is eternal and unchangeable. I said Thomas Jefferson was a protectionist. In his second annual message he described as a prominent duty of Congress—

> To protect the manufactures adapted to our circumstances.

The first revenue act of the Government, the tariff act of 1789, distinctly avowed that it was not only for the purpose of revenue, but to protect our manufactures. Now, that succeeded. It did raise revenue. There was likelihood of a surplus, and Mr. Jefferson, speaking of the best method of disposing of the surplus, said:

> Shall we suppress the imposts (duties) and give that advantage to foreign over our domestic manufactures? On a few articles of more general and necessary use the suppression in due season will doubtless be right; but the great mass of the articles on which imposts are laid are foreign luxuries, purchased by those only who are rich enough to afford themselves the use of them.

Again he wrote, and this is more specific:

> The general inquiry now is, Shall we make our own comforts or go without them at the will of a foreign nation?

Note this, please:

> He, therefore, who is now against domestic manufactures must be for reducing us either to a dependence upon that nation or to be clothed in skins and live like beasts in caves and dens. I am proud to say I am not one of these. Experience has taught me that manufactures are now as necessary to our independence as to our comforts.

Again he said:

> The prohibiting duties we lay on all articles of foreign manufacture which prudence requires us to establish at home, with the patriotic determination of every good citizen to use no foreign article which can be made within ourselves, without regard to difference of price, secures us against a relapse into foreign dependency.

Again, in 1817, he said:

> The history of the last twenty years has been a significant lesson for us all to depend for necessaries on ourselves alone; and I hope twenty years more will place the American hemisphere under a system of its own, essentially peaceable and industrious and not needing to extract its comforts out of the eternal fires raging in the Old World.

That is not musty.

Mr. BURROWS. Mr. President, recurring to the subject which is immediately before the Senate, namely, the question of flax and the amendment proposed by the Senator from Arkansas [Mr. JONES], I will state that the State of Michigan is so much interested in the industry that I would feel myself recreant in duty if I did not present a petition signed by people in the city of Yale engaged in this industry. They say:

YALE, MICH., *January 27, 1897.*

Hon. Nelson Dingley, Jr., chairman,
And members of the Ways and Means Committee.

GENTLEMEN: I desire to call your attention to the following situation regarding the flax industry in Michigan and elsewhere.

We established our first flax mill here at Yale in 1887. Since that time we have established scutching mills at Fargo, St. Clair County; Brown City, Crosswell, and Deckerville, in Sanilac County, and Berne, in Huron County.

The entire product of these mills is handled from this place, where we have shops and appliances for hackling the same. At the time we established the plant the McKinley bill was in force, and under its provisions we felt warranted in making the necessary investment, and believed that the industry could be successfully established and built up in this country.

It is our practice to furnish seed for the farmers in the vicinity of each of these mills, and when delivered we pay them by the ton for their product. Prices have averaged about $10 per ton. By this means we have paid out to farmers tens of thousands of dollars annually, and at a time of year when they have little else to sell.

We find that there is much territory in this State where a first-class fiber can be produced. The soil and climate are suitable, and farmers are anxious to continue the culture, but find that it is simply impossible for us to continue the business under existing conditions, for the following reasons:

The industry is but recently established and must be encouraged in order to get farmers interested in the culture of flax. The labor paid for scutching and hackling in European countries is but one-half of that paid for the same work by our firm. The following is a fair approximate statement of the first cost of the product of 100 tons of green flax:

Price paid to farmers	$1,000
Paid for scutching, thrashing, handling, and hackling	1,400
Approximate total cost at mills	2,400

You will notice that of this total, five-twelfths is the raw product of the farmer, wholly unprotected under the provisions of the Wilson bill, while seven-twelfths of the amount is paid out for labor, as above stated.

We find that for the labor paid for thrashing, scutching, etc., we pay one-third more than is paid in Europe, while for hackling we pay twice as much as is paid there, upon which point we refer you to the attached affidavit of George Anderson, who has worked in the mills of that country and many years at the same work at various places in this country.

In order to place the American farmer, and also the American who scutches and dresses flax for the market, on an equal footing with like classes in Europe, it is absolutely necessary that there be a sufficient protective tariff placed on both to cover at least the difference in labor paid here and abroad.

We have taken pains to have a large number of native-born Americans, principally young men, taught the various branches of our business; and it is impossible for them to exist upon such wages as are paid abroad.

In this connection you will observe that a large percentage of the $10 per ton paid to the farmer is his labor, while at least from 60 to 75 per cent of the total amount received by us for our product is again paid out for labor here. All of this labor is thus brought in direct competition with the cheap labor of Europe.

To afford a sufficient protection to enable us to continue the business and fully establish the industry here, we suggest the following rates:

On hackled flax, 3 cents per pound.
On unhackled flax, 1½ cents per pound.
On hackled and flax tow, 1 cent per pound.
On all other flax tows, 1 cent per pound.
On upholstering tow, one-half cent per pound.
Paper-stock tow, free.

We desire to also call your attention to the fact that we are compelled to import seed from Holland every second year for distribution among farmers. This seed does not come in competition with the product of American farmers, as seed must be changed in order to improve the fiber. Therefore we suggest that seed for the purpose of sowing should be imported duty free. We respectfully refer you to the findings of Special Agent Charles Richards Dodge upon this point.

Undoubtedly the spinners who appear before your committee will urge that unhackled flax and tow should be admitted duty free, because of the claim made by them that it is raw material. But we wish to call your attention to the fact that these are the finished products of the farmer and of the American mills, and unless these be protected the industry can never be established in this country.

Most respectfully submitted.

JAS. LIVINGSTON & CO.

STATE OF MICHIGAN, *County of St. Clair, ss:*

George Anderson, being first duly sworn, deposes and says that he is a resident of Yale, St. Clair County, Mich.; that he is a flax dresser by trade, and is now engaged in that business; that he was born in Scotland, and moved from that country to Andover, Mass., about seventeen years ago; that previous to that time he had been engaged in dressing flax at his home town in Scotland; that for a full week's labor, working by the piece, and consisting of six full days of ten hours per day, this deponent was enabled to earn on the average from £1 sterling to £1 5s., or its equivalent of from $5 to $6 per week; that he has been constantly engaged in said work of dressing flax since his arrival in this country, and that his earnings for the same class of work for a week of six days of ten hours per day, working by the piece, averages from $10 to $11.50 per week.

This deponent further says that he meets fellow-workmen who have come to this country from Scotland, Ireland, and England at various times since he arrived here, and has learned from them the state of the work and the amount paid for labor there; that from direct information thus obtained this deponent states that the workmen engaged in this work are enabled to earn, on the average, twice as much in wages for the same character and amount of labor in this country as in the said foreign countries above named.

GEORGE ANDERSON.

Subscribed and sworn to before me this 19th day of January, 1897.

HARVEY TAPPAN,
Notary Public, St. Clair County.

I have also a letter from a gentleman who, I think, is the largest producer of flax in the United States. He is largely interested in the industry, and, as it is a very short letter, I will read it:

YALE, MICH., *May 25, 1897.*

DEAR SIR: We are in receipt of yours of the 14th instant, and fully note contents. We are very much pleased to learn that you will use your influence, when the proper time comes, to further the interest of the flax industry. The schedule as passed by the House, although not what the Western

flax men ask for, would be fairly satisfactory to us, or, in other words, the McKinley rates restored as they were previous to the Wilson bill. The great cry of the spinners has been that we could not raise flax for fiber purposes in this country, but we have demonstrated to the Ways and Means Committee beyond a doubt that at least in Michigan we can grow just as good flax as can be grown anywhere in Canada or Europe. As a matter of fact, we have imported hundreds of tons of Canadian flax and hackled it here, then sold it as American flax, and the spinners could not tell where it was grown.

We have this spring sowed nearly 4,000 acres for fiber purposes, and an industry of this vast importance to the farmers ought to at least have a reasonable amount of protection to cover at least the difference in cost of labor. The spinners claim it is their raw material, but forget it is the farmers' and flax merchants' manufactured product. They have had from 35 to 50 per cent duty on their manufactured goods to enable them to compete with the cheap foreign labor of Europe, and strongly object to the farmers and flax merchants having 10 per cent; and we have to compete with the same field of labor and pay the same wages. This is certainly an injustice, and the industry must go down unless a reasonable amount of protection is afforded them. We are the largest growers of flax for fiber in the United States, and will be very much pleased to furnish you any information you may desire on the subject. We also inclose you copy of memorial submitted to the Ways and Means Committee. We would like to send you samples of our flax, which might be submitted to an expert without their knowing where it was grown. We feel safe in saying there is no better for spinning purposes; in fact, all the spinners have been using it for years. And why allow the foreigner to produce all our flax?

Yours, very truly,

JAS. LIVINGSTON & CO.

Hon. J. C. BURROWS,
Washington, D. C.

I ask to have inserted in the RECORD a statement by the president of the Minnesota Flax Company, which covers the whole question.

The PRESIDING OFFICER (Mr. CHANDLER in the chair). In the absence of objection, the paper will be printed in the RECORD.

The paper is as follows:

WASHINGTON, D. C., *April 13, 1897.*

GENTLEMEN: I wish to call your attention to the inadequacy of the rates proposed by the House tariff bill, now being considered by you, upon at least two of the items in Schedule J, pertaining to flax, but particularly "Flax, not hackled or dressed, 1 cent per pound," and "Tow of flax, rotted, 1 cent per pound."

As a preface to my remarks, I will state that after centuries of culture, production, and use of flax and its textile, linen, throughout almost the whole of the known world, especially by the more enlightened nations, by whom it has ever been honored and esteemed, the United States has dishonored flax, and, by its failure or absolute refusal to encourage its growth and production, this country has been not only negligent of enterprising development, but wasteful to a degree beyond conception. Without going into the subject of the oft-proven suitability of soil and climate of this country, I will state that in the face of every possible discouragement this industry has been established upon commercial bases in the States of Michigan and Minnesota, the former having in operation six mills, by Messrs. James Livingston & Co., with headquarters at Yale, Mich., and the latter two mills, one at Northfield, Minn., operated by the Minnesota Flax Company, Minneapolis, and the other at Rochester, operated by Messrs. Furlow & Co. There are, besides these, one fully equipped with machinery at Sioux City, Iowa (the Floyd Valley Flax Fiber Company, Capt. T. P. Gere), which has been idle for several years, and one is about starting in Oregon, Mrs. Governor William P. Lord being associated with its establishment. Many others would have been (or will soon be) in operation were there any encouragement offered by protection to equalise the cost of labor here with that of countries abroad where flax is produced.

That you may partially appreciate the true status of this industry as it exists now, and particularly as demonstrating its almost limitless possibilities for this country in the near future, I will say that the Minnesota Flax Company, Minneapolis, Minn., are now working up only their second crop of flax, and that it is suitable for use of Belfast spinners, where the finest class of spinning is done. They have now in process of practical test in Belfast and Lisburn, Ireland, about 3,000 pounds, and have received encouraging reports, notwithstanding the market is more depressed than ever before known. This, too, in the absence here of thoroughly trained or "expert" labor. The fact is also established that the foreign market affords us a better price than the American. This is no doubt owing to the vastly greater variety of spinning and weaving done abroad and to the inability of the American spinners to pay beyond a certain price for their flax, because their spinning and weaving are as yet only of the coarsest grade.

With reference to my claim that the rates as named in the schedule of the House Ways and Means Committee are inadequate and inequitable for flax, I beg to offer the following: Take as a basis flax, unhackled, at 1 cent per pound, and retted flax tow, at 1 cent per pound. Unhackled flax (water-retted) is worth 9 cents to 10 cents per pound. This makes the duty equal to 11 per cent. Unhackled flax (dew retted) is worth 7 cents per pound. The 1 cent per pound duty is equal to 14¼ per cent ad valorem. Retted flax tow is also worth now about 7 cents per pound. This makes the duty equal to 14¼ per cent ad valorem. Now, the hemp schedule is assuredly none too high; yet compare the flax rates, as above, with them: "Hemp, hackled, known as 'line of hemp,' or 'dressed line,' $50 per ton;" this is equal to 33⅓ per cent, as the market price is $150 per ton. Hemp, $25 per ton (1½ cents pound); market price for this April 1 was $75 to $95 per ton, or 3¾ cents to 4¾ cents per pound; the ad valorem upon this is 33⅓ per cent to 25 per cent, according to price, or, we will say, an average of 29 per cent. Tow of hemp, not carded, 1 cent per pound; price, 3½ cents, equal to 29¼ per cent.

RECAPITULATION:

	Per cent.
Flax:	
Hackled, 3 cents per pound (dew retted)	21¼
Unhackled, 1 cent per pound (water retted)	11
Unhackled, 1 cent per pound (dew retted)	14¼
Retted tow, 1 cent per pound	14¼
Hemp:	
Hackled, 2½ cents per pound	33⅓
Unhackled, 1½ cents per pound, average	29
Tow, 1 cent per pound	29¼

Without taking into consideration the greater amount of expert labor required to produce unhackled or scutched flax, as compared with unhackled hemp, it will be seen that an injustice has been done to flax, and I beg that you will amend the flax schedule to read:

323. Flax, not hackled or dressed, 2 cents per pound.
324. Flax, hackled, known as "dressed line," 4 cents per pound.
325. XXX tow of retted flax, 2 cents per pound.

If these rates are adopted, the percentages would then only be, using as basis the prices heretofore mentioned:

	Per cent.
Flax:	
Hackled, known as "dressed line"	28½
Unhackled (water retted)	22
Unhackled (dew retted)	28½
Retted tow	28½

These rates would be practically the same as hemp, and would fairly equalise them, as well as being a step in the direction toward aiding us to continue to pay the scale of wages we now do, this scale being from 100 per cent to 300 per cent higher than are paid in foreign flax-raising countries. As another reason for asking you to advance the rates upon unhackled flax and retted flax tows, is to prevent the repetition of fraudulent undervaluations and efforts to import "roughed" or only partly hackled flax as "scutched" or unhackled flax, which I am credibly informed has been done. I could furnish other arguments, if necessary, but I trust those I have enumerated will be sufficient. But you must also be impressed with the meagerness of even the highest rates I have named as affording only slight protection to our industry.

Earnestly soliciting your favorable consideration of and action upon my petition, I beg to subscribe myself,

Very truly, yours,

S. H. WARDEN,
President Minnesota Flax Company, Minneapolis, Minn.

The COMMITTEE ON FINANCE,
United States Senate.

Mr. STEWART. Mr. President, since there has been so much comment on platforms and so much criticism of votes, which produce the same result, but spring from different motives, I think it well to call attention to the Chicago platform of last year, 1893, the last declaration of the Democratic party. I think it is in exact point upon the question whether a tariff should be equally distributed and protection should be extended to all. I read from the platform:

We hold that the tariff duties should be levied for purposes of revenue, such duties to be so adjusted as to operate equally throughout the country and not discriminate between class or section, and that taxation should be limited by the needs of the Government honestly and economically administered.

When I am told that a duty on woolen cloth with wool on the free list is in accordance with that platform, I must say that if such a declaration is true, my knowledge of the English language is very defective. That would certainly discriminate against the people engaged in agriculture and those engaged in manufactures. It would discriminate between classes and between sections. Manufacturers are a class and farmers are a class. The labor of one is entitled to as much protection as the other. There is nothing peculiarly sacred about the labor in the manufacturing cities of the East which would cause it to be protected while the labor upon a farm is not protected, but is on the free list. I say a tax that will protect the labor engaged in the manufacturing of woolen cloth and refuse to protect the labor engaged in the raising of sheep and producing wool is an unjust discrimination; it is unfair. So I might say with regard to many other articles.

I care not for a man's motives, whether he votes for a protective tariff to produce revenue or whether he votes for the same protective tariff to produce protection. If it results in the same thing, I take his vote, if it is according to my way of thinking, no matter what his motive may be. It is all nonsense to talk about motives in regard to this bill. It is like the idea of a man committing murder with his eyes open, shooting a man and saying that his motive is to save his soul, or something of that kind, and another one's motive is that his soul may be damned. I think the moral folly in each case would be about the same. I do not think there is much difference.

It is established beyond controversy, agreed by all parties, that there shall be a tariff, and that the tariff shall be levied in the main upon competitive articles, because Democrats and Republicans from time immemorial have as a rule put on the free list those articles which we do not produce in this country and on the protective list those that we do produce in competition with other countries. That has been the rule. Sometimes the Republicans have put on the free list articles that ought to be on the protective list, and they have made an unjust discrimination, and the Democrats have done the same; but I speak of the general rule. It is the consensus of opinion that we shall have a protective tariff.

The Wilson Act was a protective tariff measure. It has been suggested that it was defective, because it made a discrimination against wool and did not protect everything that ought to have been protected. That was a defect in it; but it did not go to the general theory and general framework of the bill as a protective measure. The discussion during the long hot days of the summer session in which that bill was passed was as to how much the article would bear, what degree of protection was necessary. The whole discussion was as to whether the protection would be sufficient and how it would be effective. And the discussion on this bill has been, from beginning to end, how the particular tariff would affect the production of the article, whether it would be a monopoly, whether it would be wrong, whether it would be excessive, whether it would be prohibitory, or whether it would be protective and still allow competition and raise revenue.

I believe the general theory, according to the discussions on both sides of the Chamber, is the same. Both sides want protection, and neither will say that they want prohibition. None of them want a prohibitory tariff. In other words, they say they do not want to build a Chinese wall around this country, but they want commerce, and consequently they must levy a tariff so that there can be some competition. That is agreed to by both sides, and they go on discussing the question upon the particular article.

I say that so long as the theory is assented to that we shall have a protective tariff, and so long as the parties act upon that theory, it is absurd to bring in the free-trade theory and propose to put some article on the free list and thus discriminate against the section of the country where that article is produced. When my friend from South Carolina wanted a tariff on cotton for the purpose of reaching the Egyptian staple cotton that is competing with it, he was representing his section properly and rightfully, and when we ask in the West for a tax on those articles that are peculiar to our section of the country, we are simply seeking to have the principles of the Chicago platform carried out and asking that there shall be no discrimination against class or section.

It is not worth while to try to make an issue between the two parties on the tariff. There is no issue between them, and has not been since the theory of free trade was given up. Every effort that is made to place upon the free list an article that is produced in this country in competition with other countries is made in favor of discrimination and against the Chicago platform. If we could levy a tariff that could reach all competitive articles and be such as to produce revenue and make foreign trade, it would stand; every section would agree to it. The difficulty about our tariffs is that they are unjust. Take the matter of hides. All farmers raise some cattle and produce hides. That is done with American labor. But, it is said, there is some theory that must be followed, and you shall not protect that class of American labor. I want to know why it is not just as beneficial to the Government of the United States to have laborers in the fields as it is to have them in the cities?

It is a violation of the principle of equality which makes tariffs distasteful. You have agreed all around to have a protective tariff. Now make it honest and protect all sections alike, as declared in the Chicago platform, and your tariff will stand. It is idle to attempt to make a national issue on the protective question when there is no issue between the parties. I know that there is a temptation to grab, to get undue protection on some articles, and to make discriminations. The legitimate fight here is upon discriminations, and both parties profess to be against discrimination. You can not make a national issue out of the tariff any more since free trade was abandoned; the planks are substantially the same, and all attempts to make them different by using different language to mean the same thing are futile.

The great issue is whether the people of the United States shall have money with which to do business and with which to buy, so that they can buy the products of the manufacturers and the products of the farms and prosper again, or whether a corner on the money of the world shall be continued and civilization mercilessly destroyed—whether a few men organized in London with a branch in the city of New York shall take from the people their circulating medium and make slaves of them. That is the issue. That is the issue in the Chicago platform, and that issue can not be superseded. Six and a half million people declared that that was the issue, and they meant it; and it has been reenforced by hundreds of thousands since, and they mean it.

The Chicago platform is the platform of a party marching on. It declares for an honest tariff without discrimination. I am in favor of such a tariff, levied to protect all interests alike, and a tariff which shall produce revenue. The labor in one section is as much entitled to protection as in another. I am in favor of that kind of a tariff, and I hope that we shall get it. But whether we get it or not, when this bill passes the tariff as an issue will be a thing of the past. The question has been agitated for a hundred years. We have had good times and bad times under high tariffs and low tariffs. There may be great injustice in the tariffs in the way of discriminations, but it can not be sufficient to mark the line between prosperity and universal depression.

In every instance when we had universal depression in this country we had a contraction of the money volume. Every panic has been produced by a contraction of the money volume. There never has been prosperity under contraction in any country on earth. When prices are falling, business is necessarily stagnant, hope is removed, opportunities are lost. When prices are firm, prosperity universally follows, and the world is full of hope. Give that hope, let prices rise, let the people again have opportunities, and they will produce wealth. They will make this country prosperous, and happy, and wealthy under any tariff.

With continually falling prices, decay is inevitable. History marks that. Trace the history of every country, and it will show that the period of its decay was the period of contraction of the money volume and falling prices. The period of growth and prosperity of every country has been a period of expansion and rising prices. The difference between bad times and good times is marked by the line of falling prices on the one hand and rising prices on the other. With rising prices, labor can be converted into money by producing property and selling it for money and by selling the labor direct. When prices are falling, the production of property by labor is idle. Effort will not pay, and consequently effort ceases and man starves.

The great issue stands out before us in bold relief. The country is divided on it, the platform is formed, and the people have placed themselves in array of battle. They now understand what ails them, and they are marching into line. Any issue that you can form, like the tariff, that will make A or B rich or poor, but can not effect a general result, will be ignored in the grand struggle.

Let this tariff bill pass, and let the country see how impotent it is to restore prosperity while the iron grasp of contraction is paralyzing the enterprise of the country. I am in favor of its speedy passage, and I am in favor of having it in about any shape that the Republicans want it, so as to take from them the last particle of excuse. Do not let them tell us that they did not have a chance to produce prosperity. They will have the chance; they have the votes; they have the responsibility, and let them, if they can, redeem their pledges by tinkering with the tariff. It will be idle. That is my view about the bill. Having said this much, I think I am properly understood.

Mr. JONES of Arkansas. Mr. President, I believe the matter under consideration in the Senate is whether we shall have a tax of 1¼ cents or 3 cents upon paragraph 322 of the flax schedule. There are a few propositions which have been presented by different Senators, however, during the progress of this debate that I think I must take a minute or two to reply to.

The Senator from Nevada [Mr. STEWART] who has just taken his seat declares that he is in favor of protection; that he wants it uniform and wants everybody to have an equal benefit. Now, my understanding is that if by protection given to an individual he sells his product in the market at a better price than he would get otherwise, he gets an advantage by it.

I think that a protective tariff to be of any benefit whatever must necessarily and essentially be unfair. It must be for the benefit of certain people and against the interests of the masses. Whenever the Senator should succeed in having an ideal protective tariff, such as he would like to have, and makes it operate equally on everybody, then no one on the face of the earth would care anything about it, because nobody would get any benefit of it. The reason why it is advocated now is because somebody gets a benefit.

I am opposed to a protective tariff because I do not believe that there is any power vested constitutionally in Congress or anywhere else to levy a tax upon the people of this country except for public purposes alone. I believe that Justice Miller, in an often-quoted sentence, used in a case that is well known to everybody, spoke the literal and exact truth of the constitutional power, and, as it deserves to live in the minds of the American people everywhere, I will read the quotation. Judge Miller said:

> To lay with one hand the power of the Government on the property of the citizen and with the other bestow it on private individuals to aid private enterprises and build up private fortunes is none the less robbery because it is done under the forms of law and is called taxation. This is not legislation; it is a decree under legislative forms.

In more literal and exact truth a great principle was never enunciated by a great Republican judge. I believe that that is the truth, and hence I am opposed to protective tariffs everywhere.

The Senator from New Hampshire [Mr. CHANDLER] a few minutes ago catechised several Senators as to whether they believe a statement of mine made on yesterday is correct. I will read my expression:

> Mr. President, there is no question that whenever a tariff duty is imposed on a raw material which enters into a manufacture there must be a compensation allowed to the manufacturer for the increased prices he must pay for his raw material.

Of course, if we expect that manufacturer to stand on an even footing with other manufacturers, if our American manufacturer is not to be handicapped, if we are not to impose any hardships and burdens upon him, we must compensate him for whatever burdens we put upon the material he uses. If it is right and proper that burdens shall be imposed upon manufacturers, and that our manufacturers shall be handicapped and rendered unable to compete with other manufacturers in the world, if that is the purpose of Congress, then, of course, it is proper enough that there shall be no compensation for a tax levied upon them by a tariff of that sort.

I used that expression, Mr. President, to show that I am opposed to the levy of a tax upon raw materials. You can not handicap our manufacturers by levying taxes of that sort without compensating them equally somewhere else. It is, as I said yesterday, a plain matter of common sense, as it seems to me.

While I am unalterably opposed to a protective tariff, I do not believe in revolution. I believe that these old moss-grown iniquities ought to be removed, but they must be removed one by one. You can not take down a brick wall with safety by beginning at the bottom. You must take the bricks off the top. You must remove the taxes upon the raw materials first and lower the taxes on the manufactured products step by step, degree by degree, until you have been able to take away the whole of the system. It can not be done otherwise.

I am not in favor of destroying any interest. I have said that again and again. When a system has been in vogue for thirty years, when we have been maintaining it, and have encouraged people to invest money in manufactures that have been kept up and that have grown up under high protection, I do not believe it is right that we should revolutionize the whole of that thing in an hour. I believe that time ought to be given for American interests to adjust themselves to changes in the law. Hence I am in favor, and earnestly in favor, of having raw materials free. I think it is a simple impossibility to talk about beginning your system of taxation by taxing raw materials that enter into everything.

Mr. CHANDLER. May I ask the Senator a question there?

Mr. JONES of Arkansas. Certainly.

Mr. CHANDLER. Referring to his figure of taking down the tariff edifice by beginning at the top, brick by brick, until it is all gone, I wish to ask the Senator whether he believes that that can be accomplished in this country without reducing the wages of labor in all branches of industry down to the rates that prevail in foreign countries?

Mr. JONES of Arkansas. All of this, Mr. President, do I most devoutly believe. There is no sort of question in my mind that the American laborers can hold their own against any labor on the face of the green earth. On account of the intelligence, the superior manhood, the greater tact, the superior energy, the high-paid, high-fed American laborer can hold his own against the laborer anywhere.

Mr. CHANDLER. Now, if the Senator——

Mr. JONES of Arkansas. Let me finish answering this question before the Senator starts another. If the Senator had done me the honor yesterday to have looked at some tables I put in the RECORD—I think it was yesterday—showing the enormous increase in industrial enterprise in this country as compared with Great Britain and Germany for the last twenty or thirty years, he would have seen the reasons for my belief. He would have understood that, while our manufacturers pay a man $3 per day in this country, whereas on the other side of the water he is paid $1.50, perhaps, in some countries, and 75 cents in others, the product of the American's labor is so much greater than the product of the labor of any ignorant, narrow-minded, half-fed, and half-clothed foreigner with whom he competes that it exceeds the product of the foreigner in a much larger ratio than his wages exceed the ratio of wages paid to the man on the other side. Hence the labor cost of the particular fabric in this country is less than it is on the other side.

This is not the case in every single instance, but it is the case as a rule, as I believe. I do not believe the American laborers are any more in danger of being overrun or driven out of their business because there is not some unjust system of taxation to enable their employers to take money unjustly and unfairly out of the pockets of other people than I believe the moon is made of green cheese.

Mr. CHANDLER. Then, Mr. President——

The PRESIDING OFFICER (Mr. PASCO in the chair). Does the Senator from Arkansas yield to the Senator from New Hampshire?

Mr. JONES of Arkansas. Certainly.

Mr. CHANDLER. I understand the Senator to maintain that the whole fabric of protection as it has existed can be abandoned, and yet our manufacturers, capitalists, and laborers can continue to prosper with a rate of wages of labor in this country substantially twice what it is in European countries. That is the Senator's faith and belief, is it?

Mr. JONES of Arkansas. That is my belief. The wages in England to-day, after they have been on a free-trade basis for half a century, are higher than they are anywhere on the Continent, where they have had protection all the time. I believe protection can be abandoned and yet the high wages maintained. The reason why the wages have been maintained in spite of your high taxes is because of the labor organizations. The effort has been made again and again to drive down the prices of labor. They are being notified to-day by members of the Senate that the prices of labor must go down; and yet you are proposing to raise tariffs higher than ever known before on the face of the earth. I venture the prediction now, if the bill passes (as it seems likely to do, looking at the solid phalanx that the Republican caucus has been able to organize for its support), and if the conference committee on the part of the Senate practically yield all the amendments that they have made and restore the outrageous rates, as it seems to me, that were in the Dingley bill, that the bill itself will absolutely destroy protection as a system. But I am not in favor of doing evil that good may come.

Mr. HAWLEY. I wish to ask the Senator a question.

Mr. JONES of Arkansas. Certainly.

Mr. HAWLEY. I appreciate his high compliment to the ingenuity and effective industry of the American workingmen, but I should like to know whether a man at $2 a day will shovel twice as much coal as a man at $1 a day. That is the essence of the Senator's philosophy.

Mr. JONES of Arkansas. There is not as much difference as the Senator thinks, but I accept his illustration. I have seen that, Mr. President, more times than one in my life, and I have been in many positions in life. Any man who feels that it is a square thing and that he has a fair share in what he is doing, works with a better will, with more force, vim, and energy, than a man who believes that his labor is being forced out of him by unjust laws and by advantage being taken of him by the man for whom he works. Men do better labor, they do more efficient labor, even when handling coal, when they believe they are fairly and well paid than when they believe they are not well paid; and this is especially the case where they are well fed, as against the men who are not well fed and who are not well clad.

Mr. HAWLEY. There is no sort of doubt that the American workman is, and always will be, the best workman in the world; but where the foreigner tends six and eight machines, no American workman, however skillful, can attend twice that many, no matter what his rate of wages might be, even if he should receive twenty-five times as much.

Mr. JONES of Arkansas. The truth is, the man who gets a dollar a day does not attend as many machines as the other man. I am glad of the Senator's suggestion, and before we get through with this debate I will present a comparative statement I have, showing the number of spindles that are attended by a spinner in Great Britain in comparison with those attended by the spinners in the Senator's own State. The comparison is one to make any man proud of his American citizenship, of the American system, and of the practice in American institutions.

It will show that the American superintends almost twice as many spindles in many industries as the spinner does in England, while the American does not get twice the wages. If a tariff is going to raise the wages of the laboring people, why has it not raised the rate of wages in France, in Austria, and in Germany, where they have had high taxes from time immemorial? Why is it that in free-trade England, where they have had no tariff for half a century, the wages of labor are twice as high as are paid on the Continent? This shows plainly and distinctly that the rate of wages does not come from the tariff. The rate of wages paid in this country comes from the efficiency of labor and comes from the superiority of the American laborer, who simply understands his rights and will not be imposed upon to an unreasonable extent. He will not have his wages driven down to too low a point.

There is a point beyond which American labor can not be driven. You can herd European laborers, and by armed forces and parks of artillery you can compel them to submit to exactions that the American artisan will not submit to. He would prefer to pour out his blood like water, and leave his wife and children to struggle with what is to come hereafter, rather than to submit to exactions that go beyond the limitation of his endurance. Men who are not so well fed, men who have not the high aspirations and the manliness and dignity that Americans have, may submit to such wrongs, but Americans will not submit to them.

There is one thing I want to say just here. The Senator from Georgia [Mr. BACON] a short time ago, in the course of a speech, spoke of the constant reference to compensatory duties as being an attack upon him. I have not looked upon it in that light, and I want to say that in my discussion as to compensatory duties I am not attacking that Senator. It is a feature of this economic subject that we can not avoid discussing; it is bound to be discussed, and I propose to discuss it somewhat now; but I want the Senator from Georgia to understand that when I discuss it I am not discussing him or alluding to him or making any attack upon him.

When, the day that this proposition was made to put a 20 per cent tax on cotton, the Senator from Missouri [Mr. VEST] gave a number of reasons why it should not be adopted, and after he got through I took the floor and, after making a number of statements, I used this language:

But, Mr. President, in my opinion there is another substantial reason why the gentlemen who are advocating these high rates of tax will be in favor of a tariff on cotton. They know perfectly well that it will not increase the price of cotton one iota. While they make a pretense of protecting American cotton growers, they know they will get no benefit from it whatever; that when this tax is put on cotton and when an American mill is asking here for the protection necessary to enable it to make its business profitable, this committee, before we get through with the cotton schedule, will propose to increase the rates on cotton goods to compensate for the tax put on the raw material. Where will the argument proceed against it? We will answer

that no benefit whatever comes to the people of this country who raise cotton; that it will not raise the price. Here is the answer: But there is a provision for a tariff of 20 per cent, or so much a pound, which is to increase the cost of the raw material to the spinners, and therefore they must have the rate of taxation increased by just so much above what was necessary for them to have before the tariff was put on. They get a substantial benefit in that respect.

Mr. President, we know that the whole system of protection is based upon the idea that you must put a tax on the raw material, and then a compensatory tax on the very first thing that is manufactured out of the raw material. When the second commodity is used as a raw material in another enterprise, there must be another compensating tax upon that. So it runs from the bottom to the top, clear through the whole system. They are interlaced with each other from top to bottom, from the beginning to the end, without a single exception.

We know that this is so. We know that it has been the practice of Senators on the other side—and I gave that as a reason why we on this side ought not to vote for these taxes on raw material, because we knew this thing would be done. I say frankly, as I said at that time, the other side know that this 20 per cent tax on cotton is not going to handicap their manufacturers a particle; it is not going to raise the price of cotton a bit; the price of cotton will be the same in Liverpool as before; but they will make a pretext of it; they will avail themselves of the pretense that there is an increased cost of the raw material to put an increased tax on the manufactured product. The result will be, as I undertook to show, that our people will get no benefit from the tax on cotton, but they will carry a burden to compensate for what is claimed to be for their benefit. On yesterday, when another question was before the Senate, I illustrated that by calling attention to the condition of the wool trade and the wool tariff.

The Senator from Nevada [Mr. STEWART] a short time ago said that the wool schedule in the present law was in no sense a compliance with the Democratic platform adopted four years before. Perhaps it was not; but there can be no denying the fact that 40 per cent tax on woolen goods is a better and more equitable tax than a tax of 35 cents a pound specific and 50 per cent ad valorem in addition thereto, and a tax ranging from 40 to 100 and 120 per cent, and in some instances to 150 per cent, is a tax less to be endured than a tax of 40 per cent. I would not vote, if I had the making of a tariff bill, for a tax of 40 per cent upon woolens; but I would rather have a tax of 40 per cent than a tax of 100 per cent.

To reply to another point made by the Senator from Georgia, while I might be in favor of absolute free trade on some particular things that might be proposed here, I would rather have a tax of one-half of what is proposed by the bill than to take the whole rate proposed by the bill.

Mr. President, I agree very decidedly with the Senator from Minnesota [Mr. DAVIS] when he said some time since that there is no industry in this country so much depressed as agriculture. He was making an appeal for a higher tax upon flax, the very ground work, the very raw material, out of which a number of things are manufactured which are absolutely necessary in the domestic life of our people. If that were done, what would be the result? There would be a few flax manufacturers here and there who would be able to sell their flax at a higher price than they can sell it now; but, following the course always followed by the Republican party, there would be a compensating tax, compensating over and over again. Whatever protection was put on raw flax would be compensated for once, twice, thrice, and possibly four times before the product went to the individual user. So, after all, it is a shrewd device, a cunningly concocted scheme, to levy taxes upon the masses for the benefit of the few.

I have in my hand a sworn statement, made by a reputable business man in New York, and I have some quotations from a statement made by him, published in the Journal of Commerce. Here is his affidavit:

Joseph L. Frame, being duly sworn, deposes and says: I have been continuously engaged in the business of buying, selling, and handling linens for thirty-five years, and am perfectly familiar with the character and kinds of such goods which are most largely in use in this country. The foregoing statement is made from calculations based on goods which are only articles of common daily use; the items are not selected specially, but are a true and fair exhibit of consecutive qualities of goods of the same class, and this statement does not contain any items or articles which are of only small or occasional consumption.

JOSEPH L. FRAME.

Sworn to before me this 21 day of June, 1897.
[SEAL.] WALTER R. JONES,
Notary Public, Kings County.

Certificate filed in New York County.

This statement is interesting, Mr. President. It is headed, "Statement showing the equivalent ad valorem rates of duty on linen goods in common use under the proposed Senate bill of compound specific and ad valorem duties; also comparative rates under House bill."

This is a comparison between the House bill and the Senate bill. It is not a comparison with the present law; it is not a comparison with what is fair and right, but a comparison between the bill as it came from the House and the Senate bill as it stands here now. It is as follows:

	Ad valorem House bill.	Senate rate, 1½ cents per sq. yd. and 30 per cent.	3 cents per sq. yd. and 30 per cent.	7 cents per sq. yd. and 30 per cent.
Ordinary cream linen for sheeting and pillowcases, butcher and apron linen:	*Per cent.*	*Per cent.*	*Per cent.*	*Per cent.*
No. 1	40		71½	
2	40		70	
3	42		66½	
4	50		56½	
5	50			88
Tailor's duck for lining coats and clothing uses:				
No. 1	50		58½	
2	50			85
3	50		56½	
Brown hollands for staying and lining in clothing, trunk linings, and similar use:				
No. 1	31		69½	
2	50		62½	
3	50		58½	
4	50			99½
5	50			84
Black and colored canvas used for lining ladies' dresses:				
No. 1	40	56		
2	40	55		
4	34		69	
5	35		66	
6	36		64	
Tailor's padding for lining coats, standard goods	60		68	
Ladies' dress linen and costume linen:				
No. 1	30		70	
2	50		67½	
3	50		67	
4	50		64½	
5	50			99
6	50			93

These items of taxation in many of the linens of the cheaper sort, the kind which enters into general use among the people of the country, are increased more than 100 per cent, showing that the Senate committee has already increased the rates enormously. There is nothing which so well illustrates that as the sample the Senator from Delaware [Mr. GRAY] a few minutes ago exhibited to the Senate, an article of table damask, which would carry a tax of over 109 per cent—an enormous increase over the present law.

I hold in my hand a letter written by W. B. Cunningham, an importer, who says:

309 BROADWAY, NEW YORK, *June 1, 1897.*

Senator JAMES K. JONES,
United States Senate, Washington, D. C.

DEAR SIR: Regarding Schedule J in the proposed tariff bill:

Jute carpeting.—The duties proposed are extraordinarily high—far higher than even the McKinley-bill rate of 6 cents per square yard—

This is a cheap class of carpeting—

which was prohibitory on certain grades of jute carpeting, viz, low grades. The proposed rates, viz, 5 cents per square yard and 35 per cent ad valorem on goods costing 15 cents per square yard and under, and 10 cents per square yard and 35 per cent ad valorem on goods costing over 15 cents per square yard, would be prohibitory on all grades of jute carpeting. I trust, therefore, you will succeed in reducing the proposed rates to not over the McKinley rate of 6 cents per square yard.

I inclose a comparative statement of duties on a shipment of jute carpeting I received here lately.

This is the part of the statement to which I desire to call special attention:

The net invoice cost of the goods was £499 9s. 5d., $2,431, on which I paid 20 per cent duty, $486.20.

Some of these goods could not have been imported under the McKinley rate of 6 cents per square yard, as the duty would have been so high, nearly double. Importations of all such goods would be stopped under the proposed Senate rates, which, as the statement shows, are extraordinarily high, viz, 275 per cent higher than present rate of duty and 162½ per cent higher than the McKinley rate.

I shall not read the whole of the letter, but will have it printed in the RECORD with my remarks.

The remainder of the letter is as follows:

In the hearings and statements submitted to the Ways and Means Committee, as published in Schedule J, the Lamond & Robertson Company (manufacturers of jute carpeting at Paterson, N. J.) state in the postscript of their letter: "The McKinley tariff rate, 6 cents per square yard on manufactured carpet, would suit us much better than what we have asked for." According to that, 6 cents per square yard would be ample protection, and that carpet manufacturing concern would be pleased and satisfied with the McKinley rate. Lamond & Robertson also stated, "6 cents per square yard would be really a protection of about 50 per cent ad valorem," and "4 cents per square yard would be, at least, a protection of about 34 per cent ad valorem," which is surely a high enough rate of duty to charge on a poor man's carpet; yet the new rates proposed are very much higher—far higher than the American manufacturers of jute carpeting asked for.

Yours, very truly,

WM. B. CUNNINGHAM.

Mr. JONES of Arkansas. I will now read the statement which accompanies the letter. It is as follows:

Statement showing present rate of duty on jute carpeting, McKinley rate, and proposed Senate rates.

Shipment per steamship *Douro* from Hull to New York, imported by William B. Cunningham, New York, marked "B. Co. No. 204—315. Net invoice cost, £499 9s. 5d. = $2,431."

Square yards, 13,579.

Duty as at present (paid on above), 20 per cent ad valorem	$486.20
McKinley rate, 6 cents per square yard, on 13,579 square yards	814.74

As against $486.20 at this time; and yet some of the Senators who have been making speeches here to-day seem to think it would have been the wisest thing possible for us not to have disturbed the McKinley law, but to let it stand on the statute book, and not to have passed the Wilson law, because, forsooth, it did not give them all they wanted.

The statement continues as follows:

Proposed new (Senate) rates.

Square yards.	Net value.	
7,623	$613, at 5 cents per square yard and 35 per cent	$1,827.60
5,956	1,818, at 10 cents per square yard and 35 per cent	
13,579	2,431	

Equals 275 per cent higher than present rate of duty; and equals 162½ per cent higher than McKinley rate of duty.

Above shipment contained a good average, of various grades, of jute carpeting. If a statement were made up solely on the lowest priced goods, under the proposed rates, the percentage of duty would be very much higher, but even the above shows that the rates proposed on jute carpeting are prohibitory.

WM. B. CUNNINGHAM.

I have here another letter from the same firm, which I will print with my remarks, so that Senators may see the statement made by these gentlemen who are engaged in this trade and who know what they are talking about.

The letter referred to is as follows:

309 BROADWAY, *New York.*

DEAR SIR: Regarding Schedule J in the proposed tariff bill:

Jute burlaps (paragraph 339, plain woven fabrics of single jute yarns) in the proposed bill are entered for a high rate of duty, viz, three-fourths of a cent per pound and 15 per cent ad valorem, equal to about 30 per cent ad valorem. At present such goods are on the free list, and as they are largely used for agricultural products (wheat, corn, oats, flour, bran, peanuts, etc.), it would be a boon to the agriculturists if such goods were continued on the free list, or only a small duty, say one-half cent per pound, imposed for revenue.

A very small quantity of burlaps are produced at two places in California, viz, a jail and a private manufacturing concern, which, I am informed, employs Chinese laborers. It seems absurd to impose a high duty to protect convict and Chinese labor.

The amount of burlaps produced in California is very small compared with the requirements of the Pacific Coast. The bulk of the goods used there are imported from abroad, while all the burlaps used by bag manufacturers in the East, South, Middle, and Northwestern States are imported from abroad. There is no trust or combination among the bag manufacturers, and nothing of the sort among burlap importers—nothing but keenest competition among bag manufacturers and burlap importers—so any reduction or abolition of the proposed rate of duty would be clear gain to the consumers.

Yours, very truly,

WM. B. CUNNINGHAM.

Mr. JONES of Arkansas. I have also a long article taken from the Journal of Commerce and Commercial Bulletin of New York, being a discussion of this schedule. It is carefully analyzed and considered maturely, and shows the iniquities of this proposition clearly and strongly. I shall not ask the Senate to listen to me whilst I read it, but I shall insert it in my remarks in the RECORD, so that Senators who desire to do so may examine it at their leisure.

The article referred to is as follows:

EXCESSIVE DUTIES ON LINENS—IMPORTERS CONCERNED REGARDING THE EFFECTS ON THEIR BUSINESS—THE PROPOSED RATES, WHICH RUN IN SOME INSTANCES BEYOND 100 PER CENT, ARE, IT IS CLAIMED, PROHIBITORY, AND ARE UNNECESSARY, SINCE THERE IS NO LINEN INDUSTRY TO PROTECT AND NO PROBABILITY OF THE DEVELOPMENT OF ONE.

Importers of linens are much concerned regarding the effects on their business should the duties proposed by the Senate Finance Committee be adopted. The present duty on linens is the uniform one of 35 per cent, while under the compound duties proposed in the Senate bill (30 per cent ad valorem and an additional charge varying from 1½ cents to 10 cents per square yard, according to count) duties on ordinary importations, it is figured, range (with the exception of fine shirting linens, which remain at 35 per cent) from the equivalent of 50 per cent to 99 per cent, and in the instance of common cream damask to 109 per cent.

The importers claim that these rates are prohibitive and unnecessary, since, with the exception of cheap crash toweling and the crash for bicycle and similar suitings, for which a sudden demand sprang up last season, there is, they assert, no linen manufacturing industry to protect. No recent official figures are available to show the extent of the linen industry in this country. The census of 1890 places the number of linen manufacturing establishments at three, comparing with five in 1880; their combined capital at $908,589, comparing with $406,800; and the value of the yearly product at $547,273, against $602,451 in 1880.

Mr. J. L. Frame, of the Brookfield Linen Company, and secretary of the Linen Association of New York, said when questioned yesterday by a representative of this journal regarding the effects of the proposed duties:

"We object to the extraordinary rates on goods which are in common use and such as comprise the largest part of the importation of the trade, and because the increased cost is so great it would be impossible to work our prices up to it within any reasonable time. The effect of the proposed rates, in consequence of the sudden change from one rate of specific duty to another nearly two and a half times more, is to raise the price so suddenly as to throw the articles affected out of consumption, and would necessitate the business being done in fewer fabrics, specially selected as being the least affected by those rates. We feel it would curtail our business and cause increased competition in those fabrics which it might still be possible to import.

"In the proposed Senate bill on the goods that are over 120 threads there is an advance from 3 cents per square yard to 7 cents per square yard, being almost two and a half times as much. The result is that on the ordinary goods taken in the consecutive lines the price is raised from 58 per cent of duty to 99 per cent of duty.

"The percentage of increased cost to the consumer on such linens as are in ordinary household use and are used as raw materials by makers of clothing and in ladies' costumes will run from 18 per cent to 49 per cent, and in the majority of instances closely approaches the entire duty now paid under the present Wilson bill.

"COMPARATIVE PRICES OF ORDINARY IMPORTATIONS.

"The following table shows the comparative prices of ordinary linen goods, such as are articles of common use in the household and as raw materials for makers of men's clothing and ladies' costumes, under the present tariff rate of 35 per cent and the proposed new tariff rate of 30 per cent plus a square-yard duty of 1½ cents to 10 cents a square yard, and showing also the equivalent rate per cent of the new duties and the percentage of advance caused thereby:

	Present price at 35 per cent duty.	Price under new tariff.	Rate, new tariff.	Increased cost to consumer.
	Cents.	*Cents.*	*Per cent.*	*Per cent.*
Bleached heavy linen, used for aprons and linings	17	20	60	18
	20	24	57½	20
Cream heavy linen, for butchers' aprons and used as pillow linen and sheeting in hospitals and infirmaries	14	17½	71½	25
	20	24	60	20
	25	33	88	32
Pillow linen, ordinary medium quality	45	55	70	22
Tailors' duck, for lining in coats and general clothing purposes	12½	15	60	20
	14	19½	93	36
Brown holland, for lining and staying in men's clothing	13	17½	70	32½
	19	23	61	21
The next quality, by reason of slightly finer count and paying a higher square-yard rate, and all above it would be prohibited from use	20	28½	99	42½
Clothiers' padding for interlining in men's clothing	9	11½	70	25
	9	11½	70	35
Black canvas, for ladies' skirt lining	10	12	66	20
	11	12½	65	20
Brown linen, for ladies' shirt waists and costumes	9	11½	70	25
	11	13½	67	20
	16	22½	99½	40
Glass-cloth toweling and kitchen toweling	7½	9½	67½	21
	8½	10	60	19
	7	8½	66	20
	10	11½	60	17
Cream damask and bleached damask of qualities in common household use	19½	20	109	49
	37½	42½	57	14
	50	63	83	32
	75	92½	70	23½
	100	120	65	20

"The above are fair examples of goods in common everyday use. It will be noticed that the increased cost to the consumer in many cases is equal to a large part of all the former duty of 35 per cent, and in some instances this increase is more than the entire duty under the present tariff.

"In the foregoing statement the items have not been selected because they are excessive; representative prices out of each entire line are given. For instance, in brown lines for ladies' shirt waists and costumes, the following table will show the entire line, while above will be found the selections from this entire line:

Number.	Proposed duty.	Number.	Proposed duty.
	Per cent.		*Per cent.*
8	70	13	67
9	67½	14	64½
10	67	15	99½
11	67	16	99
12	69		

"MANUFACTURERS ASK ONLY 50 PER CENT.

"We have been told that the people interested in the manufacture of linens in this country would be satisfied with a duty of about 50 per cent, but in the schedule the compound duties proposed in the Senate bill, probably from want of information as to the real working on the goods generally imported by the trade, they have proposed a schedule of compound duties which will produce rates far in excess of anything they have anticipated.

"There are no linens produced in this country with the exception of common crashes, which have been made ever since the days when duties were 15 per cent, and they have been successfully made for the last thirty years under a duty of 35 per cent. In addition to these crashes, there has been made in the last year what is called homespuns for bicycle suits. These homespuns are made of cotton in the warp with the common linen weft, and are essentially a cotton and not a linen manufacture.

"It is not generally understood in this country that probably not more than 1 per cent of linen fabrics are imported in the state in which they were originally woven, but have been 'converted' by various finishing processes into an article entirely different from what it was when it came out of the loom. If the finishing were done in this country, it would require the erection of a large and extensive plant, which would be available for no other purpose. Such a plant has never been attempted in this country."

Mr. Richard H. Ewart, of William Ewart & Son, Limited, put the matter in this form:

"A great deal of interest is being taken at present in regard to the proposed tariff on linens, as it threatens very seriously all those who are engaged in importing and dealing in this necessary article; and, as it is universally

admitted that there is no justification for any change, the confusion and disturbance which has been produced is all the more vexatious.

"Many very deliberate and careful attempts have been made to manufacture linens in this country, and a great deal of money has been sunk by those who made the attempts, as, owing to climatic and other difficulties known only to practical manufacturers of flax fabrics, linens can not be manufactured successfully here. This fact has been so universally recognized that for many years the rate remained at 15 per cent ad valorem, thus securing a revenue from an article which could not be manufactured here and which had to be largely used by the people. During the urgent necessities of the war the rate was advanced to 35 per cent, at which point it remained for many years, during which time many trials to manufacture linens were made, always ending in failure.

"Under positive promises to make this a successful manufacturing enterprise, and also develop a new industry for the farmer, that of growing flax for these American manufacturers, the McKinley bill advanced the rate on some linens to 50 per cent ad valorem, but no Administration has ever attempted to tax them at a higher rate than 50 per cent ad valorem. Less than ten months' experience was sufficient to cause the failure of the company, which said (we refer to Record Hearings, 1889-90, page 523): 'We promise an established industry of great magnitude;' and up to the present time the Minnesota Flax Company, which made strong professions of ability to develop the flax-growing industry, has only exported 2 tons of flax to the North of Ireland, and the report on these is that the quality is very inferior; so, practically, no development of this flax-growing industry has occurred.

"To-day the Senate bill, by a specious system of compound duties, proposes to levy a duty which would be absolutely prohibitive and is thoroughly needless, as it amounts in some instances to an equivalent of 109 per cent ad valorem, and on a great portion of the goods from 65 to 85 per cent ad valorem. It carefully exempts from this high duty, however, all fine shirting linens used by the Troy manufacturers and keeps them at 35 per cent ad valorem, although these shirting linens are no more strictly raw material than are the coarser goods, taxed at twice that amount, which are used by manufacturers of clothing, suits, trunks, etc.; and the still higher rates apply to common-grade damasks, used by the masses, and which should be admitted at a low rate of duty.

"It is a strange fact that this great linen industry should be convulsed by the threat of such prohibitive duties, when the would-be manufacturers of New England are willing (as they claim to be) to acquiesce with the suggestion that no linens shall be taxed above the equivalent of 50 per cent ad valorem if they—the manufacturers—can import their linen yarn at 35 per cent ad valorem, which is the rate at the present moment. It is understood that there is only one difficulty in the way of obtaining this concession on yarns. It comes in the opposition of some linen-thread manufacturers, who insist upon inordinately high protection on their flax thread, as the proposed change advances the rate on linen threads from 35 per cent ad valorem to as much as 66 per cent ad valorem; although at the lower rate of 35 per cent the business was so profitable that large fortunes were made in it.

"It is scarcely possible that the American public will submit meekly to the demands of this outside interest and willingly pay the enormous increase in the cost of millions of importations; so it is sincerely hoped that the Senate may make a modification in the rates and leave them at a point not exceeding 50 per cent ad valorem, which is all the linen manufacturers ask for and which is the highest rate ever before imposed on linen fabrics."

Mr. E. R. Biddle, the president of the Linen Association, said: "In the first place, I may say I am a Republican in politics and I am in favor of the principles and the policy of protection, which I believe is the basis of prosperity. I believe in doing everything we can to encourage the manufacture of everything in this country that can be manufactured. But I don't believe in prohibitive rates. Any industry that can not sustain itself after a prolonged moderate degree of protection ought to be abandoned.

"In the matter of duty on linens at the time the Wilson bill was being framed the advisability was considered of making the duty on linen goods 20 per cent ad valorem. I opposed it because I did not believe it was just to the country, for the reduction in duty would not in a perceptible degree cheapen the cost of the goods to the consumer, as the distributers would naturally keep the difference themselves. On the other hand, I do not believe that the rates should run over 35 per cent, which I believe is the highest rate the goods will bear without curtailing the production, as the higher the rate the greater the cost, and the greater the cost the less the consumption that will result.

THE PROPOSED RATES EXCESSIVE.

"The rates in the present bill are excessive. The weight rates fixed by the House bill made the ad valorem equivalent in some instances to as high as 112 per cent; and the ad valorem equivalent of the compound rates of the Senate bill is equally as high. The people can not stand any such increase in the cost of linens as these rates would necessitate. They would lead to substitutes being used for linens, and from a revenue standpoint the Government would be in receipt, in my opinion, of a considerably reduced amount from what it now receives at the present rates, namely, 35 per cent ad valorem."

Mr. J. D. Weir, a linen importer, said: "The linen trade, in my estimation, has been 'held up' in the interests of one or two men who do not manufacture cloth and are only interested in yarns and flax."

A member of one of the largest linen-importing firms in the city yesterday outlined the situation from the standpoint of the importer as follows:

"Before the war the duty on linen goods was 15 to 25 per cent. As a war measure, in order to obtain revenue, the duty was increased to 30 to 35 per cent. Afterwards, under the tariff commission, the rate was made 15 to 25 per cent all around. During this period the Stevens Crash Company, the only linen-manufacturing concern in the United States, were perfectly satisfied with these rates, and seemed to make money. At the same time the only thing they ever made or could see any money in making was a common crash or roller toweling, to retail at about 8 to 10 cents per yard.

"When President Harrison was elected and the McKinley bill was sprung upon the American people, Schedule J, or manufactures of flax, was for the first time attacked on false representations that all kinds of linen goods could be advantageously manufactured in this country; whereas, the experience of several hundred years has gone to show that such goods are only capable of production in a very few small districts of Europe, where very cheap labor can be procured. The manufacture of this article, from the growth of the flax up to the finished product, is one of extreme care and very careful detail, and the total output is a very infinitesimal factor of the general dry goods trade.

LIMITED MARKET FOR THE AMERICAN MANUFACTURERS.

"The European manufacturer has the whole world before him for a market, but the American manufacturer, even if he were able to produce the goods with the extreme protective rates now proposed, would only have the home market to supply; and even if one manufacturer were able to do this it would only be a very small business.

"The proposed rates of the Senate Finance Committee, when reduced to ad valorem equivalents, run all the way from 50 per cent to 109 per cent, the higher rates in every instance being on the cheaper class of goods; and the extreme rate, namely, 109 per cent, being charged on an article used on the workingman's table, namely, a cream damask, 58 inches wide, costing, in the European market, about 13½ cents. The injustice of this is the more apparent when we consider the fact that the millionaire Troy shirt and collar manufacturers are enabled to bring in their finest quality of shirting linen at 35 per cent ad valorem against 109 per cent for the workingman's table.

"I would also draw attention to the fact that thread suitable for the manufacture of shoes, clothing, carpet sewing, bookbinding, etc., had heretofore never been higher than 40 per cent ad valorem until the McKinley bill made it 45 per cent, but the present proposed measure runs all the way from 45 to 67½ per cent, the bulk of the importation being represented by the latter figure. Where is the justice of this protective measure, bringing in fine linens for the Troy trade at 35 per cent and charging the New York clothier, the Massachusetts shoemaker, and the bookbinders generally a rate of, maximum, 67½ per cent and, minimum, 45 per cent?

"Handkerchiefs are another item which comes under this schedule. Previous to the McKinley bill they were all admitted at 35 per cent, and at that rate a large domestic industry was built up. Under the McKinley bill the rates were raised to 50 to 60 per cent. The Wilson bill reduced the rates to 40 to 50 per cent. Now it is proposed to force them back to 55 to 60 per cent, with several ambiguous clauses pertaining to them that may mean even more than these rates. At the same time I believe I am correct in stating that the wages paid for the hemstitching and making up of the handkerchiefs in this country to-day are in many cases less than the wages paid to the so-called pauper labor of Europe for the same work.

"As far as home manufacturers are concerned, there have been practically no linen goods produced on this side outside the Stevens Crash Company up to the present time until a few months ago, when a sudden demand sprang up for what is called in the trade 'homespun' or batistes, which is a fabric composed either of all linen or linen and cotton, suitable for ladies' bicycle and seaside apparel. These goods were inquired for last year, the demand having been brought about by some fashionable tailors who made up a few suits out of common Russian crash (which any housekeeper will recognize as roller toweling). This created quite a demand for such goods, and the importer not being able to supply the same, the domestic manufacturers thought it was a very large item of the linen business, and as it was an article that could be easily manufactured, they imported a large quantity of European flax yarns. The consequence is that to-day these domestic manufacturers, I am credibly informed, have a surplus stock of 2,000 cases of these goods."

CIRCULARS ISSUED BY THE LINEN TRADE.

Following is a circular that linen importers have prepared:

"The Senate amendments to the Dingley bill assess flax twine and flax threads 12 cents per pound; if made from yarns finer than 5 lea or number, three-fourths of 1 cent per pound additional for each lea or number or part of a lea or number in excess of five.

"This proposal makes on the three established grades a duty of 67½ per cent on 'F' quality, instead of 35 per cent under present law; 54 per cent on 'A' quality, instead of 35 per cent under present law; 45 per cent on 'best' quality, instead of 35 per cent under present law.

"As the bulk used is 'F' and 'A' qualities, it will be seen that the proposed rate is very excessive and hurtful to American manufacturers of shoes, clothing, carpet sewers, bookbinders, and other consumers, besides being a blow to the American fishermen, who make their nets from linen thread, using them on the Great Lakes and other places, and whose outfit will thus cost them so much more than their competitive neighbors across the border."

Another circular that is being distributed follows:

"The Senate amendments to the Dingley bill assess linen goods 30 per cent ad valorem and an additional charge varying from 1½ to 10 cents per square yard, according to count.' The following are a few specimens of the result:

	Present import price.	Present duty.	Price under Senate bill at rates above noted.	Rate of new duty.
	Per yard.	*Per cent.*	*Per yard.*	*Per cent.*
18-inch crash for roller towels	$0.08	35	$0.09½	52½
54-inch cream union damask	.19½	35	.22½	65
24-inch canvas for dress lining and clothing	.08½	35	.10½	69
34-inch blouse linen for summer clothing	.16	35	.22½	99
40-inch linen for butcher aprons	.19½	35	.22½	65
18-36 huck towels for medium trade, per dozen	1.37½	35	1.51	50

"These rates which it is proposed to levy on the American consumer can not be defended on the ground of protection to American labor. Even supposing that the labor costs double in this country to what it does abroad, inasmuch as the labor is only a small percentage in the value of the finished article, it is quite apparent that duties from 50 per cent to 99 per cent have long passed the point of legitimate protection and would become purely a tax on the users of the goods.

"The rates on long lines of linen goods will vary from 50 per cent to the rates noted above.

"In many cases these rates are prohibitive, so that the revenues of the Government will be diminished instead of increased.

"Those who have tried say that all linen goods above the grade of brown crashes can not be made here, but a loosely woven fabric, composed of linen and cotton, has been made. The yarns for such goods are to be assessed 40 per cent and the finer kinds 15 per cent. Even allowing for the heavy duty on low yarns there is a great margin between them and the woven fabric.

"Linen goods are used largely as raw material in clothing and other purposes, and such rates will greatly increase the cost of living.

"Such an excessive stimulant must lead to a reaction. The importing trade after a struggle may be crowded to the wall, but the domestic manufacturer, laborer, and dealer will suffer in the end."

Following is in part a statement of facts in support of protests against the increased duties, prepared by Britton & Gray, attorneys for importers:

"Customs revenues from flax manufactures have always been large. During past six years, the total value of such importations has averaged $25,000,000 annually. From eleven to fourteen millions of dollars represents the annual importations of manufactured linens. Prior to the war, the duty on manufactured linens was 15 per cent ad valorem. Necessity for increased revenue then caused an increase of duty to 35 per cent. It there remained until the act of 1890 increased the duty on coarse goods counting below 100 threads to the square inch to 50 per cent, leaving the goods above that quality at 35 per cent until January 1, 1894.

"This increase was given upon the assurance of the Flax and Hemp Spinners and Growers' Association that under such protective rates 'we promise an established industry of great magnitude.' (Record Hearings 1889-90, page 521.)

"The promise was never redeemed. Congress, by act of March 3, 1893, unanimously extended to January 1, 1895, the increase to 50 per cent on fine linens proposed by the act of 1890, it being well understood that in the meantime the tariff would be again revised, as was done by the act of August, 1894, and the former rate of 35 per cent on all linens then reenacted. At the hearing before the present Ways and Means Committee (pages 1329-1333) the same association or interests, under the name of the Flax, Hemp, and Jute Manufacturers of the United States, presented demand for duties on dressed flax, yarns, and threads, twine, and manufactured cloth, which have been substantially accorded in the pending bill. Therein duty was asked of 50 per cent ad valorem on manufactured linens. Notwithstanding this public record, the rates of duty given by the Senate amendment (paragraph 344) exhibit an enormous advance beyond what was asked. They are both compound and specific, thus:

"Thirty per cent ad valorem on all goods, adding following specific duties: Sixty threads or under, 1½ cents per square yard; from over 60 to 120 threads, 3 cents per square yard; from over 120 to 180 threads, 7 cents per square yard; over 180 threads, 10 cents per square yard: *Provided*, That none of the foregoing shall pay less than 50 per cent ad valorem. On fine goods weighing less than 4 ounces per square yard and containing more than 100 threads to the square inch, including shirting cloth, the present rate of 35 per cent is retained.

"The enormous increase proposed beyond what was asked by the promising American manufacturers, is illustrated by the following examples:

	Act 1890.	Act 1894.	Finance Committee, proposed tariff.
	Per cent.	*Per cent.*	*Per cent.*
Table damask	35	35	100½ ad valorem.
Do	35	35	74½ ad valorem.
Do	50	35	62½ ad valorem.
Duck for clothing	50	35	73 ad valorem.
Lining	50	35	60⅛ ad valorem.

"These proposed rates are plainly prohibitive. They are so intended. Even on the goods increased to 50 per cent by the act of 1890, and with no resulting manufacture here, importations fell from $5,000,000 in 1891 to three and one-half millions of dollars in 1893 (Senate Tariff Report 334, Fifty-third Congress, second session, pages 278, 280), with consequent large loss of needed revenue. The enormous increase over 50 per cent now proposed will correspondingly further reduce both importations and revenue.

"If manufacture of these goods were possible here, such exorbitant rates of duty would not be justified, (1) because wholly beyond any legitimate protection which is even asked by the promising manufacturers, and (2) because neither American flax nor American manufacture has been developed here under protective conditions, except coarse crash, which flourishes now, as heretofore, at the 35 per cent rate.

"But such manufacture promised under the act of 1890 resulted in complete failure. No change in essential conditions, climatic or otherwise, has since occurred, and after ninety years of continuous duty upon linens no domestic manufacture, except of cheap crash and possible recent small production of mixed cotton and linen fabric, has yet appeared. The goods are all imported. The revenues from 1890 to 1894 suffered from these unredeemed promises, and yet the same interests now give the same renewed assurances, with no possible change in conditions whereby they can be fulfilled. The people are asked to submit to this enormous increase in taxation upon such a record. Prohibitive rates are proposed, and the common people are to be made to suffer to accord a few individuals more "protection" than they even ask.

"Flax is grown in this country only for the seed. Even for such purpose the supply does not equal the demand, for in 1896 661,533 bushels of seed were imported. (House Tariff Comparison 1897, page 60.)

"That flax is not produced for fiber is admitted. The attached letter demonstrates it.

"Surely under such conditions the rates on manufactured linens of 50 per cent and 35 per cent, as provided by the act of 1890, and now asked by the promising domestic manufacturers, should not be increased, to the destruction of revenue, the discomfort of the people, and without possibility of benefit to any industry, actual or possible."

Following is a protest forwarded by Marshall Field & Co. to the Finance Committee:

"DEAR SIRS: We are in receipt of the Finance Committee amendments to the Dingley tariff bill, and beg respectfully but firmly to protest against the excessive and unnecessary rates in paragraph 344 on linens (woven fabrics and articles). The manufacture of these goods has often been attempted and each time proved a failure. Climatic and other conditions necessary for their successful manufacture do not exist in this country, and as there is no linen industry to protect and no reasonable belief that one will ever be created, there is positively no excuse for such extravagant duties.

"We desire also to call your attention to the rates on flax or linen threads, advanced from 35 per cent to specific rates equivalent to 50 and 60 per cent. About two-thirds of the threads imported would, under the proposed rates, pay 60 per cent ad valorem. Why is this advance made in the face of the well-known fact that the manufacture of linen thread has prospered immensely under the present rate of 35 per cent?

"Such excessive rates as you have fixed on linens and many other articles will prove so burdensome and unpopular with the people that a reaction to lower duties is sure to follow."

Mr. JONES of Arkansas. With all this, the Senator from Iowa, in speaking a short time ago of the particular paragraph we have now under consideration, assured the Senate that the rate was very low. I have in my hand an article relating to the cotton-yarn schedule as passed by the Senate yesterday, and in view of what occurred between the Senator from Connecticut and myself a few minutes ago, I shall insert that in the RECORD in order that it may be printed. The statement is made by the gentleman who handed it to me, and I believe it to be correct.

Mr. HAWLEY. May I ask the Senator what the statement is about?

Mr. JONES of Arkansas. It is about the relative cost of manufacturing cotton yarn in the United States and in England—a comparative statement of different places.

Mr. HAWLEY. Which cost the more?

Mr. JONES of Arkansas. On some grades it costs more on this side and on some grades more on the other side.

The paper referred to is as follows:

COTTON-YARN SCHEDULE PROPOSED BY THE SENATE COMMITTEE.

The cotton-yarn schedule of the tariff bill now before the Senate is not only full of the most absurd inconsistencies, but must also become absolutely prohibitive in effect.

It either displays complete ignorance of the subject, or it is a direct stultification of Senator ALDRICH's remarks in introducing the measure:

"Industrial conditions in this country, with very few exceptions, do not demand a return to the rates imposed by the act of 1890;" and, "the rates suggested by the committee's amendments are considerably below those imposed by the House bill, and, in most instances, below those contained in the act of 1890."

The clear inference is that no commodities are to be taxed in excess of the duties imposed by the McKinley Act.

How ludicrously actual fact confutes Senator ALDRICH, and proves either that he does not understand the cotton-yarn schedule at all, or that he has been deceived by false representations, the following comparative table will show:

*Cotton-yarn tariff inconsistencies proposed by Senate committee.**

Description.	English price per pound.	Present duties, with percentage on value.	McKinley duties as compared with present duties.	Proposed duties as compared with McKinley duties.
Carded single yarns:	*Pence.*			
60-1	10	8 cts. or 40 per cent.	10 cts. or 25 per cent more.	15 cts. or 50 per cent more.
70-1	11	8 cts. or 36 per cent.	10 cts. or 25 per cent more.	17½ cts. or 75 per cent more.
80-1	12	8 cts. or 33 per cent.	10 cts. or 25 per cent more.	20 cts. or 100 per cent more.
90-1	13½	15 cts. or 55 per cent.	18 cts. or 20 per cent more.	22½ cts. or 25 per cent more.
100-1	15	15 cts. or 50 per cent.	18 cts. or 20 per cent more.	25 cts. or 39 per cent more.
Average		43 per cent.	23 per ct. more.	58 per ct. more.
Combed single yarns:				
60-1	11½	8 cts. or 35 per cent.	10 cts. or 25 per cent more.	18 cts. or 80 per cent more.
70-1	12½	15 cts. or 60 per cent.	18 cts. or 20 per cent more.	21 cts. or 17 per cent more.
75-1	13½	15 cts. or 57 per cent.	18 cts. or 20 per cent more.	22½ cts. or 25 per cent more.
79-1	12½	15 cts. or 55 per cent.	18 cts. or 20 per cent more.	23.7 cts. or 31 per cent more.
Average				38 per ct. more.
80-1	14	15 cts. or 53 per cent.	18 cts. or 20 per cent more.	14 cts. or 22 per cent less.
90-1	15½	15 cts. or 48 per cent.	18 cts. or 20 per cent more.	15½ cts. or 14 per cent less.
100-1	17	15 cts. or 44 per cent.	18 cts. or 20 per cent more.	17 cts. or 5 per cent less.
Average		50 per cent.	21 per ct. more.	14 per ct. less.

*It will be observed that the highest duties are on the cheapest goods, which require least labor for their production.

The McKinley rates, generally, were excessive, and restricted importation, as shown by the loss of over $100,000,000 of revenue while they were in operation.

Senator ALDRICH admits that they are no longer necessary, in fact, that they ought not to be reimposed in the majority of cases; yet it will be observed that, while the rates on cotton yarns under the act of 1890 averaged 23 per cent more than the present tariff, the proposed duties will mean a further average advance, in the main, of 48 per cent over the McKinley dues, though it is admitted by the Republican mouthpiece that little justification can now be found for the latter. This is remedial legislation with a vengeance, and protection assumes a new phase, becoming prohibition, since for anyone to assume that such an advance in the values of cotton yarn is possible, solely from duty increases, as to permit of the continuance of importation, necessarily involves some curious aberration of the intellect.

The principal object of the tariff measure now under review is stated by its authors and exponents to be the obtainment of more money for governmental purposes. So far as cotton yarns are concerned, its effect must be to destroy this source of revenue entirely.

Common sense dictates that cotton spinners, who keep abreast of the times in point of efficiency have much less need of protection at the present time than in 1890; yet the proposed new schedule out-Herods Herod, and throws the McKinley duties quite into the shade. The subject can not have been properly investigated, since it seems past comprehension that men of any commercial standing whatever can be found to make such a flagrant confession either of their incapacity or of their greed as is involved in this claim for a protection averaging over 80 per cent on English values of a commodity in such general use as cotton yarn.

The great masses of the people will be the sufferers while domestic producers are feathering their nests in this barefaced manner.

Apart from the loss to the revenue of the country, the stoppage of cotton-yarn importations would have a detrimental effect on various branches of industry by the removal of the stimulus of a healthy and progressive competition.

There are certain kinds of cotton yarn, such as gassed two-ply and bleached two-ply, which, for reasons principally climatic, can not be made here of the same excellence as in England; and, if importation be stopped, the finished goods for which they are requisite must be thereby rendered proportionately inferior to foreign competitive marks.

Cotton yarn must necessarily be the raw material to manufacturers who have no spinning machinery, and a large amount of capital is invested in various parts of the United States in concerns of this kind.

To put such a duty on cotton yarn as to practically stop importation is to restrict the buying facilities of firms thus situated and to place them at the mercy of home spinners.

Nothing could be more antagonistic to labor interests than the incidence of the proposed duties as regards cotton yarns and the goods made from them, since the imported manufactured article would pay a lower rate by over 30 per cent ad valorem than the raw material which is needed for its production.

It can not be gainsaid that foreign competition is both desirable and necessary for the maintenance of our industries in the highest possible state of efficiency.

The basis of dealings in cotton yarns is the ratio which length bears to weight.

For instance, forties single have 40 hanks of 840 yards each to the pound, and other numbers in proportion.

In two-ply, where two threads are put together, forties would have 20 hanks of 840 yards each to the pound.

The excision of the ad valorem principle and the substitution of rates varying with length and weight solely can not be either politic or equitable, since there are such great variations in quality and value of the same number. The difference between the highest and the lowest grades is frequently in the neighborhood of 100 per cent, and to tax both extremes at the same rate would be a manifest absurdity. A yarn in general and regular use is No. 60. There are reliable English marks for which to-day's quotations stand: Egyptian, 9¼ pence; sea island, 17½ pence.

Can it be seriously argued that both values should be treated on a parity for fiscal purposes?

With such variations of quality, common sense dictates that protective imposts should be regulated by the commercial value of the articles on which they are levied.

The change in the proposed duties from specific to ad valorem is attended by results which would be ludicrous if it were not for their gravity, and which indicates either gross carelessness or lamentable incapacity. The difference in values between 79-1 and 80-1 combed Egyptian filling twist in England is practically inestimable, and could not exceed one-fourth pence or one-half cent per pound, whereas the difference in duty would be 9.7 cents per pound.

The proposed duty on 80-1 combed Egyptian filling twist, the value of which is 14 pence per pound in England, would be 6 cents less per pound than on 80-1 carded Egyptian filling twist, worth only 12 pence per pound in England.

It is contemplated to make the rate on two-ply yarns the same as on combed single yarns. Hence 80-2 extra-combed and gassed Egyptian warp twist worth 18½ pence per pound in England would carry a duty of 18½ cents per pound, while 80-1 carded Egyptian filling twist, worth only 12 pence per pound in England, would be penalized to the tune of 20 cents per pound.

Such grotesque legislative blunders are surely without parallel.

This protest was handed to Senator ALDRICH before the consultative committee to which he belonged had finished their labors and made their report.

It appears to have been utterly ignored.

The importance of the document is clear, from the fact that its signatories control a capital of many millions of dollars, and employ many thousands of work people.

Mr. JONES of Arkansas. I submitted a statement yesterday which showed that the labor cost in yarns above No. 100 was less in this country than in England, and in yarns below No. 100 it was less in England than in this country. One of the points made by the Senator from Iowa this morning was that this cotton schedule was not like the Wilson schedule; that where it differed from it was in the fact that it allowed a higher tariff on the high grade of cotton. The Senator from Rhode Island [Mr. ALDRICH], when he opened this debate, stated to us that this schedule, as I remember, was in fact very much the same as that in the Wilson law. So it is in most points, and so it is in almost every specification, but there are limitations in the Wilson law which are left out of the pending bill; and taking those limitations out, allows a high rate of taxes on the high-numbered yarns which did not exist under the Wilson law.

Mr. PLATT of Connecticut. We have reduced the rates below those fixed by the House of Representatives.

Mr. JONES of Arkansas. That may be, and yet not be much of a virtue. There are rates in this bill as it came from the House that are simply monstrous, and I confess that I was gratified, after looking over the bill as it came from the Senate committee, to find that the rates had been lowered in as many cases as they had been. True, on many of the most important and material items the taxes have not been lowered, but have been raised. I was, however, expecting but little.

I was somewhat in the condition of the preacher to whom the Senator from Missouri referred, who said, "Blessed are those who expect nothing, for they shall not be disappointed." I had not expected much, but when the bill was returned to the Senate with reductions in a great many instances, I confess I was very much gratified. I have, however, been sadly disappointed, as we reach amendment after amendment where the Senate committee had proposed to reduce the House rates, to find the Senator in charge of the bill, the Senator from Iowa, in that bland, suave way of his, rising and saying he hopes the committee amendment will not be agreed to. So it seems we are to be disappointed in our expectations, and I confess that I have not much hope of the items of reduction ahead of this in the bill retaining their places.

Mr. President, I had not intended saying anything at this time on this feature of the bill, but as this discussion has taken a somewhat wide range, and as many of these questions have been raised, I thought I might as well discuss these items now as to wait until the particular paragraph in the bill should be reached to which they especially relate.

If you put taxes upon the raw material, according to my theory, and according to the practice of the Republican party, they will put a higher tax on the manufactured article, higher, I think, in many cases, than is justifiable. Still I believe that when taxes are put on the raw material there should be an equivalent given to the manufacturers to compensate them for the weight they have to carry in the shape of a tax upon the raw material. I may be wrong, but that is what I believe.

The New York Times some weeks ago contained this paragraph:

THE HEAVY TAX ON LINENS.

A large importer of linens said there was not yet much "stocking up" on this line of goods.

"The proposed rates," he said, "would seem to make such a course desirable. On table linen the rate will be advanced from the present duty of 35 per cent to 100 per cent. Under the McKinley bill it was never higher than 50 per cent. The only rate that is moderate is the one laid on shirtings that are used by the Troy trust to make collars and cuffs. This duty is 35 per cent. The rate is cunningly devised to deceive the people. At present we have an ad valorem duty of 35 per cent. The proposed rate is 30 per cent ad valorem and a specific rate per square yard, which makes the compound duty figure up from 65 to 100 per cent. The uninitiated do not understand a compound duty. The duty on flax straw is $5 a ton, on flax not dressed $15 a ton, and on "hackled" or dressed flax it is $25 a ton. The gross injustice of these duties can be appreciated when it is remembered that, owing to climatic conditions, flax can not be grown nor linen manufactured successfully in this country, and when it is further remembered that the kind of linen taxed is the kind that is used by the poorest classes, while a much lower duty is put on the finer grades.

This is the unvarying practice of the Republican high protectionists. They always put the highest taxes on the lowest class of goods, and the lowest taxes on the highest class of goods. The purpose of the whole system is to levy blackmail on the poor. It is for the benefit of the rich; it is to lighten the burdens of those who are most able to pay, and to increase the burdens of those who are least able to pay.

The article continues:

The duty on linens and flax is made to protect one thread manufacturer—the Barbour Bros., of Paterson, N. J.—and one or two manufacturers of cycling suits, made of half linen and half cotton. That the present duty of 35 per cent was adequate is shown by the enormous fortunes that have been made by manufacturers protected by it. The only linen manufactured in this country is a species of crash. This is made of foreign-spun yarns.

Linens are all made in Ireland and Scotland, with a small quantity on the Continent. They can not be manufactured here, and a tax on them is a direct tax levied upon the consumers, and falls heaviest upon the poor.—*New York Times*, May 18, 1897.

I have a table here, Mr. President, which has been prepared carefully, as I am advised, by a man familiar with this trade, showing the rates of taxation, which I shall insert in the RECORD in connection with what I have said.

The table referred to is as follows:

Table showing the comparative prices of ordinary linen goods, such as all articles of common use in the household, and as raw materials for the makers of men's clothing and ladies' costumes, under the present tariff rate of 35 per cent and the proposed new tariff rates of 30 per cent, plus a specific duty of 1.75 to 10 cents a square yard, according to count, and showing also the equivalent rate per cent of the new duties and the percentage of advance caused thereby.

	Present price at 35 per cent duty.	Price under new tariff.	Rate, new tariff.	Increased cost to consumer.
	Cents.	*Cents.*	*Per cent.*	*Per cent.*
Bleached heavy linen, used for aprons and linings	17	20	57½	18
	20	24	60	20
Creamed heavy linen, for butchers' aprons and uses as pillow linens and sheetings in hospitals and infirmaries	14	17½	71¼	25
	20	24	66	20
	25	33	88	32
Pillow linen, ordinary medium quality	45	55	70	22
Tailors' duck, for lining coats and general clothing purposes	12½	15	60	20
	14	19½	90	36
Brown holland, for lining and staying in men's clothing	13	17½	70	32½
	19	23	61	21
The next quality, by reason of slightly finer count and paying a higher square-yard rate, and all above it would be prohibited from use	20	28½	99	42½
Clothiers' padding, for interlining in men's clothing	9	11½	70	25
Black canvas, for ladies' skirt lining	9	11½	70	25
	10	12	66	20
	11	13½	65	20
Brown linen, for ladies' shirt waists and costumes	9	11½	70	25
	11	13½	67	20
	16	22½	99½	40
Glass-cloth toweling and kitchen toweling	7½	9½	67½	21
	8½	10	60	19
	7	8½	66	20
	10	11½	60	17
	19½	29	10	49
Cream damask and bleached damask of qualities in common household use	37½	42½	80	14
	50	66	83	32
	75	92½	70	23½
	100	130	65	30

The above are fair samples of goods in common everyday use. It will be noticed that the increased cost to the consumer in many cases is equal to a large part of all the present duty of 35 per cent, and in some instances this increase is more than the entire duty under the present tariff.

Mr. JONES of Arkansas. We can not by any possibility succeed in reducing these taxes at all. Still, I believe it is wise for us to propose moderate reductions to the present committee bill, and to try, if possible, to get the Senate to accept them. If they will not, there is nothing left for us to do but to put ourselves on

record as being opposed to these monstrous exactions that are now being levied on the masses.

The VICE-PRESIDENT. The question is on the amendment proposed by the Senator from Arkansas, to amend the committee amendment in paragraph 322 by inserting "one and one-half" instead of "three" cents per pound on "flax, hackled, known as 'dressed line,'" on which the yeas and nays have been ordered.

The Secretary proceeded to call the roll.

Mr. GEAR (when his name was called). I transfer my pair with the Senator from New Jersey [Mr. SMITH] to the Senator from Massachusetts [Mr. LODGE], and vote "nay."

Mr. HARRIS of Kansas (when his name was called). I am paired with the Senator from Wyoming [Mr. CLARK].

The roll call was concluded.

Mr. PASCO. I wish to announce that the Senator from Illinois [Mr. MASON] is paired on this vote with the Senator from Virginia [Mr. MARTIN].

Mr. CLAY. I rise to announce that my pair with the junior Senator from Massachusetts [Mr. LODGE] has been transferred to the Senator from New Jersey [Mr. SMITH]. That arrangement will stand for the day.

Mr. BATE (after having voted in the affirmative). I desire to inquire if the Senator from Kentucky [Mr. DEBOE] has voted?

The VICE-PRESIDENT. He has not voted.

Mr. BATE. I withdraw my vote, being paired with that Senator.

Mr. WETMORE (after having voted in the negative). Has the senior Senator from Georgia [Mr. BACON] voted?

The VICE-PRESIDENT. The Senator from Georgia has not voted.

Mr. WETMORE. I withdraw my vote, being paired with that Senator.

The result was announced—yeas 24, nays 37; as follows:

YEAS—24.

Berry,	Jones, Ark.	Morgan,	Tillman,
Butler,	Kenney,	Murphy,	Turner,
Chilton,	McLaurin,	Pasco,	Turpie,
Clay,	Mallory,	Pettus,	Vest,
Cockrell,	Mills,	Rawlins,	Walthall,
Gray,	Mitchell,	Roach,	White.

NAYS—37.

Allison,	Frye,	Nelson,	Shoup,
Baker,	Gallinger,	Penrose,	Spooner,
Burrows,	Gear,	Perkins,	Teller,
Carter,	Hale,	Pettigrew,	Thurston,
Chandler,	Hanna,	Platt, Conn.	Warren,
Cullom,	Hawley,	Platt, N. Y.	Wellington,
Davis,	Hoar,	Pritchard,	Wilson.
Elkins,	Kyle,	Proctor,	
Fairbanks,	McBride,	Quay,	
Foraker,	McEnery,	Sewell,	

NOT VOTING—28.

Aldrich,	Daniel,	Harris, Tenn.	Martin,
Allen,	Deboe,	Heitfeld,	Mason,
Bacon,	Faulkner,	Jones, Nev.	Morrill,
Bate,	George,	Lindsay,	Smith,
Caffery,	Gorman,	Lodge,	Stewart,
Cannon,	Hansbrough,	McMillan,	Wetmore,
Clark,	Harris, Kans.	Mantle,	Wolcott.

So the amendment was rejected.

The VICE-PRESIDENT. The question recurs on agreeing to the amendment of the committee, which will be stated.

The SECRETARY. In line 6, page 104, it is proposed to strike out "three" and insert "two and one-half;" so as to read:

322. Flax, hackled, known as "dressed line," 2½ cents per pound.

Mr. ALLISON. I ask the Senate to disagree to the amendment.

The VICE-PRESIDENT. The question is on agreeing to the amendment reported by the Committee on Finance.

The amendment was rejected.

Mr. PETTIGREW. I now move to amend paragraph 322 by striking out "three" and inserting "four."

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. In line 6, page 104, paragraph 322, it is proposed to strike out "three" and insert "four;" so as to read:

322. Flax, hackled, known as "dressed line," 4 cents per pound.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from South Dakota.

The amendment was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 323, after the word "flax," to strike out "not retted;" and in line 9, after the word "pound," to strike out "tow of flax, retted, 1 cent per pound;" so as to make the paragraph read:

323. Tow of flax, one-half of 1 cent per pound.

Mr. ALLISON. I propose a modification of the amendment by striking out all after the word "flax," in line 8, and inserting "$20 per ton."

The SECRETARY. After the word "flax," in line 8, it is proposed to strike out the remainder of the paragraph and insert "$20 per ton;" so that the paragraph will read:

323. Tow of flax, $20 per ton.

Mr. PETTIGREW. This provision puts retted and unretted tow of flax on the same footing. In other words, it gives a protection of 100 per cent on unretted tow of flax and about 10 per cent on retted tow of flax. No such discrimination would certainly ever be made by the committee if they understood the facts. They put 100 per cent on common upholsterer's tow, made of flax unretted, and 10 per cent on the retted flax, which is used in spinning, and so on. Therefore, it is an exceedingly unscientific duty, and I believe the committee pride themselves on producing a very scientific bill.

A duty of $20 per ton on unretted tow of flax is abundant—100 per cent. It will do very well. I shall ask to have the paragraph separated and the House provision in regard to the retted tow of flax retained and the duty increased to 2 cents a pound, which will make a duty of about 25 per cent ad valorem.

The VICE-PRESIDENT. Will the Senator from South Dakota restate his amendment as he would like to have it submitted to the Senate?

Mr. PETTIGREW. Perhaps I had better let the amendment go over and let the committee amendment be disposed of, and then I will offer an additional subdivision.

The VICE-PRESIDENT. Will that be satisfactory to the Senator from Iowa?

Mr. ALLISON. It will be.

The VICE-PRESIDENT. The question is on agreeing to the committee amendment as modified.

The amendment as modified was agreed to.

Mr. PETTIGREW. I offer as a substitute for the paragraph the following:

323. Tow of flax, not retted, $20 per ton; tow of flax, retted, 2 cents per pound.

Mr. VEST. I wish to call attention to the fact that under the McKinley Act this duty was one-half cent per pound. On the bill as it came to us from the House, the Dingley bill, the duty on tow of flax not retted was one-half of 1 cent per pound; on tow of flax retted it was 1 cent per pound. As I understand the amendment, it will increase one of the classifications 1½ cents a pound over the McKinley Act. Is that the fact?

Mr. PETTIGREW. I do not know what the McKinley Act rate was, neither do I care. It has always been customary for manufacturers, who have always got up the tariff bills, to put a sum equal to what two or three duties ought to be on the manufactured articles and nothing on the raw material, and then try to make our people believe we were interested in the tariff. I want to remedy that. That is what I am trying to do in this bill. I therefore propose practically to double the rate in this paragraph. The compensatory duties have been doubled under the bill on all manufactured linens.

Mr. VEST. I am not accustomed to defend the McKinley Act, as the world knows, but it is not amenable to the charge made by the Senator from South Dakota that the highest duty was put upon the raw materials. Under that act tow of flax not retted paid a duty of one-half cent a pound. After being retted, which might be called the finished product, the duty was 1 cent a pound.

What I object to is the violation of the statement made by the Senator from Rhode Island [Mr. ALDRICH] in opening this discussion, and which I have understood to be the basis of this legislation by our Republican friends, that they would not go above the McKinley rates. We were told some two weeks ago that there were not a half dozen instances in this bill where they have gone above them. This is an enormous increase, 1½ cents upon one classification and 1 cent on the other. On that I shall call for the yeas and nays, because the tax is excessive.

Mr. WHITE. If I understand the situation of this matter, the Senator from Iowa proposed to make practically a substitute for the provision as it stood in the House bill, putting the whole material at $20 a ton. Then the Senator from South Dakota offered an amendment by which he proposed to place 1 cent on one class and 2 cents on the other—the retted at 2 cents and the not retted at 1 cent.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from South Dakota, on which the yeas and nays are demanded.

The yeas and nays were not ordered.

The amendment was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 324, page 104, line 10, after the word "hemp," to insert "and tow of hemp;" in line 10, before the word "dollars," to strike out "twenty-five" and insert "twenty;" so as to read:

Hemp, and tow of hemp, $20 per ton.

Mr. VEST. I understand the amendment to strike out $25 a ton is not withdrawn?

Mr. ALLISON. The amendment is not withdrawn.

Mr. VEST. As it reads now, it would be, "Hemp, and tow of hemp, $20 per ton."

I wish to make a single remark about this matter. The State of Kentucky is the only State in the Union interested in the matter of hemp. The State of Missouri, prior to the war, was the largest raiser of hemp among the States of the Union; but as soon as compulsory labor was dispensed with, by reason of the emancipation of the slaves, the culture of hemp in my State ceased. It is absolutely impossible by any sort of temptation in the way of money to induce white men to go into the culture of hemp. While there have been great improvements in all sorts of machinery, there has never been anything amounting to what might be called an improvement in the old-fashioned, rude hemp-break, which was absolutely destructive to human health and life. To give an illustration of how destructive it was, after the war, when our negroes were being hired out in Missouri upon hemp farms in the rich bottom lands on the Missouri River, where hemp culture mostly obtained, a negro man hired for $250 to $300 a year, while on the grain farms in the interior he was worth only $125 to $150. No humane master ever allowed his slaves to go the second time upon a hemp farm.

It was found by actual experience that in the first place it developed what is called by the doctors Cachexia africana, I believe, what a plain man would call negro consumption, because the operation of the hemp break was very injurious to the chest, and the inhaling of the lint from the fiber always or nearly always diseased the lungs. Therefore, when coercive labor was dispensed with as a result of the war, it was impossible to hire white men, and the culture of hemp in the State of Missouri has ceased. From being the largest hemp-raising State in the Union, it now produces comparatively nothing; I think a few hundred tons. On the other hand, if Senators have an interest in this matter, and will read the testimony of Mr. Leslie Coombs, a son of Gen. Leslie Coombs, of Kentucky, a prominent Republican from Fayette County, Ky., they will find a very interesting history of hemp culture in that State. In his testimony he affirms, and doubtless it is true, that the negro population being so much larger in Kentucky than in Missouri in proportion to the whites, the negroes through mere necessity were compelled to continue in the hemp fields and with the hemp-break, and he appealed to the Ways and Means Committee to put up the duty, I think to $40 per ton.

The hemp of Kentucky comes into competition with jute. The few raisers of hemp in Kentucky—and there are only a few thousand tons of it raised—do not fear competition from manila or sisal, but from jute alone, and a Kentuckian of considerable prominence said to me the other day, "There are two things in which my State is interested, and I appeal to you as a native Kentuckian to stand by it. Those two things are whisky and hemp." I said, "It is a very significant partnership." He said, "We do not fear sisal and we do not fear manila, but we do fear jute. Therefore we want the highest possible exclusive duty upon jute."

I have some very fond memories from my native State. I am proud of her reputation, of her great statesmen in the past and her great statesmen to-day. I think I know Kentucky as well as any man living, but I can not vote for an increased duty upon hemp or jute even to please them. Hemp is used to-day in cord, and the increased duty upon hemp simply enables the hemp manufacturers of Kentucky to charge more for their rope and for the common hemp garment used by the very poorest class of population, and in the summer time especially, by negroes.

With my views in regard to the tariff, I think it is class legislation to put on an additional duty in order to enhance the price of this article. Why should we put $20 a ton upon this hemp, when its only effect is to enable the hemp manufacturers to add that much more to their finished product? I do not think that that should be the object of a tariff. There is no pretense that hemp from abroad comes into ruinous competition with the hemp of Kentucky. I would say what I am saying now if the State of Missouri raised what she used to raise—more hemp than any other State in the Union.

We have heard a great deal to-day about equality. I believe in equality. I believe that, within the limits of a tariff for revenue, there ought to be no discrimination in favor of any section. Needed revenue, always within the limit of a tariff for revenue, should be equitably and properly adjusted, always considering the nature of the articles to be taxed, whether a luxury or a necessity, and never putting the burden or the benefit on one section at the expense of another. This is simply class legislation, because it is legislating in favor of a local interest, in behalf of a very few farmers. It is not pretended that the hemp is raised all over the State of Kentucky.

It is raised in three or four counties in the State, in one of which I happened to be born—in Fayette, in Woodford, in Bourbon, in Boyle, in Mercer, and nowhere else—and yet we are called upon now to tax the large mass of consumers throughout the country and the people who use the common rope necessary for bagging, necessary in towing, necessary in farming, the plow line being made of it, all sorts of cord being made of it, for the benefit of a few hemp manufacturers in a few counties of one State. I move to strike out "$20 per ton" and insert "$10 per ton." I should like to see hemp upon the free list.

The VICE-PRESIDENT. The amendment to the amendment will be stated.

The SECRETARY. In line 10 it is proposed to amend the committee amendment by striking out the word "twenty" and inserting "ten;" so as to read, "$10 per ton."

The VICE-PRESIDENT. The question is on agreeing to the amendment of the Senator from Missouri to the amendment of the committee.

The amendment to the amendment was rejected.

The VICE-PRESIDENT. The question recurs on agreeing to the amendment of the committee.

The amendment was agreed to.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 324, line 11, page 104, after the word "ton," to strike out "tow of hemp, not carded, 1 cent per pound; tow of hemp, carded, 1½ cents per pound;" and in line 13, after the word "hemp," to strike out "or 'dressed line' fifty" and insert "forty;" so as to read:

Hemp, hackled, known as "line of hemp," $40 per ton.

Mr. VEST. Under existing law it is $22.40 per ton. This is nearly 100 per cent increase over existing law. I move to strike out "$40" and insert "$22.40."

The VICE-PRESIDENT. The amendment to the amendment will be stated.

The SECRETARY. In line 14 it is proposed to amend the committee amendment by striking out "$40" and inserting "$22.40;" so as to read:

Hemp, hackled, known as "line of hemp," $22.40 per ton.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the Senator from Missouri to the amendment.

The amendment to the amendment was rejected.

The amendment as amended was agreed to.

The reading of the bill was resumed, as follows:

325. Yarn, made of jute, 1 cent per pound and 10 per cent ad valorem.

Mr. VEST. I move to strike out "1 cent per pound and 10 per cent" and insert "30 per cent;" so as to read:

325. Yarn, made of jute, 30 per cent ad valorem.

I wish to call the attention of the Senate to some testimony taken before the Ways and Means Committee.

Mr. ALLISON. I have an amendment which I wish to offer.

Mr. VEST. I beg pardon.

Mr. ALLISON. I move to strike out the paragraph and to insert in lieu thereof what I send to the desk.

The SECRETARY. It is proposed to strike out paragraph 325 and insert in lieu thereof the following:

325. Single yarns, made of jute, not finer than 5 lea or number, 1 cent per pound and 10 per cent ad valorem; if finer than 5 lea or number, 35 per cent ad valorem.

Mr. WHITE. I will inquire if this is not only a new section to the pending bill, but a section not to be found in existing law or in the McKinley Act? It is an entirely new classification.

Mr. ALLISON. It is a new adjustment of the rate on single jute yarns.

Mr. VEST. I move to strike out the rate proposed in the amendment and to insert "30 per cent ad valorem."

Mr. MILLS. On both classes?

Mr. VEST. Yes.

The SECRETARY. It is proposed to strike out "1 cent per pound and 10 per cent ad valorem" and "35 per cent ad valorem" where they occur in the amendment and insert in lieu thereof "30 per cent ad valorem."

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Missouri to the amendment.

The amendment to the amendment was rejected.

The VICE-PRESIDENT. The question recurs on agreeing to the amendment of the committee.

The amendment was agreed to.

The next amendment of the Committee on Finance was, in paragraph 326, page 104, line 17, after the word "Cables," to strike out the comma and insert "and;" and in the same line, after the word "cordage," to strike out "and twine, not specially provided for in this act" and insert "composed of istle, Tampico fiber, manila, sisal grass or sunn, or a mixture of these or any of them;" so as to make the paragraph read:

326. Cables and cordage, composed of istle, Tampico fiber, manila, sisal grass or sunn, or a mixture of these or any of them, 1 cent per pound; cables and cordage made of hemp, tarred or untarred, 2 cents per pound.

The amendment was agreed to.

Mr. WHITE. In lieu of and as a substitute for the paragraph just read, I move to insert paragraph 268 of the present law.

The VICE-PRESIDENT. The Secretary will read the proposed amendment.

The SECRETARY. In lieu of paragraph 326 it is proposed to insert:

Cables, cordage, and twine (except binding twine), composed in whole or in part of New Zealand hemp, istle or Tampico fiber, manila, sisal grass, or sunn, 10 per cent ad valorem.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the Senator from California [Mr. WHITE].

The amendment was rejected.

The next amendment of the Committee on Finance was, in paragraph 327, page 105, line 1, after the word "number," to strike out "five-eighths" and insert "three-fourths;" so as to make the paragraph read:

327. Threads, twines, or cords, made from yarn not finer than 5 lea or number, composed of flax, hemp, or ramie, or of which these substances or either of them is the component material of chief value, 12 cents per pound; if made from yarn finer than 5 lea or number, three-fourths of 1 cent per pound additional for each lea or number, or part of a lea or number, in excess of 5.

Mr. ALLISON. I desire to modify the amendment in lines 1 and 2 by inserting "seven-eighths" instead of "three-fourths."

The SECRETARY. It is proposed to amend the committee amendment in paragraph 327 by striking out "three-fourths" and inserting "seven-eighths" in lines 1 and 2, page 105.

The VICE-PRESIDENT. Without objection, the amendment as modified will be agreed to.

Mr. WHITE. Let the question be put. This appears to be a rise not only over the committee amendment, but ahead of the House rate, the House rate being five-eighths of a cent and the Senate rate three-fourths.

Mr. ALLISON. That is accounted for by the change in the raw material, in line 22.

Mr. WHITE. This is a compensatory duty?

Mr. ALLISON. It is a compensatory duty.

Mr. WHITE. On Kentucky hemp?

Mr. ALLISON. Not only on Kentucky hemp, but on flax. It is a duty that is deemed essential in order to enable our own people to manufacture this thread.

Mr. WHITE. I should like to inquire of the Senator from Iowa whether the putting of a duty upon flax straw, of which there have been several dollars' worth imported in several years, has anything to do with the compensatory duty?

Mr. ALLISON. I think nothing whatever.

The VICE-PRESIDENT. Without further objection, the amendment is agreed to.

Mr. ALLISON. I also move, in line 25——

Mr. MORGAN. Before the paragraph is passed over, I offer an amendment to it.

Mr. ALLISON. If the Senator will allow me a moment; in line 25——

Mr. MORGAN. My amendment relates to the compensatory duty just referred to.

Mr. ALLISON. In line 25, page 104, paragraph 327, I move to strike out "twelve," before "cents," and insert "fourteen;" so as to read:

Threads, twines, or cords, made from yarn not finer than 5 lea or number, composed of flax, hemp, or ramie, or of which these substances or either of them is the component material of chief value, 14 cents per pound.

Mr. MORGAN. I want to offer my amendment to the compensatory duty upon flax.

The VICE-PRESIDENT. Does the Senator from Alabama desire to offer his amendment now?

Mr. MORGAN. Yes; I offer it now as an amendment before the vote is taken on the compensatory duty upon flax.

The VICE-PRESIDENT. The Chair did not understand the Senator from Alabama. Is the amendment to be proposed now, or when the paragraph is perfected?

Mr. MORGAN. I wish to offer it as an amendment to the amendment proposed by the committee for a compensatory duty on flax.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. At the end of paragraph 327, page 105, line 3, it is proposed to insert——

Mr. ALLISON. Will not the Senator allow me to perfect the paragraph first?

Mr. MORGAN. But I am trying to perfect it. That is what I am trying to do.

Mr. ALLISON. I know the Senator is, but I understand the Senator proposes to perfect it by adding matter at the end. I desire to have an amendment disposed of in line 25, page 104, striking out "twelve" and inserting "fourteen." Then his amendment will, of course, come in.

Mr. MORGAN. My amendment is so worded that it comes in naturally and properly——

Mr. ALLISON. At any time?

Mr. MORGAN. No.

Mr. ALLISON. Will the Senator allow me to perfect the text?

Mr. MORGAN. If the Senator will allow me first to perfect his amendment, I will.

Mr. ALLISON. Certainly, I yield to the Senator.

Mr. MORGAN. My amendment will come in at the end of the amendment which has just been formally voted on, and which I ask may be reconsidered for the purpose of letting in my amendment.

The VICE-PRESIDENT. The Secretary will read the amendment proposed by the Senator from Alabama.

The SECRETARY. It is proposed to add to paragraph 327:

And a duty of 10 per cent ad valorem on all articles on the free list in section 2 of this act, except those described in paragraphs 474, 475, 484½, 486, 486a, 486b, 486c, 486d, 486e, 492, 496, 510, 528, 547, 563, 597, 598, 600, 606½, 611, 612½, 619½, 621, 628, 635, 639, 640, 648, 657, 662, 666, 670, 670½, all of which articles are exempt from duty.

Mr. MORGAN. Mr. President, I intended to offer this amendment to the compensatory duty on cotton twine yesterday afternoon, but happened to be out of the Chamber at the time that subject was passed upon. I offer it now for the purpose of bringing up the question which was suggested by the Senator from Georgia [Mr. BACON], and in which I fully concur with him, that justice requires, and it is a sound method of legislation, to take from the free list nearly all of the articles that are found upon it and place them under the low ad valorem duty of 10 per cent.

The articles that I do not put under that duty are mentioned in the paragraphs which are there enumerated. I will refer to some of them for the purpose of indicating what they are and in order to show the principle upon which I am acting in this matter.

For instance, in paragraph 611:

Personal effects, not merchandise, of citizens of the United States dying in foreign countries.

Paragraph 612½:

Philosophical and scientific apparatus, utensils, instruments, and preparations, including bottles and boxes containing the same, specially imported in good faith for the use or by order of any society or institution incorporated or established solely for religious, philosophical, educational, scientific, or literary purposes, or for the encouragement of the fine arts, or for the use or by order of any college, academy, school, or seminary of learning in the United States, or any State or public library, and not for sale, subject to such regulations as the Secretary of the Treasury shall prescribe.

Paragraph 621:

Quinia, sulphate of, and all alkaloids or salts of cinchona bark.

Paragraph 628. Seeds: Anise, beet, canary, caraway, cardamom, cauliflower, etc.

Paragraph 635. Silkworm's eggs.

Paragraph 639. Specimens of natural history.

Paragraph 640. Spices, etc.

Paragraph 648. Tamarinds.

Paragraph 662. Vaccine virus.

Those are mere samples selected from the list of enumerated paragraphs to show that my purpose is to make exemptions and put on the free list only those things that relate to the absolute necessities of life in the United States and are not produced in this country to any great extent. That would include salt, it includes gold and silver bullion, and a number of articles. The principle I contend for is that all imports ought to bear a duty if any imports bear a duty, except those that are necessary for the maintenance of human life, and for shelter, and for food in its simplest possible form.

We have had a great deal of disquisition during the debate on this tariff bill about the proper theory, the proper doctrine to apply to tariff legislation. I have heard the discussion in this Chamber of four tariffs during the twenty years I have been here, and I have never yet failed to listen to a great deal of pretty acrimonious debate as to the consistency of Senators in the application of their doctrines to tariff enactment.

I have come to the conclusion that there is no one principle that will run through every act of tariff legislation and secure justice except that every article that is imported shall bear its fair equivalent of duty; of course, that the object of taxation shall be solely and exclusively the raising of revenue for the support of the Government, and that it shall not be a distinctive part of any tariff legislation that bounty, misnamed protection, shall be given to any class of producers or manufacturers in the United States.

My conceptions of the tariffs that we have a right to enact under the Constitution of the country are that they are solely intended for the purpose of raising revenue, and that they were not intended by the framers of the Constitution in any sense at all as a means of conferring bounty upon any class of American citizenship, because we can not confer bounty upon any class of Americans without discriminating against some other class, giving special and peculiar advantages to one citizen over another, which I understand to be contrary to the spirit of our Government.

I find in my examination of all these tariff laws that there is hidden away in the free list the most unjustifiable of all the bounties that we confer upon special classes. They are concealed there, and it is done purposely. When an article that is manufactured in the United States consists of elements which must be exported from some foreign country, those elements ought to bear taxation along with all other objects of taxation that we seek to impose duties upon.

I do not agree at all that raw material, as it is called, ought to be free. There are subjects that ought to be free, but they are not what we call raw material in respect to the processes of manufacture. The admission of the raw material of the manufacturers free of duty is that much bounty conferred upon them. Particularly is that the case when the consumer has to pay for the manufactured goods when they are imported, or when they are made here, the additional price that is made necessary by the incident of taxation upon the article when it comes from abroad.

We can not put any article upon the free list without violating that principle. We can not possibly put any article upon the free list without giving that much advantage to the manufacturer or the producer in this country who makes the same article, or one that is equivalent to it in its general purposes and uses.

Now, we are told that one of the objects of this law is to raise revenue. Another object declared in the title of the act, and frequently avowed on the floor, is to encourage American manufactures or American production. There are two objects, then, presented. The first is the legitimate object, and the other is not a legitimate object, unless it is a mere incident to the exercise of the taxing power. But in this bill it is put forward not as an incident of the taxing power, but as an independent exercise of the power, upon the ground that we have the right to confer bounties upon a portion of our citizens at the expense of other citizens of the United States.

There I separate from all that class of legislators who believe that they have the right by using the powers of taxation to confer bounties and benefits upon one class, to the oppression and disadvatage of another class. We separate there in our conclusions and in our opinions about the proper and legitimate use of the taxing power.

Of all the powers that we have under the Constitution of the United States the power of taxation is the least restrained, and therefore it is the most dangerous. There is no court in this Government that has the right, in any form of action or procedure, to restrain the collection of a tax, no matter how enormous it may be, upon the ground that it is excessive.

There is no lawyer who can frame a case and present it to a court and invoke its jurisdiction to the extent of getting an injunction or any other repressive act upon the part of a court because the tax that we may choose to levy is excessive. That can not be said of any other human act or any other act performed by the Congress of the United States. There is no exercise of power in the United States that is, after all, absolutely discretionary as to the extent of its exercise besides the taxing power. It is, therefore, the most dangerous power that exists in our reach under the Constitution of the United States.

For that very reason, Mr. President, a cautious and considerate and sincere legislator will refrain from laying his hand upon that power for the purpose of using the instrumentality of taxation to confer bounties upon certain classes that he thinks ought to be rewarded and to discriminate against certain men whom he thinks ought to be punished. The taxing power, of all powers of the Government, is the most sacred in its trust. It operates distinctly and directly upon the conscience of every man who legislates. When a man finds himself in the possession of unlimited power and chooses to exercise it for the benefit of his friends or to the disadvantage of other sections where his friends do not reside (I speak of his political friends), that man is standing on the brink of a terrible precipice; it will be only through God's providence if he does not go over it.

Therefore, when I approach the consideration of a tariff bill, I am bound to ask myself the question whether the particular measure that is brought to my attention, and upon which I am required to vote, is a measure intended and designed for the purpose of raising revenue or whether it is a departure from that and goes into the domain of bounty, called protection. If it goes to that extent, even to a slight degree, and I am conscious of it, I can not reconcile it to my conscience to vote for any such measure.

Then, to take the converse of the proposition as to the duty of imposing taxes, we are not relieved from that duty in a conscientious discharge of our functions as legislators in respect of any matter that is imported into the United States if we tax any of them at all, and if we propose to have any reference to equality in the adjustment of the burdens of taxation. So I feel entirely justified, and indeed, sir, I feel called upon, as I have heretofore been called upon, to vote against placing many articles upon the free list that I believe are the legitimate subjects of taxation.

Now, you may take this free list here, and, according to the information that I possess from others—because I have made no calculations upon it myself—an equal, if not a larger, number of articles are imported free of duty into the United States than those which have the burden of taxation; and when you come to values, the value of the imported articles that come in under the free list is larger than the value of those that are put on the dutiable list.

We ask ourselves, therefore, the question, Why is it that more than one-half of the importations into the United States come in free of duty? The man who is burdened with enormous duties upon articles of necessity must turn to the free list and ask himself the question, Why is this large number of articles permitted to come in here free of duty? The answer is a patent one. It does not require any keen discrimination to make the answer perfectly satisfactory. The answer is, these articles are omitted from the dutiable list and are let in free because they increase the profit of certain men who are engaged in certain classes of business in the United States.

Well, Mr. President, that is taxation under the color of a false pretense. We say to ourselves, we are very liberal in taxation; we are free traders; and to prove it we have an enormous free list, both as to the value and number of the articles that are imported. We are free traders; we want to take the burdens off of the people. We turn to the other side, to the first section of the same bill, and we find enormous impositions of taxes, very much higher than we have indulged in since the war, and even higher now than many of them were during the period of the civil war.

It is perfectly obvious that the object of this enormous free list is simply to smuggle in protection under the name of free trade. We are accused here, in a rather sneering way, of being free traders. I never myself have felt any reproach at being called a free trader, because when I look over the forty-five States of the American Union I find that there are no taxes imposed on the articles that pass from one State to another on neither the imports nor exports from any State. I find that very much the larger part and the more valuable part of the commerce of the people of the United States that they provide through their productions and manufactures and in every way is entirely free trade between the States.

If we had the power to do it, as we had under the Articles of Confederation, who in any State, or in the Congress of the United States, would undertake to impose upon this vast mass of interstate commerce duties of export or duties of import? Why, nobody. Nobody dreams of such a thing. All the commerce between these forty-five States is free trade; it is nothing else. If our Government had been established with reference to its support by direct taxation rather than by import duties upon foreign articles imported into the country, I think that we would have prospered very much more than we have done under the tariff systems that we have levied, beginning with the foundation of the Government.

But our Government was not framed for that purpose entirely. The two systems were combined, the system of direct taxation and the system of duty upon imports, from which we should derive revenue. Therefore it is perfectly legitimate to impose tariffs, customs duties, upon articles imported into the United States. But, Mr. President, the wisdom of it is a different thing. In a commercial sense, the wisdom of it is a very different thing.

There is no wiser system of commercial intercourse anywhere in this world than that which exists between these forty-five sovereign States of the American Union. They are separated from each other as distinctively, in a great many respects, as Great Britain is separated from the United States.

There are imaginary lines that run between them—sometimes river boundaries—and imaginary lines run between us and Canada, some of them drawn through the middle of the lakes, where it is impossible to effect any demarcation of the lines. You pass across one of those lakes going from the United States into Canada without being conscious of such a line, and yet we impose duties upon articles coming from the other side of that line.

If it could be true that the whole world could operate its business as these forty-five States do, the whole world would be very much richer, very much freer, and very much happier than the world is now. It is the selfishness of nations which try to prey upon each other and get rich at the expense of each other that gives preference to imposts or customs duties when commodities pass from border to border.

Mr. CHANDLER. May I ask whether, if that blissful state should come to pass, wages would not necessarily be the same all over the world?

Mr. MORGAN. Mr. President, I do not know whether that would be so or not, but I think the Senator from New Hampshire probably will concur with me that if all the gold and silver mines in the world were freely opened to the production of gold and silver, and there was uniformity of coinage and of value accorded to these two great metals which God has given us, wages would be alike in all the countries of the world, depending, in some instances, as a matter of course, upon the density of population, and in others upon their capacity for physical and mental labor.

Mr. CHANDLER. Oh, no; the Senator must not fasten that admission upon me. I do not think that would be the case. I am opposed to having that the case. I am in favor of higher wages in the United States than those which prevail in any other country, and for that reason I am in favor of the American system of protection. The difference between me and the Senator is that the Senator is not only for the free coinage of silver and of gold all

the world over, but I am afraid he is in favor of the equalization of wages all the world over, and I am not.

Mr. MORGAN. The equalization of wages will always take place the world over when there is absolute freedom of trade, and I therefore am in favor of an equalization of wages all the world over, if it does not starve anybody, if it does nobody any harm. I am not at all unwilling to see a subject of the British Empire, whether he is in one of the islands of the sea or whether in the "little tight island" called the United Kingdom, there prosper and enjoy himself and grow strong, and all that, for I think that is one of the benevolences that the Almighty has intended for man in any part of the world, and I am not envious of his prosperity, and do not desire to cripple or destroy him at all; on the contrary, I would give him advantages, if I could do it, not over our own people, but over his own people—his rulers and Government, who keep him under foot to prevent him from rising. I would remove those difficulties if I could do so; but I do not expect to enter upon an undertaking of that kind, for I am not a universal reformer.

I acknowledge that there is an incident of protection, as we call it, an incident of bounty, in every impost we impose upon goods brought from abroad. I am not inveighing against that at all, but under the pretense of giving our laborers higher wages I am not in favor of increasing the profits and magnifying the wealth of the employer when the wages of the laborer really are not enhanced, or, if they are enhanced, the compensatory losses, or rather the losses that derogate from his nominal profits as a wage earner, are imposed upon him in the very high prices of that for which he has to pay, which at last equalizes this matter and produces an equation between the situations here and the situations abroad in all the countries of the world.

Mr. CHANDLER. Mr. President——

The PRESIDING OFFICER (Mr. PASCO in the chair). Does the Senator from Alabama yield to the Senator from New Hampshire?

Mr. MORGAN. I do.

Mr. CHANDLER. As I have interrupted the Senator by his kind permission once, I venture to do it again, if he will allow me.

The Senator has offered an amendment to put upon the dutiable list nearly all the articles in this bill which are upon the free list. He has seemingly joined the Senator from Georgia [Mr. BACON] in the proposition that the free list ought to be wiped out and everything have a duty placed upon it. We endeavor to be practical now as the heat of the summer is coming upon us; we ought to be practical certainly, and try to pass this bill and go home.

Why does the Senator from Alabama [Mr. MORGAN], why does the Senator from Georgia, expect that we can possibly take this free list and convert it into a dutiable list, in view of the fact that when the Democratic party controlled this Chamber and the Senator from Arkansas [Mr. JONES]—who I see is listening to the Senator from Alabama [laughter]—was making a tariff bill here, there was a free list just as broad as the present free list which has been reported by the Senator from Iowa [Mr. ALLISON]?

I will ask the Senator, with all due respect, is it not folly to waste our time upon a proposition to destroy the free list, which our party does not intend to do, and which his party did not dare to try to do?

Mr. MORGAN. I do not know, Mr. President, what my party dares to try to do. I hope it always dares to try to do what is right. I know they do dare to try to prevent the piling up of enormous bounties in favor of certain sections and certain people in this country. They have been laboring diligently and assiduously at that task for several days, and in the midst of their labors I have seen the Senator from Iowa rise several times and offer an ad valorem duty upon certain goods imported into the United States to compensate for an increase of protection—to increase the protection, rather, because certain articles which had heretofore been imported free were put upon the dutiable list—and he used in those cases the ordinary process of an ad valorem duty of 10 per cent, just as I do in this amendment. So I have a very high precedent in the conduct of this very bill for what I am attempting to do in a little more general way.

The Senator from New Hampshire objects to the consumption of time that is required. It requires very little time to take a vote, Mr. President, placing a duty of 10 per cent ad valorem upon certain articles on the free list and excepting certain others.

Mr. CHANDLER. Right there will the Senator explain why he excepts the items he names in his amendment? If we are going to have a duty on everything, why except anything? The Senator from Georgia [Mr. BACON] could not advocate a duty on everything without excepting three or four things, and now the Senator from Alabama excepts a dozen. Will the Senator tell us what those exceptions are, and why he makes any exception at all if we are to have a tariff upon everything?

The Senator will excuse me for saying these things, because the platform of 1892 of the Democratic party bound the party, of which Grover Cleveland was then the head and the Senator from Alabama a distinguished member, to put "a tariff for revenue only" upon everything; and if the pledges of the platform had been carried out, there would have been on, say, eight hundred millions or a thousand millions of importations a duty of 20 or 25 per cent imposed, which would have brought us in two hundred or two hundred and fifty million dollars of revenue, and then the thing would have been done, and Democratic principles would have been triumphant for once in this country. It was not done in the tariff of 1894, and the Senator knows we can not do it now. Then why does the Senator make an attempt to do it now?

Mr. MORGAN. All the exceptions in the amendment I propose are exceptions in favor of humanity, and only that—absolute necessities—and they relate to articles which are not produced in this country, except bullion, gold and silver, which of course ought to be admitted free, because they relate to the supply of money to the people.

But the Senator will find by looking over the list that I propose—and it is easy enough to trace it up by casting his eye on the bill—that the exceptions I felt authorized to make relate entirely to the duties we owe to the common wants and the sympathies of human nature. They do not relate in the slightest degree to the advantage of any man engaged in manufactures or production. In most instances they relate to articles not produced here at all.

As to the declaration of the different party platforms on this subject, parties, Mr. President, have been fixing up platforms and laying down rules for tariff legislation since we first commenced having party conventions and caucuses to bind the whole people of the country; and I suppose there are as great variations in those platforms, taking either of the parties, as you can find in almost any other declarations that ever have been advanced by human thought and action. Sometimes we almost go to the verge of free trade, and then we come and put in a little protection. When the McKinley tariff bill was under discussion here, both parties were committed to the doctrine of protection to this extent, that we would place upon articles manufactured in the United States a sufficient duty to compensate for what the Senator from New Hampshire calls the difference between the price of labor in the United States and abroad.

What is that but protection? What is that but bounty? It gives to the American manufacturer that amount of additional duty which would cover, or is supposed to cover, the difference between the cost of labor in the United States and the cost of labor abroad. Of course that is the doctrine of protection, which both parties agreed to, so far as parties are concerned.

But, Mr. President, I have lived long enough and have had enough of public experience to understand that no political party in a great national convention can lay down a rule to which the membership of that party will accede and which they will carry out in their legislation. They have never accomplished it yet, and they never will.

Look at the Republican party in this Chamber. Up to this meeting of Congress and until this bill had been quite a long time under consideration, free speech and free voting amongst the Republicans upon the items of the tariff was something that was entirely established amongst the precedents of that party. Now there is not a Senator on that side who dares to break away from the line of demarcation as prescribed by the Senator from Iowa [Mr. ALLISON]. The Senator from Iowa votes this tariff all the time; he indicates what he wants. He is a wise man, a most patriotic citizen, and a very able Senator; and they do well to trust him; but I have never yet seen a child 2 years old that had as much confidence in its mother and followed the advice of that mother as unhesitatingly as these grave, gray-headed, splendid men who are on the other side of this Chamber follow the Senator from Iowa.

Mr. CHANDLER. The Senator says we "do not dare to do." The Senator is mistaken. We do not want to do. We are united on this side of the Chamber; we are not broken all to pieces, as the Senator's party is, and we gladly vote with the Senator from Iowa because he is wise and right.

Mr. MORGAN. I have no doubt the Republican Senators in this Chamber very much enjoy the confession on the part of the Senator from New Hampshire that he is entirely willing to do what they require of him, because it has seemed to me that the Senator from New Hampshire was trying to break the fence all the time, and that he has been almost dying under the restraints that have been imposed upon him by the caucus. [Laughter.] I do not think that I have witnessed any mental suffering in a long time that was as keen and as excruciating and as exhausting as that which the caucus has imposed upon the Senator from New Hampshire. [Laughter.]

But he is not alone. There are a number of Senators on that side of the Chamber who rebel at this bill as they go along, and who are thinking now about the excuses they will be able to give

to their constituency when they get home for casting these votes; and the only excuse they can give is that of caucus rule. Therefore, this tariff is a party-caucus decree. Whatever other decrees we may rebel against in this country, we do not rebel against party decrees, except it be on the Democratic side of the Chamber, when Georgians and South Carolinians, and occasionally an Alabamian, gets up and speaks his sentiments and votes according to his own convictions.

I am very proud now to say that up to this time, at least, the Democratic party have not imposed this gag upon their members. They could not do it. If you want to break up a Democratic caucus in this body, just come in there and propose that every man shall be required to adhere to what the majority shall ordain in that caucus, and they will disseminate themselves rapidly to their respective places of abode and not go back any more until that rule is not insisted upon. There is free speech, free thought, and free action left on the part of the Democracy. That being so, the people of the United States can trust that party to take care of their rights and interests without the dictation of party managers at a national convention.

I am very sorry that the conviction of the people in regard to the action of the Republican party is being confirmed every day by all that is done here, and that is, that the present project or tariff as it is being engineered through this Senate and as it was engineered through the House of Representatives is a mere distribution of rewards for political service. We do not understand that you are doing anything else except paying your political debts. We do not begin to understand, nor do the people, that you are doing anything for them, that their interests are consulted, that their rights are respected.

We understand that the men who receive the benefits of this tariff in these various phases of protection have demanded of the Republican party that they shall get their reward in this bill, and the caucus have taken those demands altogether, have averaged them up, and they have said wool shall get so much, hides so much, sugar so much, and so cotton and woolen manufactures, and iron and steel, and the like of that, shall get so much; and they have divided it all up; and the men in the United States who are interested now in these industries can take a pencil and piece of paper and sit down and tell you very closely the amounts of money they are going to make out of this bill; but the consumers—those who are not benefited in this way—can not calculate their losses, for the reason that when you get a man on a sort of toboggan slide down in the direction of distress and poverty, that man has very hard work to take up and face the other way.

There is a class of people in the United States who are going to be benefited by this tariff. They will be prosperous—yes, they will be overprosperous. I do not know that they are going to be suddenly prosperous, but enormously so when the scheme that is now being voted under the gag law of the caucus upon the other side is put upon the statute book.

When the Republican party has passed its decree into a statute, then the men who are to receive the benefits and who are perfectly well known and described in this bill, will grow prosperous, and, for the time being, there will be a whir of wheels, perhaps, and the loading of ducats into their treasury; but after a while, Mr. President, this thing is going to stop, because the other people who are not provided for, the great industrial masses of this country, will not be able to earn enough to pay these bounties, and depression and calamity will take place in the country; panic will appear in the commercial and financial marts, and this bill will produce it. Causes now exist sufficient to produce it, but this bill will aggravate it; and after this bill has had its first reviving effect upon these so-called industries of manufacturing, etc., when the reaction comes in this country, there is no man, I think, who has bestowed his thoughts sedately upon questions of prosperity and adversity, who will not certainly forecast in his mind that this country, by virtue of this political tariff, designed by a political party, is bound to suffer panic, disorder, and distress.

The Senator from New Hampshire says that we ought to be in a hurry about this, and he laments the waste of time. Well, Mr. President, if I am permitted to speak about any other institution in the world except this, I will refer to a legislative body that used to assemble in this Capitol about 200 feet from here. I will not call the name of it for fear somebody will call me to order; I will not allude to it in any more specific terms, lest I might violate the constitutional right of somebody on this floor, or at least his sense of delicacy, decency, and propriety. I notice, however, that that legislative body—and it is a very great body, composed of many splendid men, many of whom have national and world-wide reputations for ability and integrity, for experience and for courage—seem to have so much leisure that they do not meet but twice a week; and indeed they have forbidden themselves to meet more than twice a week.

There is a statute upon that book in that House which is called a rule, just as obligatory as any law, criminal or civil, on the statute book is obligatory upon a citizen of the United States—a rule derived by a single step from the Constitution of the United States, a rule enacted in obedience to an imperative demand of the Constitution of the United States; and that rule, contrary to the Constitution, requires that that House shall not meet except on Monday and Thursday.

I suppose that it is the first time that any negative, pregnant legislation has ever occurred in the United States, where either House has passed a resolution or a rule that it should not meet except on certain days, so that if some sudden calamity or some sudden emergency were to come upon the people of the United States, and the Speaker of the House should go there, and a number of members of the House should assemble there sufficient to constitute a quorum to do business, and the Speaker should undertake to ascend to his desk and take up his gavel, one of the pages would have the right to inquire of him what he was doing there, what business he had in that Chamber to mount upon that desk, with that piece of timber in his hand, at a time when the resolution of the House was that he should not be there—forbidden to be there by positive law, by a law that the House alone can make and that nobody but the House can undo or repeal, forbidden to be there at all in the capacity of a legislator or Speaker—and is found at that desk on Tuesday, or on Friday, or on Saturday. He is not there on Tuesday, or Wednesday, or Friday, or Saturday, or possibly on Sunday, which is not dies non juridicus; not at all.

A House having that much leisure, having nothing to do, nobody to serve, no constitutional duties to exercise, certainly can not complain if we allow them to enjoy their elegant leisure, loitering in the shades of this beautiful city, while we are engaged in the laborious effort of trying to put through a tariff bill which they have never read, that they were not permitted to read. It was carried in there and brought out, but it was never read or permitted to be read. The membership of the House knew nothing about the merits of the bill when it came here, and yet, according to the Constitution, they must originate all bills for revenue. That does not merely mean that they must dig them up from the foundations of their wisdom and expose them undigested and unscanned to the balance of the world. It means that they shall present those bills after due consideration.

The bill came to this body, and the committee of the Senate took it and kept it for a long time. I am almost afraid to say how long for fear they might suppose I was impeaching them for want of diligence, but I suppose no committee ever worked harder upon a bill than our Finance Committee has worked upon this measure; so hard, indeed, that one of the most eminent and able of the members of the committee has been driven to his home by sickness, as we understand, from the great labor he had to perform in the investigation of the measure.

The bill has come to us in a new form almost every day. We have very little conception of what we have to vote upon. The committee have not settled down upon anything, as far as I understand, because they change their report every half hour in the day, and we do not know how to prepare to vote upon the measure which they have had printed and laid before us. So on both sides great leisure is being taken and Senators only get in haste and complain of the want of time when they find themselves in contact with questions where they have not the ability to answer the demand that is presented for their vote. The Senator from New Hampshire sees that the Senator from Iowa has, on frequent occasions, put on a compensatory duty of 10 per cent to the manufacturer or the producer in the United States because a duty was laid upon the raw material.

Day after day we are having these exhibitions, if I may call them such, and when I come and specify in my amendment the particular articles excepted, and say that as to all the balance on the free list there shall be an ad valorem duty of 10 per cent, then the Senator from New Hampshire rises and wants to know of me how long it would take to adjust that tariff. It will take no longer to adjust that provision than merely the time necessary to cast a vote. Everybody can understand it. Ten per cent ad valorem upon those articles that are contained in the free list outside of the exceptions which I state in the amendment. That is simple enough.

What would be the effect of it? Sir, as the saying goes in the country, we would have money to burn arising out of the tariff act, and nobody would be any the worse for it, nobody would suffer. The people of the United States would be delighted to pay 10 per cent upon articles that are imported now free of duty if in doing so they could get revenue enough to keep them from putting a tax upon sugar and upon tea, and upon beer and upon salt and such articles. If we will adopt the amendment which I propose now, we can take off all those taxes and have money enough here to support the Government without any doubt at all, because 10 per cent upon the value of the imports that now come in

free will supply all the revenue we want in this country. We could take off, if we chose to do it, not only the tax upon sugar and upon salt and upon tea and upon beer and upon tobacco, which is suggested here, but we could take 10 per cent ad valorem off all the duties that are imposed upon articles in the dutiable list of the tariff and still have money to burn.

The people of the United States are amply able to pay all the necessary expenses of this Government, enlarging as it is from year to year, necessarily; and to tell the truth, sir, I am grateful to find that the expenditures of the United States are enlarging, because it indicates that this country is growing steadily. There is not much money provided in the appropriation acts that is not absolutely necessary. They are scrutinized very closely. There is not a government in this world which spends less money foolishly than the Government of the United States, and there is less corruption in public expenditures here than there is in any other government that exists or ever has existed in the world. That is a boast which is perfectly justified by the facts. So when our list of expenditures is increasing and our people are satisfied that we are not wasting their money on vain and improper objects, they are entirely content, because they feel that that is a proof to them, as it is to the outside world, that the growth of this nation is compensating for all the expenditures we are putting upon it.

It is our growth and not the wickedness of legislation that invites these expenditures, and so I am not prone to quarrel about that. I am rather disposed to be thankful that we can bear the burden without feeling it. Where we find a burden grievous and unbearable is where the bonus or bounty is taken out of the hands of industry on the pretense and guise, false as it is, of protection, and is put into the pockets of rich men who are able to live without it.

So I find nothing in the situation to alarm me about the adoption of this amendment. I do not know that the amendment will get a single vote in the Senate. I have not asked anybody whether he is going to vote for it or not. I rely for votes in support of the amendment upon the intrinsic merit of the proposition itself, which is, that the free list can bear an ad valorem tax of 10 per cent without distressing any manufacturer, any producer, or any consumer in the United States, and here are these vast resources for revenue that we leave untouched, first, because we do not want in any respect at all to reduce the amount of bounty that certain classes get under the pending bill, and, in the second place, because the weather is warm and it is inconvenient now for us to turn these pages over and attend to our business. That is the argument of the Senator from New Hampshire—it is inconvenient; the weather is too warm; time is pressing on us; everything conspires to force us into hasty action.

Mr. President, I grant you there are some things which do look as if they had conspired together to force us into hasty action. Here are politicians standing around us almost with clubs drawn over our heads telling us to push the tariff bill through. It is the only thing we are permitted to do at all. A Senator might introduce any bill he pleased, no matter what merit there might be in it, and unless it happened to be a matter of absolute necessity, unequivocal necessity, he could not pass it through the Senate now to the displacement of the pending bill.

We have our orders to pass the bill, and to pass it in the shape decreed by the Republican caucus, and the Republican caucus has contented itself with taking it in the shape that it may be proposed from moment to moment by the Senator from Iowa [Mr. ALLISON]. We are now enacting into statutes of the United States, at least so far as concerns our part of it, the will of the Senator from Iowa, who is followed so obediently by all of his political friends, the majority in this Chamber. That is what we are doing, according to the dictates of the Republican party, agreed to in caucus and expressed by the Senator from Iowa.

If I could persuade the Senator from Iowa to adopt this proposition, there would not be a man on the other side of the Chamber who would dare get up and object to it—not one. Let me see if I can invite some Senator on the other side—if the Senator from Iowa would rise in his place and say, "Mr. MORGAN, I accept your amendment; I hope it will be passed by the Senate"—to rise up now and say——

Mr. SPOONER. Get the Senator from Iowa first.

Mr. MORGAN. Let me see if there is anyone who would rise up and say, "I will not vote for it." There is not one. There is no duty he proposes that does not go down, and if I could only be so fortunate as to get his assent to my amendment, it would whirl through the Senate like a cyclone. There would be nothing left for me to do then except to rejoice in the returning spirit of justice and to rejoice also that the power of the Prince of Darkness has been checked, his wings clipped, so that he could not lord it over the Senate and over the people, and demand at the hands of the people of the United States to stand and deliver what is proposed to be put through in the pending bill.

The Senator from Missouri [Mr. VEST], the Senator from Arkansas [Mr. JONES], the Senator from California [Mr. WHITE], and the Senator from Mississippi [Mr. WALTHALL], who have had particular charge of the bill on our side, have taken a great deal of time about it, and they have taken it up and emphasized and explained the points in many particulars where the bill operates harshly and unjustly, and while I sympathize with them in the labor it has imposed upon them when they knew they would fail at the end of every vote on any motion they proposed—they knew it—they are performing a work which, if it does not result immediately to their advantage, will immortalize them when they have gone hence and are no more, for the reason that they point out to the people of the United States the egregious wrong that is being done here deliberately and from moment to moment in the imposition of burdens unheard of before and utterly unjustified, either by the necessities of the Treasury or the condition of the people.

Sir, the Treasury of the United States does not need what is being imposed in the pending bill. More than that, the Treasury of the United States is not going to get the revenue out of the bill to meet the alleged deficiencies. More than that, sir, it is admitted on the other side of the Chamber, and I here announce it in the presence of the world, that as a revenue producer the bill is a failure. A confessed failure as a revenue producer, it stands here merely as a burning wrong against the industries of this country, intended to roast out of the people enough fat to feed the rich and the manufacturers.

That is the bill upon which we are acting. I am trying to modify it. I am trying to get some revenue into the Treasury of the United States, so that we will not have to borrow any more money. We ought never to have borrowed a cent anyhow, Mr. President. The borrowing of money, or the apparent necessity for it, which is now said to be the cause of the filling up of the Treasury with as much perhaps as $180,000,000 surplus revenue to-day, is a Republican measure. I do not mean that the Republicans borrowed the money, but they created the necessity and the temptation under which it was borrowed. They are responsible for the whole of it. They are responsible for their refusal to pay our contracts according to the face thereof; and with the Treasury redundant in money, they refused to use it because it did not suit the creditor.

They have created the apparent necessity of our going into debt and increasing our national debt instead of reducing it, as we have been perfectly able to do all the time, borrowing money for the purpose of keeping up a gold reserve in the Treasury of the United States which has not the sanction of law, even in color. There is no sanction of law for it at all. A mere naked usurpation of a power on the part of a Secretary of the Treasury in the first place has been kept up, and there it stands, a sort of jack pot, over which the men of Wall street and Lombard street and other places in the world are shuffling their cards and dealing for a winning. That is what they are doing with it. That is the whole of it.

The American people, innocent and good and confiding as they are, will not believe me when I tell them there is no shadow of a foundation in law for the $100,000,000 of gold which has been treasured up there now for sixteen or seventeen years, on which interest has been paid regularly by the United States at 4 per cent, when the $100,000,000 has been withdrawn from circulation and locked up in the caverns of the Treasury. Suppose it had been in circulation during the sixteen or seventeen years; what difference would it have made in the prosperity of these people? Instead of going around like an abject set of poverty-stricken mendicants, our men who now tramp the world, at first for employment and now to escape the burdens of life, the men who tramp the length and breadth of this great Republic, would be to-day the masters of honest and pleasant homes, and they would be controlling a profitable business for men in their condition and degree in life.

The party on the other side of the Chamber has imposed upon the country all this wrong, and the wrong and difficulty have come to that degree now when all confess that there is no prosperity in the land. There is depression and suffering and woe and unhappiness. They all admit it. They do not deny it, and they say the way to make a people in our condition happy and prosperous is just to double the burden of taxation. I can not see the logic of that. I am not alert enough and wise enough and learned enough to argue to such a conclusion, that prosperity of a substantial sort can possibly come to a people who are already in the depths of adversity by increasing the burden we put upon them by taxation.

Now I recur to my first proposition, that the abuse of a taxing law, and especially when that abuse results in the poverty of the masses, of the poor, is the worst crime that a legislature can perpetrate. It is the most terrible breach of faith that humanity can be guilty of when a Constitution confides to your sincere honesty and mine perfect discretion as to the amount of taxation, and you, in the exercise of that discretion, impose enormous burdens upon

a people whose burdens are already so thick that they can not bear them and stand aloft. Then I feel that the time has arrived for doing or trying to do something to alleviate their wrongs. So I want to impose upon the manufacturers—these gentlemen who get bounties under the proposed law—an ad valorem duty of 10 per cent on all that they bring in here and all that everybody brings in here, in order that they may have at least a portion of the burden to bear which weighs upon us.

Mr. President, there is another thing about the proposed law which I like. I like it very much. I admire the wisdom and the sagacity of the Republican side of the Chamber in leaving unrepealed the income-tax provision. The bill is so framed that the income tax remains unrepealed upon the statute books. There has been a great deal said upon the stump about the income tax, and a number of gentlemen have essayed to express very forcible opinions against the validity, or the propriety, or the decency, you may say, of an income tax. We spread an income tax upon the statute book in the Wilson law, and these gentlemen have the power to repeal it. There is no doubt that if the Senator from Iowa were to say "I move to amend the bill by repealing the income-tax provision in the Wilson Act," everybody on the other side would vote for it.

Why not do it? Ah, sir, it is because the people expect that the time will come when even the Supreme Court of the United States will find it convenient to rectify an opinion that nobody scarcely believes is the law, and this law will then stand there to receive the benefit of it. Why, then, is a Democratic law, enacted by a Democratic Congress, which a Democratic President refused to sign, because, I suppose, it was not good enough for him, left on the statute books? No better chance has ever been presented than for the Republicans, now that they have the power, to move a repeal of that Democratic law. Instead of doing so, they leave it on the statute book in the hope that some time or other a Supreme Court will be found to reverse the opinion which was created by a bare majority, and that one turned over in a night, against the constitutionality of the law.

I am obliged to them for that. It may turn out in the providence of God—for judges of the Supreme Courts do disappear and reappear—that we will find some person who has the capacity to feel the weight of one hundred years of precedent and who will yield his judgment in favor of the constitutionality of the law. And if he does, then we will have more revenue than we will know what to do with. Then we can take the tax off beer, and off tobacco, and off tea, and off salt, and off sugar, and that happy, beautiful breakfast table about which the senior Senator from Maine [Mr. HALE] used to speak here so eloquently will be spread with luxuries for the poor. Then a man can have a little sweetening to put into his coffee, and he will consider it a great blessing from on high. The American people will permit him to have a little sugar to put into his coffee.

When Democratic measures have fair play, when the wisdom of that grand old party is voted and enunciated through the action of its representatives in this day and generation, and in the days and generations that have passed and in all that are to come, then the people of the United States will stand upon a safe and firm foundation. Then we will not be quarreling about these little differences as to nonessentials, which seem sometimes to get up such a furore in the body amongst ourselves about the tax on pine lumber and the tax on long-staple cotton, etc. We will agree as sensible men in the Democratic party, like sensible men in the church find their strongest bond of union in the fact that they pass over their differences on nonessentials and fortify themselves by their cohesion upon the great, leading doctrines and tenets of the creed.

It does not require, in order that a man shall be a Democrat, that he shall vote for a duty on cotton, or pine timber, or iron ore, or anything else, or that he should not. That is no test of his Democracy. The test of his Democracy on a tariff means simply this: "Do you want to impose this tax for the purpose of conferring a bounty upon a particular class of men?" "No; I will not do it." "Then you are all right. If you believe it is a good revenue measure, vote according to your judgment."

But I repeat, Mr. President (and I wish the Republican side of this Chamber and the country would understand it), that while we have apparent discrepancies about these small, I will not say trifling, matters, but differences of opinion upon subjects that are not essential to the creed of the Democracy, we stand in a proud attitude when we face a party of great and powerful men who are choked to their knees by a caucus, and do not dare to rise and advocate anything that their consciences prompt them to do.

Mr. NELSON. I ask unanimous consent to offer an amendment, and I ask that it be printed and lie on the table.

The PRESIDING OFFICER. Is there objection? The Chair hears none. The amendment will be printed and lie on the table.

Mr. MANTLE. I wish to offer an amendment. I ask that it be printed and lie on the table.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered. The question is on the adoption of the amendment offered by the Senator from Iowa [Mr. ALLISON]. The amendment will be stated.

The SECRETARY. In line 25, page 104, paragraph 327, before the word "cents," it is proposed to strike out "twelve" and insert "fourteen."

Mr. MORGAN. For the present I withdraw the amendment I have just been debating. I ask that it may be printed and lie on the table. I shall offer it later.

Mr. ALLISON. Allow me to make a suggestion to the Senator from Alabama. As the amendment relates wholly to what is now on the free list, I trust he will not offer his amendment until just before we reach the free list.

Mr. MORGAN. Very good. I may select that time.

Mr. ALLISON. I hope the Senator will give that notice in regard to the amendment.

The PRESIDING OFFICER. The Senator from Alabama asks that the amendment proposed by him be printed. It will be so ordered.

Mr. ALLISON. I ask that it be inserted at the place I designated, before the free list.

The PRESIDING OFFICER. The Chair understands that it has not yet been formally offered. The Senator from Alabama proposes to offer it when that point in the bill is reached.

Mr. ALLISON. Very well.

The PRESIDING OFFICER. The question is on the adoption of the amendment of the Senator from Iowa.

Mr. JONES of Arkansas. Let the amendment be stated.

The PRESIDING OFFICER. The amendment will be again read.

The SECRETARY. On page 104, line 25, paragraph 327, it is proposed to strike out "twelve," before "cents," and insert "fourteen;" so as to read:

327. Threads, twines, or cords, made from yarn not finer than 5 lea or number, composed of flax, hemp, or ramie, or of which these substances or either of them is the component material of chief value, 14 cents per pound.

Mr. VEST. I ask the Senator from Iowa to let that go over until morning. I desire to submit some observations in regard to it.

Mr. JONES of Arkansas. It is 5 o'clock.

Mr. VEST. It is now within a fraction of 5 o'clock. We have been here since 11 o'clock.

Mr. ALLISON. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After seven minutes spent in executive session the doors were reopened, and (at 5 o'clock and 5 minutes p. m.) the Senate adjourned until to-morrow, Saturday, June 19, 1897, at 11 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate June 18, 1897.

MARSHAL.

Walter H. Johnson, of Georgia, to be marshal of the United States for the northern district of Georgia, vice Samuel C. Dunlap, to be removed.

COLLECTOR OF CUSTOMS.

Freeland H. Oaks, of Maine, to be collector of customs for the district of Saco, in the State of Maine, to succeed Harry A. McNealley, resigned.

COLLECTORS OF INTERNAL REVENUE.

Harmon L. Remmel, of Arkansas, to be collector of internal revenue for the district of Arkansas, in place of Robert T. Cook, removed.

Frank W. Howbert, of Colorado, to be collector of internal revenue for the district of Colorado, in place of Albert L. New, removed.

CONFIRMATIONS.

Executive nominations confirmed by the Senate June 18, 1897.

AUDITOR FOR NAVY DEPARTMENT.

Frank H. Morris, of Ohio, to be Auditor for the Navy Department.

PROMOTIONS IN THE ARMY.

General officer.

Col. Anson Mills, Third Cavalry, to be brigadier-general.

Quartermaster's Department.

Maj. John Simpson, quartermaster, to be deputy quartermaster-general.

Capt. James Worden Pope, assistant quartermaster, to be quartermaster.

First Lieut. Andrew Gregg Curtin Quay, Third Cavalry, to be assistant quartermaster.

Cavalry arm.

First Lieut. Thomas Jefferson Lewis, Second Cavalry, to be captain.

Artillery arm.

Capt. James Chester, Third Artillery, to be major.

First Lieut. John Deane Charles Hoskins, Third Artillery, to be captain.

Second Lieut. Archibald Campbell, Third Artillery, to be first lieutenant.

AGENT AT SALMON FISHERIES OF ALASKA.

Howard M. Kutchin, of California, to be agent at the salmon fisheries of Alaska.

ASSISTANT AGENT AT SALMON FISHERIES OF ALASKA.

James C. Boatman, of California, to be assistant agent at the salmon fisheries of Alaska.

SURVEYOR OF CUSTOMS.

John R. Puryear, of Kentucky, to be surveyor of customs for the port of Paducah, in the State of Kentucky.

RECEIVER OF PUBLIC MONEYS.

John W. Miller, of Woodward, Okla., to be receiver of public moneys at Woodward, Okla.

SENATE.

SATURDAY, *June 19, 1897.*

The Senate met at 11 o'clock a. m.

Prayer by Rev. HUGH JOHNSTON, D. D., of the city of Washington.

The Journal of yesterday's proceedings was read and approved.

PETITIONS AND MEMORIALS.

Mr. FRYE presented memorials of R. C. Pingree and 52 other citizens, of A. L. Templeton and 52 other citizens, and of M. F. Ricker and 52 other citizens, all in the State of Maine, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

Mr. McENERY presented the memorial of Marr Bros. and 945 other citizens of Louisiana, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which was referred to the Committee on Interstate Commerce.

Mr. PLATT of New York presented sundry petitions of citizens of Albany, Buffalo, Utica, Lansingburg, Louisville, Fulton, Wegatchie, Newburg, Hudson, and Chase Mills, all in the State of New York, praying for the early passage of a protective-tariff law; which were ordered to lie on the table.

He also presented memorials of sundry citizens of Brooklyn, Orange County, Richmond, and New York City, all in the State of New York, remonstrating against the proposed increase of the tax on beer; which were ordered to lie on the table.

Mr. COCKRELL. I present one of those stereotyped petitions that have been sent out all over the country to get signatures. It is signed by citizens of Springfield, Mo., and speaks about industry being paralyzed and the importance of early action on a protective-tariff measure. I move that the petition lie on the table.

The motion was agreed to.

Mr. HOAR presented a memorial of sundry citizens of Massachusetts, remonstrating against any increase in the present rate of duty on tanned skins for morocco or a duty on raw goatskins; which was ordered to lie on the table.

Mr. GALLINGER presented the memorial of H. S. Collins, of South Danville, N. H., and a memorial of Spaulding & Swett, of Wolfboro, N. H., remonstrating against an increase in the present rate of duty on tanned skins for morocco or a duty on raw goatskins; which were ordered to lie on the table.

Mr. ELKINS presented sundry petitions of citizens of Middleway, Charleston, New Milton, and Huntington, all in the State of West Virginia, praying for the early passage of the pending tariff bill; which were ordered to lie on the table.

Mr. NELSON presented a petition of Cigar Makers' Local Union No. 77, of Minneapolis, Minn., praying for the retention of the present rate of duty on tobacco; which was ordered to lie on the table.

He also presented the petition of J. R. Wright and sundry other citizens of Hills, Minn., praying for the early passage of the pending tariff bill; which was ordered to lie on the table.

Mr. MANTLE presented a petition of 210 citizens of Missoula County, Mont., praying for the enactment of legislation for a more rigid restriction of immigration; which was ordered to lie on the table.

Mr. CHILTON presented a memorial of the San Antonio Beer Brewers' Union, of San Antonio, Tex., remonstrating against the proposed increase in the tax on beer; which was ordered to lie on the table.

He also presented the memorial of John L. Henry and sundry other citizens of Dallas, Tex., and the memorial of A. G. McIlwaine and sundry other citizens of Tyler, Tex., remonstrating against the repeal of the present civil-service law; which were referred to the Committee on Civil Service and Retrenchment.

He also presented the petition of H. H. Kirkpatrick and sundry other citizens of Texas, and the petition of John N. Simpson and sundry other citizens of Texas, praying for the appointment of an international monetary commission; which were referred to the Committee on Finance.

Mr. HAWLEY presented the petition of Henry A. Spafard and 40 other citizens of Connecticut, praying for the early enactment of a protective-tariff law; which was ordered to lie on the table.

REPORTS OF COMMITTEES.

Mr. HALE, from the Committee on Printing, reported an amendment intended to be proposed to the general deficiency appropriation bill; which was referred to the Committee on Appropriations, and ordered to be printed.

Mr. HAWLEY, from the Committee on Military Affairs, to whom was referred the bill (S. 1141) to reimburse the States of California, Oregon, and Nevada for moneys by them expended in the suppression of the rebellion, moved that the committee be discharged from its further consideration, and that it be referred to the Committee on Claims; which was agreed to.

BILL INTRODUCED.

Mr. BERRY introduced a bill (S. 2203) for the relief of Edward A. Scott, of Crawford County, Ark.; which was read twice by its title, and referred to the Committee on Claims.

AMENDMENT TO DEFICIENCY APPROPRIATION BILL.

Mr. GALLINGER (for Mr. McMILLAN) submitted an amendment intended to be proposed to the general deficiency appropriation bill; which was ordered to be printed, and, with the accompanying papers, referred to the Committee on Appropriations.

REPORT ON THE NICARAGUA CANAL.

Mr. MORGAN submitted the following resolution; which was considered by unanimous consent, and agreed to:

Resolved, That the report of the Committee on the Nicaraguan Canal, made to the Senate at the last session of the Fifty-fourth Congress, be reprinted for the use of the Senate.

PRESIDENTIAL APPROVALS.

A message from the President of the United States, by Mr. O. L. PRUDEN, one of his secretaries, announced that the President had on the 18th instant approved and signed the following acts and joint resolution:

An act (S. 956) to amend an act entitled "An act to authorize the construction of a steel bridge over the St. Louis River between the States of Wisconsin and Minnesota," approved April 24, 1894, as amended by an act approved August 4, 1894, entitled "An act to amend an act to authorize the construction of a steel bridge over the St. Louis River between the States of Minnesota and Wisconsin;"

An act (S. 1979) to authorize the construction of a bridge across Pearl River, in the State of Mississippi; and

A joint resolution (S. R. 40) authorizing the Secretary of War to receive for instruction at the Military Academy at West Point Cárlos Gutierrez, of Salvador.

THE TARIFF BILL.

The VICE-PRESIDENT. Morning business appears to be closed.

Mr. ALLISON. I move that the Senate proceed to the consideration of House bill 379.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States.

The VICE-PRESIDENT. The pending question is on the amendment of the Senator from Iowa [Mr. ALLISON], which will be stated.

The SECRETARY. On page 104, line 25, paragraph 327, it is proposed to strike out "twelve," before "cents," and insert "fourteen;" so as to read:

327. Threads, twines, or cords, made from yarn not finer than 5 lea or number, composed of flax, hemp, or ramie, or of which these substances or either of them is the component material of chief value, 14 cents per pound.

Mr. VEST. Mr. President, upon yesterday, while we were considering the pending schedule in regard to threads, twines, cables, etc., made of flax and hemp, I was interested in observing the absolute uniformity between the recommendations of the flax, hemp, and jute manufacturers of the United States and the duties imposed by the pending bill. By referring to the testimony taken before the Ways and Means Committee of the House of Representatives, page 1330, it will be seen that the chairman of that association appeared before the committee and furnished a schedule of tariff duties, in which he stated that the National Hemp, Jute, and Flax Manufacturing Association of the United States employed many thousands of men, women, and children, and—

By a meeting held in New York on December 30, 1896, I am authorized, as chairman of the said meeting, to submit the request which we make herein to your honorable body.

He then proceeds to state the duties that that association wants upon flax and hemp, hackled, yarn made of jute, and yarn composed of flax and twine, upon all the manufactured goods, which he specifies, and the duty is made by the committee exactly the same as requested by the manufacturers. On the raw material the committee put a larger duty than was recommended by the manufacturers, their obvious interest being to put the raw material as low as possible and to put the highest duty possible upon the manufactured product.

What I distinctly wish to call the attention of the Senate to is the rate upon "threads, twines, or cords, made from yarn not finer than 5 lea or number, composed of flax, hemp, or ramie, etc., 12 cents per pound." That was the recommendation of the committee, giving these manufacturers all they wanted. Now the Senator from Iowa comes in and gives them 2 cents more than they asked. He proposes to increase the duty from 12 to 14 cents a pound, and that in the face of the fact that the comparative statement shows that in 1896 we exported of hemp twine $727,585 worth and of all other twines $341,862 worth, and imported of hemp twine $139,000 worth and of all other twines $131,000 worth, making $260,000 worth imported, against over a million dollars' worth of these articles exported.

It seems to me that it ought to be sufficient to give these manufacturers what they ask. Why should we impose upon the consumers in the United States of these twines, which are an article of absolute necessity, 2 cents more than the manufacturers ask for protection? This is the point to which I call the attention of the Senate. I shall ask for the yeas and nays upon the amendment.

Mr. ALLISON. Mr. President, just one word. The Senator from Missouri reads from the projected schedule found in the Committee on Ways and Means hearings, from which it will appear that they based their duty upon the fine threads and upon the basis of a cent and a half a pound for dressed line, which is their raw material. The Senate yesterday put a duty of 3 cents a pound on dressed line instead of a cent and a half.

Mr. JONES of Arkansas. And doubled the proposed House rate.

Mr. ALLISON. No; the House put a duty of 3 cents a pound upon dressed line.

Mr. JONES of Arkansas. Who was it that wanted a cent and a half, the manufacturers or the growers of dressed line?

Mr. ALLISON. I allude to the schedule read by the Senator from Missouri, which fixes 12 cents a pound upon the fine thread on the basis of a cent and a half a pound upon dressed line. The House doubled that duty and we assented to it yesterday. So it is absolutely necessary, if this thread is to be at all manufactured in our country, that there should be a slight rise in order to enable them to continue the manufacture and to pay this price for dressed line. That is all there is of it.

Mr. JONES of Arkansas. I do not understand the Senator's statement. Paragraph 325 of the bill as it came from the House had dressed line at 3 cents.

Mr. ALLISON. Yes, sir.

Mr. JONES of Arkansas. Now, with 3 cents on dressed line, the House proposed 12 cents in paragraph 327. Yet I understand the Senator to say that the 12 cents was put in paragraph 327 because a cent and a half was in contemplation by the House committee at the time as the tax on dressed line.

Mr. ALLISON. No; the Senator misunderstands me. The Senator from Missouri states that the association would be satisfied with 12 cents a pound upon this thread. My reply to him is that that was a part of their scheme, which included a cent and a half a pound on dressed line. Now, the House placed 3 cents a pound upon dressed line and only 12 cents a pound upon the thread, which is not a proper relative duty. That is all I say.

The Senate Committee on Finance reduced the duty upon dressed line to 2½ cents a pound, and therefore did not change the 12 cents a pound, but as the Senate yesterday increased the duty on dressed line from the amendment proposed by the committee to 3 cents, we find that a proper relation of the thread to the dressed line, this raw material, requires a small addition in line 25. That is all there is of it.

Mr. VEST. Let me ask the Senator one question. If he did it for that reason, why did he not increase it on the other articles embraced in this schedule which he has left at the same duty?

Mr. ALLISON. We do propose to increase it on line 2, page 105, making it seven-eighths instead of three-fourths.

Mr. WHITE. The Senate did that yesterday.

Mr. ALLISON. That was done yesterday.

Mr. VEST. How about yarns?

Mr. ALLISON. I shall propose a duty at the proper time, in line 10, to increase from six to seven. These amendments are made necessary by the amendment which was offered yesterday as respects dressed line. That is all there is to it.

Mr. VEST. I apologize for having said anything about it. At this rate we will increase it 100 per cent all along the line.

Mr. JONES of Arkansas. In this connection, I desire to call the attention of the Senator from Iowa and other members of the Senate to a statement made by Messrs. Britton & Gray, who sign themselves as attorneys for importers of linens. There are some very striking statements of fact, and as it will take but a minute or two, I would be glad to have the attention of the Senate to it. They say:

Customs revenues from flax manufactures have always been large. During past six years the total value of such importations has averaged $25,000,000 annually. From eleven to fourteen millions of dollars represent the annual importations of manufactured linens. Prior to the war the duty on manufactured linens was 15 per cent ad valorem. Necessity for increased revenue then caused an increase of duty to 35 per cent. It there remained until the act of 1890 increased the duty on coarse goods counting below 100 threads to the square inch to 50 per cent, leaving the goods above that quality at 35 per cent until January 1, 1894.

This increase was given upon the assurance of the Flax and Hemp Spinners and Growers' Association that under such protective rates—

And they quote the language—

"we promise an established industry of great magnitude." (Record Hearings, 1889-90, page 523.)

The promise was never redeemed. Congress by act of March 3, 1893, unanimously extended to January 1, 1895, the increase to 50 per cent on fine linens proposed by the act of 1890, it being well understood that in the meantime the tariff would be again revised, as was done by the act of August, 1894, and the former rate of 35 per cent on all linens then reenacted. At the hearing before the present Ways and Means Committee (pages 1329-1333) the same association or interests, under the name of the Flax, Hemp, and Jute Manufacturers of the United States, presented demands for duties on dressed flax, yarns and threads, twine, and manufactured cloth, which have been substantially accorded in the pending bill. Therein duty was asked of 50 per cent ad valorem on manufactured linens.

Notwithstanding this public record, the rates of duty given by the Senate amendment (paragraph 344) exhibit an enormous advance beyond what was thus asked. They are both compound and specific, thus:

Thirty per cent ad valorem on all goods, adding following specific duties:
Sixty threads or under, 1½ cents per square yard.
From over 60 to 120 threads, 3 cents per square yard.
From over 120 to 180 threads, 7 cents per square yard.
Over 180 threads, 10 cents per square yard.
Provided, That none of foregoing shall pay less than 50 per cent ad valorem.
On fine goods weighing less than 4 ounces per square yard—

Mr. President, the statement is made that the manufacturers' association representing this interest asked for a tax of 50 per cent instead of the 35 that was in existence then. The Senate committee make a rate which provides that it shall not be less than 50 per cent, no matter how much higher. They go beyond what the manufacturers themselves ask for. You provide that the highest rate that they suggest shall be the lowest rate admissible under the schedule:

On fine goods weighing less than 4 ounces per square yard, and containing more than 100 threads to the square inch, including shirting cloth, the present rate of 35 per cent is retained.

The enormous increase proposed beyond what was asked by the promising American manufacturers is illustrated by the following examples:

	Act 1890.	Act 1894.	Finance Committee proposed tariff (ad valorem).
	Per cent.	*Per cent.*	*Per cent.*
Table damask	35	35	109½
Do	35	35	74½
Do	50	35	62½
Duck for clothing	50	35	73
Lining	50	35	60½

Mr. GRAY. The highest increase, as is usual, is on the lowest priced goods.

Mr. JONES of Arkansas. As suggested by the Senator from Delaware, as usual with a Republican tariff everywhere, the highest rates of taxation are on the lowest priced goods. There is here no deviation from the rule, but it is carrying out the same old plan of taking away from him who has little what little he has. Here is a specimen of the cheapest class of domestic linen with a tax of 109½ per cent as the rate of taxation paid by it, and

that when the manufacturers themselves going before the Ways and Means Committee ask for a tax of 50 per cent.

These proposed rates—

Say these attorneys—

are plainly prohibitive. They are so intended. Even on the goods increased to 50 per cent by the act of 1890, and with no resulting manufacture here, importations fell from $5,000,000 in 1891 to $3,500,000 in 1893 (Senate Tariff Report 334, Fifty-third Congress, second session, pages 278, 280), with consequent large loss of needed revenue. The enormous increase over 50 per cent now proposed will correspondingly further reduce both importations and revenue.

If manufacture of these goods were possible here, such exorbitant rates of duty would not be justified, (1) because wholly beyond any legitimate protection which is even asked by the promising manufacturers, and (2) because neither American flax nor American manufacture has been developed here under protective conditions, except coarse crash, which flourishes now, as heretofore, at the 35 per cent rate.

But such manufacture promised under the act of 1890 resulted in complete failure. No change in essential conditions, climatic or otherwise, has since occurred, and after ninety years of continuous duty upon linens, no domestic manufacture, except of cheap crash and possible recent small production of mixed cotton and linen fabric, has yet appeared. The goods are all imported. The revenues from 1890 to 1894 suffered from these unredeemed promises, and yet the same interests now give the same renewed assurances, with no possible change in conditions whereby they can be fulfilled. The people are asked to submit to this enormous increase in taxation upon such a record. Prohibitive rates are proposed and the common people are to be made to suffer to accord a few individuals more "protection" than they even ask.

Flax is grown in this country only for the seed. Even for such purpose the supply does not equal the demand, for in 1896 661,533 bushels of seed were imported. (House Tariff Comparison, 1897, page 60.)

That flax is not produced for fiber is admitted. The attached letter demonstrates it.

Surely under such conditions the rates on manufactured linens of 50 per cent and 35 per cent, as provided by the act of 1890, and now asked by the promising domestic manufacturers, should not be increased to the destruction of revenue, the discomfort of the people, and without possibility of benefit to any industry, actual or possible. On the contrary, the rates proposed by the Linen Trade Association of New York afford ample protection to any prospective industry and yet preserve needed revenue. These sufficient and conservative rates are as follows:

	Unions and low grades linens (ad valorem).	Medium grades linens (ad valorem).	Fine grades linens (ad valorem).
Counting to square inch 100 threads and under, 30 per cent plus one-half cent per square yard equals	*Per cent.* 40½	*Per cent.* 37½	*Per cent.* ----------
Counting 101-150 threads, 30 per cent plus 1 cent per square yard equals	45	39½	34½
Counting 151-200 threads, 30 per cent plus 1½ cents per square yard equals	43½	40½	34½
Counting 201-250 threads, 30 per cent plus 2 cents per square yard equals	45½	39	34½

BRITTON & GRAY,
Attorneys for Importers.

Mr. President, the Senator from Iowa knows that the rates of taxation imposed in this schedule will absolutely prohibit importation. He further knows that there is no manufacture to supply these goods in this country. The practical effect of this schedule is simply to put a prohibitive tariff on this grade of goods, to compel the poorer people of the country to buy and use cotton goods in lieu of linen, and provide that they can not use and have linen at all. It is to enable the manufacturers of imitations and frauds in the shape of linen out of cotton to be sold to build up and create a market for that kind of goods. But the price is to be increased for the consumers of the country. It can have no other effect. The plain common sense of the situation leads to that. It can have no other meaning.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the Senator from Iowa, upon which the Chair understands the Senator from Missouri to demand the yeas and nays.

Mr. VEST. Let us have the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. CLAY (when his name was called). I am paired with the junior Senator from Massachusetts [Mr. LODGE].

Mr. MORRILL (when his name was called). I am paired with the senior Senator from Tennessee [Mr. HARRIS], and therefore withhold my vote.

Mr. RAWLINS (when his name was called). I am paired with the junior Senator from Ohio [Mr. HANNA], and therefore withhold my vote.

The roll call was concluded.

Mr. WELLINGTON. I inquire if the junior Senator from North Carolina [Mr. BUTLER] has voted?

The VICE-PRESIDENT. He has not voted.

Mr. WELLINGTON. I withhold my vote, being paired with that Senator.

Mr. GEAR. I am paired with the Senator from New Jersey [Mr. SMITH]. I transfer that pair to the junior Senator from Massachusetts [Mr. LODGE], and vote "yea."

Mr. CLAY. Upon the statement of the Senator from Iowa [Mr. GEAR], I vote "nay."

Mr. WELLINGTON. I transfer my pair with the junior Senator from North Carolina [Mr. BUTLER] to the Senator from Oregon [Mr. MCBRIDE], and vote "yea."

Mr. HARRIS of Kansas. I am paired with the junior Senator from Wyoming [Mr. CLARK]. If he were present, I should vote "nay."

Mr. SPOONER. I am paired with the Senator from Mississippi [Mr. WALTHALL].

Mr. GALLINGER (after having voted in the affirmative). I am informed that the Senator from Texas [Mr. MILLS], with whom I have a general pair, has not voted. I will therefore withdraw my vote.

The Secretary recapitulated the vote.

Mr. GALLINGER. With the understanding that my vote is necessary to make a quorum, I will allow it to stand in the affirmative, notwithstanding my pair.

The result was announced—yeas 27, nays 19; as follows:

YEAS—27.

Allison,	Elkins,	Hawley,	Platt, N. Y.
Burrows,	Fairbanks,	Hoar,	Pritchard,
Carter,	Foraker,	McEnery,	Proctor,
Chandler,	Frye,	Nelson,	Sewell,
Cullom,	Gallinger,	Penrose,	Shoup,
Davis,	Gear,	Perkins,	Wellington.
Deboe,	Hale,	Platt, Conn.	

NAYS—19.

Bate,	Gray,	Mitchell,	Tillman,
Berry,	Heitfeld,	Murphy,	Turpie,
Chilton,	Jones, Ark.	Pettigrew,	Vest,
Clay,	McLaurin,	Pettus,	White.
Cockrell,	Mallory,	Roach,	

NOT VOTING—43.

Aldrich,	Gorman,	McMillan,	Spooner,

George,	McBride,	Smith,	

So the amendment was agreed to.

The next amendment of the Committee on Finance was, on page 105, to strike out the following paragraph:

328. Single yarns made of flax tow, 8 lea and finer, 35 per cent ad valorem; single yarns composed of flax line, hemp, or ramie, valued at 13 cents or less per pound, 6 cents per pound; valued at more than 13 cents per pound, 45 per cent ad valorem.

And in lieu thereof to insert:

328. Single yarns in the gray, made of flax, hemp, or ramie, not finer than 8 lea or number, 6 cents per pound; finer than 8 lea or number and not finer than 80 lea or number, 40 per cent ad valorem; finer than 80 lea or number, 15 per cent ad valorem.

Mr. ALLISON. I wish to modify the paragraph by inserting, in line 10, before "cents," "seven" instead of "six;" and in line 12, by inserting "five" after "forty;" so as to read, "45 per cent ad valorem."

The VICE-PRESIDENT. The amendment proposed by the Senator from Iowa will be stated.

The SECRETARY. In line 10, page 105, strike out "six" and insert "seven" before "cents;" and in line 12, after "forty," insert "five;" so as to make the paragraph read:

328. Single yarns in the gray, made of flax, hemp, or ramie, not finer than 8 lea or number, 7 cents per pound; finer than 8 lea or number and not finer than 80 lea or number, 45 per cent ad valorem; finer than 80 lea or number, 15 per cent ad valorem.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the Senator from Iowa to the amendment of the Committee on Finance.

Mr. GRAY. Mr. President, we are all conscious, even those who are not expert in the nomenclature of linen-thread manufacture, that somehow or other the people of this country are having a very onerous burden placed upon them. I feel so, at any rate. I know it is going to be done, but I think it is right that we should have some light upon the way in which it is being done.

Therefore I would ask the Senator from Iowa, in good faith, for information to myself at least, what this means in the paragraph: "Single yarns in the gray, made of flax, hemp, or ramie, not finer than 8 lea or number." Will he explain that, please? What is 8 lea or number? Nobody can estimate what the amount of the tax is unless he understands these terms.

Mr. ALLISON. A lea or number is 300 feet in length.

Mr. GRAY. Do you know what the equivalent ad valorem of that would be?

Mr. ALLISON. It is estimated by experts that it would range from 38 to 44 per cent at the rate we originally had. This increase would add somewhat to it.

Mr. GRAY. Then it is nearly 100 per cent at least in the two rates, specific and ad valorem.

Mr. ALLISON. No; the specific is in the first bracket, 7 cents a pound.

Mr. GRAY. That is true; 7 cents a pound.

Mr. ALLISON. The next bracket is 45 per cent ad valorem, and the third bracket is 15 per cent.

Mr. GRAY. And it is not a compound rate, I see.

Mr. ALLISON. No; it is not compound.

Mr. GRAY. Then the rate would be between 40 and 50 per cent ad valorem, equivalent to the rate now proposed, 7 cents a pound?

Mr. ALLISON. At 7 cents.

Mr. VEST. Will the Senator from Delaware permit me to ask the Senator from Iowa a question?

Mr. GRAY. Certainly.

Mr. VEST. Is the print correct in line 13, "finer than 80 lea or number, 15 per cent ad valorem?"

Mr. ALLISON. Yes; 15 per cent ad valorem.

Mr. VEST. Finer than 80 lea or number?

Mr. ALLISON. Finer than 80 lea or number, 15 per cent ad valorem.

Mr. VEST. That is the finest quality?

Mr. ALLISON. The very finest.

Mr. VEST. Upon that you have 15 per cent, and upon the other you have 40 per cent.

Mr. ALLISON. These fine yarns are not spun in this country, but they are used in fabricating articles. They are to the manufacturers of these fine goods just what dressed line is to the goods that are spun.

Mr. GRAY. Now, to understand this more thoroughly, paragraph 327, where the tax has just been raised from 12 cents to 14 cents a pound, is upon a lower grade of thread?

Mr. ALLISON. It is upon a lower grade of thread.

Mr. GRAY. Can the Senator give the Senate the equivalent ad valorem on that?

Mr. ALLISON. It is about as in paragraph 328. With the addition of 2 cents a pound, it is probably 47 or 48 per cent. Under 327, as stated by the experts, the ad valorem runs from 38 to 44 per cent, as originally proposed. With the addition of 2 cents per pound, it of course increases it to that extent.

Mr. GRAY. I notice, if I may interrupt the Senator for a moment, that there is no equivalent ad valorem given in the comparative statement, and that is the reason why I made the inquiry.

Mr. ALLISON. According to recent reports from the United States treasury at New York and other reliable data, these rates will range from an ad valorem equivalent of about 38 per cent to 47 per cent. Of course they have been increased now somewhat by these additions. There will be an average of about 44 per cent.

Mr. GRAY. Of course this is a matter that we have got to gather information on as we go along, and we can not always be sure that we have it. I have a letter here that seems to be written by an intelligent man. I have no personal acquaintance with him, but he is in business in New York. It is a letter in which there are some statements that have prompted this line of inquiry.

There is this significant fact stated by him, that the linen manufacturers would be quite willing to have a more moderate rate of duty than is proposed either by the House or Senate if the thread manufacturers of the United States, which manufacture is largely monopolized by one or two firms, were willing that that should be so, and that the linen-thread manufacturers, who seem to have an interest in this whole schedule for some purpose which is probably a selfish one (naturally a selfish one, I will say), have interfered and demanded a higher rate all along the flax schedule on the manufactured article and maintain a very high rate upon their thread. But let me read. I am seeking for information. I will just read what I have here.

Mr. ALLISON. Before the Senator reads the letter, let me call his attention to the fact that the thread manufacturers are willing to have a much lower rate provided they can get dressed line in at a low rate. But when they pay 3 cents a pound for dressed line they say they must have an opportunity to be compensated for the increased duty. We are all familiar with the situation.

Mr. GRAY. In this babel of conflicting interests, in which everybody is clamoring for himself, let me read one statement that may add to the confusion perhaps, but it is entitled to go in, from this letter addressed to me from the gentleman of whom I have spoken, and with whom I have no personal acquaintance.

Of this manufacturer the writer says:

> He is also largely interested in keeping up the tariff to the highest point possible on his flax or linen threads, and he readily sees that this can be more easily accomplished if the rate on other flax goods is likewise advanced. At the present time linen threads are subject to a 35 per cent ad valorem rate of duty, and under the proposed bill a very large portion of the imports would have to pay the equivalent of 66 per cent, thus further increasing at the public expense the profits of this powerful interest, which is known to have made great fortunes here. Although he is not a manufacturer of linens, he holds such a peculiar position at the present time that those interested in the linen business have tried to get his cooperation, with a view to having the rate on linen yarns, which he says he does not spin now, or expect to spin, put at a lower rate, so as to permit of a reduction in the rate on linen fabrics. He has been assured that if he will "consent" to have linen yarns left at the present rate of 35 per cent ad valorem the New England interests will agree that the rate on linens (that is, woven fabrics) shall not exceed 50 per cent ad valorem.

Mr. ALLISON. Will the Senator give the name of the writer?

Mr. GRAY. Certainly I will give the name. I have been put under no injunction about the name.

Mr. ALLISON. I only want to know who wrote the letter.

Mr. GRAY. If I can read it. As I make it out, the name is Richard H. Ewarts.

Mr. ALLISON. Is he a manufacturer?

Mr. GRAY. I presume not. I do not know.

Mr. JONES of Arkansas. Is not his name in print at the top of the letter?

Mr. GRAY. No. I will have to decipher his name. It is dated in New York. Probably he belongs to that proscribed class of importers.

Mr. ALLISON. I only wanted to know the name. This writer seems to think there is a conflict between the thread spinners and the linen manufacturers, and of course his explanation would be more accurate if he were one of the manufacturers.

Mr. GRAY. I do not know Mr. Ewarts. All I want to point out is, that in this clamor of conflicting interests, where all the pigs are getting their feet into the trough at the same time, these "forgotten people," of whom we have heard something since the Senator from Texas [Mr. MILLS] spoke, have a right to know what is going on, if they can, and if there is noise and clamor of these people who are making our tariff rates, they have a right to find out just what the burden is and what the motives are.

I do not know whether the statements in this letter are so or not; but this man states over his own name that the gentlemen who are engaged in the thread manufacture are practically dictating this linen schedule, and are not willing that the rates on their own linens should be left as they are in the present law at 35 per cent ad valorem, but demand a rate which is equivalent to an ad valorem, in some cases, of 66 per cent; and therefore the compensating policy coming in again—the necessary policy of the tax—the schedule has to go up. That is all I can make of it. Perhaps the Senator from Iowa can explain something about it that will put it in a better light, for that is not a very good light to leave it in.

Mr. President, it seems to me that no person can with any propriety come to Washington and, in the Finance Committee room or anywhere else, apart from the open debate in this Senate, fix the rate of taxation upon this important and necessary article for the comfort and decent living of the masses of the people. It is not right; it is not just; it does not comport with anything that ought to characterize legislation of this kind, that we should not have a full explanation of why it is necessary that this tax should be raised.

I assume, if what this writer states is true, that thread manufacturers are not poor men struggling for a living. They have been conducting successfully and honestly and honorably, no doubt, a great business, from which I suppose profits, great or small, have been achieved. Why, then, should we have in their interest, or in the interest of the linen manufacturers, these high rates of duty imposed, unless we have an explanation? It will not do for our Republican friends to say the policy is to sit still and let the Democrats talk, and object, and protest; "We have got the votes, and we will pass all these increases." You ought to take the people of the country into your confidence and tell them why this thing is to be done. We want to know why it is to be done. I want to know, as one of the humble representatives on this floor of the American people, why this should be done.

Mr. SEWELL. Will the Senator allow me to interrupt him there?

Mr. GRAY. Certainly.

Mr. SEWELL. I can probably answer the Senator's question. I wish to state that Mr. Barbour is one of the largest manufacturers in New Jersey. There is another large establishment in my State employing, probably, between six and seven thousand men.

Mr. GRAY. I can not hear the Senator.

Mr. SEWELL. I say there is another establishment besides that of Mr. Barbour in my State, employing between six and seven thousand men. The basis of this schedule was prepared on investigation by the House committee, but the rate has now been increased at the instance of our Western friends.

Mr. GRAY. That is what we want to know—where it comes from.

Mr. SEWELL. The increase in the schedule amounts to from 12 to 14 per cent upon this paragraph, and is absolutely necessary by reason of the increased duty placed upon the raw material. That is where it is.

Mr. GRAY. That is some light, and we have not had that much before. Let us go on and hear more about the matter.

Mr. SEWELL. That is all.

Mr. GRAY. That is something; that is more than has been deigned to be given to us before.

Mr. SEWELL. There is a difference between the thread manufacturers and the manufacturers of linen. The thread manufac-

ture has been established here for thirty or forty years, long before it was thought of making linen out of the flax of this country.

Mr. GRAY. But the thread manufacturers have an increase of duty under this bill in the way of protection.

Mr. SEWELL. I beg your pardon. Nothing has been given but what was absolutely necessary on account of the duty placed on the raw material in the United States. The duty was about 40 per cent, and it is increased about one-sixth, making the duty about 47½ per cent. That is all there is to it.

Mr. GRAY. What I want to know, if the Senator from New Jersey will pardon me, is, do not the thread manufacturers have an increase by the bill as it came from the House over the rates in the present law?

Mr. SEWELL. The rate in the law of 1894 is 35 per cent, and the rate of duty prescribed in paragraph 327 on the same articles is 12 cents.

Mr. GRAY. Specific?

Mr. SEWELL. Specific.

Mr. GRAY. There is no equivalent ad valorem in this table that I can find, and I have been depending on these tables, and there is no light upon that. It may be 50 per cent or it may be 100 per cent ad valorem for all I know. I am not an expert, and we have a right to know about this.

Mr. ALLISON. If the Senator from Delaware will pardon me—of course I do not know that he has listened to anything I have said——

Mr. GRAY. I listen to everything the Senator says that I can hear.

Mr. ALLISON. I have twice said that this additional duty would be equivalent to the duty on the raw material, and I have at least once said that without this additional duty the average rate of duty upon the articles in paragraph 327 is from 38 to 44 per cent. So, if the Senator will listen, he will get some information.

Mr. GRAY. I am listening. The Senator from Iowa must not be impatient.

Mr. ALLISON. I am not impatient.

Mr. GRAY. I may be very slow of apprehension, but still I stand here to know for the people of the country, some of whom are slow of apprehension, some of them poor people, and some of them do not know as much as the Senator from Iowa; and I want to know, in my imperfect way, it may be, something about this complicated bill before it gets through.

Mr. ALLISON. That is right.

Mr. GRAY. If there is a good reason for it, I will not keep back that reason when I have occasion to speak about it to my people. When they want to know why it is that this important fabric of linen cloth, their sheets, and table damasks are increased so materially in price, what the justification is, I want to be able to tell them.

Now, I understand the increase, so far as the Senate is responsible for that increase over the bill as it came from the House, is that the Western people, from Minnesota and Iowa I suppose, have demanded a tax on the raw material. So far so good. That is a reason for the action the Senate proposes, and it is a reason for putting an increased tax on cotton goods by reason of the tax on the raw material placed upon it the other day. But then that does not explain this. If I may be permitted to be so presumptuous as to go a step further, why was the increase made at all on these low grades of linen fabrics? Why were they increased from 35 per cent to something over 100 per cent?

These factories have been in existence and they have flourished in the State of the distinguished Senator from New Jersey, for he says so, and he says they have been there for generations, and they have employed thousands of men and provide for them a most honorable and useful industry. Why, then, do they demand more protection? Why demand a larger tax to be imposed on the consumers?

Mr. PLATT of Connecticut. If the Senator will permit me, I think I can give a very good reason.

Mr. GRAY. I am waiting to hear a good reason.

Mr. PLATT of Connecticut. Under the McKinley law the rate was 45 per cent, and under the Wilson law 35 per cent. The result has been since the passage of the Wilson law that these factories have not been successful; they have not declared any dividends or made any money.

Mr. SEWELL. I want to supplement what the Senator from Connecticut has just said by saying that while the establishment to which I have referred is the largest in the United States, it has not for four years, since the passage of the Wilson law, paid a dividend.

Mr. GRAY. I do not know anything about the dividends they have paid, or how many they paid before the Wilson law was passed. The Senator from Connecticut says there was a small reduction, from 45 to 35 per cent, when that law went into operation. I do not know whether they pay any dividends now, or what may be the amount. Will the Senator from New Jersey state whether they paid dividends before the Wilson law went into effect?

Mr. SEWELL. Yes; they paid the ordinary dividends.

Mr. GRAY. What were they?

Mr. SEWELL. Six or 7 per cent.

Mr. GRAY. Not more than that?

Mr. SEWELL. I do not think so.

Mr. GRAY. And yet they have not closed their doors since the passage of the Wilson law.

Mr. SEWELL. No.

Mr. GRAY. I understood the Senator to say they were in operation and employing six or seven thousand men. I think we ought to have some detailed statement about this matter. I want to be conservative in this matter of vested interests, vested even under protective legislation so outrageous as this. Still money has been invested on the faith of it, and we are not destroying but trying to preserve. We want to take down this brick wall a brick at a time. But I should like to know if they have been here demanding and stating to the Finance Committee of the Senate or the Ways and Means Committee of the other House that they need this additional protection in order to exist as an industry?

Mr. ALLISON. If the Senator will allow me just one moment, these manufacturers have not been here to make any demands as respects the changes I have referred to this morning.

Mr. GRAY. Is that so?

Mr. ALLISON. But they have made representations to the committee, and I can see no possible objection to that.

Mr. GRAY. Not the slightest. I only want to know what their representations were.

Mr. ALLISON. They made representations to the committee when this schedule was under consideration that with the rates we had provided for their raw material the amount of the duty here would be acceptable to them. We then took the only source of information that is absolutely open to us, and that is the source which we find in the officers of the United States—the expert appraisers, the General Appraisers, and other appraisers in New York. From these expert appraisers, and not from manufacturers, we derived the information that as to this linen schedule, under the ad valorem the Senator speaks of, there were large undervaluations, and that it was wiser and better, in cases where it could be done, to make specific duties instead of ad valorem. We were careful to make such inquiry as we could to ascertain whether these specific duties were higher than the ad valorem, and the Senator perfectly well knows that in making specific duties there is not the elasticity there is in ad valorem rates.

Mr. GRAY. I thought there were none.

Mr. ALLISON. There may be in certain lines. The equivalent ad valorem for the duties under paragraphs 327 and 328 that we have made specific was supposed to be equal to an average of about 44 per cent, as I stated a while ago. I do not know that; I only know what the experts, whose duty it is to make the computations, and who have an expert knowledge, tell me and tell the committee; and that is what they said. That is all the information, not in detail, but in brief, that I think we can desire about this matter. Certainly I agree with the Senator from Delaware that we want to be conservative. We do not wish to give the manufacturers a larger duty than is necessary to place themselves in fair competition with other manufacturers in these products. That is all there is about it.

Mr. GRAY. I am very much obliged to the Senator from Iowa, so far as I am concerned, for the light he has given me and perhaps given a good many other people in the country. He has stated these facts. So now we know that these increased rates of duties upon these important articles have not been made upon the demand of the manufacturers themselves or upon the demands of the linen manufacturers, but have been such as the committee in their wisdom thought were right and necessary and proper to give to this important industry, and that Mr. Barbour or no one has ever made any representations to the committee that such increases in the duty on his fabrics was necessary.

Mr. ALLISON. No, Mr. President, I did not say so. I think Mr. Barbour was before the committee, and other linen manufacturers were before the committee; that is, they presented documents and papers. I do not say they are here now, but they are all at hand and can be produced if the Senator desires.

I do not wish to be understood that the people who are interested in these provisions have not made representations or statements to the committee as to what they believe to be absolutely necessary in order that they might conduct their business at all. The Senator from New Jersey tells us there are 7,000 men employed in a single factory in his State. Under our theory on this side of the Chamber it is our purpose to so provide rates of duty in this bill as will not throw those men out of employment and have these articles fabricated in Europe or elsewhere. That is the general purpose we have. Having that purpose, we gather light from all sources with respect to details; and that is all we have done.

Mr. GRAY. One word more.

Mr. WHITE. If the Senator from Delaware will permit me, on page 1331, on Schedule J, in the hearings before the Committee on Ways and Means of the House of Representatives, there is quite an elaborate schedule prepared by numerous firms, with the reasons assigned, and there is a statement on page 1331 that "at 13 cents per pound or less, 6 cents per pound; more than 13 cents, 45 per cent ad valorem," with the accompanying statement that the average is 60 per cent ad valorem.

Mr. GRAY. That corresponds with the information I have.

Mr. WHITE. This is a statement made before the Ways and Means Committee.

Mr. GRAY. We see how important it is for those who are not experts to ask questions about these specific duties. Whatever advantage there may be in specifics over ad valorems, there is a paramount defect that it does conceal the amount of tax from the consumer. When you tell him the tax is 12 cents he does not know what proportion of the price of the article the tax is, and what proportion the real value is. If you tell him that it is 14 cents a pound, it may be 10 per cent protection or 100 per cent protection, as the case may be, in the particular industry, and so you deceive the people.

The Senator from Iowa says, sincerely of course, as he says everything sincerely, that this specific is equivalent to about from 38 to 40 per cent.

Mr. ALLISON. An average of 44 per cent.

Mr. GRAY. The letter from which I read states:

At the present time linen threads are subject to a 35 per cent ad valorem rate of duty, and under the proposed bill a very large portion of the imports would have to pay the equivalent of 66 per cent.

I suppose this gentleman's statement is worth about as much consideration as that of an interested manufacturer, and it seems to be borne out to a large extent by the statements of other people before the Ways and Means Committee of the House of Representatives.

Mr. SEWELL. Will the Senator from Delaware allow me right there?

Mr. GRAY. Certainly.

Mr. SEWELL. I ask the Senator who wrote that letter?

Mr. GRAY. I can not make the name out fully, but I will send the letter to the Senator and see if he can make out the name. The writer is vouched for as a very respectable person.

Mr. SEWELL. Is it Ewart?

Mr. GRAY. The Senator from New Jersey may be able to decipher the name.

Mr. SEWELL. If the writer is, as I suppose, Mr. Ewart, he is a foreign manufacturer, and manufactures on the other side entirely.

Mr. GRAY. What is the name?

Mr. SEWELL. Ewart.

Mr. FRYE. It is Ewart.

Mr. SEWELL. He is a manufacturer on the other side.

Mr. GRAY. What does the Senator mean by "the other side?"

Mr. SEWELL. In England.

Mr. GRAY. He dates this letter from New York.

Mr. SEWELL. He may be in New York.

Mr. GRAY. He is an importer of New York.

Mr. SEWELL. He never manufactured a thread in this country.

Mr. GRAY. Brand him as you please, here is his statement.

Mr. SEWELL. I do not think his advice is very good to the American Senate.

Mr. GRAY. Brand him as you please, here is his statement, over his own name, that the equivalent ad valorem duty on linen thread in this bill is 66 per cent. Now, the Senator from Iowa says himself he can not tell just what the ad valorem tariff is always going to be; and I think perhaps that Mr. Ewart's statement is as reliable as that of an interested manufacturer.

Mr. SEWELL. But the committee has been governed, as I understand, by the information furnished by the experts of the Treasury Department, of long standing, and in whom the committee have confidence, and they say it is only 43½ per cent.

Mr. GRAY. I did not understand that that was the statement of the experts of the Treasury Department. It is the statement of the manufacturers.

Mr. ALLISON. The average is 44 per cent, according to the expert statement.

Mr. GRAY. I shall not detain the Senate any longer, except to say that nothing more conclusively proves the vice of this whole protective system, and nothing could more clearly show what is the true Democratic policy, which, if it has not root, ought to have root. It is the principle of free raw material; for here we have this monstrous tax placed upon these important necessaries of life on the ground and justified by the fact that the raw material has been taxed. We have nearly the whole cotton schedule raised because of the tax of 20 per cent on raw cotton, and we have the whole of the linen schedule raised because of the tax on Minnesota flax.

Mr. SPOONER. Will the Senator state what is his definition of "free raw material"?

Mr. GRAY. I will discuss that question with the Senator from Wisconsin when I have more time, for I am as anxious to get through with this tariff bill as he is.

The raw material that comes into this country enables the workingmen of this country to employ their industry to the largest extent, and will not prevent, but will build up a thousand industries where this protective system will only serve to paralyze them.

Mr. President, I hope there will be some mercy in the Finance Committee of the Senate, and that they will allow something to be abated from this exaction.

Mr. JONES of Arkansas. Mr. President, there seems to be a very wide difference in structure of the paragraph which the Senate committee propose to strike out and the one which they propose to insert. The paragraph to be stricken out reads:

328. Single yarns made of flax tow, 8 lea and finer, 35 per cent ad valorem; single yarns composed of flax line, hemp, or ramie, valued at 13 cents or less per pound, 6 cents per pound; valued at more than 13 cents per pound, 45 per cent ad valorem.

The substitute reads:

328. Single yarns in the gray, made of flax, hemp, or ramie, not finer than 8 lea or number, 6 cents per pound; finer than 8 lea or number and not finer than 80 lea or number, 40 per cent ad valorem; finer than 80 lea or number, 15 per cent ad valorem.

Mr. President, I do not know, of course, what is the value of the unit. The Senator from Iowa tells us that this will give an average of about 44 per cent. If 6 cents per pound is 44 per cent of the value, it is about 14 cents in value for threads not finer than 8 lea. I do not know, of course, what the higher class of threads between 8 lea and 80 lea cost, but the Senator from Iowa proposes a rate of taxation on all threads between 8 and 80 lea at 40 per cent, and on all threads above 80 lea at 15 per cent.

Now, let me assume, for the sake of illustration, that the value of this thread is the same; that is, 14 cents. Then take thread 79 lea, if there is such a thing possible, and the tax would be 5½ cents per pound. If there was 81 lea, two numbers finer, the tax would be 2 cents per pound. I should be glad to have the Senator explain to the Senate on what theory it is that the committee propose to have a tax upon the coarser article three times as high in the aggregate as the tax on the finer article? What can be the excuse? What can be the reason for it? It seems to me there should certainly be some reason for so marked and radical a change in the progress of the rate of taxation on these different articles, 15 per cent above 80 and 40 per cent below.

Mr. ALLISON. I will state to the Senator that the only excuse for it is that above 80 lea these yarns are not spun at all in this country, and are not likely to be, and that it enables our weavers of linen fabrics to use these yarns.

Mr. JONES of Arkansas. Then, this means that 15 per cent is what the Senator understands to be a proper revenue tax on these articles not made in this country, and he proposes to put a tax of 40 per cent—25 per cent more—on the articles made in this country, 15 per cent being for revenue and 25 per cent for the purpose of advancing the price of the American manufactures to the American consumers, without any benefit to the Government. It seems to me that that is the unavoidable conclusion.

The VICE-PRESIDENT. The question is on the two amendments proposed by the Senator from Iowa [Mr. ALLISON] to paragraph 328.

The amendments were agreed to.

The VICE-PRESIDENT. The question now is upon the amendment of the committee inserting the new paragraph numbered 328.

The amendment was agreed to.

The reading of the bill was resumed. The next amendment of the Committee on Finance was to strike out paragraph 329, on page 105, beginning in line 14, as follows:

329. Flax gill netting, nets, webs, and seines, when the thread or twine of which they are composed is made of yarn not finer than 12 lea or number, 15 cents per pound and 15 per cent ad valorem; when the thread or twine of which they are composed is made of yarn finer than 12 lea or number and not finer than 25 lea or number, 24 cents per pound and 15 per cent ad valorem; when the thread or twine of which they are composed is made of yarn finer than 25 lea or number and not finer than 40 lea or number, 35 cents per pound and 15 per cent ad valorem; when the thread or twine of which they are composed is made of yarn finer than 40 lea or number and not finer than 50 lea or number, 40 cents per pound and 20 per cent ad valorem; when the thread or twine of which they are composed is made of yarn finer than 50 lea or number and not finer than 60 lea or number, 48 cents per pound and 20 per cent ad valorem; when the thread or twine of which they are composed is made of yarn finer than 60 lea or number, 50 per cent ad valorem.

And in lieu thereof to insert:

329. Flax gill netting, nets, webs, and seines shall pay the same duty per pound as is imposed in this schedule upon the thread, twine, or cord of which they are made, and in addition thereto 20 per cent ad valorem.

The amendment was agreed to.

The next amendment was, in paragraph 330, on page 106, line 14, after the word "mattings," to strike out "plain, fancy, or

figured;" and in line 18, before the word "cents," to strike out "eight" and insert "four;" so as to read:

Floor mattings, manufactured from straw, round or split, or other vegetable substances not otherwise provided for, including what are commonly known as Chinese, Japanese, and India straw mattings, valued at not exceeding 10 cents per square yard, 4 cents per square yard.

The amendment was agreed to.

Mr. ALLISON. In line 21, after the word "thereto," I move to strike out "if," in the committee amendment, and insert "on all the articles in this paragraph, when."

The VICE-PRESIDENT. The amendment will be stated as a part of the amendment of the committee.

The SECRETARY. In paragraph 330, line 20, after the word "yard," it is proposed to strike out "and 25 per cent ad valorem" and insert "and in addition thereto, on all articles in this paragraph, when manufactured with a warp composed of flax, cotton, or other vegetable fiber, 25 per cent ad valorem."

Mr. VEST. Mr. President, the effect of that last amendment is that when the warp is even of straw this additional duty of 25 per cent is added. Under the McKinley law and the Wilson law, which is the existing law, these articles, floor matting, etc., specified down to line 18 of this paragraph, were upon the free list. It is proposed now to put 4 cents a square yard duty upon them, and to put this additional duty of 25 per cent.

The effect of this increased tax is that on the first classification the rate is not less than 40 per cent on any of these articles, instead of being free, and on the next classification it is from 105 per cent down. My colleague on the committee [Mr. JONES of Arkansas] says they are as high as 200 per cent. I make the duty 105 per cent, but it is possible I overlooked some of the calculations.

Mr. President, what is the meaning of this enormous increase upon an article of absolute necessity, which is used by all the poorer classes of people throughout the country? Take the poor mechanic or laborer, who is not able to buy carpet, and he wants ordinary straw matting to put down upon his floor, especially in the summer time, and, instead of being allowed to buy it at the lowest rates, not competing with any particular article in this country, in the interest of the manufacturers of the lower grades of carpets this enormous duty is put on to force the people of the United States to buy these domestic carpets, no matter whether they want them or not. That is the whole of it.

Even when the Republican party was in the zenith of protection, in 1890, it put these articles upon the free list. I move to strike out this paragraph in order that these articles may go upon the free list again.

Mr. JONES of Arkansas. I wish to call attention, in addition to what the Senator from Missouri has said, to the fact that the tax on these articles in the tariff of 1874 was 30 per cent and in the tariff of 1883, 20 per cent. By the McKinley Act they were made free, and they are free now; and these exorbitant rates have never had their equal and never have been proposed before, reaching from 40 to 200 per cent.

Mr. PLATT of Connecticut. Was the last amendment agreed to?

The VICE-PRESIDENT. It is pending.

Mr. VEST. I ask for the yeas and nays on the amendment which I propose.

The VICE-PRESIDENT. If there is no objection on the part of the Senator from Missouri, the Chair will put the question first on agreeing to the amendment, so as to perfect the paragraph. Without objection, the amendment will be considered as agreed to. The Senator from Missouri moves to strike out the whole of paragraph 330.

Mr. PETTIGREW. Mr. President, I suppose this paragraph is intended to place the rate of duty upon Japanese floor matting, which has been imported very largely into this country during the last few years. It is a trade that has grown up recently. The material is not made in our country. We will not produce it if the paragraph is adopted. We will not produce it in this country if you double the rates of duty provided for in the paragraph. The purpose of levying this duty upon matting, which is a clean, cool, and beautiful covering for the floor, then, is to compel our people to buy a trust product made in this country. The Japanese matting comes into competition with cheap carpet. It comes into competition with oilcloth and floor material made by the oilcloth and linoleum trust. There are four firms engaged in producing linoleum in this country. They have formed a combination. The capital is $4,477,000. They employ about 2,000 people. They pay total wages of about $1,000,000. They use materials costing between three and four millions, and when it is converted it is worth between five and six million dollars, and they sell it for all they can get. It is a complete and perfect trust, ironclad in every particular.

They have formed a combination, as I said, and have an agent. They sell at a price fixed by the combination, and any factory can run or not, just as it chooses. If it does not run it is entitled to its percentage of the profits of the whole combination the same as if it did run. Yet this provision is placed here to prevent our people from buying what they want to buy—this beautiful, clean, and cool matting which comes from Japan—and to compel them to buy the material manufactured by the linoleum combination. As I say, there are four firms engaged in manufacturing linoleum, and the proprietors are classed among the millionaires of this country. It is not an infant industry. It has been running for seventy years. I think the motion of the Senator from Missouri, to strike out the entire paragraph and allow this article, which we do not produce and can not produce and will not produce, to come in absolutely free, so that the poor people of this country can have the benefit of it, should prevail.

Further than that, the rates placed upon this article are prohibitive, as I am informed by the Japanese minister. They are 100 per cent, for this matting is exceedingly cheap. I see no good reason why we should go out of our way and hunt up this excellent article of floor covering and exclude it from this country because it hinders in a measure the operation of a combination of men who have organized for the purpose of charging exorbitant prices.

Mr. WHITE. I have here a statement showing the trade effects of the attempted enforcement of this extravagant provision, which I will send to the desk, and, as it is not very long, will ask to have it read. It comes from a very reliable firm in Baltimore.

The VICE-PRESIDENT. The Secretary will read as requested.

The Secretary read as follows:

Shipments of straw mattings from Hongkong to Atlantic coast ports of the United States during the shipping season, from May 1 to January 1, 1897, were 417,775 rolls, or about 60,000 tons, on which the average freight rate paid was $4 United States gold per ton.

This quantity was transported as follows:

1 Hawaiian ship, about 2½ per cent, or 1,000 tons, earning about	$6,000
12 British steamers, about 17½ per cent, or 10,500 tons, earning about	42,000
23 American ships, about 80 per cent, or 48,000 tons, earning about	192,000

The above figures approximately represent also the business done in the same article from Kobe and Nagasaki, Japan, to Atlantic ports, the entire business from both countries amounting to about 800,000 rolls, in round numbers, equal to fully 95,000 tons of 40 cubic feet.

As is well known, the China and Japan trade is now about the only thing left for the old guard of American deep-water ships, who look to straw mattings for at least two-thirds of their homeward cargo, some ships loading nothing else.

A prohibitive tariff on straw mattings would sacrifice this fleet to the greed of American manufacturers of cheap carpets. And this, too, at a time when we are looking about for ways and means of upbuilding our commercial marine, instead of destroying it, as this contemplated legislation will surely do.

Mr. WHITE. I am informed that the effect of the legislation designed in this paragraph will be to destroy absolutely the shipping interest referred to in the communication.

I have another document, of which I will ask the Secretary to read the first page, and then the whole of it may be inserted in the RECORD. It is in the line of the argument of the Senator from South Dakota.

The Secretary read as requested. The entire document is as follows:

OFFICE OF FLOOD & CO., 445 BROOME STREET.
New York, April 1, 1897.

DEAR SIR: We beg to address you regarding the proposed duty on straw matting, as contained in the Dingley bill, now before you, i. e., 8 cents per square yard on all goods costing below 10 cents per yard, and 8 cents per yard and 25 per cent ad valorem on all goods costing 10 cents and over.

The importation the past year amounted to 850,000 rolls of 40 yards each, costing in Japan and China from 5 cents to 30 cents per yard gold, 80 per cent of the importation being in goods costing less than 10 cents per yard.

The levying of a duty as proposed would exclude the entire importation of low-grade goods under 10 cents per yard, and would not earn a revenue for the Government, whereas a duty of 2 to 3 cents per square yard would not decrease the importation, and at the same time would bring us a good revenue.

Mattings are not manufactured in this country, nor can they be, and do not come into competition with cheap ingrain carpets, as stated by the ingrain manufacturers. They are sold because they are a cheap floor covering, which can not be replaced by any carpet, as there is nothing that can be made in America that can reach the people who are unable to pay more than 10 to 12½ cents per yard. Such an increase of the price of these goods as proposed in the Dingley bill simply means that the poor people now using cheap goods would have to deny themselves the use of any floor covering whatever, and consequently would not increase the manufacture of ingrain carpets to any great extent.

The interest which claims protection is much smaller than one would suppose. We give here below the figures of the manufacture of ingrain carpets, taken from Eleventh Census of the United States—Manufacturing Industries (Department of Interior, Washington D. C.):

Total number of square yards of ingrain carpet produced in the United States	36,723,540
Total number of square yards of ingrain carpet produced in the State of Pennsylvania	30,186,219
Total number of looms employed in the manufacture of all carpets in the State of Pennsylvania	6,936
Number of looms (hand and power) employed on ingrain carpets exclusively	3,859
Number of looms employed on all other carpets than ingrains	3,077
Percentage of looms employed on ingrain carpets	55.6
Average number of people employed in the manufacture of all carpets in the State of Pennsylvania (male and female)	12,674
Average number of people employed on ingrain carpets only	7,046
Wages earned in the manufacture of all carpets in the State of Pennsylvania	$5,509,805
Wages earned in the manufacture of ingrain carpets only	$3,063,451

If this interest were increased, say, 30 per cent (which could not be), you can readily see what little additional employment it would give, and the very small amount of money put into circulation. It can not be compared with the amount which would be put into circulation by the amount of revenue which would be earned by the Government on a 2 to 3-cent per yard duty, the freight earned by our ships, and the money earned in the handling of the 140,000 tons of cargo by our stevedores, truckmen, and warehouses, as well as our local steamships and railroads, who would carry the freight, which would otherwise be lost, if excluded.

A prohibitory duty on matting (as now contained in the Dingley bill) could not increase the ingrain manufacturing business 30 per cent, or an equivalent in wages earned	$919,005
A moderate duty of 3 cents per square yard would earn the Government in revenue	1,020,000
Earnings in freight by American ships, 140,000 tons (approximate)	700,000
Labor in handling on arrival and warehousing (approximated)	280,000
	2,000,000

Other earnings of railroads and local steamships not estimated.

A moderate duty of 3 cents per square yard would serve to earn more money and do more good to both Government and labor than the increase of the manufacture of ingrain carpets 30 per cent, besides giving the poor people all over the United States, at a low price, a clean floor covering that can not be duplicated in price from a sanitary and attractive point of view.

Since the Eleventh Census was taken, there had been comparatively no change in the production of ingrain carpets.

We quote the production of the State of Pennsylvania, as that State produces nearly all the cheap ingrain carpets made.

Trusting that you will find the above of interest to you, and that you will give the same the proper consideration, we beg to remain,

Very respectfully, yours,

FLOOD & CO.

Hon. STEPHEN M. WHITE,
United States Senate, Washington, D. C.

Mr. WHITE. I have also received a letter from Boston, from the firm of Charles Brewer & Co., which I will read:

BOSTON, U. S. A., *April 2, 1897.*

DEAR SIR: We propose sending to-day to Senator HOAR a petition signed by shipowners and others in this vicinity in opposition to the proposed duty on straw mattings as imported from China and Japan.

Section J, paragraph 532, of the tariff bill, as reported by the Committee of Ways and Means, provides for 8 cents per square yard on matting costing 10 cents per yard or less, 8 cents and 25 per cent ad valorem on all costing over 10 cents.

It is represented to us on good authority that the invoice cost of these mattings ranges from 4 cents to 25 cents per square yard; that fully 80 per cent of all imported cost less than 10 cents, a large proportion costing as low as 5 cents per square yard.

The effect of these proposed duties would probably be to practically prohibit the importation of the lower grades, thereby depriving American shipping of a trade from which it has derived very considerable employment in the past five or six years—employment of a nature especially adapted for the old wooden sailing vessels which constitute so large a proportion of the American mercantile marine of the present day. These vessels can carry safely light cargoes of matting, when they would not be available for heavy cargoes, such as grain or sugar.

Shipments from China and Japan to Atlantic ports in the United States aggregated, in 1896, 800,000 rolls, equivalent to 140,000 tons of 40 cubic feet. There were 58 sailing vessels loaded at those ports for the United States, of which about 90 per cent were American ships. Matting constituted about 37 per cent of their cargoes. About 80 per cent of the shipments from China alone were made by American sailing vessels.

We do not wish to be understood as objecting to a duty for revenue, say 2 to 3 cents per square yard. Any rate in excess of this will, we fear, inflict serious injury on our shipping interests.

Furthermore, in proportion as return cargoes from the East are diminished in bulk, by whatever cause, will the cost of transporting our products and manufactures to those countries be enhanced.

We take the liberty of addressing you directly on this important matter, and asking your very careful consideration of the same.

We remain, respectfully, yours,

CHAS. BREWER & CO.

Hon. STEPHEN M. WHITE,
United States Senate, Washington, D. C.

There are a number of other communications of the same character, all going to make the same argument, and so far as I know nothing is adduced on the other side.

Mr. ALLISON. All these communications are addressed to the provision in the bill as it came from the House. We have reduced the rate on the lower grade from 8 cents to 4 cents.

Mr. TELLER. I should like to ask the Senator who has the bill in charge whether it is a fact that we do not manufacture any of this material in the United States?

Mr. WHITE. We can not.

Mr. ALLISON. I do not think we manufacture the low grades, the grades valued at 10 cents or less. They are manufactured from straw, and they come to this country, and the proposed rate is a revenue duty, as I understand it.

Mr. TELLER. That is what I want to learn, whether this is a protective duty or a revenue duty. I understand the Senator from Iowa says it is a revenue duty.

Mr. ALLISON. On the low grades. On the higher grades, where they use cotton or other vegetable fiber, of course it is both a revenue and protective duty.

Mr. TELLER. That absolves me from a duty to vote for the provision as presented by the committee, because I am voting for a protective duty.

Mr. JONES of Arkansas. I have a criticism cut from the Baltimore News, which is directed to the Senate provision, and not to the House provision. It is, I believe, very strongly put, and I will ask the indulgence of the Senate for a moment to read it. It says:

A BURDEN ON POOR PEOPLE.

One of the many bad and inequitable features of the Dingley bill in its present shape is that which imposes a high specific duty on mattings. As reported to the Senate, the duty on matting is fixed as follows:

"Floor mattings manufactured from straw, round or split, or other vegetable substances not otherwise provided for, including what are commonly known as Chinese, Japanese, and Indian straw mattings, valued at not exceeding 10 cents per square yard, 4 cents per square yard; valued at exceeding 10 cents per square yard, 8 cents per square yard; and in addition thereto, if manufactured with a warp composed of flax, cotton, or other vegetable fiber, 25 per cent ad valorem."

This duty is equivalent to a tax of about 100 per cent on the cheapest grades of matting, since these grades are now sold in China or Japan, packed ready for shipment, at about 4 cents per square yard. There is at present no duty upon them, and, what is more remarkable, they were also upon the free list in the McKinley Act. The cheap grades of matting are sold here at retail at prices ranging from 6¼ cents upward, and the result of the placing of this duty upon them would be to nearly double their cost to the consumer. In the expensive grades the percentage of increase would not be so great, though it would still be very heavy; and in the case of mattings which now sell for about 15 cents a yard, the retail price would still be nearly twice as high under the proposed duty as it is at present.

The cheap grades of matting are very extensively used now in this country, about 800,000 rolls, or over 30,000,000 square yards, of matting having been imported in 1896, of which far the greater part was of the cheap varieties. To make it more difficult for poor people to supply their homes with this inexpensive means of tidiness and comfort is a gross perversion of the taxing power. The proposed duty is expected to be almost prohibitory, so far as the cheaper grades are concerned, and is instigated by the carpet manufacturers, who can have no possible interest in the matter except that of cutting down the use of matting and compelling people to buy carpets instead. A moderate ad valorem duty is all that ought to be permitted in this matter of interest to every household in the land in moderate circumstances.

An ad valorem duty falls with the same proportional weight upon cheap goods and dear goods, while a specific duty carries an inordinate percentage on cheap goods in comparison with dear, and thus throws its burden, with oppressive discrimination, upon the poor. As to the plea that ad valorem duties lead to undervaluation, such a plea, whatever may be true of other cases, can not be set up in defense of a double-barreled specific duty like that proposed on mattings. The sudden jump in the duty from 4 cents to 8 cents at the 10-cent grade of mattings constitutes a temptation to represent goods as below that grade when they are above it, which is vastly stronger than any temptation to misrepresentation under an ad valorem duty. There is no excuse for the imposing of this burdensome tax upon an article whose use contributes to the comfort and happiness of millions of households, which was left untaxed by the McKinley Act, and which paid a tax of only 20 per cent ad valorem under the act of 1883.

I think that clipping clearly states the case, and, so far as I am concerned, I am willing to rest it on that statement.

Mr. MANTLE. Mr. President, there is a phase of this question relating to the imposition of duties upon straw mattings which has impressed me. I do not know, having come into the Chamber late, whether or not it has been referred to.

I believe it is generally conceded among the protectionists of this body that everything possible ought to be done in the framing of a tariff law that will in any way aid and encourage the agricultural interests of this country. At first glance there does not seem to be any very intimate connection between the duty upon straw mattings and the agricultural interest, but there is in this particular item a very close relation.

During the past few years there has been built up with Japan, and it is now being extended to China, a great flour shipping industry. The flour comes from the wheat products of the Pacific Coast States, notably those of California, Washington, Oregon, and Idaho. It is a trade which has been made possible only by reason of the fact that the ships engaged in it are enabled to bring back a return cargo at rates which justify them in carrying flour to Japan and China at a very low rate of freight. By reason of this condition of affairs the farmers of that section of the country have been immensely benefited, and notably during the last year, when some 28,000,000 bushels of wheat from those States was converted into flour and shipped to Japan and China.

Mr. GEAR. May I ask the Senator from Montana a question?

Mr. MANTLE. Certainly.

Mr. GEAR. Is it not a fact that the large demand for wheat products in Japan and perhaps in China has grown out of the enterprise of Mr. Hill, the president of the Great Northern system, and the additional fact that wheat products were cheaper to those people than rice?

Mr. MANTLE. It has unquestionably grown very largely out of the enterprise and energy and courage of Mr. Hill, the president of the Great Northern Railway, but all of his enterprise and industry and energy in the matter would have availed nothing but for the fact that these vessels were enabled to bring back cargoes from those countries to the United States.

Mr. GEAR. And the fact that our products were cheaper than the products of those countries.

Mr. MANTLE. By reason of the fact that they could secure these cargoes, largely consisting of the mattings now under discussion, thus enabling them to carry flour back upon the return voyage at a rate which made it possible to ship it to those countries. This trade would not be possible, they could not have secured this market, they could not have created this demand for

American flour, were it not for the fact that they secured these low rates of transportation.

Bearing directly upon this point, and showing its importance, I desire to have read a letter which was addressed to the senior Senator from North Dakota [Mr. HANSBROUGH] some weeks ago by Mr. Hill himself. It contains some very valuable information applying directly to this question. I should like to have it read, and then I wish to add a few words in connection with it.

The Secretary read as follows:

[From the Washington Evening Star.]

TARIFF SUGGESTIONS—TRADE WITH CHINA AND JAPAN SHOULD NOT BE CUT OFF BY DUTIES—TWENTY PER CENT OF THE NORTHWESTERN CROP GOES TO THOSE COUNTRIES AND PRICES HAVE GREATLY INCREASED.

James J. Hill, of St. Paul, president of the Great Northern road, and who also is interested largely in transportation to the Orient, has written a letter to one of the North Dakota Senators, in which he points out the possibilities of trade in China and Japan, and suggests that tariff duties be so adjusted as not to prevent or cut off trade with the countries across the Pacific.

He says: "The Asiatic trade is of the greatest importance to this country, and particularly such portions of it as are interested in raising wheat," and continues: "A year ago last fall wheat sold for from 18 to 22 cents per bushel in the Palouse country, south of Spokane Falls, and this year it has sold for from 65 to 70 cents. About three years ago I sent an agent to China and Japan to investigate thoroughly what steps could be taken to introduce the general use of wheat flour in those countries as against their own rice, and found that it was simply a matter of price. I then took up the consideration of building large steamers for that trade, designed to carry cargoes of flour or grain at low rates.

HIGH WAGES PREVENTED.

"I found that we could build the ships, but that, owing to the sailors' union fixing the wages of sailors at $30 a month and engineers and other ship employees at about twice the wages paid by European steamers, it would be impossible for us to compete with the English, German, Italian, and Scandinavian ships already on the Pacific Ocean. After the war with China the Japanese appropriated a large amount of their war indemnity for a subsidy to their merchant marine, and we opened negotiations with the General Steamship Company of Japan, which is owned by the leading men of the Empire. We found that their subsidy was about equal to the cost of their coal and the wages of their sailors. They pay their sailors $5 a month, Mexican, or $2.50 in gold, enabling them to hire twelve good sailors for the wages of one American sailor. After some protracted and difficult negotiations we concluded a contract with them for a line of steamers between Chinese and Japanese ports and Seattle, on condition that they would carry flour from Puget Sound to the Asiatic ports at $3 a ton, as against from $7 to $8 a ton formerly charged from west coast ports in the United States.

A NEW MARKET.

"This low rate fixed the rate for all other lines between the Pacific coast and Asia, and has resulted in carrying out about 28,000,000 bushels of wheat or its equivalent in flour from the last crop. There is left, I understand, about 5,000,000 bushels to be moved between now and the next harvest. Thus you will see we have been able to find new mouths which have never before used wheaten bread to take the entire California, Oregon, and Washington wheat crop out of the European markets. This will reduce the amount going to Europe about 20 per cent, and in bushels about 30,000,000—three times the quantity shipped to Europe from the Argentine during the past crop year. The prices of wheat this year, as compared with last, are about 20 to 25 cents higher, and I think it may be said that from 15 to 18 cents of this rise is clearly due to the withdrawal of all the Pacific wheat from the European markets. I see in this morning's market reports a telegram stating that European ships are loading with barley, rye, and merchandise from San Francisco to Europe, after waiting four months for cargoes of wheat, and that no more wheat will go to Europe from the Pacific coast.

RETURN CARGOES SECURED.

"The only way we could bring about this great reduction in the cost of transportation of flour to Asia was by diverting the tea and matting business, which has heretofore gone mainly on English ships from Asia direct to New York, and bringing these commodities to the Pacific coast by a low rate of transportation inland by rail to distribute the commodities to points between Minnesota and New York. I have given you the details so that you will understand the situation and be able to see that, unless these ships can bring their main cargoes of merchandise to the Pacific ports at rates that will compensate them for the traffic, the business must go as heretofore to New York, and the rates on flour to Asiatic ports will be again at the old figure or an advance of about 50 cents a barrel, which would, in my judgment, destroy the business that has just begun to be built up with that country.

MORE MOUTHS TO FEED.

"The province of Amoy alone, which is near the coast, contains over 80,000,000 people, and at 20 pounds of flour per capita per annum would consume the product of 40,000,000 bushels of wheat. The large districts of Tien-Tsin and Shanghai, both easily accessible from the sea, would consume about as much more, as soon as the trade can be fully opened. It is not outside the range of possibility that we could ship wheat from Devils Lake to the Pacific coast for this trade. We certainly could at 55 cents a bushel cost for the wheat at Devils Lake or points west as long as the demand for flour continues to grow as it has for the past six months."

Mr. MANTLE. The letter presents the case very clearly and very forcibly. It shows what has already been done, and it goes on to state that if nothing is done by legislation to interfere with this carrying trade, an additional market can be created in one district, the district of Amoy alone, for 40,000,000 bushels additional of American wheat; but he states further that he can go as far east as North Dakota for the surplus wheat of that State and convert it into flour and transport it to those countries at a price which will afford a profit to the farmers of that State.

I should not for one moment think of antagonizing this duty did I believe that any American industry would be injured by so doing, or that any considerable number of American laborers would be deprived of employment. The fact is that this matting is not manufactured in the United States at all, and can not be. It is used by the poor people of the country mainly, and with them it will be a question of having this or having no carpeting at all. On the other hand, the imposition of these duties is very likely to work a great injury to a great many of the farmers of the Pacific Coast, and I can not help but feel that under the circumstances it is unwise and unjust to levy this duty. The article was admitted free under the McKinley law, and there is certainly no reason existing at this moment why it should not be put upon the free list in the pending bill.

I have a letter which I will not ask to have read, as it bears largely upon the same phase of the question, but it contains a good deal of valuable data with respect to shipments, and especially as to flour, the number of ships engaged in this trade, etc., which I think ought to be printed.

The letter referred to is as follows:

FLOOD & Co., 445 BROOME STREET,
New York, April 7, 1897.

DEAR SIR: We beg to thank you for your favor of even date, anent the importation of straw matting and the exportation of flour from and to the Orient. At the moment we are unable to give you the amount of flour exported from America to China and Japan, but will look into the matter, and hope to report to you in a few days.

What we do know is that steamers sailing from San Francisco, Tacoma, Seattle, Portland, and Vancouver, British Columbia, which amount to about 100 steamships per year, distributed from the above ports as follows (approximate): San Francisco, 37; Tacoma, 24; Portland, 12; Seattle, 12; Vancouver, 15, are dependent upon flour for the greater part of their outward cargo. The great trouble that the steamship companies have had to contend with was to secure an outward cargo, and the only way they were successful was by offering a very low rate to the shippers of flour.

There has never been any trouble to get homeward cargoes from the East, and this trade would be much more developed if it were not for the trouble that they have had to secure freight outward to China and Japan.

Our flour to-day is exported from the mills around San Francisco, Portland, Seattle, Tacoma, Spokane, and other Western cities, and is getting to be a great factor in the Eastern trade, and has been during the past years developed to an enormous business.

We inclose you herewith a Hongkong market letter, dated December 10, which will give you some idea of how our flour is quoted in Hongkong and how many of our mills are represented. The price quoted in the circular is in Mexican dollars, which are equal to about 50 per cent of our money. You can compare the price at which our flour is sold in China as against what it is sold for in America, and you will readily see that the margin for freight is very little, and the only reason our goods are sold in China and Japan at such low figures is due to the low freight across the Pacific. There is nothing imported into China and Japan that can compete with it.

You will bear in mind that the ships quoted in this report, the *Empress of Japan* and *Victoria*, had already discharged part of their cargo in Yokohama, Kobe, and Shanghai before arriving at Hongkong, and you can not reckon on the amount of sacks carried into Hongkong as a full cargo. Our mills are all represented, both in Japan and China, and our flour is taking a great hold in the far East.

The writer when in Hongkong last October, when in conversation with the gentleman who represents some of the largest mills in America, was informed that he had just closed a very large contract for flour to be shipped to Vladivostock, Siberia, being transshipped from Nagasaki, Japan. The Russians are now making Vladivostock a rendezvous for their men-of-war and troops, and have, we are told, at least 100,000 men there now. This trade is being reached to-day by America and excluding from Russian territory its own flour, which can not be shipped to eastern Siberia at a rate that can compete with ours.

Both the Chinese and Japanese, especially since the war, have taken greatly to the use of flour, and from all reports from people who are authorities on the matter, they claim that the increase of our flour into both Japan and China the following year will far exceed anything previous.

The success of American flour in China and Japan is due solely to the low rate of freight at which our steamships are carrying the cargo. We would say that 50 per cent of the outward cargo to China and Japan consists of flour.

Within the past year or two our American cotton has been taking a great hold in Japan, and a great deal has been shipped from the Southern States, and would make up the greater proportion of the remaining 20 per cent of cargo allotted to other merchandise than flour.

The cotton shipped to Japan is taken at a low rate of freight, as well as flour; otherwise this article could not be imported into Japan to compete with the China, Bombay, and Egyptian products. This cotton industry promises to be one of the most important exports to China and Japan from America in the coming years if properly taken care of; but to insure this business they must have a low rate of freight to compete with the many steamers and direct communications from Japan to the other oriental cotton-producing countries.

The profit to our transpacific steamship lines is made by their homeward cargoes, which are paying good rates of freight. The cargo capacity of the ships is limited, on account of the steamship companies not wishing to put any more steamers on than they are capable of filling on the outward voyage.

We hope to be able to give you the figures showing the amount of flour exported to the far East in a few days. We will forward to you just as soon as we have secured the same.

Thanking you for your kind favor, we beg to remain,
Very respectfully, yours,

FLOOD & CO.

Hon. LEE MANTLE,
Washington, D. C.

I quote you from the market letter referred to above the following in regard to flour:

Flour: There is a steady demand for both extras and superfines, and prices are steadily advancing. Arrivals have been: *Empress of Japan*, 11,000 quarter sacks from Vancouver, and *Victoria*, 23,600 quarter sacks from Takoma.

Sperry's XXX	$2.43	Blue Ribbon	$2.00
Crown Mills	2.35	Gold Drop	2.10
Buckeye	2.30	West End	1.80
Pioneer	2.26	Crescent	1.85
Green Girl Portland	2.10	Yuba	1.82
Dayton	2.23	Orient	1.74
C. & C. Mills	2.18	Golden State	1.80
Pride of the West	1.85	Franklin	1.74
Gold and Silver	2.18		

Mr. MANTLE. I do not know what motion is under discussion, as I was not present when it was made.

The VICE-PRESIDENT. The motion pending is that of the Senator from Missouri to strike out paragraph 330.

Mr. MANTLE. And put the articles upon the free list?

The VICE-PRESIDENT. And put the articles upon the free list.

Mr. MANTLE. I believe that every consideration of equity and justice to the wheat producers of the country, the great agricultural classes, requires that the motion in this particular case ought to prevail. If the duty is levied purely for revenue, then I suggest that there are many other articles upon which revenue may be raised. The duty of 4 cents of itself amounts to nearly 100 per cent upon 60 or 80 per cent of the importation of these mattings, as the great bulk of them are of the cheaper class, costing from 3 to 6 or 7 cents per yard.

I sincerely hope that in this view of the matter, in view of the fact that it can do no good to any American industry, that it must enhance the cost of this necessary article to the poor people of our country, that it must result in injuring the wheat growers of the Pacific States, and that it may result disastrously to the enormous flour trade now being built up between this country and Japan and China—for these reasons the motion to restore these mattings to the free list will prevail.

Mr. JONES of Arkansas. I regret the absence of the Senator from Minnesota [Mr. DAVIS] from the Senate Chamber. Yesterday he said:

Mr. President, in regard to the statement that Minnesota can not produce and does not produce flax fiber fit for weaving and making linen, I hold in my hand a specimen of Minnesota flax [exhibiting], prepared entirely at Northfield, in that State. Three thousand pounds of this were sent, by way of experiment and demonstration, to Belfast, Ireland, early this year in this shape. I have seen a letter from a Belfast gentleman, who undertook to weave it and did weave it, stating that for length of fiber and tensile strength it exceeded their own. There is some difference owing to their superior inherited skill in the manipulation, and perhaps in the color, something easily to be overcome.

Here is a towel made at Belfast from that same flax [exhibiting], apparently of good substance, and the inexpert eye would not probably be able to discern the source from which the flax came out of which this towel was made.

I hold in my hand the samples woven in Belfast from this same consignment of flax which I have mentioned, of various degrees of fineness of linen down to the coarse articles, such as are sometimes made into garments. The samples are many, and they can be seen by Senators, from the exceedingly coarse article up through all the degrees to the finer article of as white linen as one ever saw.

I was anxious to have the Senator from Minnesota present, as I wanted to inquire of him a little more particularly if he knew personally anything of the facts regarding the articles that were exhibited here yesterday. Two letters have come into my possession this morning that throw light on this question, and while I have no doubt of the perfect good faith of the Senator from Minnesota in using the articles he used here yesterday, these letters create a question in my mind as to whether they are in any sense Minnesota flax.

As the articles were exhibited in the Senate to demonstrate the fact that Minnesota flax could be woven into linen which is desirable, I think it is due to a correct understanding of this question that the letters I now have shall be read to the Senate. The Senator from Minnesota had an engagement which keeps him away from the Chamber, and I regret that he can not be here. I sent him word that I might bring some matter up in the Senate in which he would be interested. The letter that I will read first is signed by F. Herdmen, managing director. It seems to have been written from Belfast. I have the original letters in my hand, but as the handwriting is somewhat difficult to read, I will read a typewritten copy.

[Memorandum from Brookfield Linen Company, Limited, to Mr. Prame, New York.]

BELFAST, *April 9, 1897.*

DEAR SIR: In reply to yours of 30th ultimo, about 5 tons of flax shipped by the Minnesota Flax Company arrived here in the steamship *Lord Charlemont* a few weeks ago, consigned to Messrs. John Preston & Co., J. Johnson & Co., and William Barbour & Sons, Limited. The bulk is still in store, and is of poor quality, equal to a medium mark of Russian flax, say H. D. Pernau, value somewhere £28 to £30 sterling per ton in Belfast. There has not been time to spin the flax, much less weave it, but when the Minnesota Flax Company first wrote Prestons they asked their firm to send them samples of the class of cloth the flax would likely make. Mr. Cooke, of Prestons, went to the County Down Linen Company and procured from them some sample books of linens, which he forwarded to the flax company and which we suppose are now being shown as made from American flax, which is a palpable falsehood, as inclosed letter will prove.

Yours, truly,

F. HERDMEN,

Managing Director (for the Company).

The letter inclosed is as follows:

JOHN PRESTON & CO., BELFAST, *April 9, 1897.*

DEAR SIR: Referring to our conversation of this morning, I find on going back upon it that the patterns in question were sent to the Minnesota Flax Company in February, whilst their flax did not arrive here until March 23. The patterns consisted of old pattern books of canvas and drills, obtained from one of the warehouses here, and did not pretend to be made from their flax. Actually not a pound of the Minnesota flax has yet been spun here; it is now only in process of dressing.

Yours, very truly,

A. COOKE.

FREDK. HERDMAN, Esq., *Brookfield Linen Co.*

Both of these letters are dated Belfast, April 9, 1897. I simply present the letters so that if there has been any effort made by people who are not dealing frankly with the Senate to exhibit samples of goods alleged to have been woven from a product in Minnesota, and it was not so, the fraud can be exposed. If it is true, and these charges are not correct, they can defend themselves and make it clear.

Mr. PETTIGREW. Mr. President, it appears, according to the letters presented here by the Senator from Arkansas, that the Belfast company took the linen fiber forwarded from Minnesota and returned such linen as they believed they could spin from that fiber. Of course the Senator from Minnesota did not know of that fact, and yet the misrepresentation is absolutely immaterial. Those men know as well when they examine the fiber what it will make as they know after they have made it. There is no question about it at all. They are absolute experts.

The letter says that the fiber sent to Belfast was of inferior quality and is not yet spun. I read a letter yesterday from Belfast, stating that it was almost equal to the Irish product, that it was of almost equal fineness and of greater length, and they accounted for it by the fact of the strong virgin soil of Minnesota.

I exhibited the flax that was produced in Minnesota, and it was produced in Minnesota, and is of excellent quality. I do not care what experts examined it, it is almost equal to the best flax produced in the world. It is almost equal to the Courtray flax, which is noted throughout the world as being the finest in the world and producing the finest linen. There is no question but that we can produce in that country a flax fiber that will make the best linen used by the people of the United States. I do not care what letters may be read with respect to the matter. Let any expert go and examine the 253 tons produced in Minnesota last year, I do not care where he comes from, he will say at once that it will make the very items of linen goods exhibited here yesterday.

I do not know how we got back to this linen schedule again. The rates are too low, compared with the linen goods. The rates on the raw material are 11½ per cent, and on linen goods in this flax schedule the rates are from 52 to 109 per cent.

Of course I admit that it is the same sort of treatment the people of the West have received in almost every tariff bill that has been constructed. They first put a very slight duty on the raw material, and then double it and triple it and make it four times as much on the manufactured product that they sell us, and so take away what little protection we had in whatever purchases we make of the manufactured article. Yet in spite of that fact we return again to a discussion of this little item of a duty upon the raw material.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the Senator from Missouri [Mr. VEST] to strike out paragraph 330 as amended.

Mr. VEST. On that I ask for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. CLAY (when his name was called). I am paired with the junior Senator from Massachusetts [Mr. LODGE].

Mr. GRAY (when his name was called). I am paired with the Senator from Illinois [Mr. CULLOM]. I do not see him in his seat, and therefore withhold my vote.

Mr. HARRIS of Kansas (when his name was called). I am paired with the junior Senator from Wyoming [Mr. CLARK]. If he were present, I should vote "yea."

Mr. MORRILL (when his name was called). I am paired with the Senator from Tennessee [Mr. HARRIS], and therefore withhold my vote.

Mr. PENROSE (when his name was called). I am paired with the junior Senator from Delaware [Mr. KENNEY]. If he were present, I should vote "nay."

Mr. RAWLINS (when his name was called). I am paired with the junior Senator from Ohio [Mr. HANNA].

Mr. SEWELL (when his name was called). I am paired with the Senator from Wisconsin [Mr. MITCHELL]. If he were present, I should vote "nay."

Mr. SPOONER (when his name was called). I am paired generally with the Senator from Mississippi [Mr. WALTHALL], who is necessarily absent from the Chamber to-day. I announce the pair to apply to all votes on the bill during the day.

Mr. WELLINGTON (when his name was called). I announce my pair with the junior Senator from North Carolina [Mr. BUTLER]. If he were present, I should vote "nay."

The roll call was concluded.

Mr. GRAY. I will transfer my pair with the senior Senator from Illinois [Mr. CULLOM] to the junior Senator from Virginia [Mr. MARTIN], and vote. I vote "yea."

Mr. PENROSE. I will transfer my pair with the junior Senator from Georgia [Mr. CLAY] to the junior Senator from Massachusetts [Mr. LODGE], so that he will stand paired with the junior Senator from Delaware [Mr. KENNEY], and the junior Senator from Georgia [Mr. CLAY] and myself can vote. I vote "nay."

Mr. CLAY. On the statement of the Senator from Pennsylvania [Mr. PENROSE] I vote "yea."

Mr. HANSBROUGH. I was requested to announce a pair between the Senator from Missouri [Mr. COCKRELL] and the Senator from Maine [Mr. HALE].

Mr. MANTLE. I should like to inquire if the Senator from Utah [Mr. CANNON] is paired in any way?

Mr. PLATT of Connecticut. I have understood that the Senator from Rhode Island [Mr. ALDRICH] and the Senator from Utah [Mr. CANNON] are paired.

Mr. PASCO. I am paired with the Senator from Washington [Mr. WILSON]. If he were present, I should vote "yea."

The result was announced—yeas 25, nays 22; as follows:

YEAS—25.

Bacon,	Gray,	Murphy,	Turner,
Bate,	Hansbrough,	Pettigrew,	Turpie,
Berry,	Heitfeld,	Pettus,	Vest,
Carter,	Jones, Ark.	Roach,	White.
Chilton,	McLaurin,	Smith,	
Clay,	Mallory,	Teller,	
Daniel,	Mantle,	Tillman,	

NAYS—22.

Allison,	Hawley,	Perkins,	Stewart,
Burrows,	Hoar,	Platt, Conn.	Thurston,
Deboe,	McBride,	Platt, N. Y.	Warren,
Fairbanks,	Mason,	Pritchard,	Wetmore.
Foraker,	Nelson,	Proctor,	
Gear,	Penrose,	Shoup,	

NOT VOTING—42.

Aldrich,	Elkins,	Kenney,	Pasco,
Allen,	Faulkner,	Kyle,	Quay,
Baker,	Frye,	Lindsay,	Rawlins,
Butler,	Gallinger,	Lodge,	Sewell,
Caffery,	George,	McEnery,	Spooner,
Cannon,	Gorman,	McMillan,	Walthall,
Chandler,	Hale,	Martin,	Wellington,
Clark,	Hanna,	Mills,	Wilson,
Cockrell,	Harris, Kans.	Mitchell,	Wolcott.
Cullom,	Harris, Tenn.	Morgan,	
Davis,	Jones, Nev.	Morrill,	

So Mr. VEST's motion to strike out paragraph 330 was agreed to.

The next amendment of the Committee on Finance was, in paragraph 331, page 106, line 25, after the word "fiber," to insert "(except cotton);" in line 1, page 107, after the word "exceeding," to strike out "thirty" and insert "fifteen;" in the same line, after the word "yard," to strike out "six" and insert "five;" in line 3, after the word "above," to strike out "thirty" and insert "fifteen;" in the same line, after the word "yard," to strike out "twelve" and insert "ten;" and in line 4, after the word "and," to strike out "forty" and insert "thirty-five;" so as to make the paragraph read:

331. Carpets, carpeting, mats, and rugs made of flax, hemp, jute, or other vegetable fiber (except cotton), valued at not exceeding 15 cents per square yard, 5 cents per square yard and 35 per cent ad valorem; valued above 15 cents per square yard, 10 cents per square yard and 35 per cent ad valorem.

The amendment was agreed to.

Mr. JONES of Arkansas. I move to strike out all after the word "fiber," in the second line of the paragraph, and insert "20 per cent ad valorem."

The SECRETARY. In line 25, after the word "fiber," strike out the remainder of the paragraph and insert "20 per cent ad valorem;" so as to read:

Carpets, carpeting, mats, and rugs made of flax, hemp, jute, or other vegetable fiber, 20 per cent ad valorem.

The amendment was rejected.

The next paragraph was read, as follows:

332. Hydraulic hose, made in whole or in part of flax, hemp, ramie, or jute, 20 cents per pound.

Mr. PETTIGREW. I see that a duty of 20 cents per pound is placed on hydraulic hose by this paragraph. Are there other paragraphs in the bill which place an additional duty upon that item?

Mr. ALLISON. I know of none. If there are I shall be glad to have them pointed out, and I will see that they are struck from the bill.

Mr. PETTIGREW. I have an impression that there is a duty of 35 per cent ad valorem. I will look it up, however. I can not turn to the exact paragraph at the present time.

Mr. ALLISON. It is intended that there shall be a duty of 20 cents a pound on hydraulic hose made of this material. If there is any other duty applying to hydraulic hose other than india rubber, I should be glad to have it stricken out of the bill.

The Secretary read the next paragraph, as follows:

333. Tapes composed wholly or in part of flax, woven with or without metal threads, on reels, spools, or otherwise, and designed expressly for use in the manufacture of measuring tapes, 40 per cent ad valorem.

Mr. JONES of Arkansas. I move to strike out "forty" and insert "twenty-five" before the words "per centum."

The amendment was rejected.

The next amendment of the Committee on Finance was, in paragraph 334, page 107, line 15, before the word "cents," to strike out "ten" and insert "eight;" and in line 16, after the word "carpets," to strike out "twenty" and insert "fifteen;" so as to make the paragraph read:

334. Oilcloth for floors, stamped, painted, or printed, including linoleum or corticene, figured or plain, and all other oilcloth (except silk oilcloth) not specially provided for herein, 8 cents per square yard and 15 per cent ad valorem; inlaid linoleum or corticene, and cork carpets, 15 cents per square yard and 20 per cent ad valorem; waterproof cloth, composed of cotton or other vegetable fiber, whether composed in part of india rubber or otherwise, 10 cents per square yard and 20 per cent ad valorem.

Mr. JONES of Arkansas. What is the first proposition of the committee?

Mr. ALLISON. To strike out "ten" and insert "eight." It is a reduction of 2 cents. The Senator, I suppose, will not object to it.

The VICE-PRESIDENT. The question is on agreeing to the first amendment of the committee in paragraph 334.

The amendment was agreed to.

Mr. ALLISON. I ask the Senate to disagree to the amendment in line 16, striking out, after the word "carpets," "twenty" and inserting "fifteen."

Mr. VEST. That will go back to 20 cents per square yard.

Mr. ALLISON. It goes back to 20 cents.

The amendment was rejected.

Mr. ALLISON. I offer a further amendment to the paragraph. On page 107, paragraph 334, line 14, after the words "(except silk oilcloth)," I move to insert the words "under 12 feet in width;" and in line 16 of the same paragraph, after the words "ad valorem," to insert the words "oilcloth for floors and linoleum or corticene, 12 feet and over in width."

The amendment was agreed to.

Mr. JONES of Arkansas. I move to strike out paragraph 334 and insert what I send to the desk, which is the paragraph on this subject in the Wilson Act.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. Strike out all of paragraph 334 and insert:

Oilcloth for floors, stamped, painted, or printed, including linoleum, corticene, cork carpets, figured or plain, and all other oilcloth (except silk oilcloth), and waterproof cloth, not specially provided for in this act, valued at 25 cents or less per square yard, 25 per cent ad valorem; valued above 25 cents per square yard, 40 per cent ad valorem.

Mr. JONES of Arkansas. The duties on the cheaper grades of oilcloth under the act of 1874 were 35 per cent; under the act of 1883, 40 per cent; under the McKinley Act, 40 per cent; under the Wilson Act, 25 per cent, and under the pending bill as it passed the House, 73.8 per cent. As reported by the Senate committee, the rate was 62.1 per cent, and on the motion of the Senator from Iowa the Senate has receded from that amendment and, I understand, proposes to stand by the rate recommended by the House.

I will not detain the Senate by entering into any discussion of this matter. It has been very fully discussed and is thoroughly understood. I, however, feel very much like reading a clipping from the Journal of Commerce of the date of April 8, 1897.

[From the Journal of Commerce and Commercial Bulletin, April 8, 1897.]

TAXATION OF RAW MATERIALS.

The proposed increase of duty on floor oilcloths recalls some important testimony on this subject that was taken by the tariff commission fifteen years ago. Mr. William M. Brasher, of Brooklyn, appeared for the manufacturers and submitted a statement of the increased taxation of materials between 1857 and 1882. In 1857 the duties on all the materials were 15 per cent; in 1882 they were at the following ad valorem rates or their equivalents: Canvas 40, linseed oil 79, dry white lead 77, red lead and litharge 82, whiting 236, and ocher 66 per cent. In consequence of the high duties on their materials the manufacturers asked that the duties on their produce be increased from 35 and 45 to 50 and 60 per cent, and that the duty should be taken off canvas. "Our protection," said Mr. Brasher, "on the average is 30 per cent; sometimes 35 to 40, depending on the value of the floor oilcloth. But give us free trade in competition with all foreigners. * * * If we can have the same plane to work on that the English manufacturer has, this country can export millions of dollars' worth of these goods.

"We are only shut out of the Chinese market by about 10 cents a yard and out of the Australian market by about 12 cents a yard. Sweden would consume, and does take from Great Britain at the present time, over a million dollars' worth of these goods annually, and they ask us nearly every day to send them our goods, as our styles are superior and they will be used there. The Government receives to-day a duty of 40 per cent on $50,000 worth of goods, but at the same time shuts us out of an export trade which would amount to $2,000,000."

"If you will give us free trade," continued Mr. Brasher, "we can send our goods to any part of the world and do an enormous business." He was asked whether he would prefer free raw materials or a higher duty on the product, and he replied: "We are willing to accept either. With free trade I think we could export, and our business would increase so that there would be $5,000,000 worth of these goods shipped out of this country annually." It was estimated that this would employ 2,500 persons. He was further pressed as to the value of free raw materials to the trade he represented: "Without any duty on the raw material or any protective duty on your goods, could you compete in this market (the United States) with the European goods?" and he replied, "Yes, sir; we could compete in the markets of the world."

John P. Lapsley, manufacturer of floor cloths, appeared before the commission to protest against the taxation of the raw materials, which enhanced the cost of the domestic as well as the imported article. "If we could get free raw materials, or anything approaching it," he said, "we could compete with other nations in supplying the markets of the world." Floor oilcloths were a great item of export to South America, and England controlled the trade. Taste for American styles had given the American makers some foreign trade, "but we are shut out from those markets now by the higher price we are compelled to charge, and one reason why we are compelled to ask a higher price has already been stated—that is, we are handicapped by these very high duties on the raw material."

When the McKinley bill was in process of preparation, Mr. George W. Blabon, a large manufacturer, said: "If I get my raw material free, and if you let me import my labor, I do not ask any favor," but immediately added, "I can get along even if our labor is not quite so low as theirs (London and Kirkcaldy), for we have better machinery." After speaking further of the

superiority of American machinery, he said: "I think we can do more work per hand than they can. We generally work our men on piecework."

The present tariff reduced the duties from those of the McKinley law, and the Dingley bill proposes to raise them again. There has been some increase of importation, but it is a small percentage of the consumption according to statements made before Mr. Dingley's committee in opposition to the increase. In this protest it was urged that burlaps and cork are duty free; the ocher, rosins, gums, petroleum, and pine-tree products used in this manufacture are as cheap here or cheaper than abroad; that the best ocher for linoleum making is mined in Georgia, and much of it is exported to the foreign manufacturers of floor cloths; that linseed oil, on which the duty is 20 cents a gallon, has recently been as low as 25 cents in Chicago, lower than the foreign price; that glue and starch are exported, and are about as low here as abroad; that the colors are used only on the surface in relatively small quantities, and there is no great difference between the domestic and the foreign price; that the manufacture is mostly by machinery, and the labor cost per yard is extremely small, and that there are in the United States only 4 makers of linoleums, 11 of floor oilcloths, and 10 of table oilcloths; that they are mostly family concerns, have made immense profits, and they maintain a combination that gives them the control of the market.

The statements of the manufacturers themselves show that whatever difference there is between the wages here and in England is offset by the freer use of machinery here, so that whatever disadvantage the American manufacturer is under is simply the duties collected on the materials he uses. At a time when the materials were a good deal more expensive here than abroad these duties on materials alone kept us out of a foreign trade estimated at from two to five million dollars a year. If the statements now made in opposition to increased protection for the manufacturers are accurate, the domestic prices of materials have, in the past few years, fallen to near or quite the level of like articles abroad, so that the existing duties on the product need no increase, and, on the contrary, foreign markets ought to be within reach of the American manufacturers. But it is quite conceivable that the manufacturers would rather have complete possession of the domestic market, with the opportunity higher duties would afford them of advancing their prices, than to get into the markets of South America, Australia, China, and Sweden, upon which they were casting longing eyes in 1892. If the American manufacturers had a less absolute possession of the home market than they have, they would be compelled to seek foreign outlets, and they have themselves told us what drove them out of foreign markets years ago, and long kept them out. The Dingley bill proposes to raise the duties on the materials of this industry.

Mr. President, it seems to me that that is a clear statement of all that is involved in this matter. The rates to which these articles are proposed to be raised are simply enormous. I have a number of specimens of floor oilcloth furnished to me by a reputable house in Baltimore, giving the duty and showing the equivalent ad valorem duty. The proposed rates under the bill are from 65 to 95 per cent on these floor oilcloths, and on linoleum it is about 62.1 per cent. I have a number of pieces, showing the goods, the price, the cost, and their general appearance. I also have samples of table oilcloth, waterproof cloth, on which the proposed duty equals 145 per cent ad valorem.

Mr. President, when it is recollected that the rates of duty on these articles were in years past under the tariff of 1874 but 35 per cent, under the tariff of 1883, 40 per cent under the McKinley Act itself only 40 per cent, it seems to me it is unreasonable and indefensible to talk about now putting a tariff of 145 per cent on them.

Mr. VEST. Mr. President, we are confronted with another conspicuous illustration of the effect of enormous and excessive prohibitory tariff duties. About one year ago to-day an announcement was made in the New York papers, in the Carpet and Upholstery Trade Review, published at 335 Broadway, New York, dated June 15, 1896, that a new oilcloth trust had been formed, the terms of which I will proceed to read:

THE NEW LIGHT OILCLOTH AGREEMENT.

As noted in our issue of the 1st instant, a new agreement has been made between the table oilcloth manufacturers, and those concerned in the arrangement seem certain that it will be more successful than any previous plans that have been made in this direction. One strong reason for this belief is that the new arrangement is supported by all but two of the manufacturing concerns in the trade.

An important feature of this new plan, and one never adopted in previous schemes for the same end, is the formation of a clearing house, through which all the business of the combination, except manufacturing and its needful provisions and actual selling, is to be transacted.

The various firms have a percentage standing in the clearing house, and the proceeds of their aggregate business are to be divided among them pro rata.

There are no restrictions upon manufacturers as to the extent of their output nor upon individual enterprise, neither would a manufacturer, should he deem it prudent to shut down his works, forfeit his right to his percentage of any profits the others might have made. The clearing house is in Boston. Its president is George Hughes, of Atha & Hughes, and its vice-president A. M. Cole, of the Western Linoleum Company, Akron, Ohio.

As shown by the list of prices, 5-4 marbles and fancies are advanced 10 cents, and on 6-4 15 cents above the old list.

In the face of a fact that a trust combination formed a year ago controls the prices, we are now to put on the enormous duties which have been read by my colleague, the Senator from Arkansas.

Mr. PETTIGREW. Mr. President, most of these floor cloths are sold at less than 25 cents a yard. I hold in my hand four samples of different thicknesses of floor cloths, valued at from 10 to 16½ cents per square yard. Upon these the duty in the House bill is placed at 10 cents a yard and 15 per cent ad valorem, which amounts to from 65 to 95 per cent ad valorem on these articles. I have also six other thicknesses of linoleum, valued at from 15 to 22 cents per square yard, upon which the duty is equal to 62.1 per cent ad valorem.

In view of the fact that the articles are manufactured exclusively by four firms, who are in a combination by which, whether they run or not, they have their share in the percentage of the profits awarded to them by the combination, it is not at all strange that this enormous duty is placed upon the articles, because it would be an invidious distinction if this trust were not protected as high as all other trusts are in the bill. Every trust affected by the bill is excessively and inordinately protected. Somebody has had to do with the bill apparently who knew what articles were in a trust, and upon those the duty is heaped over and over again.

We knew in the last political contest that the trusts were all on one side. We know they all supported the Republican ticket. It was reported that vast sums of money were collected, and it is exceedingly significant, under these circumstances, that every single trust has protection running from 50 per cent up to 150 per cent in this bill. Whether it is for the contributions of the last campaign or in the interest of contributions for the next campaign, I know not; but no political party can go before the people of this country on schedules like these.

It is further fortunate that you should have a caucus agreement, by which every man, no matter where he is from, if he belongs to the Republican party, is bound to vote for these infamous increases.

Mr. WHITE. I would suggest to the Senator from South Dakota that the duty to which he now refers, in view of the political situation in the country, is probably a compensatory duty.

Mr. PETTIGREW. There is no doubt of it, Mr. President. I said there might be some doubt about it being compensatory, but it is anticipatory, to provide for future campaigns.

Where a political campaign is carried on and men are furnished free transportation from all over the United States to cast their votes, it is expensive. In the case of every man who ever lived in a close State, even two years after moving away, no matter where he went, his expenses were paid and he was brought back to vote the Republican ticket, as was done in Dakota. I say it is fortunate that an ironclad agreement holds their votes and no explanations are required. No defense is made of these excessive, outrageous, plundering rates of duty placed upon articles produced by a trust.

The PRESIDING OFFICER (Mr. GRAY in the chair). The question is on agreeing to the amendment proposed by the Senator from Arkansas.

Mr. PETTIGREW. On that I ask for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. MORGAN (when his name was called). I am paired with the Senator from Pennsylvania [Mr. QUAY].

Mr. MORRILL (when his name was called). I am paired with the Senator from Tennessee [Mr. HARRIS], and therefore withhold my vote. I will not again mention the fact during the day.

Mr. PENROSE (when his name was called). I am authorized to transfer my pair with the junior Senator from Delaware [Mr. KENNEY] to the junior Senator from Massachusetts [Mr. LODGE]. I will therefore vote. I vote "nay."

Mr. RAWLINS (when his name was called). I am paired with the junior Senator from Ohio [Mr. HANNA]. If he were present, I should vote "yea."

The roll call was concluded.

Mr. GORMAN. I desire to inquire if the Senator from Maine [Mr. FRYE] has voted?

The PRESIDING OFFICER. He has not voted.

Mr. GORMAN. I am paired with the Senator from Maine on this and all other questions, and therefore withhold my vote.

Mr. CLAY. I am paired with the junior Senator from Massachusetts [Mr. LODGE]. The pair has been transferred to the junior Senator from Delaware [Mr. KENNEY], and I will vote. I vote "yea."

Mr. PASCO. I announce the pair of the Senator from Kentucky [Mr. LINDSAY], who is absent from the city, with the Senator from Michigan [Mr. MCMILLAN].

Mr. MORGAN. I transfer my pair with the Senator from Pennsylvania [Mr. QUAY] to the Senator from Virginia [Mr. MARTIN], and will vote. I vote "yea."

Mr. TURPIE (after having voted in the affirmative). I am paired with the Senator from Minnesota [Mr. DAVIS], and therefore withdraw my vote.

The result was announced—yeas 22, nays 27; as follows:

YEAS—22.

Bacon,	Heitfeld,	Pasco,	Tillman,
Berry,	Jones, Ark.	Pettigrew,	Turner,
Chilton,	McLaurin,	Pettus,	Vest,
Clay,	Mallory,	Roach,	White.
Daniel,	Mills,	Smith,	
Gray,	Morgan,	Teller,	

NAYS—27.

Allison,	Gear,	Mason,	Sewell,
Burrows,	Hansbrough,	Penrose,	Shoup,
Carter,	Hawley,	Perkins,	Thurston,
Cullom,	Hoar,	Platt, Conn.	Warren,
Deboe,	McBride,	Platt, N. Y.	Wetmore,
Fairbanks,	McEnery,	Pritchard,	Wilson.
Foraker,	Mantle,	Proctor,	

NOT VOTING—40.

Aldrich,	Davis,	Harris, Tenn.	Murphy,
Allen,	Elkins,	Jones, Nev.	Nelson,
Baker,	Faulkner,	Kenney,	Quay,
Bate,	Frye,	Kyle,	Rawlins,
Butler,	Gallinger,	Lindsay,	Spooner,
Caffery,	George,	Lodge,	Stewart,
Cannon,	Gorman,	McMillan,	Turpie,
Chandler,	Hale,	Martin,	Walthall,
Clark,	Hanna,	Mitchell,	Wellington,
Cockrell,	Harris, Kans.	Morrill,	Wolcott.

So the amendment of Mr. JONES of Arkansas was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, on page 107, paragraph 335, line 21, after the word "cuffs," to strike out "composed entirely of cotton, 45 cents per dozen pieces and 15 per cent ad valorem;" in line 23, before the word "cents," to strike out "fifty" and insert "forty;" and in line 24, after the word "ad valorem," to strike out "shirts and other articles of wearing apparel, other than knit, composed in whole or in part of linen, made up or manufactured wholly or in part by the tailor, seamstress, or manufacturer, not specially provided for in this act, 50 per cent ad valorem;" so as to make the paragraph read:

335. Shirt collars and cuffs, composed in whole or in part of linen, 40 cents per dozen and 20 per cent ad valorem.

The next amendment was to strike out paragraph 336 and to insert in lieu thereof the following:

336. Laces: lace window curtains, tidies, pillow shams, napkins, bed sets, insertings, flouncings, and other lace articles; handkerchiefs, wearing apparel, and other articles made wholly or in part of lace, or in imitation of lace; nets or nettings, veils and veilings, etamines, vitrages, neck rufflings, ruchings, tuckings, flutings, and quillings; embroideries and all trimmings, including edgings, insertings, flouncings, galloons, and bands; wearing apparel, handkerchiefs, and other articles or fabrics embroidered in any manner by hand or machinery, whether with a letter, monogram, or otherwise; tamboured or appliquéed articles, fabrics or wearing apparel; hemstitched or tucked flouncings or skirtings, and articles made wholly or in part of rufflings, tuckings, or ruchings; all of the foregoing, composed wholly or in chief value of flax, cotton, or other vegetable fiber, and not elsewhere specially provided for in this act, whether composed in part of india rubber or otherwise, 60 per cent ad valorem: *Provided*, That no wearing apparel or other article or textile fabric, when embroidered by hand or machinery, shall pay duty at a less rate than that imposed in any schedule of this act upon any embroideries of the materials of which such embroidery is composed.

Mr. ALLISON. I move to transpose the word "napkins" from line 25, page 108, to line 1, page 109.

The SECRETARY. In line 25, paragraph 336, page 108, it is proposed to strike out the word "napkins;" and insert the word "napkins" after the word "handkerchiefs," in line 1, on page 109; so as to read:

Laces: lace window curtains, tidies, pillow shams, bed sets, insertings, flouncings, and other lace articles; handkerchiefs, napkins, wearing apparel, etc.

The amendment to the amendment was agreed to.

Mr. ALLISON. In the same paragraph, line 5, page 109, after the word "including," I move to insert "braid;" so as to read:

Embroideries and all trimmings, including braid, edgings, etc.

The amendment to the amendment was agreed to.

Mr. ALLISON. In line 6, after the word "galloons," I move to insert the word "gorings;" so as to read:

Insertings, flouncings, galloons, gorings, and bands; wearing apparel, handkerchiefs, and other articles or fabrics embroidered in any manner by hand or machinery.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. JONES of Arkansas. I should like to ask the Senator from Iowa what would be the effect of inserting the words "cords, webs, and webbing" in this paragraph, and taking them out of paragraph 317? I will state to him very frankly that in asking the question I know nothing about it, but an administrative officer in the custom-house at New York said to me that those words being in paragraph 317 would, in his opinion, involve difficulties of construction, and that they should be transposed to this paragraph. I do not know what the difference is in the rate, but I would suggest that probably it might be well for the Senator to leave the matter open, and the words I suggest might go into the bill in the paragraph indicated to be considered later. They can then go out of whichever paragraph it is deemed best.

Mr. ALLISON. We have already taken out of paragraph 317, I believe, by an amendment which I offered, braids and gorings.

Mr. JONES of Arkansas. Yes; that is correct.

Mr. ALLISON. And we have now inserted them here in lieu of having them in paragraph 317. It may be that cords ought also to be so transferred, but of course it will be open later on if we find it is necessary.

Mr. JONES of Arkansas. It will not be unless we put into this paragraph "cords, webs, and webbing." If it is inserted in this paragraph, leaving it in the bill in the other paragraph also, it can on careful examination be abandoned in whichever paragraph the Senator chooses.

Mr. ALLISON. I mean to say that later on, if we find that the Senator from Arkansas is right, we can insert the words in this paragraph by going back to it.

Mr. JONES of Arkansas. If the Senator does not forget it.

Mr. ALLISON. What words does the Senator from Arkansas suggest ought to be inserted?

Mr. JONES of Arkansas. In connection with braids, I would make it read "including braids, cords, edgings, webs, and webbing." I would insert all three right there. Then, whenever the question is examined, an amendment can be made by dropping the words out of the first paragraph, or out of this one, as the Senator sees fit.

Mr. ALLISON. I am afraid we will forget both. I will assure the Senator from Arkansas that on Monday morning I will call attention to the matter and we will dispose of it then. I wish to say that this paragraph, as well as paragraph 317, are in the nature of technical descriptions, and experts must be consulted.

Mr. JONES of Arkansas. My suggestion comes from an expert in the New York custom-house. Personally I know nothing about it.

Mr. WHITE. I move to strike out paragraph 336 as now amended on motion of the committee and insert in lieu thereof what I send to the desk, being section 276 of the present law.

The SECRETARY. It is proposed to strike out paragraph 336 as amended and insert in lieu thereof the following:

336. Laces, edgings, nettings and veilings, embroideries, insertings, neck rufflings, ruchings, trimmings, tuckings, lace window curtains, tamboured articles, and articles embroidered by hand or machinery, embroidered handkerchiefs, and articles made wholly or in part of lace, rufflings, tuckings, or ruchings, all of the above-named articles, composed of flax, jute, cotton, or other vegetable fiber, or of which these substances or either of them or a mixture of any of them is the component material of chief value, not specially provided for in this act, 50 per cent ad valorem.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from California.

The question being put, there were on a division—ayes 10, noes 10; no quorum voting.

Mr. PRITCHARD. I desire to announce that I am paired, and do not know whether I can vote.

Mr. ALLISON. I ask for a call of the roll.

The PRESIDING OFFICER. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Allison,	Foraker,	Morrill,	Stewart,
Bacon,	Gear,	Nelson,	Teller,
Bate,	Gray,	Pasco,	Thurston,
Berry,	Hanna,	Penrose,	Tillman,
Burrows,	Hansbrough,	Pettus,	Turner,
Carter,	Hawley,	Platt, Conn.	Turpie,
Chilton,	Hoar,	Platt, N. Y.	Vest,
Clay,	Jones, Ark.	Pritchard,	Warren,
Cockrell,	McBride,	Proctor,	Wellington,
Cullom,	McEnery,	Rawlins,	Wetmore,
Deboe,	Mason,	Roach,	White,
Elkins,	Mills,	Sewell,	Wilson.
Fairbanks,	Morgan,	Shoup,	

The PRESIDING OFFICER. Fifty-one Senators have answered to their names. A quorum is present. The question recurs on agreeing to the amendment proposed by the Senator from California.

The amendment was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 337, page 110, line 5, before the word "per cent," to strike out "fifteen" and insert "twenty;" so as to read:

337. Lace window curtains, pillow shams, bed sets, and other articles, finished or unfinished, made on the Nottingham lace-curtain machine or on the Nottingham warp machine, and composed of cotton or other vegetable fiber, when counting 5 points or spaces between the warp threads to the inch, 1 cent per square yard; when counting more than 5 such points or spaces to the inch, one-half of 1 cent per square yard in addition for each such point or space to the inch in excess of 5; and in addition thereto, on all the foregoing articles in this paragraph, 20 per cent ad valorem: *Provided*, That none of the above-named articles shall pay a less rate of duty that 50 per cent ad valorem.

Mr. ALLISON. On page 109, line 21, after the word "shams," I move to insert the word "and;" and to strike out the word "and," in the same line where it last occurs, and insert "or."

The SECRETARY. After the word "shams," in line 21, page 109, it is proposed to insert the word "and;" and after the word "sets," in the same line, strike out the word "and" and insert the word "or;" so as to read:

Lace window curtains, pillow shams and bed sets, or other articles, finished or unfinished, made on the Nottingham lace-curtain machine or on the Nottingham warp machine, and composed of cotton or other vegetable fiber, etc.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The reading of the bill was resumed. The next amendment of the Committee on Finance was to strike out paragraph 338, as follows:

338. Embroideries, including embroidered edgings, insertings, flouncings, galloons, bands, and other trimmings, whether embroidered by hand or machinery, composed of cotton or other vegetable fiber, or of which cotton or other vegetable fiber is the component material of chief value, 50 cents per pound and 25 per cent ad valorem: *Provided*, That none of the articles named shall pay a less rate of duty than 60 per cent ad valorem.

The amendment was agreed to.

The next amendment was, in paragraph 339, page 110, line 17, after the word "known," to strike out "not exceeding 60 inches

in width;" and in line 20, before the word "of," to strike out "seven-eighths" and insert "three-fourths;" so as to make the paragraph read:

339. Plain woven fabrics of single jute yarns, by whatever name known, weighing not less than 6 ounces per square yard and not exceeding 30 threads to the square inch, counting the warp and filling, three-fourths of 1 cent per pound and 15 per cent ad valorem; if exceeding 30 and not exceeding 55 threads to the square inch, counting the warp and filling, 1 cent per pound and 15 per cent ad valorem: *Provided*, That any of the above, having more than 3 per cent of the number of warp and weft threads bleached, dyed, colored, stained, painted, or printed, shall pay a duty of 1 cent per pound and 20 per cent ad valorem.

Mr. VEST. This paragraph includes burlaps, which are free under existing law.

Mr. ALLISON. I wish to offer an amendment to the amendment.

Mr. VEST. I beg pardon.

Mr. ALLISON. In line 25, page 110, I move to strike out "and" and insert "or."

The SECRETARY. In line 25, it is proposed to strike out the word "and" and insert "or;" so as to read:

Provided, That any of the above, having more than 3 per cent of the number of warp or weft threads bleached, dyed, colored, stained, painted, or printed, shall pay a duty of 1 cent per pound and 20 per cent ad valorem.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. ALLISON. I ask unanimous consent to return to paragraph 337. I find we have made a mistake in the amendment there.

The PRESIDING OFFICER. If there be no objection, the Senate will recur to paragraph 337.

Mr. ALLISON. In line 21, paragraph 337, I move to strike out "or other articles."

The SECRETARY. In line 21, paragraph 337, it is proposed to strike out "or other articles;" so as to read:

Lace window curtains, pillow shams, and bed sets, finished or unfinished, made on the Nottingham lace-curtain machine or on the Nottingham warp machine, and composed of cotton or other vegetable fiber, etc.

The amendment was agreed to.

Mr. WHITE. Is that the last amendment which the Senator from Iowa desires to propose to paragraph 337?

Mr. ALLISON. In paragraph 339 I wish to move an amendment. I wish to add at the end of paragraph 339——

Mr. JONES of Arkansas. Before leaving paragraph 337, I should like to make a motion, as I was out of the Chamber when it was called up just now.

Mr. ALLISON. I move to strike out all after the word "fiber," in line 24, paragraph 337, on page 109, and insert the words "50 per cent ad valorem."

The SECRETARY. After the word "fiber," in line 24, paragraph 337, page 109, it is proposed to strike out the remaining portion of the paragraph and insert "50 per cent ad valorem;" so as to make the paragraph read:

337. Lace window curtains, pillow shams, and bed sets, finished or unfinished, made on the Nottingham lace-curtain machine or on the Nottingham warp machine, and composed of cotton or other vegetable fiber, 50 per cent ad valorem.

Mr. WHITE. The following statement is made to me by an expert perfectly familiar with the subject. He says:

I do not think that a specific duty can be allowed on the endless variety of goods that are made on the Nottingham lace machine without doing rank injustice to the poorer classes who buy these cheap imitation lace goods in the way of window curtains, trimmings, and personal ornaments. The rate of duty in some cases will exceed 200 per cent.

Mr. ALLISON. I call the attention of the Senator from California to the fact that we have stricken out "or other articles." So paragraph 337 simply applies to articles well known, lace window curtains, pillow shams, etc.

Mr. WHITE. The amendment is limited to those articles?

Mr. ALLISON. To those articles.

Mr. WHITE. It seems to be an improvement, but it is bad enough.

Mr. JONES of Arkansas. I should like to have a vote on my amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Arkansas.

The amendment was rejected.

Mr. ALLISON. In line 3, page 111, paragraph 339, after the words "ad valorem," I move to strike out the period and to insert a semicolon, and the words "if stiffened, and whether known as buckram or otherwise, 1¼ cents per pound."

The SECRETARY. It is proposed, at the end of paragraph 339, after the words "ad valorem," to strike out the period and insert a semicolon, and the words "if stiffened, and whether known as buckram or otherwise, 1¼ cents per pound."

The amendment was agreed to.

Mr. ALLISON. That is all.

The reading of the bill was resumed. The next amendment of the Committee on Finance was to strike out paragraph 340, as follows:

340. All pile fabrics of which flax is the component material of chief value, 60 per cent ad valorem.

The amendment was agreed to.

Mr. WHITE. I suggest that the next two paragraphs, 341 and 342, might be read by unanimous consent, as both refer to the same material—gunny or bags, sacks, jute yarns, and so on. I desire to make a few comments upon these paragraphs, and I suggest that we will probably get along faster if the two paragraphs are read and perfected, if the Senator from Iowa desires to amend them.

Mr. PETTUS. Mr. President——

The PRESIDING OFFICER. Does the Senator from California yield to the Senator from Alabama?

Mr. WHITE. Certainly.

Mr. PETTUS. I desire to make a motion, or, rather, two motions. I wish to move to strike out paragraph 341, and another motion to strike out paragraph 342, for the purpose of putting those articles on the free list.

Mr. WHITE. That is my design also.

Mr. PETTUS. They embrace the sacks and bags used by the farmers for sending their produce to market.

Mr. HOAR. I understood the Senator from California to ask unanimous consent, in substance, that these two paragraphs may be treated as one, and that will accomplish the purpose of the Senator from Alabama.

Mr. WHITE. That is my idea, that the Senator from Iowa should perfect them according to his intention, and then any motion that might be desirable could be made after that time.

Mr. ALLISON. Very well.

Mr. WHITE. As these paragraphs treat of kindred subjects, they may be read and considered together.

Mr. ALLISON. That is all right.

Mr. PETTUS. I should rather they were taken separately, however.

These are articles of prime necessity to the farmers all over the United States. They are the very things used in sending a large portion of their products to market. The bagging for cotton ought not to be taxed. I say there is scarcely any decency in the tax; and the same reason applies to farmers who put their wheat and their oats and their potatoes, and all the other farm products that go to market, in these bags. I hope the Senators upon the other side will consent to allow the farmers to escape that much of the taxation at least.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 341, page 111, line 9, after the word "filling," to strike out "one and one-eighth of;" so as to make the paragraph read:

341. Bags or sacks made from plain woven fabrics, of single jute yarns, not dyed, colored, stained, painted, printed, or bleached, and not exceeding 30 threads to the square inch, counting the warp and filling, 1 cent per pound and 15 per cent ad valorem.

The amendment was agreed to.

The reading of the bill was resumed; and the next paragraph was read, as follows:

342. Bagging for cotton, gunny cloth, and similar fabrics, suitable for covering cotton, composed of single yarns made of jute, jute butts, or hemp, not bleached, dyed, colored, stained, painted, or printed, not exceeding 16 threads to the square inch, counting the warp and filling, and weighing not less than 15 ounces per square yard, one-half of 1 cent per square yard and 15 per cent ad valorem.

Mr. WHITE. Do I understand that the committee adheres to the amendment found in paragraph 341? As the bill is printed, the committee propose to strike out "one and one-eighth of," so that the duty shall be 1 cent a pound and 15 per cent ad valorem, instead of 1 and one-eighth of 1 cent. Does the committee adhere to it?

Mr. ALLISON. We adhere to everything we do not abandon.

Mr. WHITE. I do not understand that the committee amendment has been adopted.

Mr. ALLISON. I think it has been.

The PRESIDING OFFICER. The committee amendment has been agreed to, the Chair will suggest to the Senator from California.

Mr. WHITE. The Senator from Alabama, I understand, has moved to strike out both of these paragraphs.

The PRESIDING OFFICER. The Senator from Alabama has given notice that he would make such a motion.

Mr. PETTUS. I now move to strike out paragraph 341.

The PRESIDING OFFICER. The Senator from California has the floor. Does he yield to the Senator from Alabama?

Mr. WHITE. I will yield if the Senator from Alabama desires to make that motion. It is immaterial to me who makes it.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Alabama to strike out paragraphs 341 and 342.

Mr. PETTUS. I move to strike out paragraph 341. I will make a motion to strike out paragraph 342 also.

Mr. BERRY. I understood the Senator from Iowa yesterday to intimate that he contemplated making some changes in this paragraph, or at least the committee were deliberating. I should like to ask him whether they intend to make any change in the way of equalizing these bags with some other articles which are not

taxed? I ask the Senator if the committee have got through deliberating and have examined the question, and whether or not they will propose to make any change in regard to the matter?

Mr. ALLISON. We have not had time since yesterday to take up the matter, I will say to the Senator from Arkansas. We have been occupied with other matters.

Mr. WHITE. Mr. President, the Wilson Act placed jute bags upon the free list, in deference to the wishes of the producers in the farming communities of the country. I have here a statement regarding the subject as far as it relates to the Pacific Coast. I think it ought to prove interesting and highly instructive to the committee:

The annual consumption of grain bags on the Pacific Coast, including California, Washington, Oregon, Nevada, and Arizona, is 35,000,000 to 40,000,000 bags. The only grain bags now manufactured on this coast are made at the California State prison, San Quentin, capacity about 4,000,000 bags every twelve months, and the State prison at Walla Walla, Wash., capacity about 3,000,000 bags every twelve months.

Prior to the enactment of the Wilson bill placing grain bags upon the free list, the California Jute Mill Company was operated at Oakland, Cal., capacity about 3,000,000 bags every twelve months, and they employed less than 300 hands, including Chinamen. This is the only private enterprise on the entire Pacific Coast that ever engaged in the manufacture of jute into grain bags, although for a period of twenty-five years protection was afforded by tariffs in force prior to 1894. Even the State prison, at San Quentin, Cal., during the period prior to 1894, while imported grain bags were subject to duty and while not paying any wages for labor, was operated at a loss, according to the statements published by the directors at various times.

Under the old McKinley tariff, the duty on grain bags was 2 cents per pound, equal to $15 per thousand bags, and this tax took out of the pockets of the farmers on the Pacific Coast annually about $500,000. No other section of the United States handles grain bags in this manner, all of the crops east of the Rocky Mountains being handled in bulk upon cars and by elevators; hence, sacks are not required; but upon the Pacific Coast, whence the grain is shipped to Europe by sailing vessels only, it is absolutely necessary to sack the grain before exporting it, and as all grain exported from this coast is sold in Europe in competition with grain from the Atlantic Seaboard, the farmers can not recover the cost of the sack in the price at which the grain is sold. The tariff, therefore, on grain bags is a special taxation upon the farmers of this coast, without any opportunity for them to recoup when selling their grain; no farmers in any other section of this country have this additional tax to pay.

The only country in the world where jute is raised is India. Very large jute factories have been established there during the past twenty-five years, employing cooly labor at wages of 10 to 15 cents per diem. No class of labor in the United States can compete with such labor as is obtainable in India; hence, notwithstanding that for some twenty years prior to the passage of the Wilson bill a protective duty of 1½ cents or more per bag was levied upon imported sacks, this protection did not offer sufficient encouragement for factories to be established on the Pacific Coast for the manufacture of such bags, and the farmers, during all that period of time, were obliged to pay this excessive tax, which had to come out of the price at which they could sell their grain to Europe, while other farmers east of the Rocky Mountains and shipping their grain from the Atlantic Seaboard escaped any such tax.

Prices for bags have ranged as follows:
In 1890, with duty added, 6½ cents to 7 cents each.
In 1892, with duty added, 7½ cents to 8 cents each.
In 1891, with duty added, 7 cents to 7½ cents each.
In 1893, when bags were free, 4½ cents to 4¾ cents each.
In 1895, when bags were free, 4½ cents to 5 cents each.
In 1894, when bags were free, 4 cents to 4½ cents each.

After allowing for fluctuations in the foreign market, there remains this excess of about $15 per 1,000 bags, paid by the Pacific Coast farmer in 1891, 1892, and 1893 (and previously for twenty years), when bags were subject to duty, as against prices paid in 1894, 1895, and 1896, when bags were admitted free.

A tax of $15 per thousand on grain bags will not offer protection to any class of free labor on the Pacific Coast now employed in manufacturing grain bags, and it will take about $500,000 out of the pockets of the farmers on this coast, which they have no opportunity whatever of recovering, for it makes the marketing of grain cost them just that much more, and no allowance is made by foreign buyers for the additional cost paid for sacks.

R. M. TURNER.

We put a duty upon wheat, an absurd duty, absurd because in no aspect can it be of the slightest benefit to anybody. The wheat raised upon the Pacific Coast—and there is a vast amount produced there, as shown by the report of the Department of Agriculture; it is one of the chief wheat-producing sections of the United States—is shipped in grain bags. None of it is shipped in bulk. It goes around Cape Horn to Liverpool, and of course the price of the wheat is regulated by the Liverpool market, and we do not sell anywhere else. If the tariff were $10 a pound, it would not be of the slightest benefit to us. On the contrary, it would be an injury, because there are occasions when we wish to import seed for purposes of change, and we would then have to pay a tariff upon it.

The tariff on bags is a fraud, a delusion. It is not much of a snare, however, because the people in that section of the country understand it pretty thoroughly. Here comes an opportunity when some substantial advantage might be accorded to the farmer, because, if given free bags, he would be relieved to that extent of taxation, and the same gentlemen who are advocating a tax upon wheat for his alleged benefit when they come in contact with something that may be of use to him fail to respond affirmatively.

I have before me a statement of a gentleman who testified before the Ways and Means Committee, Mr. Rutherford, of Oakland, Cal., who has a cotton mill and formerly had a jute mill which he said he had to close in consequence of free bags. He refers to the character of the grain bags made and used by us as follows:

Under the competition of home-made goods, bags were gradually reduced in price until in 1875 the price fell to 12 cents each, in 1880 to 10 cents, in 1890 to 7 cents, in 1892 to 6 cents and under. The standard grain bag of the Pacific Coast is well known in all the jute markets of the world. It is 36 inches long, 22 inches wide, weighs 12½ ounces, and holds 130 pounds, or 2 bushels, of wheat. The quantity used annually often exceeds 40,000,000.

In this particular instance, if it were conceded that we might establish a jute mill or half a dozen of them upon the Pacific Coast or elsewhere to supply our farmers, I should say, even upon the theory of protection, we would not be justified in doing it. Everyone concedes that the farming community is taxed and taxed and taxed, and that it is almost impossible to levy any duty whatever upon any products or thing which is of the slightest value to that suffering and respectable portion of the citizens of the United States. Hence the only opportunity afforded in this bill of doing any substantial good to the farmers is by giving them something of this kind upon the free list; and even if I were compelled to sacrifice the factory of this one individual (the only factory established on the Coast outside of the two penitentiaries referred to, notwithstanding the protection of twenty years), if it is to be the result of placing this article upon the free list that the factory can not be operated, I say let it close. The farming community have more right to be considered than any small institution of that kind, or any manufacturing institution at all, under present circumstances.

Mr. BUTLER. Will the Senator from California state how much he thinks this duty would increase the price of such bags?

Mr. WHITE. About $15 a thousand.

Mr. ALLISON. It will increase it?

Mr. WHITE. Yes.

Mr. BUTLER. It increases the cost?

Mr. WHITE. Yes, sir.

Mr. BUTLER. To the farmer who buys his fertilizers?

Mr. WHITE. Yes, sir.

Mr. BUTLER. As well as to the farmer who has to ship his grain in sacks?

Mr. WHITE. Certainly.

Mr. BUTLER. My State uses about 180,000 tons of guano a year. At that rate it would cost the farmers of North Carolina $36.000 a year to pay this duty.

Mr. WHITE. Undoubtedly.

Mr. BUTLER. It would cost Georgia practically the same; it would cost South Carolina between $10,000 and $15,000, and so on in every Southern State, on fertilizer bags alone.

Mr. WHITE. I will say to the Senator from North Carolina that I have quite an interesting statement here which I will ask the Secretary to read. It refers to the very matter which the Senator has in mind.

The PRESIDING OFFICER. The Secretary will read as requested.

The Secretary read as follows:

FREE BURLAP FOR GRAIN, FLOUR, AND FERTILIZER SACKS.

Burlap cloth, made of jute and not over 40 inches in width, used for grain, flour, and fertilizer sacks, should be admitted free for the following reasons:

This class of burlap is not made in this country, a protective tariff for twenty-five years having utterly failed to establish its manufacture here,* and, although very large consumers of the article, we have never been offered a single yard of bag burlap cloth of American manufacture.

This burlap is imported exclusively from Dundee and Calcutta, where enormous capital is invested in these mills. Even Dundee is already hard pushed by Calcutta competition, and most of her mills are running on a 3 per cent dividend basis or less. In fact, India controls absolutely the situation, because she alone produces the raw material (jute) and has the cheapest labor in the world. If any competition should trouble her, she would surely put an export duty on jute (this policy has already been agitated) against countries imposing a duty on her burlap, which would prove disastrous to many industries in this country which use jute for other purposes.

It is conclusive that this industry can not be established in this country without an exorbitant duty, which would take many millions of dollars from the pockets of our farmers without any compensating return to any other class of our people. Our farmers are none too prosperous, and they derive small advantages from our protective system compared with our manufacturers. They need, therefore, to have their burdens lightened rather than increased. Any duty on bag burlap will directly increase the cost of their fertilizers and decrease the net returns of their principal crops.

The American representatives of Dundee and Calcutta manufacturers are not wholly opposed to a duty on burlap, for the very apparent reason that they do not fear its creating any American competition, while a duty will increase their commissions through the additional price of the goods, and at the same time protect them from competitors whose capital is insufficient to handle the business with the duty added.

Bradley Fertilizer Company, Boston (by Robt. S. Bradley, president); Armour & Co., Chicago; Pillsbury-Washburn Flour Mills Company, Limited, Minneapolis (by Chas. A. Pillsbury, managing director); Virginia-Carolina Chemical Company, Richmond (by S. T. Morgan, president); Swift & Co., Chicago; Lazaretto Guano Company, Baltimore (by W. H. Grafflin, president); Detrick Fertilizer and Chemical Company, Baltimore (by Louis F. Detrick, president); Williams & Clark Fertilizer Company, New York (by H. L. Dudley, vice-president); Baugh & Sons' Company, Philadelphia; Cumberland Bone Phosphate Company, Boothbay, Me. (by F. L. Ellis, president); Cleveland Dryer Company, Cleveland, Ohio (by W. Prescott, vice-president); Ashepoo Phosphate Company, Charleston, S. C. (by Jos. R. Robertson, president).

Mr. STEWART. I wish to inquire of the Senator from California if he knows the number of persons on the Pacific Coast engaged in the manufacture of jute bags. Is it not merely nominal?

*See House testimony, Schedule J, page 1258.

Mr. WHITE. Certainly.

Mr. STEWART. It protects nobody practically, as only a few hands are engaged in the manufacture.

Mr. WHITE. And half of them are Chinamen.

Mr. STEWART. They are mostly Chinamen. It amounts to nothing so far as increasing the business on the Coast is concerned. I have some personal experience in the matter. I should like to know if the Senator has any information as to these factories in other sections of the country—whether it is a great industry or a small industry?

Mr. WHITE. As far as the manufacture of bags, to which I am referring, is concerned, it is confined entirely on the Coast to the special bags which are made only for that trade.

Mr. STEWART. It will cover all jute bags.

Mr. WHITE. It will cover all burlaps and jute bags.

Mr. STEWART. I should like information as to the extent of the industry outside of the Pacific Coast. It amounts to very little there.

Mr. ALLISON. There are only about eleven or twelve million bags manufactured in the United States, mostly in the South, I think.

Mr. WHITE. That is cotton bagging.

Mr. ALLISON. I wish to ask the Senator how he makes up the additional cost of $15 per thousand bags?

Mr. WHITE. I will show the Senator in a moment. I have calculated the duty at 50 per cent ad valorem.

Mr. ALLISON. But I find that under the McKinley law, which the Senator referred to a moment ago, with a duty of 2 cents a pound it was only six one-hundredths of a cent a yard higher in 1893 than in 1896, under the act of 1894. So I do not see how the Senator can add $15 to the cost of a thousand bags.

Mr. WHITE. The duty amounts to exactly that on each bag. I gave the figures of the prices of the California bag in the market to-day at 4 cents, and 4¼ to 4½ in 1896, as against 7 to 7½ cents in 1891.

Mr. ALLISON. I have here a statement of the price in New York. I find that in 1893 the price was 5.04 cents.

Mr. WHITE. The Senator is looking at a different bracket than that to which I am referring.

Mr. ALLISON. I am looking at a very good bracket here for prices. I find that in 1896——

Mr. WHITE. It is probably a good bracket for that sort of argument.

Mr. JONES of Arkansas. There is more difference in the price of grain bags than that stated by the Senator from California, I think.

Mr. WHITE. I am speaking of the market price in the State of California, and comparing the price at the dates named.

Mr. ALLISON. I only wanted to find out how the Senator made his calculation of $15 a thousand.

Mr. WHITE. Now, I want to call attention further to something in the discussion of the gentleman whom I have already quoted. He ran a jute mill, and there was considerable fuss made about his establishment during the political campaign in California not very long ago, when the legislature, which was Republican, passed a resolution instructing the legislators to vote for free grain bags. At the same time I may say, and it may probably discredit its action on the other side of the Chamber, that the same legislature passed a resolution in favor of the free and unlimited coinage of silver at 16 to 1. Since that time the platform of the party has been silent on grain bags and reversed on the free-coinage proposition. But at the time the discussion which I now mention was on it was shown that this very gentleman employed a large portion of Chinese in his jute mill, although he was complaining of having to compete with the cooly labor of India. However, that feature of the case I do not care to allude to particularly, because my argument does not depend upon it. The Senator from Arkansas desires to make a statement.

Mr. JONES of Arkansas. In reply to the statement made just now by the Senator from Iowa, I have a letter from a gentleman in Oregon, with whom I have been acquainted for a long while. He makes the statement that wheat sacks have just advanced from 4.9 cents per sack to 7 cents as the result of the understanding that this tariff is to go into effect.

Mr. ALLISON. What is the date of the letter?

Mr. JONES of Arkansas. April 7, 1897, when this rate was reported, and when it was understood that this tariff was to go on the article. This gentleman, who is himself very much interested in the question, says that the sacks have gone from 4.9 cents to 7 cents. The Senator quoted the price of the sacks correctly at that time, but as soon as this report came in they went up.

Mr. WHITE. It was the advance guard of prosperity.

I have another document from the Bradley Fertilizer Company, of Boston, Mass., which I will put in the RECORD. It refers to the same subject which was mentioned by the Senator from North Carolina [Mr. BUTLER].

The paper referred to is as follows:

REASONS WHY BURLAP SHOULD REMAIN ON FREE LIST.

We protest against restoring any duty upon burlap (made from jute) under 60 inches in width, and used for bagging grain and fertilizers, for the following reasons:

No burlap of this description is made in this country (as was shown at House committee hearing on this schedule), except in two prisons, in California and Washington, to keep the convicts employed and not as a commercial enterprise.

Burlap is imported almost exclusively from Dundee and Calcutta, while the jute from which it is made is raised wholly in India, and the Calcutta mills are rapidly gaining ground in the manufacture of burlap in competition with the Dundee mills, which latter are now running their plants upon the smallest possible margin. This country can never hope to cope with either in the manufacture of burlap; certainly not with India, which alone produces the raw material, and where labor receives the lowest compensation in the world.

Thus it is that the American representatives of Dundee and Calcutta burlap houses do not object to a duty being levied on burlap, as this will only add to their profits through increased commissions, without danger of American competition.

India is in a position to control the market on this class of burlaps, such as are used for making bags. In August, 1895, there were ready for operation in India 11,490 looms, and it is estimated that by the middle of 1897 there will be ready 13,465 looms. It can not be expected that India will allow the raw material to be exported to this country to be used in the manufacture of burlaps under a tariff here which would cause a large proportion of her looms to remain idle. Her policy under such a course would be a prohibitory export duty on the raw material; in fact, this course is already agitated, as is shown by the following extract, which is taken from the principal commercial review of India, the Capital (see issue of October 7, 1896):

"The subject of customs duties has again raised some discussion in private circles as to the propriety of imposing an export duty on jute shipped to foreign countries, either as supplementary to or in substitution or reduction of other taxes.

"The reasons why England continues to refrain from export duties do not in any way affect India. In England export is confined to manufactures and to articles freely supplied by neighboring countries. In the case of jute, India has a monopoly of the production."

The total exports of burlap from Calcutta for the year 1896 to all countries were 151,879,498 yards, of which nearly 100,000,000 yards came to the United States. It is hardly possible that India would allow her exports of burlap to be reduced two-thirds without retaliating by placing an export duty upon the raw material and thus again placing herself on more than an equality with any American manufacturer. A duty sufficient to foster or protect the industry in this country would have to be wholly exorbitant, and would not, in our opinion, invite capital, as such a duty could not, we believe, be long maintained directly at the expense of our great agricultural interests.

Under such conditions capital will hardly look with much favor on such an investment in this country.

Our business brings us in close contact with the farmers, and we can state from our own knowledge that they are anything but prosperous, and need to have their expenses reduced rather than increased. The prosperity of our country depends upon our agricultural interests, and we believe it is the true policy of our Government to encourage these interests, rather than to place burdens upon them. In other words, give the farmers protection on their farm products, and relieve them from any unnecessary taxation, and they will again begin to prosper, and with their prosperity will come good times for all. Without prosperity in agriculture we can not expect prosperity in business. We therefore most earnestly urge upon your favorable consideration the maintenance of burlap upon the free list, at least all of the article that is required for grain and fertilizer sacks, which could be covered by confining it to burlaps of a width under 60 inches.

BRADLEY FERTILIZER COMPANY,
Boston, Mass.

Mr. WHITE. We find in the comparative statement prepared for us under the auspices of the majority of the committee, on pages 174 and 175, under paragraph 311:

Bags or sacks made from plain woven fabrics, of single jute yarns, not dyed, colored, stained, painted, printed, or bleached, and not exceeding thirty threads to the square inch, counting the warp and filling.

The House rate is 1½ cents per pound and 15 per cent; the Senate rate is 1 cent per pound and 15 per cent. No attempt is made to carry out the ad valorem. This omission is observable in many other cases in this comparative statement where to carry out the ad valorem would be to discredit the proposed duty by showing that it was too high.

I have myself taken the trouble to make a computation, basing it upon the statement made by Mr. Rutherford, the gentleman to whom I referred, found upon pages 1247 and 1248 of the hearings before the Ways and Means Committee on Schedule J. Mr. Rutherford there takes a burlap of a slightly different size, but it will do for the purposes of comparison. In the tables submitted by Mr. Rutherford he gives the "cost of manufacturing 100,000 yards 10½-ounce 40-inch burlaps in the United States," and gives the items of expense. I will ask that this table be inserted. He makes the total cost $4,244.

The table referred to is as follows:

Cost of manufacturing 100,000 yards 10½-ounce 40-inch burlaps in the United States.

To make 100,000 yards of 10½-ounce 40-inch burlaps would require 66,500 pounds of raw jute, 33¼ tons, and the labor of 142 persons working ten days, ten hours each day.

33¼ tons raw jute, at $60 per ton		$1,995.00
Help (per day each):		
2 batchers men, at $2	$40.00	
2 softeners, at $1.75	35.00	
8 carders, at $1	80.00	
12 drawers, at $1	120.00	
2 rovers, at $1	20.00	
2 helpers, at 75 cents	15.00	
12 spinners, at $1.25	150.00	
12 doffers, at 60 cents	72.00	

Help (per day each)—Continued.		
8 spoolers, at $1	$80.00	
1 band sewer, at $1	10.00	
1 oiler, at $1.25	12.00	
2 truck boys, at 75 cents	15.00	
1 machinist, at $3	30.00	
1 spinner, at $3	30.00	
1 second hand, at $1.50	15.00	
1 watchman, at $2.25	22.50	
9 copers, at $1.17	105.00	
3 beamers, at $2	60.00	
3 warpers, at $1.25	37.50	
46 weavers, at $1.25	575.00	
3 loom fixers, at $2.25	67.50	
2 finishers, at $2	40.00	
1 measurer, at $2	20.00	
2 folders, at $2.25	45.00	
2 packers, at $2.25	45.00	
1 stamping and shipping clerk, at $4	40.00	
1 oiler, at $1.75	17.50	
1 foreman, at $3	30.00	
		1,839.00
Power, oil, forces, insurances, depreciation of plant, and other price charges		420.00
Total cost		4,244.00

Cost of 100,000 yards in California, $4,244, or 4.24 cents per yard.

As a yard weighs 10½ ounces and costs 4.24 cents per yard, 16 ounces would cost 6.46 cents. Six and forty-six one-hundredths cents is the net cost of 1 pound of manufactured burlaps in the United States.

On page 1248 Mr. Rutherford gives the cost in Calcutta. I submit that table to be incorporated in the RECORD.

The table referred to is as follows:

Cost of manufacturing 100,000 yards of 10½-ounce 40-inch burlap in Calcutta and laying same down in California.

Requiring 231 persons in Calcutta working ten days, ten hours each day.

	Rupees.	Anna.
33½ tons raw jute, at 150 rupees per ton	4,987	8
Help (per day each):		
4 men batching, at 1 rupee	40	
4 helpers, at 12 anna	30	
12 card tenders, at 12 anna	90	
18 card framers, at 12 anna	135	
4 roving hands, at 12 anna	30	
20 spinners, at 12 anna	150	
16 doffers, at 8 anna	80	
12 spoolers, at 12 anna	90	
12 cop hands, at 12 anna	90	
2 oilers, at 1 rupee	20	
2 spare hands, at 12 anna	15	
1 skilled machinist, at 8 rupees	80	
1 skilled helper, at 2 rupees	20	
1 spinning overseer, at 6 rupees	80	
1 skilled helper, at 2 rupees	20	
1 messenger, at 1 rupee	10	
4 warpers, at 14 anna	35	
3 warp helpers, at 12 anna	22	
90 weavers, at 14 anna	787	
4 loom fixers, at 1 rupee 2 anna	45	
3 finishers, at 1 rupee	30	
2 measurers, at 1 rupee	20	
3 folders, at 1 rupee	30	
3 packers, at 1 rupee	30	
1 oiler, at 1 rupee	10	
1 band sewer, at 1 rupee	10	
1 skilled machinist, at 8 rupees	80	
1 foreman, at 8 rupees	80	
1 second hand, at 4 rupees	40	
1 bookkeeper, at 6 rupees	60	
1 pay clerk, at 8 rupees	80	
1 engineer, at 8 rupees	80	
	2,419	
Power, oil, insurance, interest, repairs, depreciation, and other fixed charges	1,190	
Freight, commission, insurance, brokerage, from Calcutta to San Francisco	1,220	
Total cost	9,816	8

Counting the rupee equal to 31 cents United States money, that would make total cost of 100,000 yards, $3,043.11.

As a yard weighs 10½ ounces and costs 3.04 cents per yard, 16 ounces would cost 4.63 landed in the United States.

Comparison of costs.

	Cents.
Cost of manufacturing 1 pound of burlap in the United States	6.46
Cost of manufacturing 1 pound of burlap in Calcutta, British India	4.63
Cost in the United States greater than that in India	1.83

Mr. WHITE. The raw material according to Mr. Rutherford's figures of foreign cost would be in rupees, 4,987; the labor, etc., 2,419; depreciation, insurance, etc., 1,190; total, 8,596. Then, taking the value of the rupees as he gives it, at 31 cents, it would make the foreign cost 2.66 and something further; taking 15 per cent ad valorem of 2.66 and adding 1 to it, we have a duty of 1.39, or practically 1.40, and the foreign cost being 2.66, it gives an ad valorem under the Senate schedule of 52.

So we have 52 per cent tax placed upon this article of vital and necessary interest to the farmer, without which he can not ship one single bag of grain abroad, and we have it imposed upon the theory that the farmer can not have the benefit of cheap sacks, which are so important to reduce, I might say, the losses to which he is subjected every day. If there were any provision in this bill on which the farmer could realize anything by way of exactions from the other parts of the United States, if he were in a position to assess against some other industry or set of men some of the benefits which they have derived from him, then the theory of protection would undoubtedly justify the imposing of this burden. But it is all one-sided.

In the Wilson Act we had a straight provision of bags for grain on the free list, and when the time comes, if we do not incorporate all of this matter in the free list, I intend to move to put bags for grain upon the free list.

I have quite an amount of literature in this connection, but I suppose it is useless to elaborate further, and I do not wish to detain the Senate. I am as anxious as anyone to get through with the bill.

Mr. BUTLER. Before the Senator from California concludes, I should like to ask him if he has made any calculation covering the increased cost this duty would impose upon the farmer on wheat sacks, guano sacks, and cotton bagging added together?

Mr. WHITE. I have not. I have simply made the computation as I stated. On 40,000,000 grain bags, with a difference in cost of one and three-fourths of a cent, the calculation can be readily made. I have not carried it out as suggested by the Senator, though it would no doubt be very instructive to do so.

Mr. BUTLER. It puts a tax on the farmer when he buys fertilizers to make his product, and then puts a tax on him when he buys jute to ship it to the market. It is not done on the principle of protection, because he has no interest which amounts to anything to protect. This burden is imposed upon the farmer, who gets no protection in any shape.

Mr. WHITE. He has not even the compensation of a free breakfast table.

Mr. BUTLER. Mr. President, I have a number of letters, documents, and statements relating to the question, but the matter has been covered so concisely and clearly by the Senator from California that I will take the time of the Senate simply to read one letter. It is from the president of the Virginia-Carolina Chemical Company, a company which manufactures the guano that is sold in the South, especially in Virginia, North Carolina, South Carolina, Georgia, and over the whole South. He says:

> The question of putting burlaps on the dutiable list is a serious one to the South and the West. The schedule proposed by the Dingley bill will cause 2 cents advance in the price of the fertilizer bag. This makes 20 cents per ton on each ton of fertilizer. North Carolina consumes about 180,000 tons of fertilizer per year. This would be a direct tax upon the farmers of that State of something like $36,000. It would be equally as much in Virginia; about $10,000 more in South Carolina, and $20,000 more in Georgia.
>
> There is no industry to be protected by this item of tariff, and it simply results in a direct tax upon the agricultural classes.
>
> * * * * * * *
>
> The bill bears equally as hard on the Western grain shippers.

He discusses how it affects the West, and how it affects the cotton farmer, showing the increased price, but does not figure out the increased cost in detail. That is why I asked the Senator from California if he had figured it out and added it up. It certainly will make a very large total. It will be an enormous total. Anyone can see that if the increased price on fertilizer bags alone in North Carolina is $36,000, there must be an enormous total on fertilizer bags over the country. Then add to it the wheat sacks, then add to it the increased price for bagging to cover the cotton, and you have an enormous total which is a direct tax upon the farmer. It is a revenue tax. There is no protection behind it, and if there was it would be inexcusable, because the farmer gets no benefit from the protective tariff.

There is no way to protect the farmer except by giving him an export bounty, and both sides of the Chamber refuse to do that. Every sense of fairness, common justice, and decency would show that this tax should not be placed upon the farmer, as he alone of all the American laborers and American industries is left to compete with the cheap foreign pauper labor. We are turned loose to compete. We are competing to-day with as deadly competition as our manufacturing friends would compete with if we were under free trade.

Mr. President, what is fair for one of these great industries is fair for the other. If the farmer must endure free trade and foreign competition, why can not the manufacturers of the country do it? If the manufacturers are to be protected, why, then, should not the farmers be protected? The Senate has refused to protect the farmer. Then, in God's name, do not tax him after you have refused him protection and left him to struggle with free trade.

Mr. PERKINS. Mr. President, the argument of my friend from North Carolina is ingenious, if not specious. There is, I venture to say, not a sack of guano put up in a new sack. It is sacked, I know, on the western side of the continent in second-hand sacks, and they are permitted to come into this country free of any duty. On the western coast, in California and Oregon, we are deeply interested in the grain-bag business, probably more so than in any other half dozen States combined, as we have none of the grain elevator and car transportation service in bulk, as they have in the Middle, Western, and Atlantic Coast States.

Three years since, when this question was up for consideration, I voted with my colleague to place grain bags, burlap sacks, upon

the free list. I did so in response to a joint resolution of the legislature of California passed instructing their Senators and requesting their Representatives in Congress to do so, and I voted accordingly. At the last session of the legislature I received various communications upon the subject-matter, especially from the farmers, from the different granges of our State.

I want to say, parenthetically speaking, that there is no interest in this country with which I am more deeply in sympathy than with the agricultural and the horticultural and the viticultural interests of the country. As an evidence of that fact, during the past two weeks, while discussing the agricultural sections of the bill, I have not cast one vote that I did not believe to be in the interest of the agriculturists of our State, and I would not vote for this duty did I believe that it would cost the farmer for his grain bags one-tenth of a cent more than he is now paying.

But as a matter of fact, Mr. President, there is no trust more powerful than the grain-bag trust of the world, not of the United States, not of Scotland alone, but of India. They control all the manufacture of burlaps in the world to-day. On the western coast, in Oregon and California, the broker, the dealer in grain bags, gives his order one year or eighteen months, and sometimes two years, in advance for the product of the loom of some particular manufacturer of grain bags. Like all other combinations of capital, for there is nothing more powerful than $1,000,000 except it be $2,000,000, they buy the product of those looms and it is brought in by speculators, by a trust, a combination, and they control the grain market according to the supply and demand.

Years ago in California I have seen the price of grain bags go from 5 to 9 cents, and I have bought them by the million, for I dealt in them for many years, having been engaged in the milling and shipping business. The price went from 5 cents to 9 cents, just as my friend from Arkansas read a letter to show that the price had advanced in Oregon. It is not because of the tariff. There are millions of bags in Oregon and California to-day, but they are controlled by a combination, a trust, and they will extort from the farmer, as any other monopolist will, the last farthing.

The problem was discussed in our State and a solution was sought. When I had the honor of occupying the chair of chief executive of the State we adopted a new constitution which prohibited the working of convicts in the manufacture of any article that came into competition with any established manufactory in the State. It was a serious question what we should do to find employment for our convicts in the prisons, numbering 3,000 or more. Finally, after consulting with representative farmers and manufacturers in the State, we resolved and determined that we would establish in our State prison a large manufactory of jute bags, and we did so, and it is in successful operation to-day, giving employment to 1,500 or 2,000 convicts.

That has done more to break up the trust in bags and done more to make an equitable price to the farmer than all the tariff bills we have ever enacted in the history of the country. The board of prison directors in California will not sell to any monopolist or to any special broker beyond a limited number of bags, but they will sell to the farmer five or ten thousand bags, such as the necessities of his crop may require and demand. The result is that we have kept the prices down, and it has been the safety valve which has protected our people from the monopolists and from the combinations.

Three years ago, when I was voting for free bags, my friend from Connecticut said to me, "You will not get your grain bags for your farmers any cheaper by that vote;" and I believed he was right. At all events, while the price has been lowered, it has been simply because the speculators had purchased them in large quantities and controlled them, until finally the advances had been so great that they were obliged to sell them in the market to make good the advances which the banks and moneyed institutions had given them.

We have in the Wilson law, and I think in the pending bill, a provision for a drawback upon grain bags, the same as we have upon tin and some other articles that are imported into this country. Now, on the millions of tons of grain that California sends to Europe in grain bags, a rebate is given, and the farmers get the benefit of that drawback of the duty which has been paid; but the second-hand bags, as I said before, have been sent into this country and are coming here daily by the tens and hundreds of thousands, and coming in free, and my friend and his constituents in North Carolina pay no duty upon those bags that bring the fertilizers to their doors.

Mr. President, I repel the imputation that Republicans are not the friends of the agriculturists of this country. They realize and recognize that agriculture is the true source of wealth to the yeomanry of our country. The boys and girls who grow up and are reared upon the farm make the best citizens, and that man is untrue to his pledge, untrue to his duty as a representative of the people, if he casts his vote for any measure which tends to depress agriculture, horticulture, viticulture, or the pursuits of any of the yeomanry who are cultivating the soil.

What we want to do is to pass laws, if we can do so, which will prevent capital from buying up and controlling any one article that the people demand. The only way to do that is by competition. There is not a merchant in this country, I care not how philanthropic he may be, if he has all the grain bags in any community, who will not make the man who wants those bags pay a good, liberal price for them, even if on the following Sunday he makes a contribution to the poor in a public manner, that he may win some applause from it.

To-day we are at the mercy of the great bag-manufacturing trust of Calcutta and of Bombay. What we ought to do is just what California has done in her State prison—manufacture the bags from the free jute that comes into this country and sell the bags to the farmers at such a price as will prevent men from speculating in and buying up the product of any one factory.

For these reasons I justify my vote in standing by the report of the Finance Committee upon this schedule.

Mr. TILLMAN. Did I understand the Senator from California to say that his object in voting for this duty is to protect the convicts of California? Is that the kind of labor you are trying to protect?

Mr. PERKINS. Mr. President, my friend the Senator from South Carolina was the honored chief executive of his great State and discharged the duties of that office with great credit and honor to himself, as well as to the satisfaction of the people, but I do not believe while in occupying that seat, during his administration, or since then, that he has favored convicts remaining idle in their cells or in the prison yard, and the yeomanry, the farmers of the country, working to support them in their idleness.

No, Mr. President; I believe in true, honest American citizenship. I believe in the honest man having a chance to work and earn sufficient to support himself and family, and I believe in erecting a barrier which will prevent the cooly and peon labor of the East Indies and China coming into competition with him.

Mr. TILLMAN. I am obliged to my friend the Senator from California for the complimentary manner in which he has been pleased to speak of my administration as governor of South Carolina; but I really thought, from the professions and protestations, and the oaths, almost, that we have heard here in regard to protecting American labor, that we are at least protecting the honest worker and not the criminal.

Now, in regard to the question of fertilizers and guanos, I will say that our State consumes 250,000 tons of commercial manures, and the character of the bulk or a large portion of this is such that it has to be made with sulphuric acid to render the phosphates soluble; and it is impossible to use any but the very best material, otherwise the bags would be rotted and eaten up almost before you could get the fertilizer on the farm. Commencing in January and February, it is sent out from the factories in new burlaps and distributed into the furrows for the cotton crop.

Mr. WHITE. The Senator from South Carolina will allow me to call his attention to paragraph 470, which is the drawback paragraph of this bill. The committee in charge of the measure have eliminated the drawback feature, so that there is no drawback, and they get an advantage of the farmer to the extent of 100 per cent in this case.

Mr. TILLMAN. They always get the advantage of the farmer a hundred per cent or 200 per cent or as many per cent as they can. He is "the forgotten man" who is never cared for in your legislation. It is not the ordinary taxpayer, but the farmer, who is not considered as worthy of attention on the part of the United States Senate.

Mr. BUTLER. May I ask the Senator how many second-hand guano sacks he has ever seen used in his State?

Mr. TILLMAN. A man who should undertake to send into South Carolina fertilizers in anything but brand-new burlap sacks would be considered an idiot, because the product would be spilled in the cars and on the floors of the depots and the platforms, and could not reach the farmer at all.

Mr. BUTLER. That is correct. I never in my life saw a second-hand bag used for fertilizers.

Mr. TILLMAN. It simply means, if the Senator will permit me, that the people of my State are to pay at least 15 cents a ton additional to some monopoly or to the convicts of California under the pretense of protecting American labor.

Mr. BUTLER. Twenty cents.

Mr. PERKINS. I only want to say one word in reply to my friend from South Carolina. The grain in bags is shipped to Liverpool, and those bags are returned free and are frequently reshipped. I do not know how the climate of North Carolina or South Carolina may affect the bags, but with us in California we send guano to the Sandwich Islands and we send it all over the State with fertilizer we get from Alaska.

Mr. TILLMAN. What kind of fertilizer—the natural or the artificial?

Mr. PERKINS. Some of it is artificially and chemically prepared from fish, and some otherwise prepared. We sent to the

Hawaiian Islands last year somewhere from five to eight thousand tons of the natural guano which came from Alaska, and also a large quantity that was manufactured from fish and otherwise chemically prepared, similar to that which is used in North and South Carolina.

Mr. TILLMAN. I understand the proportion of fertilizers that are manufactured in California is a mere bagatelle compared to what we of the South who raise cotton are forced to use. The State of North Carolina uses as much fertilizer as we do; the State of Georgia uses a third or a half more than we do, and so on until you reach the lowlands of Mississippi. This tax simply means that the million or more tons of commercial manures that are used in the South must pay from 15 to 20 cents a ton additional to some trust or to the convict labor of California.

Mr. STEWART. Mr. President, I have never been able to appreciate any compensating advantages to anybody by the tariff on jute bagging. The question has often been up and discussed in this body. The number engaged in the industry is comparatively very small. The industry is not of any special benefit to the country; but this is a direct tax upon the farmer. I do not think we ought to levy this tax, and I shall feel compelled to vote, as I did before, for free bagging. I think it is a duty that we ought not to levy unless for good and sufficient reasons. If there are any such, I should like to hear them. If there is any great industry subserved by this tax, I should like to know it, because it is imposed upon a class of people who do not receive any special benefit or any equal share in the benefits of the tariff.

Since the duty has been taken off, they have been manufacturing it in the penitentiaries, I believe, in California and in Washington.

Mr. TILLMAN. The big monopoly is in Brooklyn.

Mr. STEWART. That monopoly can go into something else. That monopoly did no good. The great mass of the employees in that industry, as I recollect, upon investigation were shown to be Chinamen, and there is no particular advantage from it. The industry is of no particular benefit to the Pacific Coast. Still it is a tax upon the farming industry. I think this is a case where we might leave off this duty and relieve the farmer of a substantial burden. I believe it will popularize the tariff, and it will be a good thing to do.

My friend from California [Mr. PERKINS] says that the Republican party is the friend of the farmer in imposing tariffs, and that they intend to give a tariff on wool and on hides. He says the Republican party intends to favor the farmer in raising these articles. The farmers in nearly every State raise cattle, and they are as much deserving of protection as the laborer in the States where they raise other articles on which protection is given.

Mr. PERKINS. I think the Republican party will do something for wool in this tariff.

Mr. STEWART. I hope they will.

Mr. PERKINS. That will help my friend from Nevada.

Mr. STEWART. I hope they will do something for wool, and I hope they will do something for hides.

Mr. BUTLER. If the Senator from Nevada will pardon me a moment, I should like to ask the Senator from California, if the wool raisers are so industrious as to raise enough wool to supply this country and export their surplus, whether the Republican party in this bill should not give them an export bounty?

Mr. PERKINS. In answer to my friend, I will say that the Republican party has always been equal to every emergency; and the brightest pages in the history of this nation record what the Republican party has done for the people of our country.

Mr. BUTLER. The farmer is obliged to pay an enhanced price on everything he needs by reason of your duties on imports, and on account of the mere fact that he is obliged to export his cotton, you punish him for raising enough cotton to turn the balance of trade in favor of your country.

Mr. PERKINS. I will say to my friend that we are building factories in South Carolina and Georgia and employing the people there in manufacturing our cloth, and the manufacturers, the yeomanry, and the workingmen of the country are buying that cloth and paying you splendid prices for it; and that, as the Senator says, goes to make up the surplus that puts so much ready cash in the locker.

Mr. BUTLER. We are paying a splendid price for the cotton cloth we buy under this protective system, but the farmer sells his cotton for the use of the factory at the same price he has to sell it for in Liverpool and other competing free-trade markets of the world; and sells it for just the same price as if you were to bring in the pauper labor of India and set it down by the door of the American laborer, whom you do not protect.

Mr. PERKINS. We are trying to protect him, and if the Senator will extend the right hand of help to us, I think we can do something for North Carolina. I certainly want to see cotton sell for a good price. I want to see the farmer receive a remunerative reward for his service in tilling the soil, and I will vote with the Senator for any measure of that kind he may propose. The other day I proposed to vote with him for an export bounty if he would consent that articles on which bounty was given should be sent in American vessels, built by American mechanics, and manned by American citizens; but my friend would not vote with me on that proposition. He wanted to give this export bounty to foreigners—to Englishmen and Germans and Japanese. I am not in favor of that.

Mr. STEWART. I have given way a long while, and have heard a very extravagant eulogy of the Republican party.

Mr. BUTLER. Will the Senator from California reply to the statement that I made in regard to the way in which the price of cotton in the South is regulated?

Mr. STEWART. Oh, no; he will not reply to that.

Mr. BUTLER. Well, will you reply to it?

Mr. PERKINS. I will say to my friend——

The PRESIDING OFFICER (Mr. BERRY in the chair). The Senator from Nevada [Mr. STEWART] is entitled to the floor. Does the Senator yield?

Mr. STEWART. No; I do not care about that; that is an outside question.

The PRESIDING OFFICER. The Senator from Nevada is entitled to the floor.

Mr. STEWART. The Senator from California [Mr. PERKINS] has taken occasion to glorify the Republican party and to say that its record was bright. I do not want the Senator to leave now, because if the Republican party has a splendid record and if the record is all right——

Mr. PERKINS. I am always with you. I am like the principles of the Republican party—not for a day, but for all time.

Mr. STEWART. Are you for the free and unlimited coinage of silver by the United States alone, as you were formerly, or have you changed? [Laughter.]

Mr. PERKINS. I will say when silver is worth $1.20 an ounce, then I shall be in favor of the free and unlimited coinage of silver at 16 to 1; but when it is only worth 60 cents an ounce, I must do the same as my friend from Nevada did when he was the judge of a court, take the question under advisement.

Mr. STEWART. Have you not been several times in the last few years in favor of the free and unlimited coinage of silver at 16 to 1?

Mr. PERKINS. That was when I was short on silver. [Laughter.]

Mr. STEWART. Well, then, if the record of the Republican party is glorious, you must have some blots on your record. [Laughter.]

Mr. PERKINS. I am like my friend from Nevada, not infallible. He was here prior to me. I tried to imitate his example in 1874, when he was here and participated in the passage of the law which demonetized silver.

Mr. STEWART. My friend is mistaken. He never has imitated that example until recently. He is now a goldbug. What he sets, however, is a false example, I never set it. I never advocated the gold standard as against silver. The whole thing is a bald falsehood.

Mr. PERKINS. Did my friend vote against the measure at that time?

Mr. STEWART. Against what?

Mr. PERKINS. Against demonetizing silver.

Mr. STEWART. I had no opportunity.

Mr. PERKINS. My friend was a member of the Senate at that time, and I was not.

Mr. STEWART. But you knew as much about it in California as the Senators did here. If demonetization was in the bill they did not know it. How it got there nobody has ever explained. That it was put there clandestinely there can be no doubt. During the whole discussion in the Senate, for days and months, back and forth, with regard to the codification of the mint laws, never was one word said or intimated to the effect that silver was to be demonetized or that the coinage laws were to be changed. It was never mentioned in the Senate, and nobody knew of it until years after.

Do not charge me with ever having been for the demonetization of silver or with having voted for it. There was no yea-and-nay vote taken. It was passed viva voce, and nobody knew anything about it. But more recently, if I am not mistaken, the Senator has become a convert to the gold doctrine. I have understood the Senator from California was at some time a silver man, as some other Senators have been, and I now understand he is a gold man.

Mr. PERKINS. No; I believe in gold and silver.

Mr. STEWART. I can not allow anybody to state on this floor that the Republican party has a glorious record without a blot. I was forced to leave that party on account of its joining the enemies of the country to destroy silver.

Mr. CHANDLER. May I ask the Senator whether the Republican party was without a blot up to the time he left it? [Laughter.]

Mr. STEWART. No; that blot was on it and I had to leave it. It got to be the party of the enemies of the country when it joined

the English syndicates. It pretended to be for silver, but it went back on its pledges. I was with it in the convention of 1888, and was on the committee on platform, with Mr. McKinley, now President of the United States, and I drew the plank, which was unanimously adopted, that the Republican party was in favor of the use of both gold and silver as money, and that it condemned the action of the Democratic Administration in its efforts to demonetize silver. After that was done and the President was elected on that platform, the Republican party followed in the track of the Administration which had been condemned, and made every effort that it could to destroy silver as a money metal. The President, it is true, signed the Sherman Act. They got the McKinley bill with the understanding that the act should be executed.

Mr. CHANDLER. The Wilson bill.

Mr. STEWART. No; the McKinley bill was what he wanted—I refer to Mr. Harrison—to get through, with the understanding that it should be executed; but they never executed it in good faith for one hour. In the first place, they formed a syndicate—the Director of the Mint did it—to put down the price of silver. All the silver-buying countries in the world selected a London agent, and he cooperated with the Director of the Mint to fix the price of silver and put it down. The Executive "beared" the price of silver all the while, and then, contrary to the pledge that they would use silver as money, in 1891, after that act was passed and after it had been in force a year, the question arose whether he was to obey it or whether he would give an option to the creditor to demand gold. The law itself gave the option to the Government to redeem its obligations, its Treasury notes, in gold or silver. That option had been maintained in every act.

The question arose under Harrison's Administration whether we should exercise that option for the benefit of the Government and use silver as money. The Secretary of the Treasury went to New York on the 17th of November, 1891, and at the bankers' dinner, in reply to a question, said that the option to take gold would be accorded to the creditors of the Government. The President, in his annual message thereafter, said that this assurance had done much to sustain the business of the country, and that the power of the Government would be used to the utmost extent to carry it out, thus repudiating silver, and repudiating the platform upon which he was elected.

When I found that the Republican party would not act in good faith, would not stand by its solemn pledges, that it indorsed the infamous crime by which silver was demonetized, joined with the enemies of the country, and was bringing ruin to every household, I could not, as an honest man, stay with it.

Finally, the issue has been drawn broad and deep between the Republican party and the people. The Republican party has been perfidious to the people on this great question. The people themselves were forced to draw the line between the old parties, and they drew it at the Chicago convention. The English toadies and bank syndicates of London and of New York were kicked out, and a platform promulgated which was another declaration of independence, and which will be ratified ultimately by the American people.

The Democrats did that. The silver Republicans flocked to them and the Populists flocked to them and joined in the grand fight that was made, and but for money, but for coercion, and but for unfair dealing, they would have won the election by an overwhelming majority. While they had no money on the side of the people, the other side had what? They had, it was variously estimated, from eighteen to forty million dollars, and after the election was over the press of the East glorified themselves in having secured nearly the solid foreign vote—the votes of men who had not been here long enough to understand our institutions, who had come into the cities. The foreigners do not have the opportunity they formerly had, when they used to settle in farming communities, of becoming Americanized.

When they settle in the cities, they become dependent upon capital, and they can be herded and used as they were herded and used in the last campaign. Without this vote, without intimidation, and without fraud the Republican party would have been overthrown, not on account of its former record, not for the glorious deeds connected with that party, not for its patriotism in the past—for it started as the party of the people and it made a glorious record—but for its subsequent misdeeds and for collusion with the enemies of the country. I say the Republican party has not a good record now, and it can not justify itself in doing wrong by pleading former good character. Good character may be sacrificed by anyone by the commission of crime; but when the Republican party joined hands with the conspirators who struck down silver, enhanced the price of money, depreciated the price of property, and enslaved mankind, it became the slave party and not the friend of liberty.

The Republican party, with all its glorious record for liberty, has done more for slavery than it has done for liberty. It has done more for slavery in the last twenty years than it ever did for liberty before that. Only 4,000,000 slaves in the South were liberated; but the Republican party was the first party in this country to join England to enslave the world. By its influence other nations have been brought in, until almost the whole human race is groaning under the fetters that the Republican party was mostly instrumental in forming and forging.

There is less of hope, less of freedom, less of spirit in this world to-day than there has been for the last one hundred years. Wages in the Old World are at starvation prices; whole continents are enslaved; there are 350,000,000 slaves in India. Egypt has been enslaved for the last fifteen years by this same despotic power, and the same power is vindicating the right of the Turks to trample upon the Christians and upholding barbarities which are protested against by the whole Christian world. The same party, with such a record, is fighting to have slavery everywhere.

It is the party that has taken from the youth of this land the opportunities they enjoyed from the first discovery of America, until now there is not a vocation open to a young man to make a home for his family. Every avenue is closed; all opportunities are gone by reason of falling prices created by the destruction of one-half of the supply of standard money. The Republican party stand by that—stand by it why? They will stand by it so long as England will, and everybody knows that England will stand by it so long as she is the greatest creditor nation in the world.

Look at her vast dominion; see the effect of it; look at the condition of this country now, compare it with what it was twenty years ago, and tell me of any other cause of the present condition except that the Republican party has destroyed the money of the Constitution. What has done it? What has produced this universal distress? What has placed the world on the highroad to slavery again but the cooperation of the Republican party with an alien syndicate in London to impoverish the world and enslave mankind? I do not like that record. I regret more than anybody else that it has been made. I wanted to live and die in the Republican party, for the Republican party was very dear to me; but I could not stand by and see these wrongs perpetrated and stay with it without a protest, and I will protest while I live against the wrongs perpetrated by the Republican party, no matter what its former record may have been.

Mr. PETTUS. Mr. President, I propose that we now return to bagging and burlaps and bags. I have a matter of quarrel with the Senator from California [Mr. PERKINS]. I do not know what was his object in bringing this red rag into this discussion. I really think he would have treated us more fairly if he had stuck to his penitentiary and his imported burlaps.

Just here it would be a very interesting thing to know—though I do not feel at liberty to inquire—whether the legislature of California which instructed its Senators to vote for free bags has ever changed that instruction. The distinguished and venerable Senator from Nevada [Mr. STEWART], as well as I, had some acquaintance with that country several years ago. We found many hard-headed, clear-headed, iron-willed people there; and I suppose that when they gave those instructions they expected their Senators to comply with them; and if they gave them, just as sure as you live they gave them with a continuando, and not for to-day or to-morrow.

Mr. President, let us come back to bags and cotton bagging. I am not going to make any assault on the Republican party this evening. I am perfectly willing to put off the free coinage of silver until to-morrow morning after breakfast, if we can only get our Republican friends to do one modicum of justice toward those farmers—I just want a modicum. There is no pretense that the motion to strike out this paragraph in any way conflicts with this delightful doctrine of protection. I would not presume to ask Senators on the other side to allow this motion to be agreed to if it did. I would know in advance that they would not do it.

I do not want to assault the Republican party this evening, because I want to persuade Senators that, as this motion does in no way conflict with their favored doctrine of protecting manufactures, they should allow it to pass. The retention of the paragraph can not possibly do their party any good; it can not possibly tend to popularize the tariff bill which they are enacting to put this tax on the farming interest. It can not possibly do so; and really, when I made the motion, I had hoped that the distinguished Senator from Iowa [Mr. ALLISON], with his clear head, would have proposed to us to adjourn this matter over until he could consult with those for whom he is acting, and I should have joined him at once.

Really, with his clear head as to political effects, and his undoubted knowledge of what is good for his party, I had hoped that he would say, "Well, let us consult about it in our private consultation room." I should have been delighted to have heard him say that, because it would then have given me some hope that there was this little particle of justice—not protection—but this small degree of justice toward the mass of the people of the United States, who would have been protected by his consent; but when the

Senator from California [Mr. PERKINS] came into the lists, I saw that he wanted protection for his penitentiary, that he wanted protection against this cooly labor for his penitentiary labor.

Mr. President, I am in serious thought about this matter. I am not jesting about an important matter of this sort. I hope yet the Senators who have the absolute control here will consider this question seriously and see how it affects every farmer in the country. You have been told of the wheat which is put in these bags. Well, I suppose the wheat has to be done up in clean bags; I am willing that it should be. I am willing that California should make its wheat bags in its own penitentiary. We all know that there are thousands of other uses by farmers, besides the bagging of wheat and sending it to market, for those bags.

You have been told by the Senator from South Carolina [Mr. TILLMAN] that they use it in bagging their fertilizers in that State. Yes, they use it in bagging their fertilizers in all the other Southern States, at least, and it costs them just that much more. It is a tax that you propose to put on the farmers in the West who also use bagging. All wheat is not shipped in bulk, even in the West. You gentlemen who live in the cities may think that unless the wheat goes to your cities and so on to the nations of the world there is none used. There is hardly a farmer in the country who does not use these bags, and a number of them, for his domestic purposes on his plantation. Did you never hear of a man by the name of Henry Clay, who rode to the mill on a meal bag?

Mr. HOAR. May I inquire if it is the eminent protectionist of that name to whom the Senator refers?

Mr. PETTUS. I have heard that he was a protectionist incidentally.

Mr. HOAR. We have heard of him.

Mr. PETTUS. But I never did hear that he was a protectionist for the sake of protection. I never heard that. But he rode on a meal bag; he carried his wheat to mill, and I tell you, sir, there are thousands of others carrying their wheat to mill the same way to-day in the agricultural regions of this country.

These bags are used also for the bagging of cotton seed and of cotton-seed meal. It is never shipped in bulk, but is shipped in sacks, and a vast number of sacks are used in that way, and they are used in every one of the cotton States. It is a vast industry. You are taxing the farmer on that.

Now, I want to ask the Senators upon the other side of the Chamber to try in this one instance to give the farmer some slight degree of relief from the oppressive taxes which are put upon him. If you will do that, every farmer in the land will thank you for that, whatever they may say about you in reference to other things.

The PRESIDING OFFICER. The question is on the amendment of the Senator from Alabama [Mr. PETTUS], to strike out paragraphs 341 and 342.

Mr. PETTUS. On that amendment I call for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. CLAY (when his name was called). I transfer my pair with the junior Senator from Massachusetts [Mr. LODGE] to the Senator from Delaware [Mr. KENNEY], and vote "yea."

Mr. DANIEL (when his name was called). I am paired with the Senator from North Dakota [Mr. HANSBROUGH]; otherwise I should vote "yea."

Mr. JONES of Arkansas (when his name was called). I am paired with the Senator from Maine [Mr. HALE], but I transfer that pair to the Senator from Missouri [Mr. COCKRELL], both Senators being absent.

Mr. FRYE. The Senator from Missouri [Mr. COCKRELL] and my colleague [Mr. HALE] are engaged in committee on the deficiency bill.

Mr. JONES of Arkansas. Those Senators are paired for the day, and therefore I am at liberty to vote, and vote "yea."

Mr. MALLORY (when his name was called). I am paired with the Senator from Vermont [Mr. PROCTOR]. If he were here, I should vote "yea."

Mr. PENROSE (when his name was called). My pair with the Senator from Delaware [Mr. KENNEY] having been transferred to the Senator from Massachusetts [Mr. LODGE], I am at liberty to vote, and vote "nay."

Mr. SEWELL (when his name was called). I am paired with the Senator from Wisconsin [Mr. MITCHELL]. If he were here, I should vote "nay."

Mr. BERRY (when Mr. WALTHALL'S name was called). The Senator from Mississippi [Mr. WALTHALL] is unavoidably absent to-day, and is paired with the Senator from Wisconsin [Mr. SPOONER]. If the Senator from Mississippi were here, he would vote "yea."

The roll call was concluded.

Mr. ELKINS (after having voted in the negative). I voted inadvertently. I am paired with my colleague [Mr. FAULKNER], who is not present; and therefore I withdraw my vote.

Mr. BATE. I wish to announce that my colleague [Mr. HARRIS] is unavoidably absent. He is paired with the Senator from Vermont [Mr. MORRILL]. If my colleague were here, he would vote "yea."

Mr. HARRIS of Kansas (when his name was called). I am paired with the junior Senator from Wyoming [Mr. CLARK], but I transfer that pair to the Senator from Nebraska [Mr. ALLEN], and vote "yea."

Mr. DANIEL. I transfer my pair with the Senator from North Dakota [Mr. HANSBROUGH] to my colleague [Mr. MARTIN], and vote "yea."

Mr. MORGAN. I am paired with the Senator from Pennsylvania [Mr. QUAY]. If he were present, I should vote "yea."

Mr. CHANDLER (after having voted in the affirmative). Would it be in order, Mr. President, for me to ask what the question is upon which we are voting?

The VICE-PRESIDENT. Upon the motion to strike out paragraphs 341 and 342.

Mr. CHANDLER. Who made the motion?

The VICE-PRESIDENT. The Senator from Alabama [Mr. PETTUS].

Mr. CHANDLER. I wish to withdraw my vote in the affirmative. I vote "nay."

Mr. PASCO. I suggest to the Senator from West Virginia [Mr. ELKINS], who is paired with his colleague [Mr. FAULKNER], that we transfer our pairs, so that his colleague will stand paired with the Senator from Washington [Mr. WILSON], with whom I am paired.

Mr. ELKINS. That is agreeable to me, and I vote "nay."

Mr. PASCO. I vote "yea."

The result was announced—yeas 31, nays 28; as follows:

YEAS—31.

Bacon,	Gray,	Mills,	Stewart,
Bate,	Harris, Kans.	Murphy,	Teller,
Berry,	Heitfeld,	Pasco,	Tillman,
Butler,	Jones, Ark.	Pettigrew,	Turner,
Chilton,	Kyle,	Pettus,	Turpie,
Clay,	McEnery,	Rawlins,	Vest,
Daniel,	McLaurin,	Roach,	White.
Gorman,	Mantle,	Smith,	

NAYS—28.

Allison,	Fairbanks,	Hoar,	Platt, N. Y.
Burrows,	Foraker,	McBride,	Pritchard,
Chandler,	Frye,	Mason,	Shoup,
Cullom,	Gallinger,	Nelson,	Thurston,
Davis,	Gear,	Penrose,	Warren,
Deboe,	Hanna,	Perkins,	Wellington,
Elkins,	Hawley,	Platt, Conn.	Wetmore.

NOT VOTING—30.

Aldrich,	Faulkner,	Lodge,	Quay,
Allen,	George,	McMillan,	Sewell,
Baker,	Hale,	Mallory,	Spooner,
Caffery,	Hansbrough,	Martin,	Walthall,
Cannon,	Harris, Tenn.	Mitchell,	Wilson,
Carter,	Jones, Nev.	Morgan,	Wolcott.
Clark,	Kenney,	Morrill,	
Cockrell,	Lindsay,	Proctor,	

So the amendment was agreed to.

Mr. JONES of Arkansas. My impression was that paragraph 339 was included in the motion to strike out, but I understand it was not so put by the Chair. I move to strike out paragraph 339.

The VICE-PRESIDENT. The question is on the motion of the Senator from Arkansas to strike out paragraph 339.

Mr. WHITE. Was paragraph 342 included in the motion to strike out?

The VICE-PRESIDENT. The Chair understands that paragraphs 341 and 342 were included in the motion.

Mr. BUTLER. I submitted an amendment to the tariff bill to strike out paragraphs 339, 341, and 342, of which I gave notice some weeks ago. I called the attention of several Senators to the fact that the motion made by the Senator from Alabama did not cover one of the paragraphs which affects jute bagging; and it was suggested to me to let the motion stand as it had been made, and to make a motion covering paragraph 339 later. I see the Senator from Arkansas has now made that motion. The three paragraphs should share the same fate

Mr. JONES of Arkansas. There can be no objection, the other two paragraphs having been stricken out, to striking out paragraph 339.

The VICE-PRESIDENT. The question is on the amendment proposed by the Senator from Arkansas [Mr. JONES] to strike out paragraph 339.

Mr. ALLISON. I call for the yeas and nays.

Mr. JONES of Arkansas. Very well; let us have the yeas and nays.

The yeas and nays were ordered.

Mr. BUTLER. I want to state that it is very unfortunate that paragraph 339 was not included with paragraphs 341 and 342; for if the Senate now refuses to strike out paragraph 339, it would destroy practically the advantage gained by striking out para-

graphs 341 and 342, because jute would be imported under paragraph 339 instead of under paragraphs 341 and 342, and it would be a very easy matter to have most of it classed under paragraph 339. Therefore, unless this paragraph is stricken out, we practically lose whatever benefit would come from striking out paragraphs 341 and 342.

Mr. PETTUS. Paragraphs 341 and 342 were stricken out with the view that the articles embraced therein should be put on the free list. That was the express declaration at the time.

Mr. BERRY and Mr. WHITE. That will come up later.

The Secretary proceeded to call the roll.

Mr. HARRIS of Kansas (when his name was called). I transfer my pair with the Senator from Wyoming [Mr. CLARK] to the Senator from Nebraska [Mr. ALLEN], and vote "yea."

Mr. MORGAN (when his name was called). I am paired with the Senator from Pennsylvania [Mr. QUAY].

Mr. PASCO (when his name was called). I make the same statement as before. I have exchanged pairs with the Senator from West Virginia [Mr. ELKINS], and I vote "yea."

Mr. TURNER (when his name was called). I am paired with the Senator from Wyoming [Mr. WARREN]. I do not see him in the Chamber, and withhold my vote. If he were here, I should vote "yea."

The roll call was concluded.

Mr. HANSBROUGH. I am paired with the senior Senator from Virginia [Mr. DANIEL].

Mr. BURROWS (after having voted in the negative). I desire to announce that I have a permanent pair with the senior Senator from Louisiana [Mr. CAFFERY], but I have transferred my pair to the Senator from Nevada [Mr. JONES], and I have voted.

Mr. CULLOM (after having voted in the negative). I am paired with the senior Senator from Delaware [Mr. GRAY]. I understand that the Senator from Montana [Mr. CARTER] is absent without a pair, and I will therefore take the liberty of transferring my pair with the Senator from Delaware to him, and let my vote stand.

Mr. TURNER. I transfer my pair with the Senator from Wyoming [Mr. WARREN] to the Senator from Virginia [Mr. MARTIN], and I vote "yea."

Mr. HANSBROUGH. I will transfer my pair with the Senator from Virginia [Mr. DANIEL] to the senior Senator from Montana [Mr. CARTER].

Mr. WHITE. A transfer has already been made.

Mr. BERRY. The Senator from Illinois [Mr. CULLOM] has just transferred his pair with the Senator from Delaware [Mr. GRAY] to the Senator from Montana [Mr. CARTER].

Mr. HANSBROUGH. Very well; I will let my pair stand.

Mr. PENROSE (after having voted in the negative). I ought to state that I voted under the same arrangement already stated as to my pair.

Mr. CLAY (after having voted in the affirmative). As I understand the junior Senator from Massachusetts [Mr. LODGE] will stand paired with the Senator from Delaware [Mr. KENNEY], I will let my vote stand.

Mr. WARREN. I vote "nay."

Mr. TURNER. I announced my pair with the Senator from Wyoming [Mr. WARREN], and later on transferred my pair to the Senator from Virginia [Mr. MARTIN] and voted.

Mr. WARREN (after having voted in the negative). If my pair has been transferred, I will withdraw my vote, of course. I came in the Chamber, and seeing the Senator from Washington [Mr. TURNER] I presumed that I was at liberty to vote.

The VICE-PRESIDENT. The Senator from Wyoming withdraws his vote.

The Secretary recapitulated the vote.

Mr. WARREN. With permission, I will transfer the pair arranged between the Senator from Virginia [Mr. MARTIN] and myself, and let the Senator from Virginia [Mr. MARTIN] stand paired with the Senator from Kansas [Mr. BAKER]. I vote "nay."

Mr. PETTUS. To whom was the Senator's pair transferred?

Mr. BERRY. To the Senator from Kansas [Mr. BAKER].

The result was announced—yeas 29, nays 28; as follows:

YEAS—29.

Bacon,	Heitfeld,	Pasco,	Tillman,
Bate,	Jones, Ark.	Pettigrew,	Turner,
Berry,	McEnery,	Pettus,	Turpie,
Butler,	McLaurin,	Rawlins,	Vest,
Chilton,	Mallory,	Roach,	White.
Clay,	Mantle,	Smith,	
Gorman,	Mills,	Stewart,	
Harris, Kans.	Murphy,	Teller,	

NAYS—28.

Allison,	Fairbanks,	Hoar,	Platt, N. Y.
Burrows,	Foraker,	McBride,	Pritchard,
Chandler,	Frye,	Mason,	Proctor,
Cullom,	Gallinger,	Nelson,	Shoup,
Davis,	Gear,	Penrose,	Thurston,
Deboe,	Hanna,	Perkins,	Warren,
Elkins,	Hawley,	Platt, Conn.	Wetmore.

NOT VOTING—32.

Aldrich,	Daniel,	Kenney,	Morrill,
Allen,	Faulkner,	Kyle,	Quay,
Baker,	George,	Lindsay,	Sewell,
Caffery,	Gray,	Lodge,	Spooner,
Cannon,	Hale,	McMillan,	Walthall,
Carter,	Hansbrough,	Martin,	Wellington,
Clark,	Harris, Tenn.	Mitchell,	Wilson,
Cockrell,	Jones, Nev.	Morgan,	Wolcott.

So the motion of Mr. JONES of Arkansas to strike out paragraph 339 was agreed to.

Mr. PETTUS. I now move that the articles embraced in paragraphs 341 and 342 be placed on the free list.

Mr. WHITE. I suggest that that motion will be in order later on, not now.

Mr. ALLISON. I suggest to the Senator from Alabama that that motion is not in order now.

Mr. JONES of Arkansas. We have not yet reached the free list.

Mr. ALLISON. It will be in order later on.

The next amendment of the Committee on Finance was, on page 111, to strike out the following paragraph:

343. Handkerchiefs, composed of flax, hemp, ramie, or other vegetable fiber, except cotton, whether in the piece or otherwise, and whether wholly or partly finished, if not hemmed, or hemmed only, 50 per cent ad valorem; if hemstitched or imitation hemstitched, or revered, or have drawn threads, but not embroidered, 55 per cent ad valorem.

And in lieu thereof to insert:

343. Handkerchiefs composed of flax, hemp, or ramie, or of which these substances, or either of them, is the component material of chief value, whether in the piece or otherwise, and whether finished or unfinished, not hemmed or hemmed only, 50 per cent ad valorem; if hemstitched, or imitation hemstitched, or revered, or with drawn threads, but not embroidered or initialed, 55 per cent ad valorem.

Mr. JONES of Arkansas. I move to strike out "fifty" and insert "forty" in the committee amendment, line 4; and in line 6 I move to strike out "fifty-five" and insert "forty."

The VICE-PRESIDENT. The question is on the amendment of the Senator from Arkansas to the amendment of the committee.

Mr. JONES of Arkansas. In this connection, without asking the Senate to hear it read, I will insert in the RECORD an extract which I have taken from the New York Journal of Commerce. I ask that it may go in the RECORD.

The matter referred to is as follows:

[New York Journal of Commerce and Commercial Bulletin, May 29, 1897.]

OPPOSING THE SENATE TARIFF—HANDKERCHIEF IMPORTERS SAY PROPOSED RATES ARE EXCESSIVE—THE IMPOSITION OF 55 PER CENT ON LINEN HANDKERCHIEFS WOULD, THEY SAY, DISORGANIZE THE TRADE.

The imposition of 55 per cent on linen handkerchiefs would, they say, disorganize the trade.

A detailed statement of the position of the linen trade on the duties proposed by the Senate Finance Committee appeared in these columns yesterday. Importers of linen handkerchiefs are quite as bitter against the proposed rates as any other branch of the linen trade. The chairman of the handkerchief committee of the Linen Trade Association said yesterday:

"I think that 50 per cent on embroidered and 40 per cent on plain linen handkerchiefs is a high revenue tariff and can be collected. Even those rates are dangerous and there is more or less undervaluation, but when you increase the rates to 55 and 60 per cent you are putting a premium upon undervaluation, and honest merchants will not be able to do business in competition with the undervaluers.

"In view of the fact that the manufacture of linen handkerchiefs is not and, in the nature of things, is not likely to become an industry in the United States, the linen-handkerchief importers would respectfully ask that the rates of duty to be assessed on them be made in accordance with the statement submitted by the representatives of the Linen Association of New York to the Ways and Means Committee of the House of Representatives on January 11, 1897.

"The chief item in the linen-handkerchief trade is, of course, plain white hemmed and hemstitched handkerchiefs in various sizes, for men, women, and children, and taxed, under present law, at 40 per cent ad valorem. These goods are not in any sense luxuries, but necessities of the people, and as they enter in no way into competition with any domestic industry, and such industry can not be fostered by the imposition of even double the duty, we think a higher rate unnecessary. The bill now proposed puts the duty on these goods at 50 per cent for hemmed and 55 per cent on hemstitched—the latter being by far the more important line. By the McKinley tariff hemstitched linen handkerchiefs were assessed 50 per cent, and we claim that even this is an excessive rate, unless for protective purposes, which does not enter into this question at all.

"The imposition of 55 per cent on linen handkerchiefs will disorganize the entire trade, will heavily increase the cost of one of the people's necessities, and be certain to be magnified by the enemies of protection far beyond its real importance, to the injury of the party now endeavoring to foster and protect American industries.

"If it is deemed essential that a higher rate than now obtains shall be levied for revenue purposes, we would respectfully recommend that an advance to 45 per cent would be ample, with this advantage to the people, that it would cause very trifling, if any, changes in the prices of goods, while it would fairly assess for the increased needs of the Government.

"We also urge very earnestly that initial handkerchiefs be put at same rate as linen handkerchiefs, where value of initial does not exceed one-half the value of the handkerchief it is made on. The great mass of initials are little more than marks on handkerchiefs, and of far less than above relative value to handkerchief. They are not known to the trade as, nor in any sense are, embroidered handkerchiefs, and should not be classed as such.

"On embroidered linen handkerchiefs we urge that no higher duty than 50 per cent be assessed. It is a pure matter of revenue, and assessing 60 per cent, as the Dingley bill proposes, is simply offering a premium to dishonesty. Protection does not enter into the question in the least degree, the goods neither being made nor makable in this country.

"We think the rates proposed in the Dingley bill are unwise and impolitic. They are sure to cause reaction in public sentiment, now unmistakably in

favor of reasonable protection wherever needed, and invite changes and reductions as soon as power changes hands. The country demands stable and settled conditions, as their absence prevents the return of the good times of 1892 and previous. And if moderate views prevail, and the present or a small revenue rate over the present rates prevail, no interest will suffer, either nationally or private, and the resulting settled conditions will inure to the common good."

The VICE-PRESIDENT. The question is on agreeing to the amendment of the Senator from Arkansas to the amendment of the committee.

The amendment to the amendment was rejected.

The VICE-PRESIDENT. The question recurs on agreeing to the amendment of the committee.

The amendment was agreed to.

The next amendment of the Committee on Finance was, on page 112, to strike out the following paragraph:

344. Woven fabrics of flax, hemp, or ramie, or of which these substances, or either of them, is the component material of chief value, and containing more than 50 and not more than 100 threads to the square inch (counting both warp and filling) 9 cents per pound; containing not more than 59 threads to the square inch, 8 cents per pound; bleached shirting cloth, composed of flax, hemp, or ramie, or of which these substances, or either of them, is the component material of chief value, measuring not less than 35 nor more than 37 inches in width and containing more than 100 threads to the square inch (counting both warp and filling), 35 per cent ad valorem.

And in lieu thereof to insert:

344. Woven fabrics or articles not specially provided for in this act, composed of flax, hemp, or ramie, or of which these substances or either of them is the component material of chief value, weighing 4 ounces or more per square yard, when containing not more than 60 threads to the square inch, counting the warp and filling, 1½ cents per square yard; containing more than 60 and not more than 120 threads to the square inch, 3 cents per square yard; containing more than 120 and not more than 180 threads to the square inch, 7 cents per square yard; containing more than 180 threads to the square inch, 10 cents per square yard, and in addition thereto, on all the foregoing, 30 per cent ad valorem: *Provided*, That none of the foregoing articles in this paragraph shall pay a less rate of duty than 50 per cent ad valorem. Woven fabrics of flax, hemp, or ramie, or of which these substances or either of them is the component material of chief value, including such as is known as shirting cloth, weighing less than 4 ounces per square yard and containing more than 100 threads to the square inch, counting the warp and filling, 35 per cent ad valorem.

Mr. ALLISON. I wish to modify the amendment of the committee in line 2, page 113, by striking out "three," before "cents," and inserting "two and three-fourths;" in line 4, by striking out "seven," before "cents," and inserting "six;" and in line 6, by striking out "ten," before "cents," and inserting "nine;" so as to read:

Woven fabrics or articles not specially provided for in this act, composed of flax, hemp, or ramie, or of which these substances or either of them is the component material of chief value, weighing 4 ounces or more per square yard, when containing not more than 60 threads to the square inch, counting the warp and filling, 1½ cents per square yard; containing more than 60 and not more than 120 threads to the square inch, 2½ cents per square yard; containing more than 120 and not more than 180 threads to the square inch, 6 cents per square yard; containing more than 180 threads to the square inch, 9 cents per square yard, and in addition thereto, on all the foregoing, 30 per cent ad valorem.

The amendment to the amendment was agreed to.

Mr. VEST. I wish to call attention to one fact in connection with this paragraph. Under the Wilson Act—the existing law—the duty was 35 per cent ad valorem upon the articles mentioned in the paragraph. Under the amendment proposed by the majority of the committee, the duty is increased upon all the articles to 50 per cent; that is, it shall not be less than 50 per cent on all the articles mentioned in the paragraph, except shirting, upon which the tax is 35 per cent. Why is that distinction made?

Mr. ALLISON. All the other articles are more expensive than plain articles inserted in the last bracket of the paragraph.

Mr. VEST. That can not be. They can not be more expensive because some of them do not cost as much. Some of the shirtings are very fine goods, very expensive goods. I move to strike out of the paragraph, in line 2, the words "3 cents per square yard."

Mr. ALLISON. I have already had it amended by making the rate 2½ cents per square yard.

Mr. VEST. I move then to strike out "2½ cents per square yard;" in lines 4 and 5, to strike out "6 cents per square yard," and also in lines 6 and 7, to strike out "9 cents per square yard, and in addition thereto, on all the foregoing, 30 per cent ad valorem: *Provided*, That none of the foregoing articles in this paragraph shall pay a less rate of duty than 50 per cent ad valorem." It will then read: "Woven fabrics of flax, hemp, or ramie, or of which these substances," etc., down to the conclusion of the paragraph, "35 per centum ad valorem." My object is to put the existing rates of duty upon all these articles.

Mr. JONES of Arkansas. Will the Senator from Missouri allow me to suggest that I think if he will move to strike out all after the word "value," in line 22, page 112, and insert the words "35 per cent ad valorem," he will reach his purpose? In the remainder of the paragraph there are simply subdivisions as to figures. His intention is to make the rate of 35 per cent applicable to everything that follows in the paragraph, and the general language will cover it. If he will change the motion, it occurs to me he can more readily accomplish his purpose.

Mr. VEST. My recollection is—I have not looked at the law recently—that in the Wilson Act there was a special provision as to shirtings. I may be mistaken.

Mr. ALLISON. The Senator will bear in mind that in the last provision the phraseology is, "Woven fabrics of flax, hemp, or ramie, or of which these substances, or either of them, is the component material of chief value." All the other fabrics included in paragraph 344 must be either of flax, hemp, or ramie, or a mixture of them, whereas in the last paragraph there may be a mixture of cotton and flax, hemp, or ramie, or ramie may be a very small portion of the fabric.

Mr. JONES of Arkansas. The first lines of the paragraph cover that: "Woven fabrics, or articles not specially provided for in this act, composed of flax, hemp, or ramie, or of which these substances, or either of them, is the component material of chief value."

Mr. ALLISON. That means that they must be composed of these substances, or of either of them.

Mr. JONES of Arkansas. The same language is in the last part of the paragraph: "Woven fabrics of flax, hemp, or ramie, or of which these substances, or either of them, is the component material of chief value."

Mr. ALLISON. That is right.

Mr. JONES of Arkansas. It is exactly the same language.

Mr. ALLISON. It is the intention to cover only fabrics made of these articles, or of which some of them are substances of chief value. We will take the vote on the amendment of the Senator from Missouri.

Mr. VEST. I would just as soon have the vote taken on the suggestion of the Senator from Arkansas, to put in the Wilson Act, which would include shirtings.

Mr. ALLISON. The substance of the Senator's amendment is to make all these articles 35 per cent ad valorem.

Mr. VEST. Thirty-five per cent ad valorem, including shirtings.

Mr. JONES of Arkansas. I suggested that the Senator could meet his purpose by moving to strike out all after the word "value," in line 22, on page 112, and inserting "35 per cent ad valorem." That would embrace all the subdivisions.

Mr. VEST. Very well.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. After the word "value," in line 22, page 112, it is proposed to strike out the remaining portion of the paragraph and to insert the words "35 per cent ad valorem;" so as to read:

Woven fabrics or articles not specially provided for in this act, composed of flax, hemp, or ramie, or of which these substances or either of them is the component material of chief value, 35 per cent ad valorem.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the Senator from Missouri to the amendment of the committee.

The amendment to the amendment was rejected.

Mr. MILLS. I move to strike out the word "less," in the tenth line, page 113, and substitute the word "greater;" so as to read:

Provided, That none of the foregoing articles in this paragraph shall pay a greater rate of duty than 50 per cent ad valorem.

Fifty per cent is enough.

The VICE-PRESIDENT. If the Senator from Texas will withhold his amendment, the Chair will first put the question on agreeing to the amendment of the committee, to strike out paragraph 344 and insert a new paragraph as amended.

The amendment was agreed to.

The VICE-PRESIDENT. The Senator from Texas moves to strike out the word "less," in the tenth line, page 113, and insert "greater."

The amendment was rejected.

The next amendment of the Committee on Finance was, in paragraph 345, page 113, line 17, after the word "hemp," to strike out "or;" in the same line, after the word "or," to insert "other vegetable fiber, or;" and in line 20, after the word "act," to strike out "fifty" and insert "forty-five;" so as to make the paragraph read:

345. All manufactures of flax, hemp, ramie, or other vegetable fiber, or of which these substances, or either of them, is the component material of chief value, not specially provided for in this act, 45 per cent ad valorem.

Mr. JONES of Arkansas. I move to amend the paragraph by striking out "forty-five" and inserting "thirty-five," which is the present law.

The VICE-PRESIDENT. The question is on the amendment of the Senator from Arkansas to the amendment of the committee.

The amendment to the amendment was rejected.

The VICE-PRESIDENT. The question recurs on the amendment of the committee.

The amendment was agreed to.

The next amendment of the Committee on Finance was, on page 113, to strike out paragraph 346, in the following words:

346. All manufactures of jute or other vegetable fiber, except flax, hemp, ramie, or cotton, or of which jute or other vegetable fiber, except flax, hemp, ramie, or cotton is the component material of chief value, not specially provided for in this act, 40 per cent ad valorem.

The amendment was agreed to.

The reading of the bill was resumed, as follows:

Schedule K.—Wool and manufactures of wool.

Mr. VEST. We do not want to go on later this evening.

Mr. JONES of Arkansas. Does the Senator from Iowa propose to proceed further this afternoon?

Mr. ALLISON. Being Saturday afternoon, and having completed Schedule J, I move that the Senate proceed to the consideration of executive business.

Mr. MANTLE. I ask the Senator from Iowa to yield to me for the purpose of asking the present consideration of Senate bill 164.

Mr. ALLISON. I will withhold the motion for a moment.

PUBLIC BUILDING AT BUTTE CITY, MONT.

Mr. MANTLE. I ask the Senate to proceed to the consideration of the bill (S. 164) to provide for the construction of a public building at Butte City, Mont.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It directs the Secretary of the Treasury to purchase, acquire by condemnation, or otherwise provide a site, and cause to be erected thereon a suitable, commodious, and substantial building, including fireproof vaults, heating and ventilating apparatus, elevators, and approaches, for the use and accommodation of the United States post-office, internal revenue and other Government offices, in the city of Butte and State of Montana; the cost of the site and the building, including fireproof vaults, heating and ventilating apparatus, elevators, and approaches, complete, not to exceed $300,000.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

EXECUTIVE SESSION.

Mr. ALLISON. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After eight minutes spent in executive session the doors were reopened, and (at 4 o'clock and 10 minutes p. m.) the Senate adjourned until Monday, June 21, 1897, at 11 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate June 19, 1897.

CONSULS-GENERAL.

Hector de Castro, of New York, to be consul-general of the United States at Rome, Italy, vice Wallace S. Jones, resigned.

Charles L. Cole, of Pennsylvania, to be consul-general of the United States at Dresden, Saxony, vice William S. Carroll, resigned.

Charles E. Turner, of Connecticut, to be consul-general of the United States at Ottawa, Canada, vice John B. Riley, resigned.

CONSULS.

Hilary S. Brunot, of Pennsylvania, to be consul of the United States at St. Etienne, France, vice Charles W. Whiley, jr., resigned.

George F. Lincoln, of Connecticut, to be consul of the United States at Antwerp, Belgium, vice Harvey Johnson, resigned.

Walter Schumann, of New York, to be consul of the United States at Mayence, Germany, vice Perry Bartholow, resigned.

COLLECTOR OF INTERNAL REVENUE.

Albert B. White, of West Virginia, to be collector of internal revenue for the district of West Virginia, to succeed Edwin M. Gilkeson, resigned.

MARSHAL.

Addison Davis James, of Kentucky, to be marshal of the United States for the district of Kentucky, vice James Blackburn, whose term expired April 2, 1897.

REGISTER OF LAND OFFICE.

Thomas A. Roseberry, of Susanville, Cal., to be register of the land office at Susanville, Cal., vice Frank F. Peck, removed.

RECEIVER OF PUBLIC MONEYS.

Alfred H. Taylor, of Cedarville, Cal., to be receiver of public moneys at Susanville, Cal., vice James Wylie, resigned.

COMMISSIONER FOR ALASKA.

Philip Gallinger, of New Whatcom, Wash., to be a commissioner in and for the District of Alaska, to reside at Kadiak, vice Alphonso C. Edwards, resigned.

PROMOTION IN THE NAVY.

Ensign Edward Moale, jr., to be a lieutenant (junior grade) in the Navy, from the 4th day of June, 1897, vice Lieut. (Junior Grade) Lewis J. Clark, promoted.

CONFIRMATIONS.

Executive nominations confirmed by the Senate June 19, 1897.

ENVOY EXTRAORDINARY AND MINISTER PLENIPOTENTIARY.

Stewart L. Woodford, of New York, to be envoy extraordinary and minister plenipotentiary of the United States to Spain.

APPOINTMENT IN THE NAVY.

Raymond Spear, a citizen of Pennsylvania, to be an assistant surgeon.

PROMOTIONS IN THE NAVY.

Lieut. (Junior Grade) John F. Luby, to be a lieutenant.

Ensign George W. Logan, to be a lieutenant (junior grade).

Lieut. Commander Eugene de Forrest Heald, to be a commander.

Lieut. George P. Colvocoresses, to be a lieutenant-commander.

Lieut. (Junior Grade) Lewis J. Clark, to be a lieutenant.

SOLICITOR OF THE TREASURY.

Maurice D. O'Connell, to be Solicitor of the Treasury.

DEPUTY AUDITOR FOR WAR DEPARTMENT.

Daniel A. Grosvenor, of Maryland, to be deputy auditor for the War Department.

COMMISSIONERS.

Caldwell W. Tuttle, of Columbia City, Ind., to be a commissioner in and for the District of Alaska, to reside at Sitka.

Clinton A. Snowden, of Tacoma, Wash., to be commissioner for lands of the Puyallup Indian Reservation in Washington.

Clarence L. Chaffee, of Omaha, Nebr., to be a member of the Missouri River Commission, provided for by the act of Congress approved July 5, 1884, entitled "An act making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes."

COLLECTOR OF CUSTOMS.

Levi M. Willcutts, of Minnesota, to be collector of customs for the district of Duluth, in the State of Minnesota.

SENATE.

MONDAY, *June 21, 1897.*

The Senate met at 11 o'clock a. m.

Prayer by Rev. JOHN F. GOUCHER, D. D., of Baltimore, Md.

The Journal of the proceedings of Saturday last was read and approved.

MISSISSIPPI RIVER COMMISSION CONTRACTS.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of War, transmitting a letter from the president of the Mississippi River Commission, Col. G. L. Gillespie, Corps of Engineers, United States Army, calling attention to an error in the statement of that commission published in Senate Document No. 144, Fifty-fifth Congress, first session; which, with the accompanying paper, was referred to the Committee on Commerce, and ordered to be printed.

PETITIONS AND MEMORIALS.

Mr. ALLEN presented a petition of the Commercial Club, of Omaha, Nebr., praying for the enactment of legislation to stimulate and re-create our merchant-marine interests; which was referred to the Committee on Commerce.

He also presented a petition of sundry citizens of Battlecreek, Nebr., praying for the early enactment of a protective-tariff law; which was ordered to lie on the table.

He also presented a petition of the Nebraska Beet Sugar Association, praying for the adoption of the proposed sugar schedule in the pending tariff bill; which was ordered to lie on the table.

He also presented sundry papers to accompany the bill (S. 2094) setting apart Fort Omaha, in the county of Douglas and State of Nebraska, for a school to be used for the education of Indian youth, and for other purposes; which were referred to the Committee on Indian Affairs.

Mr. HALE presented memorials of the Pray-Small Company, of Auburn; of Wise & Cooper, of Auburn; of the Johnson Bros. Shoe Manufacturing Company, of Hallowell; of C. A. Allen & Co., of Portland; Foss, Packard & Co., of Auburn; the Hodson Shoe Company, of Yarmouthville; E. G. Sprigg, of Auburn; the C. A. Cushing Shoe Company, of Freeport; the Bloomfield Shoe Company, of Skowhegan; Lynn, Ashe & Noyes, of Auburn; the American Shoe Manufacturing Company, of Auburn; the Brunnel-Higgins Shoe Company, of Portland; the Shaw-Godding Shoe Company, of Springvale; G. H. Barr & Co., of Wilton; Butler & Clark, of Springvale, and of H. E. Pinkham, of Portland, all in the State of Maine, remonstrating against any increase in the present rate of duty on tanned skins for morocco or a duty on raw goatskins; which were ordered to lie on the table.

Mr. PLATT of New York presented a petition of sundry citizens of Corfu, N. Y., praying for the early enactment of a protective-tariff law; which was ordered to lie on the table.

He also presented sundry memorials of citizens of New York City, Long Island, and Wappinger Falls, all in the State of New York, remonstrating against the proposed increase of the tax on beer; which were ordered to lie on the table.

Mr. HOAR presented a memorial of sundry citizens of Massachusetts, remonstrating against an increase in the present rate of duty on tanned skins for morocco or a duty on raw goatskins; which was ordered to lie on the table.

Mr. CHILTON presented memorials of Pat O'Keefe and sundry other citizens, of R. E. L. Knight and sundry other citizens, of R. B. Allen and sundry other citizens, and of Charles Fred Tucker and sundry other citizens, all of Dallas, in the State of Texas, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

Mr. PRITCHARD presented sundry petitions of citizens of Point Caswell, Dallas, Cherryville, West Durham, and Lincolnton, all in the State of North Carolina, and a petition of sundry citizens of Portsmouth, Va., praying for the early passage of the pending tariff bill; which were ordered to lie on the table.

REPORTS OF COMMITTEES.

Mr. HALE, from the Committee on Naval Affairs, reported an amendment intended to be proposed to the general deficiency appropriation bill; which was referred to the Committee on Appropriations.

Mr. HANSBROUGH, from the Committee on Public Lands, to whom was referred the bill (S. 1446) for the relief of William H. Tibbits, reported it with an amendment, and submitted a report thereon.

Mr. PASCO, from the Committee on Public Lands, to whom was referred the bill (S. 1990) to require patents to be issued to land actually settled under the act entitled "An act to provide for the armed occupation and settlement of the unsettled part of the peninsula of Florida," approved August 4, 1842, reported it without amendment, and submitted a report thereon.

BILLS INTRODUCED.

Mr. WHITE introduced a bill (S. 2204) to increase the limit of cost for the erection of a public building in Stockton, Cal., and appropriating money therefor; which was read twice by its title, and referred to the Committee on Public Buildings and Grounds.

Mr. TELLER introduced the following bills; which were severally read twice by their titles, and referred to the Committee on Pensions:

A bill (S. 2205) granting a pension to John F. Kline;

A bill (S. 2206) granting a pension to E. W. Hershe, of Fairplay, Colo.;

A bill (S. 2207) granting an increase of pension to George W. Blake;

A bill (S. 2208) granting an increase of pension to Richard A. Cornell;

A bill (S. 2209) granting an increase of pension to Samantha Barnes;

A bill (S. 2210) granting an increase of pension to Helen L. Dent;

A bill (S. 2211) granting a pension to Mary P. Scovel;

A bill (S. 2212) granting a pension to A. S. Elwood;

A bill (S. 2213) granting an increase of pension to Mrs. Cornelia I. Skiles;

A bill (S. 2214) granting an increase of pension to Mrs. Kate Ezekiel;

A bill (S. 2215) granting a pension to T. R. Le Tellier;

A bill (S. 2216) to increase the pension of Graham McClossen;

A bill (S. 2217) granting a pension to Aaron B. Page;

A bill (S. 2218) granting a pension to Robert N. Pollock;

A bill (S. 2219) granting a pension to Thomas Madden;

A bill (S. 2220) granting an increase of pension to Charles F. Holly;

A bill (S. 2221) granting a pension to Cyrus A. Bowers;

A bill (S. 2222) granting a pension to Elliott H. Benton;

A bill (S. 2223) granting a pension to Maria L. Meserve;

A bill (S. 2224) granting a pension to James Byrne;

A bill (S. 2225) granting a pension to John G. B. Masters;

A bill (S. 2226) granting a pension to Henry Wagner;

A bill (S. 2227) granting a pension to Andrew J. McWade;

A bill (S. 2228) granting a pension to James G. Hartzell;

A bill (S. 2229) granting a pension to Thomas B. Hanoum;

A bill (S. 2230) increasing the pension of Jackson J. Lane;

A bill (S. 2231) granting an increase of pension to William Wells;

A bill (S. 2232) granting a pension to John C. Fitnam;

A bill (S. 2233) granting a pension to Jacob D. Walter;

A bill (S. 2234) granting an increase of pension to Baley Bison;

A bill (S. 2235) granting an increase of pension to Henry Hatch;

A bill (S. 2236) granting a pension to Lewis W. Goddard;

A bill (S. 2237) granting a pension to Henry Stutsman;

A bill (S. 2238) increasing the pension of Mrs. Hulda Shaw;

A bill (S. 2239) granting a pension to Aaron Wood;

A bill (S. 2240) granting a pension to Mrs. Mary L. Daniels;

A bill (S. 2241) restoring the pension of Theron Johnson;

A bill (S. 2242) restoring the pension of Alexander W. Browning;

A bill (S. 2243) granting an increase of pension to Fordyce M. Keith;

A bill (S. 2244) for the relief of Henry A. F. Worth;

A bill (S. 2245) granting a pension to Rafael Chacon;

A bill (S. 2246) granting a pension to John Burns;

A bill (S. 2247) granting a pension to Charles E. Mann;

A bill (S. 2248) granting a pension to Charles A. Hutchings;

A bill (S. 2249) for the relief of Henry Hegwer, of Denver, Colo. (with accompanying papers); and

A bill (S. 2250) directing the Secretary of the Interior to pay to Andrew Bevins Read, administrator of the estate of Phineas W. Read, deceased, the accrued pension on certificate No. 183178.

Mr. DANIEL introduced a bill (S. 2251) to authorize the Falls Church and Potomac Railway Company of Virginia to extend its line into and within the District of Columbia, and for other purposes; which was read twice by its title, and referred to the Committee on the District of Columbia.

Mr. FORAKER introduced a bill (S. 2252) to correct and amend the military record of Harrison Wagner; which was read twice by its title, and, with the accompanying papers, referred to the Committee on Military Affairs.

NORTHERN LIBERTY MARKET CLAIMS.

Mr. COCKRELL submitted the following resolution; which was considered by unanimous consent, and agreed to:

Resolved, That the Commissioners of the District of Columbia be, and hereby are, directed to report to the Senate all action and proceedings taken by the auditor of the supreme court of the District of Columbia and the said Commissioners under the act of Congress entitled "An act to provide for the payment of certain claims against the District of Columbia by drawback certificates," approved January 28, 1897, specifically stating the number and amount of all claims filed under said law, the name of each claimant, the amount and character of each claim, the amount allowed thereon by the said auditor, and the amount approved by the Commissioners, giving separately in each claim the amount allowed and approved for property taken, injured, or destroyed by reason of the destruction or removal of the Northern Liberty Market in the city of Washington, D. C., in September, 1872, and the amount allowed and approved for the payments of claims made for the purchase, rent, or use of any stall or privileges in said market house and for license for conducting the business therein to the extent of the unexpired term of said purchase, rent, use, or license, and what amount, if any, has been allowed in each case as consequential damages; and also the number and amount of drawback certificates issued, and to whom issued, and in what amount. And are also directed to transmit to the Senate with their answer hereto copies of all correspondence between the Commissioners and the said auditor in respect to this act and the proceedings thereunder, and also copies of any and all opinions and suggestions of the attorney for the District in relation to said act and proceedings thereunder.

SALE OF POISONS IN THE DISTRICT OF COLUMBIA.

Mr. GALLINGER. At the request of the Senator from Michigan [Mr. MCMILLAN], the chairman of the Committee on the District of Columbia, I move to recommit the bill (S. 470) to regulate the sale of poisons in the District of Columbia to the Committee on the District of Columbia for further consideration.

The motion was agreed to.

ENROLLED BILL SIGNED.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the Speaker of the House had signed the enrolled bill (S. 2150) to amend an act entitled "An act to provide for the entry of lands in Greer County, Okla., to give preference rights to settlers, and for other purposes," approved January 18, 1897, and it was thereupon signed by the Vice-President.

THE TARIFF BILL.

The VICE-PRESIDENT. Morning business appears to be closed.

Mr. ALLISON. I move that the Senate proceed to the consideration of House bill 379.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States.

Mr. ALLISON. It was the purpose of the committee and it was understood on Saturday that Schedule K, "wool and manufactures of wool," would be taken up this morning. Owing to the absence of some Senators who are interested in the schedule and who would like to be present when it is considered, I ask consent that it may be passed over until to-morrow morning and that we go on to-day with Schedule M, relating to pulp, papers, and books, and return to wool and woolens to-morrow morning. I ask our friends on the other side if that course will be satisfactory to them.

Mr. VEST. Certainly.

The VICE-PRESIDENT. Without objection, Schedule K, "wool and manufactures of wool," and Schedule L, "silks and silk goods," will be passed over, and Schedule M will be taken up, the wool schedule to be taken up to-morrow morning.

The Secretary resumed the reading of the bill at page 135, line 8, "Schedule M.—Pulp, papers, and books." The next amendment of the Committee on Finance was, in paragraph 390, page 135, line 10, after the word "pulp," to strike out "one-twelfth of

1 cent per pound" and insert "7½ cents per 100 pounds;" so as to read:

Mechanically ground wood pulp, 7½ cents per 100 pounds, dry weight; chemical wood pulp, unbleached, one-sixth of 1 cent per pound, dry weight; bleached, one-fourth of 1 cent per pound, dry weight.

The amendment was agreed to.

The next amendment was to add at the end of paragraph 390 the following:

Provided, That if any country or dependency shall impose an export duty on pulp wood, the amount of such export duty shall be added, as an additional duty, to the duties herein imposed upon wood pulp, when imported from such country or dependency.

Mr. VEST. I simply desire to call attention to the fact that the price of these articles is increased to the consumer in the United States on account of an import duty, not a bounty, but a duty imposed by a foreign country. I wish again to express my dissent from the justice of this proposition. I can understand why, if a bounty is given, this country might add to the tariff duty to the extent of that bounty for the purpose of equalizing the taxation, and I do not always approve of that; but here, because a foreign country puts on an export duty, this country doubles it, and it is all to come out of the consumer or purchaser of the article after it reaches the United States. I shall not call for the yeas and nays, but I ask for a viva voce vote on the amendment.

The amendment was agreed to.

The next paragraph was read, as follows:

391. Sheathing paper and roofing felt, 10 per cent ad valorem.

The next amendment of the Committee on Finance was to insert the following as a new paragraph on page 135, after line 23:

391½. Filter masse or filter stock, composed wholly or in part of wood pulp, wood flour, cotton or other vegetable fiber, 1½ cents per pound and 15 per cent ad valorem.

The amendment was agreed to.

The Secretary read the next paragraph, as follows:

392. Printing paper, unsized, sized, or glued, suitable only for books and newspapers, 15 per cent ad valorem.

Mr. ALLISON. I move to insert at the end of paragraph 392, after "ad valorem," in line 5, page 136, the following proviso:

Provided, That no such paper shall pay a less rate of duty than three-tenths of 1 cent per pound.

Mr. VEST. What is the equivalent ad valorem?

Mr. ALLISON. It is the equivalent of 15 per cent. It is a little less generally.

The amendment was agreed to.

The next amendment of the Committee on Finance was, on page 136, to strike out the following paragraph:

393. Papers known commercially as copying paper, stereotype paper, Japanese tissue paper, pottery paper, and all other thin papers, white, printed, or colored, weighing not over 6 pounds to a standard ream of 480 sheets, on a basis of 20 by 30 inches, made up in reams or any other form, 8 cents per pound, and in addition thereto 15 per cent ad valorem; and all papers in same form as above, weighing over 6 pounds, and not exceeding 10 pounds to the standard ream of 20 by 30, and letter-copying books, whether wholly or partially manufactured, 6 cents per pound, and in addition thereto 10 per cent ad valorem; albumenized or sensitized paper, 30 per cent ad valorem; crepe paper weighing not less than 6 pounds and not exceeding 10 pounds to the standard ream of 480 sheets on a basis of 15 by 20 inches, 6 cents per pound and 10 per cent ad valorem.

And in lieu thereof to insert:

393. Papers commonly known as copying paper, stereotype paper, tissue paper, pottery paper, and all similar papers, white, colored, or printed, weighing not over 6 pounds to the ream of 480 sheets, on a basis of 20 by 30 inches, and whether in reams or any other form, 6 cents per pound and 15 per cent ad valorem; if weighing over 6 pounds and not over 10 pounds to the ream, and letter-copying books, whether wholly or partly manufactured, 4 cents per pound and 15 per cent ad valorem; crepe paper and filtering paper, 5 cents per pound and 15 per cent ad valorem.

Mr. ALLISON. After the words "pottery paper," in line 4, page 137, I move to insert "paper known as bibulous paper," after a comma.

The amendment to the amendment was agreed to.

Mr. VEST. I simply desire to call attention to the fact that this is a large increase in these articles over the existing rate. The taxation imposed by the existing law is 35 per cent ad valorem. This compound duty amounts to 51.28 per cent ad valorem, which is a very considerable increase, as will be seen at once, and upon articles of prime necessity, without which business can not be conducted in this or any other country.

The amendment as amended was agreed to.

Mr. PLATT of Connecticut subsequently said: I was out when paragraph 393 was passed. I wish to ask the Senator from Iowa whether the amendment which was reported by the committee was inserted in that paragraph?

Mr. ALLISON. It was not. My attention was not called to it at the moment.

The VICE-PRESIDENT. There was one amendment adopted to paragraph 393.

Mr. ALLISON. If there is no objection, I should be glad to go back to that paragraph.

The VICE-PRESIDENT. The additional amendment will be stated.

The SECRETARY. In line 12, page 137, paragraph 393, before "cents," insert "five" instead of "four;" so as to read:

If weighing over 6 pounds and not over 10 pounds to the ream, and letter-copying books, whether wholly or partly manufactured, 5 cents per pound and 15 per cent ad valorem.

Mr. PLATT of Connecticut. That was one of the amendments which was reported.

Mr. ALLISON. And printed.

The VICE-PRESIDENT. Without objection, the amendment is agreed to.

Mr. VEST. I object.

Mr. ALLISON. It is a little increase there.

Mr. VEST. I thought that paragraph was passed over.

The VICE-PRESIDENT. Three hundred and ninety-four was passed over.

Mr. ALLISON. Paragraph 394 was passed over.

The amendment was agreed to.

The next amendment of the Committee on Finance was to strike out the following paragraph:

394. Surface-coated papers, plain, embossed, or marbled, 3 cents per pound and 10 per cent ad valorem; if printed, or covered with metal or its solutions, or with gelatin or flock, 3 cents per pound and 20 per cent ad valorem; parchment papers, and plain basic photographic papers for albumenizing, sensitizing, or barita coating, 2 cents per pound and 10 per cent ad valorem; manufactures of surface-coated or parchment papers, 10 per cent ad valorem in addition to the foregoing rates on the same papers; lithographic prints from stone, zinc, aluminium, or other material, bound or unbound (except cigar labels and bands, lettered or blank, music, and illustrations when forming a part of a periodical or newspaper and accompanying the same, or if bound in or forming part of printed books), on paper or other material not exceeding eight one-thousandths of an inch in thickness, 25 cents per pound; on paper or other material exceeding eight one-thousandths of an inch and not exceeding twenty one-thousandths of an inch in thickness, and exceeding 35 square inches cutting size in dimensions, 12 cents per pound; prints exceeding eight one-thousandths of an inch and not exceeding twenty one-thousandths of an inch in thickness, and not exceeding 35 square inches cutting size in dimensions, 10 cents per pound; lithographic prints from stone, zinc, aluminium, or other material, on cardboard or other material, exceeding twenty one-thousandths of an inch in thickness, 9 cents per pound; lithographic cigar labels and bands, lettered or blank, printed from stone, zinc, aluminium, or other material, if printed in less than ten colors, but not including labels printed in whole or in part in bronze or metal leaf, 20 cents per pound; if printed in ten or more colors, and including labels printed in whole or in part in bronze, but not including labels printed in whole or in part in metal leaf, 25 cents per pound; if printed in whole or in part in metal leaf, 40 cents per pound.

And in lieu to insert:

394. Surface-coated papers not specially provided for in this act, 2½ cents per pound and 15 per cent ad valorem; if printed; or wholly or partly covered with metal or its solutions, or with gelatin or flock, 3 cents per pound and 20 per cent ad valorem; parchment papers and plain basic photographic papers for albumenizing, sensitizing, or baryta coating, 2 cents per pound and 10 per cent ad valorem; albumenized or sensitized paper or paper otherwise surface coated for photographic purposes, 30 per cent ad valorem.

Mr. ALLISON. I ask that paragraph 394 may be passed over.

The VICE-PRESIDENT. Is there objection? No objection being made, paragraph 394 is passed over.

The next amendment of the Committee on Finance was, on page 139, after line 22, to strike out the following:

Manufactures of paper:

395. Paper envelopes, plain, 20 per cent ad valorem; if bordered, embossed, printed, tinted, or decorated, 30 per cent ad valorem.

The amendment was agreed to.

The next amendment was, on page 140, after line 2, to insert the following paragraph:

395a. Lithographic prints from stone, zinc, aluminium, or other material, bound or unbound (except cigar labels and bands, music, and illustrations when forming part of a periodical or newspaper and accompanying the same, or if bound in or forming part of printed books, not specially provided for in this act), on paper or other material not exceeding eight one-thousandths of an inch in thickness, 25 cents per pound; on paper or other material exceeding eight one-thousandths of an inch and not exceeding twenty one-thousandths of an inch in thickness, and exceeding 35 square inches cutting size in dimensions, 12 cents per pound; prints exceeding eight one-thousandths of an inch and not exceeding twenty one-thousandths of an inch in thickness, and not exceeding 35 square inches cutting size in dimensions, 10 cents per pound; lithographic prints from stone, zinc, aluminium, or other material, on cardboard or other material, exceeding twenty one-thousandths of an inch in thickness, 9 cents per pound; lithographic cigar labels, flaps, and bands, lettered or otherwise, printed from stone, zinc, aluminium, or other material, if printed in less than ten colors, but not including labels printed in whole or in part in bronze or metal leaf, 20 cents per pound; if printed in ten or more colors, and including labels printed in whole or in part in bronze, but not including labels printed in whole or in part in metal leaf, 25 cents per pound; if printed in whole or in part in metal leaf, 35 cents per pound. Books, booklets, and periodicals of paper or other material, of which lithographic prints are the component part of chief value, 8 cents per pound and 15 per cent ad valorem.

Mr. VEST. I wish to call attention to the effect of the amendment in paragraph 395. On the first classification the duty is raised 4 cents over the Wilson Act. Under the next classification the rise is 5 cents, and under the next the rise is 3 cents; so that upon all three of these classifications there is a large increase of duty over existing law.

The amendment was agreed to.

The next amendment of the Committee on Finance was, on page 141, after line 15, to insert the following paragraph:

395b. Writing, letter, note, hand-made, drawing, ledger, bond, record, tablet, and typewriter paper, weighing not less than 10 pounds and not more than 15 pounds to the ream, 2 cents per pound and 10 per cent ad valorem; weighing more than 15 pounds to the ream, 3½ cents per pound and 15 per cent ad valorem; but if any such paper is ruled, bordered, embossed, printed,

or decorated in any manner, it shall pay 10 per cent ad valorem in addition to the foregoing rates: *Provided*, That in computing the duty on such paper every 180,000 square inches shall be taken to be a ream.

The amendment was agreed to.

Mr. VEST. I move to strike out the duty imposed in lines 19 and 20, page 141, and insert the existing rate—25 per cent ad valorem.

The SECRETARY. In lines 19 and 20 strike out the words "2 cents per pound and 10 per cent ad valorem" and insert in lieu thereof the words "25 per cent ad valorem."

The amendment was rejected.

Mr. VEST. In lines 21 and 22 I move to strike out "3½ cents per pound and 15 per cent ad valorem" and insert in lieu thereof "35 per cent ad valorem."

The amendment was rejected.

Mr. VEST. Now I want to call attention to the condition of this trade and the absolute certainty that there is no necessity for these increases. The comparative statement shows that in 1896 we exported from this country $108,117 worth of writing paper, and of all other papers $2,521,901 worth. We imported into the United States $146,000 worth. This is a mathematical demonstration of the fact that the paper manufacturers of the United States control the domestic market and send a large portion of their product abroad.

There is another change from the existing law which is a most significant and important one. Heretofore reams have been counted by quires. This changes the system from quires to inches. I am told by experts that it has the effect of increasing the duty. It is a radical departure. In every tariff bill I have ever known anything about we have assumed and stated in the bill that so many quires of paper made a ream. Here is a change to so many inches.

Mr. WHITE. I desire to call attention to a proposition with which we are now somewhat familiar, that in many of the schedules there is in the comparative statement absolutely no data upon which anyone save a trade expert or specialist in the business can find out what the actual percentage of the duty is. In regard to 395a, for instance, on page 210 of the comparative statement, where the Senate rates are from 25 cents to 8 cents a pound upon various articles therein set forth, there is nothing to show, there is no calculation, no estimate as to the percentage, no data furnished, by which it is possible for anyone to make a computation to ascertain whether the rates are very large or not. Obviously the paragraphs were drawn by some one familiar with the business, and it is safe to say that the duties are so high that it would not be safe to disclose them on the face of the document.

Mr. ALLISON. Mr. President, just a word in reply to the Senator from California.

Of course these paragraphs are intended to make the duty on paper specific rather than ad valorem. The same difficulty arises under paper that arises under a good many of the schedules where only an ad valorem duty is provided for. The experts who have examined this matter carefully, I will say, agree (at least so far as I know they agree) that under 395a and 395b the tariff duty is about 35 per cent. Of course it will be a little less on some and a little more on others.

The next amendment of the Committee on Finance was, on page 142, after line 4, to insert the following paragraph:

395c. Paper hangings and paper for screens or fireboards, and all other paper not specially provided for in this act, 25 per cent ad valorem.

The amendment was agreed to.

The next amendment was, on page 142, after line 8, to insert the following:

Manufactures of paper:

395d. Books of all kinds, including blank books and pamphlets, and engravings bound or unbound, photographs, etchings, maps, charts, music in books or sheets, and printed matter, all the foregoing not specially provided for in this act, 25 per cent ad valorem.

Mr. ALLEN. I have been looking through this schedule with a view of finding out if any provision is made for books, maps, and charts imported for strictly educational purposes. I should like to ask the Senator from Iowa if such a provision is made. I have been unable to find it thus far.

Mr. ALLISON. They are provided for later in the bill, and put upon the free list.

Mr. VEST. I wish to call attention to a gratifying fact to every American, that this country, comparatively a new one, exported in 1896 of books, maps, engravings, pamphlets, etc., to foreign countries $2,338,723 worth and imported about one-half that amount, or $1,361,165 worth. It seems to have been the general impression in a good many quarters that we are dependent for a large amount of our literature upon Europe. These official data show that instead of the balance of trade being against us as to these articles it is largely in our favor.

I make no motion in regard to the rate, because it is the same with the existing law, but I thought it was proper to call attention to this instance of the progress made in the United States as to education and literary culture.

The amendment was agreed to.

The next amendment was, on page 142, after line 15, to insert the following paragraph:

395e. Paper envelopes, plain, 25 per cent ad valorem; if bordered, embossed, printed, tinted, or decorated, 30 per cent ad valorem.

Mr. ALLISON. On behalf of the majority of the committee, I move to add to paragraph 395e:

If made from tissue, parchment, or imitation parchment paper, 35 per cent ad valorem.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. ALLISON. I move to add a new paragraph, to be called 395f, which was reported in our printed amendment some weeks ago.

The SECRETARY. It is proposed to insert as a new paragraph the following:

395f. Photograph, autograph, and scrap albums, wholly or partly manufactured, 35 per cent ad valorem.

The amendment was agreed to.

The next amendment of the Committee on Finance was, on page 142, after line 18, to strike out the following paragraph:

396. Paper hangings and paper for screens or fire boards, and all other paper not specially provided for in this act, 25 per cent ad valorem; writing, note, letter, hand made, drawing, ledger, bond, record, tablet and typewriter paper, weighing not less than 10 pounds and not more than 15 pounds to the ream, 2½ cents per pound and 10 per cent ad valorem; weighing more than 15 pounds to the ream, 6 cents per pound and 10 per cent ad valorem; but if any such paper is ruled, bordered, embossed, printed or decorated in any manner, it shall pay 10 per cent ad valorem in addition to the foregoing rates: *Provided*, That in computing the duty on such paper every 180,000 square inches shall be taken to be a ream, without regard to the number of sheets contained therein.

The next amendment was, on page 143, after line 11, to strike out the following paragraph:

397. Blank books of all kinds, books, including pamphlets and engravings, bound or unbound, photographs, etchings, maps, music, charts, and all printed matter not specially provided for in this act, 25 per cent ad valorem.

The amendment was agreed to.

The next amendment was, on page 143, after line 16, to strike out the following paragraph:

398. Playing cards, in packs not exceeding 54 cards and at a like rate for any number in excess, 10 cents per pack and 50 per cent ad valorem.

And in lieu thereof to insert:

398. Playing cards, in packs not exceeding 54 cards and at a like rate for any number in excess, 20 cents per pack and 20 per cent ad valorem.

Mr. VEST. I suppose playing cards have no friends in this Chamber; but I want to call attention to the enormous increase of duty, and I think as a revenue matter it is a mistake. This amendment raises the duty from 140 per cent, which is an enormous one, under the present law, to 200 per cent. I suppose if a motion were made to increase it to 500 per cent, there would be no objection to it, because it is just one of those subjects with which morality and religion are arrayed upon one side and the ungodly on the other. But, as a matter of collecting revenue, I do not believe that these enormous duties are successful. I think that 140 per cent is enough and will collect more revenue than 200 per cent. As a matter of protection, it is not needed at all.

Mr. MILLS. What is the unit of value?

Mr. WHITE. Eleven cents. The rate proposed is 200 per cent.

Mr. MILLS. And there is an internal-revenue tax of 3 cents.

Mr. VEST. Yes.

Mr. MILLS. Why make an increase to 200 per cent?

Mr. VEST. That is just the question I am asking. I think it is a mistake.

Mr. MILLS. Of course it is.

Mr. VEST. I think it will cause a decrease in the revenue. We had great doubts in enacting the law of 1894 as to making the duty so high as it is, and I believe by reference to the comparative statement it will be seen that it did not increase the revenue.

Mr. WHITE. I call the attention of the Senator from Missouri to the fact that the revenue for 1896 upon this article was $1,459.75; so that the present rate will be absolutely prohibitive.

Mr. VEST. That is the intention of the act. It is to exclude all foreign importations. As a matter of course, it will decrease the revenue.

The amendment was agreed to.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, under the heading "Schedule N.—Sundries," on page 144, after line 5, to strike out the following paragraph:

400. Beads of all kinds, not strung, 35 per cent ad valorem; trimmings and ornaments, including such as are known as bead, beaded, or jet trimmings or ornaments, not specially provided for in this act, composed wholly or in part of glass or paste, gelatin or metal, 50 per cent ad valorem.

And to insert in lieu:

400. Beads of all kinds, not threaded or strung, 35 per cent ad valorem; fabrics, nets or nettings, laces, embroideries, galloons, wearing apparel, ornaments, trimmings, and other articles not specially provided for in this act, composed wholly or in part of beads or spangles made of glass or paste, gelatin, metal, or other material, but not composed in part of wool, 60 per cent ad valorem.

The amendment was agreed to.

The next amendment was, in paragraph 401, page 144, line 22, after the word "stained," to strike out "twenty-five" and insert "twenty;" so as to make the paragraph read:

401. Braids, plaits, laces, and willow sheets or squares, composed wholly of straw, chip, grass, palm leaf, willow, osier, or rattan, suitable for making or ornamenting hats, bonnets, or hoods, not bleached, dyed, colored or stained, 15 per cent ad valorem; if bleached, dyed, colored or stained, 20 per cent ad valorem; hats, bonnets, and hoods, composed of straw, chip, grass, palm leaf, willow, osier, or rattan, whether wholly or partly manufactured, but not trimmed, 35 per cent ad valorem; if trimmed, 50 per cent ad valorem. But the terms "grass" and "straw" shall be understood to mean these substances in their natural form and structure, and not the separated fiber thereof.

The amendment was agreed to.

The next amendment was, in paragraph 402, page 145, line 5, after the word "Brushes," to strike out "for the hair, nails, or teeth, and all other brushes, and;" in line 6, after the word "brooms," to strike out the comma; and in line 8, after the words "ad valorem," to strike out the comma and the words "bristles, bunched or prepared, 7½ cents per pound;" so as to make the paragraph read:

402. Brushes, brooms and feather dusters of all kinds, and hair pencils, in quills or otherwise, 40 per cent ad valorem.

The amendment was agreed to.

Mr. VEST. In line 7, page 145, paragraph 402, I move to strike out "forty" and insert "thirty-five," which is the existing law. I call attention to the fact that by the comparative statement in 1896 we exported from this country $180,183 worth of brooms and we imported but $12,660 worth, showing that we absolutely control the domestic market and export largely abroad.

The amendment was rejected.

The next amendment of the Committee on Finance was, on page 145, after line 9, to insert the following paragraph:

402½. Bristles, sorted, bunched or prepared, 7½ cents per pound.

The amendment was agreed to.

The reading of the bill was resumed at line 12, page 145, as follows:

Buttons and button forms.

Mr. ALLISON. I move to insert immediately after the words "Buttons and button forms:"

Trousers buckles made wholly or partly of iron or steel, or parts thereof, valued at not more than 15 cents per hundred, 5 cents per hundred; valued at more than 15 cents per hundred and not more than 50 cents per hundred, 10 cents per hundred; valued at more than 50 cents per hundred, 15 cents per hundred; and in addition thereto on each and all of the above buckles or parts of buckles, 15 per cent ad valorem.

The amendment was agreed to.

The next amendment of the Committee on Finance was to strike out paragraph 404, as follows:

404. Buttons, whether wholly or partly manufactured, parts of buttons and button molds or blanks, shall pay duty at the following rates, the line button measure being one-fortieth of 1 inch, namely: Buttons known commercially as agate buttons, one-half of 1 cent per line per great gross; buttons of bone, one-fourth of 1 cent per line per gross; buttons of pearl or shell, 1½ cents per line per gross; buttons of ivory, vegetable ivory, horn, glass, or metal, three-fourths of 1 cent per line per gross; and in addition thereto, on all the foregoing articles in this paragraph, 15 per cent ad valorem; shoe buttons, made of paper, board, papier mâché, pulp, or other similar material not specially provided for in this act, valued at not exceeding 3 cents per gross, 1 cent per gross; buttons not specially provided for in this act, 50 per cent ad valorem.

And in lieu thereof to insert:

404. Buttons or parts of buttons and button molds or blanks, finished or unfinished, shall pay duty at the following rates, the line button measure being one-fortieth of 1 inch, namely: Buttons known commercially as agate buttons, metal trousers buttons, and nickel bar buttons, one-twelfth of 1 cent per line per gross; buttons of bone, one-fourth of 1 cent per line per gross; buttons of pearl or shell, 1½ cents per line per gross; buttons of horn, vegetable ivory, glass, or metal, not specially provided for in this act, three-fourths of 1 cent per line per gross, and in addition thereto, on all the foregoing articles in this paragraph, 15 per cent ad valorem; shoe buttons made of paper, board, papier mache, pulp or other similar material, not specially provided for in this act, valued at not exceeding 3 cents per gross, 1 cent per gross; buttons not specially provided for in this act, and all collar or cuff buttons and studs, 50 per cent ad valorem.

Mr. ALLISON. In line 18 of the amended paragraph, after the word "buttons," where it first occurs in the line, I move to insert "except steel;" and in line 19, after the word "bone," to insert the words "and steel trousers buttons."

The VICE-PRESIDENT. The amendment submitted by the Senator from Iowa will be stated.

The SECRETARY. In the amended paragraph proposed to be inserted by the committee as a substitute for the original paragraph 404, in line 18, after the word "buttons" where it first occurs, it is proposed to insert "except steel;" and in line 19, after the word "bone," to insert "and steel trousers buttons;" so as to read:

Buttons known commercially as agate buttons, metal trousers buttons, except steel, and nickel bar buttons, one-twelfth of 1 cent per line per gross; buttons of bone and steel trousers buttons, one-fourth of 1 cent per line per gross.

The amendment to the amendment was agreed to.

The VICE-PRESIDENT. The question recurs on the amendment as amended, striking out the original paragraph 404 and inserting in lieu thereof the new paragraph 404 as it has been amended on the motion of the Senator from Iowa.

The amendment as amended was agreed to.

Mr. ALLISON. I ask that paragraph 405, relating to coal, may be passed over for the present.

The VICE-PRESIDENT. Is there objection to the request to pass over paragraph 405? The Chair hears none, and it is so ordered.

The reading of the bill was resumed; and paragraph 406 was read, as follows:

406. Cork bark, cut into squares or cubes, 8 cents per pound; manufactured corks over one-half inch in diameter measured at larger end, 15 cents per pound; one-half inch and less in diameter, measured at larger end, 25 cents per pound; cork, artificial, or cork substitutes, manufactured from cork waste and not otherwise provided for, 8 cents per pound.

Mr. ALLISON. In line 20, before the word "inch," I move to strike out "one-half" and insert "three-fourths of an."

The VICE-PRESIDENT. The amendment proposed by the Senator from Iowa will be stated.

The SECRETARY. In paragraph 406, line 20, page 147, before the word "inch," it is proposed to strike out "one-half" and insert three-fourths of an;" so as to read:

Manufactured corks over three-fourths of an inch in diameter, measured at the larger end, 15 cents per pound.

The amendment was agreed to.

Mr. ALLISON. Before the word "inch," at the beginning of line 22, I move to strike out "one-half" and insert "three-fourths of an."

The VICE-PRESIDENT. The amendment proposed by the Senator from Iowa will be stated.

The SECRETARY. In paragraph 406, page 147, before the word "inch," at the beginning of line 22, it is proposed to strike out "one-half" and insert "three-fourths of an;" so as to read:

Three-fourths of an inch and less in diameter, measured at the larger end, 25 cents per pound.

The amendment was agreed to.

Mr. VEST. I call attention to the fact that this increase of duty in line 23 is above the McKinley rate, which was 15 cents per pound, and the amendment makes it 25 cents per pound. I move to strike out "25 cents" and insert the existing rate, "10 cents."

Mr. WHITE. With the Senator's permission, I wish to offer a substitute.

Mr. VEST. My colleague on the committee wishes to propose a substitute for the whole paragraph, and so I will withhold my amendment.

Mr. WHITE. With the permission of the Senator from Missouri, I will move to strike out paragraph 406, as reported by the committee, and in lieu thereof to insert the following:

Corks, whole or partially manufactured, 10 cents per pound—

Which is the present law.

The VICE-PRESIDENT. Does the Senator from Missouri accept the substitute proposed by the Senator from California?

Mr. VEST. Certainly.

The VICE-PRESIDENT. The Senator from California moves an amendment to paragraph 406 in the nature of a substitute, which will be stated.

The SECRETARY. It is proposed to strike out paragraph 406 and in lieu thereof to insert:

Corks, wholly or partially manufactured, 10 cents per pound.

The amendment was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 409, page 148, line 10, after the words "emery wheels," to strike out the comma and the word "and;" and in line 11, after the word "files," to insert "and manufactures of which emery is the component material of chief value;" so as to make the paragraph read:

409. Emery grains, and emery manufactured, ground, pulverized, or refined, 1 cent per pound; emery wheels emery files, and manufactures of which emery is the component material of chief value, 25 per cent ad valorem.

The amendment was agreed to.

Mr. VEST. I call attention to the fact that emery wheels for the first time are now put on the dutiable list; and I am at a loss to know, even with the enormous increases found all through this bill, why this should have been done. We exported, in 1896, $48,762 worth of emery wheels, and we imported none. So there can be no object here of protecting the American manufacture, for there is not a single dollar's worth of these articles brought to this country, while last year we exported nearly $50,000 worth. While it is a comparatively small matter, yet I think this increased taxation is arbitrary and not necessary.

Mr. ALLISON. I inquire what was done in the case of the comma, which was proposed to be stricken out by the committee, after the words "emery wheels," in line 10?

The VICE-PRESIDENT. It was stricken out.

Mr. ALLISON. The comma ought to remain, and I ask that it may be restored.

The VICE-PRESIDENT. Without objection, the comma after the words "emery wheels" will be restored, the amendment of the committee proposing to strike it out being disagreed to.

The reading of the bill was resumed at line 14, on page 148, "Explosive substances." The next amendment of the Committee on Finance was, in paragraph 410, page 148, line 15, before the word "cents," to strike out "eight" and insert "six;" so as to make the paragraph read:

410. Firecrackers of all kinds, 6 cents per pound, the weight to include all coverings, wrappings, and packing material.

The amendment was agreed to.

The next amendment was, in paragraph 412, page 148, line 24, before the word "cents," to strike out "five" and insert "four;" in line 1, on page 149, before the word "cents," to strike out "eight" and insert "six;" and after the word "pound," at the end of the same line, to strike out "smokeless powder, 12 cents per pound;" so as to make the paragraph read:

412. Gunpowder, and all explosive substances used for mining, blasting, artillery, or sporting purposes, when valued at 20 cents or less per pound, 4 cents per pound; valued above 20 cents per pound, 6 cents per pound.

The amendment was agreed to.

The next amendment was, in paragraph 413, page 149, line 3, after the word "descriptions," to strike out "per gross of 144 boxes, containing not more than 100 matches per box, 10 cents per gross; when imported otherwise than in boxes containing not more than 100 matches each, 1 cent per 1,000 matches" and insert "20 per cent ad valorem;" so as to make the paragraph read:

413. Matches, friction or lucifer, of all descriptions, 20 per cent ad valorem.

Mr. ALLISON. I wish to modify the amendment proposed by the Committee on Finance by striking out "20 per cent ad valorem," and amending the text of the bill as it came from the House by striking out "ten," in line 6, before the word "cents," and inserting "eight;" and in line 8, by striking out "one," before the word "cent," and inserting "three-fourths of a."

The VICE-PRESIDENT. The committee amendment having been withdrawn, the amendment proposed by the Senator from Iowa will be stated.

The SECRETARY. In paragraph 413, line 6, before the word "cents," it is proposed to strike out "ten" and insert "eight;" and in line 8, before the word "cent," to strike out "one" and insert "three-fourths of a;" so as to make the paragraph read:

413. Matches, friction or lucifer, of all descriptions, per gross of 144, containing not more than 100 matches per box, 8 cents per gross; when imported otherwise than in boxes containing not more than 100 matches each, three-fourths of a cent per 1,000 matches.

Mr. WHITE. I call attention to the fact that the Senate committee having this matter in charge, after investigation, so amended paragraph 413 as to make it accord exactly with the Wilson law, and now the committee propose to recede from the position thus taken and adopts a much higher rate. That is the real gist of the question now before the Senate.

The VICE-PRESIDENT. The question before the Senate is on agreeing to the amendment proposed by the Senator from Iowa on behalf of the Committee on Finance.

Mr. VEST. I call for the yeas and nays.

Mr. GRAY. Let us have just a word of explanation, please. I think we are entitled to it.

Mr. ALLISON. The committee originally recommended 20 per cent ad valorem in lieu of the specific rates provided for in the bill as it came to us from the House of Representatives. On further examination, we are led to believe that these matches should have a specific duty. There are large importations from Japan and other countries, and it is said there are great undervaluations; and especially are there undervaluations in importations from across the border. Therefore, we propose, in lieu of 20 per cent ad valorem, to make a specific duty which is substantially 20 per cent ad valorem.

Mr. WHITE. I inquire of the Senator, taking 8 cents per gross, which he now indicates as the proper amount, what is the corresponding ad valorem percentage? The comparative statement affords no information whatever either as to 10 cents per gross or 8 cents per gross.

Mr. ALLISON. From the best information I can secure, I think on many of the matches it will be a little less than 20 per cent and on others it will be a little over that.

Mr. WHITE. I am told it is over 50 per cent.

Mr. ALLISON. That may be so on some of the very small varieties of matches.

Mr. WHITE. No; on the general description.

Mr. ALLISON. Also on some of the high-priced matches.

Mr. GRAY. Mr. President, the match industry in this country has grown to be one of very great importance and of very great proportions. Match manufacturers have been enabled, it seems to me, to prosecute very successfully their business. All great businesses, which appeal in their product to the masses of the country for consumption, if properly managed, are immensely profitable; that is, the scale of consumption is immense. I can very readily understand why those who are engaged in the manufacture of things which are used by the million demand higher duties than those who make a comparatively small line of articles that are used by the very wealthy. A man who gets an eighth of a cent on every tin cup that is used by 70,000,000 people is better off than the man who gets $1 on every silk dress. So it is, we observe, on all the manufactures which go into general consumption and which are used in every cabin in this country, in every home, however humble, they being necessities of life, that the persons who control those industries demand a high ad valorem rate of duty, and they demand it under the guise always of a specific duty, because that serves to conceal the ad valorem, and answers their purpose better in preventing importations and interfering with access to the cheaper products of the world.

Mr. President, I know something about the match industry. It has been a very large industry in my own State; in fact, the modern match industry started in the State of Delaware, and the Diamond Match Company took its name from the Diamond State, which I in part represent. Now, I should like to know why it is that this industry, which I know has been successfully carried on and is being successfully carried on to-day, demands the levy of a tribute upon every man, woman, and child in the country to make that business more profitable? Where does the information come from? It is ex parte. It could not have come here through investigation, for the Senator does not state that there has been an investigation. He states that they have been informed. Informed by match manufacturers? We know there is a great syndicate, a match trust, out in the Western country, and some very able and wealthy people are interested in it. I do not understand why the comparatively moderate 20 per cent ad valorem, which the Senate committee were quite willing to report here, should be changed and upon whose demand it is changed.

Mr. ALLISON. I will say a word in response to the Senator from Delaware. Those who have the administration of this law, the experts of the Treasury, say to us that this duty should be specific and not ad valorem, in order that whatever duties are levied may be collected. That being true, we found in this paragraph a specific duty of 10 cents per gross and 1 cent per thousand for matches in bulk; and, as near as we could ascertain, taking all the matches by and large, 8 cents a gross, I frankly say to the Senator, I think will work out a slight increase on the present duty, if honestly administered; but as it is now administered under the ad valorem duty, these matches come in, especially from Japan and from other countries, at a mere nominal valuation, for they are valued in the country whence they come.

Mr. GRAY. I want to know right there, is there anything in the demand made by these match manufacturers that is based upon the compensation necessary by reason of the duty on lumber?

Mr. ALLISON. They make the contention—and I suppose there is something in it—that there is an increased duty on lumber. There is also an increased duty on phosphorus in this bill. The present duty on phosphorus, I believe, is 15 cents per pound.

Mr. GRAY. Which is proposed to be raised.

Mr. ALLISON. The House of Representatives fixed the rate on phosphorus at 20 cents per pound, and we have reduced it to 10 cents.

Mr. GRAY. That is below the present duty.

Mr. ALLISON. Below the present duty. But the paragraph has been passed over because it has been demonstrated to us that 10 cents a pound is absolutely necessary. There is also an increased duty in this bill placed upon glue, which is a very important element in this manufacture. So the duty on their raw materials has been increased.

Mr. GRAY. That is what I am after—the basis for the demand of the increase on the manufactured product.

Mr. ALLISON. The manufacturers make that demand.

Mr. GRAY. That illustrates what we have had demonstrated before, the far-reaching effect of a duty on the raw material.

Mr. ALLISON. It does.

Mr. GRAY. You can not tell where it is going to strike.

Mr. ALLISON. All these things are far reaching.

Mr. GRAY. So we go. That shows that the basic principle of raw material is worth considering.

Mr. ALLISON. I want to say a word about the manufacture of matches. There are about thirty or thirty-five of these match factories in the United States all told. They are in California, in Oregon, in Indiana, in Michigan, in Illinois, in Wisconsin, in New York, in Pennsylvania, in New Jersey, and in West Virginia, I believe. They are scattered all over the country. The Diamond Match Company, which, I believe, had its origin in the State of Delaware, is one of the large manufacturers of matches, and I understand manufactures about 50 per cent of all the matches consumed in the United States. They have recently, as I have been told—I do not know how true it is—purchased large interests in a factory, or have erected a factory in Liverpool, in which they have a large interest, though I am told they are not the exclusive owners.

Possibly it may be very agreeable and pleasant for them to have a low duty on matches, so as to secure our market for their product; I do not know what their view is, but certainly to be ready for any contingency as to the production of matches. The twenty-five or thirty match factories outside of the Diamond Match Company are not, however, able to do this. Therefore if this industry is to remain in our country it is necessary that there should be a duty imposed, and the duty here is specific, and is not largely above the duty in the present law. That is all there is to this question.

Mr. SMITH. I am glad to hear the Senator from Iowa say this request is made by the match manufacturers, because there happens to be a very large concern located in the State of New Jersey, and they have written me to the effect that they do not require and do not want any protection; that the bill as it came from the House was made up entirely in the interest of what is known as the Diamond match trust, and that as individual manufacturers they do not need it and do not want it. The letter to which I have referred is signed by Mr. Gould, who owns a large match concern at Camden, N. J. So there seems to be some difference of opinion amongst match manufacturers as to whether they need protection or not in this instance.

The VICE-PRESIDENT. The question is on the original amendment proposed by the Committee on Finance, not including, however, the amendments to the text.

Mr. VEST. I asked for the yeas and nays.

Mr. ALLISON. I now desire that the committee amendment be disagreed to.

The VICE-PRESIDENT. The Chair will decide that, in the absence of objection, the original amendments are disagreed to.

Mr. ALLISON. I now move, in line 6, to insert "eight" instead of "ten," and in line 8 "three-fourths of 1 cent per pound" instead of "1 cent."

The VICE-PRESIDENT. The question is on the amendment proposed by the Senator from Iowa.

Mr. ALLISON. Now I wish to read a brief statement which I find in the report of the House hearings on matches. I do this for the benefit of our friend the Senator from New Jersey.

Mr. WHITE. From what page does the Senator propose to read?

Mr. ALLISON. Page 1869:

> Our city of Camden has four large match factories, employing more than 500 hands, with an aggregate capital of $450,000. To-day but one plant is running, and that one is losing money, and all because foreign matches are being imported into the United States at a cost of 20 cents per gross from Japan, when it costs us 40 cents per gross to produce them here. I speak of the most salable size—the small box containing 60 matches to the box.
>
> The Diamond Match Company has erected at Liverpool a large plant costing $1,000,000, and they are satisfied to have the present Wilson tariff. We are not connected in any manner with trusts or pools, but we can not compete with the pauper labor of Europe.
>
> H. B. HAMELL,
> *Vice-President New Jersey Match Company.*

I regret to see that New Jersey seems to be divided on this question. The match companies in New Jersey, outside of the one alluded to by the Senator from New Jersey who has just spoken, all say that it is impossible for them to get on without a duty on matches, and they want it specific, as the experts of the Treasury want it specific. That is all I think there is about the match question.

The VICE-PRESIDENT. Without objection, the amendments proposed by the committee are agreed to. The Senator from Missouri moves to restore 20 per cent ad valorem, the Chair thinks.

Mr. VEST. Yes, sir.

Mr. PLATT of Connecticut. What is the motion?

The VICE-PRESIDENT. To restore 20 per cent ad valorem. The Chair does not know in what shape the amendment is proposed.

Mr. WHITE. If I understand it, it is to insert paragraph 326 of the present law.

Mr. VEST. Yes, sir.

Mr. WHITE. That paragraph reads as follows:

> Matches, friction or lucifer, of all descriptions, 20 per cent ad valorem.

Mr. ALLISON. What is the motion?

The VICE-PRESIDENT. The motion is to strike out paragraph 413 and insert the provision of the Wilson law.

Mr. ALLISON. Very well.

The VICE-PRESIDENT. Upon the amendment the yeas and nays are demanded by the Senator from Missouri.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. CLAY (when his name was called). I am paired with the junior Senator from Massachusetts [Mr. LODGE]. Were he present, I should vote "yea."

Mr. FAULKNER (when his name was called). I am paired with the Senator from West Virginia [Mr. ELKINS]. If he were present, I should vote "yea."

Mr. MITCHELL (when his name was called). I am paired with the Senator from New Jersey [Mr. SEWELL]. If he were present, I should vote "yea."

Mr. MORGAN (when his name was called). I am paired with the Senator from Pennsylvania [Mr. QUAY].

Mr. MORRILL (when his name was called). I am paired with the senior Senator from Tennessee [Mr. HARRIS], and therefore withhold my vote on this question, as I shall do for the rest of the day.

Mr. PENROSE (when his name was called). I am paired with the junior Senator from Delaware [Mr. KENNEY], and therefore do not vote.

Mr. RAWLINS (when his name was called). I am paired with the junior Senator from Ohio [Mr. HANNA]. If he were present, I should vote "yea."

Mr. WHITE (when his name was called). I am paired with the Senator from Idaho [Mr. SHOUP]. Were he present, I should vote "yea."

The roll call was concluded.

Mr. CANNON. I am paired with the senior Senator from Rhode Island [Mr. ALDRICH]. If he were present, I should vote "yea."

Mr. HANSBROUGH. I am paired with the senior Senator from Virginia [Mr. DANIEL].

Mr. HAWLEY. I am paired with the Senator from Tennessee [Mr. BATE]. If he were present, I should vote "nay."

Mr. CLAY. I transfer my pair with the Senator from Massachusetts [Mr. LODGE] to the Senator from Virginia [Mr. MARTIN], and will vote. I vote "yea."

Mr. TILLMAN (after having voted in the affirmative). I am paired with the Senator from Nebraska [Mr. THURSTON]. I did not notice that he was absent. I therefore withdraw my vote.

Mr. WARREN. I desire to announce that my colleague [Mr. CLARK], who is unavoidably absent, is paired with the junior Senator from Kansas [Mr. HARRIS], who is also absent.

The result was announced—yeas 20, nays 26; as follows:

YEAS—20.

Bacon,	Gray,	Murphy,	Smith,
Berry,	Heitfeld,	Pasco,	Turner,
Chilton,	McLaurin,	Pettigrew,	Turpie,
Clay,	Mallory,	Pettus,	Vest,
Cockrell,	Mills,	Roach,	Walthall.

NAYS—26.

Allison,	Foraker,	McEnery,	Spooner,
Burrows,	Frye,	Nelson,	Stewart,
Carter,	Gallinger,	Perkins,	Warren,
Chandler,	Gear,	Platt, Conn.	Wetmore,
Cullom,	Hale,	Platt, N. Y.	Wilson.
Deboe,	Hoar,	Pritchard,	
Fairbanks,	McBride,	Proctor,	

NOT VOTING—43.

Aldrich,	Faulkner,	Kyle,	Quay,
Allen,	George,	Lindsay,	Rawlins,
Baker,	Gorman,	Lodge,	Sewell,
Bate,	Hanna,	McMillan,	Shoup,
Butler,	Hansbrough,	Mantle,	Telier,
Caffery,	Harris, Kans.	Martin,	Thurston,
Cannon,	Harris, Tenn.	Mason,	Tillman,
Clark,	Hawley,	Mitchell,	Wellington,
Daniel,	Jones, Ark.	Morgan,	White,
Davis,	Jones, Nev.	Morrill,	Wolcott.
Elkins,	Kenney,	Penrose,	

So Mr. VEST's amendment was rejected.

Mr. ALLISON. I ask the Secretary to read the paragraph as it stands.

The VICE-PRESIDENT. The Secretary will read as requested.

The Secretary read as follows:

> 413. Matches, friction or lucifer, of all descriptions, per gross of 144 boxes, containing not more than 100 matches per box, 8 cents per gross; when imported otherwise than in boxes containing not more than 100 matches each, three-fourths of 1 cent per 1,000 matches.

Mr. ALLISON. That is all right.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 414, page 149, line 13, after the word "caps," to strike out:

> And 10 per cent ad valorem; safety fuse, covered in part or wholly with yarns, tape, or gutta-percha, 45 per cent ad valorem.

So as to make the paragraph read:

> 414. Percussion caps, 30 per cent ad valorem; cartridges, 35 per cent ad valorem; blasting caps, $2.36 per 1,000 caps.

The amendment was agreed to.

Mr. VEST. I wish to call the attention of Senators from the mining States to this very large increase upon blasting caps. In the Wilson Act we put the duty at $2.07 a thousand caps. Very great complaint was then made from the mining States because so large a duty was imposed. Now it is proposed to make it $2.36 and 10 per cent ad valorem, I believe, or 15 per cent.

Mr. FRYE. The ad valorem duty is stricken out.

Mr. VEST. Very well. It is proposed to make it $2.36 a thousand, an increase from $2.07 to $2.36. I move to strike out "$2.36" and insert "$2.07," to which I call the attention of Senators from the mining States, who understand the matter much better than I do.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the Senator from Missouri.

The amendment was rejected.

Mr. PETTIGREW. I see the committee have stricken out the provision which placed the duty at 45 per cent ad valorem upon blasting or safety fuse, used in mining operations. I should like to ask what the duty will be on safety fuse with this provision stricken out of the bill?

Mr. ALLISON. It will come under paragraph 411, page 148, 30 per cent. or if covered with gutta-percha it will be 35 per cent.

Mr. PETTIGREW. It will be 35 per cent if covered with gutta-percha?

Mr. ALLISON. Yes, sir; the rates will be 35 and 30 per cent.

Mr. PETTIGREW. Then the rate will be according to what composes the principal part of the fuse. Suppose it is formed of linen; the rate would be under the blanket clause in regard to linen?

Mr. ALLISON. None of it will pay over 45 per cent under any basket clause.

Mr. PETTIGREW. Under the basket clauses the duty would vary, according to what the article is made of?

Mr. ALLISON. Yes, sir; 30, 35, and 40.

Mr. PETTIGREW. I move to add, at the end of paragraph 414, just what the committee have stricken out, amending it by striking out "forty-five" and inserting "ten," so that the duty on safety fuse will be 10 per cent ad valorem. It will then read:

Safety fuse, covered in part or wholly with yarns, tape, or gutta-percha, 10 per cent ad valorem.

This is the fuse used in the mining regions of our country. Four firms manufacture it. Two years ago they sold it for $2.80 a thousand feet. To-day they sell it for $4.95 per thousand feet. They have formed a combination by which they sell to the powder dealers only and compel them to charge the price fixed by the combination. The combination is formed upon the plan of the sugar trust and the other trusts in this country. Last year certain persons started to build a factory in Chicago. The combination thereupon put down the price to a low figure, $1.50 a thousand below what they are now charging, and discouraged those people so that they went out of business, and immediately the price was raised back to $4.95. I am credibly informed that they propose to increase the price from $4.95 to $5.50 a thousand in case they can get the duties provided in this bill.

Under these circumstances, and owing to the fact that the law of competition is completely overturned, the theory upon which we levy protective duties, it seems to me the rates should be placed at a point where competition can operate, so that the mining industry of the country will not be subject to this burden. There are but few people engaged in the industry; in fact, only three or four families, perhaps not more than a dozen people in all, and the work is done by machinery, scarcely any labor being employed.

I ask the Secretary to read a letter which I have received in regard to this trust.

The Secretary read as follows:

DENVER, COLO., *May 21, 1897.*

DEAR SIR: The most satisfactory way to convince those interested that a trust is in existence among the fuse manufacturers of this country is to relate my own business experience.

Some six years ago I was appointed commission agent for this district of the Judson Dynamite and Powder Company, of San Francisco. This company handled exclusively the product of the Western Fuse Company. At that period, and for some time subsequently, there was no uniformity in the price, but the average cost for double-tape fuse delivered at Colorado common points was about $5.50 per thousand feet. Several sales, however, were made by me at less figures, and out of which I received a commission of $1 per case, or about 17 cents per thousand feet. In open competition on one occasion I was authorized by E. G. Lukens, president of the Judson Dynamite and Powder Company, to offer Western fuse in carload lots as low as $2.80 per thousand feet delivered in Colorado, provided I waive my commission, which is prima facie evidence that the cost at the factory could not exceed $2.25.

Later on, not making sufficient profit in the business, the manufacturers held a meeting, a compact was formed, the price (at this point) of fuse from the East as well as West was advanced to $5.15, and the Judson Company officially informed me that a combination of the fuse manufacturers had been effected and that the prices named by them must be maintained at all hazards or a heavy penalty would be inflicted. Under these arrangements the powder companies received a commission of 10 per cent on all sales, and the total amount of the monthly purchases made by them, less the commission, was paid into the San Francisco Fuse Association on the 1st of the following month and distributed thereafter among the fuse companies, the latter on their part agreeing to sell only to the powder companies.

A year or so ago, as stated in my last letter, a Chicago factory was contemplated, but did not materialize, because the trust immediately reduced the price to $4.50. As soon, however, as the new concern was sufficiently frightened to drop the proposed scheme up went the price to $4.95, and it is intended to give it a further boost if the 45 per cent duty of the Dingley bill becomes a law.

I may furthermore say, for your guidance, that nearly all the fuse used in this State comes from California, and is supplied to the trade in the following manner:

Judson Dynamite and Powder Company furnishes Western fuse.
California Powder Company furnishes Eva fuse.
Giant Powder Company furnishes Ensign, Bickford & Co. fuse.

This, in brief, is the history of the fuse combination, and will, I trust, assist you in accomplishing the object we all have in view.

Yours, respectfully,

J. FITZ. BRIND.

Senator PETTIGREW, *Washington, D. C.*

Mr. PETTIGREW. I have further information with regard to this trust which I also desire to have read and placed in the RECORD. It appears that the combination of fuse makers not only have fixed the price arbitrarily at more than 100 per cent profit, but they have also divided the country between them and said what portion of it should be plundered by one member of the combination and what portion of it should be plundered by another. If we are passing a tariff bill for the purpose of making the rate so that these combinations can go to the limit of the tariff in the price they charge, it is well for the people of this country to understand it. We will have the issue well defined. We will have it distinctly presented that the purpose of the bill is to give the trust a chance to charge the limit of the tariff, not to furnish competition, so as to provide cheaper goods to our own people, but to prevent competition, overthrowing the laws of trade and declaring that competition is killing. I ask the Secretary to read the article which I send to the desk.

The Secretary read as follows:

The fuse is made entirely by machine, made by four firms, all of which are close corporations—Ensign, Bickford & Co., controlled by a single family, Ensign being a son-in-law of Bickford; the Climax Fuse Company, composed of two or three stockholders, both located at Simsbury, Conn.; the Western Fuse Company and the Eva Fuse Company, of San Francisco. Ensign, Bickford & Co. also have a branch in San Francisco. Two associations have been formed, the three concerns doing business in San Francisco and the two located in Connecticut. These two associations work in the most absolute harmony. The price at which fuse is to be sold is fixed by the Western association, selling as far as Colorado, which is the common point for both associations. The fuse is sold to powder companies only, which make their settlements monthly with an agent of each association, the proceeds of sales being divided between the different fuse companies by the agent. The price of fuse in this market before the combination was formed was about $3.50 per 1,000 feet in carload lots. Since the formation of these associations the price has been gradually raised, until now the price paid by the powder companies is $4.95 per 1,000 feet in carload lots or less.

The fuse is made entirely by machinery and, though a very important industry, does not require the employment of a large number of men. The combination is one of the most compact in the United States. The powder company is required to report every sale of fuse made, and the settlements are made upon these reports. The tariff rate has been uniformly 35 per cent ad valorem since the passage of the McKinley bill, no change having been made in the Wilson bill, and the same rate is imposed by the Dingley bill as it came from the House.

Representations have been made to our Senators that the effect of the maintenance of this rate has been to raise the price of fuse in this market, and that a 10 per cent duty is sufficient for protection, and action will doubtless be taken in the Senate committee.

Mr. PETTIGREW. It seems a new way to secure prosperity, that we should select these trusts and combinations and place an excessive rate upon what they produce in order to facilitate that which they are already doing, combining and charging the highest possible price for their products. This fuse is used in the mining States. I propose to put upon record, by the yeas and nays, the Senators from those States, and see whether a caucus combination is strong enough to compel them to vote to make the miner pay this bonus to the combination of fuse makers.

Mr. WILSON. May I ask the Senator from South Dakota a question? Do the miners pay for the fuse?

Mr. PETTIGREW. Most certainly they pay for it.

Mr. WILSON. Do not the owners of the great mines have to pay for it?

Mr. PETTIGREW. All over that mining country, all over the State represented in part by the Senator from Washington, are thousands of men prospecting. The great mines are few, but the prospectors and the miners are many. Thousands of men in his State and my State are out through those mountains prospecting for mines, sinking shafts, running tunnels, developing their property. They are buying the fuse for that purpose. Their number, compared with the number of men connected with great mines who buy it, is twenty to one. Most certainly the miners buy the fuse, and they pay for it. Most certainly it is a tax upon every toiler and producer in that country.

Mr. WILSON. When I sunk a shaft I bought my own fuse. The miners did not buy it.

Mr. PETTIGREW. Yes; that is true. The Senator from Washington hired men and bought the fuse for them, no doubt; but, aside from the fact that he furnished the money and employed the men, as I said before, there are thousands of men all through the mountains in his State who themselves are purchasing the fuse and working and developing their own property.

The men I refer to are the pioneers of the mining industry and are entitled to our special care. They were buying fuse for $3.50 per 1,000 feet, and in a week it rose to $6.50 per 1,000 feet. They know this was done by a combination of producers, and they have not forgotten and will not forget or forgive the men who put this unjust and dishonest burden upon them. These men are the very bone and sinew of our mining industries. They are industrious, honest, persistent. To them we owe a debt of gratitude which will never be paid. Are Senators going to vote to leave them where this greedy combination of rich firms can contrive to plunder them and grow richer at their expense?

Mr. TELLER. Mr. President, the mining in this country is largely carried on by the individual efforts of poor men, and while

the Senator from Washington may be sufficiently strong in his capital to pay for the fuse without noticing the loss, it is not true of a great many men who are producing gold and silver in the United States.

Mr. WILSON. May I interrupt the Senator from Colorado?

Mr. TELLER. Certainly.

Mr. WILSON. This question has been brought up simply by the interrogatory I made. I did purchase the fuse, but I "got broke" in the business.

Mr. TELLER. The Senator was like a good many other men who have attempted to mine in the Western country. He "got broke." I think the majority of those who have mined have "gone broke" at some time. It is the exception when a man gets rich at mining. And one hears about the exceptions and never hears about the broken people. In many parts of the West probably 75 per cent of the output comes from men who do their own labor and own their own mines, or if they are not the owners of the mines they are lessees. That is the class of men who are taxed by the imposition of duties upon fuse.

I challenge the committee to show that anybody has given them any evidence whatever that they can justify themselves in saying that there is a condition in the United States touching the fuse business that requires an additional tariff on fuse. If there has been anybody before the committee, it is the trust, the combination of which the Senator from South Dakota has spoken—a combination that has added very materially to the cost of fuse within the last two years, and a combination which proposes, if this additional duty is put on, to add again to the burdens upon the miners.

Mr. President, I do not know upon what theory this bill goes. I do not know whether it is the theory of the committee and party that are backing the pending bill that it is a bill upon protective principles or a bill for revenue, or whether it is a bill for both purposes. I do know, though, that, whether it is a bill for protection or revenue, there is no justification for an increase of duty at this time upon this article. If it is a bill for revenue, the revenue derived from the article is trifling and small, and it is not a subject-matter upon which the Government of the United States ought to be attempting to get revenue. If it is for protection, I challenge the committee to show that there is any reason on the face of the earth why there should be an additional duty put upon it unless it is that it may assist and support this trust with other trusts.

The mining industry of the country is one to be encouraged, whether it be the mining of iron, coal, copper, silver, or gold, and it can not be encouraged by putting an additional duty, as the committee have done, upon fuse, and an extra duty upon cyanide and other things that are calculated to burden the mining interests. As one in favor of protection, I would be willing that there should be a fair duty upon every article that enters into the mining industry necessary for the protection of those engaged in the industry of producing fuse, cyanide, or anything else. I am willing that the mining industry shall bear its share in supporting the protective system, because it has been the protective theory (and the protective theory is good for nothing unless it is true) that eventually, when we have built up the enterprises and industries in this country, the men who paid the additional price and bore the additional burdens should then be benefited.

Mr. President, if the committee can show on this or any other article that there is a necessity for an increased duty in order that they may procure for the American manufacturer and the American producer a market that will equalize the labor in this country and the labor in some other country where the article is produced, I am willing that an industry that is so large in my State shall bear its proportion of the burden. I am not one of those who believe that the people who import goods into this country bear the entire burden of an import duty. I know they do not. But I am not willing, for the sake of building up and strengthening a trust already burdensome to the people who are mining, we should add to the burdens they are already bearing. It is a little matter, and yet it is a great matter to the man who goes out upon the mountain side, with nothing but his pick and shovel, perhaps, in the way of capital and his strength, that he must pay an additional duty upon these articles that are essential and necessary in order that he may develop the interests of the country and secure a paying mine.

If any member of the committee will simply rise here and say that they have some evidence which shows that this is an industry that needs more protection, I am willing to sit down. I want to know upon what theory the bill is being presented and advocated and supported. If the Senators who compose the committee show that they want this duty for revenue, then I protest that they shall not put an additional burden upon the miner for the sake of revenue. There are a hundred things untouched out of which revenue can be had without imposing a burden upon any industry in this country, and this is the imposition of a duty upon an industry.

Mr. PLATT of Connecticut. Mr. President, this is the most remarkable tempest in a teapot that I have ever known. If any one wants to get a thing without a duty, all he has to do is to read a newspaper article and say that there is a trust in it. Now, whether there is a trust in this matter or not I do not know, for I do not know what the trust is, nor do I know what the facts are with relation to the parties engaged in the manufacture of it. I do know that there are more manufacturers of it in the United States than the number stated in the article which was read saying that there are but four. There are at least seven.

It is said that we have increased the duty on this article. It happens to be, so far as I know, the only thing in the bill in which the duty on every article of which it is composed is as high or higher than the duty on the finished product. I do not know but that we have done some wicked things in this matter, but the duty upon every article of which safety fuse is composed is as high or higher as an ad valorem duty than the duty which is imposed in the bill. If that is wickedness, why, vote it down.

Mr. TELLER. Mr. President, it is fair to presume that the bill is being presented here and pushed upon some theory. I do not suppose any member of the committee will rise here and say that where they have raised the duty upon any article they have done so without any examination as to why it should be put on. I want the committee to tell me why they have raised the duty on fuse?

Mr. PLATT of Connecticut. We have not.

Mr. TELLER. And I shall ask them to tell me why they have raised the duty on some other things before we get through.

Mr. PLATT of Connecticut. The duty on fuse made of guttapercha, and that is quite a large proportion of the fuse, has not been raised by the bill. It is the same that it is now. If that covered by linen and jute yarns or tape would come in under the basket clause, it would be 45 per cent instead of 35 per cent as it is now, because the basket clause has been raised from 35 per cent to 45 per cent. If it comes in as the Senator from Iowa, who has charge of the bill, thinks, under paragraph 111, instead of raising the duty we have lowered it. That is all there is to this matter.

Mr. WHITE. Perhaps the Senator from Connecticut will inform us from whence the application came to increase the duty, or to fix the duty, as the committee seems to be unaware of the proposition as to whether it raises or lowers it. Is it possible to inform the Senate from whence the application came to make the alteration? It seems to have adopted new phraseology.

The VICE-PRESIDENT. The question is on the amendment of the Senator from North Dakota [Mr. PETTIGREW].

Mr. PETTIGREW and Mr. WHITE called for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. CANNON (when his name was called). I am paired with the Senator from Rhode Island [Mr. ALDRICH]. If he were here, I should vote "yea."

Mr. CLAY (when his name was called). I transfer my pair with the Senator from Massachusetts [Mr. LODGE] to the Senator from Virginia [Mr. MARTIN], and vote "yea."

Mr. MITCHELL (when his name was called). I am paired with the Senator from New Jersey [Mr. SEWELL]. If he were present, I should vote "yea."

Mr. MORGAN (when his name was called). I am paired with the Senator from Pennsylvania [Mr. QUAY].

Mr. PENROSE (when his name was called). I am paired with the junior Senator from Delaware [Mr. KENNEY]. If he were present, I should vote "nay."

Mr. RAWLINS (when his name was called). I am paired with the junior Senator from Ohio [Mr. HANNA]. If he were present, I should vote "yea."

Mr. SMITH (when his name was called). I ask if the junior Senator from Iowa [Mr. GEAR] has voted?

The VICE-PRESIDENT. He has not voted.

Mr. SMITH. I withhold my vote, as I am paired with that Senator.

Mr. TILLMAN (when his named was called). I again announce my pair with the Senator from Nebraska [Mr. THURSTON]. If he were present, I should vote "yea."

Mr. TURPIE (when his name was called). I inquire if the Senator from Minnesota [Mr. DAVIS] has voted?

The VICE-PRESIDENT. The Senator from Minnesota [Mr. DAVIS] has not voted.

Mr. TURPIE. I withhold my vote, being paired with that Senator.

The roll call was concluded.

Mr. GRAY (after having voted in the affirmative). I ask if the senior Senator from Illinois [Mr. CULLOM] has voted?

The VICE-PRESIDENT. He has not voted.

Mr. GRAY. I have a general pair with the senior Senator from Illinois, but I understand that the senior Senator from Arkansas [Mr. JONES] is absent on committee business, and I will transfer my pair with the senior Senator from Illinois to the senior Senator from Arkansas and let my vote stand.

Mr. HAWLEY (after having voted in the negative). I inadvertently voted. I am paired with the Senator from Tennessee [Mr. BATE], and withdraw my vote.

Mr. DANIEL. I am paired with the senior Senator from North Dakota [Mr. HANSBROUGH]. Otherwise I should vote "yea."

Mr. HAWLEY. I am informed that I can transfer my pair to the Senator from Illinois [Mr. MASON], and I do so. I vote "nay."

The result was announced—yeas 24, nays 24; as follows:

YEAS—24.

Allen,	Gray,	Mills,	Stewart,
Bacon,	Heitfeld,	Murphy,	Teller,
Berry,	Kyle,	Pasco,	Turner,
Butler,	McLaurin,	Pettigrew,	Vest,
Chilton,	Mallory,	Pettus,	Walthall,
Clay,	Mantle,	Roach,	White.

NAYS—24.

Allison,	Foraker,	Nelson,	Shoup,
Burrows,	Frye,	Perkins,	Spooner,
Carter,	Gallinger,	Platt, Conn.	Warren,
Chandler,	Hawley,	Platt, N. Y.	Wellington,
Deboe,	Hoar,	Pritchard,	Wetmore,
Fairbanks,	McBride,	Proctor,	Wilson.

NOT VOTING—41.

Aldrich,	Faulkner,	Kenney,	Quay,
Baker,	Gear,	Lindsay,	Rawlins,
Bate,	George,	Lodge,	Sewell,
Caffery,	Gorman,	McEnery,	Smith,
Cannon,	Hale,	McMillan,	Thurston,
Clark,	Hanna,	Martin,	Tillman,
Cockrell,	Hansbrough,	Mason,	Turpie,
Cullom,	Harris, Kans.	Mitchell,	Wolcott.
Daniel,	Harris, Tenn.	Morgan,	
Davis,	Jones, Ark.	Morrill,	
Elkins,	Jones, Nev.	Penrose,	

So Mr. PETTIGREW's amendment was rejected.

The Secretary read the next paragraph, as follows:

415. Feathers and downs of all kinds, including bird skins or parts thereof with the feathers on, crude or not dressed, colored, or otherwise advanced or manufactured in any manner, not specially provided for in this act, 15 per cent ad valorem: when dressed, colored, or otherwise advanced or manufactured in any manner, including quills of down and other manufactures of down, and also dressed and finished birds suitable for millinery ornaments, and artificial or ornamental feathers, fruits, grains, leaves, flowers, and stems or parts thereof, of whatever material composed, not specially provided for in this act, 50 per cent ad valorem.

Mr. ALLISON. I ask that that paragraph may be passed over.

Mr. WHITE. It is to be passed over, I understand.

The VICE-PRESIDENT. Is there any objection? The Chair hears none, and paragraph 415 is passed over.

The next amendment of the Committee on Finance was, in paragraph 416, page 150, line 5, before the word "twenty," to insert "including fur skins carroted;" so as to make the paragraph read:

416. Furs, dressed on the skin but not made up into articles, and furs not on the skin, prepared for hatters' use, including fur skins carroted, 20 per cent ad valorem.

The amendment was agreed to.

The reading of the bill was continued to line 13 on page 150, the last paragraph read being as follows:

420. Hair, curled, suitable for beds or mattresses, 10 per cent ad valorem.

Mr. ALLISON. I move to strike out paragraph 420 and insert what I send to the desk. It is a modification of the paragraph.

The VICE-PRESIDENT. The amendment will be read.

The SECRETARY. Strike out paragraph 420 and insert in lieu thereof the following:

420. Hair curled, suitable for beds or mattresses, and hair drawn or cleaned, 15 per cent ad valorem.

Mr. GRAY. I will ask the Senator from Iowa if that is not a restoration of the rate in the law of 1890?

Mr. ALLISON. I believe it is.

Mr. GRAY. It is an abandonment of the reduction proposed by the Senate committee and a restoration of the McKinley rate. I merely want to remark that here is another illustration of the abandonment of the reductions that were heralded to be made in the bill by the Senate committee and the restoration of high rates.

The VICE-PRESIDENT. The question is on the amendment of the Senator from Iowa.

The amendment was agreed to.

The next amendment of the Committee on Finance was, in paragraph 421, page 150, line 15, after the words "hair seating," to insert "and hair press cloth;" so as to make the paragraph read:

421. Haircloth, known as "crinoline" cloth, 10 cents per square yard; haircloth, known as "hair seating," and hair press cloth, 20 cents per square yard.

The amendment was agreed to.

Mr. WHITE. I move to strike out the paragraph as amended and to insert in lieu thereof paragraph 333 of the present law, which fixes the rate at 6 cents per square yard.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. Insert, instead of paragraph 421 as modified, the following:

421. Haircloth, known as "crinoline cloth," 6 cents per square yard.

Mr. VEST. Before the vote is taken I want to call attention to the fact that here is another increase over the McKinley rate. In the Wilson Act—the existing law—the duty is 6 cents per square yard, and under the McKinley Act it was 8 cents a square yard. Now it is put up to 10 cents a square yard, and yet we were told by the Senator from Rhode Island that none of the rates would go above the McKinley rates, and a great many of them were below the existing law.

The VICE-PRESIDENT. The question is on the amendment proposed by the Senator from California.

The amendment was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 423, page 151, line 4, after the word "ware," to strike out—

per gross of 144 boxes, containing not more than 100 matches per box, 10 cents per gross; when imported otherwise than in boxes containing not more than 100 matches each, 1 cent per 1,000 matches—

and insert "manufactures of wood or other pulp;" so as to make the paragraph read:

423. Indurated fiber ware and manufactures of wood or other pulp, 35 per cent ad valorem.

Mr. ALLISON. In line 9, after the word "pulp," I move to insert "not specially provided for."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment of the Committee on Finance was, on page 151, under the heading of "Jewelry and precious stones," paragraph 424, line 13, after the word "thereof," to insert "finished or unfinished;" in line 15, after the word "set," to strike out "or strung;" and in line 16, before the words "per cent," to strike out "fifty" and insert "sixty;" so as to make the paragraph read:

424. Articles commonly known as jewelry, and parts thereof, finished or unfinished, not specially provided for in this act, including precious stones set, pearls set, and cameos in frames, 60 per cent ad valorem.

Mr. VEST. I call attention to the fact that there is another increase over the McKinley Act, it being an increase from 50 per cent to 60 per cent. Under the existing law the rate is 35 per cent.

The PRESIDING OFFICER (Mr. BURROWS in the chair). The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The next amendment was, in paragraph 425, page 151, line 20, after the word "set," to strike out "15 per cent ad valorem;" and in line 1, page 152, after the word "set," to strike out "twenty" and insert "all the foregoing, ten;" so as to make the paragraph read:

Diamonds and other precious stones advanced in condition or value from their natural state by cleaving, splitting, cutting, or other process, and not set; imitations of diamonds or other precious stones, composed of glass or paste, not exceeding an inch in dimensions, not engraved, painted, or otherwise ornamented or decorated, and not mounted or set, all the foregoing, 10 per cent ad valorem.

Mr. ALLISON. I ask that paragraph 425 may be passed over.

The PRESIDING OFFICER. If there be no objection, paragraph 425 will be passed over.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 426, page 152, line 3, after the word "state," to strike out "not strung or set" and insert "pearls strung on silk or cotton threads and not set;" so as to read:

426. Pearls in their natural state and pearls strung on silk or cotton threads and not set, 10 per cent ad valorem.

Mr. ALLISON. After the word "state," in line 3, I move to insert "half pearls."

The PRESIDING OFFICER. The amendment proposed by the Senator from Iowa to the amendment proposed by the committee will be stated.

The SECRETARY. In paragraph 426, page 152, line 3, after the word "state," it is proposed to insert the words "half pearls."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The Secretary resumed the reading of the bill, beginning at line 6, on page 152, under the head of "Leather and manufactures of," paragraph 426½.

Mr. ALLISON. That is a paragraph proposed to be inserted by the committee in relation to hides, and I ask that it may be passed over for the present.

The PRESIDING OFFICER. The paragraph will be passed over, without objection.

The reading of the bill was resumed. The next amendment of the Committee on Finance was to strike out paragraph 427, as follows:

427. Band or belting leather, sole leather and skins for morocco, tanned but unfinished, 10 per cent ad valorem; calfskins, kangaroo skins, and sheep and goat skins, including lamb and kid skins, tanned or tanned and dressed and finished, chamois and other skins, and dressed upper and other leather, not specially provided for in this act, 20 per cent ad valorem; pianoforte leather and pianoforte-action leather, 35 per cent ad valorem; patent, japanned, varnished, and enameled leather, weighing not over 10 pounds per dozen hides or skins, 30 cents per pound and 20 per cent ad valorem; weighing over 10

pounds per dozen and not over 25 pounds per dozen, 30 cents per pound and 10 per cent ad valorem; weighing over 25 pounds per dozen, 20 cents per pound and 10 per cent ad valorem; leather shoe laces, wholly or partially manufactured, 36 inches or less in length, 55 cents per gross pairs and 20 per cent ad valorem; exceeding 36 inches in length, 60 cents per gross pairs and 25 per cent ad valorem; boots, shoes, and slippers made of leather, 20 per cent ad valorem: *Provided*, That leather cut into boot, shoe, or slipper patterns, uppers or vamps, or other forms suitable for conversion into manufactured articles, shall pay a duty of 15 per cent ad valorem in addition to the duty herein imposed on leather of the same character as that from which they are cut.

And in lieu thereof to insert:

427. Band or belting leather and sole leather, 20 per cent ad valorem; calfskins, tanned, or tanned and dressed, dressed upper leather, including patent, enameled, and japanned leather, dressed or undressed, and finished, and other leather; chamois or other skins not specially enumerated or provided for in this act, 20 per cent ad valorem; bookbinders' calfskins, kangaroo, sheep, and goat skins, including lamb and kid skins, dressed and finished, 20 per cent ad valorem; skins for morocco, tanned but unfinished, 10 per cent ad valorem; pianoforte leather and pianoforte-action leather, 20 per cent ad valorem; boots and shoes, made of leather, 25 per cent ad valorem: *Provided*, That leather cut into shoe uppers or vamps, or other forms, suitable for conversion into manufactured articles, shall be classified as manufactures of leather, and pay duty accordingly.

Mr. ALLISON. On page 153, line 21, after the word "leather" where it occurs the second time, I move to insert the words "and all other leather not otherwise specially provided for."

The PRESIDING OFFICER. The amendment proposed by the Senator from Iowa will be stated.

The SECRETARY. In paragraph 427, on page 153, line 21, after the word "leather" where it occurs the second time, it is proposed to insert "and all other leather not otherwise specially provided for;" so as to read:

Band or belting leather and sole leather, and all other leather not otherwise specially provided for, 20 per cent ad valorem, etc.

The amendment to the amendment was agreed to.

Mr. ALLISON. I now move to strike out, at the beginning of line 2, on page 154, the words "and other leather," those words being part of the amendment already inserted.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The SECRETARY. In paragraph 427, on page 154, line 2, before the word "chamois," it is proposed to amend the amendment of the committee by striking out the words "and other leather."

The amendment to the amendment was agreed to.

Mr. VEST. I want to make a suggestion to the Senator from Iowa, which is that we should ascertain whether hides are to be put upon the free list before we go on with this paragraph. I take it for granted, if the Senate determine to put hides upon the free list, or to retain them there, that that will very materially affect the tax upon leather, the finished product.

Mr. SMITH. I ask that the paragraph relating to hides may go over until to-morrow.

Mr. ALLISON. I have no objection to that.

The PRESIDING OFFICER. If there be no objection, paragraph 427 will be passed over until to-morrow, and the next paragraph will be read.

Mr. ALLEN. Before that is done, I should like to ask the Senator from Iowa if the committee has agreed as to the policy to be pursued respecting hides?

Mr. ALLISON. I will say frankly to the Senator that the only object I have in agreeing that the paragraph in relation to hides be passed over is to ascertain whether or not we can make a specific duty on hides which will be just in its application. I think it is possible we shall be obliged to make the duty on hides ad valorem rather than specific.

Mr. ALLEN. I have no objection to that.

Mr. ALLISON. I will say to the Senator that so far as I know the committee intend to ask the Senate to retain the duty on hides, either specific or ad valorem.

Mr. ALLEN. That is satisfactory.

Mr. STEWART. I hope there will be a sufficient duty to be appreciable and that will amount to something.

Mr. ALLISON. I hope so, too.

Mr. STEWART. I do not believe the duty now proposed in the amendment of the committee will amount to very much. I think there ought to be a larger duty.

Mr. ALLEN. If the Senator will permit me, I think it would be altogether improper for us to go on with this schedule and to cast our votes on certain items which will come up, on the supposition that an attempt will be made to put hides upon the dutiable list, and at the eleventh hour to find out that the committee is against it.

Mr. ALLISON. I think I can assure the Senator from Nebraska that if there should be an eleventh hour about this matter the committee will stand upon the question where it has stood all the time. I say this, of course, speaking merely for myself.

Mr. ALLEN. Thank you.

The reading of the bill was resumed at page 154, on line 17, under the heading "Gloves," paragraph 428.

Mr. ALLISON. Several Senators have asked that the glove schedule, covering paragraphs 428 to 435, inclusive, may be passed over. I hope there will be no objection to that course.

Mr. WHITE. I suggest that paragraph 436 ought to be included also.

Mr. ALLISON. No; I trust paragraph 436 will be considered now.

The PRESIDING OFFICER. Does the Chair understand that paragraph 436 has been passed over?

Mr. ALLISON. No; I proposed to pass over paragraphs 428 to 435, inclusive.

The PRESIDING OFFICER. If there be no objection, the paragraphs named will be passed over.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, on page 157, line 20, to strike out the subhead "Harness and saddlery."

The amendment was agreed to.

Paragraph 436 was read, as follows:

436. Harness, saddles and saddlery, or parts of either, in sets or in parts, finished or unfinished, 45 per cent ad valorem.

Mr. WHITE. I inquire of the Senator from Iowa whether this paragraph is not also affected by the same proposition regarding free hides?

Mr. ALLISON. Not at all.

Mr. WHITE. I presume there is some compensatory duty. There should be no compensation if there is no tax on hides.

Mr. PLATT of Connecticut. No amendment is made in that paragraph, the House rates having been adopted by the Senate Committee on Finance.

Mr. VEST. I want to call attention to the fact that the duty proposed in paragraph 436 is an increase over the McKinley rate. The McKinley rate was 35 per cent, the Wilson rate 30 per cent, and this is 45 per cent.

The PRESIDING OFFICER. The reading of the bill will be resumed.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, under the head of "Miscellaneous manufactures," in paragraph 437, page 157, line 25, after the word "amber," to strike out "asbestus" and insert "asbestos," and in line 26, before the word "catgut," to strike out "coral;" so as to read:

Manufactures of amber, asbestos, bladders, catgut or whip gut or worm gut, etc.

Mr. WHITE. So far as coral is concerned, I observe that the importations in 1893 furnished revenue amounting to $657, and in 1896 to $758, and this amendment, so far as coral is concerned, is an increase of 100 per cent, a rise from the law of 1894 of 50 per cent, instead of 25 per cent. It was quite prohibitory as it stood.

The amendment was agreed to.

The next amendment of the Committee on Finance was, in the same paragraph, line 26, after the words "worm gut," to strike out "spar."

Mr. ALLISON. I ask that that amendment may be disagreed to.

The PRESIDING OFFICER. If there be no objection, the amendment will be disagreed to. The Chair hears none, and it is so ordered.

Mr. ALLISON. I also ask that the word "cork" may be inserted after the word "bladders," in line 25.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. In paragraph 437, line 25, after the word "bladders," it is proposed to insert "cork;" so as make the paragraph read:

437. Manufactures of amber, asbestos, bladders, cork, catgut or whip gut or worm gut, spar, or wax, or of which these substances or either of them is the component material of chief value, not specially provided for in this act, 25 per cent ad valorem.

The amendment was agreed to.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 442, page 159, line 6, after the word "metronomes," to strike out "35 per cent ad valorem;" and in line 8, after the word "metal," to insert "all the foregoing;" so as to make the paragraph read:

442. Musical instruments or parts thereof, pianoforte actions and parts thereof, strings for musical instruments not otherwise enumerated, cases for musical instruments, pitch pipes, tuning forks, tuning hammers, and metronomes; strings for musical instruments, composed wholly or in part of steel or other metal, all the foregoing, 45 per cent ad valorem.

The amendment was agreed to.

Mr. WHITE. I move to strike out paragraph 442 as amended and insert in lieu thereof paragraph 326½ of the present law.

The PRESIDING OFFICER. The amendment proposed by the Senator from California will be stated.

The SECRETARY. It is proposed to strike out paragraph 442 as amended and in lieu thereof to insert:

Musical instruments or parts thereof (except pianoforte actions and parts thereof), strings for musical instruments not otherwise enumerated, cases for musical instruments, pitch pipes, tuning forks, tuning hammers, and metronomes, 25 per cent ad valorem.

The PRESIDING OFFICER. The question is on the amendment of the Senator from California [Mr. WHITE], being a substitute for paragraph 442, which has been read.

The amendment was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was to strike out paragraphs 443 and 444, as follows:

443. Paintings in oil or water colors, pastels, pen-and-ink drawings, and statuary, not specially provided for in this act, 25 per cent ad valorem; but the term "statuary" as used in this act shall be understood to include only such statuary as is cut, carved, or otherwise wrought by hand from a solid block or mass of marble, stone, or alabaster, or from metal, and as is the professional production of a statuary or sculptor only.

444. Peat moss, $1 per ton.

Mr. ALLISON. I ask that those two paragraphs may be passed over.

The PRESIDING OFFICER. Paragraphs 443 and 444 will be passed over, in the absence of objection.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 445, on page 159, line 19, before the word "wood," to insert the words "paper or;" in line 20, before the word "cents," to strike out "fifty" and insert "forty;" in line 21, before the words "per cent," to strike out "thirty" and insert "twenty;" and in the same line, after the words "slate pencils," to strike out "4 cents per 100," and insert "covered with wood, 35 per cent ad valorem; all other slate pencils, 3 cents per 100;" so as to make the paragraph read:

445. Pencils of paper or wood filled with lead or other material, and pencils of lead, 40 cents per gross and 20 per cent ad valorem; slate pencils covered with wood, 35 per cent ad valorem; all other slate pencils, 3 cents per 100.

Mr. FORAKER. I ask that that paragraph may be passed over.

The PRESIDING OFFICER. The paragraph will be passed over, in the absence of objection.

The reading of the bill was resumed. The next amendment of the Committee on Finance was to strike out paragraph 448, in the following language:

448. Pipes, pipe bowls, of all materials, and all smokers' articles whatsoever, not specially provided for in this act, including cigarette books, cigarette-book covers, pouches for smoking or chewing tobacco, and cigarette paper in all forms, 70 per cent ad valorem; all common tobacco pipes of clay, 15 cents per gross.

And in lieu thereof to insert:

448. Pipes and smokers' articles: Common tobacco pipes and pipe bowls made wholly of clay, valued at not more than 40 cents per gross, 15 cents per gross; other tobacco pipes and pipe bowls of clay, 50 cents per gross and 25 per cent ad valorem; other pipes and pipe bowls of whatever material composed, and all smokers' articles whatsoever, not specially provided for in this act, including cigarette books, cigarette-book covers, pouches for smoking or chewing tobacco, and cigarette paper in all forms, 60 per cent ad valorem.

Mr. VEST. I want to call attention to the fact that here is an increase of duty on the common clay pipe. I do not know any necessity for any such increase. The increase here is from 3 to 5 cents a gross. If there is any occasion, any reason for this, I should like to know it. It is an article used by the poorer class of people, and there is no necessity for putting up the duty either for protection or for revenue.

Mr. WHITE. I move to strike out paragraph 448 and to insert the provision of the present law, being paragraph 359 thereof.

The PRESIDING OFFICER. The amendment proposed by the Senator from California will be stated.

The SECRETARY. It is proposed to strike out paragraph 448 and in lieu thereof to insert:

Pipes, pipe bowls, of all materials, and all smokers' articles whatsoever, not specially provided for in this act, including cigarette books, cigarette-book covers, pouches for smoking or chewing tobacco, and cigarette paper in all forms, 50 per cent ad valorem; all common tobacco pipes and pipe bowls made wholly of clay, valued at not more than 50 cents per gross, 10 per cent ad valorem.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from California [Mr. WHITE].

The amendment was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, on page 160, after line 18, to insert as a new paragraph the following:

448½. Plows, tooth and disk harrows, harvesters, reapers, agricultural drills, and planters, mowers, horserakes, cultivators, threshing machines, and cotton gins, 20 per cent ad valorem.

The amendment was agreed to.

Mr. VEST. Mr. President, I want to call attention to the exports and imports for 1896 of these articles. We exported of mowers and reapers in that year $3,212,423 worth; of plows and cultivators, $746,604 worth, and of all others, $217,740 worth; of agricultural machines, $5,176,775 worth was the aggregate. We imported $6,532 worth free, and $1,992 dutiable.

These articles are exported largely, as this report shows, and it is a notorious fact that the United States is without any competition as to all sorts of metal production, and especially as to agricultural implements. I had occasion some years ago to read upon this floor the Export Journal, published in New York, which showed that the manufacturers of these implements were selling to foreigners at a third less than they were selling to the citizens of the United States.

The only explanation or defense of that which was made upon this floor was that they manufactured so largely that they had a surplus, which they were compelled to send to the foreign market and get what they could for it. They are doing that to-day. You may take the Export Journal to-day, and you will find these concerns delivering in South America and in Europe agricultural implements from one-fourth to one-third less than they sell them to the people of the United States. Anybody can see in Germany the agricultural implements of the United States, exported from this country and sold there in the German market, and underselling the German manufacturers, with all their cheap labor, of which we hear so much complaint.

Mr. WHITE. I can not imagine upon what theory this particular provision of the proposed law is constructed. Surely those who manufacture agricultural implements in the United States do not need protection. The statements made by the Senator from Missouri [Mr. VEST] are absolutely correct. In my own State we have an agricultural manufacturing establishment for agricultural machinery, where the combined harvester is made, and the machine has been exported to Argentina, to Odessa, and to other parts of the world. The reaping machines of the United States have not only taken precedence of all others everywhere else, but the actual primary inventions, those from which have been developed the present perfect machinery, have been due to the genius of the American inventor. The American plow, the American reaper, and the American thrashing machine are superior to anything in the world, and are sold all over the world where advanced agriculture has obtained any foothold.

I think the object of this amendment is to profess to extend some protective influence to the farmer just like that which the duty upon wheat has in it—the same profession and the same hypocrisy. It can not amount to anything in fact, unless, possibly, it may afford an opportunity to raise the price to the domestic consumer; but even that, I imagine, can not be done, because there is no place on the face of the world where agricultural machinery can be manufactured to the perfection attained here. Were it otherwise, were it possible to find any other place in the world where agricultural machinery could be produced of a better character than that which is enjoyed here, I should be in favor of a discrimination in favor of the farming community to enable them to obtain such machinery at the smallest cost possible. But, as a matter of fact, our agriculturists depend upon local machinery, and, as was well said by the Senator from Missouri, our local machinery is now being sold in every agricultural region of the world where civilization has been permitted to penetrate to any degree, not only in preference to their domestic productions, but to the exclusion of all other productions.

Some time ago, when our present minister in China was endeavoring to obtain access to China for machinery manufactured in California of an agricultural character, he had a conversation with the celebrated Li Hung Chang, in which, acting upon the suggestion of American manufacturers, he told him the character of our machinery. The distinguished Chinaman responded by saying that they could not permit that machinery to come into his country; that the Chinese had always been a people of inventive genius, and early in the history of the Chinese people they had displayed their aptitude in that direction; that their aspirations and genius had been stifled because the Empire had always acted upon the theory that the furnishing of employment to the millions was a necessity, and that labor-saving machinery could not be tolerated. We were therefore kept out of that market. But this paragraph must be introduced for joking purposes, it seems to me.

Mr. ALLISON. Unless this amendment is agreed to, agricultural implements will stand in the bill as it came to us from the other House, at 45 per cent ad valorem. It was with a view to reducing the duty that the Senate committee inserted this paragraph.

I remember perfectly well the old discussion here between the Senator from Missouri [Mr. VEST] and other Senators as to the price of agricultural implements in foreign countries, compared with their price in our own. I think—of course the Senator from Missouri will differ with me—it was conclusively demonstrated in that debate that the statement that agricultural implements were sold in other countries at a less price than they sold for here was a mistake. I know the Senator will not agree with me, as I say, in that suggestion; but I know the judgment of this side of the Chamber at that time was that the Senator from Missouri failed to make his case; and I am not aware that there has been any change in the condition of things since that debate took place.

I know perfectly well, as the Senator has already stated, that we export largely these agricultural implements, and I have no doubt we shall continue to do so; but they are upon the dutiable list as other things are upon the dutiable list of which we export largely and, as the Senator from Connecticut [Mr. PLATT] intimates to me, therefore it can do no possible harm and may do some good. This rate is far below the rate of the raw material from which these agricultural implements are made.

Mr. WHITE. Mr. President, I should consider myself enlightened if the Senator from Iowa would point out to me a single

instance where, except for purposes of exhibition, a harvester or thrashing machine has ever been imported into this country for the last twenty years, and not only as to that particular implement or instrument of husbandry, but taking the whole section through. Is it for the purpose of protecting the farmer, let me ask the Senator from Iowa, that this paragraph is put in here? Ostensibly it is to reduce the duty, as we are now informed by the Senator.

Mr. GRAY. To reduce the duty from the House bill.

Mr. WHITE. Yes; to reduce the duty. That it will do no harm is one sort of argument; but it is certainly a poor defense for an affirmative proposition to say that, if enacted into a law, it would be harmless. Harmlessness is urged in its defense. Why not eliminate it? Why insert in this bill the hypocrisy contained in that declaration, that pretense, that the farmer is being benefited, when in reality it does not benefit him at all? I do not believe it will do any very serious injury; I have not said so; but that is because of the circumstances and facts detailed here, that the American has the market in this country and everywhere else. We are therefore simply encumbering the bill with idle provisions and furnishing an argument to somebody to assert before some audiences that the farmer is being taken care of.

Mr. ALLISON. I do not think the audience would be very much deceived by such an argument.

Mr. WHITE. I should hope not.

Mr. GRAY. Two grounds are being urged here, and only two can reasonably be urged, for any imposition in this bill. One is for revenue and the other is for protection. It seems to me there is no ground for revenue in making this imposition of 20 per cent on agricultural machinery, because no revenue is produced, according to the statement made by the Senator from Missouri, and the Senator from Iowa confesses that there is no necessity on the ground of protection. So there is really no reason why the bill should be encumbered, as the Senator from California has said.

Mr. ALLISON. That is not quite my statement. I said there were large exportations, as stated by the Senator from Missouri. Our people are able to compete successfully, but there may be reasons why there should be a duty notwithstanding. Those reasons can be found in the proximity of other people who are engaged in the same manufacture.

Mr. GRAY. It has been demonstrated that we supply not only the domestic market, but a large part of the foreign market, and that no agricultural machinery can compete or has competed in the last fifty years with American machinery of this kind. Therefore it seems to me there ought not to be this defensive wall put up which may, the Senator says—although he can not point out how—at some day or in some manner not known raise the price of this machinery to the American farmer 20 per cent. That is all there is of it. It may not do much harm, but it is only put in there in order that it may some day serve as protection to the agricultural machinery makers in this country, and it can only serve as protection to them by raising the price to the American farmer. I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee inserting paragraph 448½.

The amendment was agreed to.

Mr. VEST. I move to strike out the paragraph as perfected, for the purpose of putting it on the free list, where it is under the existing law.

I wish to make one remark in reply to the Senator from Iowa. He makes the astonishing statement that it was demonstrated in 1890 that what I then asserted was being done—the sales of these articles cheaper abroad than in this country—has been absolutely done away with. I have those Export Journals to-day in my committee room, and they show discounts to foreigners of 25 to 40 per cent upon these articles. There never was any answer in this Chamber to it.

Mr. ALLISON. Does not the Senator remember that the same discount was given to domestic dealers, as stated here on the floor by various Senators, who produced letters and telegrams to show it?

Mr. VEST. I never knew more than one letter to be produced, and that was from a great manufacturing establishment at Ann Arbor, which was produced by a Senator no longer a member of this body. That was the only pretense ever made in this Chamber that that was not true, and I say it is true to-day. An American will go to one of these establishments and buy a plow or a reaper or a mower, and pay 25 or 35 or 40 per cent more than the price at which the manufacturer furnishes it to the foreigner, and the only answer ever made to those export journals, which I have now, was that after supplying the American market they had a surplus which they had to get rid of.

I do not know that they ask for protection, and it is absurd to talk about it. Everybody who goes abroad and sees these agricultural implements everywhere for sale, underbidding the foreigner, knows it. Go all through the comparative statement, and wherever you find any of the metal products, any article in the manufacture of which enters steel or iron, you will find that we export enormously and import nothing. We got out of these imports $1,992 in duty for a whole year, that of 1896, and we exported nearly $6,000,000 worth for that year. What sort of logic can be brought here to show that this is anything but a spectacular fraud? I move to strike out the paragraph as perfected, in order to put it upon the free list.

The PRESIDING OFFICER. The Senator from Missouri moves to strike out paragraph 448½.

Mr. VEST. On that I ask for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. CLAY (when his name was called). I transfer my pair with the Senator from Massachusetts [Mr. LODGE] to the Senator from Virginia [Mr. MARTIN], and vote "yea."

Mr. MITCHELL (when his name was called). I am paired with the Senator from New Jersey [Mr. SEWELL].

Mr. RAWLINS (when his name was called). I am paired with the junior Senator from Ohio [Mr. HANNA]. If he were present, I should vote "yea."

Mr. TURNER (when his name was called). I am paired with the Senator from Wyoming [Mr. WARREN]. I do not see him in the Chamber. If he were present, I should vote "yea."

The roll call was concluded.

Mr. GRAY. I have a general pair with the senior Senator from Illinois [Mr. CULLOM]. I will transfer my pair to the senior Senator from Arkansas [Mr. JONES], and vote. I vote "yea."

Mr. MORGAN. I am paired with the Senator from Pennsylvania [Mr. QUAY].

Mr. FAULKNER. I am paired with the Senator from West Virginia [Mr. ELKINS]. If he were present, I should vote "yea."

Mr. HAWLEY. I again announce my pair with the Senator from Tennessee [Mr. BATE].

Mr. CULLOM. I have a general pair with the Senator from Delaware [Mr. GRAY].

Mr. WALTHALL. I think the Senator from Delaware transferred his pair to the Senator from Arkansas [Mr. JONES].

Mr. CULLOM. If he has done so, I will vote. I vote "nay."

Mr. DANIEL. I am paired with the Senator from North Dakota [Mr. HANSBROUGH]. I transfer my pair to the Senator from Montana [Mr. MANTLE], and vote. I vote "yea."

Mr. TILLMAN. Has the Senator from Nebraska [Mr. THURSTON] voted?

The PRESIDING OFFICER. The Chair is informed that the Senator from Nebraska has not voted.

Mr. TILLMAN. I am paired with that Senator, and therefore withhold my vote.

Mr. HAWLEY. I transfer my pair with the Senator from Tennessee [Mr. BATE] to the Senator from North Dakota [Mr. HANSBROUGH], and vote "nay."

The Secretary recapitulated the vote.

Mr. GALLINGER. At my suggestion, the Senator from Connecticut [Mr. HAWLEY] transferred his pair to the Senator from North Dakota [Mr. HANSBROUGH]. I understand that a transfer of pairs had previously been arranged by which the Senator from North Dakota is paired. In behalf of the Senator from Connecticut, I will withdraw his vote.

The PRESIDING OFFICER. The vote of the Senator from Connecticut is withdrawn.

The result was announced—yeas 24, nays 29; as follows:

YEAS—24.

Allen,	Cockrell,	Mallory,	Roach,
Bacon,	Daniel,	Mills,	Smith,
Berry,	Gray,	Murphy,	Turpie,
Butler,	Harris, Kans.	Pasco,	Vest,
Chilton,	Heitfeld,	Pettigrew,	Walthall,
Clay,	McLaurin,	Pettus,	White.

NAYS—29.

Allison,	Fairbanks,	McEnery,	Shoup,
Burrows,	Foraker,	Mason,	Spooner,
Carter,	Frye,	Nelson,	Wellington,
Chandler,	Gallinger,	Perkins,	Wetmore,
Clark,	Gear,	Platt, Conn.	Wilson.
Cullom,	Hale,	Platt, N. Y.	
Davis,	Hoar,	Pritchard,	
Deboe,	McBride,	Proctor,	

NOT VOTING—33.

Aldrich,	Hanna,	Lodge,	Rawlins,
Baker,	Hansbrough,	McMillan,	Sewell,
Bate,	Harris, Tenn.	Mantle,	Stewart,
Caffery,	Hawley,	Martin,	Teller,
Cannon,	Jones, Ark.	Mitchell,	Thurston,
Elkins,	Jones, Nev.	Morgan,	Tillman,
Faulkner,	Kenney,	Morrill,	Turner,
George,	Kyle,	Penrose,	Warren,
Gorman,	Lindsay,	Quay,	Wolcott.

So the amendment was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 449, page 160, line 25, after the words "ad valorem," to strike out:

; bolting cloths composed of silk, imported expressly for milling purposes and not suitable for the manufacture of articles of wearing apparel, 25 per cent ad valorem.

So as to make the paragraph read:

449. Plush, black, known commercially as hatters' plush, composed of silk, or of silk and cotton, such as is used exclusively for making men's hats, 10 per cent ad valorem.

The amendment was agreed to.

Mr. VEST. I move to strike out paragraph 449, so as to put these articles upon the free list, where they are now.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Missouri, to strike out paragraph 449 as amended.

The amendment was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 450, page 161, line 5, to strike out:

, valued at not exceeding $3 each, 25 cents each and 45 per cent ad valorem; valued above $3 each, 50 cents each and.

And in line 10, before the words "per centum," to strike out "forty-five" and insert "forty;" so as to make the paragraph read:

450. Umbrellas, parasols, and sunshades covered with material other than paper, 50 per cent ad valorem. Sticks for umbrellas, parasols, or sunshades, and walking canes, finished or unfinished, 40 per cent ad valorem.

The amendment was agreed to.

Mr. WHITE. I now move to strike out paragraph 450 and insert in lieu thereof the provision of the Wilson Act.

The SECRETARY. It is proposed to strike out paragraph 450 as amended and insert in lieu thereof the following:

Umbrellas, parasols, and sunshades, if plain or carved, finished or unfinished, 30 per cent ad valorem.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from California.

The amendment was rejected.

The reading of the bill was resumed and continued to the words "Free list." line 13, page 161.

Mr. BACON. As we have now reached the free list, I submit an amendment, to be known as paragraph 517½, placing cotton ties of iron or steel on the free list. I will offer it at the proper time when we reach that part of the bill.

The PRESIDING OFFICER. The Chair understands the Senator from Georgia to submit the amendment to be offered at the proper time.

Mr. WHITE. I wish to suggest to the Senator from Iowa that we have reached the free list, and we are now met with this difficulty: There are quite a large number of paragraphs in the bill which have been passed over. This morning we supposed we would be able to take up the wool schedule, upon which the Senator from Arkansas is especially prepared, but we were unable to do so. The tobacco schedule has not been taken up, and it is quite impossible to go through the free list finally, determinatively, while it is undecided whether certain articles which are still in the bill, and which we hope to have eliminated from the dutiable list, are in fact to be so eliminated.

I fear we are going to find that there will be confusion hereafter and much difficulty unless we can proceed methodically. Hereafter, certainly so far as I am concerned, I shall feel it my duty to object to any irregular consideration of the bill. There are Senators here who have matters to which they desire to direct special attention, and they are absent, no doubt, because of the idea that we would proceed in the usual course. Those Senators have a right to be heard, and they will be disappointed if they find that we have progressed in a manner which will virtually deny them a hearing. I suggest that we ought to be advised from this time forward what is coming up. It is especially necessary to those who have any particular matter they wish to present to the Senate. The plan that we are now adopting, while it has been satisfactory enough, or comparatively so heretofore, will be encompassed with numerous difficulties hereafter.

There are Senators upon the floor who would dislike to go on with the free list at all to-day, but I suggest that if we do it should be understood that its consideration is not final, and that anyone desiring to go back to any specific paragraph may make any motion he may wish with reference to it.

Mr. CHANDLER. I suggest to the Senator from California to let the free list be disposed of in the same way.

Mr. WHITE. I am talking about the free list.

Mr. CHANDLER. Go on and let the whole of it be adopted nem. con., subject to such motions as Senators may wish to make later. That will be very satisfactory.

Mr. ALLISON. I agree with the Senator from California that it is wise to proceed with regularity in the consideration of the bill, so far as we can; but we are all interested, I have no doubt, in proceeding with it as rapidly as we can consistent with fair consideration. Senators are aware, for reasons stated by me and by others, that it was impracticable to go on with the wool schedule this morning. So we have gone to other schedules.

I think there will be no difficulty in treating the free list as is suggested by the Senator from California. If, after consideration, we find paragraphs upon the dutiable list which we have also retained in the free list, they can be changed, but I think as a rule I will be able to point out to Senators the paragraphs which have been passed over, and the corresponding paragraphs will either be passed over or struck from the free list as we go along. I hope with that understanding we may go on with the free list to-day, and if any Senator desires to have a particular paragraph passed over, I will cheerfully consent, so far as I am concerned, to its being done.

Mr. WHITE. I do not wish to confine it as sharply as indicated by the Senator from Iowa, and for this reason: I presume that, outside of Senators who are now in the Chamber, no members of the body expected that we would take up the free list to-day. Therefore there may be paragraphs which some Senator would care to go back to.

Mr. ALLISON. Very well.

Mr. WHITE. There ought to be the widest latitude in that direction.

Mr. ALLISON. I agree to that. If there is any Senator who is absent and who desires to go back to any part of the free list, I shall make no objection.

Mr. MORGAN. I desire to make a parliamentary inquiry as to what is the proper progress of this bill under the rules of the Senate. Is it to consider it paragraph by paragraph as we reach them, unless the consideration is disposed of by unanimous consent? Is that the rule of the Senate?

Mr. ALLISON. When the consideration of the bill was first begun in the Senate, it was agreed that we should take up the bill and dispose of it paragraph by paragraph, considering each paragraph as it was reached. Then I think it was understood that if for any reason we were not ready to consider a paragraph, it might be passed over. In other words, we have been going on in an irregular way with respect to the paragraphs, passing over a good many of them simply because Senators either upon this side or the other desired further time to consider them or to prepare amendments.

Mr. MORGAN. Then the regular order of the bill under the rule and understanding, as I gather it from the Senator from Iowa, is that the bill shall be disposed of as each paragraph is reached, unless by unanimous consent a paragraph be laid over for further consideration?

Mr. ALLISON. I think that is the situation.

Mr. MORGAN. I object to taking up the free list until the paragraphs which have been passed over are taken up and disposed of.

Mr. ALLISON. I suggest to the Senator that we have already reached the free list under the rule.

Mr. MORGAN. No; we have not reached the free list under the rule, because paragraphs that precede it have not been disposed of.

Mr. CULLOM. We passed them over by unanimous consent.

Mr. MORGAN. For how long? For what time?

Mr. CULLOM. Until we got through the bill.

Mr. MORGAN. Not until we went through the bill. There was no agreement of that kind.

I am not doing this to obstruct the business of the Senate at all, but to try to get it in some shape where Senators can understand what is coming up, what time their attention will be directed to particular parts of the bill in which they are directly interested. It is the fair thing to do, and any other course is extremely embarrassing.

Now, at this moment I am called out of the Chamber by order of this body to execute one of its commands, and I have an amendment which I want to offer applicable to the entire free list. I can not offer that amendment at all until I know what articles are to be put upon the dutiable list and what articles are to be put upon the free list. The Senator from California just stated that he has propositions to put articles on the free list which have not yet been considered and preceding these in the bill. We ought to know exactly what the free list is before we undertake to deal with it. We do not know and can not know what it is in the present situation of the legislation upon this bill. It is very convenient, I know, for Senators on the committee—I wish to give them every indulgence in the world that is possible—to have these articles go over until they can prepare for the discussion or until they can get the action of a caucus upon particular measures that are proposed, so that the Senator from Iowa will be standing here as the faithful recorder not of his own will, but of the will of the caucus.

Mr. President, I feel very much embarrassed in making this suggestion and objection, because I know, from all appearances at least, that the Senator from Iowa has had a great deal of suffering in the conduct of the bill. He has been frequently compelled to get up and move amendments to it, change his programme, and put it in different attitudes and phases and shapes and conditions, not to meet his own will, not to carry out his own judgment, but because he has been compelled to do it. The Senator has my profound sympathy on this occasion, where he is recording the decree of the caucus, and it is the first time that either a Democratic or Republican Senator in charge of a bill has ever been required to do such a thing.

This is a new proceeding in the Senate, quite strange indeed,

and very embarrassing to all concerned, as well to the Senator from Iowa as to all his friends on this floor who admire him so much.

In the parliamentary sense, I understand I have the right to make the objection, and I will venture to do it, exercising my rights as a Senator, if I possess them, to compel the consideration of the paragraphs in the bill which precede the free list, so that when we get through the paragraphs that precede it in the order of the bill, we will know what articles are then on the free list.

My proposition will be to put all the articles on the free list, with certain exceptions, some of which I have already stated in the amendment which I have proposed, under an ad valorem tax of 10 per cent for the purpose of getting revenue, so as to enable us to abstain from the internal taxation of the country, in reference to tobacco and beer and sugar and several of the other essential elements of life and progress.

Now, how can I offer that amendment, how can I make the exception, unless I know what is on the free list and what is not; and why should the Senate undertake to compel me to guess at what is going on the free list and what is not going on the free list so as to control the exceptions that I propose to make?

I do not know whether the amendment has any strength in this body or not. I know there are some Senators here who would like to vote for it, but in offering it I know that I am running counter to the theories of some of the leading gentlemen of the party to which I have the honor to belong. Nevertheless, I am thoroughly convinced that the amendment is not only a good one, but is a necessary one, and it is conspicuously so when in casting our eyes over the bill we see that perhaps one-half in value and one-half in number or quantity of the articles imported into the United States come in under the free list.

Now, why they should come in under the free list is more than a man could tell if he were to take from now until next Christmas to describe the condition and contingencies and circumstances that seem to justify putting the articles on the free list. I say that seem to justify it. They do not. These articles are not justified in going on the free list. There can not be any justification for exempting any article imported into the United States from its proper burden under a tariff law except by way of indulgence to the plain, simple, elementary laws of humanity and benevolence, or for the purpose of executing some general public policy such as would attach or relate to the importation of bullion, for instance, for the purpose of coinage in our mints.

The other day I went over this ground to some extent, and I do not propose now to undertake to argue the question fully. But there are Senators here who desire to argue it. They desire to look at it at least, and examine it; and it is impossible for us to do it with any intelligence at all until we know what articles are put upon the dutiable list. As long as the articles proposed by the bill to be taxed and placed upon the dutiable list are not agreed upon, are not passed upon by the Senate, no man can say whether they are going upon the dutiable list or whether they are going upon the free list. We may make some very clear or accurate conjectures about this business, but we do not know.

In the consideration and disposal of a tariff bill it is absolutely necessary for the sake of justice and the propriety of legislation that the dutiable list should be made up first, for whatever is not on the dutiable list necessarily is on the free list. I therefore insist, if I have the parliamentary right to do it, that the Senate shall go back and take up the undisposed-of articles and pass upon them, so that we may know when we get to the free list again what is on the free list and what is not. I would venture to suggest that this will be, perhaps, the quickest way to get through with the free list.

Mr. ALLISON. If the Senator from Alabama will indulge me a moment, I think the way we are proceeding is really the regular and orderly way to secure the fullest consideration of the bill in every phase and every paragraph of it. After we have passed through the free list and every paragraph in the bill, it is in order, under our rules, as I understand them (if not, it was the understanding), that any and every paragraph shall still be open to amendment. That I understand to be the rule. So paragraph No. 20 or paragraph No. 50 can be dealt with upon the motion of any Senator on this floor until the bill is completed, and we never will know what is on the free list and on the dutiable list until the bill passes out of the Committee of the Whole and passes to its third reading. It will be in order for the Senator from Alabama to renew the motion he made or gave notice of the other day at any stage of the bill short of the third reading, as I understand it.

I suggest to the Senator from Alabama that the best way for him to facilitate his own amendment is for us now to take up the free list and deal with it so far as the committee have dealt with it. Then, if at a later stage of the proceeding something else is added to the free list, so be it; it will then be taken from the dutiable list. So far as we have progressed with the bill to this moment, there are probably not half a dozen articles that anyone proposes to transfer from the dutiable to the free list; and in each and every case where that has been done notice has been given. The Senator from Missouri a while ago moved to strike out a new paragraph that was inserted reducing the duty on certain articles as appeared in the House bill, giving notice that he would move to place those articles upon the free list.

I submit to the Senator from Alabama that the best way to facilitate the consideration of the bill and secure the fullest consideration of it is to go on with the free list this afternoon. By an arrangement made before the Senator from Alabama came in, by unanimous consent, it was agreed that to-morrow morning we would take up the wool schedule. So we have been progressing in this way, and I think we are making intelligent and rapid progress by the processes we have adopted. I trust that there will be no objection to continuing the methods we have hitherto pursued, and going on with the free list. I think if I were to make a point of order, that would be held to be the rule, because we have reached the free list now in the regular order, and we have passed over nothing except by unanimous consent.

Mr. FRYE. Will the Senator allow me a moment?

Mr. ALLISON. Certainly.

Mr. FRYE. I call the Senator's attention to the original agreement when the bill was taken up. I think I was in the chair at the time. It was that the committee amendments in each paragraph should first be taken up and acted upon, and then any amendments might be proposed from the floor to that paragraph. Now, all that is necessary in this case is to treat the free list as a schedule; then, by unanimous consent, after the committee amendments are completed to a paragraph on the free list, it is open to amendments on the floor proposed by anyone.

Mr. MORGAN. I have noticed that Senators would introduce amendments as we have been going along without regard to the fact of the committee advancing them or proposing them at all.

Mr. FRYE. But let me make one other suggestion to the Senator. After the free list is entirely completed as in Committee of the Whole, and it is in the Senate, it is still open to any amendment the Senator may desire to offer.

Mr. MORGAN. When the bill passes from the Committee of the Whole into the Senate, then in the Senate the first question is on concurring in the amendments which have been adopted as in Committee of the Whole.

Mr. FRYE. No; the announcement will be made, "The bill is now in the Senate and is still open to amendment;" and after that announcement the Senator is at liberty to offer any amendment he pleases, as is any other Senator.

Mr. ALLISON. To any paragraph.

Mr. FRYE. To any paragraph in the bill.

Mr. MORGAN. Then this bill differs from all other bills in that particular. I am surprised to hear that statement made, because, notwithstanding the bill is open to amendment in the Senate, the first question after we get out of Committee of the Whole and get into the Senate is whether the Senate will concur in the amendments made as in Committee of the Whole. That is the first question.

Mr. ALLISON. That is the first question.

Mr. MORGAN. And after that comes the right of amendment.

Mr. ALLISON. When the question is on concurring in the amendments made as in Committee of the Whole, I understand that any Senator can ask for a separate vote on any amendment that has been made in Committee of the Whole, and can move to concur in it with an amendment or ask the Senate to disagree to it. So the whole bill, under the rules as I understand them, is open.

Mr. FRYE. Just as much as in Committee of the Whole.

Mr. ALLISON. Just as much as in Committee of the Whole, and it is open to the very end. I will say to Senators that it is within the power of the Senate to go on indefinitely under our rules as respects the bill. I think we all have the same purpose, and that is to facilitate the consideration of the bill as rapidly as possible consistent with a full and intelligent examination. We ask for nothing else on this side of the Chamber; so that every matter can be disposed of according to the convenience and judgment of the Senate.

Mr. ALLEN. Will not the Senator have to reserve his amendment as in Committee of the Whole before it can be offered in the Senate?

Mr. FRYE. Oh, no.

Mr. FAULKNER. Oh, no; there is the same power in the Senate that there is as in Committee of the Whole.

Mr. ALLEN. I think that has been the custom heretofore.

Mr. ALLISON. It does not have to be reserved as in Committee of the Whole, because it requires unanimous consent to have the question put on concurring in the amendments in bulk. When the question is on concurring in the amendments made as in Committee of the Whole, any Senator can demand a separate vote upon each and every amendment in the bill. So there is no difficulty about the fullest consideration in the Senate.

Mr. MORGAN. With that understanding, Mr. President, and

according to the explanation now given by the Senator from Iowa, I withdraw the objection.

Mr. ALLISON. I am very much obliged to the Senator, and I am sure he will have the fullest opportunity.

The Secretary resumed the reading of the bill at line 13, page 161, under the heading of "Free list."

The next amendment of the Committee on Finance was, in section 2, page 161, line 14, after the word "of," to strike out "May" and insert "July;" so as to read:

SEC. 2. That on and after the 1st day of July, 1897, unless otherwise specially provided for in this act, the following articles when imported shall be exempt from duty.

Mr. ALLISON. I ask that the amendment may be modified in section 2, line 14, by striking out "May" and "July" and leaving a blank for the present.

The VICE-PRESIDENT. Without objection, the amendment is agreed to as modified, leaving the blank to be filled.

The next amendment was, in paragraph 452, page 161, line 18, after the word "arsenious," to insert "benzoic, carbolic;" in line 19, after the word "nitric," to insert "oxalic;" in line 20, after the word "silicic," to insert "salicylic, and valerianic," and to strike out "when chemically pure or in condition for use for medicinal, chemical, or manufacturing purposes, without further preparation or treatment;" so as to make the paragraph read:

452. Acids: Arsenic or arsenious, benzoic, carbolic, fluoric, hydrochloric or muriatic, nitric, oxalic, phosphoric, picric or nitro-picric, prussic, and silicic, salicylic, and valerianic.

Mr. ALLISON. I ask that the amendment inserting the words "salicylic and valerianic" may be disagreed to.

Mr. VEST. I should like to have some reason given for striking out those words.

Mr. ALLISON. We have not yet considered those acids on the dutiable list.

Mr. WHITE. I ask the Senator from Iowa to allow the paragraph to be passed over for the present.

Mr. ALLISON. Very well.

Mr. WHITE. I desire to investigate it.

Mr. ALLISON. That is right.

The VICE-PRESIDENT. Is there any objection to the first amendment, inserting the words "benzoic, carbolic," and "oxalic?"

Mr. WHITE. My request is that the entire paragraph be passed over temporarily.

Mr. ALLISON. I have no objection to that course.

The VICE-PRESIDENT. There being no objection, the paragraph will be passed over.

The reading of the bill was continued to line 3, on page 162, the last paragraph read being as follows:

455½. Albumen.

Mr. ALLISON. After "albumen" I move to insert "not specially provided for in this act."

The amendment was agreed to.

The next amendment of the Committee on Finance was, in paragraph 456, page 162, line 5, after the word "anthracin," to strike out "including naphthazarin black" and insert "and all fast-black coal-tar dyes;" so as to make the paragraph read:

456. Alizarin, natural or artificial, and dyes derived from alizarin or from anthracin, and all fast-black coal-tar dyes.

Mr. ALLISON. I ask that paragraph 456 be passed over.

The VICE-PRESIDENT. Without objection, it will be so ordered.

The reading of the bill was continued to paragraph 459, page 162, line 10.

Mr. WHITE. At this point, if the Senator from Iowa will permit me, I should like to suggest an article that ought to go into the free list, and I think the committee will have no objection to it. It is the article known as antitoxin. The Board of General Appraisers ruled that this article was admissible under the designation of vaccine virus, but the United States court, after an examination of the subject, decided otherwise, and that very valuable medicinal preparation is therefore dutiable by that decision under the provisions of the first schedule of the bill. I suggest that "459½. Antitoxin" be inserted as a new paragraph. There can be no objection, it appears to me, to the amendment.

Mr. ALLISON. I do not know that there is; but I ask the Senator to allow it to be passed over.

Mr. WHITE. I can refer the Senator to the decision which I mentioned, and the General Appraisers will agree with me.

Mr. ALLISON. I shall not object to its being inserted at a later stage.

The VICE-PRESIDENT. The Chair does not hear the agreement made between the Senators.

Mr. WHITE. Does the Senator from Iowa object to the amendment?

Mr. ALLISON. The Senator from California moves, I understand, to insert "antitoxin."

Mr. WHITE. Yes, sir; as paragraph 459½.

Mr. ALLISON. It should go in after paragraph 463, line 16, page 163. It should be a new paragraph numbered 463½.

The VICE-PRESIDENT. Is the Senator from California content with that suggestion?

Mr. WHITE. Yes; let it come in as paragraph 463½.

The VICE-PRESIDENT. Is there objection? The Chair hears none, and paragraph "463½. Antitoxin," is inserted at the proper place on page 163.

The reading of the bill was resumed, as follows:

460. Any animal imported specially for breeding purposes shall be admitted free: *Provided*, That no such animal shall be admitted free unless pure bred of a recognized breed, and duly registered in the book of record established for that breed: *And provided further*, That certificate of such record and of the pedigree of such animal shall be produced and submitted to the customs officer, duly authenticated by the proper custodian of such book of record, together with the affidavit of the owner, agent, or importer that such animal is the identical animal described in said certificate of record and pedigree. The Secretary of the Treasury may prescribe such additional regulations as may be required for the strict enforcement of this provision.

Mr. CHILTON. I ask the Senator from Iowa if he does not think it would be advisable to adopt an amendment to that paragraph, not as a matter of any political importance at all, but to continue the efficiency of the exemption concerning animals? I find that the Agricultural appropriation acts have carried a clause like the following:

That the Secretary of Agriculture shall determine and certify to the Secretary of the Treasury what are recognized breeds and pure-bred animals, under the provisions of paragraph 373 of the tariff act of 1894.

That clause was contained in the Agricultural appropriation act which we passed a short time ago, and it occurs to me that it would be well to provide a like method to be applied to the new tariff law. I have prepared an amendment, which I offer.

Mr. ALLISON. I am much obliged to the Senator. That is a very important suggestion. If the Senator has a suitable amendment, I ask that it may be inserted.

The VICE-PRESIDENT. The Secretary will state the amendment offered by the Senator from Texas to paragraph 460.

The SECRETARY. Insert after the word "pedigree," in line 21, on page 162:

That the Secretary of Agriculture shall determine and certify to the Secretary of the Treasury what are recognized breeds and pure-bred animals under the provisons of this paragraph.

The VICE-PRESIDENT. Is there any objection to the amendment?

Mr. HOAR. The words "*Provided further*" should be inserted at the beginning of the clause.

Mr. CHILTON. It does not make any difference, because it is an independent clause. I accept the suggestion, if the Senator from Massachusetts thinks it desirable.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the Senator from Texas as modified.

The amendment as modified was agreed to.

The next amendment of the Committee on Finance was, in paragraph 461, page 163, line 4, after the word "also," to strike out the comma and the words "household furniture and cooking utensils not exceeding in value $100 and;" so as to make the paragraph read:

461. Animals brought into the United States temporarily for a period not exceeding six months, for the purpose of exhibition or competition for prizes offered by any agricultural or racing association; but a bond shall be given in accordance with regulations prescribed by the Secretary of the Treasury; also teams of animals, including their harness and tackle and the wagons or other vehicles actually owned by persons emigrating from foreign countries to the United States with their families, and in actual use for the purpose of such emigration under such regulations as the Secretary of the Treasury may prescribe; and wild animals intended for exhibition in zoological collections for scientific and educational purposes, and not for sale or profit.

The amendment was agreed to.

The reading of the bill was continued to line 16, page 163, paragraph 463.

The VICE-PRESIDENT. At this point a new paragraph has been inserted.

The Secretary read as follows:

463½. Antitoxin.

The next amendment of the Committee on Finance was to insert after line 17, on page 163:

464½. Argols, or crude tartars, and lees crystals.

Mr. ALLISON. I move to modify the amendment by striking out the word "or" after the word "argols," in line 18, and adding at the end of the line "not specially provided for;" so as to read:

Argols, crude tartars, and lees crystals, not specially provided for.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The Secretary resumed the reading of the bill. The next amendment of the Committee on Finance was, in paragraph 470, page 164, line 4, after the words "United States," to insert "(except articles upon which an internal-revenue tax is levied);" in line 7, after the word "means," to strike out "casks, barrels, carboys, bags, and other vessels of American manufacture exported filled with American products, or exported empty and returned filled

with foreign products, including shooks when returned as barrels or boxes; also quicksilver flasks or bottles, of either domestic or foreign manufacture, which shall have been actually exported from the United States;" in line 16, after the word "Treasury," to strike out, "but the exemption of bags from duty shall apply only to such domestic bags as may be imported by the exporter thereof, and if any such articles are subject to internal tax at the time of exportation, such tax shall be proved to have been paid before exportation and not refunded;" in line 22, after the word "made," to strike out "the reimportation of which is hereby prohibited except upon payment of duties equal to the drawbacks allowed;" and on page 165, line 1, after the word "law," to strike out the colon and the words:

And provided further, That when manufactured tobacco which has been exported without payment of internal-revenue tax shall be reimported, it shall be retained in the custody of the collector of customs until internal-revenue stamps in payment of the legal duties shall be placed thereon.

So as to make the paragraph read:

470. Articles the growth, produce, and manufacture of the United States (except articles upon which an internal-revenue tax is levied), when returned after having been exported, without having been advanced in value or improved in condition by any process of manufacture or other means; but proof of the identity of such articles shall be made, under general regulations to be prescribed by the Secretary of the Treasury: *Provided*, That this paragraph shall not apply to any article upon which an allowance of drawback has been made, or to any article manufactured in bonded warehouse and exported under any provision of law.

Mr. ALLISON. There are some modifications that I think should be made to paragraph 470, and therefore I ask that the paragraph be passed over for the present.

The VICE-PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 471, page 165, line 6, to strike out "Asbestus" and insert "Asbestos;" so as to read:

471. Asbestos, unmanufactured.

The amendment was agreed to.

Mr. JONES of Arkansas. I was out of the Chamber when paragraph 460 was taken up a few minutes ago, to which I wanted to move an amendment, which I hope will be accepted by the Senator from Iowa.

At the end of the corresponding paragraph in the Wilson law there was this provision, which seems to me ought to be in this bill:

Cattle, horses, sheep, or other domestic animals which have strayed across the boundary line into any foreign country, or have been or may be driven across such boundary line by the owner for pasturage purposes, together with their increase, may be brought back to the United States free of duty under regulations to be prescribed by the Secretary of the Treasury.

There is considerable stock, as I understand, along the border of Mexico and the United States driven across for pasturage purposes. There has never been any complaint made regarding it so far as I know, and the regulations prescribed by the Secretary of the Treasury have been ample to prevent any abuse. It seems to me that the present bill ought to accord the same privileges which are allowed under the present law, and I hope there will be no objection to the insertion of the words I have read as an amendment to paragraph 460.

Mr. MILLS. I will state to the Senator from Iowa [Mr. ALLISON] that the Senator from Pennsylvania [Mr. QUAY] is in favor of this as much as I am. We have talked about it.

Mr. ALLISON. I am familiar with it, and I do not know that I shall object to the amendment; but let it be passed over until to-morrow morning, by which time we may arrive at some understanding about it.

Mr. JONES of Arkansas. Then I will offer the amendment, so that it will be pending and not be overlooked.

Mr. ALLISON. Very well.

Mr. JONES of Arkansas. I propose to insert, at the end of paragraph 460, the following:

Cattle, horses, sheep, or other domestic animals which have strayed across the boundary line into any foreign country, or have been or may be driven across such boundary line by the owner for pasturage purposes, together with their increase, may be brought back to the United States free of duty under regulations to be prescribed by the Secretary of the Treasury.

The VICE-PRESIDENT. If there be no objection, the amendment proposed by the Senator from Arkansas [Mr. JONES] will be passed over for the present.

Mr. ALLISON. There should be some modification of that paragraph; but I am willing that it be passed over.

Mr. JONES of Arkansas. I offer the amendment to the pending bill so that it will not be overlooked.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, after line 12, on page 165, to insert as a new paragraph:

476½. Bauxite or beauxite, crude, not refined or otherwise advanced in condition.

Mr. CLAY. The House, as I understand, placed a duty of $1 per ton on bauxite in paragraph 88 of the bill, which the Senate committee reported to strike out. I ask the Senator from Iowa to let the new paragraph which has just been read go over until that question can be considered in connection with paragraph 88.

Mr. ALLISON. Very well.

The VICE-PRESIDENT. There being no objection, the paragraph will be passed over for the present.

The reading of the bill was resumed. The next amendment of Committee on Finance was, in paragraph 478, page 165, line 19, after the word "pound," to strike out the comma and insert "and manila twine, measuring 600 feet to the pound;" so as to read:

478. Binding twine: All binding twine manufactured in whole or in part from New Zealand hemp, istle or Tampico fiber, sisal grass, or sunn, of single ply and measuring not exceeding 600 feet to the pound and manila twine, measuring 600 feet to the pound.

The amendment was agreed to.

The next amendment was, in the same paragraph, in line 22, before the word "articles," to strike out "like" and insert "the same;" so as to read:

Provided, That articles mentioned in this paragraph if imported from a country which lays an import duty on the same articles imported from the United States shall be subject to a duty of one-half of 1 cent per pound.

The amendment was agreed to.

Mr. JONES of Arkansas. I ask consent of the Senate to recur to paragraph 473 for the purpose of offering an amendment between that and paragraph 474, as I think it will come more properly at that point. I propose to move an amendment there adding a new paragraph:

Bagging for cotton, gunny cloth, and all similar material suitable for covering cotton, composed in whole or in part of hemp, flax, jute, or jute butts.

Mr. ALLISON. I ask the Senator to allow that to be passed over for the present.

Mr. JONES of Arkansas. I will offer the amendment now, and then it may go over.

The VICE-PRESIDENT. The amendment proposed by the Senator from Arkansas will be stated.

The SECRETARY. It is proposed to insert as a new paragraph:

473½. Bagging for cotton, gunny cloth, and all similar material suitable for covering cotton, composed in whole or in part of hemp, flax, jute, or jute butts.

The VICE-PRESIDENT. By unanimous consent, the amendment will lie over for the present.

Mr. ALLISON. Before passing from paragraph 478, in line 17 I move to strike out the words "in whole or in part."

The VICE-PRESIDENT. The amendment proposed by the Senator from Iowa will be stated.

The SECRETARY. In paragraph 478, page 165, line 17, after the word "manufactured," it is proposed to strike out "in whole or in part;" so as to read:

478. Binding twine: All binding twine manufactured from New Zealand hemp, istle or Tampico fiber, sisal grass, or sunn, etc.

Mr. NELSON. I hope that will not be done.

Mr. ALLISON. I will ask the Senator what objection he has to the amendment.

Mr. NELSON. I object to it because we have a good deal of twine of mixed material; we have a good deal of twine that is not made wholly of one of these substances; we have a good deal that is made of manila and sisal grass, mixed.

Mr. ALLISON. The Senator will observe the object I have in making the suggestion is to give some little protection to the flax industry, which we are caring for. Under the provision as it stands now, twine might have in it a single line of New Zealand hemp, istle or tampico fiber, and so on, and all the rest be flax. I suggest to the Senator that we should say "from New Zealand hemp, istle or tampico fiber, sisal grass, or sunn, or a mixture of either of them."

Mr. NELSON. If the amendment is put in that form, I shall have no objection to it.

Mr. ALLISON. If not put in that form, it would be all wrong, unless we strike out the words which I have proposed to strike out.

Mr. NELSON. If the Senator will put in the words he proposes to strike out, then it will be all right.

Mr. ALLISON. I can not allow the Senator to say it would be all right to strike out those words if I did not put anything in. We strike out those words in order that we may not have imported binding twine manufactured in whole or in part from New Zealand hemp, instead of flax.

Mr. NELSON. No binding twine is made of flax. It is all made of hemp.

Mr. ALLISON. The Senator does not comprehend what I mean. The object of my moving to strike out that provision was to protect the flax industry from what might happen under this provision if it were not stricken out. I want the Senator to see that the objection he makes is one not in the interest of the industry he seeks to protect, and that my amendment is in that interest.

The VICE-PRESIDENT. The question is on the amendment in line 17, to strike out the words "in whole or in part."

The amendment was agreed to.

Mr. ALLISON. Now, I move, in the same paragraph, in line 18, after the word "sunn," to insert "or a mixture of either of them."

The amendment was agreed to.

Mr. WHITE. Do I understand the paragraph is perfected according to the theory of the other side?

Mr. ALLISON. I think it is fully perfected.

Mr. WHITE. I move to strike out the paragraph as amended and insert in lieu thereof paragraph 399 of the present law. I think the effect of the numerous amendments reported by the Committee on Finance has been to deprive the law of its beneficial effect. It is so limited in operation that the free list is the appropriate place for the provision.

The VICE-PRESIDENT. The amendment proposed by the Senator from California will be stated.

The SECRETARY. It is proposed to strike out paragraph 478 and in lieu thereof to insert:

All binding twine manufactured in whole or in part from New Zealand hemp, istle or Tampico fiber, sisal grass, or sunn, of single ply and measuring not exceeding 600 feet to the pound, and manila twine not exceeding 650 feet to the pound.

Mr. ALLISON. The suggestion of the Senator from California calls to my attention a matter which I had overlooked. The provision as to manila twine should read "measuring 650 feet," instead of "600 feet." I think the language as it stands is a misprint, and that it should be as I suggest. I move the insertion of the words "and fifty," after the word "hundred," in line 20; so as to read, "and manila twine, measuring 650 feet to the pound."

Mr. WHITE. If I understand the effect of the amendment, then, manila twine measuring 649 feet would not be admitted free.

Mr. ALLISON. That is the provision of the Wilson law. I think the provision should be "not exceeding 650 feet." The object is to exclude very fine twine.

Mr. WHITE. The Wilson law states "not exceeding 650 feet."

Mr. ALLISON. Very well; that ought to be the provision here—"not exceeding 650 feet."

Mr. WHITE. Now, Mr. President, if the paragraph is perfected, I wish to offer my amendment.

The VICE-PRESIDENT. The question is on the amendment offered by the Senator from Iowa.

Mr. WHITE. It appears to me that the phrase "or a mixture of either of them" is not a very good expression.

Mr. ALLISON. That is in the Wilson law.

The VICE-PRESIDENT. If the Senator from California will withhold his amendment for a moment, the Chair will put the question on the amendments of the committee.

Mr. WHITE. I withdraw the amendment temporarily.

The VICE-PRESIDENT. Without objection, the other two amendments proposed by the Senator from Iowa on behalf of the committee will be agreed to.

Mr. WHITE. I think the expression "or the mixture of either of them" is a little inaccurate there. I will, however, now move to substitute paragraph 399 of the Wilson law for the pending paragraph.

The VICE-PRESIDENT. The question is on the amendment proposed by the Senator from California [Mr. WHITE], which has heretofore been read.

The amendment was rejected.

The VICE-PRESIDENT. The Chair calls the attention of the Senator from Iowa to the comma at the end of line 19, after the word "manila," and asks if he desires to have that retained?

Mr. ALLISON. Yes; it should be retained.

The VICE-PRESIDENT. Without objection, the comma will be retained.

Mr. ALLISON. I ask that the paragraph be read as it now stands.

The VICE-PRESIDENT. The paragraph will be read as amended.

The Secretary read as follows:

478. Binding twine: All binding twine manufactured from New Zealand hemp, istle or Tampico fiber, sisal grass, or sunn, or a mixture of either of them, of single ply and measuring not exceeding 600 feet to the pound, and manila twine, measuring not exceeding 650 feet to the pound: *Provided*, That articles mentioned in this paragraph, if imported from a country which lays an import duty on the same articles imported from the United States, shall be subject to a duty of one-half of 1 cent per pound.

Mr. ALLISON. The amendment of the committee in line 22, before the word "articles," to strike out "like" and insert "the same," should be disagreed to; so that it will read:

From a country which lays an import duty on like articles imported from the United States, etc.

The VICE-PRESIDENT. Without objection, the amendment will be disagreed to. The Chair hears none, and it is disagreed to.

Mr. WHITE. Now I recall the motion which I have made to strike out the whole of paragraph 478 as amended and insert in lieu thereof paragraph 399 of the present law, which has been already read.

The VICE-PRESIDENT. The Chair understands that that amendment has just been rejected by a vote of the Senate.

Mr. WHITE. It seems when my motion was made the paragraph had not reached that state of perfection which was the ultimate aspiration of the Senator from Iowa, but now that it is in a thoroughly dressed-up condition I wish to renew the motion, so as to again present the question.

Mr. ALLISON. I have no objection to the Senator presenting his amendment. The paragraph is in a condition of absolute perfection now, as I understand it, without the suggestion of the Senator to strike it out.

The VICE-PRESIDENT. The question is on the amendment proposed by the Senator from California [Mr. WHITE], which has been read.

Mr. TURPIE. Mr. President, as to the amendment being in a state of absolute perfection, I will say to the honorable and learned Senator from Iowa that I do not think you can mix "either" of several different things. "Either" applies to one of two things. The proposition should be "a mixture of any two or more." That I think would be an improvement of the phraseology.

Mr. ALLISON. I think I shall accept the modification suggested by the Senator from Indiana, although I call his attention to the fact that we were imitating the fabricators of the Wilson law when we inserted those words.

Mr. WHITE. A fabrication may be used, but a refabrication never.

The VICE-PRESIDENT. Will the Senator from Indiana state the amendment he suggests?

Mr. TURPIE. In paragraph 478, line 18, after the words "mixture of," I move to strike out "either" and to insert "any two or more."

Mr. ALLISON. I think that is better phraseology than that in the paragraph, and I thank the Senator for the suggestion.

The SECRETARY. It is proposed to amend the committee amendment, after the words "mixture of," in line 18, by striking out "either" and inserting "any two or more."

The amendment was agreed to.

The VICE-PRESIDENT. The text will stand in that way in place of the amendment heretofore adopted. The question before the Senate is on the motion of the Senator from California to strike out paragraph 478 and insert a new paragraph, which has been heretofore read.

The amendment of Mr. WHITE was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, on page 166, after line 9, to insert the following as a new paragraph:

484½. Bolting cloths composed of silk, imported expressly for milling purposes, and so permanently marked as not to be suitable for any other use.

The amendment was agreed to.

Mr. ALLISON. In paragraph 484, line 9, after the word "dried," I move to insert the words "not specially provided for."

The VICE-PRESIDENT. The amendment proposed by the Senator from Iowa will be stated.

The SECRETARY. It is proposed to amend paragraph 484, in line 9, page 166, so as to read:

484. Blood, dried, not specially provided for.

The amendment was agreed to.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, on page 166, after line 18, to insert as a new paragraph the following:

486a. Books, maps, music, engravings, photographs, etchings, bound or unbound, and charts, which shall have been printed more than twenty years at the date of importation, and all hydrographic charts, and scientific books and periodicals devoted to original scientific research, and publications issued for their subscribers by scientific and literary associations or academies, or publications of individuals for gratuitous private circulation, and public documents issued by foreign governments.

The amendment was agreed to.

The next amendment was, on page 167, after line 2, to insert as a new paragraph the following:

486b. Books and pamphlets printed exclusively in languages other than English; also books and music, in raised print, used exclusively by the blind.

Mr. VEST. Is not that a repetition of another paragraph?

Mr. ALLISON. That is a repetition of another paragraph, and paragraph 486 should be stricken out.

Mr. GRAY. 486c, you mean.

Mr. ALLISON. No; paragraph 486 should be stricken out. It was the intention of the committee to run these various paragraphs right along.

The VICE-PRESIDENT. The amendment proposed by the Senator from Iowa [Mr. ALLISON] will be stated.

The SECRETARY. It is proposed to strike out paragraph 486, beginning in line 16, on page 166, as follows:

486. Books, engravings, photographs, etchings, bound or unbound, maps and charts imported by authority or for the use of the United States or for the use of the Library of Congress.

The amendment was agreed to.

Mr. VEST. I should like to understand that. It seems to me that paragraph 486c is the same as paragraph 486, except that

paragraph 486c includes music. I understand the Senator to move to strike out paragraph 486.

Mr. ALLISON. Yes; the proposition is to strike out paragraph 486 and insert 486c, so as to have these provisions in regular order. The provision of paragraph 486 is enlarged a little in paragraph 486c.

The VICE-PRESIDENT. Paragraph 486c is next in order, and will be read.

The SECRETARY. The Committee on Finance propose to insert as a new paragraph, after line 5, on page 167, the following:

486c. Books, maps, music, engravings, photographs, etchings, bound or unbound, and charts imported by authority or for the use of the United States or for the use of the Library of Congress.

Mr. VEST. The only difference I see is that this paragraph includes music, whilst paragraph 486 does not.

Mr. PLATT of Connecticut. This includes the phonograph.

Mr. ALLISON. I understand that paragraph 486 has been stricken out.

The VICE-PRESIDENT. That amendment has been agreed to.

Mr. ALLISON. In line 24, of paragraph 486a, page 166, after the word "subscribers," I move to insert the words "or exchanges."

The VICE-PRESIDENT. The amendment proposed by the Senator from Iowa will be stated.

The SECRETARY. In paragraph 486a, on page 166, line 24, after the word "subscribers," it is proposed to insert "or exchanges;" so as to read:

And publications issued for their subscribers or exchanges by scientific and literary associations or academies, etc.

The amendment was agreed to.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, after line 9, on page 167, to insert as a new paragraph the following:

486d. Books, maps, music, photographs, etchings, lithographic prints, and charts, specially imported, not more than two copies in any one invoice, in good faith, for the use or by order of any society or institution incorporated or established solely for religious, philosophical, educational, scientific, or literary purposes, or for the encouragement of the fine arts, or for the use or by order of any college, academy, school, or seminary of learning in the United States, or any State or public library, and not for sale, subject to such regulations as the Secretary of the Treasury shall prescribe.

Mr. VEST. What is the change made?

The VICE-PRESIDENT. That is a new paragraph reported by the Senate committee as it appears in the print.

Mr. ALLISON. There is no change made in paragraph 486d.

The amendment was agreed to.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, on page 167, after line 19, to insert as a new paragraph the following:

486e. Books, libraries, usual and reasonable furniture, and similar household effects of persons or families from foreign countries, if actually used abroad by them not less than one year, and not intended for any other person or persons, nor for sale.

The amendment was agreed to.

The next amendment was, at the top of page 168, to insert as a new paragraph the following:

486f. Brass, old brass, clippings from brass or Dutch metal, all the foregoing, fit only for remanufacture.

The amendment was agreed to.

The next amendment was to insert a new paragraph as follows:

489½. Bromine.

The amendment was agreed to.

The reading of the bill was resumed, and continued to the end of paragraph 493.

Mr. WHITE. After paragraph 493, I move to insert as a new paragraph:

493½. Burlaps and bags for grain, made of burlaps.

A similar question will be involved here to that suggested in the motion of the Senator form Arkansas. I merely give notice of the amendment at present, and will allow it to stand over.

Mr. ALLISON. Let it be passed over.

The VICE-PRESIDENT. By unanimous consent, it will be passed over.

Mr. PETTUS. I suggest to the Senator from California to add "cotton bagging, or bagging for cotton."

Mr. WHITE. I will say to the Senator from Alabama that the Senator from Arkansas has already made such a motion in reference to another paragraph of the bill, so that the motion referred to by the Senator from Alabama is pending at this time.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 496, line 13, page 168, after the word "crude," to strike out the comma and insert "and crude liquid camphor of not less than 980 degrees specific gravity;" so as to make the paragraph read:

496. Camphor, crude and crude liquid camphor of not less than 980 degrees specific gravity.

The amendment was agreed to.

Mr. GRAY. After paragraph 493½ I think I should like to call attention to bleaching powder, about which something was said the other day when it was passed over. I should like to propose an amendment inserting bleaching powder. Let it be stated.

Mr. ALLISON. There will be no objection to that.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. It is proposed to add as a new paragraph after 493½:

Bleaching powder.

Mr. BURROWS. The Senator offers that to be considered as pending?

Mr. ALLISON. That is all.

Mr. WHITE. I notice that in this part of the bill there is no mention made of paragraph 426 of the Wilson Act—old coins, medals, etc. I desire to inquire of the Senator from Iowa whether it is the design of the committee to take the articles embraced in paragraph 426 off the free list?

The present law reads:

Old coins and medals and other antiquities, but the term "antiquities," as used in this act, shall include only such articles as are suitable for souvenirs or cabinet collections, and which shall have been produced at any period prior to the year 1700.

Of course we can probably produce something prior to the year 1700 by new processes, but that is not an infant industry.

Mr. ALLISON. That was purposely omitted in the bill as it came from the House. In the Senate the committee is preparing a modification of that provision, to see if it is not possible to get in these old coins and antiquities without being obliged to get in also under that name new coins and new imitations. We will have that under consideration later on.

Mr. WHITE. The present law provides:

Which have been produced at any period prior to the year 1700.

There are, in the progress of scientific inquiry, various processes giving an ancient appearance to manufactured articles, and I do not know whether it is designed to promote a domestic industry.

Mr. GRAY. It occurs to me that this, like some other industries, may deserve protection. I recollect seeing the answer of a witness on the stand in a court in New York. He was asked what his business was, and he said his business was to make wormholes in furniture, so that it might be sold as antique furniture. If that is worthy of consideration——

Mr. ALLISON. It is a new industry. [Laughter.]

Mr. HOAR. I think the Senator from Delaware ought to state, in justice to his own country, that that answer was made in England and not here.

Mr. GRAY. In England?

Mr. HOAR. Yes.

Mr. GRAY. Still it might be brought into this country if it were not kept out by a tariff.

Mr. ALLISON. I assure the Senator that later on we will propose some provision in regard to the question of antiquities.

Mr. WHITE. I observe immediately prior to antiquities in the present law "cabbages." The relation between the two is not apparent. I will inquire whether they are excluded from the free list by design.

Mr. ALLISON. They are on the dutiable list at 3 cents each, I think.

Mr. WHITE. I will now move to insert the phraseology of paragraph 426 of the present law immediately before paragraph 495 of the proposed law. The amendment may be considered as pending, subject to the paragraph which the Senator from Iowa informs us the committee has now in process of preparation.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 498, page 168, line 16, after the word "unmanufactured," to strike out the comma and insert "or not further manufactured than in strings or cords;" so as to make the paragraph read:

498. Catgut, whip gut, or worm gut, unmanufactured, or not further manufactured than in strings or cords.

Mr. ALLISON. On further consideration, the committee instruct me to ask the Senate to disagree to the amendment.

The VICE-PRESIDENT. The question is on agreeing to the amendment reported by the Committee on Finance.

The amendment was rejected.

Mr. WHITE. I understand the Senator asks the Senate to disagree to the amendment and to insert in paragraph 498 the words in italics.

Mr. ALLISON. Yes, sir; that has already been done.

Mr. WHITE. That is satisfactory.

The reading of the bill was resumed. The next amendment of the Committee on Finance was to insert as a new paragraph the following:

500a. Charcoal.

Mr. ALLISON. I ask that the paragraph may be passed over.

The VICE-PRESIDENT. The paragraph will be passed over.

The reading of the bill was resumed. The next amendment of the Committee on Finance was to insert as a new paragraph:

500b. Chicory root, raw, dried or undried, but unground.

Mr. ALLISON. I ask that the amendment may be rejected. We have already put chicory root on the dutiable list.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the Committee on Finance.

The amendment was rejected.

The reading of the bill was resumed, The next amendment of the Committee on Finance was, in paragraph 504, page 169, line 3, after the word "coal," to strike out "anthracite, and coal;" and in line 4, after the word "be," to strike out "unloaded" and insert "unladen or discharged;" so as to make the paragraph read:

504. Coal stores of American vessels; but none shall be unladen or discharged.

Mr. ALLISON. I ask that paragraphs 504 and 505, down to the end of line 16, shall be passed over.

Mr. WHITE. Including line 16?

The VICE-PRESIDENT. Including line 16. The paragraphs will be passed over.

The reading of the bill was resumed. The next amendment of the Committee on Finance was to insert as a new section the following:

512½. Copper in plates, bars, ingots, or pigs, and other forms, not manufactured or specially provided for in this act.

The amendment was agreed to.

Mr. STEWART. I desire to offer an amendment to come in at the proper place along here, wherever it will suit the committee best, reading: "Yellow prussiate of potash, cyanide of potassium." Is it the proper time to offer it now?

Mr. ALLISON. I do not know of any place where I desire the Senator to offer the amendment, but I think it had better come in a little later, under the potash paragraph, which will appear soon. We have potash in paragraph 619, page 181.

Mr. STEWART. I will wait until we reach that point.

Mr. ALLISON. We have a great number of articles of potash on the free list.

The reading of the bill was resumed and continued to the end of paragraph 517, on page 170, which is as follows:

517. Cotton, and cotton waste or flocks.

Mr. McLAURIN. I move to amend the paragraph so as to conform with the amendment heretofore adopted putting cotton on the dutiable list. I move to strike out the words "Cotton, and."

The SECRETARY. In paragraph 517, line 12, it is proposed to strike out the words "Cotton, and;" so as to make the paragraph read:

Cotton waste or flocks.

The amendment was agreed to.

Mr. BACON. The amendment which I submitted is now in order. The point has been reached where it will be inserted, if adopted. The amendment, to be known as paragraph 517½, puts cotton ties on the free list. The amendment is in writing at the desk.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. It is proposed to insert as a new paragraph:

517½. Cotton ties of iron and steel, of any thickness, for baling cotton, cut to lengths, punched or not punched, with or without buckles.

Mr. ALLISON. The Senator gives notice of the amendment, which is to be passed over.

Mr. BACON. Not unless the Senator desires.

Mr. ALLISON. I do not.

Mr. SPOONER and Mr. WHITE. Let the amendment be read again.

The Secretary again read the amendment.

Mr. WHITE. It should be "iron or steel."

Mr. BACON. It is "or," is it not? I intended it to be "or." I make that modification.

The VICE-PRESIDENT. The amendment will be modified so as to read "Cotton ties, of iron or steel."

Mr. BACON. Mr. President, I do not know what is the disposition of the Senator from Iowa and those who are acting with him as to this particular amendment. If there is any intention to antagonize it, it has been suggested that possibly it might go over.

I desire, however, to call the attention of the Senator and the Senate to the fact that a few days since, when this matter was incidentally mentioned in connection with another, the Senator from Iowa, representing the committee, stated that it was certainly the intention of the committee and of those with whom he acted to put cotton ties and binding twine upon an exact equality.

Mr. ALLISON. I shall be very glad to have the Senator read any observation of mine to that effect. I shall be glad to have the RECORD produced showing that I suggested that they be put on an equality. I said we would endeavor to deal justly with all these matters connected with this paragraph as respects the free list. If cotton ties and binding twine stand exactly upon the same relation, it is a question whether one or two of them should be on the free list or dutiable list.

Mr. BACON. I fear the Senator from Iowa forgets the occasion to which I allude.

Mr. ALLISON. Perhaps I do. I should be glad to have the Senator read just what I did say. That is to say, if I am to be judged by any observation I made hitherto respecting cotton ties, I should be glad to have it read at the desk or by the Senator.

Mr. BACON. The Senator will recall that I suggested Friday last, I think it was, that the Senator and those with whom he was acting were more sensitive as to the rights claimed by certain interests than they were as to others. I was speaking of the fact that they had so promptly recommended the placing of a compensatory duty upon cotton manufactures. The Senator asked me to specify in what instance they had failed to be equally considerate of the interests of the farmers of the North and the interests of the farmers of the South. I stated the fact that in the pending bill bagging and ties were upon the dutiable list, while grain sacks and binding twine were on the free list. The Senator from California [Mr. WHITE] called attention to the fact that I was mistaken as to grain sacks, and the matter stood as being true so far as related to binding twine being on the free list and bagging and ties being on the dutiable list.

Relating to those particular items, the Senator from Iowa then made the statement which I now suggest is correctly represented by me. The Senator from Arkansas [Mr. BERRY] rose and asked whether or not the Senator intended to produce the equality which was promised by him by bringing binding twine on to the dutiable list, so that it should be on an equality with bagging and ties, or whether he proposed to put bagging and ties on the free list, and thus get them to a plane of equality. The Senator from Iowa at that time declined to say which he would do, but gave the assurance that they would be treated on an exact equality, and said the committee was considering it.

Mr. ALLISON. I ask the Senator to read what I said.

Mr. BACON. I do not pretend to have given the exact language of the Senator from Iowa, but I do not think I have misrepresented him in substance.

Mr. WHITE. I suggest to the Senator from Georgia that a fair defense could be made upon either theory.

Mr. BACON. A defense by whom?

Mr. WHITE. By either party.

Mr. BACON. The Senator's remark is rather vague. I do not know to what he alludes.

Mr. ALLISON. I do not regard this as of any moment, so far as I am personally concerned, but as the Senator quoted my language, I wanted to see if he was making a correct quotation.

Mr. BACON. The Senator does me an injustice by saying that I endeavored to quote his language.

Mr. WHITE. If my memory serves me rightly, it was a more general expression of good will in which the Senator from Georgia acquiesced, taking it rather too literally, and making perhaps too close an application.

Mr. ALLISON. If it will suit the convenience of the Senator from Georgia, I will ask that the amendment may be passed over and be regarded as pending, and then we can discuss the whole question later on.

Mr. BACON. I was looking in the wrong copy of the RECORD. I will get the correct number and call the attention of the Senator from Iowa to it.

Mr. ALLISON. It is not a material matter.

The VICE-PRESIDENT. The amendment will be considered as pending and will be passed over.

Mr. ALLISON. Will the Senator from Georgia allow it to be passed over?

Mr. BACON. I had the wrong number of the RECORD.

Mr. PETTUS. Why not act on the amendment now?

Mr. STEWART. I do not see any objection to acting on it now.

Mr. PETTUS. I should like to know why the amendment should be passed over. Why not act on it?

Mr. BACON. Simply because the Senator from Iowa desires that the RECORD shall be produced to see whether we have labored under an impression erroneously.

Mr. PETTUS. If the Senator will allow me, it is not what the Senator from Iowa said last week. He has a right to change his mind if he chooses. I do not think he said that, because my distinct impression is that he gave an answer which you could not put a hook into. [Laughter.] What we need most is the concurrence of the Senator from Iowa now.

The reading of the bill was resumed.

Mr. PETTUS. One moment. I wish to understand why the amendment is to be passed over?

The VICE-PRESIDENT. With the assent of the Senator from Georgia, it was laid over.

Mr. BACON. It has been passed over in accordance with the suggestion of the Senator from Iowa and in accordance with the suggestion of several Senators who sit around me that possibly it is in the interest of the amendment which I seek to have incorporated in the bill and for which I have very deep solicitude.

Mr. PETTUS. I am very anxious that the Senator from Iowa shall not prove that he is correct, and therefore I should like to have the amendment acted on now.

Mr. ALLISON. I would suggest to the Senator from Alabama that personally it is immaterial to me whether or not it is now acted on; but there are four or five amendments which, in a sense, are correlated, and I think we might as well some time, when we have the inclination and when all the records can be produced, take up all those amendments and dispose of them.

Mr. PETTUS. Then the only favor I ask is that the Senator from Georgia will leave the other discussion out of the case and try to persuade those Senators to agree to the amendment.

Mr. BACON. Unless there is urgency on the part of some one, I will agree to the suggestion of the Senator from Iowa that the amendment be passed over.

The VICE-PRESIDENT. With the assent of the mover of the amendment, it will be passed over for the present.

The reading of the bill was resumed and continued to the end of paragraph 525, line 25, page 170.

Mr. ALLISON. In line 24, before the word "glaziers'," I move to insert the word "miners'."

The SECRETARY. In line 24, it is proposed to insert the word "miners';" so as to make the paragraph read:

525. Diamonds and other precious stones, rough or uncut, and not advanced in condition or value from their natural state by cleaving, splitting, cutting, or other process, including miners', glaziers', and engravers' diamonds not set, and diamond dust or bort.

The amendment was agreed to.

Mr. VEST. I should like to ask the Senator from Iowa whether intentionally the provision of existing law was left out in regard to jewels used in the manufacture of clocks and watches. It was in the McKinley Act and is in the Wilson Act.

Mr. ALLISON. The Senator will remember that the bill as it comes from the House provides for a duty of 15 per cent ad valorem on jewels for watches. The Senate committee recommend striking out "fifteen" and inserting "ten." My impression is we will recommend later on, if we can reach an agreement on the subject, that these jewels shall be placed upon the free list.

Mr. CULLOM. I thought that had already been agreed to.

Mr. ALLISON. It has not been agreed to.

Mr. CULLOM. I hope it will be.

Mr. ALLISON. The Senator from Illinois speaks with great promptness in support of a proposition which the Senator from Missouri is about to make. It has not been agreed to.

Mr. VEST. I move, after the word "set," in line 24, page 170, paragraph 525, to insert "and jewels to be used in the manufacture of clocks and watches."

The PRESIDING OFFICER (Mr. CHANDLER in the chair). The amendment will be stated.

The SECRETARY. After the word "set," in line 24, page 170, paragraph 525, it is proposed to insert "and jewels to be used in the manufacture of clocks and watches;" so as to make the paragraph read:

525. Diamonds and other precious stones, rough or uncut, and not advanced in condition or value from their natural state by cleaving, splitting, cutting, or other process, including miners', glaziers', and engravers' diamonds not set, and jewels to be used in the manufacture of clocks and watches, and diamond dust or bort.

Mr. ALLISON. I hope the Senator from Missouri will allow the amendment to be passed over. The subject is pending in the dutiable list and has been passed over there. I am rather in sympathy with him about it, but we had better deal with that when we take up the whole question of watch movements, which has also been passed over.

The PRESIDING OFFICER. Without objection, the amendment will be passed over.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 528, page 171, line 4, after the word "excrescences," to strike out "such as nutgalls;" in line 6, after the word "nuts," to insert "nutgalls;" in line 9, after the word "are," to insert "drugs and;" and in line 11, after the word "process," to insert "of manufacture;" so as to make the paragraph read:

528. Drugs, such as barks, beans, berries, balsams, buds, bulbs, and bulbous roots, excrescences, fruits, flowers, dried fibers, and dried insects, grains, gums, and gum resin, herbs, leaves, lichens, mosses, nuts, nutgalls, roots, and stems, spices, vegetables, seeds aromatic, and seeds of morbid growth, weeds, and woods used expressly for dyeing; any of the foregoing which are drugs and not edible and are in a crude state, and not advanced in value or condition by refining or grinding, or by other process of manufacture, and not specially provided for in this act.

The amendment was agreed to.

The next amendment was, in paragraph 529, page 171, line 16, after the word "collections," to strike out the comma and insert "nor fish roe preserved for food purposes;" so as to make the paragraph read:

529. Eggs of birds, fish, and insects: *Provided, however*, That this shall not be held to include the eggs of game birds the importation of which is prohibited except specimens for scientific collections nor fish roe preserved for food purposes.

The amendment was agreed to.

The next paragraph was read, as follows:

530. Emery ore.

Mr. PRITCHARD. I ask that emery ore may be passed over.

Mr. ALLISON. It is understood that all ores are passed over.

The PRESIDING OFFICER. Without objection, paragraph 530, emery ore, will be passed over.

Mr. ALLISON. I wish to offer an amendment in line 14, page 171, paragraph 529. After the word "birds," in line 14, I wish to insert an amendment. I have not the amendment here. It has been mislaid, and I may want to change it later.

Mr. JONES of Arkansas. Let it be passed over, and the Senator from Iowa can amend it when we again take up the paragraph.

Mr. ALLISON. After the word "birds," in line 14, I move to insert "or the eggs of birds not used for food."

Mr. WHITE. Do I understand the object to be to permit all eggs that are used for food to be imported?

Mr. ALLISON. This was not to be held to include the eggs of game birds, or eggs not used for food. The amendment has been for the moment mislaid, but that is the idea.

Mr. WHITE. I suggest to the Senator from Iowa that the paragraph be passed over.

Mr. ALLISON. I think it is a good amendment and ought to be made.

Mr. FRYE. It is all right.

The PRESIDING OFFICER. The Senator from Iowa will please state the amendment.

Mr. HOAR. The insertion of the amendment of the Senator from Iowa, I understand, brings the eggs of song birds, eggs that are merely included as ornaments, within the prohibition that follows. Their importation is prohibited, and it has the effect, therefore, to prevent the wholesale destruction of the song birds of this continent which is going on for the mere purposes of fancy or pleasure.

Mr. ALLISON. If the Senator from Massachusetts, as it was his original amendment suggested to me, which I have mislaid, will suggest the language that he thinks ought to be inserted there, I will accept it.

Mr. HOAR. I think the Senator has proposed sufficient language.

The PRESIDING OFFICER. The amendment will be passed over, without objection.

Mr. FRYE. Oh, no.

Mr. JONES of Arkansas. Let it be read as now proposed.

The SECRETARY. Insert, after the word "birds," in line 14, page 171, paragraph 528, the words "or eggs not used for food."

Mr. PETTUS. I propose to try my hand at the amendment. I suggest the phrase "nor eggs of birds used for food."

Mr. HOAR. That clause would prohibit the importation of eggs used for food, which are already admissible under a duty. The object of the provision, as I understand it, is to bring the eggs of song birds—birds which have no value in use—under the provision of line 15, the importation of which is prohibited. It is a well-known fact that the destruction of the song birds of this continent by the sale of their eggs for mere fanciful purposes is going on at a wholesale rate, and it is so in Europe. It is said that even the nightingales are being totally destroyed in Italy. Of course these birds fly across the Canada line and across the Mexican line.

Mr. PETTUS. If the Senator will allow me, the first line puts these things on the free list. "Eggs of birds" come in free. The Senator who offered the amendment proposes to exclude those eggs which are used for food. Therefore it has no connection with the first part of the paragraph, but is in the second, and it ought to come in in the last part of the paragraph simply eggs of birds, used for food.

Mr. HOAR. The language of the amendment, as I understand it, is this, and leaves the paragraph in this way:

Eggs of birds, fish, and insects—

Those are on the free list—

Provided, however—

It goes on to say that "the eggs of game birds or the eggs of birds not used for food" shall not be imported at all. The eggs of birds used for food are provided for in a separate provision.

That this shall not be held to include the eggs of game birds—

In other words, they shall not come in free—

or the eggs of birds not used for food—

Song birds and birds generally.

Mr. GRAY. The birds or the eggs?

Mr. HOAR. The birds and the eggs. Then it goes on—

the importation of which is prohibited except specimens for scientific collections.

It seems to me that is as clear as can be.

The PRESIDING OFFICER. The Chair will state that there is no question before the Senate. The Secretary will proceed with the reading of the bill.

Mr. HOAR. The amendment has been adopted, I understand.

The PRESIDING OFFICER. The amendment has not been

stated from the desk. The Chair is unaware what amendment is moved, and the reading will proceed unless some amendment is offered.

Mr. HOAR. The Senator from Iowa offered an amendment which has been stated three times at least.

The PRESIDING OFFICER. The Chair did not hear it. The Secretary will read the amendment proposed by the Senator from Iowa.

The SECRETARY. After the word "birds," at the end of line 14, it is proposed to insert the words "or the eggs of birds not used for food."

The PRESIDING OFFICER. If there be no objection, the amendment will be agreed to. The amendment is agreed to. The reading of the bill will proceed.

The Secretary resumed the reading of the bill. The next amendment of the Committee on Finance was, on page 171, after line 21, to insert the following:

532a. Farina.

Mr. ALLISON. I ask that that paragraph be passed over.

The PRESIDING OFFICER. The paragraph will be passed over.

The next amendment was, on page 171, after line 22, to insert:

532b. Fashion plates, engraved on steel or copper or on wood, colored or plain.

The amendment was agreed to.

The Secretary read the next paragraphs, as follows:

533. Feldspar.
534. Felt, adhesive, for sheathing vessels.

Mr. ALLISON. Having struck fence posts from the dutiable list, I move, by direction of the committee, to insert fence posts as paragraph 533½. If there is no obection, I will allow that amendment to be pending and passed over.

Mr. WHITE. What is the amendment?

Mr. ALLISON. To insert fence posts. They have been struck from the dutiable list.

The PRESIDING OFFICER. The amendment will be agreed to, if there be no objection.

Mr. BURROWS. No; I do not understand that it is agreed to. It is pending and passed over, I understand.

Mr. FRYE. The Senate struck fence posts from the dutiable list.

Mr. BURROWS. I do not want the amendment to go in until we see about it.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. It is proposed to insert as a new paragraph:

534½. Fence posts.

The PRESIDING OFFICER. The paragraph will be passed over, without objection.

Mr. FRYE. Why pass the paragraph over?

Mr. BURROWS. Because I want to look into it.

The next amendment was, on page 172, after line 2, to insert:

535½. Fish, fresh, frozen, or packed in ice (except salmon), caught in the Great Lakes, or other fresh waters by or for American fishermen or citizens of the United States.

Mr. SPOONER. I ask that that paragraph be passed over.

Mr. ALLISON. Let it be passed over.

The PRESIDING OFFICER. The paragraph will be passed over.

The next amendment was, in paragraph 537, page 172, line 7, after the word "and," to strike out "ground;" and in the same line, after the word "stones," to strike out the comma and insert "unground;" so as to make the paragraph read:

537. Flint, flints, and flint stones unground.

The amendment was agreed to.

The next amendment was, in paragraph 539, page 172, line 9, after the word "Fruits," to insert "or berries;" and in line 10, after the word "act," to strike out the comma and insert "and fruits in brine;" so as to make the paragraph read:

539. Fruits or berries, green, ripe, or dried, not specially provided for in this act and fruits in brine.

The amendment was agreed to.

The next amendment was, on page 172, after line 10, to insert:

539½. Fruit plants, tropical and semitropical, for the purpose of propagation or cultivation.

Mr. ALLISON. There should be a hyphen between "Fruit" and "plants;" so as to read, "Fruit-plants."

The PRESIDING OFFICER. A hyphen will be inserted between the words "Fruit" and "plants" as suggested. The question is on agreeing to the amendment as modified.

The amendment as modified was agreed to.

The next amendment was, on page 172, after line 15, to insert the following:

542½. Glass enamel, white, for watch and clock dials.

The amendment was agreed to.

The next amendment was, in paragraph 544, page 172, line 25, after the word "not," to strike out "dressed or;" and on page 173, line 1, after the word "manufactured," to insert "or dressed;" so as to make the paragraph read:

544. Grasses and fibers: Istle or Tampico fiber, jute, jute butts, manila, sisal grass, sunn, and all other textile grasses or fibrous vegetable substances, not manufactured or dressed in any manner, and not specially provided for in this act.

Mr. WHITE. I desire to suggest that this matter be passed over. We have already settled the question temporarily as to certain jute manufactures, and I think this paragraph had better be considered in that connection. The elimination of the words "dressed or" has some bearing, I suppose, upon the amendment already adopted.

Mr. ALLISON. I do not object to its being passed over.

Mr. WHITE. I think it had better be passed over.

Mr. ALLISON. It all relates to raw jute. It does not relate to any manufactured jute.

Mr. WHITE. The words "or dressed" are proposed to be inserted.

Mr. ALLISON. "Grasses and fibers." It is all raw material.

Mr. WHITE. I withdraw my suggestion. The Senator from Iowa is right.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

Mr. VEST. I move to insert:

Floor mattings, manufactured from round or split straw, including what is commonly known as Chinese matting.

It has already been taken from the dutiable list, and I gave notice that I would move to put it upon the free list at the proper time. I have taken the language of the existing law, but I am quite willing to go back and take the language of the pending bill.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. Insert as a new paragraph:

537½. Floor mattings, manufactured from round or split straw, including what is commonly known as Chinese matting.

The PRESIDING OFFICER. The question is on the amendment which has been read by the Secretary as a new paragraph.

Mr. ALLISON. Does the Senator from Missouri desire action upon the amendment now? That is one of the contested points.

Mr. VEST. Does the Senator want to have it go over?

Mr. ALLISON. I think it might as well go over.

Mr. VEST. Very well.

The PRESIDING OFFICER. The amendment proposed by the Senator from Missouri will be passed over, if there is no objection. The reading of the bill will be proceeded with.

The next amendment of the Committee on Finance was, in paragraph 546, page 173, line 6, after the word "uses," to insert "and;" and in line 7, after the word "for," to insert "by name;" so as to make the paragraph read:

546. Grease and oils, such as are commonly used in soap making or in wire drawing, or for stuffing or dressing leather, and which are fit only for such uses, and not specially provided for by name in this act.

The amendment was agreed to.

Mr. ALLISON. I move to insert after the word "oils," in line 4, the words, "excepting fish oil." It is already on the dutiable list.

Mr. WHITE. I was about to call attention to the fact that paragraph 499 of the present law——

Mr. ALLISON. The amendment which I suggest should go in parentheses—"(excepting fish oil)."

The SECRETARY. In line 4, after the word "oils," insert the words "(excepting fish oil)."

The amendment was agreed to.

Mr. WHITE. I merely wished to call attention to the phraseology of the present law. It is as follows:

Grease and oils, including cod oil, such as are commonly used in soap making, etc.

As I understand the amendment as now adopted, cod oil is no longer upon the free list. That is the effect of it.

The PRESIDING OFFICER. The reading of the bill will be proceeded with.

Mr. WHITE. I suggest that paragraph 546, which has just been considered, be passed over in connection with another paragraph which was passed over in the dutiable list regarding cocoanut oil and cocoanut-oil compounds. It will be necessary to harmonize those paragraphs in some way, and I suggest that 546 go over.

The PRESIDING OFFICER. If there be no objection, paragraph 546, having been amended as proposed, will be passed over.

The next amendment of the Committee on Finance was, in paragraph 547, page 173, line 8, after the word "substances," to strike out "expressly;" and in line 9, before the word "for," to insert "only;" so as to make the paragraph read:

547. Guano, manures, and all substances used only for manure.

The amendment was agreed to.

Mr. WHITE. I move the insertion, immediately after paragraph 547, of the following:

Gunny bags and gunny cloths, old or refuse, fit only for remanufacture.

I observe that this paragraph has been omitted in the pending bill; I do not know whether by design or not. If there is to be any discussion about it, it may go over and be considered with other matters of kindred character.

The PRESIDING OFFICER. Paragraph 547 being disposed of, the Senator from California moves to insert a new paragraph, which will be read:

The SECRETARY. It is proposed to insert the following as a new paragraph:

547½. Gunny bags and gunny cloths, old or refuse, fit only for remanufacture.

The PRESIDING OFFICER. The paragraph will be passed over, if there be no objection.

Mr. ALLISON. I call the attention of the Senator from California to the fact that that is already covered by paragraph 608—"waste rope and waste bagging, fit only to be converted into paper."

Mr. WHITE. I had not observed that fact. I was following the items of the old law and the present bill.

Mr. ALLISON. If the Senator will just turn to paragraph 608, on page 179, he will see—

Waste rope and waste bagging fit only to be converted into paper.

We have not reached that paragraph yet.

Mr. FRYE. It is the same thing.

Mr. WHITE. I am somewhat doubtful whether the phraseology is broad enough to cover it. Let it be passed over for the present.

The PRESIDING OFFICER. The paragraph will be passed over, without objection.

The reading of the bill was continued to line 14, on page 173, the last paragraph read being as follows:

549. Hair of horse, cattle, and other animals, cleaned or uncleaned, drawn or undrawn, but unmanufactured, not specially provided for in this act; and human hair, raw, uncleaned, and not drawn.

Mr. ALLISON. I propose to amend the paragraph in line 11 by striking out the words "cleaned or;" in line 12 by striking out the words "drawn or," and in the same line by striking out the word "but" and inserting "and." I offer that as one amendment.

The SECRETARY. It is proposed, after the word "animals," in line 11, to strike out the words "cleaned or;" in line 12, after the word "uncleaned," to strike out the words "drawn or," and after the word "undrawn," in the same line, to strike out the word "but" and insert the word "and;" so as to read:

Hair of horse, cattle, and other animals, uncleaned, undrawn, and unmanufactured, not specially provided for in this act, etc.

The amendment was agreed to.

The next amendment of the Committee on Finance was, on page 173, after line 14, to strike out the following paragraph:

550. Hides, raw or uncured, whether dry, salted, or pickled; Angora goatskins, raw, without the wool, unmanufactured; asses' skins, raw or unmanufactured; and skins, except sheepskins with the wool on.

Mr. ALLISON. That paragraph should be passed over.

The PRESIDING OFFICER. Paragraph 550 will be passed over.

The next amendment was, on page 173, after line 23, to insert the following:

552½. Hones and whetstones.

The amendment was agreed to.

The next amendment was, in paragraph 555, page 174, line 1, after the word "of," to strike out "not cut, sawed, or otherwise manufactured, and" and insert "unmanufactured, including;" so as to make the paragraph read:

555. Horns and parts of, unmanufactured, including horn strips and tips.

The amendment was agreed to.

The next amendment was, in paragraph 558, page 174, line 8, after the word "Indigo," to strike out the comma and insert "whether natural or artificially prepared;" so as to read:

558. Indigo whether natural or artificially prepared.

Mr. ALLISON. I ask that that paragraph may be passed over. It has very close relation with the whole question of colors, which is not disposed of either on the dutiable or the free list.

The PRESIDING OFFICER. Does the Senator desire to have the amendment agreed to?

Mr. ALLISON. I desire to have it passed over.

The PRESIDING OFFICER. The paragraph will be passed over without action on the amendment, if there be no objection.

The next paragraph was read, as follows:

559. Iodine, crude.

Mr. WHITE. I call the attention of the Senator from Iowa to the item with reference to iodine and desire to ask him a question concerning it. In the proposed bill it is "Iodine, crude." In the present law it is "Iodine, crude, and resublimed." What is the reason of the omission of the words "and resublimed"?

Mr. ALLISON. I could not hear the Senator distinctly.

Mr. WHITE. The present law reads:

Iodine, crude, and resublimed.

I notice that the bill as it now stands is "Iodine, crude." It leaves out the words "and resublimed." I presume nothing has been reserved on the dutiable list which requires the omission.

Mr. ALLISON. It has been reserved in the dutiable list at 20 cents a pound. It is a very high grade of manufacture. I think it includes alcohol.

Mr. WHITE. It must be a high grade.

The next amendment of the Committee on Finance was, in paragraph 562, page 174, line 12, after the word "tusks," to strike out "sawed vertically" and insert "in their natural state or cut;" in line 13, after the word "grain," to insert "only;" and in the same line, after the word "with," to strike out "cuts not less than 4 inches apart, and not otherwise cut or manufactured or advanced in value from the natural state, and vegetable ivory" and insert "the bark left intact;" so as to make the paragraph read:

562. Ivory tusks in their natural state or cut across the grain only, with the bark left intact.

The amendment was agreed to.

Mr. ALLISON. In line 16, after the word "intact," I move to strike out the period and insert a comma and add the words "and vegetable ivory."

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. At the end of the paragraph, after the word "intact," it is proposed to add "and vegetable ivory."

The amendment was agreed to.

Mr. WHITE. I move to substitute for paragraph 562 the following:

Ivory, sawed or cut into logs, but not otherwise manufactured, and vegetable ivory.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. It is proposed to strike out paragraph 562 as amended and insert:

Ivory, sawed or cut into logs, but not otherwise manufactured, and vegetable ivory.

The PRESIDING OFFICER. The question is on the adoption of the amendment proposed by the Senator from California to strike out and insert.

The amendment was rejected.

Mr. VEST. I ask the Senate to go back for a minute to paragraph 561. My attention was called away at the time it was considered. I desire to insert a new paragraph after paragraph 561, to be paragraph 561½. "Iron ore."

The PRESIDING OFFICER. The amendment proposed by the Senator from Missouri will be stated.

The SECRETARY. On page 174, line 11, it is proposed to insert as a new paragraph:

561½. Iron ore.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from Missouri [Mr. VEST].

Mr. ALLISON. I am perfectly willing to have the vote taken on that amendment at this time if the Senator desires it; but we have already put iron ore on the dutiable list, and perhaps he had better allow the amendment to go over, and it can be taken up later. I ask that it be passed over.

The PRESIDING OFFICER. In the absence of objection, the amendment proposed by the Senator from Missouri [Mr. VEST] will be passed over.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, on page 175, after line 4, to insert as a new paragraph the following:

574½. Lemon juice, lime juice, and sour-orange juice.

The amendment was agreed to.

The reading of the bill was continued to the end of paragraph 578.

Mr. ALLISON. I ask that paragraph 578, being line 11, on page 175, may be passed over. It has not been disposed of on the dutiable list.

The PRESIDING OFFICER. Paragraph 578, "Lime, chloride of, or bleaching powder," will be passed over if there be no objection. The Chair hears none, and it is so ordered.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, on page 175, after line 13, to insert as a new paragraph:

580½. Loadstones.

The amendment was agreed to.

The next amendment was, in paragraph 582, page 175, line 17, after the word "Magnesite," to strike out "or native mineral carbonate of magnesia, all not medicinal" and insert "crude or calcined, not purified;" so as to make the paragraph read:

582. Magnesite, crude or calcined, not purified.

The amendment was agreed to.

Mr. WHITE. I notice that the present law includes "magnesia, sulphate of, or Epsom salts." Is it designed to make Epsom salts dutiable, I will ask the Senator?

Mr. ALLISON. I should think they would be dutiable under the phraseology here, and they are made dutiable specifically by paragraph 29.

Mr. WHITE. I move to insert as paragraph 581½, the following:

581½. Magnesia, sulphate of, or epsom salts.

Mr. ALLISON. I ask that that may be passed over for the time being.

Mr. WHITE. Very well.

The PRESIDING OFFICER. The amendment proposed by the Senator from California will, without objection, be passed over.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 583, page 175, line 19, after the word "Magnesium," to strike out the comma and to insert "not made up into articles;" so as to read:

583. Magnesium not made up into articles.

The amendment was agreed to.

Paragraph 584 was read, as follows:

584. Manganese, oxide, and ore of.

Mr. PRITCHARD. I ask that paragraph 584 may be passed over for the present.

The PRESIDING OFFICER. It will be passed over, if there be no objection.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, on page 176, after line 7, to strike out paragraph 592, as follows:

592. Mineral salts obtained by evaporation from mineral waters, when accompanied by a duly authenticated certificate and satisfactory proof, showing that they are in no way artificially prepared, and are only the product of a designated mineral spring.

The amendment was agreed to.

The next amendment was, on page 176, line 21, paragraph 596, to strike out "Myrobolan" and insert "Myrobolans;" so as to read:

596. Myrobolans.

The amendment was agreed to:

The next amendment was, in paragraph 598, page 176, line 25, after the word "publications," to insert "issued within six months of the time of entry;" so as to make the paragraph read:

598. Newspapers and periodicals; but the term "periodicals" as herein used shall be understood to embrace only unbound or paper-covered publications, issued within six months of the time of entry, containing current literature of the day and issued regularly at stated periods, as weekly, monthly, or quarterly.

The amendment was agreed to.

The next amendment was, on page 177, after line 10, to strike out paragraph 603, as follows:

603. Oils: Amber, crude or rectified, ambergris, anise or anise seed, aniline, cajeput, caraway, cedrat, chamomile, civet, cocoanut, enfleurage grease, fennel, jasmine or jasimine, juglandium, juniper, mace, neroli, or orange flower, nut oil or oil of nuts not specially provided for in this act, olive oil or olive-oil foots imported expressly for manufacturing or mechanical purposes and fit only for such use, palm, thyme, origanum red or white, valerian; and also spermaceti, whale and other fish oils of American fisheries, and fish and all other articles the products of such fisheries; petroleum, crude or refined: *Provided*, That if there be imported into the United States crude petroleum, or the products of crude petroleum produced in any country which imposes a duty on petroleum or its products exported from the United States, there shall be levied, paid, and collected upon said crude petroleum or its products so imported 40 per cent ad valorem.

And in lieu thereof to insert:

603. Oils: Almond, amber, crude and rectified ambergris, anise or anise seed, aniline, aspic or spike lavender, bergamot, cajeput, caraway, cassia, cinnamon, cedrat, chamomile, citronella or lemon grass, civet, fennel, jasmine or jasimine, juglandium, juniper, lavender, lemon, limes, mace, neroli or orange flower, enfleurage grease, nut oil or oil of nuts not otherwise specially provided for in this act, orange oil, olive oil for manufacturing or mechanical purposes fit only for such use and valued at not more than 60 cents per gallon, ottar of roses, palm and cocoanut, rosemary or anthoss, sesame or sesamum seed or bean, thyme, origanum red or white, valerian; and also spermaceti, whale, and other fish oils of American fisheries, and all fish and other products of such fisheries; petroleum, crude or refined: *Provided*, That if there be imported into the United States crude petroleum, or the products of crude petroleum produced in any country which imposes a duty on petroleum or its products exported from the United States, there shall in such cases be levied, paid, and collected a duty upon said crude petroleum or its products so imported equal to the duty imposed by such country.

Mr. WHITE. I desire to have that paragraph passed over. I call the attention of the Senator from Iowa to the proposed amendment of the committee as to that paragraph. I am making some investigations concerning that question, and I should like to have it passed over.

The PRESIDING OFFICER. In the absence of objection, the paragraph will be passed over.

Mr. JONES of Arkansas. I should like to ask the Senator from Iowa why the provision which is paragraph 557½ of the Wilson law is left out of the free list? The provision in the existing law is:

Molasses testing not above 40 degrees polariscope test, and containing 20 per cent or less of moisture.

It is a very low grade of molasses, which, I understand, is only used for purposes of distillation, and it is shipped in tanks and called "blackstrap." It comes from Cuba and is used in Brooklyn to some considerable extent for the purpose of making alcohol. I presume any tax put upon it would prevent its importation.

Mr. ALLISON. If the provision which the Senator has read is left out, of course the article will have to pay, according to its value, 10 per cent, I presume.

Mr. JONES of Arkansas. I presume that any tax upon this article will prevent its importation. The transportation is as high a cost as it will bear, and I suggest to the Senator that the matter go over for the purpose of investigation.

Mr. ALLISON. I assure the Senator we shall investigate it. I think if the article is not specially provided for in the sugar schedule——

Mr. JONES of Arkansas. It is not.

Mr. ALLISON. Then it would go into the basket clause at 10 or 20 per cent. Certainly it is an unmanufactured article.

Mr. JONES of Arkansas. I do not know exactly where it would go, but I feel very sure that it ought to be on the free list.

Mr. ALLISON. It would go into the basket clause at either 10 or 20 per cent. However, I shall look into the matter.

Mr. JONES of Arkansas. The fact is that this article can not be imported with any sort of a tax, and it is only used for purposes of distilling by a very few persons. I do not think very much of it comes in, but I think it ought to be allowed to come in.

Mr. ALLISON. I believe this article was free under the act of 1890, as well as under the act of 1894.

Mr. JONES of Arkansas. I think so, though I am not sure about that.

The PRESIDING OFFICER. The reading of the bill will proceed.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, on page 178, after line 23, to insert as a new paragraph the following:

603½. Orange and lemon peel, not preserved, candied, or otherwise prepared.

The amendment was agreed to.

Paragraphs 604 and 605 were read, as follows:

604. Orchil, or orchil liquid.

605. Ores of gold, silver, copper, or nickel, and nickel matte; sweepings of gold and silver.

Mr. PETTIGREW. I should like to have paragraph 605, making nickel and nickel matte free, passed over.

The PRESIDING OFFICER. Paragraph 605 will be passed over, in the absence of objection.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, on page 179, after line 4, to insert as a new paragraph the following:

606½. Paintings, in oil or water colors, original drawings and sketches, and artists' proofs of etchings and engravings, and statuary, not otherwise provided for in this act; but the term "statuary" as used in this act shall be understood to include only professional productions, whether round or in relief, in marble, stone, alabaster, wood, or metal, of a statuary or sculptor, and the word "painting" as used in this act shall not be understood to include such as are made wholly or in part by stenciling or any other mechanical process, nor any article of utility.

Mr. ALLISON. I ask that that paragraph may be passed over.

The PRESIDING OFFICER. In the absence of objection, the paragraph will be passed over.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 608, page 179, line 18, after the word "rope," to insert "and;" and in line 19, after the word "bagging," to strike out "and poplar or other woods;" so as to make the paragraph read:

608. Paper stock, crude, of every description, including all grasses, fibers, rags (other than wool), waste, shavings, clippings, old paper, rope ends, waste rope, and waste bagging, fit only to be converted into paper.

The amendment was agreed to.

Mr. ALLISON. I move to insert after the word "waste," in line 17, the words "including jute waste."

Mr. WHITE. I suggest to the Senator from Iowa right at that point the question I raised a few moments ago, that he should use the phraseology of the present law, and say "including gunny bags or gunny cloth, old or refused, fit only for remanufacture" after the word "waste."

Mr. ALLISON. If they are fit only for remanufacturing, they are waste bagging under this phraseology. The trouble with the paragraph proposed by the Senator, as I understand, is that there is difficulty in the custom-house owing to the phraseology of the existing law on this subject.

Mr. WHITE. How can that trouble be alleviated by using the words "waste bagging," for then the real question to be determined is, What is waste bagging? So whether the article is fit for remanufacture or not must depend alike on a knowledge of whether it is really waste or whether it is something more useful and more valuable. I am afraid the phrase "waste bagging" does not include "gunny bags and gunny cloth."

Mr. ALLISON. Then I am perfectly willing to insert the words "gunny bags and gunny cloth."

Mr. WHITE. That will do.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. On page 179, paragraph 608, after the word "waste," in line 17, it is proposed to insert "including jute waste;" and after the word "bagging," in line 19, to insert "including gunny cloth and gunny bags."

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from Iowa [Mr. ALLISON.]

The amendment was agreed to.

Mr. JONES of Arkansas. I did not have the opportunity to offer a new paragraph, as I intended, just before this paragraph, to be 607½. I move to insert:

607½. Paris green and london purple.

I have no objection to the amendment going over.

Mr. ALLISON. Let it go over.

The PRESIDING OFFICER. The amendment proposed by the Senator from Arkansas will be passed over, if there be no objection.

Mr. JONES of Arkansas. I should like to ask the Senator from Iowa what was done with paragraph 441, in Schedule N, which was disposed of while I was out of the Senate? If it has been acted on, I should be glad to have that reconsidered and leave it open, as I wish to investigate it. It relates to matting made of cocoa fiber or rattan.

The PRESIDING OFFICER. The Chair will state that that paragraph was not amended, and that it is subject to amendment, as the Chair understands, by agreement, at any time.

Mr. ALLISON. I do not quite understand what the Senator from Arkansas proposes.

Mr. JONES of Arkansas. I wanted that paragraph passed over in order to allow me to examine it. I thought possibly I might want to move an amendment to it.

Mr. ALLISON. Very well.

The PRESIDING OFFICER. The Chair understands that paragraph 441, in relation to cocoa matting, is subject to amendment at any time.

Mr. JONES of Arkansas. That it may be reconsidered if it has been passed; and I wish to have it passed over.

The PRESIDING OFFICER. It simply remains in the bill, not having been amended. It was merely read, and is subject to amendment at any time.

Mr. JONES of Arkansas. Very well.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, on page 179, after line 20, to insert the following as a new paragraph:

608½. Paraffin.

The amendment was agreed to.

The next amendment was, on page 180, after line 4, to insert paragraph 612½, in the following language:

612½. Philosophical and scientific apparatus, utensils, instruments, and preparations, including bottles and boxes containing the same, specially imported in good faith for the use or by order of any society or institution incorporated or established solely for religious, philosophical, educational, scientific, or literary purposes, or for the encouragement of the fine arts, or for the use or by order of any college, academy, school, or seminary of learning in the United States, or any State or public library, and not for sale, subject to such regulations as the Secretary of the Treasury shall prescribe.

The amendment was agreed to.

The next amendment was, on page 180, line 16, paragraph 613, after the word "crude," to strike out "or native;" so as to make the paragraph read:

613. Phosphates, crude.

The amendment was agreed to.

The Secretary read paragraph 614, as follows:

614. Plants, trees, shrubs, roots, seed cane, and seeds, imported by the Department of Agriculture or the United States Botanic Garden.

Mr. ALLISON. I wish to give notice now to Senators that the committee may offer an amendment to that paragraph, allowing this exemption to extend to agricultural experiment stations. I am not sure that such an amendment will be offered, but I think it could properly be offered. In line 17 the words "seed" and "cane" should be connected by hyphen, so as to read "seed-cane." I will move that amendment.

The PRESIDING OFFICER. That amendment will be made, in the absence of objection. The Chair hears none.

The reading of the bill was resumed, and paragraph 615 was read, as follows:

615. Plaster rock, or gypsum, and terra alba, crude and not calcined, ground or otherwise advanced from the natural state.

Mr. ALLISON. I ask that that paragraph may be passed over. I may have an amendment to offer to it.

The PRESIDING OFFICER. In the absence of objection, the paragraph will be passed over.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, on page 181, paragraph 619, line 4, after the word "potash," to strike out "carbonate of" and insert "crude, or 'black salts;' carbonate of potash, crude or refined; hydrate of, or caustic potash, not including refined in sticks or rolls;" so as to make the paragraph read:

619. Potash, crude, or "black salts;" carbonate of potash, crude or refined; hydrate of, or caustic potash, not including refined in sticks or rolls; nitrate of potash or saltpeter, crude; sulphate of potash, crude or refined, and muriate of potash.

The amendment was agreed to.

Mr. STEWART. I move to insert at the end of the paragraph the amendment which I send to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. It is proposed to add at the end of paragraph 619 "and cyanide of potassium."

The PRESIDING OFFICER. The question is on the amendment submitted by the Senator from Nevada [Mr. STEWART].

Mr. SEWELL. I ask the Senator from Iowa if that matter was not passed over for further consideration in the dutiable paragraph?

Mr. ALLISON. I was about to state that could I have caught the ear of the Chair. Therefore I ask the Senator from Nevada to let this amendment lie over until we settle the question in a former paragraph.

Mr. STEWART. We did settle the question as to cyanide. We had a vote on that and we struck out the amendment.

Mr. ALLISON. Not at all; but if the Senator wants to have a vote on the amendment I shall not object.

Mr. SEWELL. I want this matter to go over for further consideration.

Mr. STEWART. I am willing that it should lie over, but, if the Senator will indulge me, I ask to have read a letter from one of the leading miners of the United States engaged in gold mining in regard to this particular matter.

The PRESIDING OFFICER. The letter presented by the Senator from Nevada will be read.

The Secretary read as follows:

SALT LAKE CITY, UTAH, *February 26, 1897.*

DEAR SIR: The mining men of the West are apprised of the fact that the firm of Roessler & Hasslacher Company, of New York City, manufacturers of cyanide of potassium, are exerting themselves to a considerable extent to have the duty on that article increased, which is a move almost solely in the interests of one or two manufacturers. As it is constitutional and customary to legislate in favor of the greater number, and in the interest of the General Government as well, I desire to submit the following remarks:

Throughout the Western country there are billions of tons of very low grade gold ores, containing $2 and $3 per ton, which gross value may all be extracted by fine grinding and leaching with cyanide of potassium, and under favorable conditions give a profit to the producer, but under all conditions raise the production of gold in the United States to an enormous extent (as it is a fact that it costs more to produce the precious metals than the amount of bullion produced), which would absolutely place our Government beyond the necessity of importing gold by the sale of bonds whenever the balance of trade is against us and the reserves of the Treasury of the United States require replenishing.

If cyanide of potassium was as cheap as common salt, I predict, with my knowledge of the vast empire of low-grade gold ores in the United States, that our annual production of gold would double in six to eight years.

An ad valorem duty of 25 per cent now prohibits Europe from landing any cyanide. While for the last twelve months some small imports have been made, since the firm of Roessler & Hasslacher have been manufacturing cyanide of potassium from salt brine from wells, piped some 12 miles to Niagara Falls and there decomposed by electricity produced by water power, they have reduced their price to 28 cents per pound, carload lots, while I am informed by chemists who are in a position to know that the actual cost of production is not over 9 cents per pound. I know of but two manufacturers in the United States who produce this article, viz, the Roessler & Hasslacher Chemical Company, of New York, and Maas & Waldstein, of Newark, N. J., which latter firm stopped producing, or at least competing, more than a year ago, by an understanding with the former firm.

Thus the question is simply whether it is good legislation to continue and even raise the duty on this article and enrich one or two manufacturers, thus retarding the treatment of low-grade ores, which always have and always will produce the bulk of all the bullion produced, or to foster the production of gold by putting this article on the free list.

I personally have purchased during the last twelve months from the Roessler & Hasslacher Chemical Company not less than 144 tons of cyanide, costing about $30,640, f. o. b., New York City, with an additional cost for freight to the mines, and could have used four times as much, and consequently produced more than double the amount of bullion from low-grade ores now left standing in the mines, were not the price of cyanide of potassium, with its high freight charges, against us.

Trusting that these facts will induce your committee to give the low-grade ores a show by putting cyanide on the free list, and thus largely increase the output of gold, which would go far toward settling the silver question as well,

I am, yours, very respectfully,

J. R. DE LA MAR.

Hon. NELSON DINGLEY, Jr.,
Chairman Committee on Ways and Means,
House of Representatives, Washington, D. C.

Mr. WHITE. I call the attention of the Senator from Iowa to the fact that the provision of the bill treats of this subject. It is under the head of "Potash," and it does not go, I believe, under the head of "Medicinal preparations." It comes under the head of "Potash," and was there made dutiable at 6 cents per pound.

Mr. STEWART. That was stricken out.

Mr. WHITE. The committee proposed to strike it out. A discussion arose concerning it, and the matter, I understand, was passed over, to be finally determined when we reached the free list.

The PRESIDING OFFICER. The Chair will state that the amendment was agreed to, striking out "cyanide, 6 cents per pound."

Mr. STEWART. It was agreed to.

Mr. SEWELL. That is not my understanding. I objected to it, and the matter went over.

Mr. WHITE. The matter had to go over, necessarily.

Mr. ALLISON. My recollection agrees with that of the Senator from New Jersey.

Mr. SEWELL. That is my understanding.

Mr. ALLISON. It is immaterial, I take it, because it is understood——

The PRESIDING OFFICER. The Chair will state that the record at the Clerk's desk shows that the amendment was adopted.

Mr. ALLISON. That is undoubtedly correct. We can not dispute the record.

The PRESIDING OFFICER. How is it proposed to leave the paragraph now?

Mr. ALLISON. The Senator from Nevada proposes to put it on the free list by inserting it here. Now, I ask him to allow it to be passed over until it can be considered further on the dutiable list or until we may look into it a little more. The Senator from New Jersey especially desires the matter to be reconsidered. I did not know that the amendment had been agreed to.

Mr. WHITE. I will suggest that, as it is rather late, it would not be well, perhaps, to precipitate a discussion of the matter or to have any roll call this evening, anyway. Why not concur in the suggestion of the Senator from Iowa, that the matter had better be permitted to rest?

Mr. ALLISON. Passed over.

Mr. STEWART. To come up later.

The PRESIDING OFFICER. Paragraph 619, with the committee amendment adopted, will be passed over, subject to the motion of the Senator from Nevada, unless there be objection. The Chair hears none, and that will be the order.

The reading of the bill was resumed. The next amendment of the Committee on Finance was to insert as a new paragraph the following:

619½. Professional books, implements, instruments, and tools of trade, occupation, or employment, in the actual possession at the time, of persons arriving in the United States; but this exemption shall not be construed to include machinery or other articles imported for use in any manufacturing establishment, or for any other person or persons, or for sale, nor shall it be construed to include theatrical scenery, properties, and apparel; but such articles brought by proprietors or managers of theatrical exhibitions arriving from abroad, for temporary use by them in such exhibitions, and not for any other person, and not for sale, and which have been used by them abroad, shall be admitted free of duty under such regulations as the Secretary of the Treasury may prescribe; but bonds shall be given for the payment to the United States of such duties as may be imposed by law upon any and all such articles as shall not be exported within six months after such importations: *Provided*, That the Secretary of the Treasury may in his discretion extend such period for a further term of six months in case application shall be made therefor.

The amendment was agreed to.

The next amendment was to insert a new paragraph as follows:

622½. Regalia and gems, statues, statuary, and specimens or casts of marble, bronze, alabaster, or plaster of paris, where specially imported in good faith for the use of any society incorporated or established solely for religious, philosophical, educational, scientific, or literary purposes, or for the encouragement of the fine arts, or for the use or by order of any college, academy, school, or seminary of learning in the United States, or any State or public library, and not for sale; but the term "regalia" as herein used shall be held to embrace only such insignia of rank or office or emblems as may be worn upon the person or borne in the hand during public exercises of the society or institution, and shall not include articles of furniture or fixtures, or of regular wearing apparel, nor personal property of individuals.

Mr. ALLISON. I ask that paragraph 622½ may be passed over, as amendments are suggested which I have not before me.

The PRESIDING OFFICER. The paragraph has been read and will be passed over. The amendment will be considered as agreed to.

Mr. HOAR. What was the announcement of the Chair about the last paragraph?

The PRESIDING OFFICER. In paragraph 622½ the committee amendment is agreed to, and the paragraph is passed over.

Mr. ALLISON. My request was that the paragraph should be passed over after being read.

The PRESIDING OFFICER. The paragraph will be passed over without action.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 626, line 1, page 183, to strike out "salep, or saloup;" so as to read:

626. Salacin.

The amendment was agreed to.

The next amendment was, after paragraph 626, to insert as a new paragraph:

626a. Salep, or salop.

The amendment was agreed to.

The next amendment was to insert after the amendment just adopted:

626b. Sauerkraut.

The amendment was agreed to.

The next amendment was, in paragraph 627, page 183, line 4, after the word "sausages," to insert "bologna;" so as to read:

627. Sausages, bologna.

The amendment was agreed to.

The next amendment was, in paragraph 628, page 183, line 5, after the word "Anise," to insert "beet, canary;" in line 6, before the word "cotton," to insert "cauliflower, coriander;" in line 7, after the word "hoarhound," to insert "mangel-wurzel;" in the same line, after the word "mustard," to insert "radish;" in line 8, after the word "or," to strike out "bene" and insert "bean;" in the same line, before the word "mangel-wurzel," to strike out "sugar beet" and insert "spinach;" and in line 9, after the word "seed," to strike out the comma and the word "and" and the semicolon and insert "bulbs and bulbous roots, not edible;" so as to make the paragraph read:

628. Seeds: Anise, beet, canary, caraway, cardamom, cauliflower, coriander, cotton, cummin, fennel, fenugreek, hemp, hoarhound, mangel-wurzel, mustard, radish, rape, St. John's bread or bean, spinach; sorghum or sugar cane for seed bulbs and bulbous roots, not edible; all flower and grass seeds; all the foregoing not specially provided for in this act.

Mr. SEWELL. As the paragraph in the dutiable list relating to the same subject has gone over for further consideration, I should like to have this accompany it.

Mr. ALLISON. It may be passed over.

Mr. SEWELL. It puts flower and grass seed on the free list. If there is anything that costs money in the agricultural line, it is the raising of flower seed. It requires a high state of cultivation, more men, more money. It ought not to be on the free list.

Mr. ALLISON. I will say to the Senator that some days ago we placed upon the dutiable list a number of these flower and grass seed, and of course the free list only includes those not specially provided for. But I am perfectly willing that the whole matter shall go over. I think it ought to.

Mr. SEWELL. I should like to have both considered together.

Mr. ALLISON. That is right. There is no objection to it.

The PRESIDING OFFICER. Paragraph 628, without the adoption of the committee amendment, will be passed over.

Mr. TURPIE. I wish to offer an amendment to paragraph 628. I understand the effect of the paragraph will be to place the seeds mentioned on the free list, no matter for what purpose imported.

I wish to move an amendment providing that all seeds and grain not imported for sale, to be used by the person or persons importing the same for planting purposes, shall be free. I do not think the Senate wishes to charge anything on seeds or grain imported for the purpose of seed and for the purpose of planting. I offer the amendment, and ask that it may be printed.

The PRESIDING OFFICER. The amendment proposed by the Senator from Indiana will be received and printed, and the paragraph will be passed over, subject to motions to amend.

The reading of the bill was resumed. The next amendment of the Committee on Finance was to strike out paragraph 629, as follows:

629. Scientific apparatus, instruments, chemicals, books, maps and charts, such as are not made or published in the United States, when expressly imported in good faith by and for the use of any regularly established or incorporated university, college, academy, scientific society for the promotion of knowledge, school, seminary of learning, or public library, and not intended for sale; and the Secretary of the Treasury shall make suitable regulations to carry out the intent of this paragraph.

The amendment was agreed to.

The next amendment was to strike out paragraph 630, as follows:

630. Sheep dip.

The amendment was agreed to.

The next amendment was, in paragraph 631, page 183, line 22, after the word "barrels," to insert "in single tubes;" so as to make the paragraph read:

631. Shotgun barrels, in single tubes, forged, rough bored.

The amendment was agreed to.

The next amendment was to insert as a new paragraph the following:

636½. Skins of all kinds, raw (except sheepskins with the wool on), and hides not specially provided for in this act.

Mr. HOAR. Is that intended to be agreed to as it stands?

Mr. ALLISON. I think it had better be passed over.

The VICE-PRESIDENT. The amendment will be passed over.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 637, page 184, line 8, after the word "nitrate," to strike out "and chlorate of;" so as to make the paragraph read:

637. Soda, nitrate of, or cubic nitrate.

The amendment was agreed to.

The next amendment was, in paragraph 639, page 184, line 11, after the word "cabinets," to strike out "or as objects of science" and insert "or for scientific collections;" so as to make the paragraph read:

639. Specimens of natural history, botany, and mineralogy, when imported for cabinets or for scientific collections, and not for sale.

Mr. HOAR. I should like to ask the Senator what the phrase "for cabinets" means as distinguished from the phrase he has now?

Mr. ALLISON. "For cabinets," I take it, means for public places—libraries.

Mr. HOAR. The words "for cabinets" might be subject to great play for private purposes. If the Senator puts in the words

which he now proposes, why should not the words "for cabinets" be stricken out?

Mr. ALLISON. Every man who would import after that would import for scientific collections.

Mr. HOAR. Certainly; I understand.

Mr. ALLISON. That is the language of the present law, I believe.

Mr. HOAR. I will not make a point on it, if the Senator from Iowa does not; but it seems to me it is an exceedingly vague and inexact description all around. The phrase should be like that used for a great many other purposes, as to books and apparatus for public collections, natural-history societies, etc.

Mr. ALLISON. I agree with the Senator, and I will say for "public scientific collections."

Mr. HOAR. Strike out "for cabinets."

Mr. ALLISON. The language in the bill is the phraseology heretofore used. It has been used for a great many years.

Mr. HOAR. I know it has, but it is very bad.

The VICE-PRESIDENT. What is the suggestion of the Senator from Massachusetts?

Mr. HOAR. To strike out the words "for cabinets" and insert "public" after "scientific."

Mr. ALLISON. I think that is a very good suggestion.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. In line 11 it is proposed to strike out "for cabinets," and after the word "scientific" to insert the word "public."

Mr. HOAR. The word "or" should come out.

Mr. ALLISON. The word "or" should come out.

The VICE-PRESIDENT. The Secretary will read the paragraph as proposed to be amended.

The Secretary read as follows:

639. Specimens of natural history, botany, and mineralogy, when imported for scientific public collections, and not for sale.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The reading of the bill was resumed and continued to the end of paragraph 646, on page 185, which is as follows:

646. Sulphur, lac or precipitated, and sulphur or brimstone, crude, in bulk, sulphur ore as pyrites, or sulphuret of iron in its natural state, containing in excess of 25 per cent of sulphur, and sulphur not otherwise provided for.

Mr. PENROSE. I ask that the paragraph may be passed over.

Mr. ALLISON. I do not object.

The VICE-PRESIDENT. The paragraph will be passed over.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 647, page 185, line 14, after the word "acid," to strike out "exported" and insert "imported into such country;" so as to make the paragraph read:

647. Sulphuric acid which at the temperature of 60 degrees Fahrenheit does not exceed the specific gravity of one and three hundred and eighty thousandths, for use in manufacturing superphosphate of lime or artificial manures of any kind, or for any agricultural purposes: *Provided*, That upon all sulphuric acid imported from any country, whether independent or a dependency, which imposes a duty upon sulphuric acid imported into such country from the United States, there shall be levied and collected a duty of one-fourth of 1 cent per pound.

The amendment was agreed to.

The next amendment was to insert as a new paragraph the following:

648½. Tapioca, cassava or cassady.

The amendment was agreed to.

The next amendment was, in paragraph 650, page 185, line 20, after the word "Tea," to strike out "and tea;" so as to make the paragraph read:

650. Tea plants.

Mr. JONES of Arkansas. I call the attention of the Senator from Iowa to this paragraph. It occurs to me it should be passed over.

Mr. ALLISON. I do not object to its being passed over.

Mr. JONES of Arkansas. It embraces tea, and, as I understand it, the committee has tea under consideration.

Mr. FRYE. It relates only to tea plants.

Mr. JONES of Arkansas. The paragraph as it was proposed read, "Tea and tea plants," and the committee propose to strike out "and tea," so as to make it apply only to tea plants. It would take tea off the free list. If tea is not retained on the dutiable list (that has been the idea of the committee, I believe, which has not yet been abandoned), it ought to remain where it is now. Therefore the paragraph ought to be passed over.

Mr. ALLISON. The Senator is right about it.

The VICE-PRESIDENT. The paragraph will be passed over.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, on page 186, line 8, to strike out paragraph 661, as follows:

661. Uranium, oxide and salts of.

The amendment was agreed to.

The next amendment was to strike out paragraph 666, as follows:

666. Wearing apparel, articles of personal adornment, toilet articles, and similar personal effects of persons arriving in the United States; but this exemption shall only include such articles as actually accompany and are in the use of and as are necessary and appropriate for the wear and use of such persons for the immediate purposes of the journey and present comfort and convenience, and shall not be held to apply to merchandise or articles intended for other persons or for sale; and in case the persons thus arriving are citizens or residents of the United States, the articles exempted shall not exceed $100 in value, nor shall the exemption apply to residents of other countries entering the United States more than once in each year: *Provided, however*, That all the wearing apparel and other personal effects of residents of the United States, so returning, as may have been taken by them out of the United States to foreign countries, and which have not been advanced in value or improved in condition by any process of labor or manufacture in such countries, shall be admitted free of duty, without regard to their value, upon their identity being established under appropriate rules and regulations to be prescribed by the Secretary of the Treasury.

And to insert in lieu thereof:

666. Wearing apparel, articles of personal adornment, toilet articles, and similar personal effects of persons arriving in the United States; but this exemption shall only include such articles as actually accompany and are in the use of, and as are necessary and appropriate for the wear and use of such persons, for the immediate purposes of the journey and present comfort and convenience, and shall not be held to apply to merchandise or articles intended for other persons or for sale.

Mr. ALLISON. I desire to have paragraph 666 passed over, including the House provision and the Senate amendment.

The VICE-PRESIDENT. Without objection, it will be passed over.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 668, page 187, line 21, after the word "including," to strike out "pulp-wood" and insert "poplar and other pulp-woods;" in line 22, after the word "shingle-bolts," to insert "heading-bolts, stave-bolts;" in line 23, after the word "sawed," to insert "or planed on one side;" and in line 24, after the word "fence-posts," to insert "railroad ties;" so as to make the paragraph read:

668. Wood: Logs and round unmanufactured timber, including poplar and other pulp-woods, firewood, handle-bolts, shingle-bolts, heading-bolts, stave-bolts, gun-blocks for gunstocks, rough-hewn or sawed or planed on one side, hop-poles, fence-posts, railroad ties, ship-timber and ship-planking; all the foregoing not specially provided for in this act.

Mr. PETTIGREW. I ask to have the paragraph passed over, as I desire to offer an amendment to it.

Mr. ALLISON. Let the paragraph be passed over.

The VICE-PRESIDENT. No objection being made, the paragraph will be passed over.

The next amendment of the Committee on Finance was, in paragraph 669, page 188, line 1, after the word "Woods" to strike out the comma and the word "namely;" so as to make the paragraph read:

669. Woods: Cedar, lignum-vitæ, lancewood, ebony, box, granadilla, mahogany, rosewood, satinwood, and all forms of cabinet woods, in the log, rough, or hewn only; briar root or briar wood and similar wood unmanufactured, or not further advanced than cut into blocks suitable for the articles into which they are intended to be converted; bamboo, rattan, reeds, India malacca joints, and sticks of partridge, hair wood, pimento, orange, myrtle, and other woods not specially provided for in this act, in the rough, or not further advanced than cut into lengths suitable for sticks for umbrellas, parasols, sunshades, whips, fishing rods, or walking-canes.

The amendment was agreed to.

Mr. ALLISON. In line 7, after the word "rattan," I move to strike out the word "reeds."

Mr. GRAY. Why?

Mr. ALLISON. Reeds are already dutiable in another part of the bill at 10 per cent.

The amendment was agreed to.

The next amendment of the Committee on Finance was, on page 188, after line 12, to strike out the following paragraph:

670. Works of art: Artistic paintings, statuary, and specimens of sculpture, the professional productions of a statuary or sculptor only, etchings, drawings, engravings, photographic pictures, artistic works in terra cotta, parian, bisque, or porcelain, antiquities, or artistic copies thereof in metal, marble, or other material; any of the foregoing imported for a municipal corporation, or for public exhibition and free of charge for at least one-sixth of the time the same are on exhibition, at a fixed place by any association established in good faith and duly authorized under the laws of the United States, or of any State, expressly and solely for the promotion and encouragement of science, art, or industry, and not intended for sale, shall be admitted free of duty under such regulations as the Secretary of the Treasury may prescribe, but bond shall be given to the United States for the payment of lawful duty which may accrue if any of the articles aforesaid be sold, transferred or otherwise used contrary to any of the provisions in this paragraph, and such articles shall be subject at any time to examination and inspection by the proper officers of the customs: *Provided*, That the privileges of this paragraph shall not be allowed to associations, corporations, firms or individuals engaged in or connected with business of a private or commercial character.

And to insert in lieu thereof:

670. Works of art, drawings, engravings, photographic pictures, and philosophical and scientific apparatus brought by professional artists, lecturers, or scientists arriving from abroad for use by them temporarily for exhibition and in illustration, promotion, and encouragement of art, science, or industry in the United States, and not for sale, shall be admitted free of duty, under such regulations as the Secretary of the Treasury shall prescribe; but bonds shall be given for the payment to the United States of such duties as may be imposed by law upon any and all such articles as shall not be exported within six months after such importation: *Provided*, That the Secretary of the Treasury may, in his discretion, extend such period for a further term of six months in cases where applications therefor shall be made.

Mr. ALLEN. Is that the paragraph to which I called the attention of the Senator some time ago? I understood that there was a paragraph admitting free all works of art, books, etchings, etc., that are to be used in colleges and schools exclusively.

Mr. ALLISON. This is a part of those provisions.

Mr. ALLEN. The language just read would not accomplish that end.

Mr. GALLINGER. The next paragraph does.

Mr. ALLISON. There is another paragraph following the one just read.

The amendment was agreed to.

The next amendment of the Committee on Finance was, on page 189, after line 23, to insert the following as a new paragraph:

670½. Works of art, collections in illustration of the progress of the arts, sciences, or manufactures, photographs, works in terra cotta, parian, pottery, or porcelain, antiquities and artistic copies thereof in metal or other material, imported in good faith for permanent exhibition at a fixed place by any society or institution established for the encouragement of the arts, science, or education, or for a municipal corporation, and all like articles imported in good faith by any society or association, or for a municipal corporation for the purpose of erecting a public monument, and not intended for sale, nor for any other purpose than herein expressed; but bonds shall be given under such rules and regulations as the Secretary of the Treasury may prescribe, for the payment of lawful duties which may accrue should any of the articles aforesaid be sold, transferred, or used contrary to this provision, and such articles shall be subject, at any time, to examination and inspection by the proper officers of the customs: *Provided*, That the privileges of this and the preceding section shall not be allowed to associations or corporations engaged in or connected with business of a private or commercial character.

Mr. HOAR. I suggest to the Senator from Iowa whether in line 4, after "place," he should not insert the words "by any State or;" so as to read "by any State or by any society." The normal school in my State certainly is conducted by the State itself, and purchases are made in its behalf.

Mr. ALLISON. Let the amendment to the amendment be stated.

The SECRETARY. After the word "place," in line 4, insert the words "by any State or;" so as to read:

670½. Works of art, collections in illustration of the progress of the arts, sciences, or manufactures, photographs, works in terra cotta, parian, pottery, or porcelain, antiquities and artistic copies thereof in metal or other material, imported in good faith for permanent exhibition at a fixed place by any State or by any society or institution established for the encouragement of the arts, science, or education, etc.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The reading of the bill was resumed and continued to the end of section 2, line 21, page 190.

Mr. ALLISON. If the Senate will indulge me one moment more, in order that I may get rid of an amendment which I have on my desk, I will then move that the Senate proceed to the consideration of executive business. I move to insert as a new paragraph what I send to the desk.

The Secretary read as follows:

449½. Textile designs, on line paper, sketch paper, or on Jacquard cards, or parts of such designs or cards, finished or unfinished, 30 per cent ad valorem.

The amendment was agreed to.

Mr. WHITE. I suppose it is understood that to-morrow we shall take up the wool schedule.

Mr. ALLISON. It is the understanding that to-morrow we shall take up the schedule on wool and woolens.

Mr. FRYE. And complete it in the course of two hours.

Mr. ALLISON. And complete it at the earliest moment practicable.

PACIFIC RAILROADS.

Mr. ALLEN. I ask leave to submit a concurrent resolution.

The concurrent resolution was read, as follows:

Resolved by the Senate (the House of Representatives concurring), That a master's, marshal, or any other judicial or execution sale of the properties of the Union Pacific and Kansas Pacific Railroad companies, or either of them, without additional legislation by Congress, would not be binding on the Government of the United States, or conclude it of any legal or equitable right therein now possessed, unless such sale should be subsequently ratified by Congressional action.

Mr. ALLEN. I ask that the resolution be referred to the Committee on Pacific Railroads.

The VICE-PRESIDENT. Is there any objection to the reference?

Mr. ALLISON. That is the resolution just read?

The VICE-PRESIDENT. The one just read.

Mr. ALLISON. I have no objection.

The VICE-PRESIDENT. The Chair hears no objection, and it will be so referred.

Mr. ALLEN submitted the following resolution; which was read:

Resolved, That the Committee on Pacific Railroads be, and they are hereby, instructed to inquire and report to the Senate whether the executive department has, by existing law, authority to foreclose the Government mortgage or lien on the Union Pacific and Kansas Pacific railroads, or either of them, and sell the property and assets thereof, without additional legislation; and inquire and report what authority, if any, the President of the United States or the Attorney-General may possess to contract with any person or persons, in advance of a foreclosure and sale of such property or any part thereof, respecting the amount that shall be bid by contemplated purchasers, and whether it is not the duty of the President, under existing law, before causing a foreclosure of such mortgage or lien, to direct the Secretary of the Treasury to "redeem or otherwise clear off all the paramount liens, mortgages, or incumbrances upon such property by paying the sums lawfully due in respect thereof out of the Treasury;" and that in the meantime, and pending the report of the Committee on Pacific Railroads, the Attorney-General be, and he is hereby, directed to refrain from entering into any further or additional stipulations or agreements respecting the sale of said property, or any portion thereof, or any fund arising therefrom or in any manner belonging thereto or connected therewith.

Mr. ALLEN. Let this resolution go to the same committee.

Mr. ALLISON. What does the Senator desire?

Mr. ALLEN. Let the resolution go to the same committee, the Committee on Pacific Railroads.

Mr. ALLISON. That is to say, the resolution is referred to the committee?

Mr. ALLEN. Yes, sir.

The VICE-PRESIDENT. If no objection is made, that will be the order. The resolution is so referred.

EXECUTIVE SESSION.

Mr. ALLISON. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After fifteen minutes spent in executive session the doors were reopened, and (at 5 o'clock and 20 minutes p. m.) the Senate adjourned until to-morrow, Tuesday, June 22, 1897, at 11 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate June 21, 1897.

CONSUL-GENERAL.

John G. Foster, of Vermont, heretofore named for the consulate at Sherbrooke, Quebec, to be consul-general of the United States at Halifax, Nova Scotia, vice Darius H. Ingraham, resigned. His nomination as consul at Sherbrooke is hereby withdrawn.

CONSUL.

William B. Dickey, of Louisiana, to be consul of the United States at Callao, Peru, vice Leon Jastremski, resigned.

COLLECTOR OF CUSTOMS.

Joseph W. Ivey, of Oregon, to be collector of customs for the District of Alaska, in the Territory of Alaska, to succeed Benjamin P. Moore, whose term of office has expired by limitation.

ASSISTANT SURGEON.

Howard C. Russell, of Connecticut, to be an assistant surgeon in the Marine-Hospital Service of the United States.

MEMBER OF CALIFORNIA DÉBRIS COMMISSION.

First Lieut. Herbert Deakyne, Corps of Engineers, United States Army, under the provisions of the act of Congress approved March 1, 1893, entitled "An act to create the California Débris Commission and regulate hydraulic mining in the State of California," a member of the commission, vice Capt. Cassius E. Gillette, Corps of Engineers, relieved.

APPOINTMENTS IN THE ARMY.

The following-named cadets, graduates of the Military Academy, for appointment in the Army of the United States, to date from June 11, 1897:

To be additional second lieutenants.

CORPS OF ENGINEERS.

1. Cadet William Durward Connor.
2. Cadet John Calvin Oakes.
3. Cadet Louis Casper Wolf.
4. Cadet Henry Sims Morgan.
5. Cadet Sherwood Alfred Cheney.
6. Cadet Frederick William Altstaetter.
7. Cadet Harley Bascom Ferguson.

ARTILLERY ARM.

9. Cadet Robert Swepston Abernethy.
12. Cadet Edwin Oliver Sarratt.
13. Cadet Albert Jesse Bowley.
15. Cadet Bertram Charles Gilbert.
16. Cadet Lawrence Sprague Miller.
18. Cadet Winfield Scott Overton, jr.
20. Cadet Mervyn Chandos Buckey.

CAVALRY ARM.

11. Cadet Francis Horton Pope.
14. Cadet Matthew Elting Hanna.
17. Cadet George Edward Mitchell.
19. Cadet Pierce Ambrose Murphy.
21. Cadet Frederick Theodore Arnold.
24. Cadet James Noble Munro.
26. Cadet Earle D'Arcy Pearce.
27. Cadet William Stanley Valentine.
29. Cadet Henry Carpenter Smither.
30. Cadet Roy Beveridge Harper.
32. Cadet Thomas Arnett Roberts.
33. Cadet Edgar Alexander Sirmyer.
34. Cadet Frank Ross McCoy.
36. Cadet Chalmers Gaither Hall.
44. Cadet Clarence Richmond Day.
47. Cadet Willard Herman McCornack.
50. Cadet Seth Mellen Milliken.
52. Cadet John Carrington Raymond.

INFANTRY ARM.

8. Cadet Charles Duval Roberts.
10. Cadet John Kirkpatrick Moore.
22. Cadet Frederick Edgar Johnston.
23. Cadet Claude Hamilton Miller.
25. Cadet Harold Benjamin Fiske.
28. Cadet Arthur Stewart Conklin.
31. Cadet John Hendricken Hughes.
35. Cadet George Willis Helms.
37. Cadet Rufus Estes Longan.
38. Cadet Frank Marion Savage.
39. Cadet Thomas Taylor Frissell.
40. Cadet Edward Anthony Roche.
41. Cadet William Mason Fassett.
42. Cadet Henry Magdeburg Dichmann.
43. Cadet Halstead Dorey.
45. Cadet George Franklin Baltzell.
46. Cadet Benjamin Martin Koehler.
48. Cadet James Francis Brady.
49. Cadet Hugh La Fayette Applewhite.
51. Cadet Edgar Thomas Conley.
53. Cadet Roderick Leland Carmichael.
54. Cadet Harry Gore Bishop.
55. Cadet Henry Abbot.
56. Cadet Andrew Moses.
57. Cadet Edgar Thomas Collins.
58. Cadet Fred Anderson Pearce.
59. Cadet Seaborn Green Chiles.
60. Cadet Lyman Mowry Welch.
61. Cadet Thomas Quinn Ashburn.
62. Cadet Sam Frank Bottoms.
63. Cadet Warren Sumner Barlow.
64. Cadet John Girardin Workizer.
65. Cadet Willard Douglas Newbill.
66. Cadet Charles Higbee Bridges.
67. Cadet Harold Edward Cloke.

PROMOTION IN THE NAVY.

Commodore Edmund O. Matthews, to be a rear-admiral in the Navy, from the 19th day of June, 1897, vice Rear-Admiral George Brown, retired.

PROMOTIONS IN THE MARINE CORPS.

Richard S. Collum, captain and assistant quartermaster, United States Marine Corps, to be major and quartermaster in said Corps, from the 20th day of June, 1897, vice Horatio B. Lowry, major and quartermaster, retired.

First Lieut. Thomas C. Prince, United States Marine Corps, to be captain and assistant quartermaster in said Corps, from the 20th day of June, 1897, vice Richard S. Collum, captain and assistant quartermaster, promoted.

COMMISSIONERS.

Albert C. Thompson, of Ohio; Alexander C. Botkin, of Montana, and David B. Culberson, of Texas, to be the commissioners to revise and codify the criminal and penal laws of the United States, as provided for by the act of Congress approved June 4, 1897.

POSTMASTERS.

Wilfred W. Montague, to be postmaster at San Francisco, in the county of San Francisco and State of California, in the place of Frank McCoppin, deceased.

Walter S. Clark, to be postmaster at Aspen, in the county of Pitkin and State of Colorado, in the place of John C. Allan, removed.

Benjamin F. Boyd, to be postmaster at Hillsboro, in the county of Montgomery and State of Illinois, in the place of J. E. Y. Rice, resigned. C. H. Rolston, who was nominated and confirmed, not having been commissioned.

Robert N. Chapman, to be postmaster at Charleston, in the county of Coles and State of Illinois, in the place of John B. Briscoe, removed.

Frank C. Davidson, to be postmaster at Clinton, in the county of Dewitt and State of Illinois, in the place of Perry Hughes, removed.

Clarence A. Murray, to be postmaster at Waukegan, in the county of Lake and State of Illinois, in the place of E. B. McClanahan, removed. W. A. Melody, who was appointed and commissioned, not having been confirmed.

Lou Black, to be postmaster at Orleans, in the county of Orange and State of Indiana, in the place of James A. Frost, jr., removed.

Charles V. Hoffman, to be postmaster at Oskaloosa, in the county of Mahaska and State of Iowa, in the place of G. B. McFall, removed.

Charles W. Farrow, to be postmaster at Snowhill, in the county of Worcester and State of Maryland, in the place of John L. Nock, removed.

Clarence E. Closser, to be postmaster at Munising, in the county of Alger and State of Michigan, the appointment of a postmaster for the said office having, by law, become vested in the President on and after July 1, 1897.

Seymour Foster, to be postmaster at Lansing, in the county of Ingham and State of Michigan, in the place of Louis E. Rowley, whose commission expired March 23, 1897.

William Jenney, to be postmaster at Mount Clemens, in the county of Macomb and State of Michigan, in the place of Joseph F. Upleger, whose commission expired April 14, 1897.

Harry H. Mitchell, to be postmaster at Clinton, in the county of Henry and State of Missouri, in the place of Fountain R. Piper, removed.

Frederick W. Clemons, to be postmaster at Palmyra, in the county of Wayne and State of New York, in the place of Alexander P. Milne, deceased.

James Blanning, to be postmaster at Williamstown, in the county of Dauphin and State of Pennsylvania, in the place of Benjamin A. Waters, deceased.

James M. Henderson, to be postmaster at Etna, in the county of Allegheny and State of Pennsylvania, the appointment of a postmaster for the said office having, by law, become vested in the President on and after January 1, 1897, George Huhn, who was nominated and confirmed, not having been commissioned.

Ezra H. Ripple, to be postmaster at Scranton, in the county of Lackawanna and State of Pennsylvania, in the place of Frank M. Vandling, resigned.

Joshua F. Ensor, to be postmaster at Columbia, in the county of Richland and State of South Carolina, in the place of William Wallace, removed.

Charles H. Stilwill, to be postmaster at Tyndall, in the county of Bonhomme and State of South Dakota, in the place of Henry A. Pike, removed.

Charles J. Lewis, to be postmaster at Clarendon, in the county of Donley and State of Texas, the appointment of a postmaster for the said office having, by law, become vested in the President on and after July 1, 1897.

Jacob W. Dudley, to be postmaster at East Radford, in the county of Montgomery and State of Virginia, in the place of Robert J. Noell, removed.

CONFIRMATIONS.

Executive nominations confirmed by the Senate June 21, 1897.

GOVERNOR OF ALASKA.

John G. Brady, of Sitka, Alaska, to be governor of the District of Alaska.

COMMISSIONERS.

John U. Smith, of Portland, Oreg., to be a commissioner in and for the District of Alaska.

William J. Jones, of Port Townsend, Wash., to be a commissioner in and for the District of Alaska.

COLLECTORS OF INTERNAL REVENUE.

Frank W. Howbert, of Colorado, to be collector of internal revenue for the district of Colorado.

Harmon L. Remmel, of Arkansas, to be collector of internal revenue for the district of Arkansas.

Jacob E. Houtz, of Nebraska, to be collector of internal revenue for the district of Nebraska.

COLLECTOR OF CUSTOMS.

Freeland H. Oaks, of Maine, to be collector of customs for the district of Saco, in the State of Maine.

HOUSE OF REPRESENTATIVES.

MONDAY, *June 21, 1897.*

The House met at 12 o'clock m., and was called to order by the Speaker.

Prayer by the Chaplain, Rev. HENRY N. COUDEN.

The Journal of the proceedings of Thursday, June 17, was read.

Mr. ROBINSON of Indiana. Mr. Speaker, on the first roll call on Thursday last, on the motion to table the appeal from the ruling of the Chair, I am recorded among the names of those present and not voting. I desire to say that I voted "no," and I desire to be so recorded.

The SPEAKER. The change will be made.

Mr. SETTLE. Mr. Speaker, I understood the Clerk to read that the House, on motion of the gentleman from Maine [Mr. DINGLEY], adjourned "until Monday next." I do not think that correctly recites the fact. The House merely voted to adjourn, and the Speaker thereupon, in pursuance of the rule that had been previously adopted, declared the House adjourned until Monday next. I do not think that the Journal ought to show that the House voted to adjourn until Monday, for it did not so vote.

The SPEAKER. The Chair will examine and see what has been the Journal entry in like cases.

Mr. BURKE. On the second roll call on Thursday last the Clerk has recorded me as not voting. I wish to state that I voted on that roll call, and voted "no."

The SPEAKER. The correction will be made.

Mr. GRIGGS. Mr. Speaker, on the same roll call I am recorded as having voted "aye." I voted "no," and desire to be so recorded.

The SPEAKER. The change will be made.

The Chair desires to call the attention of the House to a statement made at the last session in regard to the amendment of the Journal. According to the RECORD, the Chair stated that a motion to approve the Journal takes precedence of a motion to amend it. Of course that statement was made simply with reference to the case which was in hand, and, to be accurate for general purposes, there ought to be added "if that motion is first made."

ORDER OF BUSINESS.

Mr. HENDERSON. Mr. Speaker, I offer the following privileged report——

The SPEAKER. The gentleman offers a privileged report.

Mr. HENDERSON. And upon that I ask the previous question.

The SPEAKER. The Clerk will read.

The Clerk read as follows:

The Committee on Rules, to whom was referred House resolution No. 51, beg leave to recommend that said resolution do pass.

"*Resolved*, That immediately upon the adoption of this resolution the House shall proceed to consider House joint resolution No. 61, entitled 'Joint resolution to provide for the immediate repair of Dry Dock No. 3, at the New York Navy-Yard.'"

Mr. HENDERSON. Mr. Speaker, I ask for the previous question.

The previous question was ordered.

The resolution was agreed to.

NEW YORK DRY DOCK.

Mr. HENDERSON. Mr. Speaker, I will yield to the gentleman from California [Mr. HILBORN] to take charge of the bill referred to in the resolution.

Mr. HILBORN. Mr. Speaker——

Mr. BAILEY. May I inquire if the gentleman from Iowa intends to yield the floor, or does he yield so much of the hour to which he is entitled.

Mr. HENDERSON. I am yielding the floor entirely to the gentleman from California, who has charge of the original resolution. I have only kept the floor for the purpose of the adoption of the resolution reported from the Committee on Rules. That has been adopted, and now, on the consideration of the dry-dock resolution, I yield to the gentleman from California to take charge of it.

Mr. HILBORN. Mr. Speaker, the gentleman from Maine [Mr. BOUTELLE] being present, I yield the floor to him.

Mr. BOUTELLE. Mr. Speaker, perhaps the most practical manner in which the attention of the House can be called to this exigency that has arisen will be by reading a very brief letter of the Secretary of the Navy, dated May 13, to myself, transmitting a copy of a letter to the Speaker of the House, calling attention to a very serious condition that had arisen in the city of New York at the navy-yard by the discovery of a serious leak in the new dry dock there, which subsequently overflowed both of the docks and has placed them in a condition that immediate repairs are absolutely necessary, and any delay will be extremely damaging to every interest of the Government.

NAVY DEPARTMENT, *Washington, May 13, 1897.*

SIR: I have the honor to inclose herewith, for your information, a copy of a letter which I have this day addressed to the Speaker of the House of Representatives, relative to extensive leaks which have appeared in wooden Dry Docks Nos. 2 and 3, at the Brooklyn Navy-Yard, which threaten the undermining and collapse of the docks, and urging that an appropriation of $100,000 be granted by joint resolution, and made immediately available, for the purpose of meeting the emergency.

I respectfully request your earnest cooperation in the matter.

Very respectfully,

JOHN D. LONG, *Secretary.*

Hon. C. A. BOUTELLE,
House of Representatives, Washington, D. C.

The letter to the Speaker was as follows:

NAVY DEPARTMENT, *Washington, May 13, 1897.*

SIR: The following communication has just been received from the Chief of the Bureau of Yards and Docks:

"On the morning of the 8th instant extensive leaks appeared on the east side of wooden Dry Dock No. 3, at the navy-yard, Brooklyn, N. Y. The next morning the leaks appeared on the westerly side of the same dock, and this morning comes a telegram stating that last evening wooden Dry Dock No. 2 began leaking all along its eastern side.

"Whilst Dry Dock No. 2 was under construction, a quicksand was encountered at the southeast corner.

"It would appear from this that there is a subterranean 'quick' connection between these two docks. Energetic measures must be taken at once to prevent the undermining and collapse of these docks.

"As we have but about $9,000 available, I have the honor to suggest that Congress may be asked to grant by joint resolution the sum of $100,000, or so much thereof as may be needed, to be immediately available for this purpose."

To meet the emergency above stated, I have the honor to request that an appropriation of $100,000, or so much thereof as may be needed for the purpose, be granted by joint resolution, and that it may be made immediately available.

A similar letter to the above has been addressed to the chairman of the Committee on Appropriations, United States Senate.

Very respectfully,

JOHN D. LONG, *Secretary.*

THE SPEAKER OF THE HOUSE OF REPRESENTATIVES.

On the 15th of June the Assistant Secretary of the Navy reenforces this request by the following letter:

NAVY DEPARTMENT, *Washington, June 15, 1897.*

SIR: 1. Dry Dock No. 3, at the navy-yard, Brooklyn, the only dock on the Atlantic coast in which it is safe to dock a battle ship of the *Indiana* class, is now disabled, and an appropriation of $100,000 has been asked in order to enable the Department to repair it.

2. The *Indiana* has not been in dock for fourteen months, and should be docked as soon as possible to clean and repaint, to prevent pitting of plates. Should anything happen to the *Massachusetts* or *Iowa*, we have no dock available for them.

3. The dock at Port Royal, S. C., can not be depended upon, as the tides are very uncertain. It may take weeks waiting for a tide sufficient to take the *Indiana* in, and the same to get her out, and then there is a great risk attending it, even with the most skillful management. The *Iowa* and *Massachusetts* can not be docked there at all.

I can not therefore too strongly urge the importance of an immediate appropriation for the repairs of the one large dock on the Atlantic coast, and have the honor to ask that action on joint resolution No. 61, H. R., introduced on June 1, may be taken as soon as possible.

Respectfully,

THEODORE ROOSEVELT,
Assistant Secretary of the Navy.

Hon. T. B. REED,
Speaker of the House of Representatives.

Mr. SAYERS. Mr. Speaker——

Mr. BOUTELLE. If the gentleman will permit me to complete my statement, I will then be glad to answer any question.

On the 12th of May the Chief of the Bureau of Yards and Docks appointed a board, of which Civil Engineer Peter C. Asserson was the senior member, with the following instructions:

NAVY DEPARTMENT, *Washington, May 11, 1897.*

SIR: A board, consisting of yourself, as senior member; Civil Engineer Mordecai T. Endicott, U. S. N., and Civil Engineer Anecito G. Menocal, U. S. N., as members, is hereby appointed, to convene at the navy-yard, New York, N. Y., on the 13th instant, at 10 a. m., for the purpose of examining and reporting upon the present condition of Dry Dock No. 3, together with plans and estimates for remedying defects in said dock, and you will proceed to New York, N. Y., and report to the commandant of the navy-yard at that place, and assemble the board on the date specified.

The members of the board have been directed to report to you for this duty.

Upon the completion of this duty, return to Norfolk, Va., and resume your present duties.

Respectfully,

JOHN D. LONG, *Secretary.*

Civil Engineer PETER C. ASSERSON, U. S. N.,
Navy-Yard, Norfolk, Va.

If it is desired, I will have this report read, or make a brief statement of its substance.

Mr. SAYERS. Mr. Speaker, I should like to know from the gentleman whether or not that appropriation is needed for the dry dock last completed?

Mr. BOUTELLE. The dry dock last completed is the dock in front of that in which this leak has manifested itself. The leak has now joined itself to the other dry dock, the one previously made. The difficulty in the case seems to be that the protection along the Wallabout Channel, out of which these docks have been excavated, consisted of what is known as sheet piling, heavy piling of timber that is matched, tongued, and grooved to keep the water out, has been in some way disturbed, either broken by dredging, by some accident in the use of powerful dredgers in this channel, or it may be that some of the vessels, in docking there, by their prows had disturbed this sheet piling.

There has been a fracture in the water protection in the front of these docks, beneath the apron, beneath the gate, which has allowed the water from the channel to flow through this piling in

front of the dock, and the water has so percolated through the inside coping as to fill the dry dock, and also, by some connection inside the wall, has flowed across and filled the other dry dock at the New York yard.

Mr. SAYERS. Can the gentleman inform the House when this dock was completed?

Mr. BOUTELLE. The dock was completed during this year.

Mr. SAYERS. And now it is asked that $100,000 additional be appropriated for its repair?

Mr. BOUTELLE. In reply to that, I will state that the board of engineers, after examining the situation, reported that in their belief, by the employment of divers, repairs might be made in front of this dock for $29,000 or $30,000, which would probably suffice to enable the dock to be used; but upon further consideration of the question by the Department, consideration given partly, I believe, upon suggestions made by my colleague, Mr. HILBORN, and myself, that it would be poor policy, and would not be economy, to try to patch up a work of that kind without a thorough overhauling of the work so as to ascertain the exact character and extent of the damage, the Department recommended that at the outset a cofferdam be built in front of the dock, in order that the full extent and nature of the damage might be ascertained.

Gentlemen know that this is the largest dry dock that we have on the Atlantic coast. It is adapted to take in the largest of our battle ships, and it is the only dry dock on this coast that can take them in. The enormous weight of those vessels and their great value render it absolutely essential that there should be no question as to the stability of this dock, and in my opinion and in the judgment of the Department it would be absolutely impossible, without the construction of a cofferdam, to make such a careful and thorough examination as would enable us to ascertain with the degree of accuracy that should be had in a case of this kind the actual extent of the damage and the kind and character of the repairs that are required to insure against future trouble.

Mr. SAYERS. Can the gentleman inform the House who built this dock?

Mr. BOUTELLE. I think my friend and former colleague on the Committee on Naval Affairs, the gentleman from Texas [Mr. SAYERS], is aware that under the terms of the proposals requiring that the contract should be given to some one familiar with the building of docks—a requirement presumably intended to mean familiar with the building of dry docks—the contract for this dry dock was, in the first instance, awarded to parties who were familiar with the building of wharves and docks of that description, but who were not familiar with the construction of dry docks. Then, after long delay and a great many difficulties, there was, I think, a final default on the part of the first contractors and the work was turned over for completion to a new set of contractors.

I ought to say here, however, Mr. Speaker, that the existing trouble with this dock does not necessarily constitute a ground for criticism upon the work of the contractors or upon the character of the structure. As the result of an accident, the origin of which is not absolutely determined, the "pilot" which was intended to exclude the water from the front of the dock became fractured, some of the planks were torn out, which enabled the pressure from the channel to force the water in underneath, thus rendering it impossible to make further use of the dock in its present condition. I understand that while the flowage exhibited itself unmistakably in the other dock—the test being made by the use of coloring matter—yet the damage to the previously built dock, No. 2, is by no means so serious as the damage to Dock No. 3, so that possibly No. 2 may be utilized. That, however, is not so large as the other, and the immediate necessity for these repairs is based not only upon the need for the use of the dock, but also upon the fact that this extensive and important work is incurring additional damage every hour that it is left in its present condition.

Mr. SAYERS. In the construction of this work the Government was, of course, represented by an engineer officer?

Mr. BOUTELLE. My impression is that the dock was constructed under the supervision of the civil engineers of the Navy.

Mr. SAYERS. Can the gentleman give the House the name of the engineer who supervised the construction?

Mr. BOUTELLE. I am not positive as to which one had charge of the building of this dock. I think that different engineers were assigned to the work at different times, but the work was constructed under the supervision of the engineers of the Navy Department. The board appointed to examine the present condition of the dock having reported in favor of an appropriation of $29,000 for temporary repairs—such repairs as could be made by divers without the building of a cofferdam—the Department, after carefully examining the whole subject, decided to recommend that this joint resolution appropriate $100,000, or so much thereof as may be found necessary for the purpose.

Mr. SAYERS. I understood the gentleman to say a while ago that it was upon the recommendation of the gentleman from California [Mr. HILBORN] that the amount was proposed to be increased to $100,000.

Mr. BOUTELLE. I said that the Department, in reviewing the report of the board recommending an appropriation for temporary repairs, acting, perhaps, somewhat upon suggestions made by myself and by my colleague, the gentleman from California [Mr. HILBORN], as members of the House of Representatives, having some familiarity with such matters, had determined that they would recommend a more thorough examination than would be possible if the plan of making temporary repairs were adopted, and, in accordance with the recommendation of the Chief of the Bureau, this joint resolution provides an appropriation of $100,000, or so much thereof as may be necessary, to be expended upon these items:

Constructing cofferdam and removing same	$48,000
Repairs recommended by board	30,000
Contingencies	22,000

Mr. SIMPSON of Kansas. I ask the gentleman to read the whole of the report. I am in hopes that the reading of the report will throw some light upon the question why we need $100,000 to stop a leak in a dry dock. It appears to me that the money heretofore appropriated for the construction of this work has "leaked" away, and I would like some assurance that this additional $100,000 will not leak out somewhere.

Mr. BOUTELLE. If the gentleman had given me the honor of his attention——

Mr. SIMPSON of Kansas. I would like to have the whole report read.

Mr. BOUTELLE. There is not the slightest objection, Mr. Speaker, to the reading of the whole of the report, but I wish to explain the reasons which actuated the Department in recommending, instead of the temporary repairs, which could not possibly give assurance of meeting the difficulty, the building of a cofferdam, which is an expensive operation and which will cost $48,000 or $50,000.

I fully concur in the idea of the Department, that the wise thing to do is to put a cofferdam in front of this dock, in order to ascertain absolutely the character and the extent of the damages and the nature of the repairs which should be made.

Mr. SIMPSON of Kansas. May I ask the gentleman whether the Committee on Naval Affairs has made a thorough investigation of this matter?

Mr. BOUTELLE. There being no Committee on Naval Affairs appointed——

Mr. SIMPSON of Kansas. Ah!

Mr. BOUTELLE. They have not.

Mr. SIMPSON of Kansas. Does not the gentleman think we ought to have such a committee appointed?

Mr. BOUTELLE. The Committee on Rules, which is composed of a very distinguished body of gentlemen, has given the matter very careful and thoughtful attention——

Mr. SIMPSON of Kansas. The Committee on Rules, which comprises the Speaker of this House, has given the matter careful investigation!

Mr. BOUTELLE. Having the advantage of the valuable suggestions and information of the gentleman from California [Mr. HILBORN] and my humble self.

Mr. GAINES. If the gentleman will permit me——

The SPEAKER. Perhaps it might serve to enlighten the House if the resolution, the reading of which was omitted by inadvertence, should be now read.

The Clerk read as follows:

Joint resolution (H. Res. 61) to provide for the immediate repair of Dry Dock No. 3, at the New York Navy-Yard.

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the sum of $100,000 be, and the same is hereby, appropriated, out of any money in the Treasury not otherwise appropriated, and to be immediately available, to enable the Secretary of the Navy to execute pressingly needed repairs upon Dry Dock No. 3, at the New York Navy-Yard, as follows: For constructing and removing cofferdam, $48,000; for repairs to dock as recommended by board of survey, $30,000; for contingencies, $22,000: and the Secretary of the Navy is hereby authorized to expend said sums or so much thereof as may be needed for the purposes indicated in this resolution.

Mr. BOUTELLE. I will say to the gentleman from Kansas that I have not the slightest objection to the reading of the report; but it relates simply to matters of detail and comes to the conclusion that probably by the expenditure of the sum of $29,000 this leak might be stopped. The question before the House is whether it is advisable to do that or to repair this dock in such a way as will insure its safety and usefulness hereafter.

The gentleman is aware that this is an enormous dock into which we put these great battle ships. It seems to me, as it does to the Department, that the simple stopping of the leak when it may be found, without ascertaining to what extent the leak may have damaged the dock, would be incurring a risk that we ought not to incur. There is no possible way of ascertaining accurately the amount of damage the dock has sustained except by building a cofferdam in front of it and thoroughly examining the condition of the whole dock.

Mr. SIMPSON of Kansas. Would the gentleman have any objection to this matter going over till next Thursday, so as to give us an opportunity to examine the report?

Mr. BOUTELLE. The resolution ought to pass to-day, because those docks are receiving damage in increasing ratio by reason of every hour of delay. There is no question as to their condition; there is no question that they must be repaired. The only question is how soon we can get to work to do it. We certainly can trust the Navy Department to do this work under a resolution of this kind, appropriating a certain sum, or so much thereof as may be needed. We are obliged to trust the Navy Department, and can do so with perfect safety, to expend only so much of the amount appropriated as may be needed for the purposes contemplated.

Mr. SIMPSON of Kansas. I observe that the report is short; we are not hurried here at present; we have not very much legislation to attend to, and I think we can at least attend to this measure in a businesslike way.

Mr. BOUTELLE. I will have the report printed in the RECORD if the gentleman so desires.

Mr. SIMPSON of Kansas. I prefer to have it read.

Mr. BOUTELLE. It will not give the gentleman much light.

Mr. McMILLIN. If the report is simply to be printed in the RECORD, I hope the gentleman from Maine will give us further information, if he has it, as to the origin and extent of this damage. That is a very essential point in reference to the making of this appropriation. Thus far the gentleman has not developed, in the first place, what was the origin of this trouble, or, secondly, the extent of it. It seems that the first dry dock has been impaired in its efficiency by this leak, and that this has carried damage to the second.

Mr. BOUTELLE. The gentleman is mistaken about that.

Mr. McMILLIN. I so understood the gentleman's statement. There was some confusion, however, and I may not have been able to catch exactly what he intended to say. I hope, however, that all the information in his possession may be given as to the character and extent of this damage.

Mr. BOUTELLE. The extent of the damage is a leak in front of this dock sufficient to render it impossible to make use of the dock. The leak is necessarily under water.

Mr. McMILLIN. Has the gentleman any information as to whether the orifice through which the leak comes is enlarging by the ebb and flow of the water?

Mr. BOUTELLE. I will say to the gentleman that the question is not so much as to whether the orifice may be enlarging as it is how far the flow of water through it is increasing the damage by the undermining of the dock. These docks are based upon a pile foundation. Piles are driven 5 feet from center to center, and then there is a floor of cement—about 5 feet of solid cement—resting upon the soil. How far the water may have undermined the soil underneath this cement is something that can not be ascertained by the use of a diving bell. The water must be shut off from the dock in order to enable a thorough examination to be made. I am simply advocating that the Government shall do just what any private corporation or individual would do in a similar case—adopt the only possible measure to ascertain the full extent and character of the damage.

Mr. SIMPSON of Kansas. Has the gentleman any information as to the original cost of this dock?

Mr. BOUTELLE. It was built upon an appropriation and upon advertisement for proposals.

Mr. SIMPSON of Kansas. Does the gentleman know the original cost?

Mr. BOUTELLE. Those docks cost all the way from $500,000 to $600,000 or $700,000.

Mr. SIMPSON of Kansas. The gentleman does not know what this particular dock cost?

Mr. BOUTELLE. I think about $600,000.

Mr. SIMPSON of Kansas. My object was to ascertain whether $100,000, with a little more money added to it, would not build a new dock—a much better one.

Mr. BOUTELLE. Oh, no.

Mr. SIMPSON of Kansas. Sometimes it is easier to make a new vessel than to stop the leaks in an old one.

Mr. BOUTELLE. I do not think the gentleman could quite convince himself on that line.

Mr. SIMPSON of Kansas. If we are to have many more leaks costing $100,000 each to stop, it seems to me it would be better to build a new dock at once.

Mr. BOUTELLE. But I am asking the gentleman to assist us in stopping this leak. If we can only stop the leak in the gentleman's oratory, we may make some progress.

Mr. SIMPSON of Kansas. I would like to know whether what I have suggested is not a good business proposition. Mr. Speaker, I shall have to insist on having the report read. I want all the light we can get on the subject.

Mr. BOUTELLE. I do not think the gentleman can have the report read as a matter of right. If he desires to read it as part of his remarks I will yield him the time for that purpose.

Mr. SIMPSON of Kansas. I should like to have the Clerk read it.

Mr. GAINES. I should like to know why the gentleman from Maine is in such a hurry to push this resolution through this morning. He introduced the resolution on the "31st of May," and it seems that since that time nothing has been done with it except to have it referred to the "Committee on Naval Affairs." Now, why should the gentleman be in such a hurry here to-day for its passage? And why has not the "Committee on Naval Affairs" reported on the resolution?

Mr. BOUTELLE. The resolution was referred to the Committee on Rules, and has been under investigation by them.

Mr. GAINES. It was also referred by you to the Committee on Naval Affairs, and the printed resolution so reads, though the Clerk omitted to read that part of the resolution now in my hand.

Mr. BOUTELLE. Referred to the Committee on Naval Affairs, when appointed.

Mr. McMILLIN. The gentleman from Maine is in error in his statement that the resolution making this appropriation has been referred to the Committee on Rules.

Mr. BOUTELLE. But the resolution asking for a rule for the consideration of the matter has been before that committee.

Mr. McMILLIN. The other would not properly go to the Committee on Rules.

Mr. BOUTELLE. If there is to be any discussion upon the question whether the resolution is in order now for consideration by the House, I shall let the discussion be carried on by some one else. I have no doubt about the question myself. The rule has been reported here, and the House has adopted it. There is no question now pending as to how the matter got here or why it was not brought here in some other way. The question is whether we will make this appropriation or not.

Mr. GAINES. Has the distinguished gentleman from Maine requested the Speaker to appoint the Committee on Naval Affairs since the 31st of May, when this resolution was ordered to be referred to that committee?

Mr. BOUTELLE. Have I requested the Speaker? I do not understand the gentleman.

Mr. GAINES. I say has the gentleman requested——

The SPEAKER. The Chair will state that the gentleman from Maine has not done so. [Laughter.]

Mr. GAINES. I desire to get the information from the gentleman himself.

Mr. BOUTELLE. The gentleman has asked me whether I have requested the Speaker to appoint the Committee on Naval Affairs. I answer, No, sir.

Mr. GAINES. This resolution was referred to that committee on the 31st of May; and I want to know whether the gentleman since that time has requested that the Committee on Naval Affairs be appointed. The gentleman introduced this resolution on the 31st of May and referred it to the Committee on Naval Affairs.

Mr. BOUTELLE. I did not.

Mr. GAINES. That is what the report states.

Mr. BOUTELLE. I did not do anything of the kind.

Mr. CUMMINGS. Let us have the regular order.

Mr. GAINES. Regular order and the regular thing, too, is what I want.

The SPEAKER. This seems to be the regular order.

Mr. SIMPSON of Kansas. Has the gentleman from Maine any objection to the reference of this resolution to the appropriate committee?

Mr. BOUTELLE. None, except that it would make unnecessary delay. There is not a gentleman in this House, including even the gentleman from Kansas, who does not know that I have stated all the substantial facts in the case. If that gentleman or any other member wishes to know the details as to the manner in which this board ascertained that there is a leak and the character of it, I will have the report read. But when I make a statement, based upon the statement of the Department, that there is a leak; that this board has ascertained that it is a serious leak; that it disables the dock; that the board has recommended a temporary repair which would cost a certain sum, and that the Department thinks it better to carry on the operation in such a manner as will enable it to find out the exact character and extent of the damage and to make the repairs complete and thorough, I think the House understands the question.

Mr. SIMPSON of Kansas. If the gentleman from Maine is going to ask the votes of members of Congress for an appropriation of $100,000, I think we are entitled, and our constituents are entitled, to the information contained in this report.

Mr. BOUTELLE. I yield five minutes to the gentleman from New York [Mr. CUMMINGS].

Mr. CUMMINGS. Mr. Speaker, gentlemen should not lose sight of the fact that this New York dock is the only dock on the Atlantic coast where our battle ships can be promptly docked. It is now out of repair. Our foreign relations are none too rosy. It would be well, it seems to me, to put in perfect order the only dock that can be used to repair battle ships, if it takes night work to do so. I presume one trouble with this dock is the fact that it is a timber dock and not a stone dock. There appear to be in the Navy Department two sets of officers—one favoring timber docks,

and the other favoring stone docks. I have seen in the newspapers a statement that if this dock had been a stone dock the leak would not have occurred.

Now, Mr. Speaker, it seems to me that it is time for Congress to be turning its attention toward this dock question. With half a dozen battle ships in commission and on the stocks, and no docks in which to repair them, it may become good policy to stop building battle ships and go to building docks. In Portsmouth, England, they have twenty-one stone docks side by side, and in Italy and France as many more, while we on the eastern coast of the Atlantic have only two large docks, both of timber. Only one of these can be used to repair at once our largest war vessels. On the western coast there is only one dock, and that a timber dock, at Port Orchard, that can be used to dock our battle ships.

Mr. KING. Will the gentleman permit a question?

Mr. CUMMINGS. Yes.

Mr. KING. Is it not a waste of money, in view of what the gentleman has stated, to make an appropriation for a timber dock, when it is apparent that a timber dock is wholly inadequate?

Mr. CUMMINGS. But you have your timber dock already built. There is a leak in it, and you can repair the leak and put the ship into the dock inside of two weeks at least with this $100,000. Without it, you may not be able to dock the *Indiana* for five months, unless we solicit the courtesy of Great Britain at Halifax or the Bermudas.

Mr. KING. Another question: Has not that dock frequently leaked before, and have not these repairs been necessary frequently?

Mr. CUMMINGS. No. This is a new dock. It was finished last year. A leak has occurred in front of the dock. Some vessel ran into a dock near it, knocking the gates down. This may have created a leak near the new dock. It is said again that the leak is due to quicksand. Others agree with my friend from Maine [Mr. BOUTELLE], that there is something wrong about the underpinning, causing the leak. But whatever it is, the leak is there. It is absolutely necessary for the safety of the country that it should be repaired as soon as possible.

Mr. KING. Have calculations been made as to the amount which is required; and if so, why is it necessary to add $20,000 for contingencies?

Mr. CUMMINGS. Why, the calculation has been made by a board of officers appointed by the Secretary of the Navy to investigate the leak and ascertain how much is necessary to be expended in repairing it.

Mr. HANDY. Mr. Speaker, will the gentleman allow me to ask him a question?

Mr. CUMMINGS. With pleasure.

Mr. HANDY. Is it necessary to have an act of Congress to enable the Navy Department to stop a leak in a dock?

Mr. CUMMINGS. It is necessary, when there is no appropriation from which the money can be used in making the repairs.

Mr. HANDY. In view of the fact that there may be other leaks in the future, ought we not to do more at this time than the resolution provides? Ought we not to put the Department in such shape that after we adjourn—and it is possible we may adjourn after a while—that the Department can keep this dock in repair without a special act of Congress? Think of the condition of that dock requiring a special session of Congress!

Mr. CUMMINGS. I do not think it necessary. This board of officers of the Navy certainly know what is necessary to be done to repair that dock. You may be sure that they have asked for all that will be required.

The SPEAKER. The time of the gentleman from New York has expired.

Mr. BOUTELLE. I yield three minutes to the gentleman from Illinois [Mr. CANNON].

Mr. CANNON. Mr. Speaker, I believe this appropriation ought to be made, but before it is made, if such is the sense of the House, I want to make a remark. This is a new dock, which the gentleman from Maine [Mr. BOUTELLE] says cost in the neighborhood of $600,000 to complete but a few months ago. It now requires this appropriation to repair it. In my judgment, there is a fault somewhere, either with the contractors or with the engineers in the Navy who superintended its construction.

I believe that fault ought to be located. I believe it will be located when the fault is thoroughly ascertained. The Government that educated its officials is entitled to an efficiency that on a great work of this kind would not require repairs within a very short time after it has been constructed. Now, then, I am not prepared to accuse anybody; I am not prepared to censure anybody; but I want to make this remark, so that later on, when it is ascertained where the fault is, that the blame may be placed, that such steps amy be taken as will place it, and, if necessary, discipline the officer who has been short in his duties.

One other word——

Mr. McMILLIN. Before the gentleman goes from that point, I should like to ask him the question whether this work or any part of it was done by contract?

Mr. CANNON. I understand that it has all been done by conract.

Mr. McMILLIN. Was there not a bond given to indemnify the Government and requiring a faithful performance of contract?

Mr. CANNON. Possibly.

Mr. CUMMINGS. I will state to the gentleman that there were two contracts. The first contractor failed and lost $200,000, and the second contractor seems to have done his work poorly.

Mr. BOUTELLE. I will say to the gentleman from Tennessee that there seems to be no allegation that the condition that exists to-day is due in any way to bad work.

Mr. McMILLIN. The dock has been accepted by the Government, and this difficulty has occurred; and so far as we can see, there is no knowledge as to the cause of the original leak.

Mr. BOUTELLE. I fear the gentleman did not hear my statement. I said that the sheet piling, which is the protection against the flow of water in front of the dock, had been ruptured.

Mr. McMILLIN. I understand that.

Mr. BOUTELLE. And that let the water in. There is no allegation of any fault in the performance of the contract; but in some way the sheet-piling protection was disturbed. The supposition is that it may have been done by dredging, and the supposition further is that it may have been done by the projecting prows of some of the vessels being docked.

Mr. McMILLIN. But I want it understood that while it may not be possible that recovery can be had on that bond, steps should be taken to fix the responsibility and ascertain whether the bonds cover the case.

Mr. CANNON. Will the gentleman yield me a little additional time, as I have lost the floor, and I want to make a remark in closing?

Mr. McMILLIN. I ask unanimous consent that the gentleman's time may be extended, inasmuch as he has been interrupted.

Mr. BOUTELLE. I will yield to the gentleman such time as he wants.

Mr. CANNON. I only want a minute or two.

Now, so much for the dock at New York. I do not know what the trouble is. It may be an accident, for which nobody is to blame. I suspect that somewhere it is want of proper knowledge, where proper knowledge should have abounded, or carelessness. If so, I want to see it located and the blame placed; and it can not be done without this appropriation. So that for two purposes—in the first place to fix the blame, and in the second place to repair the dock and make it what it ought to have been in the beginning—the appropriation is necessary.

Now, one other remark. We are informed by the gentleman from Maine that there is this dock and one other, namely, at Port Royal, for the docking of battle ships. There seems to be a dock at Port Royal that would take in the *Indiana;* but it is like unto the mill site in Kansas. You recollect that familiar old story, where the man said there was no mill at the dam site, and there was no dam—you recollect the remainder of the story. [Laughter.]

Mr. BOUTELLE. Is not the trouble with my friend that he did not get his story right by a dam site? [Laughter.]

Mr. CANNON. That is so. I do not want to make the quotation, but I discover that the seed fell upon fruitful soil, so that everybody understands it. [Renewed laughter.]

Now, there seems to have been a large amount of money expended at Port Royal. Whether it was a fault in legislation or administration I do not know; but at a great expenditure the dock is there, and it can not be practically reached. We need more docks. I hope that in the future they will be located where there is water in the first place, and that they will be made so as to keep the water out when we want to keep it out, in the second place.

Mr. BOUTELLE. I desire to say, in regard to the last remark of my friend from Illinois, that whatever responsibility there may be for any degree of inefficiency as to the dry dock at Port Royal that rests on the legislative department of the Government. That dock was legislated into existence, and against my earnest efforts and protest. I ask for the previous question, Mr. Speaker.

The previous question was ordered, and under the operation thereof the joint resolution was ordered to a third reading; and it was accordingly read the third time.

The question was taken on the passage of the resolution; and the Speaker announced that the ayes seemed to have it.

Mr. SIMPSON of Kansas. Division, Mr. Speaker.

The House divided; and there were—ayes 114, noes 12.

So the joint resolution was passed.

On motion of Mr. BOUTELLE, a motion to reconsider the vote by which the joint resolution was passed was laid on the table.

REGULATION OF COMMERCE BETWEEN THE SEVERAL STATES AND FOREIGN COUNTRIES IN CERTAIN CASES.

Mr. LATIMER. Mr. Speaker, I ask unanimous consent for the present consideration of the bill H. R. 3495.

The Clerk read as follows:

A bill (H. R. 3495) to limit the effect of the regulation of commerce between the several States and with foreign countries in certain cases.

Be it enacted, etc., That all fermented, distilled, or other intoxicating liquors or liquids transported into any State or Territory, or remaining

therein for use, consumption, sale, or storage therein shall upon arrival within the limits of said State or Territory be subject to the operation and effect of the laws of such State or Territory to the same extent and in the same manner as though such liquors or liquids had been produced in such State or Territory, and shall not be exempt therefrom by reason of being introduced therein in original packages for private use or otherwise, and such States shall have absolute control of such liquors or liquids within their borders, by whomsoever produced and for whatever use imported: *Provided*, That nothing herein contained shall be construed as affecting the internal-revenue laws of the United States or of liquors in transit through a State or Territory.

Amend the title so as to read: "A bill to limit the effect of the regulations of commerce between the several States and with foreign countries in certain cases."

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. WILLIAM A. STONE. Reserving the right to object, I should like to ask the gentleman a question. As I understand, this grows out of the legal controversy in the State of South Carolina in which the courts have recently held that the local laws there with reference to the sale of intoxicating liquors by the State are unconstitutional.

Mr. LATIMER. It does arise out of that controversy. The courts did not hold that the laws were unconstitutional, but——

Mr. WILLIAM A. STONE. Mr. Speaker, I do not think that we ought to legislate by unanimous consent on a matter affecting the commerce between the States, and therefore I object to the present consideration of the bill.

Mr. LATIMER. I trust the gentleman will withdraw his objection.

Mr. WILLIAM A. STONE. I can not withdraw the objection, Mr. Speaker.

The SPEAKER. Objection is made.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PLATT, one of its clerks, announced that the Senate had passed bills of the following titles; in which the concurrence of the House was requested:

A bill (S. 164) to provide for the construction of a public building at Butte City, Mont.;

A bill (S. 1056) to provide for a public building at Cleveland, Ohio; and

A bill (S 1272) to provide for the erection of a public building at McKeesport, Pa.

SENATE BILLS REFERRED.

Under clause 2 of Rule XXIV, bills of the following titles were taken from the Speaker's table and referred to their appropriate committees, as indicated below:

A bill (S. 164) to provide for the construction of a public building at Butte City, Mont.—to the Committee on Public Buildings and Grounds, when appointed.

A bill (S. 1056) to provide for a public building at Cleveland, Ohio—to the Committee on Public Buildings and Grounds, when appointed.

A bill (S. 1272) to provide for the erection of a public building at McKeesport, Pa.—to the Committee on Public Buildings and Grounds, when appointed.

ENROLLED BILL SIGNED.

The Speaker announced his signature to enrolled bill of the following title:

A bill (S. 2150) to amend an act entitled "An act to provide for the entry of lands in Greer County, Okla., to give preference right to settlers, and for other purposes," approved January 18, 1897.

OMAHA INTERNATIONAL EXPOSITION.

Mr. DINGLEY. Mr. Speaker, I ask unanimous consent for the present consideration of a report from the Committee on Ways and Means upon Senate resolution No. 50. This resolution was brought up at the last meeting of the House, and was referred to the Committee on Ways and Means. The committee have considered it, and they report it this morning with amendments. Under the rule it could not be taken up until the next meeting of the House; but there is an earnest desire upon the part of friends of the Omaha Exposition to have the resolution passed without delay, and therefore I ask unanimous consent. The committee have unanimously reported the joint resolution with three amendments.

The joint resolution was read, as follows:

Joint resolution authorizing foreign exhibitors at the Transmississippi and International Exposition, to be held in the city of Omaha, in the State of Nebraska, during the year 1898, to bring to the United States foreign laborers from their countries, respectively, for the purpose of preparing for and making exhibits.

Whereas the Transmississippi and International Exposition Company, of Omaha, Nebr., has extended invitations to various foreign nations to make exhibits at the Transmississippi and International Exposition to be held at said city A. D. 1898, which invitations have been accepted and space for installing foreign exhibits have been applied for and duly awarded, and concessions and privileges have been granted by the exposition management to the citizens and subjects of foreign nations; and

Whereas, for the purpose of securing the production on the exposition grounds of scenes illustrative of the architecture, dress, habits, and modes of life, occupation, industries, means of locomotion and transportation, amusements, entertainments, and the like, of the peoples of foreign countries, it has become necessary for the Transmississippi and International Exposition Company to grant concessions and privileges to certain firms and corporations of the right to make such productions: Therefore,

Be it resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the act of Congress approved February 26, A. D. 1885, prohibiting the importation into the United States of foreigners under contract to perform labor and the various acts of Congress prohibiting the coming or bringing of Chinese persons into the United States, and all acts of Congress amendatory of said act or acts shall not be construed to prohibit the bringing into the United States, under contract to labor, such mechanics, artisans, agents, or other employees or persons, natives of their respective foreign countries, as may be or may be deemed necessary for the purpose of making preparation for installing or conducting foreign exhibits, or preparing for installing or conducting any business authorized or permitted by virtue of any concession or privilege which may have been or may hereafter be granted by the Transmississippi and International Exposition Company of Omaha, Nebr., in connection with such exposition. Nor shall any such act or acts of Congress operate to prevent, hinder, or in any manner restrict any foreign exhibitor, representative, or citizen of a foreign nation, or holder of a concession or privilege from the Transmississippi and International Exposition Company, from bringing into the United States under contract any such mechanic, artisan, agent, or other employee deemed necessary or proper for the purpose of making preparations for installing or conducting foreign exhibits, or preparing for installing or conducting any business authorized or permitted under, or by virtue of, or pertaining to a concession or privilege which may have been or may be granted by the said Transmisisissippi and International Exposition Company in connection with such exposition: *Provided, however*, That no alien shall, by virtue of this resolution, be permitted to enter the United States to perform labor therein, except by express permission, naming such alien, and then not for a longer time than one year after the close of the Transmisisissippi and International Exposition; and thereafter such person shall be subject to all the processes and penalties applicable to aliens coming into the United States in violation of any act of Congress prohibiting alien contract labor from being brought or coming into the United States.

SEC. 2. That all articles and property of any kind that may be brought to the United States from any foreign country to be placed on exhibition at such Transmisisissippi and International Exposition, as well as all tools and implements necessary or proper to be used in preparing for an exhibition and the equipment and paraphernalia of the exhibitors, artisans, laborers, and the like shall be admitted to the ports of the United States free of duty, under such rules and regulations as may be prescribed by the Secretary of the Treasury: *Provided, however*, That said articles shall be removed from the United States within six months after the close of said exposition. If not so removed, and the same shall be sold or disposed of in the United States, they shall be subject to the customs laws thereof: *Provided further*, That the Secretary of the Treasury is hereby authorized and directed to make such rules and regulations as may be necessary, in his judgment, to carry into execution the provisions hereof and to prohibit the infraction of existing statutes, except as the same may be temporarily modified and changed by this resolution.

The report (by Mr. DINGLEY) is as follows:

The Committee on Ways and Means having had under consideration the joint resolution (S. R. 50) authorizing foreign exhibitors at the Transmisisippi and International Exposition, to be held in the city of Omaha, in the State of Nebraska, during the year 1898, to bring to the United States foreign laborers from their countries, respectively, for the purpose of preparing for and making exhibits, report it with a recommendation that it do pass with amendments, as follows:

Amend line 25 by striking out the words "or proper" and inserting instead the words "by the Secretary of the Treasury."

Amend line 12 by striking out the words "as may be or may be deemed" and inserting instead the words "as the Secretary of the Treasury may deem."

Amend lines 35 and 36 by striking out the words "one year" and inserting instead the words "three months."

The SPEAKER. Is there objection to the present consideration of this joint resolution?

There was no objection.

The SPEAKER. The question is on the amendments recommended by the committee.

Mr. CANNON. Mr. Speaker, as I understand it, this joint resolution is merely intended to permit the importation of goods, as has been usual in such cases.

Mr. DINGLEY. Not only that, but also to allow the admission of such persons as may be required to care for any exhibits that may be made at this exposition by foreign countries—the admission of Chinese, for instance, in connection with the exhibit that may be made by China.

Mr. CANNON. It carries no appropriation, as I understand?

Mr. DINGLEY. It carries no appropriation. It is the same provision that has been inserted in all the other laws relating to these international expositions, except that the Committee on Ways and Means have reported amendments to obviate certain abuses which the Secretary of the Treasury reports have arisen under previous legislation of this character.

One of the amendments provides that the number of persons to be admited shall be determined by the Secretary of the Treasury and not by the managers of the exposition. Another is that persons who may be admitted in this way for these special purposes shall leave the country within three months after the close of the exposition, instead of within one year, as provided in the original resolution. The amendments are unanimously recommended by the committee.

The amendments were adopted.

The joint resolution as amended was ordered to a third reading; and it was accordingly read the third time, and passed.

On motion of Mr. DINGLEY, a motion to reconsider the vote by which the joint resolution was passed was laid on the table.

Mr. DINGLEY. Mr. Speaker, I move that the House do now adjourn.

The question being taken on the motion to adjourn, the Speaker declared that the ayes seemed to have it.

Mr. BAILEY. I ask for a division.

The House divided; and there were—ayes 74, noes 64.
So the motion was agreed to.

LEAVE OF ABSENCE.

Pending the announcement of the vote, by unanimous consent, leave of absence was granted as follows:

To Mr. SIMS, indefinitely, on account of important business.

To Mr. MCCORMICK, indefinitely, on account of sickness.

To Mr. COWHERD, for two weeks, on account of important business.

To Mr. CASTLE, indefinitely, on account of sickness in family.

The House then (at 1 o'clock and 5 minutes p. m.) adjourned until Thursday next at 12 o'clock m.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, the following executive communications were taken from the Speaker's table and referred as follows:

A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report of examination and survey of Buffalo entrance to Erie Basin and Black Rock Harbor, New York—to the Committee on Rivers and Harbors, and ordered to be printed.

A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report of examination and survey of Kootenai River, Montana—to the Committee on Rivers and Harbors, and ordered to be printed.

A letter from the Assistant Secretary of the Navy, urging the importance of an immediate appropriation for the repair of a dry dock at the Brooklyn Navy-Yard—to the Committee on Naval Affairs, and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, Mr. DINGLEY, from the Committee on Ways and Means, to which was referred the joint resolution of the Senate (S. R. 50) authorizing foreign exhibitors at the Transmississippi and International Exposition, to be held in the city of Omaha, in the State of Nebraska, during the year 1898, to bring to the United States foreign laborers from their countries, respectively, for the purpose of preparing for and making exhibits, reported the same with amendments, accompanied by a report (No. 11); which said bill and report were referred to the House Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS INTRODUCED.

Under clause 3 of Rule XXII, bills, resolutions, and memorials of the following titles were introduced and severally referred as follows:

By Mr. STOKES: A bill (H. R. 3494) to reduce the expenditures of the Government and equalize the burden of an appreciating money standard—to the Committee on Appropriations.

By Mr. LATIMER: A bill (H. R. 3495) to limit the effect of the regulation of commerce between the several States and with foreign countries in certain cases—to the Committee on the Judiciary.

By Mr. DE VRIES: A bill (H. R. 3496) to create a commission to locate a roadway between Mono Lake and Yosemite Valley, State of California, and appropriating money therefor—to the Committee on the Public Lands.

Also, a bill (H. R. 3497) to increase the limit of cost for the erection of a public building in Stockton, Cal., and appropriating money therefor—to the Committee on Public Buildings and Grounds.

By Mr. VINCENT: A bill (H. R. 3498) extending provisions of an act granting pensions to soldiers and sailors, approved June 27, 1890, to the Eighteenth and Nineteenth Regiments of Kansas Cavalry Volunteers—to the Committee on Invalid Pensions.

By Mr. BARLOW (by request): A bill (H. R. 3499) to provide for the collection of an income tax, also an inheritance tax, and for the organization of the unemployed into an industrial army of the United States—to the Committee on Ways and Means.

By Mr. PITNEY: A joint resolution (H. Res. 67) to authorize the Secretary of War to immediately expend the sum of $75,000 for construction of a sea wall at Sandy Hook, New Jersey, pursuant to the appropriation contained in the fortifications appropriation act, March 3, 1897—to the Committee on Appropriations.

By Mr. SHAFROTH: A joint resolution (H. Res. 68) proposing an amendment to the Constitution of the United States—to the Committee on the Judiciary.

By Mr. LATIMER: A resolution (House Res. No. 59) relative to the consideration of House bill No. 3495, to limit the effect of the regulation of commerce between the several States and with foreign countries in certain cases—to the Committee on Rules.

By Mr. PITNEY: A resolution (House Res. No. 60) providing for the immediate consideration of the joint resolution H. Res. 67—to the Committee on Rules.

By Mr. LEWIS of Washington: A resolution (House Res. No. 61) for investigation as to imprisonment of sailors—to the Committee on Military Affairs.

By Mr. LEWIS of Washington: A memorial of the legislature of Washington, in regard to a national soldiers' home at Fort Sherman, Idaho—to the Committee on Military Affairs.

Also, a memorial of the legislature of Washington, in relation to survivors of Indian war, 1855 and 1856, in the Territory (now State) of Washington—to the Committee on War Claims.

Also, a memorial of the legislature of Washington, for the revocation of the order prohibiting moving on certain reservations in Washington State, etc.—to the Committee on the Public Lands.

Also, a memorial of the legislature of Washington, according to William A. Newell the honor of originating and carrying into successful operation the Life-Saving Service of the United States—to the Committee on Interstate and Foreign Commerce.

Also, a memorial of the legislature of the State of Washington, for the establishment of a life-saving station on the coast of Washington at a point between Grays Harbor and the promontory known as Point Granville, etc.—to the Committee on Interstate and Foreign Commerce.

PRIVATE BILLS AND RESOLUTIONS INTRODUCED.

Under clause 1 of Rule XXII, private bills and resolutions of the following titles were introduced and severally referred as follows:

By Mr. BABCOCK: A bill (H. R. 3500) granting a pension to Sarah A. Walton—to the Committee on Pensions.

By Mr. DOCKERY: A bill (H. R. 3501) granting a pension to Thomas J. Reid—to the Committee on Invalid Pensions.

By Mr. HAY: A bill (H. R. 3502) for the relief of Peter Myers, of Shenandoah County, Va.—to the Committee on War Claims.

By Mr. JENKINS: A bill (H. R. 3503) to remove the charge of desertion from the record of Michael I. Tobin—to the Committee on Military Affairs.

By Mr. KITCHIN: A bill (H. R. 3504) granting a pension to John T. Hopson—to the Committee on Pensions.

By Mr. LACEY: A bill (H. R. 3505) granting a pension to Sarah Beck, formerly Sarah Kutch—to the Committee on Invalid Pensions.

By Mr. PACKER of Pennsylvania: A bill (H. R. 3506) authorizing the restoration of the name of Charles H. Vail, late a first lieutenant in First United States Cavalry, to the rolls of the Army, and providing that he be placed on the list of retired officers—to the Committee on Military Affairs.

By Mr. RAY of New York: A bill (H. R. 3507) granting an increase of pension to Jennie E. Baldwin—to the Committee on Invalid Pensions.

By Mr. RIXEY (by request): A bill (H. R. 3508) for the relief of the heirs of the late Mrs. Mary Ann Randolph Custis Lee, of Fairfax County, Va.—to the Committee on War Claims.

Also, a bill (H. R. 3509) for the relief of the estate of Catharine Crittenden, deceased, late of Culpeper County, Va.—to the Committee on Claims.

By Mr. SLAYDEN: A bill (H. R. 3510) granting an increase of pension to Lafayette Nichols—to the Committee on Invalid Pensions.

By Mr. VINCENT: A bill (H. R. 3511) granting a pension to J. Creager—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3512) to remove the charge of desertion from the military record of John Marx—to the Committee on Military Affairs.

By Mr. YOST: A bill (H. R. 3513) for the relief of the legal representative of Paul McNeel, deceased, of Pocahontas County, W. Va.—to the Committee on War Claims.

PETITIONS, ETC.

Under clause 1 of Rule XXII, the following petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. CLARKE of New Hampshire: Petition of A. M. French and other citizens of Gilsum, N. H., favoring a more rigid restriction of immigration—to the Committee on Immigration and Naturalization.

By Mr. ERMENTROUT: Protest of shoe manufacturers of Pennsylvania, against any increased duty on tanned skins for morocco or a duty on raw goatskins—to the Committee on Ways and Means.

Also, resolution of the select and common council of the city of Philadelphia, requesting the immediate passage of the tariff bill—to the Committee on Ways and Means.

By Mr. HENDERSON: Resolution of the Iowa Pharmaceutical Association, of Waterloo, Iowa, representing 1,800 pharmacists in Iowa, opposing a revenue-stamp tax on bank checks—to the Committee on Ways and Means.

By Mr. HILBORN: Resolution of the board of supervisors of San Francisco, Cal., favoring the treaty relations now existing between the United States and Hawaii—to the Committee on Foreign Affairs.

By Mr. HOWELL: Petitions of 52 citizens of Seaside, 23 citizens of Seabright, and 28 citizens of South Amboy, in the State of New

Jersey, urging the enactment of legislation restricting immigration—to the Committee on Immigration and Naturalization.

By Mr. JENKINS: Petition of W. L. Morris and 20 other manufacturers of Glenwood, Wis., praying for a duty of $1 per 1,000 on imported flour-barrel staves—to the Committee on Ways and Means.

Also, resolutions of the Department of Wisconsin, Grand Army of the Republic, indorsing the bill to establish a national military park in commemoration of the siege and defense of Vicksburg—to the Committee on Military Affairs.

By Mr. KIRKPATRICK: Petition of H. T. Smawley and 44 others; also petition of James M. E. Klotz and 32 others, citizens of Weissport, Pa., favoring a more rigid restriction of immigration—to the Committee on Immigration and Naturalization.

By Mr. LACEY: Petition of sundry citizens of Greer County, Okla., for extension of time to file their claims for homestead rights—to the Committee on the Public Lands.

Also, paper to accompany House bill granting a pension to Sarah Beck—to the Committee on Invalid Pensions.

By Mr. ROBINSON of Indiana: Petition of S. Freiburger and other citizens of Fort Wayne, Ind., in favor of placing hides on the free list—to the Committee on Ways and Means.

By Mr. STEWART of New Jersey: Petition of citizens of Little Falls, N. J., in favor of the passage of a more rigid immigration bill—to the Committee on Immigration and Naturalization.

By Mr. YOUNG of Pennsylvania: Petition of letter carriers of Philadelphia, Pa., relating to section 607 of the postal laws, and suggesting an amendment—to the Committee on the Post-Office and Post-Roads.

Also, petitions of Graff, Son & Co. and Laird, Schober & Co., of the city of Philadelphia, Pa., remonstrating against any increase in the present rate of duty on tanned skins for morocco or a duty on raw goatskins—to the Committee on Ways and Means.

By Mr. ZENOR: Papers to accompany House bill No. 3119, for the relief of Capt. Andrew P. Batson—to the Committee on Invalid Pensions.

SENATE.

TUESDAY, *June 22, 1897.*

The Senate met at 11 o'clock a. m.

Prayer by Rev. HUGH JOHNSTON, D. D., of the city of Washington.

The Journal of yesterday's proceedings was read and approved.

PETITIONS AND MEMORIALS.

Mr. FRYE presented the memorial of A. B. Nealey and 29 other citizens of Lewiston, Me., and the memorial of Nealey & Miller and 29 other citizens of Lewiston, Me., remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

Mr. HARRIS of Kansas presented a petition of the Free Silver Club of Solomon, Kans., praying for the printing of certain prior acts of Congress in relation to the national credit and honor; which was referred to the Committee on Finance, and ordered to be printed in the RECORD, as follows:

Memorial to Congress for the passage of an act for the printing of certain prior acts of Congress in relation to the national credit and honor.

To the honorable the Senate and House of Representatives of the United States in Congress assembled:

The memorial of the Free Silver Club of Solomon, Dickinson County, State of Kansas, respectfully represents:

Whereas the people of the United States have been and are still very much abused by false statement of history in reference to the currency, national bonds, and their payments. The latest falsification has been practiced on your honorable House by a memorial presented to your honorable House, signed on behalf of the legislature of the State of Wisconsin, printed in the CONGRESSIONAL RECORD June 5, 1897, page 1821, wherein—

"Your memorialists respectfully ask that a Congressional declaration be passed, to be approved by the President of the United States, so as to have the force of law in the form and in the spirit of the declaration of March 18, 1869, which was similarly made to meet a similar emergency, after a similar popular decision pledging the faith, credit, and honor of the United States to the payment on demand of all its obligations issued to circulate as money, and all of its other obligations as they mature, in gold or silver coin of the present legal weight and fineness, at the option of the respective holders of such obligations."

Whereas the declaration of March 18, 1869, referred to by the memorialist does not give the holders of Government obligations "the option" to demand either gold or silver coin. The words are "payment in coin" of all the obligations of the United States.

Your memorialist would respectfully ask your honorable House to have printed for the use of legislatures and the people the above act of March 18, 1869; also an act to authorize the refunding of the national debt of July 14, 1870; also the exact wording of the bonds itself, issued under that law, together with the declaration or resolution, with the ayes and nays, which passed the United States Senate January 25, 1878, and the House of Representatives January 28, 1878, by a vote of 42 to 20 in the Senate and 189 to 79 in the House; and all of the above documents will disprove the inference drawn by the memorial of the legislature of Wisconsin, for it is upon those documents we demand the free coinage of the silver dollar containing 412½ grains each of standard silver and the payment of all the obligations of the Government in coin according to the law.

Resolved, That the Senators and Members of Congress from this State be, and they are hereby, requested to use all honorable means to secure the prayer of this memorial and that a copy of this memorial and this resolution be transmitted to each of our Senators and Representatives in Congress.

W. T. HARRIS, *President.*
E. Z. BUTCHER, *Secretary.*

JUNE 18, 1897.

Mr. FAIRBANKS presented petitions of E. F. Poor and 45 other citizens of Fort Wayne, of Harry H. Freers and 57 other citizens of Terre Haute, of David S. Redelsheimer and 10 other citizens of Monroeville, of John E. Pillers and 52 other citizens of Monroeville, and of H. M. Ordcutt and 30 other citizens of Atwood, all in the State of Indiana, praying for the enactment of protective-tariff legislation, at the earliest possible date, such as will adequately secure American industrial products against the competition of foreign labor; which were ordered to lie on the table.

He also presented the petition of J. Oppenheimer and 25 other citizens of Lafayette, Ind., praying for the enactment of legislation authorizing the President to appoint a commission as proposed by the Indianapolis (Ind.) monetary convention; which was referred to the Committee on Finance.

Mr. CARTER presented a petition of 208 citizens of Missoula, Mont., praying for the enactment of legislation for a more rigid restriction of immigration; which was ordered to lie on the table.

Mr. PENROSE presented petitions of the State Council of Pennsylvania, Order of United American Mechanics, of Philadelphia, of 37 citizens of Philadelphia, and of 88 citizens of Lehighton, all in the State of Pennsylvania, praying for the enactment of legislation for a more rigid restriction of immigration; which were ordered to lie on the table.

He also presented a petition of 13 citizens of Gladdens, Pa., praying for the early passage of the pending tariff bill; which was ordered to lie on the table.

He also presented a petition of the Letter Carriers' Association of Philadelphia Pa., praying that section 607 of the United States postal laws and regulations be amended; which was referred to the Committee on Post-Offices and Post-Roads.

Mr. TURPIE presented a petition of sundry citizens of Brazil, Ind., praying for the early enactment of a protective-tariff law; which was ordered to lie on the table.

He also presented a memorial of S. Freiburger & Bro., of Fort Wayne, Ind., and a memorial of sundry citizens of Indiana, remonstrating against the proposed increase in the duty on hides; which were ordered to lie on the table.

He also presented a petition of a special committee of citizens of Terre Haute, Ind., praying that an appropriation be made to secure proper recognition of American interests at the Paris Exposition in 1900; which was ordered to lie on the table.

He also presented the petition of E. L. Snyder, president of the National Wholesale Liquor Dealers' Association, praying that the bonded period on liquors be reduced to three years; which was ordered to lie on the table.

He also presented a memorial of the Charles Beck Paper Company, of Philadelphia, Pa., remonstrating against the proposed increase in the duty on paper; which was ordered to lie on the table.

Mr. ALLEN presented memorials of H. T. Aukeny and 52 other citizens, of O. A. Robinson and 19 other citizens, of L. T. Cochran and 52 other citizens, of E. R. Gutrin and 52 other citizens, and of J. V. Wolf and 15 other citizens, all in the State of Nebraska, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

Mr. VEST presented sundry memorials of citizens of Missouri, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

Mr. SMITH presented a memorial of 1,500 citizens of New Jersey, remonstrating against the proposed increase in the tax on beer; which was ordered to lie on the table.

Mr. PETTUS presented sundry memorials of citizens of Alabama, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

Mr. ELKINS presented a petition of sundry citizens of Shoals, W. Va., and a petition of sundry citizens of Matville, W. Va., praying for the early passage of the pending tariff bill; which were ordered to lie on the table.

Mr. MORGAN presented sundry memorials of citizens of Alabama, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

REPORTS OF COMMITTEES.

Mr. FAIRBANKS, from the Committee on Claims, to whom was referred the bill (S. 1945) for the relief of Mary A. Coulson, executrix of Sewell Coulson, deceased, reported it without amendment, and submitted a report thereon.

Mr. HALE. I am directed by the Committee on Appropriations, to whom was referred the bill (H. R. 13) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1897, and for prior years, and for other purposes, to report it with amendments, and I submit a report thereon. I give notice that I shall call the bill up at as early a date as is practicable.

The VICE-PRESIDENT. The bill will be placed on the Calendar.

Mr. PROCTOR, from the Committee on Military Affairs, to whom was referred the bill (S. 473) for the relief of David O. Burleigh, reported it without amendment, and submitted a report thereon.

BILLS INTRODUCED.

Mr. PERKINS introduced a bill (S. 2253) authorizing the appointment of a nonpartisan commission to collate information and to consider and recommend legislation to meet the problems presented by labor, agriculture, and capital; which was read twice by its title, and referred to the Committee on Education and Labor.

He also introduced a bill (S. 2254) to grant a pension to Louisa E. Linn; which was read twice by its title, and referred to the Committee on Pensions.

He also introduced a bill (S. 2255) for the relief of Morgan Everts; which was read twice by its title, and referred to the Committee on Claims.

He also introduced a bill (S. 2256) for the relief of John Williams, of California; which was read twice by its title, and referred to the Committee on Claims.

He also introduced a bill (S. 2257) for the relief of Chester B. Sweet, of California; which was read twice by its title, and referred to the Committee on Public Lands.

Mr. TURPIE introduced a bill (S. 2258) granting a pension to Joshua Parker; which was read twice by its title, and referred to the Committee on Pensions.

He also introduced a bill (S. 2259) to remove the charge of desertion from William A. Graham; which was read twice by its title, and, with the accompanying papers, referred to the Committee on Military Affairs.

Mr. GRAY (by request) introduced a bill (S. 2260) granting pensions to soldiers, sailors, and marines who served ninety days or more during the war of the rebellion, at any time from March 4, 1861, to July 1, 1865, and providing pensions to widows and minor children of such; which was read twice by its title, and referred to the Committee on Pensions.

Mr. SMITH introduced a bill (S. 2261) to provide for the reimbursement of naval officers losing property on the United States steamship *Yantic;* which was read twice by its title, and referred to the Committee on Naval Affairs.

AMENDMENT TO DEFICIENCY APPROPRIATION BILL.

Mr. TELLER submitted an amendment intended to be proposed by him to the general deficiency appropriation bill; which was referred to the Committee on the Judiciary, and ordered to be printed.

THE INITIATIVE AND REFERENDUM.

Mr. BUTLER submitted the following resolution; which was read:

Resolved, That the Committee on Privileges and Elections be, and is hereby, instructed to inquire into the feasibility of applying the principle of direct legislation, through the initiative and referendum, to the legislation of the Federal Government, and report to the Senate at the opening of the regular session of Congress in December, or as soon thereafter as practicable, by bill or otherwise, the result of said inquiry.

Mr. BUTLER. I ask that the resolution may be printed and go over.

The VICE-PRESIDENT. The resolution will be printed and lie over.

Mr. BUTLER. I present sundry papers, which I ask be printed as a Senate document. They contain all the published reports from our consuls on the nature and operation of postal savings banks in foreign countries. The State Department has not yet given the information which was called for about a month ago in a resolution asking for the original reports made by our consuls in reply to the circular letter sent out by Secretary Blaine in 1881. Those reports were never printed. I have gathered all that have been printed from various consular reports and put them together in convenient form. When the other information comes, I shall ask to have it printed as a document with these reports added to it and bound together. I ask that 2,000 extra copies of this document be printed for the use of the Senate.

Mr. CHANDLER. I will state to the Senator that the information he desires has come in. I now have it; and the order may be made now to print the whole matter which he desires to have printed, including the last information, if there be no objection.

Mr. BUTLER. I ask the permission of the Senate to have this matter go over until to-morrow morning, so that I can examine it.

Mr. CHANDLER. That course is entirely satisfactory.

Mr. ALLEN. I can not hear what is being said on the other side of the Chamber. Is it in reference to the resolution the Senator from North Carolina introduced a moment ago, charging the Committee on Privileges and Elections with an inquiry?

The VICE-PRESIDENT. The Chair will state that the application in behalf of the Senator from North Carolina is to have printed as a document certain consular reports on the question of postal savings banks.

Mr. ALLEN. I was going to suggest to the Senator from North Carolina the propriety of sending the resolution to the Committee on Privileges and Elections immediately, so that it may be taken up and considered at the present session of Congress. Why not let the resolution itself go without any debate now to the Committee on Privileges and Elections, that the committee may consider it and report it back one way or the other for consideration?

Mr. BUTLER. I will say to the Senator from Nebraska——

The VICE-PRESIDENT. Will the Senator withhold a moment until the present matter is closed?

Mr. BUTLER. The Senator from Nebraska is, I think, referring to the resolution I offered this morning.

The VICE-PRESIDENT. Undoubtedly.

Mr. BUTLER. I asked that the resolution go over until to-morrow, and I shall submit a few remarks to-morrow morning with the permission of the Senate upon it. I now withdraw the request for this morning in regard to the consular reports, and to-morrow morning I will present the matter in proper form to be printed.

The VICE-PRESIDENT. The request is withdrawn.

PAY OF STENOGRAPHER.

Mr. CULLOM submitted the following resolution; which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the stenographer employed to report the hearing before the Interstate Commerce Committee on the anti-scalping bill, Thursday, June 17, 1897, be paid from the contingent fund of the Senate.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had passed the joint resolution (S. R. 50) authorizing foreign exhibitors at the Transmississippi and International Exposition, to be held in the city of Omaha, in the State of Nebraska, during the year 1898, to bring to the United States foreign la orers from their countries, respectively, for the purpose of preparing for and mak ng exhibits, with amendments in which it requested the concurrence of the Senate.

The message also announced that the House had passed a joint resolution (H. Res. 61) to provide for the immediate repair of Dry Dock No. 3 at the New York Navy-Yard; in which it requested the concurrence of the Senate.

THE TARIFF BILL.

Mr. ALLISON. I move that the Senate proceed to the consideration of House bill 379.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States.

The Secretary resumed the reading of the bill on page 114, line 3, "Schedule K.—Wool and manufactures of wool," and read paragraph 347.

Mr. MANTLE. Mr. President, before proceeding further with Schedule K, I desire to offer an amendment submitted by me some time ago, prepared by the National Wool Growers' Association of the United States. It is a substitute for the entire schedule as relates to wool. I think it appropriate to come in at this time, before we proceed to a discussion in detail of the proposed schedule. I offer the amendment, and ask that it be read.

The VICE-PRESIDENT. The Secretary will read the amendment proposed by the Senator from Montana.

The SECRETARY. It is proposed to strike out paragraphs 347 to 361, inclusive, and to insert the following paragraphs:

347. All wools, hair of the camel, goat, alpaca, llama, and other like animals, shall be divided, for the purpose of fixing the duties to be charged thereon, into the following classes:

348. Class 1, that is to say, merino, mestiza, metz, or metis wools, and including all other wools having any admixture of Merino blood, immediate or remote. Down clothing wools, and wools of similar character with any of the preceding. Also Leicester, Cotswold, Lincolnshire, Down combing wools, Canada long wools, or other combing wools having any admixture of English blood, immediate or remote, or of similar character. Also all hair of the camel, goat, alpaca, llama, and other like animals. Also Bagdad, Mossoul, Aleppo, Karadi, Awassi, Thibet, Smyrna, Egypt, Iceland, Oorfa or Orfa, and all similar wools, wherever grown. Also all wool and hair wherever grown, not hereinafter described, designated, and made dutiable.

349. Class 2, that is to say, the wool of the native sheep unimproved by breeding, grown in South America, Mexico, Turkey in Asia, Greece, Asia Minor, Syria, and wools of the same character from such native sheep known as Donskoi, Valparaiso, and Smyrna, and Russian camel's hair, excepting improved wools hereinafter provided for, and not including any wools hereinbefore mentioned. But no wool shall be deemed of this class because imported from the places named.

350. From the standard samples of all wools and hair which are now or may be hereafter deposited in the principal custom-houses of the United States, under the authority of the Secretary of the Treasury, shall be selected under his direction the standards for the classification of wools under this act, and he shall have the authority to renew these standards and to make such additions to them from time to time as may be required, and he shall cause to be deposited like standards in other custom-houses of the United States when they may be needed.

351. Whenever wools of class 2 shall have been improved by the admixture of Merino or English or other blood, or by domestication or breeding, from their original native character, such improved wools shall be classified for duty as class 1, as the case may be.

352. The duty on all wools and hair which shall be imported washed or otherwise cleansed shall be twice the amount of the duty to which they would be subjected if imported unwashed; and the duty on all wools and hair which shall be imported scoured shall be three times the duty to which they would be subjected if imported unwashed.

353. Unwashed wools shall be considered such as shall have been shorn from the sheep without any cleansing; that is, in their natural condition as grown. Washed wools shall be considered such as have been washed with cold water on the sheep's back. Wool washed or cleansed in any other manner than on the sheep's back as aforesaid shall be considered as scoured wool.

And all wools having less than 12 per cent of grease, yolk, dirt, or other foreign matter shall be deemed scoured; and wools having any admixture of Merino blood, immediate or remote, and having less than 60 per cent of grease, yolk, dirt, or other foreign matter, shall be deemed washed, and all other wools having less than 25 per cent of grease, yolk, dirt, or other foreign matter shall be deemed washed.

354. The duty upon wool of the sheep or hair of the camel, goat, llama, alpaca, and other like animals, which shall be imported in any other than ordinary condition, or which shall be changed in its character or condition for the purpose of evading the duty, or which has been sorted, or otherwise increased in value, shall be twice the duty to which it would be otherwise subject.

355. The duty upon all wools and hair of the first class shall be 12 cents per pound, and upon all wools or hair of the second class, 8 cents per pound, with an additional duty of 4 cents per pound on all skirted wools of all said classes, and double this additional rate if washed, scoured, or otherwise cleansed, and 3 cents per pound additional on Australasian wools and wools of similar light shrinkage, wherever grown, in scouring, having any admixture of Merino blood, immediate or remote, and double this additional rate if washed, scoured, or otherwise cleansed, and 3 cents additional on wools having any admixture of Saxony blood, immediate or remote, with double this additional rate if washed, scoured, or otherwise cleansed, and 3 cents per pound additional on crossbred wools having any admixture of Merino blood, immediate or remote, and 4 cents per pound additional on all Australasian lamb's wool.

All wools and hairs shall be deemed skirted which are not imported in their natural condition of whole fleeces without the removal or rejection of any part thereof.

356. If any bale or package of wool or hair specified in this act imported as of any specified class, or claimed by the importer to be dutiable as of any specified class, shall contain any wool or hair subject to a higher rate of duty than the class so specified, the whole bale or package shall be subject to the highest rate of duty chargeable on wool or hair of the class subject to such higher rate of duty. If any bale or package be claimed by the importer to be shoddy, mungo, flocks, wool, hair, or other material of any class or kind specified in this act, and such bale contain any admixture of any one or more of said materials, or of any other material, the whole bale or package shall be subject to duty at the highest rate imposed upon any article in said bale or package.

If any bale or package containing wool or hair be imported as of class 2 in this act, or be claimed by the importer to be class 2, when in fact it be of class 1;

Or if any such bale or package containing wool or hair be imported as not skirted, or not sorted, or as not having any part of the original fleece rejected, or be so claimed by the importer, but shall in fact be skirted or sorted, or having any part of the original fleece rejected;

Or if any such bale or package containing wool or hair which has been changed in its character or condition for the purpose of evading the duty thereon;

Or if any such bale or package contain wool or hair imported as of a kind subject to a lower rate of duty, or be claimed by the importer to be subject to a lower rate of duty, when the same is in fact subject to a higher rate of duty;

Or if any such bale or package contain wool or hair imported as unwashed, or claimed by the importer to be unwashed, when in fact it has been washed or otherwise cleansed;

Or if any such bale or package be imported as washed, or claimed by the importer to be washed, when in fact it has been scoured or otherwise cleansed equally with scouring;

In all such cases all wools and hair so imported shall be forfeited to the United States, and shall be held by the proper customs officer to be proceeded against for forfeiture accordingly, and shall be subject to such forfeiture whether so held or not, or the United States may proceed by action to recover the value of such wool or hair against the importer or consignee, or both.

The Secretary of the Treasury may, in his discretion, for sufficient reasons, remit the forfeiture on such terms as he may deem proper, and may make reasonable compensation for the detection of all evasions of or frauds on the provisions as to wool or hair in this schedule.

357. Wools and hair on the skin shall pay the same rate as other wools and hair, the quantity and value to be ascertained under such rules as the Secretary of the Treasury may prescribe, but the quantity shall include all, without reference to the length of the staple.

358. Wools and hair of the camel, llama, alpaca, or other like animals, and of goats of all classes and varieties and from their crosses with any animal, and all forms of wool and hair, in the form of roping, roving, or tops, and all such wools and hairs which have been advanced in any manner or by any process of manufacture beyond the washed or scoured condition, not specially provided for in this act, shall be subject to the same duties as are imposed upon manufactures of wool not specially provided for in this act, but not less than 40 cents per pound.

358½. On noils, shoddy, mungo, flocks, and rags composed wholly or in part of wool, on top waste, broken tops, laps, burr waste, slubbing waste, carded waste, roving waste, ring waste, yarn waste, garnetted waste, and all other wastes composed wholly or in part of wool or hair of any kind, and on carbonized wools and on clippings and other pieces of textile fabrics composed wholly or in part of wool, and on pieces or parts of knit cloths or other goods, the duty shall be 40 cents per pound.

359. On cattle and calf hair and other animal fibers not herein nor elsewhere specified the duty shall be 15 cents per pound.

359½. On the wool and hair of the Angora goat, and of all other goats in any respect similar thereto, and on all other animal fibers in any respect similar thereto, and on the fibers of animals being crosses of any such goats or animals, either with any other, or with any other animal, the duty shall be 25 cents per pound.

360. There shall be levied and collected duties on Peruvian cotton, otherwise called vegetable wool, 15 cents per pound, and on other raw cottons, 2 cents per pound.

361. In the construction of this schedule as to unmanufactured wools or hairs of any class or variety in any form, no dutiable article shall be exempted from the payment of duty, nor shall the duty thereon be at a lower rate because it has or may acquire a commercial name different from that generally known in common use, and the provisions of this schedule relating to animal or vegetable fibers in any form shall be liberally construed in aid of protective duties thereon.

Mr. MANTLE. I understand that it is not in order to press the substitute at this time, but that the committee amendments will first be acted upon. I will therefore withhold the presentation of the amendment at this time. I will reserve the right, however, to present it after the wool schedule shall have been concluded.

Mr. ALLISON. I do not hear the Senator from Montana.

Mr. MANTLE. I stated that I understand it is not quite in order to present the substitute at this time, but that the committee amendments ought first to be considered.

Mr. ALLISON. The Senator can offer his amendment and have it pending as a substitute.

Mr. WHITE. It is impossible to hear the discussion, owing to the confusion in the Chamber.

Mr. MANTLE. I want to proceed in order, and I do not wish to run counter to any rule.

Mr. ALLISON. The Senator from Montana can offer the amendment now and have it pending. Of course it is not in order to vote upon it until the text is perfected. Or he can withhold the amendment for the present and offer it later.

Mr. MANTLE. I wish to submit a few remarks touching this particular amendment. I can do so now or wait until the committee amendments are disposed of.

Mr. ALLISON. The Senator can use his pleasure in that respect. He can speak now or later.

Mr. MANTLE. Then, Mr. President, I desire to say briefly——

Mr. WHITE. If the Senator from Montana will excuse me a moment, I wish to ask the Senator from Iowa whether the committee have prepared and have ready for presentation to the Senate any amendments affecting the wool schedule. If so, I think it would be fair to the Senate to submit them now, that we may examine them as the debate progresses. I should like very much indeed to inspect the amendments. I suggest to the Senator from Montana that if the Senator from Iowa is to present such amendments at this time it might be well to file them for the benefit of the Senate, especially of those members who have not been within the caucus precincts.

Mr. ALLISON. Any amendments that I shall offer have been prepared by the majority of the Committee on Finance. Does the Senator wish to have all the amendments presented as respects this schedule?

Mr. WHITE. Yes, sir. I will state to the Senator from Iowa that it would be an accommodation, I think, to many Senators on this side if all the amendments were presented now, so that we would be able to examine them as the debate progresses, without asking for time.

Mr. ALLISON. I will present them in a few minutes. If the Senator from Montana desires to speak now, after he shall have concluded I will present the amendments that will be proposed.

Mr. MANTLE. I will yield to the Senator from Iowa at this time for that purpose.

Mr. ALLISON. All the amendments are not ready, but they will be ready soon.

The VICE-PRESIDENT. The Senator from Montana will proceed. The Senator from Iowa is not ready to present the amendments referred to.

Mr. ALLISON. They will be ready in a few moments.

Mr. MANTLE. Mr. President, I have but a few words to say touching the substitute which I have presented. The substitute is one that has been prepared with great care by representatives of the National Wool Growers' Association, men who have spent their lives in the business of wool growing, and who are more familiar with it, I think, than anyone else can possibly be.

I desire to say further that the proposed amendment has been considered by almost every woolgrowers' association in the country, and that generally they have given to it their unqualified indorsement. I shall not detain the Senate by stopping to read the resolutions adopted by the several State associations. I will, however, read the concluding clause of the proceedings had here in Washington by the National Wool Growers' Association on April 14 last. They say:

> We, the undersigned committee of the National Wool Growers' Association, concurring in the foregoing memorial and the draft of a tariff bill thereto appended, appointed to present this to the Senate of the United States, now perform that duty.

It is signed by eight or ten very prominent woolgrowers of national reputation among woolgrowers.

I shall also take the liberty of reading just a word from the

proceedings of the Wool Growers' Association of my own State, as that has been, among others, one of the causes of my action in presenting the amendment:

At a meeting of the Wool Growers' Association of Montana, convened in special session at the city of Helena on the 15th day of February, 1897, it was unanimously

Resolved, That we heartily indorse the schedule of duties proposed by the National Wool Growers' Association, of which the Hon. William Lawrence is president, at their conference with the manufacturers on the 9th, 10th, and 11th of February last, with one exception, viz: We urgently request that all skirted and sorted wools shall be subject to the same duties as washed wools.

I will omit the reading of the resolutions in full. The last resolution is as follows:

Resolved, That the association requests and confidently expects that the Montana Senators and Representative in Congress will do all in their power to secure for us this measure of protection at the earliest possible moment, and will insist that the act take effect immediately upon its passage and approval; and further, that they seek the cooperation of Senators and Representatives of other States similarly situated and interested to resist the passage of any tariff act that discriminates against our interests unjustly.

CORNELIUS HEDGES,
H. H. NELSON,
L. H. HAMILTON,
B. PERCY CLARK,
D. E. FOLSOM,
Committee.

Official copy.

BARNARD BROWN,
Secretary Montana Wool Growers' Association.

Those are the declarations of the Montana State Wool Growers' Association. They are directly in line and in accord with the overwhelming sentiment existing among the woolgrowers of the country.

Mr. President, other interests concerned in the pending bill do not hesitate to come to Congress and present their claims and demands. I observe in reading the morning papers even this morning that an amendment was sent to the desk and read yesterday that was written upon the official paper of the manufacturer engaged in the particular industry affected, and that the amendment was written by him, and was adopted. It is well known that the great manufacturing industries of the country are securing just about what they ask in the present tariff bill; and I submit that the woolgrowers of the United States, constituting from one to two million citizens, are the best judges of what is best for them.

They have given their lives to the business of woolgrowing. They understand it in all its details, in all its intricacies. They know better than anyone else what is their interest. They have presented this measure after long and careful deliberation, and I insist that their demands ought to be heard. I assert that the amendment which they present is far more perfect in every detail than the schedule as it appears in the proposed act, and that unless this measure of theirs is adopted the wool schedule will be imperfect, and will fail to render them the justice which is due them.

I have had something to say before upon this question, and I have pointed out in detail the imperfections of former laws and what I conceived to be the inequalities and the imperfections of the bill now pending. I will say that the substitute which I have offered will cover these defects. It will give protection, in fact, to the woolgrowers, and it will stimulate the woolgrowing interests to such a point that within a very few years we shall be able to produce all the wool that this country requires.

I assert, Mr. President, that there is no object sought to be attained by the bill under discussion so desirable, so essential to national prosperity and national independence, as the ability to grow all the wool necessary to clothe the citizens of this Republic.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 350, page 114, line 24, after the word "and," to strike out "including" and insert "all such;" and in the same line, after the word "character," to strike out "such;" so as to make the paragraph read:

350. Class 3, that is to say, Donskoi, native South American, Cordova, Valparaiso, native Smyrna, Russian camel's hair, and all such wools of like character as have been heretofore usually imported into the United States from Turkey, Greece, Syria, and elsewhere, excepting improved wools hereinafter provided for.

The amendment was agreed to.

Mr. McLAURIN. I have an amendment which I should like to introduce, so as to get it before the Senate and have it be considered as pending.

The VICE-PRESIDENT. The Secretary will read the amendment.

The Secretary read as follows:

Amend Schedule K, wool and manufactures of wool, by a horizontal reduction of 33½ per cent of all the rates of duty provided in said schedule.

The VICE-PRESIDENT. The amendment will be considered as pending.

Mr. ALLISON. The amendment will properly come in at the end of the schedule, I suggest to the Senator from South Carolina.

Mr. McLAURIN. Yes, sir; I just want to let it be considered as pending.

Mr. MANTLE. I understood a moment ago that the committee would submit their amendments, so that we could see what they are. I desire to state that I have amendments to offer which cover almost every paragraph in detail of the wool schedule, and after speaking with the Senator in charge of the bill, I prefer to wait until we have gone through with the committee amendments, and then I shall go back and offer my amendments.

The reading of the bill was resumed. The next amendment was, in the proviso of paragraph 355, page 116, line 12, after the word "wools," to strike out "as imported in 1890 and prior thereto;" so as to read:

355. The duty upon wool of the sheep or hair of the camel, Angora goat, alpaca, and other like animals, of class 1 and class 2, which shall be imported in any other than ordinary condition, or which has been sorted or increased in value by the rejection of any part of the original fleece, shall be twice the duty to which it would be otherwise subject: *Provided*, That skirted wools are hereby excepted, etc.

Mr. ALLISON. I ask that that amendment may be disagreed to.

The VICE-PRESIDENT. The question is on the amendment which has been stated.

The amendment was rejected.

The next amendment of the Committee on Finance was, in the same paragraph, line 13, after the word "excepted," to insert:

But skirted wools of the first class as imported in 1890 and prior thereto shall pay 1 cent per pound in addition to the rates imposed by this act on unwashed wools of class 1.

Mr. ALLISON. I ask that that amendment may be disagreed to.

Mr. VEST. I wish to understand this matter, Mr. President. Do I understand that the effect of disagreeing to the amendment in lines 13, 14, 15, 16, and 17 strikes out skirted wool?

Mr. ALLISON. It does.

Mr. GRAY. So that skirted wools do not receive the additional protection proposed by the amendment?

Mr. ALLISON. The effect of disagreeing to this amendment would be that skirted wools would come in with other wools.

Mr. GRAY. Without discrimination?

Mr. ALLISON. Without discrimination.

The VICE-PRESIDENT. The question is on the amendment inserting the words from line 13 to line 17, as reported by the committee.

The amendment was rejected.

The next amendment was, in the same paragraph, on page 117, line 1, after the word "unwashed," to strike out "it" and insert "the duty;" and in line 2, before the word "being," to strike out "its" and insert "the wool;" so as to read:

When the duty assessed upon any wool equals three times or more that which would be assessed if said wool was imported unwashed, the duty shall not be doubled on account of the wool being sorted.

The amendment was agreed to.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 356, page 117, line 17, before the word "cents," to strike out "eleven" and insert "eight;" and in line 18, before the word "cents," to strike out "twelve" and insert "nine;" so as to make the paragraph read:

356. The duty upon all wools and hair of the first class shall be 8 cents per pound, and upon all wools or hair of the second class, 9 cents per pound.

Mr. ALLISON. I am instructed by the majority of the Committee on Finance to modify the two amendments to this paragraph, in line 17, by striking out "eleven" and inserting "ten;" and in line 18 by striking out "twelve" and inserting "eleven;" so as to make the rates 10 and 11 cents per pound, instead of 8 and 9, as originally proposed by the committee.

The VICE-PRESIDENT. The amendment proposed by the Senator from Iowa will be stated.

The SECRETARY. In paragraph 356, line 17, before the word "cents," it is proposed to modify the amendment of the committee by striking out "eight" and inserting "ten;" and in line 18, before the word "cents," by striking out "nine" and inserting "eleven;" so as to read:

The duty upon all wools and hair of the first class shall be 10 cents per pound, and upon all wools or hair of the second class, 11 cents per pound.

Mr. GRAY. I wish to ask the Senator from Iowa a question, so as to understand this. To what class do skirted wools belong?

Mr. ALLISON. Class No. 1.

Mr. STEWART. The amendment now proposed by the Senator from Iowa reduces the rate as fixed by the House of Representatives.

Mr. ALLISON. It reduces the rate in each case 1 cent per pound below the House rate.

Mr. WHITE. That is, this amendment is compensatory with reference to the other amendment, which has been withdrawn.

Mr. ALLISON. This is in lieu of that, or a substitute for it.

Mr. STEWART. I do not think there ought to be a reduction below the House rate. The House rate is low enough on the first and second classes. Of course, on the third class the House rate is practically no protection. I should like to see the House rate adopted on the first and second class wools and the amendment of the Senate committee on the third-class wools. That is not all the protection we ought to have, but it would be a pretty good bill if we could get it in that shape. I do not see the philosophy of

cutting down the rate 1 cent per pound as now proposed. I do not see the reason for it. I think even the House rate is too low.

The VICE-PRESIDENT. The question is on the adoption of the amendment proposed by the Senator from Iowa in behalf of the committee to strike out and insert.

Mr. STEWART. I am opposed to reducing the rates below those fixed by the House on first and second class wools; and I ask for the yeas and nays on the amendment.

The yeas and nays were ordered.

Mr. VEST. As I understand the effect of this action of the committee, it is to reduce these duties. I shall vote for the reductions, and then vote against the whole schedule.

Mr. GRAY. May I ask in what form the question is put before the Senate, whether it is to agree or to disagree to the amendment of the Senate committee?

The VICE-PRESIDENT. To agree to the Senate committee amendment.

Mr. ALLISON. The form of the amendment is to strike out "eleven" and insert "ten," in line 17, and to strike out "twelve" and insert "eleven," in line 18.

Mr. GRAY. What becomes of the original amendment of the committee?

Mr. ALLISON. I modify that amendment in the form now proposed.

Mr. GRAY. Then I should like to understand if the Senator has withdrawn the committee amendment?

Mr. ALLISON. Yes. The vote will be taken on striking out "ten" and inserting "eleven," in line 17, and on striking out "twelve" and inserting "eleven," in line 18.

Mr. STEWART. They are both in the same paragraph.

Mr. MILLS. I ask if there is a corresponding reduction in the finished goods? Does the committee contemplate that also?

Mr. ALLISON. That is the understanding.

Mr. MANTLE. Mr. President——

Mr. ALLISON. If the Senator will allow me, the real essence of this question is to substitute "10 cents per pound" on first-class wools for "eight," as originally proposed by the committee, and "11 cents" on second-class wools in place of "nine," as originally proposed by the committee.

Mr. WHITE. It appears to me to be difficult to intelligently vote upon this proposition unless we have the committee amendments before the Senate. I understood the Senator from Iowa to state that the amendments have been practically prepared, but have not yet been presented, I believe. It is very difficult to tell what effect an amendment proposed in this way may have upon the entire schedule when all the amendments proposed by the Senator from Iowa are presented to the Senate. It appears to me we ought to have the whole subject before us. Each one of these paragraphs is intimately related to the other.

Mr. ALLISON. I will state to the Senator that the amendments will be prepared in a few minutes, and I may state that the pending amendment makes the bill substantially as the committee propose.

Mr. WHITE. I should be glad to have the statement made as to the amendments the committee intend to offer.

Mr. ALLISON. In the next paragraph, 357, the committee propose no change from the recommendation already made; and the same is true as to paragraph 358. For paragraph 359 we intend to substitute a paragraph providing that wools on the skin shall pay 1 cent less than would be paid on wools of like description.

Mr. WHITE. One cent less?

Mr. ALLISON. One cent less.

There is a modification of paragraph 360 by making three classes really. Top waste and the higher classes of waste mentioned there we propose to make dutiable at 30 cents a pound, shoddy at 25 cents, and other wastes at 20 cents. There is no change to be proposed to paragraph 361; that is to say, the committee propose that the paragraph shall remain as it was originally recommended.

In paragraph 362 the committee do not modify their amendment, nor do they modify the amendment in paragraph 363.

Mr. WHITE. Does the proposed modification on page 121 stand?

Mr. ALLISON. That stands. In paragraph 364 we propose to strike out the word "skirted" where it occurs in two places, retaining the amendment otherwise.

Mr. WHITE. That is to say, all of the amendment on page 122 is retained, with the elimination of the word "skirted."

Mr. ALLISON. With the elimination of the word "skirted." In paragraph 365, line 25, we propose to strike out the word "plain," and disagree to the amendment proposed by the Senate committee on the same line and retain the House provision "for underwear." In line 2, page 123, the committee propose to strike out "1¼ pounds" and insert "2 pounds;" in line 20, to strike out "and all flannels other than plain;" on page 124, line 6, to strike out "five" and insert "six;" so as to read "6½ cents per square yard;" in line 8, to insert "seven and one-quarter" instead of "six and a half." In paragraph 367 we propose to retain the amendments of the committee, except on line 8, to insert "ten and a half" instead of "nine."

In paragraph 368, line 10, we propose to strike out "one-half," so that it will read:

The duty per pound shall be four times the duty imposed by this act.

In line 12 we propose to strike out "sixty" and insert "fifty" five." In line 24 of paragraph 369 we propose to strike out "sixty-and insert "fifty-five."

In paragraph 371 we propose to insert "sixty-two" instead of "sixty" in line 6. In line 9, paragraph 372, we propose to insert "forty-five" instead of "forty-four." In line 13, paragraph 373, we propose to insert "forty-one" instead of "forty;" and in line 17, paragraph 374, to insert "twenty-nine" instead of "twenty-eight."

The committee propose to strike out paragraph 376½, relative to "Oriental, Berlin, and similar rugs and carpets woven whole for rooms" and in lieu thereof to insert:

Oriental, Berlin, Aubusson, Axminster, and similar rugs, and carpets woven whole for rooms, 10 cents per square foot and 40 per cent ad valorem.

Those are the amendments which the committee will propose.

Mr. VEST. I want to call attention, for the benefit of my friends on this side of the Chamber who, I hope, agree with me in regard to this whole schedule, to the difficulty which presents itself to us in voting upon the question on which the Senator from Nevada [Mr. STEWART] has called for the yeas and nays.

It is true that the proposition made now by the majority of the Finance Committee is a reduction of 1 cent per pound on the House rate, but it is an increase of 2 cents upon the amendment which has been pending before us as recommended by the majority of the Finance Committee.

In regard to the next classification, whilst it is a reduction of 1 cent on the House rate, it is an increase of 2 cents on the 9-cent rate which was proposed heretofore by the committee.

With my views upon this whole woolen schedule, as a matter of course, I shall vote against the proposition of the committee, because it is an increase, although I propose, at the proper time, to vote to put the whole schedule upon the free list, where it now is. Our vote on this side, therefore, as the question now stands, will be "nay."

Mr. MILLS. What is the pending amendment? I want a separate vote on each amendment.

The VICE-PRESIDENT. The Senator from Texas, of course, may have a separate vote if he so desires.

Mr. MILLS. I want a separate vote.

Mr. FORAKER. I ask that the amendment upon which the roll is to be called may be stated.

The VICE-PRESIDENT. The Senator from Texas [Mr. MILLS] requests a separate vote on each amendment. He is entitled to have it. The amendment before the Senate is to strike out "eleven" and to insert "ten."

Mr. PETTUS. I desire to know whether we can not vote on the motion to strike out and then on the motion to insert?

The VICE-PRESIDENT. The Chair answers that that is not possible under the rule. The motion of the committee is to strike out and insert.

Mr. MILLS. Let us vote on that question now.

Mr. TELLER. I want to ask the acting chairman of the Committee on Finance, as to this duty, whether there has been a corresponding reduction in the duty on the manufactured goods also? The Senator reads to us what he proposes, but it is utterly impossible to follow him and keep advised of what he is going to do. I want to know whether that has been done upon principle or whether it is simply an arbitrary reduction?

Mr. ALLISON. I will answer the Senator that it is a reduction, and a large reduction, from the House duty, and that there is also a corresponding reduction from the House duty as to compensatory duties. It is a corresponding increase from the amendments originally proposed by the Senate Finance Committee, and it is done upon an exact arrangement as respects the increase per pound on wools.

Mr. TELLER. Then do I understand from the Senator from Iowa that the committee in making these changes have not pursued an arbitrary course, but that the reductions and compensatory duties correspond?

Mr. ALLISON. Yes.

Mr. WHITE. I rise to a parliamentary inquiry to ascertain the status of this matter. Has the amendment of the committee inserting "eight" instead of "eleven" cents been adopted?

Mr. MILLS. That is the very question I wish to ask.

The VICE-PRESIDENT. It has not.

Mr. WHITE. Then it is manifest that there can be no motion to strike out "eight" and insert "ten."

Mr. MILLS. I understand the committee have withdrawn their amendment for "eight," and in lieu of it they now offer "ten" instead of "eleven."

Mr. ALLISON. That is the purpose, and we want to do it in a parliamentary way.

Mr. TELLER. The committee can not do that.

Mr. MILLS. No; "eight" has been stricken out. Therefore the motion now is to insert "ten" instead of "eleven." I wish the Senator from Iowa would make the motion that way.

Mr. ALLISON. Very well. I withdraw the amendment to strike out "eight" and insert "ten."

Mr. MILLS. Very well.

Mr. TELLER. Withdraw the amendment for "nine."

Mr. MILLS. The Senator proposes to strike out "eleven" and to insert "ten."

Mr. ALLISON. I wish to get at the result I seek. I am not particular how it is done.

Mr. MILLS. I am.

Mr. WHITE. It appears to me plain enough that the word "eight" has never been inserted. It was proposed by the committee, but not acted upon. Now the committee does not desire action upon it.

Mr. MILLS. They withdraw it.

The VICE-PRESIDENT. That is withdrawn, and the motion made by the Senator from Iowa, as the Chair now understands, is to strike out "eleven" and insert "ten."

Mr. MILLS. That is it. Now, we on this side vote "yea."

Mr. MANTLE. Mr. President, I rise to a parliamentary inquiry. It is very difficult to distinguish what is being said on this side of the Chamber. I am very much interested in this debate, and I have scarcely been able to hear a word of what has been said on my left. I wish to inquire if it is in order to amend the suggestion of the committee—that is to say, is it in order to move that "eleven" be substituted in place of "ten," as proposed by the committee?

Mr. MILLS. That is already in the bill.

The VICE-PRESIDENT. That is already in the bill, and the Senator will get at what he desires by voting "nay" on the motion of the committee.

Mr. GRAY. That is right.

The Secretary proceeded to call the roll.

Mr. MORRILL (when his name was called). I am paired with the Senator from Tennessee [Mr. HARRIS], and therefore withhold my vote. I shall not announce this pair again to-day.

Mr. PENROSE (when his name was called). I am paired with the junior Senator from Delaware [Mr. KENNEY]. Were he present, I should vote "yea."

Mr. RAWLINS (when his name was called). I am paired with the junior Senator from Ohio [Mr. HANNA].

The roll call was concluded.

Mr. PENROSE. I am informed that the junior Senator from Delaware [Mr. KENNEY], were he present, would vote "yea." Therefore I vote "yea."

Mr. BURROWS. I am paired with the senior Senator from Louisiana [Mr. CAFFERY].

The result was announced—yeas 55, nays 13; as follows:

YEAS—55.

Allen,	Faulkner,	Mason,	Roach,
Allison,	Frye,	Mills,	Sewell,
Bacon,	Gallinger,	Mitchell,	Smith,
Baker,	Gear,	Morgan,	Spooner,
Berry,	Gorman,	Murphy,	Thurston,
Chandler,	Gray,	Pasco,	Tillman,
Chilton,	Hale,	Penrose,	Turpie,
Clay,	Harris, Kans.	Perkins,	Vest,
Cockrell,	Hoar,	Pettus,	Walthall,
Cullom,	Lodge,	Platt, Conn.	Wellington,
Davis,	McEnery,	Platt, N. Y.	Wetmore,
Deboe,	McLaurin,	Pritchard,	White,
Elkins,	Mallory,	Proctor,	Wilson.
Fairbanks,	Martin,	Quay,	

NAYS—13.

Butler,	Heitfeld,	Shoup,	Warren.
Carter,	McBride,	Stewart,	
Clark,	Mantle,	Teller,	
Foraker,	Pettigrew,	Turner,	

NOT VOTING—21.

Aldrich,	George,	Jones, Nev.	Nelson,
Bate,	Hanna,	Kenney,	Rawlins,
Burrows,	Hansbrough,	Kyle,	Wolcott.
Caffery,	Harris, Tenn.	Lindsay,	
Cannon,	Hawley,	McMillan,	
Daniel.	Jones, Ark.	Morrill,	

So the amendment was agreed to.

The VICE-PRESIDENT. The question now is on the amendment proposed by the Senator from Iowa [Mr. ALLISON], which will be stated.

The SECRETARY. On page 117, paragraph 356, line 18, before the word "cents," it is proposed to strike out "twelve" and insert "eleven;" so as to read:

Upon all wools or hair of the second class, 11 cents per pound.

The amendment was agreed to.

Mr. CARTER. Mr. President, this vote registers a signal triumph for a reduction of duties on the woolen schedule. It will be noted with some concern, I take it, that the votes combined for this reduction will not combine to pass the bill. It is obvious that a reckoning is necessary relative to the woolen schedule, and I therefore request that its further consideration at this time be discontinued, and that all matters in the bill relating to the woolen schedule be for the time being passed over.

The VICE-PRESIDENT. Is there objection to the request made by the Senator from Montana?

Mr. GRAY. I rise to a parliamentary inquiry. I should like to understand precisely what is the motion of the Senator from Montana.

Mr. CARTER. The Senator from Montana has not made a motion. He has preferred a request——

Mr. GRAY. Oh!

Mr. CARTER. To the committee in charge of the bill to pass over this portion of the bill for the time being.

Mr. ALLISON. Mr. President——

Mr. MILLS. Before leaving this paragraph, I desire to make a motion in connection with it.

Mr. ALLISON. In response to the Senator from Montana, I will say that by unanimous consent this schedule was to be taken up to-day. I should be very glad to proceed with it. Is there any special reason why it should be passed over?

Mr. FORAKER. If the Senator from Iowa will allow me, I will say that when the unanimous consent was given that the woolen schedule should be taken up to-day it was understood by some of us that we had an agreement as to what would be the rates reported by the committee. I do not understand now that we have any agreement, as I learned to my surprise after I came into the Senate Chamber to-day. We desire that the matter may be passed over, in order that we may have an agreement. That is all, and unless we can have an agreement, each Senator will have to act for himself with regard to this schedule.

Mr. ALLISON. Each Senator seems to have done that already.

Mr. FORAKER. The Senator from Ohio has done it.

Mr. ALLISON. I supposed we had not an agreement but an understanding as respects this schedule, and if the Senator——

Mr. FORAKER. There can be no question about the agreement had. The agreement which I agreed to was put in writing by notations in the bill, and not until I came into the Chamber this morning did I know there was any dissent as to any proposition involved in those proposed amendments, and I do not propose to be bound by an agreement that is not an agreement from the beginning to the end of it.

Mr. ALLISON. If there was any agreement in writing, I never saw it.

Mr. FORAKER. I say by notations in the bill.

Mr. ALLISON. And if the Senator imputes to the committee or any member of the committee a disposition to violate any understanding, of course I resent it in mild terms.

Mr. FORAKER. I do not impute anything to anybody, but I state a fact, and I want to state it with enough distinctness to be understood.

Mr. ALLISON. I wish to state also with sufficient distinctness that any amendment which I have offered thus far to the bill has been offered in accordance with the unanimous agreement of the majority of the Committee on Finance, and with the approval, as I understood, of the Senators on this side of the Chamber. If I propose any amendment which has not been substantially agreed to, I am willing to pass it over, and I am also willing for myself to pass over the entire schedule. If I have any purpose personally, or if the committee has any, it is to facilitate the consideration of the bill, and to consider it fairly and justly.

Mr. FORAKER. It is true, as the Senator from Iowa states, that each amendment he has so far offered has been in accordance with the understanding we had, but it is also true, with respect to third-class wools, that an important amendment that I supposed was agreed to has not been offered, and a new feature has been developed since we came into the Chamber this morning which I never heard of before, and which the Senator from Iowa, if he will allow me, in view of what he has himself said, must never have heard of before. I am not imputing bad faith to anybody. I am simply saying to him now, in open Senate, as I said to him a while ago at his desk, that until this matter is settled I can not agree to the schedule. It may be that what is proposed in that respect is all right, but I want to know about so important a matter as this before I proceed with it to conclusive action, and everybody concerned should know just what the facts are.

Mr. BURROWS. I desire to ask the Senator from Ohio whether there has been any change in regard to third-class wools from what was practically agreed to?

Mr. FORAKER. Yes, sir; in this respect, if the Senator wants me to specify it here.

Mr. BURROWS. I should be glad if the Senator would do so, because I am not aware of any.

Mr. FORAKER. We understood that if third-class wools were given a specific duty, then the scoured third-class wools should

have the triple duty just as first and second class wools have a triple duty when they come in scoured. We did not suppose there was any dissent from that. Everybody acquiesced in it who was consulted in regard to it, and our agreement as to rates was made with that distinct understanding. Now, for the first time, after the schedule is entered upon, we are notified that there is objection to it; and we appeal for an opportunity to investigate and see if the objection be well taken. If it be something we should concede, we will do so. But we do not want to be driven to do this until we know what we are doing.

Mr. ALLISON. The Senate Chamber is not the place where people are driven.

Mr. FORAKER. That is the reason why I will not be driven.

Mr. ALLISON. The Senator from Ohio will allow me to say a word in response to that suggestion. If the Senator from Montana had not risen in his place and said there was a combination of people who favored this amendment who would not favor the passage of the bill, I should have risen in my place and asked that the two next paragraphs be postponed in order that we might have an opportunity to meet the difficulty which is suggested by the Senator from Ohio. But that is a very different thing.

Now, it was suggested to the committee that inasmuch as we had proposed a specific duty upon third-class wools, third-class wools scoured should pay a triple duty. For the moment, I said to the Senator from Ohio a day or two ago—it was two days ago, I think—that that seemed to me to be a fair thing to do; but I was not aware until I examined it later on that as respects third-class wools, on pages 115 and 116, there are definitions of what are known as washed, unwashed, and scoured wools:

> Unwashed wools shall be considered such as shall have been shorn from the sheep without any cleansing; that is, in their natural condition. Washed wools shall be considered such as have been washed with water only on the sheep's back or on the skin. Wool washed in any other manner than on the sheep's back or on the skin shall be considered as scoured wool.

Now, it is perfectly well known to those who have investigated it that at least one-half of these carpet wools or third-class wools come in in a condition other than that described here as washed wool. In other words, as to Donskoi wools and other wools of the East, the India wools, the Scotch highlands, and so on, the sheep is shorn, and then the wools are put into the rivers, little rivers in the mountain side, and they are washed there and come in in that condition.

This definition of wool washed in any other manner than on the sheep's back would make these scoured wools pay 21 cents instead of 7 cents a pound, which would be an absolutely prohibitory duty. Therefore it was that with these definitions I was not willing, I will say frankly to the Senator from Ohio, to consent that the wools known as third-class wools should have that triple duty imposed upon them. I was not willing to do so when the duty that we have already put upon third-class wools is a much higher duty than that imposed by the House, and a much higher duty than has ever been imposed upon this class of wools in our history.

Mr. WARREN. Will the Senator from Iowa allow me?

Mr. ALLISON. Certainly.

Mr. WARREN. The Senator probably overlooks the fact that the rate proposed is a lower one upon third-class wools of certain grades, although higher upon others. The statement would be somewhat hasty and inaccurate to say that it is a higher rate upon all third-class wools than the McKinley rate, because upon certain classes it is lower.

Mr. ALLISON. If we are to get in a contest about this question, I wish to say to the Senator from Wyoming that, with rare exceptions, the third-class wools are higher in the pending bill than in the House bill, and they are higher than under the McKinley law. Then, when it was proposed, in the face of the definitions here, that we should triple the duty upon these wools, I objected to it, but I was willing that the matter should be passed over—I intended to make such a motion—until every Senator on this floor, and on both sides, should have knowledge upon this subject, and until an amendment could be prepared which would cover the difficulty suggested to me by the Senator from Ohio, and an amendment is now being prepared by experts.

But we are thrown into a condition of excitement here because, forsooth, some of us have voted—and I need not say why or how—to reduce the first and second class wools 1 cent below the House rate and increase them 2 cents per pound above the rate which the Finance Committee fixed upon those wools after pretty full deliberation and consideration. Therefore it is that I am not to be driven for one from those positions by any threats from anybody. It is said, simply because we were not prepared to put the word "scoured" in these two paragraphs and allow them to be passed over for purposes of consideration, that we are a combination here with a view to secure lower rates, and that this combination will not vote for the bill in the end. I am for the bill as it shall be framed in the end by a majority of our associates in this Chamber and on both sides, but I do not wish to be charged as a member of the Finance Committee, either directly or covertly, with dealing with this question in any other than in an open, straightforward way, justly and fairly as I understand it with respect to all the various schedules.

Mr. FORAKER. Mr. President, if there be anybody here excited, we have only to look about the Chamber and listen to those who speak to discover who the excited individuals are. I have not cast any imputations upon anybody, and I have not made use of any language that I am aware of to which anyone has a right to take exception. I have simply stated the fact, Mr. President, that we did have an agreement, and that a new feature was imported into the question this morning. It may be that the Senator from Iowa is right in the view he takes of the matter. What I said to him was that I was not prepared to discuss it. I had not been given time even to look at the bill in that particular.

All I asked was that we might know before we take action what we ought to do in regard to it, and therefore when the Senator from Montana asked that the consideration of third-class wools be postponed, his request met with my approval, not only because I want to investigate it, but because others want to investigate it.

Mr. ALLISON. That was not the request of the Senator from Montana. It was that the wool schedule in every part should be passed over.

Mr. FORAKER. Is not that proper enough? The Senator from Iowa has already stated that he is having prepared now an amendment to the bill in regard to the language which should be employed as to third-class wools, whether or not they should be brought in under a triple duty when scoured.

Mr. ALLISON. Yes, sir.

Mr. FORAKER. And if we are to go back and consider that—for it has already been passed over—it is necessary to consider, if we are to have a caucus, the whole wool schedule.

The fact that the Senator from Montana used the word "combination" should not, I submit, induce the Senator from Iowa to deny to us that which we had recognized the justice of and said here now he had proposed in his own mind to give us, but of which he had not told me or any other Senator who is acting here with me that he would grant to us.

Mr. STEWART. I apprehend there must be some difficulty in ascertaining what is wool washed on the sheep's back and what is washed wool in the stream. I do not know whether that is easily ascertainable. There must be some obscurity about the whole question in making the classification. It seems to me, having regard to the subsequent woolen schedule, that the duty on wool ought to be fixed before the schedule on woolens can be taken up intelligently.

Mr. FORAKER. I had only one other remark which I intended to make when the Senator from Nevada interrupted me. That is, that we agreed to 10 and 11 cents on first and second class wools and 4 and 7 cents on third-class wools, upon the distinct understanding that scoured third-class wools were to come in with triple duty.

Mr. QUAY. May I ask the Senator from Ohio a question?

Mr. FORAKER. Certainly.

Mr. QUAY. To what agreement does the Senator from Ohio allude?

Mr. WHITE. Mr. President, it is impossible to hear what is going on.

Mr. QUAY. Who were the parties to the agreement?

Mr. FORAKER. It was an informal agreement. Those representing the woolgrowing States, as they are called, had a meeting. The Senator from Pennsylvania was invited to attend the meeting, and I believe he was present.

Mr. QUAY. I was not.

Mr. FORAKER. My recollection is that the Senator was present. We met for the purpose of determining what rates could be agreed upon, and we agreed upon that particular feature of it at that time. I remember stating that to the Senator from Pennsylvania, and he assented to it, as I remember it. At any rate, that was our distinct understanding. We went before the Finance Committee and they agreed to that proposition. I did not know there was any dissent until now. It may be that the Senator from Iowa is entirely right about it, but I want to know about it before I am required to vote.

Mr. PLATT of Connecticut. I desire to say, as one member of the Finance Committee, that I never heard this proposition at all suggested by anyone to the Finahce Committee or any members of the committee.

Mr. FORAKER. I will say to the Senator from Connecticut that he did hear it—he has forgotten about it—unless he was absent from the meeting of the Finance Committee the evening after the agreement was arrived at, for I carried it into the Finance Committee's room, and I read each and every one of these amendments. The Senator from Connecticut—I remember now—was present, and the Senator from Connecticut, with a blue pencil, wrote down in the copy of the bill which he had before him the very identical amendment about which I am speaking.

If he will find that copy of the bill, he will see that that is true, for this was gone over in detail.

Every Senator who was present—and there were twenty, probably, in the room—will remember that every item of the agreement was gone over carefully. It was no light matter. This has been the subject of a great deal of controversy, and that point, as well as every other, was not only commented upon, but it was placed in writing in the Senator's bill, and in the bill of the Senator from Iowa [Mr. ALLISON] also. The Senator from Connecticut, now that his recollection is refreshed, will be able to recall it.

Mr. PLATT of Connecticut. If I said I never was present at a meeting of the Finance Committee when the matter was talked of or presented, I ought to qualify the statement. There was a meeting in which certain suggestions as to what was wanted by certain Senators were presented to the Finance Committee, and these among a great many others. The suggestions have not been adopted; they have not been recommended. What I intended to say was that I had never been present at a meeting of the Finance Committee where it was assented to. I am told I used the words "at a meeting where it was presented."

Mr. FORAKER. Let me refresh the Senator's memory. I do not know what he calls an agreement on the part of the Finance Committee. This occurred, and it has already been adverted to by the Senator from Iowa: When I commented upon that point, and had the notations made in the several bills, the Senator from Iowa, whom I was addressing as the chairman of the committee, said that of course if third-class wools were to be given a specific duty, third-class wools scoured should have a triple duty, and everyone there assented to that, and I supposed that amounted to an agreement. When the chairman of the committee so expresses himself, and his associate members of the committee sit by and apparently acquiesce, I think I have a right to say an agreement was arrived at. That is precisely what occurred.

Mr. PENROSE. Will the Senator from Ohio permit me to interrupt him?

Mr. FORAKER. Certainly.

Mr. PENROSE. I will remind the Senator of the fact that he and I sat up until a very late hour last night, and the Finance Committee kindly waited on us until nearly midnight, pending the endeavor of all interests involved in this schedule to come to a conclusion, and that they were utterly unable to come to such conclusion.

Mr. FORAKER. That was on a different point, the Senator will allow me to remind him. There was no question at all at issue last evening upon the matter of scoured third-class wools.

So I submit that I am justified in all I have said as to what occurred and as to the understanding I had. But, however all that may be, I have not been imputing any improper motive to anybody, but simply stating the fact about a most important matter. I have been entirely taken by surprise in finding I have no agreement when I supposed I had one, and I think it is but reasonable that we should have a right to reconsider the matter in the manner proposed by the Senator from Montana, in order to arrive at conclusions upon all these propositions.

Mr. HALE. It is pretty apparent to me, and perhaps to the Senate, that the Senators are not really very far apart in this matter and that there is no real cause for difference between them. The Senator from Iowa has shown very clearly by his reference to the descriptive clauses that certain matters considered before that clause was examined were varied, and ought to be varied, by the construction given to that clause. I do not believe that Senators who appear to be at odds now upon these two paragraphs will be found having any differences when they consider the descriptive classification which has been referred to by the Senator from Iowa.

I would ask the Senator from Ohio and the Senator from Iowa whether there is any objection, under these conditions and the likelihood of coming to a plain accord without trouble, to letting the paragraphs be passed over for the present? Does the Senator from Iowa object to that?

Mr. ALLISON. It was my purpose to ask that they be passed over for the reason that we have these apparent misunderstandings. I have no intention, so far as concerns the Senators who state that they did not understand this matter as I understood it, of forcing them into a consideration of the question of third-class wools, and therefore——

Mr. JONES of Arkansas. We can not hear any of the caucus debate.

Mr. ALLISON. When the Senator from Montana rose I was about to rise and ask that the paragraphs be passed over.

Mr. HALE. Now I ask whether the Senator objects to their being passed over?

Mr. ALLISON. Certainly not.

Mr. HALE. The Senator from Ohio asks that they be passed over.

Mr. FORAKER. I have asked for it, and that is all I have asked, and I have learned for the first time, in his answer to the Senator from Maine, that the Senator from Iowa is willing to have them passed over.

Mr. HALE. It seems to me I stand equally distant physically between the parties, and am in fair condition to say that when the Senator from Ohio asks that these two paragraphs be passed over, and the Senator from Iowa says he is willing they shall be passed over, there is not really any difference which ought to embarrass us or take up any more time. I hope that by unanimous consent it will be ordered that these two clauses be passed over, and then we may make such disposition as is necessary with respect to the rest of the bill. But there is no real subject of controversy here.

Mr. CARTER. It is and has been far from my purpose in any manner, directly or indirectly, to increase the burdens of the Finance Committee. We have all witnessed here from day to day the laborious struggle in which they have been engaged. However, the statement made by me was not the beginning of this matter, involving the passage of these items for the day. Before they were reached, members of the committee will recall that earnest efforts were made, privately, it is true, but nevertheless earnestly, that these matters be passed over until some arrangement could be reached satisfactory or with reasonable satisfaction to all the contending elements. It was suggested to us that to pass them over for this day was an impossibility; that the passage of the paragraphs would involve an adjournment of the Senate.

Under these circumstances, upon the disclosure of certain conditions by the vote, it seemed to me the current of events had added admonition to the suggestions previously made, and that the propriety of passing them over could no longer be questioned. I requested that all the paragraphs relative to wool and woolens be passed over. That request I am perfectly willing to modify to the extent the case will justify. It must be borne in mind that connected with the third-class wools are certain compensatory duties that can not in the nature of things be intelligibly or properly considered until the basis upon which the figuring is to be done shall have been fully determined. I therefore request that, in addition to paragraphs 356, 357, and 358, all paragraphs dependent upon or relating to those paragraphs directly or indirectly, concerning carpets or their manufacture and the compensatory duties incident thereto, be likewise passed over. I limit the request to that extent.

Mr. ALLISON. That is quite agreeable to me, if it is to other Senators; and that will include passing over paragraphs 370 to 376, inclusive. Those are the only paragraphs that are affected by third-class wools.

Mr. GRAY. Just state them again, if you please.

Mr. ALLISON. Paragraphs 370 to 376.

Mr. HALE. The first one is 357.

Mr. ALLISON. Paragraphs 357, 358, and probably 359. I will ask that the latter be passed over also, although it is not directly connected.

Mr. HALE. Now the other three.

The VICE-PRESIDENT. Is there any objection to the request of the Senator from Montana?

Mr. WHITE and Mr. VEST. I object.

The VICE-PRESIDENT. Objection is made.

Mr. VEST. Mr. President, I have had a novel experience today. I have been enabled to hear the debates of a Republican caucus. It is the first time in my life that that privilege has ever been accorded to me, and I have been somewhat amused——

Mr. ALLISON. Will the Senator allow me to interrupt him for a moment?

Mr. VEST. Certainly.

Mr. ALLISON. I will say that the subject of wool has never been discussed in a Republican caucus.

Mr. GRAY. Until to-day.

Mr. ALLISON. Until this morning. [Laughter.]

Mr. TELLER. I suggest that that is what is now the difficulty.

Mr. VEST. That is the trouble. I heard the Senator from Ohio [Mr. FORAKER] say, unless my hearing has entirely disappeared, that at a convention or conference or caucus, to use the last word, where some twenty Senators were present, this agreement was come to, which he says was in writing; and the junior Senator from Pennsylvania [Mr. PENROSE] supplemented it——

Mr. FORAKER. I said in writing, by notations made in the bill, not in the shape of a formal agreement.

Mr. GALLINGER. Not in caucus?

Mr. FORAKER. No; in the committee room.

Mr. VEST. At any rate, as one of my colleagues suggests, the statute of frauds could be pleaded against it. It was in writing.

Mr. FORAKER. It did not seem to be signed by the party to be charged.

Mr. VEST. That seems to be the trouble on the other side, as to who was charged and who was discharged. I understood the junior Senator from Pennsylvania to supplement the testimony

of the Senator from Ohio by stating that the members of the Finance Committee and others were wrestling with this proposition until midnight, until "the wee sma' hours ayant the twal'."

The great pacificator from Maine assures us that there is no trouble about this matter on the other side, but peace reigns supreme. I have heard that Senator so often declare here in mellifluous tones that there was peace in Cuba that I am disposed to doubt his judgment in that assertion. [Laughter.]

We are asked now to do what? This great wool schedule has been twice postponed at the instance of our friends upon the other side in order that they might bring about the state of peace of which we have heard so much. Now, when prosperity is returning to this country, when the prostrate manufacture and agriculture and commerce of the country are pleading with us to pass this tariff bill and let the sunshine again illumine the land, we are asked to stop until the Republican caucus can adjust their little party differences.

I insist, Mr. President, that we shall go on with the public business. If our friends upon the other side can not adjust their differences upon this floor, let them take a recess or an adjournment and retire to the privacy of their council rooms and come together, if it be possible. Do not let us have the example of all the business of this country stopped ostensibly by Democrats (as we read every day in the protection organs) who are holding up the Senate and refusing prosperity to the people. Do not let that be said when in truth all the difficulty comes from the fact that our friends upon the other side can not reconcile the question as to who shall have the largest part of the swag.

Mr. TELLER. Mr. President, I rose to object to the postponement of this schedule when the Senator from Missouri objected. I did not do that because I wanted to continue the condition that was prevalent here a few moments since, but it seemed to me that if we were to do anything with this bill in accordance with the public demand we ought to proceed.

The bill was reported to the Senate on the 1st day of April. It went into the Committee on Finance and remained there until the 4th day of May. I admit that the bill had no proper consideration where it should have had it. I admit that it came here in a very crude and unsatisfactory manner. I do not know that I intend now to criticise the Committee on Finance for the delay in presenting it to the Senate on the 4th of May.

But it has been a month and twenty days since the bill came to the Senate. I believe after it reached the Senate the first two weeks it was, by common consent, laid aside. I was not present at the time; but it seemed to me that if the bill was about to bring to the country the great blessings that its advocates and supporters supposed, it was very nearly criminal to postpone it for two weeks. I should not have minded that very much if I had not found that a large proportion of the Senate—not a majority, but a large number—have been daily caricatured and abused by the Republican press of the country because of their opposition to and delay of the bill.

Called away from the Senate myself and at a distance, where I could look on, it seemed to me that if there was any unnecessary delay it was not to be charged to the Democratic portion of the Senate nor to those who heretofore had acted with the Republican party, nor the representatives of the People's Party in this Chamber. If there was any unnecessary delay, which I do not mean to say there has been, it should have been charged to the Republicans in charge of the bill; and it does seem that, after the Senate had had the bill from the 1st of April down to the 22d of June, questions of the kind that are presented this morning ought to have been decided upon.

Contrary to the usual custom, I believe the Republican caucus determined that every member of the organization here should follow the committee. I do not know, not having been present at the caucus and not being entitled to its secrets, whether the committee was to submit these questions to the caucus or not; but I supposed by the newspaper reports that the Republican members of the body had surrendered their judgment to the Finance Committee, and that they would arrange a tariff bill that would get the united support of every Republican in the Chamber. It was apparent to everybody in the United States that unless they could secure the unanimous and united action of all the Republicans in the Senate and in addition some Democrat, some Populist, or some silver Republican, the bill could not pass the body. They either must secure the support of some man who is in opposition to the Administration, or they must at least secure his acquiescence to a degree that he shall not vote against it, or else it can not become a law.

Mr. President, we have heard from a great number of the Republican members of this body through the public press. I do not say all, but I think three-quarters of the Republican members have been quoted in the public press, in which they have predicted that the only thing necessary to bring about the era of prosperity, the sunshine of good times the Senator from Missouri speaks about, was the passage of this bill. The President of the United States, in Philadelphia the other night, told us and told the country that you are making great progress; you have a new house started; you can not move out of the old house into the new until the new house is completed, but it will be soon completed in the shape of a tariff bill, and when that is accomplished prosperity will come in every portion of our land.

I hope the President of the United States is a prophet. I hope he is correct. I can not say that I hope it, because that means expectation, but I wish he were a prophet. I wish that statement were true. I do not myself believe it. Yet, Mr. President, those who assert that all that the country is now suffering from is a want of more taxation, is a want of more revenue, ought not to stand here and ask us in the middle of June to postpone any bill of this character when they are complaining that fair discussion can not be had of it, when every speech that is made in opposition to the bill is declared to be for the purpose of delay and to retard and hinder the glorious prosperity which they predict is about to come.

Mr. MASON. Will the gentleman yield for a question?

Mr. TELLER. I will.

Mr. MASON. Do you not know, as well as every other Senator here, that the mere passing over of one schedule does not delay the work on the bill, and that the proposition made by the Senator from Montana is to continue our work on the bill, but to pass over these paragraphs only temporarily?

Mr. TELLER. I know nothing of the kind. I do not allow the Senator from Illinois to assume that such is the fact and put words in my mouth. I challenge that statement. This wool schedule has been known by the committee to be a difficult one to deal with. They have been told by certain Senators from the West that unless they arranged the schedule satisfactorily to them they would not vote for the bill. I doubt very much myself whether the Senators who made that threat will carry it out.
